On the opposite side of the Forth and almost in visible communication with the field already described another field extends over a considerable portion of the Lothians. It furnishes the greater part of the fine fuel which is used in the ironworks of Scotland, and contains excellent seams of parrot coal. To the W but at some distance, lies the coal basin of Lanark, Redfear and Ayrshire, the first, famous throughout the world for the immense manufacturing establishments which it mainly has called into existence, and made prosperous the second remarkable chiefly as containing near Johnstone, the thickest seam of coal in Scotland or (if the Dudley field be not an exception) in the British Isles and the last, as yet imperfectly developed, but evidently destined to higher importance than it has yet attained. In the N.W. of Dunfermline, in the neighbourhood of Saeathur there is a coal field, the existence of which hitherto little known because of its inland and almost inaccessible position, will be proved now that an important railway intersects it. In the S.E. of the same country is at a small field near Lazonby, with a considerable local consumption, and particularly interesting as the last of the Scotch and the connecting link with the great English coal fields. Immediately on passing the border the first of these fields lies before us, extending over the greater part of the counties of Northumberland and Durham, and covering near Newcastle, which gives it its name. The proximity of this field to the sea, and the excellence of the coal unrivalled for domestic use early made it the great theatre of mining operations such as have been carried on to an extent and on a scale of magnitude which makes it a world's wonder. It furnishes the larger proportion of sea borne coal whether to domestic or foreign ports, and, notwithstanding the competition which it now has to maintain with inland supplies by rail way still sends annually to London about 3,000,000 tons. Several of the pits have a depth exceeding 1,500 fathoms, and more than one colliery has a capital exceeding £100,000 sterling. On the opposite coast nearly in the same latitude, is a small coal field, the workings of which at Whitthaven and Workington, have been carried to a great distance beneath the sea. Besides supplying the local consumption, it exports extensively to the S of Scotland and the N of Ireland in particular to the towns of Belfast whose flourishing foundries and factories usually depend upon it. The next coal field to the S.E. in many respects, the most important of all it includes a large central space, not entirely occupied by coal, but interrupted, longitudinally by a broad belt which consists of the lower strata of the carboniferous system, and thus forming a kind of two fields, the one of which extends from Leeds to Nottingham, while the other has its greatest length from S.W. to N.E. and borders at its E. and W. extremities respectively on Manchester and Liverpool. It thus can boast, not only of being the seat of what has been termed the world's great workshop, but of furnishing the most successful steam both of its existence and prosperity. The W. branch of this coal field is continued S. by a narrow belt, and terminates in a space of a triangular shape occupied by the small field of Newcastle-under-Lime. The only other coal field of a magnitude similar to those already mentioned, is that of S. Wales, which though it long lay almost unknown or unheeded, has, in comparatively recent times, become the centre of some of the greatest public works of the empire. It is of an irregularly oval shape, and passing from Monmouth on the E. continues W. without interruption, through Glamorgan to Carmarthen. Beyond which another field or continuation of that already mentioned, stretches irregularly to St. David's Bay. The characteristic features of this great coal field are, the large quantities of anthracite or stone coal which it contains, and the hilly nature of the country in which it lies. The latter gives the important advantage of obtaining access, even to the deepest seams, by means of horizontal adits, which, at the railway express it, carry off the water on its own feet, and save the expense both of deep workings and powerful engines. From the extent of this field, and the number and thickness of its seams which, near its centre, number 28, with

an aggregate thickness of 85 ft. the field of S. Wales has probably a better title than any other in the kingdom, to be deemed almost inexhaustible. There are several other minor fields, all of them with exception of that of N. Wales situated near the centre of England and thus, from position as much as from extent, possessed of great value. Their names are, the N. Staffordshire the Warwickshire, the S. Gloucester and Somersetshire, the Warwickshire, and the S. Staffordshire. The most important on the last are the first, N. Staffordshire from being the principal seat of the pottery, and the last two Warwickshire and S. Staffordshire County deriving its supplies from the one. Lichfield, Walsley, and Dudley from the latter and Birmingham chiefly also from it, but partly from both. In S. Staffordshire occurs the enormous seam known as the Ten-yard Coal of Dudley. It properly consists of several seams separated by very thin beds of clay called partings, and owing to the necessity of working it in sections is by no means so profitable as might be imagined. The average annual output of coal in Great Britain has been conjectured rather than calculated at 50 millions of tons, and apportioned in three equal parts—ten millions to domestic use, ten to ironworks, and ten to manufactory and miscellaneous establishments and export. Assuming the medium price of 6s. 8d. per ton the value is £10,000,000 sterling. The export of coal to foreign countries, in 1849 was, including cinders and culm, 2,837,979 tons. The following Table shows the progress of the foreign coal trade:—

TONS OF COAL SHIPPED FOR EXPORT TO BRITISH COLONIES AND FOREIGN COUNTRIES IN 1844-45.

	1844.	1845.	1846.
Continues	7,977,068	8,758,408	9,128,448
N. Irish Colonies	3,244,85	363,248	412,225
Foreign Low lands	1,329,46	2, 67,97	2,118,180
Total	9,130,963	11,511,680	14,558,853

I am—Almost the whole of the iron ore smelted in this country is a carbonate, which is invariably found, to a greater or less extent, in all coal measures, but excludes itself in a great variety of forms, and with very different qualities. Of our great coal fields, none is so destitute of iron as that of Newcastle and hence, though not a few blast furnaces are in operation there the iron used are obtained not from the surrounding pits but by importation often from considerable distances. More than one furnace is supplied by black band ironstone shipped from Scotland, after being calcined. The most important iron districts of England are those of S. Yorkshire, Shropshire, S. Staffordshire, and S. Wales. The coal fields already described sufficiently fix their localities and, therefore, it is only necessary to mention here that the ore is obtained partly from *lodes*, and partly from *seams*. The former name is usually applied to nodules or balls, generally of a round or oval shape, which lie together with considerable regularity often in contact, but always without adhesion, and are for the most part, imbedded in thick beds of shale or *slates*. The latter name is given to ironstone lying in regular strata, and worked in the same manner as coal. These strata generally are only a few inches, and generally carry over a foot of *slates*. Each stratum is the finest in quality but, for many reasons, the most valuable of the stratified ironstones is the *blackband*, so called from the darkness of colour produced by the large proportion of easily matter which it contains. It is singular that the only part of England known to contain this stratum, is a portion of the coal field of S. Wales. In Scotland also, it was at one time supposed that it was merely a local deposit, and that its existence, or at least its good qualities were confined to the range of a few miles in the neighbourhood of Aberdeen. Hence, accordingly some of the largest mining establishments of the kingdom suddenly spring up, and a small estate, the surface of which did not yield 2500 per annum began to yield its fortunate possessor from its mineral treasures, at least £10,000 per annum. A more careful examination has proved that few of our Scottish coal fields are without these blackband seams, and numerous ironworks have, in consequence, sprung in numerous districts where their profitable existence had hitherto been deemed impossible. To the N. of the Forth, only one ironworks had been able to maintain a large-scale existence. Other two, one with five and the other with two blast furnaces, have already been erected.

On the opposite bank of the Forth, stand the Kinross Works, with four furnaces, supplied with ironstone from old pits, in which the seam had been sunk through while its value was unknown. In Leamthorpe the area of the seam has proved equally extensive, but from the number of ironworks previously existing it has not so much led to the establishment of new as to the extension of old works and to the almost universal substitution of blackband for the inferior claystones formerly in use. Ayrshire, on the other hand, where the works of Muirkirk only existed is now beginning to be almost studded over with them. A discovery of perhaps greater importance than that of the blackband, because applicable to the ironworks of England as well as to those of Scotland, took place about the same time. By heating the blast, before entering the furnace, to about 600° F. (i.e. to such a degree that lead exposed to its metal) its power is so much increased, that the most stubborn materials quickly give way before it and raw coal becomes even more efficient in smelting than coke was before. A ton of iron can thus be obtained with much fewer materials and what is of considerable moment, in far less time. A furnace which, under cold blast, makes 70 tons a week, easily makes 100 under hot blast. Another improvement, by which the gases evolved within the furnace are not allowed to escape, but collected, and made available for fuel in its operation in several works and promises important results. The annual make of pig-iron in the kingdom is estimated at 1,500,000 tons. About one-third is used for castings, and the remainder not exported, is converted into malleable iron. In this second part of the process Scotland apparently fails. Her furnaces smelt about one-third of the whole produce but a considerable part of this make is sent as pig to England to be made malleable there, either by itself or in mixture with English pig. The cause of this is not very obvious, but there is probably some ground for a prevalent belief that pig made from a variety of ores, as in England, is somewhat superior to that made from blackband alone, and that this superiority becomes still more manifest when it is made malleable. A similar opinion exists in some quarters as to the superior strength of iron made by cold blast which seemingly notwithstanding of its numerous disadvantages in other respects is still used to a considerable extent. The principal statistics of the iron trade are given in the following Table—

PRODUCTION OF IRON AND EXPORT IN GREAT BRITAIN				
Year.	Furnaces.	Quantity in tons.	Export in tons.	Pig Iron.
1830	276	677,417	10,881	12,038
1840	428	1,296,470	144,719	30,951
1844	—	1,403,000	95,215	99,950

The whole production of 1849 has been estimated at 1,500,000 tons. Of this quantity Scotland possessing 118 furnaces produced 690,000 tons. The annual produce, per furnace, in 1786, did not exceed 1038 tons in 1849 it had risen to 6106 tons.

The principal localities in which lead copper and tin are found have been already mentioned. Additional facts of importance are subjoined—

ESTIMATED ANNUAL PRODUCE OF REFINED LEAD, COPPER, AND TIN FROM 1845-46, in tons.

	Lead.	Copper.	Tin.
England	78,731	12,870	5000
Wales	10,745	21,045	—
Scotland	943	—	—
Ireland	811	—	—
Isle of Man	1,068	—	—
Total	48,164	35,896	5000

The ton of lead is supposed to yield on an average, about 8 oz. of silver.

It seems unnecessary to give any details as to minerals of minor importance. The principal articles are salt, of which the quantity obtained, chiefly from rock-salt and brine pits, has been estimated at nearly 550,000 tons. The locality in which salt is most extensively worked at present, occurs near Cheshire; and the supply is so great as to be inexhaustible. Quarries also exist in every part of the British Isles, except the S.E. of England. They furnish granite susceptible of a polish which makes it fit for stationary freestone of the purest white and most durable substance, and immense quantities of the finest roofing-slates. As to the value of the produce from quarries, little authentic information exists. The fol-

lowing summary of the mineral produce of Great Britain, on an average of three years, ending 1845, is from M. Colclough's *British Almanac*, 8d edition, vol. I. p. 624:—

Silver	17,800 lbs.	Tray worth £	50,000
Copper	12,000 tons		1,200,000
Tin	1,500 tons		500,000
Lead	50,000 tons		1,000,000
Iron	1,000,000 tons		8,000,000
Coal	30,000,000 tons		10,000,000
Salt, Alum, and other minor produce			1,000,000

£23,200,000

It will be seen that several of the quantities differ from those already given and believed to be more accurate. At present prices, also the iron and coal as rated in this estimate, are greatly over-valued.

Fisheries.—The raw materials obtained from the land of the United Kingdom either by growing them on its surface or digging them from its bowels, having now been described, we proceed to notice those which are obtained from its waters, including under the term, not merely rivers and lakes, but bays and creeks, and immediately surrounding seas. Considering the large extent of space occupied by these within the interior of the kingdom and along its coast it might be supposed that the fisheries by which their produce is obtained, would be one of our greatest national interests. They have accordingly been felt to be so and many efforts have been made by Government to foster them. The success of these efforts not being such as to encourage their exertion all our boundless have been withdrawn. One great obstacle to the general consumption of fresh fish, has been the difficulty of transport now much diminished by the facilities offered by railways and it would seem that in some important inland towns where fresh fish were previously known only as an expensive luxury they can now be had at a price which places them within the general reach, so far at least as to afford a wholesome and grateful change of diet. The principal British fisheries are those of salmon, herring, and cod. The first is carried on chiefly in the rivers and estuaries of Scotland and Ireland the second on all the coasts and islands of Scotland, the great centre of resort for curing being the towns of Wick, Peterhead, and Fraserburgh the last around the N. islands and along the E. coast of Great Britain particularly the edges of the Dogger Bank off the coast of Yorkshire. Among minor fisheries may be mentioned those of mackerel, pilchard, oyster, and lobsters. Of these last and indeed of all kinds of fresh fish by far the largest consumer of the kingdom is London.

Manufactures.—Taking these in the order of their importance we begin with cotton. The history of this manufacture, which now employs more hands than any other within the kingdom and furnishes above one-third in value of the whole exports is indeed remarkable. The raw material is of vegetable origin and is obtained from the internal coating of the pod or seed vessel of the *Gossypium*, of which there are several varieties, some growing as a tree or shrub and others as an annual herbaceous plant. It is from the latter that the far greater part of the supply is obtained and for this supply as none of the varieties grow in our climate, we are entirely dependent on other countries. Cotton grows well in India and would undoubtedly thrive well in many of our other possessions but at present and for many years, the supply has been in a manner monopolized by a few of the slave states of N. America. In so far therefore as regards the raw material, we have no advantage in the market over other competitors but, compared with one of the most jealous and enterprising of them, are placed in unfavorable circumstances. The more astonishing is our success in gaining the lead, and maintaining it while all other nations are lagging at an immeasurable distance behind. The explanation of the fact is to be found in the nature of the manufacture, and a series of successful inventions, all made, with the exception of that of the American Whiskey for separating the cotton from the seed, by subjects of Great Britain—by Arkwright, Hargreaves, Compton, and Cartwright—contrivances, too, tending in a remarkable manner to give new advantages to a country possessing, like ours, exhaustible fields of coal, unvalued machinery vast accumulations of capital and a dense, orderly and industrious population. On the subject of this manufacture, interesting volumes have been written and as any

analysis, however condensed would far exceed our limits, the leading facts must be exhibited in a tabular form.

TABLE OF IMPORTS OF COTTON WOOL, LAIN, AND OF REPOUNDED AND REFINED TABLE OF COTTON MANUFACTURES, TWIST AND YARN FROM THE EAST TO KINGDOM.

Years	Imports		Exports	
	Wool.	Twist and Yarn.	Cotton Goods.	Raw Value.
1845	161,674,853	29,533,325	345,570,820	16,510,740

1870	1	1	1	1	1	1

Woolen.—This is our most ancient, and was for centuries our great staple manufacture. The flocks fed on our downs and other pastures, furnished wool of peculiar excellence, and in such abundance, as both supplied the home demand at a moderate price, and left a large surplus for exportation. There can be no doubt however that the first great improvement was not of native invention, but was introduced by foreigners, whom either the loss of power of our sovereigns had allowed, or the mercenary bigotry of their sovereigns had driven into the kingdom. Though the main fabric cannot boast of an extension like that of cotton, it holds the next place to it, and, besides working up the greater part of the wool grown within its kingdom, draws largely on other countries for additional supplies, particularly on Australia, which see, p. 103. In the finer broad cloths our manufacturers have formidable competitors in the Belgians, from whose factories we may be said to have learned the branch, and also in the Saxons, but in other woollen our position, in several branches, is at least as high as that of any other country, while in not a few our superiority is decided. The chief seat of the woollen manufacture is in England—the W. Riding of Yorkshire, Lancashire, Gloucestershire, and Wiltshire, being the most distinguished for broad cloths. Norfolk for worsted stuffs, Lancashire and Nottinghamshire for woollen hosiery. Blankets and shawls have numerous localities, but for the finer qualities the W. of England and several of the Welsh counties are most conspicuous. Carpets, of every quality and pattern, are extensively made at Kidderminster, Gloucester, Worcester, &c. but those of Wilton and Axminster are so superior as to suffer little by comparison with the celebrated fabrics of Turkey and Persia. A particular species of woollen manufacture, in which the resources of modern ingenuity are equally displayed, is that of shoddy. Its raw material is woolen rags, which after various purifying processes, are reduced to their original wool then re-spun, re-dyed, and re-manufactured. Formerly the article produced was so coarse as to be fit only for padding and similar purposes, but now either alone or with a partial mixture of raw wool, shoddy is made into stockings, druggists, pilot and other great coats, tarpans, and table-covers, some of the last of great beauty. The principal seat of the shoddy trade is Dewsbury about 8 m. from Leeds. The woollen manufacture of Ireland is on a very limited scale, being confined to a few broad-cloth factories near Dublin and Cork, and a few blankets and shawls, the former in Kildare and the latter at Wicklow. Scotland has made much

more progress, but still bears no proportion to England. The chief seats of the Scotch woollens are Aberdeen for broad cloths, chiefly coarse, and the spinning of worsted; Kilmaronock for carpets, bouquets and shawls; Glasgow and its neighbourhood for carpets and various Galleshale, Jedburgh, and also a number of small towns along the foot of the Ochil, for narrow cloths of several varieties tartans, shawls, plaids, &c. Inverness for tartans, and Hawick for hosiery.

Linens.—In England the spinning of flax is carried on to a great extent, but its manufacture into cloth is comparatively limited. A considerable quantity of damask and duaper is made at Barnsley. Should the recently invented process, for the improved preparation of raw flax, have the effect anticipated, and enable the present cotton machinery to spin fine thread from a mixture composed of a large portion of flax and a small portion of cotton, and producible at a much cheaper rate than cotton alone, the manufacture of flax in this form may be expected to make almost unexampled progress. Linen is the great staple of Ireland and was long, in regard to textile fabrics, the staple also of Scotland. In the former extraordinary means were employed to foster it. It early fixed its seat in the N. particularly near Belfast, and there the great changes which have taken place in the mode of manufacture, by the substitution of spinning-mills and factories for the domestic wheel and loom, appear only to have fixed it more permanently. Almost the only form into which flax is manufactured in Ireland is plain linen, chiefly shirts. In Scotland, the manufacture assumes greater variety. Besides plain linen it has manufactures of Osnaburgh, sheetings, sailcloth, sackings, &c. chief seat, Dundee and of duaper and damask, chief seat, Dundee. The staples of both towns are by far the most important of their kind in the kingdom.

Silk.—Here the raw material is like cotton, entirely of foreign production, with the important difference in favour of silk, that, instead of being almost monopolized, and consequently liable in regard both to quantity and price, to be controlled by a single country the limits of its production include an immense range of which a considerable portion belongs to our own colonies and dependencies. This is perhaps the only great branch of manufacture in regard to which, at least in finer fabrics, we must yield the palm of superiority and be contented with something less than equality. The number of silk-mills is considerable and confined chiefly to England. To England, likewise, belong the chief seats of the silk manufacture. Paisley is almost the only town out of it in which it is carried on to a great extent; and even there, the celebrated shawls of unrivalled excellence are generally a mixed fabric of silk and wool. The chief seats of the silk trade in England are the district of Spitalfields in London, Manchester and Coventry.

The following Table contains a statement of the imports of the raw materials of the woollen linen, and silk manufactures, and of the exports of goods manufactured from them.

Years.	Quantity of Raw Materials Imported.		Manufactured Yarn of One in 100 part.	
	Wool.	Flax and Cotton.	Woolen Goods.	Other Goods.
1845	78,215,948	1,418,328	1,041,434	1,060,916
1850	108,117,022	1,667,748	1,381,906	1,060,916
1855	125,307,307	1,660,541	1,381,906	1,060,916
1860	108,117,022	1,667,748	1,381,906	1,060,916
1865	78,215,948	1,418,328	1,041,434	1,060,916
1870	78,215,948	1,418,328	1,041,434	1,060,916

Beside the manufactures already mentioned there is a great number which though separately of less importance, absorb immense sums of capital, exhibit many of the most wonderful specimens of human ingenuity and give subsistence to millions of the population. We can do little more than glance at the most prominent.

Under the head of minerals we only noticed the preliminary steps of converting ores into metals; and, in the case of iron we referred to the additional step of converting it, from its first melted state, into malleable iron. Vast processes remain behind and constitute numerous branches of manufacture under the general name of hardware. Several of the

GOVERNMENT.—Under this general head, a variety of important particulars are included. The first in order is the Constitution. The British Constitution is the growth and embodies the wisdom and experience of ages. No man or set of men first preconceived it in theory and then proceeded to give it a real existence. It assumed its leading features in times when theories were little thought of, and has become what it now is almost imperceptibly without premeditated design, so that it may truly be regarded as more the result of providential arrangement than of human invention. A considerable portion, as necessarily fall of animals, which are excluded from the rights of citizenship, and are not within its speculative power. At the same time the type of government to which it belongs is obvious. It is a limited, hereditary monarchy in which the executive power is lodged in the Sovereign, but controlled in its exercise by the legislative power shared in common by three bodies, of which the Sovereign, though the first in dignity is by no means the most influential number. The second and third of these bodies are the House of Lords and House of Commons who meet and vote in separate Chambers. With the Sovereign and the House of Commons the Legislature is complete, and every lawman before becoming law must obtain their assent, given first by the House in which it originated and expressed either unanimously or by an open vote then in like manner by the other House and, finally by the Sovereign, the date of whose assent is held to be that of the operation of the Act, provided no other date is specially expressed. The House of Lords is composed of Lords temporal that is peers of blood-royal, British peers, representative peers not British and of Lords spiritual. Peers of blood-royal act by courtesy British peers, after their first creation, and by right representative peers by election. Fourteen of the last class present themselves, namely, six are elected by the other two parts of their respective countries, who are not British. Scotch peers 16 in number are elected for each Parliament, Irish peers 28 act for Irish. Lords spiritual are archbishops and bishops of the United Church of England and Ireland. All those of England, with exception of four without seats, sit for life. Of those of Ireland, only four (one an archbishop) sit by rotation for a single session. The House of Lords is presided over by the Lord Chancellor and, in addition to its legislative, performs judicial functions in the House of Lords and in the House of Commons for the two kingdoms. The third body is the House of Commons. Its members are elected for a single Parliament, which expires legally in seven years, and generally sooner if its members 658 are arranged as follows:—

		Members ^a
England	40 Counties, 2 Universities	141 4
Wales	108 Cities and Boroughs, 18 Counties	328 16
Scotland	57 Cities and Boroughs, 23 Counties	146 50
Ireland	74 Cities and Boroughs, 28 Counties	225 64
	1 University	2
	43 Cities and Boroughs	89

The qualifications of the electors vary in minor points, in the different kingdoms but the general principle is to give a vote for county members to every male not under legal incapacity who within the county either owns houses or lands to the clear value of £10 per annum or rents them to the amount of £50 per annum and a vote for borough members to every like male who owns or occupies houses or lands of the value of £10 per annum, within a certain limit, called the parliamentary borough, and actually resides within 7 m. The number of electors, according to the registrations of 1849-50 is as follows —

	England.	Wales.	Scotland.	Ireland.	Total.
Countries.	451,613	26,984	45,406	81,832	579,955
Boroughs.	278,284	11,084	41,848	40,334	471,550
	<u>829,797</u>	<u>48,068</u>	<u>90,254</u>	<u>122,166</u>	<u>1,080,187</u>

The president of the House of Commons is the Speaker one of the members elected by a majority of the others at the commencement of each Parliament, and for its whole duration. In general any legislative measure may originate in either House; but the House of Commons possesses the exclusive

privileges of originating money bills, that it will not allow the House to do what is granted to the Senate, that it will not allow the Lords to do what is granted to the Commons, and that it will not allow the Commons to do what is granted to the Lords. The Lords to the most general nature, which the Commons may have passed, and sent up to them. When we are told of the immense power of the Crown—it is solely for to levy armies, and sit out navies to make peace or declare war to appoint all the high functionaries of the State, and dignitaries of the Church when we are further told that the Sovereign is inviolable in person may by an undisputed maxim of the Constitution we can do no wrong—we are almost tempted to say to do wrong. The words are altogether a little better than an unmitigated despotism, but they are not much better. On the other hand, to the money privileges of the Commons, and to the necessary consequences, that most of the political things which the Crown can theoretically do, it cannot do actually without their sanction, the danger to the Constitution if there is danger is seen to be elsewhere. A revolutionary House of Commons would be in fact a revolution accomplished. But there is no danger and therefore there need be no fear. References has been made to the maxim that the Sovereign cannot do wrong. The words are altogether a little better than meaning simply is, that the acts of the Government are not considered to be the acts not of the Sovereign, but of the Ministry which for the time conducts the Government. The Ministry consists principally of what is called the Cabinet, in which are 14 high functionaries. Of those the most important are, the First Lord of the Treasury who is Prime Minister, the Chancellor of the Exchequer, the Lord Chancellor and the three Secretaries—Home, Foreign and Colonial. Several other functionaries though not possessing seats in the Cabinet, are also members of the part of the Ministry. It is the Sovereign's duty but not the Ministry's, that the responsibility rests; and hence, for their own safety when they lose the confidence of Parliament and the country they have no alternative but to resign. Other ministers of different principles succeed and difficulties which might have seemed to threaten a collision between the highest powers of the State, pass off quietly and are soon forgotten. In this way the Constitution like some mechanism of exquisite contrivance, possesses within itself a power of re-adjustment and assumes to be perfect—if need be overpowered by external violence, it returns to place by internal despatch—to be as lasting as the world.

Intimately connected with the Constitution or important integral portions of it, are its Ecclesiastical Establishments, of which there are two both Protestant, and in doctrine almost identical but very different in form—the one, under the name of the United Church of England and Ireland, being Episcopal and the other confined to Scotland Presbyterian. As these churches will be fully described under the heads of England, Ireland, and Scotland, it would be out of place to do more than mention besides the Established churches those of the Dissenters, who no longer labour under civil disabilities and are both numerous and influential.

After the above explanation your attention is naturally directed to Judicial Establishments far on account of which we again refer to the same reason refer to the heads of England, Scotland, and Ireland. Indeed, the only court of justice which can be considered as belonging to all of them alike, is the House of Lords sitting in its judicial capacity as already mentioned, not to exercise original jurisdiction, but to hear civil causes on appeal. Strictly speaking, this is the only European Court within the British Isles, though the name is usually given to the Court or Courts of each Kingdom, whose decisions are subject to an other review than that of the House of Lords. As it is truly the only British House that the Judicial power rests upon, I will now have a seat in it entitled to praise and blame, but in practice, only those called Law Officers, viz., the Attorney General, Solicitor General, and Advocate General.

From judicial we turn to Military Establishments usually comprehended under the general head of the

Army and Navy.—The extent of the British Empire necessarily makes the aggregate military force very considerable but there is no European state in which the standing army bears so small a proportion to the whole population. Thus great privilege is mainly owing to our safety from foreign aggression, and the internal tranquillity which, with one gross exception, generally prevails. The total number of troops of

the last at present, including Queen's troops in the pay of the East India Company is 139,625. To these must be added 14,410 artillery making the whole force 144,035. The number on home service is only 61,947 of whom 80,505 are in Great Britain and 21,644 in Ireland. This of course is the peace establishment, but during the last great European war when our very existence as an independent nation seemed to be threatened, gigantic efforts were made and no state shared more largely than Great Britain in the glory of saving the liberties of Europe by putting down an unprovoked tyrant. Whenever British troops have been sent on foreign campaigns, and properly commanded, they have proved unrivalled. Here it is sufficient to name the achievements of Marlborough during the last century and those of Wellington in the Peninsula and at Waterloo. In many respects, and particularly as a defensive force, the army must yield to the navy. The advantages of our insular position are often talked of as if the mere fact of being on an island were in itself a source of safety whereas the safety is not in the position but in the ability to defend it. In early times the sea, allied with warlike borders, saved from the foreign hordes of the populous North and poured like a deluge on our shores which from their vast extent and with the feeble means possessed, it was impossible to defend. Our insular position was in those times our greatest weakness, and so must it be again, if we ever lose our decided superiority at sea. The public mind is, happily, as to this vital consideration and hence while a large standing army is for many reasons, even with jealousy our navy awakes every British heart with honest pride, and is confidently appealed to as a sufficient response to the strange cry which is sometimes heard, proclamation, the defenceless state of Great Britain. A force which is thus honoured and fostered, naturally attracts the best and bravest spirit of the land, and many of the brightest pages in our annals are filled with naval achievements. The principal details respecting the navy are as follows—

The number of SHIPS and STEAM VESSELS in the British Navy with the number of guns they mounted and the horsepower of their engines are noted up to 1890—

10 First-rates	of 121 116, and 110 guns mounting 2,516 guns	
6 Second-rate	of 101-100, 81-80, and 74 guns	6,190
108 Fourth, fifth, and sixth-rates	of 60-14	4,573
70 Sloops	of 20-10	3,000
15 Torpedo	of 10-5	8
20 Steamships and frigates	with 12-10 hp. e-power and	561
43 Sloops	of 10-5	21
80 Gun-voicers	of 10-5	125
9 Submersibles (not w. with auxiliary steam power)	of 10-5	80
Home power of steam guard and black-ships, classed as fourth-rates		3,800.

Making a total of 420 vessels mounting 15,026 guns of which 114 are steamers propelled by engines of an aggregate power of 36,160 horses. This does not include the fleet of mail steamers at Dover, Pembroke, Holyhead, Liverpool &c. which are only armed with light six pounder guns for signals.

Money Weights and Measures.—Passing from subjects of a warlike nature, we come to economical arrangements, and of these, the first which meets us as forming the basis of the whole, is the currency or money system, and in connection with it, the system of weights and measures in the United Kingdom. 1 lb Troy of gold 11 parts pure, and one alloy is coined into 46 sovereigns and $\frac{1}{2}$ the of a sovereign in other words, into 246, 14s. 6d. thus making the mint or standard price £3, 17s. 10d. per oz. The gold coins in use are sovereigns and half-sovereigns, and constitute the only legal tender in all sums above 40s. One lb. Troy of silver containing 11 oz. 2 dwts. pure, and 18 dwts. alloy is coined into 66s. of which 30s. constitutes the money pound thus making the mint price of silver 6s. 6d. per oz. The silver coins in use are five-shilling pieces or crowns, half-crowns, shilling pieces, half-shillings or sixpences, four-penny pieces, and threepenny pieces. The only copper coins are pence, each of which is $\frac{1}{4}$ th of a shilling, and halfpence. They are legal tender to the amount of 1s. Coins form a comparatively small part of the circulating medium of the country. A far larger part consists of mere representatives of value, in the form of obligations to pay. Of these the most common in use are bank notes, or documents bearing the per-

mission to issue them to pay the specified sums contained on them to the bearer on demand. The permission to issue bank notes is now confined to certain existing banks, and to certain definite amounts for each bank. By far the largest circulation is that of the bank of England. In that part of the kingdom, no notes under £5 can be issued. In Scotland and Ireland, they are still issued for £1.

In weights and measures, we cannot boast of anything so scientifically formed as the system of France. That country having been thrown into the revolutionary caldron, had no prejudices to consult and could make any changes however violent. Our Legislature had a very different task to perform, and therefore, instead of attacking inveterate habits and customs with a violence which would only have defeated its own purpose, wisely endeavoured to produce uniformity by adopting not the system which it knew to be most philosophical but that which it believed to be most practicable. In every system two standard units are essential—one of length, and another of weight. The linear unit of the United Kingdom, as fixed by 5 Geo. IV. c. 74, is the Imperial Standard Yard, measured by the distance between the centres of the two points in the gold scale in the straight brass rod now in the custody of the clerk of the House of Commons, whereon the words and figures, Standard Yard, 1760, are engraved and to make the recovery of it easy in the event of it being lost, it is declared that its length is to that of a pendulum vibrating seconds in the latitude of London as 36 to 39,1308 inches. This standard yard is declared to be the only standard measure of extension, whereby all other measures of extension whatsoever whether the same be linear, superficial, or solid shall be derived. The principal subdivisions are the foot = $\frac{1}{3}$ yard and the inch = $\frac{1}{12}$ foot. The principal multiples are the pole or perch = $\frac{1}{2}$ yard the furlong = 220 yards and the mile = 1,760. These linear measures, squared give superficial measures of which the principal are the rood = 40 sq. perches = 1,600 sq. yds. and the acre = 160 sq. perches = 4840 sq. yards. The standard unit of weight is the Imperial standard Troy pound made in 1758, and now in the custody of the clerk of the House of Commons. From this, measures of weight are derived. It is subdivided into 12 oz. each oz. into 30 dwts. and each dwt. into 24 grains. To fix the avoirdupois pound it is declared to be 7000 grains Troy and subdivided into 16 oz. and each oz. into 16 drams. The multiples avoirdupois are 28 lb = 1 qr. 4 lbs. = 1 cwt. and 20 cwt. = 1 ton. The standard measure of capacity is fixed by the standard imperial gallon containing 10 lb avoirdupois of distilled water at temperature 62° Fahr or 77° 274 cubic inches. The corn wine and ale gallons have respectively 208 8231 and 202 of these cubic inches.

Finance.—To carry on the affairs of such a wondrous fabric as the British Empire necessarily requires a sum of amount so immense that it is scarcely possible to form a very definite conception of them, notwithstanding of the minute accuracy of the series of official blue books in which they regularly appear. The separate amounts of revenue and expenditure under their different heads as well as the total amount, are given below. This vast revenue is generally raised in accord with what are understood to be the soundest principles of political economy in other words, the taxes direct and indirect, and the customs which furnish it, are, with few exceptions, collected in the least obnoxious form, fall lightest on articles of primary necessity or of raw materials of manufacture, and heaviest on articles either of luxury for which the persons using them must be supposed well able to pay or of noxious consumption from the use of which the persons unhappily addicted to them, ought, if possible, to be deterred by the high price which they are compelled to pay. Almost all the great heads of revenue furnish facts of the deepest interest, and it is difficult to refrain from making several of them the subject of special remark. Nowhere can we find data better fitted to explain the social position of the country than in the various sources from which its revenues is obtained; for example the direct taxation on property and income showing the vast amount of wealth which must annually be produced, when 7d. per pound raises a sum of more than £5,000,000 sterling, the innumerable amount of correspondence in such large forms of variety which must be carried on, when a single penny on each letter after paying all expenses of management, yields a clear surplus of more than £800,000. But our

limbs forbidd, and nothing more can be done here than to append the following important Tables.—

Net Income and Expenditure of the United Kingdom.

Net Income	3,009,386	64,473,785	58,058,887	52,817,204	54,916,913

At the Revolution in 1688 the national debt was £264,263 and the interest and management £29,856. At the commencement of the last European war in 1793 it was £239,800,145 and in 1817, shortly after the termination, £340,550,491. It is now £775,168,319 and the interest and management, as seen above, £23,194,007.

People.—Under this general head we include not merely their numbers or population properly so called, but whatever is peculiar in their condition—their origin and language, their literature, religion and manners—everything, in short, which throws light on their social position and is now usually considered under the designation of moral and vital statistics. Some of these topics we can barely glance at and even the most important of them must be discussed in a few brief sentences.

In 1710 the population of England and Wales was 5,066,537 and nearly at the same time, that of Scotland 1,050,000 and that of Ireland 2,099,094. In 1715, 4,811.

The census was first actually taken in 1801 in Great Britain, and in 1821 in Ireland and ever since in both islands decennially with the following results:—

SUMMARY ACCOUNT of the POPULATION of GREAT BRITAIN and IRELAND including the ARMY and NAVY in the year 1871 in which Census has been taken.

	1801	1811	1821	1831	1841	1851	1861	1871
England	5,251,484	6,259,827	11,561,497	13,091,001	14,906,128	16,700,000	18,700,000	19,700,000
Wales	641,646	611,738	717,400	808,158	911,608	1,011,608	1,111,608	1,211,608
Scotland	1,050,000	1,050,000	1,050,000	1,050,000	1,050,000	1,050,000	1,050,000	1,050,000
Army, Navy &c.	60,000	60,000	60,000	60,000	60,000	60,000	60,000	60,000
Ireland	2,099,094	2,099,094	2,099,094	2,099,094	2,099,094	2,099,094	2,099,094	2,099,094
Total	10,049,648	12,049,648	24,481,993	28,049,648	30,049,648	32,049,648	34,049,648	36,049,648
Total Population of the United Kingdom	—	—	21,288,986	24,410,838	27,019,648	29,119,648	31,119,648	33,119,648

The decennial period having again expired, another census is on the eve of being taken, and a population of at least 25,000,000 is anticipated. The known proportion between births and deaths seems to indicate a greater increase but considerable allowance must be made for emigration, which has

long been carried on and is daily attracting more attention as a necessary outlet for a constantly increasing population.

This great population like that of Europe generally belongs to what is called the Caucasian race, which exhibits the human form in its highest physical type, and is so superior to all other races, that in whatever quarter of the globe it fixes its seat, it sooner or later becomes dominant. One of the most celebrated varieties of this race is the Anglo-Saxon and to it, though with a considerable in admixture of other Gothic races, the great majority of the inhabitants of Great Britain unquestionably belongs. The Anglo-Saxons however were not the original owners of the soil. They found the Celts in possession and drove them before them into the wildest and most inaccessible parts of Great Britain, particularly the N and W where they still remain and prove their separate origin by one of the most marked of national distinctions—a peculiar language. Ireland expenes used a different fortune, and with the exception of the N provinces, where an Anglo-Saxon colony was established in consequence of its recent use almost entirely peopled by Celts. The Celtic language is also though with considerable variations, the vernacular of the Highlands of Scotland and Wales, the N and W of Ireland and the Isle of Man but it has not, and does not seem destined ever to have, a literature. The Anglo-Saxon or English on the contrary promises soon to be, if it is not already the most widely spoken of European languages and has proved itself inferior to none as a vehicle of thought. Fitted alike for all the great walks of literature it can move with the dignified step of history pursue the ruses of metaphysics, give utterance meet to the finest bursts of forenoon, senatorial, and pulpit eloquence and, twining all the cords of harmony sustain poets and other imaginative minds in their loftiest flights. The long list of distinguished men who occupy the highest niches in the temple of Fame, and embodied their conceptions in the English tongue, of itself indicates that the race to which they belonged was not inferior to any other. As a people they have been thought of as the greatest of all ages and are surpassed in the stern and sublime virtues. Nowhere are honour and integrity in higher esteem nowhere has phalanx throng made more costly sacrifices, or gained more glorious triumphs nowhere are the final destinies of man held in higher reverence and nowhere are the great truths of Christianity more deeply pondered, more thoroughly understood more cordially believed more sedulously practised. This superiority of character is accompanied, as usual, with superiority of social position and when men ask, Where is the greatest amount of national prosperity to be found? the best informed of every country turn round and point, with one accord, to Great Britain. There, vast accumulations of wealth have been made, and vast multitudes of families are living in the daily enjoyment of the ordinary comforts of life. But all pictures have their darker shades and our prosperity is by no means without alloy. Gigantic evils raise their heads in many quarters, and threaten to advance in spite of all the efforts that are made to stay them. The population is not merely great in proportion to extent of surface, but is much more crowded together in dense masses than that of any other country in Europe. France, in addition to its metropolis, has only three towns with a population exceeding 100,000. The United Kingdom, besides its metropolis, has no fewer than nine. All of these contain immense commercial or manufacturing establishments, in which myriads seek their means of subsistence and live on from day to day often from the scantiness of their wages unable, and often still from improvidence or some worse habit unwilling to make any provision for the future. But all trades are more or less fluctuating. Changes occur in the political

world, or markets become glutted, and a sudden revelation takes place. Want of employment at once does up the only source from which the first necessities of life could be obtained. Disease soon begins to commit its devastations, and the whole fabric of society is shaken to its base. Such things are not of infrequent occurrence, and threaten results which it is fearful even to contemplate. But apart from these, pauperism has struck its roots deep and multitudes live solely on the pittance which a legal provision can obtain for them. In regard to many of the poor such provision, when other means of subsistence fail is perhaps one of the simplest duties of justice, but undeniably the law operates by inflexible rules, and cannot draw any moral distinctions. Poverty in fact is all that it provides for, and hence, the poor who have become so by unavoidable misfortune, or it may be by the practice of a more than ordinary virtue, must stand on the same footing with those who have made themselves poor by the grossest indolence or perhaps only pretend poverty in order to procure additional means of continuing them. When such things can be prevented (and an effectual preventive still remains to be discovered) pauperism preys on the very vitals of society. An specimen of the state of pauperism in the United Kingdom is given in the following Table for 1846—

	Population in 1841	Total number of Paupers in the United Kingdom in 1846	Proportion per Cent.	Annual Value of Pauper Relief	Expenditure for the Relief of the Poor in 1846	Rate in the Pound on the Average of the Poor	Rate per Head of Expenditure
England and Wales, Ireland, Scotland.	16,994,411	1,211,852	10.8	£ 1,191,171	£ 1,191,171	1.191	1.191
	8,178,134	333,019	4.0	119,570	119,570	1.195	1.195
	2,850,316	146,570	5.1	8,230, 34	435,018	1.1	1.1

The same causes which foster pauperism tend to foster crime. Of this, too, there has been a great increase in recent times but there is reason to hope that the increase is more apparent than real and that numerous cases which appear in our criminal calendar indicate not so much an extension of crime, as superior skill in detecting it. The density of the population, and the consequent difficulty often experienced in finding employment, has led to extensive emigration, which is carried on partly under the auspices of the Government, and has unquestionably been most beneficial inasmuch as it both relieves the mother country of a load which might ultimately prove too heavy for it adds greatly to the comforts of the emigrants themselves and tends to supply the most serious want which many of our colonies experience—a want of labour. The extent and direction of emigration from the United Kingdom are exhibited in the following Table.—

EXTENT AND DIRECTION OF EMIGRATION FROM THE UNITED KINGDOM.

Years.	From			To				Total.
	England and Wales.	Scotland.	Ireland.	U. States.	British America.	Australia.	Other Countries.	
1846	37,811	5,427	34,811	50,339	47,419	377	1998	139,681
1847	145,098	8,218	82,788	142,114	109,890	6,949	1887	396,870
1848	178,258	11,546	49,701	139,583	11,986	53,678	6169	346,765

One of the most formidable symptoms of British society is the general situation of the condition of its labouring classes as now attracting. Both in high places, and elsewhere, clear heads and warm hearts are laboring anxiously to ameliorate it. And it is well that, amidst their devotions, sanitary measures are not forgotten. Our climate is eminently favourable to health, but for a long time good evidence of the fact was to be found only in the rural districts. Many of our larger towns, with their stagnant atmosphere, their narrow filthy lanes, and damp, smoky, crowded cellars, were the chosen abodes of disease and pestilence. The improvements which have been effected, and continue to be vigorously followed up, already furnish one of the most interesting chapters in the comparatively recent but very important history of vital statistics. In the five years ending 1805 the mortality was one in 41.9; in 1810, one in 44.8; in 1830 one in 46; in 1840 one in 44.5; and in 1844, one in 46. In London in 1805 the mortality according to Maccubbin, was one in 25. It is now one in 40. It is plain, however, that much of a sanitary nature is still required in our larger towns,

since Mr Farr one of the highest authorities on the subject, states the difference in the duration of life in towns and country at not less than 17 years in favour of the latter—the proportion being 55 years in the country, and only 38 in towns. It is not, however, by physical means, important though they be, but by moral means, that permanent improvements of our social system are chiefly to be effected. The first of these, unquestionably is education. Taken in its highest sense, it includes the whole course of training by which a human being is raised to the highest perfection of which his nature is susceptible. Such an education is always of difficult attainment, but it is believed that where it meets with congenial minds, the education pursued in our higher schools and colleges is not surpassed in any country in Europe. The description of these celebrated institutions must be reserved for the particular divisions of the empire in which they flourish. Here we can only advert, for a moment, to the humble education which every citizen ought to receive, because, without it, he is to all intents and purposes not a civilized man but a savage. For a long time it was supposed that this education was as widely diffused in Britain as in any other country, but the contrary has been proved, and in our place among educated nations it is not the first. The fact

is somewhat humiliating but it is hoped will soon come to be a reality. Circumstances have hitherto prevented the establishment of a national system, and Government has in the meantime adopted one of the most effectual modes of accumulating voluntary exorbitant by rewarding them with additional grants from the Treasury. Education, on a basis so extended that the most scrupulous cannot refuse to receive it, and of a kind so pure and hallowed, that none can receive without being essentially benefited by it, should be one of the earliest, as it certainly would be one of the noblest achievements of our country. For educational and criminal statistics, see EDUCATION, SCOTLAND, and IRELAND.

History.—Great Britain, for many ages consisted of two independent, and almost incessantly warring kingdoms, which became united in 1603 under one sovereign in the person of James previously the sixth of the name in Scotland, and thereafter known as James I. With him the history of the British Empire properly begins. His reign has the merit of having been peaceful but he was ungainly in person vulgar in manner, and of a cunning, treacherous, and selfish nature. His learning, which might have shone like a jewel in his crown, only furnished displays of his pedantry and his highest personal quality was the very equivalent of an entertaining extravagant notions of his royal prerogative. His son and successor Charles I was a man of a very different stamp. In person, he was every inch a king, and had he lived in less trying times, the many noble qualities, of which he was undoubtedly possessed, might have made him reign both prosperous and brilliant. Unhappily he inherited his father's notions of prerogative— notions which, though they had only furnished the father with a topic on which he was perpetually giving utterance to a kind of blasphemous bombast, became the occasion of fearful calamities to the son at once terminating his reign and his life by a bloody tragedy. An interregnum succeeded, in which the chief actor performed his part with unrivalled ability but with a character so odious that many are still puzzled where to give him a place—whether among saints or hypocrites. He had ruled by a military despotism but the sceptre, which even he was centrally able to wield, dropped at once from the hands of his feeble, irresolute son, and the Restoration of Charles II was hailed with loud acclamations. Society now underwent a sudden change, and, as so often happens, passed from a bad to a worse extreme. Under the pretext of disapproving hypocritical Nonconformists gained the ascendancy and nowhere more completely than at court, where the monarch himself was soon found raising sons for his debaucheries, by paying his kingdom, and

stepping to the insupportable infancy of hectoring its independence, for a passion from such a savage as Louis XIV. The death of Charles II. made way for his brother James II. an insupportable bigot, who at once brought matters to a crisis and was soon beyond the kingdom an ignominious exile. Then followed the glorious Revolution of 1688 which completed the Magna Charta by its Bill of Rights and placed the Constitution on its immovable basis. William and Mary were succeeded by Anne whose reign is remarkable chiefly for the act of Union in 1707 and the hand of distinguished writers who flourished in it, and have justly procured for it the name of the Augustan Age of English Literature. George I. and George II. followed, both of them adding to limited intellect the greater disadvantages of being foreigners by descent, language, and manners. The reign of each is marked by a rebellion which aimed to bring back the House of Stuart. They were succeeded by George III. whose blameless private life has endeared his memory to every right-hearted Briton, and whose long reign, though not free from blemish as to the whole one of the most illustrious in British annals. A visitation of providence withdrew him from public life, and placed him in a state which, notwithstanding the trappings of majesty which still surrounded it, the very meanness of his subjects could not envy. Meanwhile his place was occupied by his son as Prince Regent, who afterwards succeeded him under the name of George IV. He looked a king but was scarcely so said to have lived on. During his reign, the hope which the nation had entertained of an illustrious female succession, was suddenly and grievously extinguished. The sceptre of the British Empire was again to be wielded by a female, but in the meantime, it passed into the hands of William IV. whose reign not otherwise much distinguished is famous for the Reform Act. The period applied for a female reign now arrived, and our beloved sovereign Queen Victoria I. ascended the throne. This reign has hitherto been as illustrious as that of the great Mademoiselle, without being terminated by any of its darker spots. Many years of it have already elapsed and many more. We trust are due to commerce, but that much can now be said. Never could loyalty to the crown be more justly claimed, and never has it been more cordially and universally paid — (Macaulay's *History of England*, Porter's *Progress of the Nation*, McCulloch's *British Empire*, Baume's *History of the Cotton Manufacture*, Johnston's *Physical Atlas*, Statistical Journal, *Parliamentary Returns* &c.)

BRIVAS (see *Bona Lurra*) a town in France, dep. Corren, 15 m. S.W. Tulle. agreeably situated amidst vineyards and orchards 1 bank, Corren, surrounded by a fine avenue of elm houses substantially built of stone, but the streets narrow and the public squares indifferent. It has a college and hospital a court of first resort and of commerce an agricultural society and seminary and in the vicinity an extensive cotton mill. Manufactures — woollens, cotton, goods, iron-rod and wax candles, brandy and wine-refining. Trade — timber, wine, chestnuts, bristles, tuffed poultry, wool, cattle, pigs, &c. Coal is worked extensively in the neighbourhood Pop 5882.

BRIVIESCA a town in Spain, Old Castile, prov. of and 20 m. N.E. Burgos. It stands in a plain 1 bank, Oca, and is well built, houses generally of two stories and streets straight, spacious, clean and well paved. It has two parish churches, both handsome buildings, a townhouse and three hospitals. It is well supplied with water part of which is furnished by a finely ornamented fountain. The manufactures are of no consequence but corn mills are numerous, and there is a considerable trade in wool Pop 2064.

BRIVIO a walled town, kingdom of Italy, Lombardy prov. of, and 17 m. E.S.E. Como r bank, Adda commanded by a castle, and having a handsome parish church and some chapels. Manufactures — silk and linen fabrics, lace, and paper Pop 1980.

BRIXEN a town in Austria, Tyrol circle, Schwaz, gov. of and 40 m. E. by R. Innsbruck in a narrow valley near the confluence of the Rienz with the Isar. The town is regu-

larly built; but there is little to it deserving of notice, except the cathedral which has four towers, and a facade of white marble. Brizen is the seat of a bishop, and has an Episcopal palace, a townhouse, prison, hospital and several convents. Among the educational institutions are a gymnasium, with 200 students and a normal school. Some silk is manufactured Pop 8600.

BRIXHAM a market town, Dorset, and par. England, co. Devon. The town is prettily situated on the English Channel occupying the sides of two hills a little S from Berry Head, the S. part of Torbay and 23 m. S.E. Exeter lat. 50° 25' N. lon. 3° 30' W. It is divided into two parts, called Upper and Lower Brixham: the former comprising a long straggling street. The generality of the older houses are very indifferent buildings, but some of these of more recent erection are sufficiently respectable. The shops are lighted with gas but not the streets. There are two churches — the parish church a large one in structure in the perpendicular style a chapel of ease, and Wesleyan Independent, Unitarian, and Baptist chapels, and a chapel for negroes to the Plymouth Brethren, a national and two private schools, several benefit and benevolent societies and other charities. The trade of Brixham is chiefly in fish, which is carried on to a great extent, London, Bath, and Bristol receiving supplies from this place. The port possesses also a number of vessels, engaged in the coasting and foreign trade. Those in the latter plying chiefly to the Mediterranean. Brixham is celebrated in history as the place where the Prince of Orange, afterwards William III. landed November 4 1688. Pop 5617. Area of par. 3749 ac. Pop 5395.

BRIXTON (three parts Eng. — 3 par. Devon; 9900 ac. Pop 77 — 2 par. Isle of Wight 3251 ac. Pop 695 — 2, Devonshire, par. Wilt 2450 ac. Pop 201.

BRIXTON a town, England, co. Surrey forming an agreeable suburb of London 8 m. S.W. St. Paul's. It consists of North Brixton and Brixton Hill, composed of neat, well built houses extending about 2 m. along either side of a road from Kennington to Streatham with numerous handsome detached villas. In the village and district are three Baptist and three Dissenting places of worship, a house of correction for the county. St. Anne's a nunnery an elegant brick edifice where 200 boys and 100 girls are maintained and called Trinity asylum for aged females and the Reform almshouse. Pop 14610.

BRIXWORTH par. Eng. Northampton 2410 ac. Pop 1208. BRIZINA or BRISINA a vil. Algeria, in the Sahara, 286 m. S.W. Algiers, lat. 32° 23' N. lon. 0° 45' E. It contains about 150 houses built with a wall and has mosques and schools. The people spin and weave wool make tolerable gunpowder and are good armourers, smiths, farmers &c. Salt-petre abounds in the environs, while sulphur is obtained from the Dead Marsh. A good deal of fruit is grown, but not much grain. The neighbouring hills contain extensive beds of gypsum.

BROACH see BAROACH

BROAD HAY a bay Scotland N.E. side of Lewis, having Kepp Head on the N.W. of its entrance, and Clump Head on the S.E. Its length inland is about 7 m. breadth varying from 3 to 4 m. lat. 58° 30' N. lon. 6° 10' W.

BROAD SOUND an extensive bay N.E. coast, Asia, trolia, in lat. (entrance) 22° 22' N. lon. 149° 30' E. It runs about 60 m. into the land in a S.E. direction, measuring from the parallel given above and terminating at a point at its S. extremity where it is encompassed by high barren hills, with craggy tops.

BROADSTAIRS a small seaport and hamlet, England, co. Kent, Isle of Thanet. 2 m N.E. Ramsgate. Lat. 51 22' N; Lon 1 06' E. situated on a slope, facing the E. The streets of R. or principal streets, as it is a handsome terrace. The thoroughfares are straight and spacious and though unpaved, are well kept. The houses are in general good, the larger of brick the others of flint. Water obtained from deep wells, is abundant. It contains four chapels—one chapel of ease, one Wesleyan and one Baptist, and an ancient chapel called the chapel of the Virgin, occupied from time to time by various denominations. There are four principal schools, and several others a Doreen society and various other charities. The town has of late years become a fashionable water supply and is provided with suitable accommodation for visitors, including well furnished lodging-houses, a hotel, news and assembly rooms, public libraries, and hot and cold baths. The only trade of the place is in fish. Pop. 1457.

BROCKEN or **BROCKEN** [Latin *Braccina*] a mountain, Prussia, Saxony, par Magdeburg about 20 m W.S.W. Halberstadt. It is the culminating point of the Harz Mountains and 3791 ft. high. The summit and nucleus of the mountain are granite, around which this sedimentary rocks lie, enveloping it like a mantle. As one, called the *Brackenau* in which the host constantly resides, occupies its loftiest summit. Close to the inn is a tower of mossy timber 50 ft. high, and about 1 mile from it is a cleft called the *Schneebeck*, from which the snow scarcely ever disappears. Owing to the haze which prevail the view which is said to be fine, and very extensive can seldom be seen to advantage. The mountain is said to be haunted, and is the cradle of numerous fabulous legends, which are still well known throughout Germany. One cause of their prevalence is a curious natural phenomenon called the *Spectre of the Brocken*, occasionally seen at sunset or sunrise, when the sun rises perpendicularly out of the valley opposite to the sun, and at the same time leaves the mountain-top clear. Every object reflected from this wall of vapour is magnified. The whole mountain becomes of larger dimensions, the inn is converted into a palace and human beings appear giants. At the foot of the mountain the *Bohn*, *Holz*, *Ocker* and *Hohemau* take their rise.

BROCKVILLE a. in Upper Canada, co. Leeds, 1 bank St. Lawrence, 49 m. E.N.E. Kingston. It is a handsome town, and lies on a limestone bed, which supplies the material of which the houses are built. It has a court-house, jail and six churches—Presbyterian, Episcopal, Methodist, Baptist, Congregational, and M. Catholic, all built of stone. Thawing, brewing, sawing, wagon-making and various other handicrafts, are carried on. Grains is obtained in the

neighbourhood. The steamboats from Montreal to Kingston call here. Pop. (1857), 2346.

BROCKWORTH par Eng Gloucester 1847 ac. F 425
BROU or **BROCO**.—1. A fortified m. Austria, gov of same name military frontier of Selavona, 21 m. S.E. Posen, 1 bank Sava, opposite the Turkish town of Bred. It carries on an active trade with Bosnia, whence it receives raw hides, woollens and cottons. Pop. 3470.—The university of Bred extends over 578 aq. m. with a pop. of 81,200.—3. Bred, or *Uperker-Bred*, a. in Austria, Moravia, gov. Brian, circle of, and 9 m. E. Hradecr. bank, Olava. It is walled has a handsome parish church, a Dominican cloister which has existed since 1337 and a town house. It has also manufactures of cloths, and a good trade in fruits and hides. Pop. 8369.—4. Bred (Bohemian, *Cesty Bred*) a. in Bohemia, circle, haurzin, emp. lordship of same name on the Zambka and on the Olmutz and Bohemian Railway 19 m. E. Prague. It is surrounded with walls, in which are three gates, and contains two churches and a chapel, one of them a ducal church with fine old monuments a townhouse, school &c. It is well situated for trade but the inhabitants live chiefly by agriculture and weaving. Pop. 1877.—4. Bred (*Druck*) (Bohemian, *Arnsdorf*) a. in Bohemia, circle of, and 22 m. S.E. Caslau, on the Zanaa with a gymnasium and custom-house. Pop. 3988.—6. Bred, a. to Turkey in Europe prov Bosnia, bank Sava, opposite Bred in Selavona, 60 m. N.W. Buzza town. It is defended by a castle, and is a commercial entrepot.—Many other places in Central Europe also bear the name of Bred.

BRODSWORTH par Eng York, W. Riding 5170 ac. Pop. 443.

BRODY a. in Austria, N.E. part of Galicia, gov of, and 50 m. E.N.E. Lemberg on the Russian frontier lat. 50° 7' N. lat. 25° 18' E. situated on a swampy plain. It is built and dirty and the houses mostly of wood. It has been called the *German Jerusalem* from the large number of resident Jews, who constitute three fourths of the whole population. It has several squares three Greek churches, a R. Catholic church several synagogues, a chamber of commerce court of exchange a convent of the Sisters of Charity a great many Jewish and other schools and assemblies, a Jewish hospital a theatre, and a large palace belonging to the Potocki family June 17, 9. It has been a free commercial town having its own magistrates and courts of justice, and its imports and exports exempted from all duties. It is the first town in Galicia in commercial importance, and the second in population. The transit trade with Poland, Moldavia, Wallachia, Turkey and the E. parts of Russia, is very extensive. The imports from the latter have lately increased nearly twofold, but the exports have fallen off in more than the same proportion. The trade of the town is almost exclusively in the hands of the Jews, and consists chiefly in the export of horses, cattle wax, honey tallow hides, leather ungates, unseeded dried fruits, &c. and in the import of wax, honey tallow raw hides, wool, wax, &c., from Russia, and of jewellery pearls colonial produce and manufactured goods, silks, and furs and particularly hardware. It has tanneries and linen manufactures; and its markets are numerously attended, especially that which takes place four weeks after the Leipzig fair to which large quantities of goods from the latter are transferred, and are bought up chiefly by Russian merchants. Pop. (1846) 17,789

BROEK IN WATERLAND, a vil. Holland, prov. N. Hal land, about half way between Amsterdam and Edam on a brook, from which it is supposed to take its name called the *Aa* or *Ed*, and placed in the middle of four lakes or meres. Broek, though otherwise an inconvenient place is reserved for the devotion of its inhabitants to sea-fishing and oystering. The houses are very irregularly placed some projecting others retiring but all built of wood, and painted white or blue, so as to appear as if newly erected. The most sedulous attention is paid to the state of the streets no smoking is allowed as the ashes of the tobacco might defile them. The war with dirt is carried on incessantly within as well as without. Each house has generally two kitchens, the smaller kept for the purpose of preserving the larger from the disadvantage and soiling of its utensils. Each house has an apartment also kept for the sole purpose of being cleaned, except on the occa-

son of a baptism marriage, or funeral. Each also has two outer doors, of which one, in consequence of the outer steps to it being removed is some feet raised above the ground and is never used by any member of the family but on three occasions baptism, marriage, and burial. The gardens and flower-plots equally attest the horror in which slovenliness and dirt are held by their owners and attract many strangers who come to admire the taste and attention bestowed on them. There is but one church, the Reformed, a highly ornamented and carefully preserved building with a high square tower passing into an octagon a curious painted glass window and an elaborately carved pulpit. The court-house is on the N side of the village, and formerly served also for the school but being found much too small, a large and handsome school house was built in 1826, and is attended by 170 scholars. There is also an orphan-house. Pop. of the parish nearly 1200 all Protestants, excepting 30 E. Catholics and 10 Jews.

BROKEN ISLAND—1 An ul China, off the N W extremity of ul. Chuan, with which it is connected at low water. It is about 750 ft. high and is steep on all sides, excepting that west the island just named.—2 An ul S Pacific Ocean N coast Papua lat. 2 40' S lon. 134 50' E. (c.)—3, A group of islands, sometimes called Dorong or Bologo Islands Bay of Bengal coast of Aracan they are three in number and are situated immediately to the S of Aracan river. They are long and narrow mountains, woody and rugged without any appearance of inhabitants or cultivation and the whole coast of Aracan, both to the N and S of them, has a similar scenery and repulsive aspect.

BROMFIELD a tn. Preuss. prov. of and 69 m N E Posen, cap. gov. and circle of same name on the Rusa 6 m W its confluence with the Vistula. It is well built, has three suburbs, and contains three churches, a monastery a convent and several educational and charitable establishments. It has a large sugar-refinery several tobacco and distillery manufactures several flour and oil mills, potteries, and luncheon also a vinegar work several distilleries and breweries. It has likewise a considerable trade in grain and wine, for which its situation on the Heymberg Canal gives it great advantages. For a short time under Napoleon Bromberg was restored to the Poles and formed the capital of a department of the same name.—The government area 3437 geo sq m consists generally of an extensive plain with a double slope, one E. belonging to the basin of the Vistula and the other S W. sending its waters, by the Vetus and other streams into the Oder. The soil is of a middling description, but agriculture, owing more to the industry of the inhabitants than to their natural advantages, has made considerable progress. All the ordinary crops of grain are raised. The potatoes are excellent. The chief manufactures are woollen linen, leather and paper. There are also several saltpetre-works and sugar-refineries. The breweries and distilleries are numerous. Pop. of gov (1846) 465,969 of circle, 67,520; of tn 11,282

BROOKLYN a city U States on Long Island New York, separated from the city of New York by the narrow channel called East River. It is properly a suburb of that city and is a place of great business. It is regularly built, the streets straight and wide, and many of the houses of a very superior description. In consequence of its pleasant and healthy situation it has become a favorite place of residence with many of the merchants of New York with which it is connected by four steam ferries, the trip being performed in about five minutes. It contains a jail, a handsome building of freestone 50 churches and the lyceum a fine granite structure, in which there is a spacious lecture-room 19 academies and 38 schools. The city library contains 8000 volumes, and has a spacious reading-room. The U States navy yard covering 40 acres of ground is in the E. part of the town, in Wallabout Bay. Connected with the establishment is the U States naval lyceum a flourishing institution with a valuable library and museum. Half a mile E. of the navy yard is the naval hospital, occupying a commanding eminence, and surrounded by 33 acres of cultivated ground enclosed by a brick wall. Brooklyn has extensive manufactures of cotton woollens, glass, oil carriages, saddles, and harness chains cables, and engines besides fine distilleries, and one brewery Pop. (1843) 59,596 (1850) 96,500 [add. 80,847].

BRACOLA or Barmoo a territory N W Africa, in the E. E. part of Senegambia, between the Boki and Kokoro rivers, two of the head streams of the Senegal. It is of small extent, not exceeding 60 or 60 m in length from N W to S E, and about 40 in breadth and is intersected by lat. 13 30' N. and lon. 10 30' W.

BRODAL (Loot) a bar N W coast, Scotland, co. Ross, having Priest and Summer Islands at its entrance and Martin Island at its head. Inland from the head of the bay extends a narrow salt water lake at the head of which is the small village of Lochmoss.

BROUGHAMTON in Furness, a market in England on Lancaster on a gentle declivity 23 m. W Lancaster in the form of a square, with a lofty obelisk in the centre. The spinning of woollen yarn was formerly the principal occupation of the inhabitants but the making of hoops is now their chief employment. In the neighbourhood are several slate quarries, and numerous iron and copper mines. The weekly market is on Wednesday and fairs are held in April and August, for horned cattle, and in October for cattle and sheep. The Furness Railway has a station at the town Pop. 1937.

BROUGHAMTON'S ARCHIPLAGO a range of islands rocky islets, and rocks N Pacific, N of Vancouver's Island W coast of N America so called from an Englishman who discovered them in 1790 lat. 50° 35' to 51° N.

BROUGHAMTON FERRY a marine vil and watering place, Scotland, on Forfar N shore of the estuary of the Tay 3 m. E Dundee on the Edinburgh and Northern Railway at the ferry across the Tay from Ferryport-on-Craig. It consists of four principal streets stretching E and W, and four others crossing them at right angles. They are, with one exception straight, and are all clean but most of them unpaved, or only macadamized, supplied, however with convenient foot-paths. The houses are of stone, and generally well built, while many of those of modern erection are extremely neat and tasteful. Handsome villas, in various styles of architecture, but chiefly Elizabethan belonging to Dundee merchants and manufacturers are also numerous. The village is lighted with gas, and tolerably supplied with water. There are four places of worship—a chapel of ease, belonging to the Established church, a Free church, with a steeple, erected in 1844 a United Presbyterian and Episcopalian chapels the former a neat Gothic structure. The schools are—one under the auspices of the Established church another under that of the Free church an infant and two private schools well attended. The only manufacture carried on here is that of coarse linen, in which about 80 weavers are employed. Nor do the fishwives' lairs that are often to be established, it being a condition in many of the leases that no manufacturing works be erected. A great portion of the working population is employed in fishing for supplying the Dundee market. At the E extremity of the village, on a rocky promontory projecting into the sea stands the old castle of Brougham when or by whom built is unknown. (Local Correspondent.) Pop. 2772.

BROUWERSHAVEN a town Holland prov Zealand about 6 m. N Zierikzee, N shore of IJsselmeer. The five gates of this ancient and much decayed town have been pulled down. The Reformed church is old, and large and the market-place adorned with a stone statue of Jacob Cats the most popular of Dutch poets, and a statesman of some note, who was a native of the town. The inhabitants were 1641.

once largely engaged in the herding-hubery but are now almost purely agricultural. An old man's, an old woman's and an orphan home have all disappeared but there is still a school. Pop. 1160.

BRUCE ISLAND an isl Red Sea. See JOUR (8r).

BRUCHY, a small river France, which rises near a hamlet of the same name, in the Vosges, and, after a N E course of about 45 m. joins the Rhine and Rhine Canal of which it is an important feeder.

BRUCHSAL, a town Baden, esp. half same name, circle, Middle Rhine on both sides the Elzabach, 12 m. N N E. Carlsruhe and on the railway between it and Heidelberg. It is walled, and has spacious barracks. The church of St. Peter is interesting and contains some antique tombs. It has also an admirably regulated hospital, a N Catholic gymnasium and other seminaries and a house of correction for the circle of the Middle Rhine. It is an ancient town, was the residence of the Prince-bishops of Speyer from A.D. 1024, whose antique castle is still standing and is the seat of the judicial administration of the bailiwick. The grand Duke of Baden who acquired it in 1806 has a fine palace and grounds here. In the environs are the salt springs of Utschalt, formerly turned to account, but now neglected. Pop. (ex clusive of garrison) 7386. — The railway is traversed by the Rhine, and contains the towns of Bruchsal and Heidelberg. Its area is 76 geo sq m. and its population, of whom four-fifths are R. Catholics 33,897.

BRUCK — 1 A town Lower Austria, gov. and circle Vienna, from which it is 22 m E.S.E. on the Leitha. It is divided into the old and new towns. has a church a chateau with a noble park and botanical garden attached, belonging to the Counts of Harrach a theatre, college, and a cotton-spinning factory. Pop. 3600. — 2 A town Austria, in Styria, esp. circle of same name, at the confluence of the Mur and Mürs with a good transit trade, and gymnasium. Pop. 1500. — The CIRCLE, area, 1168 geo sq m. is intersected

by high hills, at the foot of which lie valleys of considerable extent. It is well wooded and watered, and contains both game (particularly the chamois) and fish in abundance. It is also rich in minerals, particularly iron and copper. The inhabitants live chiefly by mining and the rearing of cattle. Pop. 62,000.—3. A. in Friaula, prov. Brandenburg, gov. of, and 17 m. S.W. Potsdam with manufactures of woollens and linens; and some breweries. Pop. 1255.—Numerous other places in Germany have the name of Bruck.

BRUCKENAU, a vil. in Bavaria, on the Rhine 40 m. N. Würzburg, with a castle, in which the royal family often resided during summer. It is also a favourite watering-place, containing saline, alkaline, and chalybeate springs, which are much frequented. Pop. 1850.

BRUFF par Irel Limerick 1531 ac. Pop. 2106. —in the Dendre, 14 m. N.W. Mons with linen manufactures, several limestone quarries, and limekilns. There is a Jesuit college here, with about 300 students. Pop. 1737.

BRUGES (Belgium, Flanders, Brugges) a city, Belgium, cap. prov. W. Flanders, in a plain, 8 m. from the German Ocean, 54 m. N.W. Brussels lat. 51° 12' N. lon. 2° 15' E. surrounded with a double water l. no. which includes the canals of Ostend (which traverses the city and is of great depth), Ghent and the Damme or Sluis (Edsae) all of which here join. The city has 54 bridges, 42 stone and 12 wooden all opening in the middle for the passage of vessels. It is an oval shape, lying S.W. to N.E. and is fully 4 m. in extent. It is surrounded by walls with seven gates, and has more than 200 streets. Many of these owing to the great increase of the population in modern times, seem half deserted as they have all a venerable look, and bear upon them a strong impress of the Middle Ages. The houses in the lead and even some of the retired streets mostly remain as they were originally erected and in excellent preservation with lofty fantastic gables and ornate fronts, abounding in quaint designs. Bruges is the see of a bishop, the seat of several courts for the province, and was long one of the finest cities of Europe. Near the Grande Place or chief square stands the old edifice called *Halles* (cloth and other halls, or

is the town library of about 8000 vols., and 500 to 600 MSS., most of which belonged to the old abbey of Dunas. Abutting on the townhouse is the chapel of St. Basil, composed of two distinct chapels—an upper and a lower the front being a kind of screen of florid Gothic. Contiguous to this double chapel is the Government-house, and the court-house. The old parts of the latter contain rooms once inhabited by the sovereign Counts of Flanders, and Dukes of Burgundy.

The cathedral of Bruges, or Church of the Holy Saviour is said to have been first founded A.D. 646. The first building being destroyed by fire in 1258, the present church was raised shortly thereafter. The Church of Our Lady is a sumptuously furnished and richly adorned edifice finished in 1119. The exterior of this church like the preceding, is plain, both being built of brick. The tower and spire of Our Lady's rise to the height of nearly 450 ft., and serve as a landmark to mariners. In side chapels are the fine tomb of Charles the Bold, last Duke of Burgundy, killed January 6, 1477 at the battle of Nancy, and the finer mausoleum of his daughter the Archduchess Mary wife of the Emperor Maximilian (died 1483) both buried in this church. Some of the paintings in this church are of superior merit, two in particular by Quellyn and Soghera. The once famous abbey of the Dunas, or Dunas, is now occupied by the seminary or academy for young priests. In several parts of the city may be seen the buildings of suppressed monasteries either in a state of dilapidation or applied to secular purposes. There is still a convent of about 60 British Augustinian nuns, who are much employed in educating ladies of their own persuasion.

Their church is small and of showy early Roman architecture. There is a Protestant chapel in the city for English residents. Besides the theological seminary (English, 140 library 7500 volumes) there are an Episcopal college, partly supported by the state, an *athlète* or college, for secondary education, with communal and infant schools, a school for the deaf and dumb (opened 1835), a school of surgery and obstetrics, a museum, open to the public, and a botanic garden. Bruges has also some scientific and literary associations and an academy of fine arts, with about 400 students. The picture-gallery of the museum contains some good early paintings, such as a Van Eyck, of 1440 also others of later date but greater beauty by Forbus, Fleming &c. As early as the year 1258 Bruges had a corporation of painters, architects, and sculptors the labours of many of whom are still visible on the inner and outer walls of the city they lived in, and loved to adorn. The city likewise possesses many well endowed charitable foundations, among which is the magnificent depot for W. and E. Flanders, usually containing 500 to 600 inmates. It has also a *mont-de-piété* or state pawn brokers a well-ordered prison and a small theatre. The stagnant water around the city renders Bruges rather unhealthy notwithstanding its proximity to the sea. Still many wealthy old-fashioned Belgian families make it their general residence. The sandy nature of the surrounding country makes good water scarce; rain water is therefore carefully preserved and the inhabitants likewise use the muddy waters of the canals, and the ditches of the old fortifications.

The manufactures of Bruges are magnificent to what they were in former ages. They still however include linen of every sort and fineness, damasks, lace, light woollen goods, mixed stuffs, &c. In a recent year 21,693 pieces of linen were sold to the cloth hall. The lace-making employs several thousand women and girls for instructing the latter in fine work, schools have been opened in the city are spinning-factories, eyeworks, bleachfields, calico printing houses, several tanning oil, wax, and paper mills, a great number of breweries and distilleries, sugar and salt refineries, coppersmiths, tanneries, curriers shops, starching houses, lace factories, ropewalks, potteries &c., and a building yard for the construction and repair of vessels. It was long famed for its tapestries; and furnished a part of those that graced the triumphal entry into London, of Edward III., after the battle of Poitiers, in 1357.

Through the course of canals, Bruges has direct, though limited, intercourse with several parts of general Europe, and may be considered as one of the Belgian entrepôts. Hence it exports the native products of the soil, and goods of its own make, and imports colonial produce, spices, dyewoods, drugs, wines and brandy olive-oil, dried fruits, seeds, and

BRUGES, LA TOUR DES HALLES.
From Delapierre, Album Pittoresque de Bruges.

markings) a square building surrounded by a tower 254 ft. high, in which is a very numerous and sweetly-toned set of chimneys. The precise date of this edifice is unknown. Burnt in 1380, and again in 1498 it was extensively repaired if not then three centuries, to give the alarm the monument a fire appears in the city or environs. To the E. of the market-place stands the Hotel de Ville, and a small but beautiful Gothic townhouse, containing several quaint pictures. Adjoining it

pothol. Likewise leather furs, silk, metals, building-timber, etc., and a variety of other articles. The great beam or dock, which is the general receptacle for all water-borne merchandise, brought in or taken away by means of the several canals, forms a convenient port, having warehouses, &c. adjoining, and accommodation for some scores of vessels at 15 ft. draught. In a recent year the value of the total exports, officially declared, was 664,677 francs (234,580) total exports, value 717,815 francs (259,713). The number of vessels arrived in the place was but 11 of 1840 tons in all. There are four annual fairs held here for every kind of goods, beginning May 8 and continuing 15 days; with three others for horses, cattle, &c. one immediately after Easter and the two others July 25 and November 15. The State Railway from the N. coast at Ostend to Mechlin, and thence all over Belgium and connected with the Prussian and French lines passes through a portion of the W. side of Bruges. In 1587 Bruges was fortified by Count Baldwin of the Iron Arm and was walled, first in 1058 and again in 1270 when the place was also mostly re-built. It suffered greatly from fire in 1184, 1215, and 1280 in the latter disaster its records perished, and its churches wrecked or bought from its feudal protectors, or rather oppressors. For a time it had thus no acknowledged municipal privileges, which however were restored by Count Philip the Handsome in 1399. Early in the 19th century Bruges had fallen into ruin and power. In the House of Burgundy it took the leading rank as the central mart of middle N. Europe, and was frequented by Lombard merchants. About that time, such was the extent of its commerce there were 13 foreign consuls or agents permanently resident in the city. The progress of its manufactures was at least as great, and its cloths, linen, and tapestries, at last came to excel all others for quality and beauty. Under the House of Burgundy Bruges still increased in riches and power. In 1480, Duke Philip the Good here instituted the order of the Golden Fleece, a title meant to bring honour to those of its traders who pursued a good of wealth into his coffers through means of the chief manufacture of the locality for through its means a ducal chief was raised above the generalty of kings, in wealth and real power. Unhappily the pride and turbulence of the citizens grew nearly commensurate with their prosperity. In 1488, they rose in rebellion against Duke Maximilian and laid hands on his person. The seven measures of repression which ensued gave the first blow to the city's prosperity from which time it declined, and its ruin was afterwards entirely completed by the oppressions and persecutions endured from the Duke of Alva and other tyrants of Philip II. King of Spain. In these latter days of trouble, all trade was at a stand, as a consequence crowds of the best artisans sought an asylum and occupation in England. From that time we may date the beginning of our own superiority in manufacturing as well as producing wool long the great staple of England.

The population of Bruges once exceeded 200,000 it now scarcely numbers a fourth of that amount, in 1643 being 48,764, and even this a considerable increase compared with what it had been many years before.

BRUGG or BAUCK a par. and vil. Switzerland, can. of and 10 m. N E Aargau on the Aar which is here crossed by an ancient bridge supposed by some to be Roman. It was an ancient possession of the House of Hapsburg and is surrounded by walls with lofty conical towers and gates. Half a mile beyond the walls stands the abbey of Königsfelden, where many members of the House of Austria are buried, and a little further off, on a wooded height called Willemsberg are the remains of the castle of the House—the Castle of Hapsburg. The village, abbey and castle, are all included within the site of the ancient Visandian, the most important settlement, and strongest fortress of the Romans in Helvetia. Zimmerman was born here and Brugg, from having given birth to him, and several other individuals of talent and learning is sometimes peculiarly termed the City of the Prophets. Pop. 800.

BRUGUIERE (La) See LAVALOCHERE

BRÜHL, a m. Prussia, prov. Rhine gov. of and 9 m. S. Cologne, on the railway to Bonn, on a spur of the Eifelbahn. It is surrounded by ancient walls, is well built, and contains two churches, a normal school, and a magnificent palace, begun in 1735 by the Elector Clement Augustus, of Bavaria.

In the Franciscan convent, a normal school, for the education of R. Catholic schoolmasters, was established in 1875. The town was of more importance formerly than now. Cardinal Manning took up his residence in Brühl when he fled from France, in 1851. Pop. 2800.

BRUILLE (St AMAND) a tn. France, dep. Nord, 9 m. N W Valenciennes, near which are coal mines and brick fields. Pop. 2021.

BRUNECKEN or BRUNCKEN a tn. Austria Tyrol, cap. of the *Foerstthal* 16 m. N E by E Bressan, on an elevated plain on the river Rava. It comprises a handsome modern church, adorned inside with frescoes, pictures, and monuments a townhall school, court, workhouse, and prison, formerly the Bishop's castle with some manufactures of woollen fabrics. Pop. 1800.

BRUNEL or BUNGO a tn. and river. See BUNGO PRO-

VINCE.

BRUNEL ISLAND Van Diemen's Land Hobart Town district, separated from the mainland by D'Entrecasteaux Channel (S. point or *Pennant's Head*) 43 35 S. lon. 147 21 E. (n.) It is of very irregular form, the main portion is about 23 m. in length and about 9 in breadth connected by a narrow isthmus with another portion of this island about 14 m. in length with a breadth varying from 3 to 5 m. The length of the whole island in a straight line, from *Tamson's Head* to *Cape Gert Out*, at the mouth of the river Derwent, is about 84 m. It has several bays the principal of which is *Adventure Bay* discovered by *Arminius* in 1773, and visited by *Cook* in 1777. *See* *Surf*.

BRÜNN (Latin *Brwna* Moravian, *Brno*) a fortified bn. Austria, Moravia, cap. gov. and circle of same name, 70 m. N by E. Vienna, on the railway from Vienna to Prague near the confluence of the *Schwarza* and the *Zwittava*, which almost encircle it. It stands on the slope of a hill, is surrounded with walls which have four gates, and it has 10 suburbs. It is for the most part well built, paved and lighted, and from its elevated position commands many fine and extensive views. Behind the town lies the castle of *Waldburg* on a hill of same name, formerly a citadel, but since 1809 converted into a state prison, and houses of correction and for eight years the prison-house of *Prince Pallico*. Brunn has seven public squares with fountains six parish churches, a church of Minorites, one of Capuchins, and another belonging to the Augustinian monastery with some fine paintings, and a library attached founded by *Elizabeth*, Queen of Bohemia; and many others. The other chief public buildings are St. Peter's Cathedral, the Bishop's palace, both built on the Peterberg, a commanding eminence in the W. part of the town. St. Jacob's Church, a handsome edifice in the Gothic style, with a steeple 376 ft. high dating from 1815 the *Landhaus* built in 1737 formerly an Augustinian convent now the place of meeting of the Governmental office; the military palace; the townhall, built in 1611 the theatre the splendid mansions of the *Urbischats*, *Leichtenstein*, *Kautschke*, and other nobles; and the *Leutis* college, a very spacious structure, enclosing seven different courts, now used as a barracks. The chief scientific and literary institutions are a philosophical institute, a theological seminary, royal gymnasium, and normal school and several other schools a national society for the encouragement of agriculture, natural history, and geography.

with its valuable museum, botanic garden, and public library. Berlin is the centre of Episcopal jurisdiction, the seat of a Protestant consistory, a court of appeal, and of other criminal and military courts. It has numerous charitable institutions such as the general infirmary, lying-in hospital and lunatic asylum, orphan asylum, society for the suppression of public begging, foundations for pensioning the soldiers of the Prussian guard and the widows and orphans of teachers, asylums for the blind, the deaf and dumb and for decayed livery servants. It contains also a brickwell, a workhouse, a fire insurance office and a provincial bank. The number and extent of its woollen, silk, and cotton manufactures, have obtained for it the name of Austrian Leeds. Its woollens are particularly prized. The other manufactured articles are chiefly silk, ribbons, cottons, yarns, glass, soap, tobacco, dyestuffs, leather and vinegar. It surpasses every town in Moravia in the extent of its trade being highly favoured by its central position in regard to Prague, Breslau, Pesh, and Vienna, with all of which it is now connected by railway. Its four annual fairs are much frequented by Austrian manufacturers. Berlin has several beautiful public walks, the most attractive are the Augusten, and the Franzosen gardens in which is an obelisk 60 ft. high of Moravian marble, erected in 1818 in honour of the late Emperor Frederick I.

Berlin is old. Its model was blockaded by the Hungarians in 1848 and the town itself was besieged by the Prussians in 1846 and by the Prussians in 1848. It has been repeatedly destroyed by fire, and often rebuilt. In 1553 it was visited by the plague which carried off 4000 of the inhabitants, to whose memory a column has been raised in the great square. Bonaparte had his headquarters in this town before the battle of Austerlitz, December 1805, and in 1809 the chief actions of Fort Spandau were determined by the French. Pop. in 1846 450,000 of garrison, 45,149.

BRUNNEN, a vil. Switzerland can of 3 to 8 W. Schwyts, pretentively situated on the banks of Lake Lucern near the mouth of the Moota. It has a good transit trade being both the port of Schwyts, and the depot for goods to and from Italy over the St. Gothard. After the victory of Morgarten the confederates met here and swore their league. Brunnen suffered much from the French in 1799.

BRUNSVITTEL, a w. Denmark in the S. Dithmarschen, 10 miles E. from the mouth of the Elbe. Lat. 53° 52' N. lon. 9° 10' E. Its harbour which is a little to the E. of the town, has from 8 to 12 ft. water is well sheltered, and is provided with commodious wharfs. Its export of grain is considerable. Steamers ply regularly between this place and Altona and Hamburg. There is also a ferry across the Elbe, which is here about 4 m. broad. The river is deep at this point, and the current so violent, that it has swept away the ground on which stood two older towns of the same name, and has caused very expensive erections for the protection of the present Brunsvittel. The town is extending and improving, and owns a considerable number of vessels mostly of small size. Pop. 1200.

BRUNSWICK (German *Brunschweig*) a duchy in W. Germany forming the twelfth state of the German Confederation. It consists of three larger and six smaller divisions, detached from each other and surrounded by foreign possessions. The principal division, containing Brunswick, the capital, is of a compact and oval form, with the exception of a narrow strip towards the N. E. On the N. W. and S. W. it is surrounded by Hanover and on the S. and E. by Prussian Saxony. The second largest division is a long irregular belt, stretching from E. to W. across S. Hanover which of course forms its N. and S. boundaries, while on the E. it is bounded by Prussian Saxony and on the W. by Rhenish Prussia, Hanover and Waldeck. To the S. E. of this division lies the third also irregular in shape, traversed by the Harz Mountains, and surrounded by portions of Prussia, Hanover and Anhalt. Of the six smaller divisions, Thedinghausen, Bodenau, Harzen, and Delberg are in Hanover and Kai Vöhring, and a patch of land near the village of Hunsfeld, government of Trever, are in Prussia. The smallest one of all these divisions is comprised in 1134 sq. m. of which nearly one-half is arable land, meadow and gardens, one-third forest, and one-fourth moorland. The surface is for the most part hilly particularly the division which is traversed by the Harz. Brunswick Proper has a considerable extent of level land,

only a few low ridges appearing towards the E. The principal rivers are the Oker, Leine, and Weser, to the basin of which lies all the stream below, with the exception of the Elbe, which falls into the Elbe. The principal mineral products are gold, silver, antimony, lead, zinc, copper, sulphur, vitriol and alum. The mines are, in part worked conjointly with the Hanoverian Government, and in part, independently. The duchy produces also marble, alabaster, limestone, and gypsum, potters clay, asbestos, agate, Jasper, &c. There are within the territory likewise, several saltworks of considerable extent. In the Harz Mountains asphalt and other bituminous substances are found. Game is not very abundant, though red deer, roebucks, hares, rabbits, and a few wild boars, are occasionally to be met with in the forests. Fresh-water fish are rather more plentiful. A chief manufacture is of iron, linen now however much fallen off, and casades dyeing and brewing are also carried on to a considerable extent and oil and saw mills are numerous on the different large streams. The spinning of yarn forms an important branch of industry all over the duchy. The industrial resources of the country are carefully and judiciously cultivated by the Government, which extends its protection and patronage also to its educational institutions. The constitution of the duchy is a united monarchy. The legislature is composed of the Duke an upper chamber consisting of six prelates and the 78 holders of equestrian estates and a lower chamber composed of six prelates, 19 deputies from towns, and as many representatives of the land-holders who do not possess equestrian rights. The legislature must assemble at least once every three years, for which period the taxes are voted. The Duke appoints three ministers of state, and in each of the six circles into which the state is divided there is a provincial board to conduct its municipal and local government. The revenue of the duchy is derived from the fiscal domain from land personal and indirect taxes, from stamps, fees of court, post-office, tolls and a lottery. In 1849 these amounted to £234,800 the expenditure being about the same amount. Public debt (1848) £358,653 of which £258,750 was for railways. The quota of men which the duchy is bound to furnish to the army of the German Confederation, is 2008. The affairs of this little state are conducted with great prudence and judgment, and the consequences have been the securing for the population a degree of comfort and tranquillity not equalled in any other part of Germany. Personal bravery and an open unassuming nature, are the distinguishing characteristics of the Brunswickers. Pop. (1846) 268,943.

BRUNSWICK — 1. A city Germany cap. duchy of same name, and place of residence of the Duke of Brunswick. 25 m. S. E. Hanover lat. 53° 16' 11" N. lon. 10° 51' 29" E. (L.) It is divided into six districts and contains about 100 streets; most of them clean and some of them spacious and imposing though of somewhat antiquated appearance, many of the houses being of wood and from 300 to 400 years old. The city was formerly fortified but the ramparts have been levelled planted with trees and converted into pleasant promenades. The principal public buildings are—the new palace or Schloss, a magnificent structure the ancient cathedral of St. Blasius the mansion-house, with statues of Guelfish princes in front the chapter-house chancery house of legislative assembly must arsenal dual exchequer opera-house townhall trades hall, old Alldorf townhall and a few others. Besides these are the following objects of interest—an ancient bronze lion of Byzantine workmanship brought from Constantinople a Gothic fountain of bronze, dated 1408, situated in the Altes Stadt markt a cast-iron obelisk, 60 ft. high erected by the citizens to the memory of their two Dukes who fell at Jena and Quatre-Bras and a monument and chapel erected to the memory of the patriotic Schill who, with 14 of his companions in arms, was shot here by the French in 1806 for rising against them. The museum possesses an excellent gallery of paintings, comprising many works of the greatest masters, and a good collection of classical antiquities, and works of art. The city contains 10 churches, including the cathedral, none of which the most remarkable are St. Andrew's, one of whose steeples is 218 ft. high St. Catherine's, adorned with paintings by Delacroix, and some magnificent stained glass windows, and the church of St. Martin, in the pointed Gothic style. The educational institutions are the college, a gymnasium, a seminary for

teachers, a college of anatomy and surgery a real school for practical acquirements including mechanics, and commercial and agricultural studies; and several others. Amongst the charitable institutions, which are numerous, are a general

THE WOLF MARKET AND ST. ANDREW'S CHURCH, BRUNSWICK

and lying-in hospital, a deaf and dumb, and orphan asylums. The principal manufactures of the town are of linen, woollen hardware tobacco, chimney Glass, silk, mineral colours, china, paper, maché, leather &c. Three railways now meet in Brunswick. The earliest and shortest, completed in 1839 leads to and terminates in, Harzburg; the second goes E. to Magdeburg and the third N. and N.W. to Hanover. The railways promise to make Brunswick the entrepot of a very extensive trade. Pop. 42,000.—2 A. vii and par Dordrecht, Holstein, near Kiel with which it is connected by a handsome bridge. Pop. 1167.

BRUSA, BRUSA or PRUSA (anc. Prusa ad Olympon) a celebrated city Turkey in Asia, pass Anatolia, 62 m S. by E. Constantinople, beautifully situated on a verdant plain at the foot of Mount Olympon. Including the suburbs, it extends 2 m E. to W. and half a mile N. to S. The appearance of

BRUSA From Tivoli Description de l'Asie Mineure

Brusa, with its domes and minarets the fruitful fields by which it is surrounded diversified by magnificent scenery and delightful solitude, is singularly pleasing and picturesque. It is divided into two quarters the Turkish and

Armenian, by a rapid stream across which there are two stone bridges, each of a single arch. The houses, which are for the most part of wood, occupy the face of a declivity and command a fine view of the plain below. The city is well

supplied with fountains, and streams of water run through most of the streets, which are generally narrow unpaved, and filthily from the accumulations of mud caused by the water which, if properly managed, should cleanse them. Near the centre of the town, on a perpendicular rock, stands the Citadel occupying the site it is supposed, of the Acropolis of ancient Prusa. The walls are of Greek construction, and of great solidity. Within its walls is a mosque, called Doudou Monastery in which is the tomb of Sultan Orkhan, son of Othman who conquered Brusa in 1326. West of this mosque there is a ruined castle, and two castles. The principal ornaments of the city are its mosques, of which there are said to be 365 some of them magnificent especially those of the Sultans Achmet and Osman and the Dolah or great mosque, in the centre of the city. The baths are handsome structures contain a number of apartments, and are well supplied with both hot and cold springs the Kalpateba Hammam, situated

about 1½ m. N.W. of the city is the principal. There is here, also, a circular pool of 25 ft. diameter and 4½ ft. deep paved with marble, and lined with coloured tiles in which swimming is practised. The khans and colleges are numerous and respectable. The bazaars, large buildings with shops and warehouses and the bazars, are filled with silk and cotton stuffs, manufactured for exportation and of which large quantities are produced, especially of silk. Brusa silk being much esteemed both in Europe and the East. It is a silk town, manufactures of this article is said to employ 80,000 persons. In 1849 there were 884,750 lbs. of raw silk produced in the city and neighbourhood. Brusa was long capital of Bithynia, and one of the most flourishing towns in the Greek empire of Constantinople. In 1866 it was taken by Orkhan son of Othman, founder of the Ottoman dynasty and from that epoch it was the residence of the Turkish sovereigns, until the seat of empire was transferred to Adrianople. In 1800 an earth quake injured or destroyed the chief public buildings, including 80 mosques, and a great part of the town and killed 100 people. Pop. about 60,000.
BRUSHFORD two parts 2½ m. par Die on 894 ac. Pop. 172.—2 par Somerset 2769 ac. Pop. 335.

BRUSSELS (Flemish Brussel French Bruxelles) the cap. of Belgium and of prov. S. Brabant, the residence of the King and the seat of Government. It is situated on the small river Senne about 50 m E. of the German Ocean lat. (observatory) 50° 51' N. lon. 4° 21' 00" E. (—) nearly in the centre of the kingdom in an agreeably diversified and fertile locality and erected partly on a hill and partly on flat ground through the latter of which flow the turbid waters of the Senne with a tortuous course, forming four islands in its way. Though the highest ground in the city is only about 240 ft. above the sea level, yet the general aspect of the whole, towards the W. is lofty and imposing. The city is about 3 m. in circum ference, is shaped somewhat like a fat iron, and its walls which are merely intended for fiscal purposes, the fortifications having been destroyed enclose nearly 16,000 houses or other buildings, with about 500 streets, lanes, or alleys the whole being divided, for municipal government, into eight territorial sections. Between the city and the walls, and intermediate of the suburbs, are the broad promenades and drive, replacing former ramparts, called boulevards, there are also in number and shaded with double rows of lime-trees. There are 14 city gates, none of them now-worthy except the antique Porte de Hal a baronial looking barbacan, erected late in the 14th century which long served, in later days, as a prison

The Brussels of early Christian times was little more than a group of huts on a marshy island (île de St. Géry) surrounded by the Senné. During the Middle Ages, it never had the extent or importance of the great cities of the Low Countries, such as Antwerp, Ghent, or Bruges, but, in succeeding times it became, as the political capital of the country nearly as conspicuous as in history. It has still much of the record of other days, when the Flemish monarchs threw the mantle of its grandeur over the palaces of Flemish thrift and even in the commonest quarters or the lower or old town, there are many quaintly ornate buildings, once the mansions of Brabant nobles, but now occupied by very different tenants. In the high town, the buildings are generally modern, built of brick and covered with cement.

Every part of Brussels exhibits a coexistence of twisted streets, with exception of a few of these recently formed mostly near the royal palace. One the Rue Royale, is really handsome. Several irregular areas, called places or squares, when used as markets, are to be found at intervals through the city which, however, is, in general, far too closely built. The only exception is in the extra-mural quarters lately formed, such as the new and regular quarters Leopold and Louise beyond the Boulevard du Regent. Among the chief places, &c. are the Place Royale containing in one of its sides, the church of St. Jacques. Place des Palais, hard by the Place de Grand Sablon with the church of Notre Dame des Victoires. The Grande Place or Grand Marche in front of the Hotel de Ville is a remarkable square forming the finest feature in Brussels at least in a pictorial point of view, and containing besides the beautiful Hotel de Ville, the front of which occupies much of one side the broad or broad-house (called also *Maison du Roi* and several antique and quaint edifices, most of which were the guild houses of corporations of trade during the Middle Ages. In the open space the patriot nobles, Counts Egmont and Horn were beheaded by Alva, in 1568. Place des Martyrs, named in memory of those who fell, on the Belgian side in the Revolution of 1830. Place de la Monnaie so called because the mint, in which money was struck as early as 1291 forms a portion of one side the opposite side being formed by the theatre royal which is also the opera-house. The two chief opera places of recreation in Brussels are the Park and the Allée Verte. The former area 17½ ac. is on the high E. side of the city in the court quarters, and is overlooked, on one side, by the royal palace on another by the prince royal's palace &c. on the third by the legislative palace and on the fourth a rectangle by the edifices of the Rue Royale, Brabant, Dussée, &c. The Allée Verte which is outside the boulevards, and laid along the E. bank of the Wilhelms Canal is a handsome and spacious ride or drive, with rows of fine old elms, and intervening footways, extending nearly 1½ m.

Among the chief public edifices, the Hotel de Ville merits the first mention. It is a fine example of Lombardo-Gothic, erected between 1401 and 1442. The open-work spire, especially in lofty and elegant. Including the tower it is fully 280 ft. high and with the spires of St. Michael and the Dragon a group in copper gilt, almost 420 ft. high. The interior of the townhouse is mostly occupied by plain offices for municipal officials but one rather small saloon quaintly decorated is shown as that where the Emperor Charles V. in October 1555 abdicated in favour of Philip II.

The King's palace is a respectable-looking edifice, separated from the closely contiguous houses near the Place Royale, by a small garden. At right angles with the King's palace is that of the heir-apparent, or palace of Brabant, built for the Prince of Orange, the late King of Holland, as a voluntary gift, by the Belgian people. The owner was driven from it, one year after its completion at the Revolution of 1830 since which time it has remained unoccupied. Opposite to the King's palace, is the palace of the Nation, or of the Belgian legislative chambers—an edifice originally built for the council of Brabant with a Doric facade. Close to the legislative palace are located the ministers of the Belgian home department, of finance, and foreign affairs and, hard by, the Palais du Conseil d'Etat.

The palace of the fine arts, also called the museum, one part of which was founded in 1546, and finished in 1820, and another added in 1768 contains a gallery of paintings (besides as a collection, to the use in Antwerp museum) of sculpture,

and of natural history; with cabinets of curious antiquities, comparative anatomy and gallery of ancient armour. Library of 120,000 volumes, and about 16 000 MSS. the latter forming the Burgundian library.

The museum of industry contiguous to the foregoing, is built on the site of the old botanic garden. One of its main uses is the periodical exhibition of samples of Belgian industry which takes place every four years. Among the permanent collections kept here, are first, a depot of models, and constructive machines second a depot of plans, &c.; third, a technological library. A portion of the establishment is called the college, in which gratuitous lectures on science, history, literature, &c. are given daily during appointed seasons, by state-paid professors.

A little way from the museum, lower down the city at the Place de Sablon, is the palace of justice, where are the head courts of Belgian law offices &c.

Churches.—The church of St. Louis, the cathedral of Brussels, is a large and noble pile of cruciform shape situated

CATHEDRAL OF ST. LOUIS, BRUSSELS.—From Quarry. Architect O. De Maessene.

on a slope, between the corner of the park and the botanic garden formerly called the Meulenbergh or Mill-hill. The central doorway is flanked on either side by a massive square tower each 228 ft. high. These towers are more modern than the general pile, having been added to it in 1618 while the body of the edifice was built between 1226 and 1668. Its architecture is of early pointed Gothic, and the material is mostly brick. The interior has the stamp of simple grandeur and, in the inside of the nave, are attached, on brackets, 14 colossal statues representing Jesus, the Virgin, and the twelve apostles works of Duquesnoy and other good artists. The pulpit is a remarkable piece of wooden sculpture, by Verbrugge. The windows have richly coloured glass, by Fiers and others comprising the likeness of the Emperor Charles V. and several other historical personages.

There are several other Gothic churches in Brussels, of which the most interesting are—the chapel church (*église de la chapelle*) built on a lofty site, and dating from 1140; it contains a fine pulpit, sculptured tombs, and a few good paintings; the church of the Sablon, built in 1388 has an elegant interior with a splendid mosaic in the church of St. Nicholas and the church of St. Catherine, with a fine picture by Croyer. The French, German, and English Protestants, have each their places of worship, and the Jews have a synagogue.

Institutions.—Benevolent, Educational, Literary and Scientific.—Among the benevolent institutions of Brussels are the hospital of St. Peter and several other hospitals and places of refuge, the infirmary philanthropic society &c. The free university of Brussels was founded in 1824. It is a proprietary rather than a state institution, and comprises four faculties—mathematics and physical sciences, belles lettres, law, medi-

one, with a special school of pharmacy attached. There are about 60 professors and assistant teachers in all. The *schools royal* is a secondary institution, founded by the communal administration in 1843. It is under state control, and has 25 professors or teachers. The total number of students and pupils receiving their education, in the superior and middle class colleges and schools of Brussels, is nearly 4000. A school of geography in the Flanders suburb, was founded in 1830, by M. Vander Meulen, for the public benefit. The extensive museum of this establishment is an admirable collection for the elucidation of physical sciences as geology, chemistry, anatomy and natural history in general. In the royal academy of the fine arts, reformed in 1836, gratuitous instruction is given in drawing, painting, sculpture, architecture, and engraving. The Belgian royal academy of sciences, letters, and the fine arts, has its seat in Brussels. It comprises three departments, general sciences, letters, and social and political knowledge and the fine arts. The royal school of medicine, founded in 1841, has also its seat here. Its main duties are, to report to the Government on all that concerns the public health, forensic medical science, and the veterinary art. It publishes its transactions periodically. Elementary education is well provided for in the capital, both by the municipal authorities and the state. There are five large communal primary schools and an extensive model elementary school (*école primaire supérieure*). The clergy too, have a number of the children of the city under primary educational training. The total number of pupils in the authorized primary schools of Brussels, considerably exceed 6000. French is the common medium for instruction in nearly all the foregoing, with the exception of a very few of the lower class schools. Among the societies for the advancement of knowledge, located in Brussels, are the royal society of medical and natural sciences, royal society of horticulture with a botanic garden which is one of the most attractive places of resort about Brussels, royal social society royal council of agriculture including a farming and agricultural school, a royal antiquarian society with a museum which is open to the public. Brussels royal academy of the fine arts with 15 professors of painting, drawing, sculpture, and architecture, who are paid by the state and take no fees. The royal conservatory of music of Brussels has 26 professors of music, vocal and instrumental. There are 19 elementary teachers besides. The observatory in the V. E. quarter of the city is a well furnished and somewhat celebrated establishment.

Government, Health, &c.—The municipal administrative body of Brussels, called the regency is composed of a burgomaster and four aldermen, functionaries named *schepens*, with a communal council of 96 members. Upon most articles introduced for consumption in the city a special impost is levied, besides the tax that some of them may have paid to the state. The chief prison is the *Cuveuse*, so called from being built, in the S.W. quarter of the city on a site formerly occupied by a Carmelite convent. It is a two-storied oblong square pile, with alas courts for air or exercise. At Vilvoorde 6 m. distant N. is the *maison de réclusion*, for convicts. The city is lighted with gas, and well supplied with running water brought in pipes from Etterbeek, and has several public wells within the walls, and a good many fountains for general use, of which may be specially noticed, the Manneken Pis, with its bronze statue. The climate is salubrious, but moist; and the weather proverbially fickle. The winters are more severe than those of London. The sanatoria are all outside of the town.

Manufactures.—The first well-reputed product of Brussels was lace, and some of the finer qualities are made there still. Carriage-making was, for a time, a considerable manufacture, but is on the decline. Printing, type-founding paper and ink-making and all that is useful in the manufacture of books, chiefly reprints of contemporary French works give no small amount of employment. Some printed cottons, velvets, muslins, &c. and light woollen fabrics are made in and near the city. The minor articles of manufacture include china and stone ware, glass of several kinds, hats for both sexes, furniture, ornamental paper, hosiery, tallow and wax candles, oil, tobacco chemicals, colours and varnishes, vinegar, chocolate, glass, brass and iron articles, &c. There are many breweries and distilleries, several sugar and salt refineries, some tanneries and carriage works, several

dyeworks, blancheries and spinneries. A few carpets are made in Brussels, but most of those of Belgium are to be found elsewhere. It gives name, are really the produce of Touraine. Other products are browned wares, ropes and twine brushes, cork, balls, swords cutlery, waxed cloth, ribbons, gold and silver lace, knitted articles, gloves, buttons, combs, wedding writing, ink, chimney powder, playing and other cards, &c. There are foundries of iron and brass, steam-engine factories, rolling mills &c. Among petty articles of luxury formed in Brussels to a considerable extent, may be enumerated as the chief—gold, silver and fancy stone trinketry, trimmings of dresses, &c. Brussels is indeed, the great depot of all useful and tasteful products, in the small thriving kingdom of which it is the centre and there it scarcely any trade or calling needed in a state of advanced civilization, that does not find some who follow it here.

Trade.—Brussels carries on a brisk trade with every other part of Belgium, by means of railways, canals and rivers. The Scheldt is not navigable, but the canals of Wilbroeck or Antwerp and Charleroi serve as water roads. The former begins at Brussels, and terminates at the river Rupa, opposite Boom, the navigation being thus continued to the Scheldt; the latter connects Brussels with the S. side at Marneghem-Sambre and is 46 m. long. Trade is further promoted by the N. and S. railways connecting Brussels with all parts of Belgium with France, and France. The chief offices of the two Belgian state banks are located in the capital. In Brussels are also a chamber of commerce, and a society of commerce the aim of which is to forward trade, industry under state auspices. A *monnaie-publique* was established as early as 1818. The profits arising from the interest on pawn, and their sale when forfeited go to the funds of the hospitals. In a recent year pawns to the value of 2 000 000 francs (280 000) were taken.

Inhabitants.—Few of the best Belgian families reside in the capital, probably on account of the expense of living. The trading class is a sober-living steady and cautious, perhaps rather distrustful race. The working people are an industrious, patient, good tempered race but mostly improvident, and given to constant beer-drinking and frequent holiday-making. The French language is universally spoken in the mixed society of Brussels, and French literature perfectly appreciated by its citizens. Most of the lower classes, who have had any education, also speak it, more or less correctly, but in their intercourse with each other the vernacular Flemish or Walloon, is still common. In the markets however many of the country dealers can speak no French. The horse races which take place in the plain of Louvain every year in July and September when prizes are given by the municipality have incredible attractions for all ranks of the inhabitants of Brussels.

History.—The Emperor Otto dated a decree, *apud Bracelonem*, in 976. But the town was not of consequence enough to be fortified till 1044, when Lambert Baldeus, Count of Louvain and Brussels built a wall, with seven gates, around it. A second wall was constructed in 1360 which included pretty nearly the line of the present town wall. In 1405, lost 1400 of the houses by fire. In 1549 two earthquakes caused it much damage. But it was of small account, till Flanders passed into the hands of princes of the House of Austria when it became in 1507 the usual seat of government for the entire Low Countries. At Brussels the Emperor Charles V. established his vice-royalty and here, in an assembly of the States in 1556, he solemnly divested himself of monarchial power, in favour of his son, Philip II., under whom he retired and passed, from his marriage the Duke of Alva, and from the Inquisition, here set up.

Brussels was taken by the French, in 1701 at the beginning of the Succession War. In 1708 it was taken by the Duke of Marlborough and by the French, under Marshal Saxe, in 1747. The peace of Aix-la-Chapelle, in 1748, gave back Brussels to the Austrians. In 1794, General Dumeret took possession of it for the French republic.

On the extension and re-constitution of the French territory Brussels became the chief town of the department of the Dyle. Napoleon then first moved made his headquarters into Brussels, by the Allee Verte, July 21, 1808. He was rather partial to this city and bought the chateau of Louvain, as a palace for Josephine and under its roof, he signed his fatal

declaration of war against Russia. The Prussians took possession of Brussels February 1 1814 September 11 1814. William of Orange-Nassau was inaugurated at Brussels, as King of the Low Countries. It then became one of the two

capitals of the new kingdom, alternating with the Hague, in Holland, as the residence of the court and the seat of the states (*états généraux*). At length, September 13 1830 burst out at Brussels, the revolution which separated Belgium from Holland and Prince Leopold of Saxa-Coburg, elected King of the Belgians, by the national congress, June 4 1831 made his public entry into Brussels, as the sole capital of his new kingdom. Pop. (1865) 161 41 of whom about a third speak French or Walloon and the rest speak Flemish or Dutch. — *See* *Belgique* *Northern Geographic Journal*, back Murray's *Handbook Private Information*!

BRUSTHEM a vil and com Belgium prov. Limburg 10 m N W Tongres with an old church founded in 1449 and a tower built in 1111. The village is noted for a signal defeat of the League, by Charles the Bold, in 1467. Pop. about 1000

BRUTO a market tn. and par England, co. Somerset. The town is 12½ m. E. by S. Glastonbury agreeably situated at the foot of a steep hill on the Bri or Brn, from which it derives its name, and which is here crossed by a stone bridge. It consists principally of one well-paved and well-kept street houses in general neat looking and respectable; church, an elegant and spacious structure, in the later English style. It has also two chapels and an Independent meeting-house, a free grammar-school, founded in 1519 and an hospital for 14 aged men, 14 aged women, and 16 boys who are also educated and apprenticed. Manufactures, formerly extensive, now confined principally to stockings and machinery. Shilshewing also affords a good deal of employment. Two fairs annually. Dumpers the celebrated navigator was born here. Area of par 3681 ac. Pop. 2106.

BRUX or **BRUX** a royal to Bohemia, circle, Sazitz, 46 m. N W Prague, on the Bita, at the foot of the Fohlsberg. It is walled, and well built, has several churches and convents, a gymnasium, an hospital, a normal school, a school of industry for girls, a townhouse, and a manufactory of cotton stuffs. In the neighbourhood are extensive coal mines, and the

springs of Pulna, strongly impregnated like those of Sedlitz, with Epsum and Giesmer salt, and yielding a better mineral water which is largely exported. The inhabitants trade in corn and fruit. Pop. 8000

BRUTELLE, a tn. France, dep. Vosges, 14 m. N N E Epinal on the Arnette in the midst of the Vosges Mountains. It has manufactures of calicoes and cutlery and a considerable trade in tanned hides, butter cheese, and cattle. Pop. 2276

BRYANSTON or **BLANDFORD-BRYAN** par Eng. Dorset 1512 ac. Pop. 16;

BRZEZAN a tn. Austria, Galicia, cap. circle of same name, gov. of and 47 m S S. Lemberg on the Zlota-Lipa. It has several churches, a castle convent, gymnasium, and extensive tanworks. Pop. 5500 of which 1500 are Jews. — The church area, 1808 geo. sq. m. is somewhat hilly well wooded and watered by the Dniester and its streams. It abounds in game and honey and produces good crops of corn, flax, and hemp. Considerable numbers of horses, and neat cattle, are reared. The circle contains three towns 14 market towns, and 390 villages. Pop. (inclusive of 16,000 Jews) 17,300

BRZE/NTZ, a tn. Bohemia circle, 1 rachin 43 m S S. W Prague on the Wlatowa or Lomnitz. It has a palace and a parish church. Pop. 2000 — Two small places in Moravia have the same name.

BRZEZIN a tn. Poland gov. Moravia, on the Pilica, 61 m S W Warsaw. It has some manufactures of woollen cloth. Pop. 800

BRZEZOW a tn. Austria Galicia circle of and 14 m N W Sanok on the Stelmica. It has an ancient castle a parish church and cloth manufactures. Pop. 2400.

BUA (anc. Bous) a small is. in the Adriatic, Austria Dalmatia, circle, Spalatro and opposite to the town of Tien with which it is connected by a mole or bridge. It is a long straggling island about 10 m long W to E and scarcely 1 m in breadth. Its coast is fringed by bold rocks of limestone and has no proper harbour but two promontories form a bay of a horse-shoe form, in which vessels can ride in safety. Little of its once boasted fertility now remains. The chief products are wheat, olives and almonds. Some asphalt is obtained from a cavern on the N side. During the later period of the Roman empire, many state offenders and heretics were confined here. Pop. 5349 of whom 1380 live in the principal village, called Bua or Santa-Croce.

BUACHE ISLAND *See* GARDEN ISLAND

BUBBENHALL, par Eng. Warwick 1230 ac. P 288

BUBBIO *See* BOMBO

BUBENDORF a par and vil. Switzerland can Basel-Landschaft, on a small tributary of the Elber 10 m S E. Basel in a grassy valley in the midst of magnificent scenery. It contains an ancient church and handsome parsonage. In its vicinity are saline springs, which bear its name and at a short distance to the S, a lofty peak is crowned by the old castle of Widenmatten in which several interesting antiquaries are seen. Pop. 1183

BUBION a tn. Spain, Andalusia, prov. of, and 85 m S E. Granada, on an inclined place with steep, irregular though paved streets two squares, an ancient Gothic church townhall prison, endowed school and several fountains. The inhabitants are principally engaged in agriculture and cattle-rearing. Pop. 2697

BURHILL, a tn. Prussia, prov. Pomerania, gov. of, and 23 m N E. Gollin, in a valley on the Gollin. It contains a parish church, and has some linen and woollen manufactures. A good many of the inhabitants live by fishing and agricultural trade. Pop. 105

BUBWITH par Eng. York, E. Riding 10154 ac. Pop. 1861

BUCCANEER ARCHIPELAGO a group of islands off the N W coast of Australia, between Sunday Strait and Collingwood Bay; lat. 16° S; lon. 123° E.

BUCCARI a seaport in Austria, Croatia, in a bay of the Adriatic, 4 m. E. of Trieste. It is finely situated on the shore between two hills, and is a royal free town with a free harbor. It possesses a strong castle, and a parish church. Pop. 3200.

BUCCINO a tn. Naples, prov. Principato Citra, on the Golfo here crossed by an ancient bridge of early Roman construction, 14 m. E. by S. Campagna. It is surrounded by walls, and defended by a strong castle, and contains five parish churches and several convents. In the neighbourhood fine marble is quarried. Pop. 4700.

BUCELLAS, a vil. Portugal, prov. Estremadura, 15 m. N. Lisbon on the Francisco, in a district that produces wine of good quality known by the name of Bucellas.

BUCHAN a dist. Scotland a division of one Aberdeen and Banff, stretching along the E. coast, and forming the most E. land of the kingdom. Its limits are not certainly defined the mouths of the Deveron and the Don having been assigned as its boundaries—the one on the N. and the other on the S. More recent opinion has fixed on the river Ythan as its S. limit. The whole district was at one time the property of the Cumine Earls of Buchan, and is one of the oldest earldoms in Scotland. On Robert Bruce ascending the throne of Scotland, he deposed the Cumine, his most implacable enemies, of their property and divided it amongst his friends. The Earls of Buchan have long ceased to have any property in the district. Cap. Peterhead.

BUCHANAN par. Scot. Striving length, 20 m. breadth 6 m. Pop. 632.

BUCHANEN a promontory or headland Scotland east of Buchan co. Aberdeen S. side of the Bay of Peterhead lat. 57° 3' N. lon. 1° 45' E. the most P. point of the main land of Great Britain. A light-house was erected here in 1824 height, 118 ft. built of granite. It exhibits a flashing light, visible at a distance of 15 or 18 m. when the atmosphere is clear.

BUCHAR'AT BUKHARAT or BUKHARIST [the city of enjoyment Latin, Buxarista] a city cap. of Wallachia, in a spacious plain, in which is neither tree nor stone. L. bank, Dumbavitsa, which is crossed by a bridge. Lat. (metropolitan church) 44° 25' 29" N. lon. 26° 23' 23" E. S. It is frequently built, the houses generally miserable mud walls and the streets mostly unpaved. Where it is otherwise, they are merely boarded over or laid with logs which half float in the liquid mud beneath. Mingled with it is wretchedness and present it a strange appearance by contrast are a number of hand

A STREET IN BUCAR'AT.—After H. Durnham.

some houses, hotels, and churches—a population in rags and nobles tricked out in sparkling dresses and gaudy finery with a curious and striking intermixture of Eastern and European dresses, which is to be seen in fullest effect on the cows or public walk, the great resort of the fashionable of the place. The town contains a palace, the residence of the hospodar or prince a large old building the metropolitan church both situated in a spacious square in the centre of the town 60 churches, each having from three to six steeples or towers.

Vol. I.

a bazaar several hospitals and infirmaries 30 monasteries and convents, and about 80 kilns or Oriental stoves. From the centre of the town runs a tower 50 ft. in height, called the Fire Tower from which a complete view of the city is commanded. The consular residences of which there are several are also handsome buildings especially that of the Austrian consul. The educational and literary institutions consist of a college having 500 students a gymnasium conducted by 12 professors and a number of public schools, four of which afford instruction gratis a public library a society for belles lettres and another for agriculture.

There are no extensive manufactures in the town, but it contains a great many artisans, particularly goldsmiths, jewelers, and watchmakers. Small quantities of woollen cloth carpets brasses &c. are made. Being situated in a fertile country its trade, particularly in agricultural produce, is very considerable exporting yearly large quantities of grain wool butter honey wax, and tallow together with large herds of tamed cattle and hogs, which are sent chiefly to Germany whence are imported in return many of the necessities and luxuries of life. Buchar'at has the unenviable reputation of being one of the most dissolute cities in Europe. It is filled with gambling-houses, and other resorts of vice and depravity. Of late years however it has improved in civilization and an earnest and anxious desire for the diffusion of knowledge and education has begun to prevail. It is the seat of the Wallachian Government, and the place of residence of a (tsar) archbishop. In 1812, a treaty of peace was concluded here between Russia and Turkey by which the latter yielded up to the former Bessarabia, and a portion of Moldavia, the river Pruth becoming, the boundary between the two empires. In 1847 Buchar'at suffered severely from fire which destroyed about a fourth part of the town, including the church and some of the Government and the palace of the Catholic bishop. Pop. 60,000.

BUCHARIA (BUKHARA) a name for BUKHARA which see. —BUKHARIA (BUKHARA) a name for a district of India, now included in TRIJAN-GHAR NAXAL; which see.

BUCHAU a tn. Württemberg circle, Donau 9 m. N.E. Riedlingen, S. side of Lake Feder of which, at one time, it formed an island. It has in a marshy position has a fine church a synagogue, and a castle. Pop. 1958 of whom 938 are Jews.

BUCHEN a tn. Baden circle Lower Rhine on the Moselle and on the highroad between and almost equally distant from Heidelberg and Würzburg. It stands 1120 ft. above the level of the sea, and has a castle (church) built in 1498, numerous mills, several breweries and large stone quarries. The inhabitants live chiefly by agriculture and wool. Pop. 2400.

BUCHU (BUCHU) (a name of numerous places in Germany. The most important is in Saxony circle, Zwickau dist. of 6 m. S.E. Grunbach. Great part of the inhabitants are employed in mining. Pop. 2791.

BUCHLOWITZ a market tn. Austria, Moravia, circle Brunn, at the foot of a mountain chain 26 m. W.S.W. Olmütz. It contains a castle belonging to the lords of Buthen, a parish church, townhouse and hospital and has four fairs and cattle-markets. In its neighbourhood there is a sulphur bath. Pop. 1820.

BUCHUWITZ a vil. and borough of barony Scotland on the coast, and 18 m. W. Stirling on the road to Dumfries. It has a chapel associated with the Lethbridge family. Free byerinn church, and five annual fairs. Pop. 381.

BUCHNE, a tn. and com. Tuscan prov. of and 14 m. W. Arezzo, in a valley on a affluent of the Arno. It is tolerably well built having a spacious square, and a church and is overlooked by a castle. Agriculture and cattle-rearing are the chief employments. Pop. 6595.

BUCKBY (LOWE) par. Eng. Northampton 3000 ac. Pop. 2341.

BUCKDE par. Eng. Huntingdon; 8590 ac. Pop. 1172. **BUCKFELD** a tn. W. Germany cap. of the principality of Lippe-Schaumburg on the Aue, and at the foot of the Harzberg 6 m. E.S.E. Minden, in Westphalia. It is a walled town with five gates, and is well built having handsome houses and spacious streets with a palace in which the prince resides three churches, and a synagogue a gymnasium, a library a normal school, and an orphan hospital. Pop. 2250.

86

BUCKENHAM (New) a small tn. and par. England co. Norfolk. The town is situated on a plain, 16 m. S.W. Norwich, and consists chiefly of two principal streets. Some of the houses are well built, but most of them indifferently. The better description are brick, the others clay lamp. Supply of water ample. The town has been recently thoroughly under-drained, and the streets repaired and put in good order. The principal houses are of the perpendicular style. The other places of worship are three meeting-houses, belonging respectively to the Wesleyans, Baptists, and Free-Methodists. There are several schools and minor charities including some almshouses. Area of par. 534 ac. Pop. 700. Two miles from N. W. in Kentham, is the parish of Old Buckenham, area, 420¹/₂ ac. Pop. 141.

BUCKENHAM two par. Eng. Norfolk. — 1. 931 ac. Pop. 50. — 2. Buckenham (Little) 931 ac. Pop. 54.

BUCKFASTLUND par. Eng. Devon 1559 ac. Pop. 348. Devon 3 m. S.W. Ashburton. The town is partly in a valley and partly on a hill or bank. It consists of five streets, somewhat tortuous, and not very well kept. Houses strongly built of mull and slate-roofed. Places of worship one church a Wesleyan chapel, and an Independent chapel. The church is a handsome building, in the Anglo-Norman style, with a lofty tower and a fine, and elegant stained glass windows. The schools are a British national and several juvenile schools. The manufactures are woollen, leather, malt, and paper. The wool trade employs generally from 1200 to 1400 hands. A considerable trade in blankets, blanketing serge, and woollen, both is also carried on. Area of par. 538 ac. Pop. 417. — 1. and 2. par. Eng.

BUCKHAYN a fishing, wh. Scotland co. Fife, 10 m. S.W. Cupar. It consists of an assemblage of mean-looking cottages, scattered without order or arrangement on the face of a steep ascent rising from the shore, without attempt at the formation of streets, or regularity or system of any kind. It is, however, lighted with gas, and well supplied with water. The inhabitants are a peculiar race of people, believed to be the descendants of the crew of a British vessel wrecked on the coast in the reign of James V. They were long reckoned the most ignorant and most uneducated class of persons in Scotland, and were, on this account, made the subject of many humorous effusions both in prose and verse but they are now much improved, and not worse, in any respect, than other similar communities. They are an industrious hard working class of men and with exception of a few weavers are all employed in sea fishing. There are upwards of 100 fishing boats of various dimensions, belonging to the village, manned by from 12 to eight men each. The value of which, with their nets, has been estimated at about £20,000. About a quarter of a mile from the village is a Free Presbyterian church. 1. 1 (1850) estimated at 2000. — (Local Correspondent).

BUCKHORN WESTON par. Eng. Dorset 163 ac. Pop. 444.

BUCKLE a considerable fishing wh. Scotland co. of and 18 m. W. Banff at the mouth of the Burn of Buckle between Speyburn and Cullen Bay 6 m. E. the former. It has been a fishing station for many centuries, and has a tolerable harbour. About 145 boats, large and small, are employed in the various fisheries. A small manufactory of ropes is carried on here. In the village there is a chapel connected with the Establishment, a Free church, an Episcopal chapel and a Catholic chapel. Buckle is famed for the curing of haddock. 1. 3789.

BUCKINGHAM or **BUCKEN**, an island co. England bounded N. and N.W. by co. Northampton; N.E. and E. by co. Bedford and Hertford; S.E. by Middlesex; S.W. by co. Berks; and W. by Oxford. Its length N. to S. is about 8 m. greatest breadth E. to W. 2 m. Area, 478,520 ac. (which 440,000 are supposed to be arable). The vale of Aylesbury stretching through the centre of the county and celebrated for its fertility furnishes rich pasturage for vast numbers of cattle and sheep. The soil in this part of the county is a strong clay loam varying in depth from 2 ft. of rich staple to soil a few inches incumbent on stiff clay. But though well adapted for grazing, it is not considered suitable for tillage, and the persons therefore, under the plough, is very small. In this district the tenures are principally from year to year—a system which, notwithstanding its various

disadvantages, is looked upon with considerable favour by most of the tenants. The average rent of land in the vale is from 25s. to 35s. an acre, the farms averaging from 300 to 600 acres.

Agriculture is altogether in a very backward state in this county chiefly owing to the reluctance of the landlords to be at any expense in effecting improvements. The order of cropping is not very definite, but generally consists of wheat or barley, three crops and a fallow which begins with bare fallow then wheat, then beans, peas and clover and last, wheat or barley. In working the land, two different descriptions of ploughs are used—one an old-fashioned wooden plough for winter and the other a more modern iron-wheel plough, for summer. The depth of furrow turned up is from 4½ to 6 inches. In winter there are seldom fewer than four horses in a plough. The quantity of stock kept on these arable farms is quite inconsiderable. The average rent of arable land is about 80s. an acre. The farms accommodate generally as to dwellings and out houses, for in the worst timber and ditched, with little regard to form or situation. Drainage, too, is much neglected. The labourers employed on grazing farms are from 10 to 14 on farms of from 800 to 400 acres wages, from 9s. to 10s. a week. In the B. parts are rich dairy farms. The stock of dairy cows, as estimated a few years ago, was about 27,000 of which upwards of 21,000 are always productive. Between 4,000,000 and 5,000,000 lbs. or about 1900 tons of butter are annually made in this county the greater part of which is sent by contract to London. It is made up into lumps of two lbs. each and packed into paper baskets called flats. Only a few cream cheeses, in summer are made for the Buckingham Aylesbury and Wycombe markets. Hops and docks are reared in great numbers the former more especially on the dairy farms, where they are fed on skim and butter milk. The fattening of cattle is almost wholly confined to the vale of Aylesbury.

The manufactures of Buckinghamshire are chiefly of thread lace, which furnishes employment to a great number of females and children in paper and straw mills. The former however has much declined since the rise of the machine lace manufactures of Nottingham. The mineral productions of this county are of no great importance. The county is watered by the Ouse the Thame, and the Thames and is intersected by the Grand Junction Canal and the London and North Western Railway and by some branches of both. It is divided into eight hundred and 20 parishes, and returns three members to the House of Commons constituency (1850) 5733. It gives the title of Earl to the family of Hloberth Hampden. Pop. 167,725.

BUCKINGHAM a market in par. bur. and par. England. The town sits at the foot of its own name, is 50 m. N.W. London on the Bletchley and Buckingham branch of the London and North-western Railway pleasantly situated on a peninsula formed by the Ouse, which almost encloses the town and is here crossed by three stone bridges. The houses are mostly of brick the streets straggling and irregular paved and lighted with gas. The town and jail are large and common-sense buildings. The church, erected in 1781 is a specious structure, with a square tower surmounted by an elegant spire and there are hidden places of worship for Independent, Wesleyans and of the Society of Friends and a free granary school founded by Edward VI. and several almshouses. The manufacture of lace formerly carried on here to some extent, of late years has greatly declined. Spinning and tanning are carried on to a considerable extent and a good deal of business is done in wool and hops. In the vicinity are several Honesstone quarries, and some of marble. The borough returns two members to the House of Commons—a privilege which it has enjoyed since the time of Henry VIII. Its municipal government was vested in a mayor and 12 councillors, and 12 councillors. A weekly market on Saturday and one on Monday extends only for calves numerous fairs, chiefly for horses, cattle, and sheep. Buckingham gives the title of Duke to the family of Temple. Area of par. 4777 ac. Pop. 4020.

BUCKINGHAM, a co. Van Diemen's Land bounded N. by the river Huon from its source near the Franklin range to its mouth in D'Entrecasteaux Channel. Principal towns, Hobart Town.

BUCKWORTH par Eng. Huntingdon 1840 ac. P. 191.

BUDACZ, or Buzsacz: a t. m. Austria, Gallicia, north of and 85 m. N. W. Kaliszegyr, traversed by the Herat. It contains a parish church, Jesu convent and a gymnasium. Pop. of which 700 are Jews 3200.

BUDA (Sclavonian, *Budin* German, *Ofen*) a free city Hungary, on Pesth, with the city of which name its connection across the Danube, formerly maintained by a bridge of boats 490 yards long, as now perfected by one of the most magnificent suspension bridges in Europe 153 m. E. S. E. Vienna, lat. (see observatory) 47° 20' 10" N. lon. 16° 5' 2" E. (c.) It is the residence of the emperor or palatine, and the seat of government, and metropolis of Hungary. It is built in the form of an amphitheatre on the Schlossberg, the central part being included in the fortress (Festung) or upper town surrounded by walls and bastions. It has five suburbs, Wasserstadt, Landsstraßen, Neustadt, Tabak or Heizenstadt and Christenstadt. The

the church of St. Anne's, and the church of the Capuchins. In the Neustadt stands a column dedicated to the Holy Trinity a memento of the plague of 1710, 80 ft. high and in the Heizenstadt are a Catholic church, a Greek church and the mansion of the Greek bishop. The town contains in all 13 churches and a synagogue. There are also an archiepiscopal seminary, four monasteries, two high-schools and many other schools, including one of design. Subjects of natural history a theatre, and public libraries. On the Schlossberg, an adjoining hill to the S. stands the new observatory (700 ft. above the level of the Danube) supplied with the best instruments and apparatus. Buda has numerous charitable institutions, hospitals, infirmaries asylums for orphans, for a leprosy and houses of refuge for sailors, manufacturers of silks, velvets, flannels, woollens, leather, talcose, earthenware, a cannon-foundry and some apparatus works but it is by no means a manufacturing town, its chief trade being in the fine red wines, produced in the adjacent country to the amount, a favourable season, of four and a half million gallons yearly. There are here some celebrated hot sulphurous springs (see penultima 118) used as baths successively by the Hungarians, Turks, and Croatians. Of these, three Turkish had a ruinous and are much used by the common people.

Buda is supposed to be named from Buda, a brother of Attila, who resided in it occasionally and greatly improved it. O Buda or Alt Ofen a little further up the river is the *Szemlér* of the Romans, and though not at any part in actual contact with the modern Buda is undoubtedly its embryo, having been a Roman station of some importance in the early part of the 4th century. Many Roman antiquities still exist within it and though not equal to Buda, it contains several fine Roman buildings, and a considerable population. After many vicissitudes, Buda was taken in 1441 by the Turks under Hattai the Magnificent, who introduced a partition into it of 13 000 Janissaries, and reduced a great part of it to the kingdom to the state of a Turkish province. It continued to be the seat of a Pasha until 1786 when it was re-taken by the Austrians, under the Duke of Lorraine and the marriage of Baden. Hither in 1784, Joseph II. transferred the seat of government. The greatest moral improvement which both Buda and Pesth have received, is a suspension bridge completed in 1849 at an expense of 2550 000. Before the bridge was opened to the public, its stability was cruelly and most severely tested by the passage of the whole force of the Hungarians and Imperialists over it, the former fully paraded by the latter. For nearly two days the whole platform of the bridge was one dense mass of moving soldiers. P. 10.

(1816) exclusive of military 40,000.

BUDHAWAKE, par Eng. Warwick 3216 ac. Pop. 405.

BUDFABAD a strong Ghilji fort, Afghanistan, prov. Jughlani lat 34° 44' N lon. 70° 14' E. It is a square of 240 ft. each side and the walls which are 25 ft. high are protected by a deep ditch. In this fort the 63 British captives, who had been spared from the massacre on the 1st of September, were kept for a short time imprisoned.

BUDDU a t. (Uince, r. bank Niger 37 m. N. W. the junction of the Tchadda, and supposed to be chief town of the native state of Kakaunda. The huts are circular built of clay and over the summit of the cone of grass which forms the roof is placed an inverted black polished earthen pot, about 1 foot in diameter and 2 ft. deep, intended to prevent the huts from being struck by lightning. The people seem idle, and their canoes are inferior. The men generally have their heads shaved, leaving two or three circular patches of hair and the women arrange their hair in small plaits hanging round the ears, and some have the head entirely shaved. A man may have as many wives as he can keep. In the dry season, small-pox, fever, bowel complaint and sore eyes, are prevalent. Pop. 3000 or 4000.—(Allen's Niger Expedition.)

BUDA at noon from Pesth, showing the new suspension bridge.

fortress is regularly planned and laid out, with numerous handsome edifices and squares among other palaces is that of the Viceroy. The other buildings of note in this quarter are the parish church, garrison church, arsenal, townhall, house of assembly for the estates, government-offices, and residences of the public servants of the crown, civil and military; the university press, and type-foundry. In the Wasserstadt are

are inferior. The men generally have their heads shaved, leaving two or three circular patches of hair and the women arrange their hair in small plaits hanging round the ears, and some have the head entirely shaved. [bitter lake], about 80 m. long and 18 broad from which that city drew its annual supplies of salt, before the port was thrown open to foreigners.

The climate of the province is generally healthful being in the S. parts similar to that which prevails in Europe, above lat. 50° N. In the N. districts it is warmer the thermometer in summer rising to about 90°. Both regions have sufficient rain for vegetation. The N. winds are unpleasant, resembling the *sirocco* of Italy and those from the S.W. sometimes extremely violent, and accompanied by thunder and lightning. The extremes of heat and cold are considerable and the change of temperature often sudden and violent.

Cattle and agricultural produce form the chief sources of wealth. Hides, horns, hair tallow, milk, beef, poultry and wool, are the principal exports. Ballocks and horses are the main articles of trade in the country constituting its legal tender. The former are worth from 20s to 40s according to age while horses, Rs. or 12s. and if broken to the saddle, 40s or 60s. For commercial statistics, see following article on the city of RUSSO ATRIA see also I KATA (L.A.) REFUSION OF PRO, about 200 000

BUENOS AYRES [good air] cap. of the above prov. and seat of the general government of the republic. Lat. 34 86 29' S. lon 58 23 34' W S.W. shore of the estuary of the river La Plata, which is here about 30 m in breadth and at the distance of about 150 m from the point where the latter joins the sea. The city stands on a slightly elevated ridge, running parallel with the river and is built with great regularity and neatness, but is somewhat monotonous. The streets intersect each other at right angles at

1. Cathedral.
2. University.
3. Fort.
4. Plaza del V. Juan.

over 150 yards and form numerous squares of considerable extent, but of little architectural beauty. They are also very broad, spacious, and now pretty well paved but were formerly all but impassable with mud in wet weather and with dust in dry. The granite with which the streets are paved is obtained from some islands to the river above the town. The houses—many of which are built, the older of mud-dried the more modern of burnt brick—have been greatly improved of late years. Almost every house has a garden before, and another behind and many in the balconies. The balconies are usually covered with flowering flowers. The windows of the houses are opening toward the street, generally two in number are often without shutters having instead an iron grating called raja, which gives rather a gloomy and prison-like appearance. The floors are generally paved with brick the use of wood in their construction being avoided as much as possible. The principal square is the Plaza de La Plaza, and is surrounded by handsome buildings, including the palace of the Viceroy the town hall and the cathedral a structure with a cupola and portico of good workmanship. The other public buildings are the house of St. Francis and St. John, and situated on the skirts of the city are the great apartment buildings for the use of the Canadian Indians. The convent of Mercy and several others of monks and nuns, and in the town, one for men and one for women.

women; an orphan hospital, a fraternal hospital, and a college possessing a library of 80 000 volumes. Connected with the college are a school of education, a business school, a normal school, a mathematical school, a public school and a school for painting and drawing. Several other literary and scientific institutions have been established since the Revolution, including a society for the promotion of natural philosophy or mathematics, two academies (one of medicine, the other of jurisprudence), a normal school, and an association for the promotion of agriculture. The town is but indifferently supplied with fresh water during being no public conduits and the wells, though numerous, being all brackish. The only supply is from a fountain some miles off at sunset about ten loads are mounted on bullock carts, and sold at a high price. It is at first hot and undrinkable but after being allowed to settle for 24 hours, it becomes very excellent. Most of the wealthier families have large deep tanks in which the rain that falls on the flat roof of the houses is collected. The environs of the city for a distance of 8 or 10 m. are very beautiful consisting of a well-cultivated country interspersed with gardens and groves, and cultivated by numerous country residents, called *campesinos*, every person in constant attendance having his country seat, and consequently the whole garden attached. The trade and consequently the prosperity of Buenos Ayres is much impeded by the difficulties of the navigation of the La Plata, and the want of a safe and commodious harbour. Large vessels, drawing 16 or 17 ft. water cannot approach nearer than from 8 to 10 m. and even the lighters employed to unload them are often swamped in crossing the bar between the outer and inner reefs. The surf on the beach is also very heavy when it blows from the south-east. Another danger arises from the pumps thrown up from the Andes with tremendous fury. The vessels underdug and skinned, in the following years, were —

The majority of the inhabitants of Buenos Ayres, who are said to be observant and intelligent are the descendants of

Spaniards, who have settled in the country during the last three centuries. The climate is said to be healthy but variable, the temperature rising as high as 90° in the shade, and sinking as low as 35° 40° and subject to sudden and violent changes. Deaths in the city estimated at 1 in 32, and in the country at 1 in 40. The town was founded in 1580 by Don Juan de Garay and in 1760 was made the seat of a vice-royalty and in 1768 the port was thrown partially open by the Spaniards, from which time the city increased rapidly. Pop. about 80,000. The population of which probably one-fifth are foreigners, chiefly English and French.—[See W. Farish's *Des de Ayres, des Nephthes, Amfianenne, Striches, prout, n'eluy, ener!* *seconde Helt Part Papers* (add *See Surr*)]

BUFFALO river, Iowa, &c.—1 A river S. Africa, British Kaffra, formed by the junction of several streams, and so called from a point about 4 m. below or S.E. of Cape Williams Town lat. 33° 55' S. lon. 37° 50' E. and which after a course of about 25 m., falls into the Indian Ocean at lat. 33° 27' S. lon. 37° 45' E.—2 A river S. Africa, Cape D. D. river, falls into the Atlantic, 18 m. N. Cape Town.—3 A river in the same dis., 50 m. N. E. Cape Town.—4 A river Cape Colony dist. Graft Reynes, has its source in the Snow M. streams of that territory about lat. 32° 2' S. lon. 24° 1' E. and after a course of about 60 m. first W. and latterly S. and S.E. falls into the ocean. In lat. 32° 28' lon. 23° 25' E.—5 A river Texas, dist. Harrisburg, formed by several streams W. and S.W. Houston formerly the cap. of Texas, and to which town it is navigable by steamers from the Bay of San Jacinto, communicating with the Gulf of Mexico.—6 A small lake U. States, N. W. territory lat. 43° 45' N. lon. 99° 10' W.—7 A lake Sioux territory, U. States, in lat. 45° 40' 45' N. lon. 96° 30' W. about 28 m. in length, and 5 in breadth. In high floods, boats can pass from this lake to Big Mound Lake, situated a little S.E.—8 A lake, British N. America, lat. Saskatchewan lat. 51° 4' N. lon. 113° W. about 20 m. in length, and 10 m. breadth.—9 A lake British N. America, dist. English River lat. 55° 40' N. lon. 108° W. about 30 m. in length broadest part, 20 m. it is connected by small rivers with several other lakes.—10 A lake, British N. America about 100 m. E. Great Bear Lake in the territory of the Copper Indians lat. (centre) 67° 10' N. lon. 111° W. length, 21 m. breadth 20 m.

BUFFALO islands, Cape rocks &c.—1 An ill off E. coast Cochinchina lat. 14° 11' N. lon. 109° 16' E. (n.) a steep convex rock moderately elevated.—2 Two or three small islets, called also the Caravans, Mindoro Sea centre of the Philippine group a little N. W. of Point 1 of N. W. extremity of St. Francis about lat. 11° 53' N. lon. 121° 50' P.—3 A point or cape, W. coast of Sumatra lat. 3° 55' S. about 14 m. S. of the W. point of Pulo or Pulo Bay. Coast here generally bold, with high mountains inland.—4 A group of detached rugged rocks, Bay of Bengal off W. coast Barmah 20 m. N. Cape Negrais lat. 16° 18' 23' 25' N. lon. 94° 12' E. They extend nearly N. and S. 33 m. and are about 3 m. from the shore.—5 A small ill off E. coast China (Fujian Archipelago) lat. 29° 42' N. lon. 121° 10' E. Its E. shore is rocky; on its W. side are several islets, one nearly separating the island in two parts. It rises into 120 peaks, one 500 ft. high. Fresh provisions and some tame water may be obtained here. It is called Buffalo's nose from a large perforation near its N. end.

BUFFALO a city and port of entry U. States, state and 470 m. N. W. New York, at E. end of Lake Erie, near the commencement of the Niagara River on Buffalo Creek which forms the harbour and has 12 to 14 ft. of depth a mile from its entrance into the lake. It is regularly and handsomely built, has three squares, a court house, townhall, jail, communications market-house, and about 40 churches, of which the Catholic cathedral is one of the finest edifices of the kind in the U. States; a university medical college and two hospitals numerous schools and benevolent institutions; also manufacturers of boilers engines, cars, &c. grinding mills and extensive ship-building yards in which, in 1863, there were built 3 steamers, 1 propellers, and 7 schooners—aggregate burden 16,394 tons. Including commerce there arrived at Buffalo, in 1858 4106 vessels ton 1,632,074 and departed 4152 vessels, ton 1,629,901. Chief articles exported in same year were—wheat 493,837 bush; wheat, 5,424,043 bushels lumber 8,234,788 ft. larch, 23 025 64, the D. P. railway

and the Erie Canal there is communication with all parts of the Union. Buffalo was laid out by the Holland Company in 1801 and became a military post in 1812. It was incorporated as a city in 1833. Pop. (1856) 80,000. [add *See Hurr*]

BUG or **BOO** two rivers, Russia.—1 A tributary to the Vistula, falling into it on its E. bank at Modlin in Poland; it rises near the village of Harbours, in Galicia (Austria) and proceeding N. along the E. frontiers of Volhynia and Grodno which it separates from the kingdom of Poland, reaches Russia 17 m. above, on its E. bank; it receives the Pene, its most important affluent. 2 Hence entering the kingdom of Poland first, it proceeds N. W. to Nar where it reaches the Narewka. From this point it flows almost due W. and shortly after receiving the Narew falls into the Vistula, near Modlin, about 20 m. N. N. W. Warsaw. It has a course of 434 m., and is navigable for nearly 300.—2 (June, *Hypocrite*) A river which rises near the confines of Volhynia, in the N. W. of gov. Podolsk and proceeds first E. and then N. E. through that gov. to Olvynsk, where it enters gov. Kherson, whither it runs almost centrally from N. to S. and falls into the estuary of the Dnieper, near Kherson. Its chief affluents are the Ingul, Balta, Telental, and Bolshaya. 3 In chief towns on its banks, besides those mentioned, are Bratslav, Voznesensk and Nikolayev. It has a course of about 400 m. but its navigation is greatly obstructed by rocks and sandbanks.

BUGBROOK par. Eng. Northampton 2420 ac. P. 860
BUGENIKOFF a vil. and com. Belgium, prov. E. Flanders and 4 m. E. Tournai, on the railway between that place and Moulins, with breweries, vineyards, a paper mill, and a saw, a hut, and a corn mill. P. 3761

BUGIA or **BOUTAN** *See* **BOUTAN**

BUGI a people, Indian Archipelago, chiefly inhabiting Macassar and Bona in Mol. Celebes. They are muscular middle-sized, and of a light brown colour, some being even fair. Their dress consists of a piece of red or blue striped cotton which they wrap about their loins, and pass between their legs. They bind their jet black hair very carefully in a red or blue cotton handkerchief. They pluck out the hair of their heads, and examine their arms and legs with bones wire above the wrists and ankles, and to these the children attach lumps. They are, to the last degree, sanguinary, revengeful crafty and treacherous and it is rarely that they see an enemy without contravening him, and depriving him of his life. On the other hand, under good treatment, they have often been found even as slaves, faithful and obedient. Their weapons are the crescent and the assegai a club of the hardest wood, 8 ft. long. The original country of the Bugis of Bona who are the most enterprising navigators of the Indian Islands, is the banks of the great fresh-water lake Teyen-Karab, in the W. part of the S. W. peninsula of Celebes, and communicating by rivers navigable for the largest native craft, both with the Bay of Boni on the E. and with the sea on the W. The voyage from the shores of the lake begins with the E. monsoon the trading as they proceed W. until they reach Illo, or even Malacca and Achen, where they are prepared to return with the change of the monsoon. They take with them native cotton cloths, gold-dust, nutmegs, Spanish dollars, bird's nests, camphor, benzoin or frankincense and tortoise-shell and return with European broadcloths and opium, pepper, nutmegs, iron, and tobacco, which they partly sell at the intermediate ports as they sail homeward. This is their most important voyage, but they make many subordinate ones for collecting birds nests, fishwives, tortoise-shell, trepan, &c.

BIGTHORPE, par. Eng. York E. Riding 1890 ac. Pop. 364.

BUGUE (L.) a in France, dep. Dordogne, 23 m. S. E. Périgueux, r. bank. Vendre, near its confluence with the Dordogne, it has blast-furnaces, valuable ironworks, manu- factures of nut-oil, sargol, bonfires, and various goods and is the entrepot for the wine and produce of the banks of the Vendre, which are shipped here for Bordeaux. In the vicinity is the extensive grange of Mirmeat. Pop. 1240

BUGULMA or **BOUTOUSSA**, a in Russia gov. Orenburg, cap. dist. and on a small river of same name, 180 m. N. W. S. W. Oufa. It is well and regularly built, and contains two churches. Its trade, which is extensive, is chiefly in cotton and woollen goods, and it has two important annual fairs. Pop. 4700.

BUHL a tn Baden circle Middle Rhine, on the Rhine, and on the railway from Carlsruhe to Freiburg, 20 m. N. E. Strasbourg, with a considerable stocking factory, and dyeworks both of blue and Turkey red. The weekly market of Buhl is important. At Buebach about 8 m. from Buhl is an obelisk of granite, marking the spot where the celebrated Marshal Turenne was killed. Pop. 2800. — Numerous places in Germany have the name of Buhl.

BUIDWAES par Eng. Salop; 1178 ac. Pop. 500
BUILATH or **LE-VAIVAYS** village in a tn and par S. Wales, co. Brecon. The town is 12 m. S. W. New Eborac, delightfully situated on the Wye, here crossed by a bridge of six arches. It consists of two parallel streets, and a few lanes, forming irregular terraces on the side of a declivity and has a parish church and chapels for Baptists Independents and Calvinists and Wesleyan Methodists several schools, and the remains of an ancient castle. Weekly market on Monday four cattle-fairs are held annually. — In the PARK are several mineral springs, which are a source of great attraction to visitors. Llanfyllen, the last of the native sovereigns of Wales, was slain in the neighbourhood, in an engagement with the English in 1282. Area 712 ac. P. 1108.
BUIRONFOSSE a vil. France, dep. Aisne 9 m. N. N. W. Verme. and the centre of a considerable manufacture of boots. Pop. 1465

BUIB (Lx) [box tree] a tn. France, dep. Drome, 48 m. R.S.L. Valence, on the Drone. It is mainly built, but has some fine promenade, and public market-places, planted with a double row of trees, silk mills, oil works and tanneries, with trade in wool cloth, and silk. In the vicinity the box tree grows in great quantity. Pop. 1978

BUILENPOST a vil. Holland prov. Friesland d. f. E. by N. Leeuwarden. It is a pleasant looking village has a Calvinist church, and a school and its inhabitants subsist chiefly by agriculture and cattle-rearing. Pop. 800.

BUITFAZORG a prov. dist. in the tal. Java. The province or *maumbar* is bounded, N. by that of Batavia, E. by Kraton S. by the Province Regencies, and W. by Mandan and forest, on a prolong of 747 sq. m. with 900 villages, and 470 hamlets. It is a mountainous, of which the high old peaks, Sukat and Pangurango are 8000 ft. above the sea. To its innumerable streams many canals have been added for the increased irrigation of the soil. The climate is mild and the higher grounds much resorted to by European invalids. The tiger and rhinoceros abound in the R. and W. The useful products are horses buffaloes, and oxen. Rice coffee sugar edible birds nests hide potatoes and green vegetables for Batavia. The great Java highway crosses the residency N. to S. — The province still called by the natives *Ngopo*, which was changed into Buitumbar by blr T. S. Raffles after the name of a country house first erected by General Van Imhoff and enlarged by Mariscal Desmoules is proved by numerous ancient remains, to have been in a highly prosperous condition previous to the civil wars which convulsed that part of Java at the first introduction of Mahomedanism. These made it a wilderness in the strictest sense of the word. Its temples and useful constructions were left in ruins, and trees wild boars, and other dangerous animals so multiplied that prayers were put up at Batavia for the Governor-General's safety whenever he ventured into it. Its fine climate and fertility however together with its proximity to Batavia, pointed it out, above a century ago, as peculiarly adapted for European residences and an express grant was then made of it to Imhoff, and his successors in the government for that purpose. A plain house was erected by Imhoff himself, and was soon followed by many more, by other functionaries and wealthy persons, so that a fine village or small town rose, at length in the bosom of the wilderness, while at the same time, the cultivation of the ground was industriously resumed. — The town is 30 m. S. Batavia and 800 ft. above the level of the sea. Among other handsome buildings, the present palace of the Governor-General is particularly distinguished. It presents a central pavilion, surmounted by a dome and two long wings, ornamented with porphyry. Close by there is a large garden in which all the most useful and curious vegetable productions of the Indian Archipelago are to be found, arranged and tended by a highly scientific botanist. — (Van der Aa *Handboek, Voyages en Chine, &c.*)

BUITRAGO a tn Spain, New Castle, prov. of and 40 m. N. Madrid. It was formerly walled, and has two squares a parish church, chapel townships, two schools, and a hospital. Pop. 1503.

BUTTLE par Best. Kirkcudbright length, 8 m. breadth 3 m. Pop. 1041

BUJALANCE, a city Spain, Andalusia, prov. of and 21 m. E. by N. Cordova, on an elevated plain in a mountainous district. It has two squares and numerous wide and paved, though crooked streets a parish and several conventual churches a Latin and two other schools and a ladies college townships six hospitals, two hospitals, a prison, several fountains, and overlooking the town an Arab castle, surrounded by an embattled wall and moat, flanked with several dilapidated towers in one of which is its portal. Manufactures — cloth and woollen fabrics, earthenware & glass. Trade — exporting wheat, oil and industrial produce, and importing wool. A large cattle-fair is held in August and September. Pop. 6986.

BUK or **BUCU** a French cap. circle of same name gov. of, and 17 m. W. S. W. Poona, with five schools, and considerable manufactures of linen, leather and shoes. It has also several distilleries. Pop. 2249. — The *CIRCLE* area, 268 sq. m. in level well watered, well wooded and fertile producing good crops of corn, flax, hops, and garden fruits and rearing great numbers of cattle. Pop. 44,584

BUKKEN an isl. Norway W. coast, prov. Christian and bui. Stavanger in the Bukke-fjord lat. 59° 18' N. lon. 6° 22' E. with a vil. of same name. The Bukke-fjord, is an arm of the sea extending about 80 m. inland, with a breadth of 10 to 15 m. and is so criss crossed with numerous islets. Its N. E. part is called the *Naurstrand* Fjord and is N. part the *Sjoklo-fjord*

BUKKLE — 1 A fortress, stands on an isl. of same name, in the Indus tl. a channel which divides it from Ronen on the 1 bank of the river being 1200 ft. wide, and 30 deep and that which divides it from Suklet, on the S. bank, being 204 ft. wide, and 15 deep. lat. 24° 41' N. lon. 68° 51' E. The island is a limestone rock 2400 ft. long 900 wide, and 27 high. It is almost covered by the fortress, which has double walls of brick from 30 to 35 ft. high with bastions, loop-holes, and a port-coat. — 2 A tn. in Pui jeb on a small offshoot of and about 8 m. E. the Indus lat. 31° 39' N. lon. 71° 7' E. in a fertile district and abundantly supplied with cheap provisions. Pop. 5000

BUKOWINA a duchy Austria in P. Galicia, and recently called the circle of *Czernowitz* between lat. 47° 20' and 48° 40' N. and lon. 24° 45' and 26° 20' E. greatest length N. to S. 104 m. average breadth, about 60 m. area 2944 sq. m. The whole circle is traversed by ramifications of the Carpathians, and much of the surface is occupied by swamps and forests. The principal rivers are the Pruth, Dniester, Suckava, Seret, Moldava, and Hucstina. The climate is on the whole, mild and salubrious. The annual production is wheat. Gold is found in the sands of the Pruth. Not much corn is grown, but great attention is paid to the rearing of cattle and horses. The trade chiefly in the hands of Jews and Armenians, is confined to horses, horned cattle, hides wool wax, and honey. The capital of the circle is *Czernowitz*. Bukowina was united to Galicia in 1777 and from 1785 to 1849 it formed the circle of *Lancowice*. In the latter year it was re-constituted a duchy. Pop. 298,498

BULACAN a pr. and tn. It lies upon an island, at the head of the Bay of Manila. The province is the smallest in the island but the most productive, the best cultivated and said to be the healthiest places in the whole archipelago. It is intersected by numerous small rivers the banks of which are extremely fertile, and are covered with trees all these streams fall in to Manila Bay. Gold, from the latter said to be of excellent quality and inexhaustible in quantity could, alabaster limestone, and building stones are found. Amethysts, opales, and emeralds, are said to exist; and good slate is to be obtained but is not wrought to any extent. The principal agricultural productions are rice, maize sugar, indigo, and some tobacco. The forests are inhabited by wild boars, oxen, buffaloes, wild horses, and a great variety of birds, including turkie doves. A large portion of the population on the coast is employed in fishing and of those in the interior a number

she out a society subsistence by washing the numerous sands of the rivers. A still greater number are engaged in weaving, and in manufacturing various fabrics. The town cap. of the prov. is about 2° 20' N W Maaila lat. 14 50' N; lon. 120° 50' E. and is connected with the latter by an excellent road. The streets are spacious, and the houses of wood, with exception of the church, the residence of the chief magistrate, and the government-house, all of which are of stone. Among the inhabitants are many wealthy sugar-manufacturers; a great number are also employed in manufacturing various kinds of fabrics, particularly mats or carpets of silk. The savanna of Bulama are extremely picturesque. Pop. of in 1893 of the entire prov 179 000. (Malt's Philippine)

BULAMA one of the Blassa Islands, W coast, Africa, 18 m. long and generally about 9 broad although, in many places, a good deal more lat (W point) 11 31 18' N lon. 15° 8' 5' W [c] The land rises gradually from the shore to the centre of the island where it attains the height of 100 ft. In 1722 an attempt was made by an English company called the Balamia Association to establish a colony in this island but the colonists about 275 persons dispersed and unprincipled were sent off by disease, except a miserable remnant, who in 1793, sailed for Sierra Leone

BULGARIA *anc. Moesia inferior* a prov. Turkey in Europe between lat. 44° 9' and 44° 10' N and lon. 23 14 and 29° 36' E. bounded N by the Danube, which separates it from Wallachia, the S.E. corner of Moldavia, and Bosnia; F the Black Sea, S the Balkan Mountains, which separate it from Macedonia and W by Servia; length from E. to W about 320 m. average breadth, about 100 m. area, 2 440 sq m. The whole province may be regarded as consisting, of a vast inclined plain, descending N with more or less abruptness, from the ridges of the Balkan to the banks of the Danube, and of a smaller and much lower inclined plain with slopes N, to the Black Sea, to the lands of which the whole province belongs, to a small extent directly but by means of the Danube and its tributaries, to a much greater extent indirectly. The most important of these tributaries are the Timok, Iabar, U. of Osm. Lom, and Tahan. The interior is only indifferently wooded, but magnificent forests clothe the lower Tchernov, and rise almost to the highest summits of the Balkan. The prevailing strata belong to the upper part of the secondary formation, and of course are chiefly cretaceous. The soil is of remarkable fertility and produces so much more corn and rice than the inhabitants consume that the Turks regard Bulgaria as their most important granary and derive from it large supplies of all kinds of agricultural produce, including honey and wax. The minerals are probably of considerable importance, but as yet, the only one which has been worked to any extent is iron. For administrative purposes Bulgaria is placed under the Egerberg of Roumelia, whose residence is in the capital Sophia, and is divided into four sanjaks—Bosphorus, Kiopekia, Vidin, and Widdin. The greater part of the inhabitants belong to the Greek church. They generally understand Turkish but their vernacular tongue is a dialect of Slavonic, bearing a considerable resemblance to the Rumanian. They are more industrious than is usual with the inhabitants of Turkish provinces and showing little inclination to break the yoke of their masters, are in return treated by them with tolerable mildness. Pop. 1,800 000.

BULLAN a n. Inland prov. of Aust 33 m. W by N. Merica, on an extensive 1840 ft. above the sea level. It has steep and unimproved streets, two squares, a parish church, townhall, endowed school, prison, workhouse, and extra wall cemetery. Manufactures—linen, and hempen fabrics, cottonware, and brandy. Trade—manufactured goods, grain, &c. 1 op. 514.

BULLITT a n. Waterland cap. dist. of same name can. of and 14 m. S by W Freshburg. It stands in a fertile valley 2340 ft. above the sea level. In 1840 almost every building with exception of the old castle and Lutheran church, was

burned down. The greater part of the town is now new and regularly built. The parish church, which is very handsome and has a marble chancel and possesses a fine organ by Moser. Six yearly markets are held here. One in May is the largest in the eastern and at the two in October and November the prices of Grubbe cheese, for which Bulls is the great depot, is fixed. Pop. 1432

BULLFISH or **BUCHAN** a small fishing vil. Scotland co. Aberdeen on a gentle slope terminating on the brink of a high cliff, 23 m N N E Aberdeen. It consists of two or three rows of houses straight and running parallel to each other but hardly deserving the name of streets. The houses are superior to those commonly to be met with in fishing villages and are kept remarkably clean by their occupants. Water is abundant, but hard. The male portion of the population are all fishermen and carry on the trade of white-fishing in small boats, during 10 months of the year never going further than 10 or 12 m. from land. They likewise engage to a small extent in the herring fishing. Close by the village is the remarkable natural curiosity called the Bullers of Buchan, consisting of a group of singular rocks and sea-worn caverns. The principal of these caverns or excavations is called the Buller or Booter of Buchan. It resembles an immense well, whose perpendicular walls are of the living rock, with the sea rushing violently in through an opening at the bottom and having an aperture at the top of about 50 ft. in diameter from which the visitor contemplates the tumultuous waters below at a depth of 150 ft. Boats enter by the same passage with the tide affording the curious an opportunity of visiting the interior which however descending the adventure appears to be accomplished without risk. (Local Correspondent)

BULLHES a vil. and com. France, dep. Oise 6 m N N W Clermont on the Bresche. It was formerly noted for its manufacture of linen called *den-Bulland*, still carried on to a limited extent. The goods were sold chiefly at Beauvais. Pop. 1071

BULMEL, a port. Hindostan, on the highroad to Bombay 42 m. S S W Surat lat. 20° 20' N lon. 72° 2' E. It carries on a considerable trade in grain and timber. The chief manufactures are of cotton, rice and sugar-cane are cultivated in the vicinity but a large portion of the land is still waste.

BULTI DALTES, **BULTIAN** **ISKARDON**, or **LITTLE TIBET** the various names of a small state in Central Asia, occupying on the maps the S.W. corner of the Chinese empire, though not subject to that power and lying between lat. 34 40' and 35° 30' N and lon. 74 40' and 76° 20' E. Greatest length E.E. to N.W. about 270 m. breadth between 50 and 90 m. area, 15 000 sq m. It is enclosed by lofty rugged mountains, rising to a height of 6000 and 8000 ft.

and is traversed by the Indus during the entire course of that river and has several other inferior but all considerable streams, numerous mountains, terraces, and five pretty large lakes. Little is known of its minerals, but arsenic is met with sulphur abundant, and thermal springs are numerous. As might be expected from the inequalities of its surface, its climate presents the extremes of heat and cold in accordance as well with its elevations and depressions as with its seasons. In the elevated parts the cold is intense in winter, while in the lower districts, the heat in summer ranges from 70° to 80° in the shade at noon. Zaid is a grain almost unknown but snow falls frequently and lies to a depth of from 1 to 2 ft. The country is not naturally fertile, but, through the industry of its inhabitants is made to yield tolerable crops of wheat barley millet, buck wheat turnips, and a little rice. Fruits of various kinds are abundant, including apricots, peaches, apples, pears grapes mulberries walnuts, and melons. The principal wild animals are a species of sheep with enormous horns a large kind of goat, mule deer marmots, bears, leopards, hares, wolves and foxes. The chief domestic animals are the grunting ox, which attains the size of our large ox, the cow the lake a hybrid between the former and the latter sheep, and goats. Eagles are frequently seen more rarely vultures and red-legged partridges, together with another species, as large as a common hen are plentiful. The rivers abound with trout, but have scarcely any other fish. The inhabitants are of the Mongolian race, are peaceable and well intentioned. They labour hard and live poorly have a sallow skin, and care more look, and are seldom long-lived. Their dress is a long full tunic and cap, generally made of the wool of their sheep and goats. Their religion is Mahometan, and their language Tibetan. Pop. estimated at 75,000.

2. *Buren-Nieder* on the same river a little below the former and containing a handsome church, and good school. Pop. 1090.—3. *Buren*, a tn. can. of and 14 m. N. W. Bern cap. dist. of same name on the Aar. It has a court-house, and a new bridge over the river and carries on a good general and transit trade. Pop. 1147.

BUREN a tn. and circle Prussia prov. Westphalia, gov. Minden. The tower stands at the confluence of the Aare and the Aare is called, contains a handsome church a normal school, and an asylum for deaf and dumb. The staple trade of Buren is linen-weaving. Pop. 1800.—The circle, area, 195 geo. sq. m. is hilly almost mountainous in the S and S. E. flat and covered with extensive moorland wastes, in the N. E. and N. In Batskotten there is a salt spring which yields annually 500 tons of salt. In other parts of the circle the linen manufacture is carried on to a great extent, and it is there are numerous oil mills, several paper-mills, glassworks and potash works. Pop. 24,000.

BURENDO 1. ASS. See BURENDO.

BURENDO RIVER or BUREN.—1. A valley Cheshire, extending S. E. to N. W. between lat. 53° 20' and 53° 30' N. and lon. 2° 10' and 2° 26' E. containing numerous subterranean water-channels and abounding in springs of great force and volume.—2. A river flowing N. W. through the above valley. Shortly after the junction of the two streams of which it is composed a great part of the water suddenly disappears by an opening in the bed of the river the remainder being covered by a canal N. W. towards Lancaster beyond which it joins the Great Ouse. lat. 53° 44' N. lon. 2° 2' E. whole course about 40 m.

BUREN (or MAINT) par. Eng. Suffolk and Essex 4131 sq. Pop. 1807.

BURENMOULN or LITTLE BUREN, par. Eng. Essex 1430 ac. Pop. 642.

BURFORD a market town in and par. England, co. Oxford. The town is 16 m. W. by N. city of Oxford on a steep ascent, chiefly on a bank, stream of the Windmill. It consists of three principal streets straight and well kept, but badly paved houses of stone, and mostly very old. The church is a handsome structure of Saxon architecture, with Norman tower and spire. There are chapels, besides, for Wesleyans, Baptists, and Quakers, a grammar school formerly of considerable, but now of little repute, and several almshouses for poor and aged widows. An ancient priory in the vicinity is an object of some interest. Three fairs annually for cattle, horses, sheep, cheese, &c. Area of par. 2170 ac. Pop. 1818. of tn. 1504.

—(Local Correspondent).—2 par. Sal. p. 672 ac. 1 op. 1057.

BURG.—1. A tn. Russia, prov. baxony gov. of, and 12 m. N. E. Magdeburg on the Elbe surrounded by a wall with several gates. It has three churches a grammar-school a hospital and a workhouse and is the seat of civil and judicial administration for the circle. Its manufactures are extensive and consist chiefly of woollens, yarns linen pottery stone and leather. It has also an iron foundry dyeworks tallowworks numerous mills and distilleries, and likewise a pretty extensive trade in hops, chloxy tobacco, cattle, and wool great numbers of sheep being reared in the vicinity. Pop. (1846), 14,779.—2. A tn. Denmark, in Fennia prov. Schleswig lat. 54° 30' N. lon. 11° 10' E. Its trade and shipping were at one time considerable but have both been nearly extinguished by the filling up of the harbour which is now accessible only to boats. The steeple of the church of Burg forms a conspicuous landmark for mariners. The inhabitants live chiefly by agriculture and weaving. Pop. 1800.—3. A tn. Denmark, in the S. Denmark of Holstein, dist. Holsberg, with a very old church. 1 op. 1129.

BURG (Dz) or BURW a v. Holland, prov. N. Holland in Texel 7 m. N. E. Heide the principal village in the island, and so much improved of late years, as to rival, in the beauty of its streets and trees, the nearest villages in Holland. The Reformed church, with its lofty spire, stands in the centre, and around it are 10 streets, and three squares. A handsome new cesspool-house was built in 1840. The E. Crochols have a new church, and the Baptists a plain one. Burg has a French and Dutch and a Dutch school and besides, an institution chiefly for poor and indigent persons, who have no direct claim for support on the island four benevolent boards for aiding the poor a sub-committee of the society of beneficence, district branches of the Netherlands Bible, missionary and

tract societies, a savings bank, and a branch of the public utility society. The inhabitants, generally in a thriving condition, are occupied in trade or the rearing of cattle. Pop 1100

BURGAU several places, Germany. The chief is a tn. Bavaria, circle Swabia cap dist. of same name 24 m. W Augsburg on the Mündel, over which there is here a bridge. It contains a castle and an hospital, and has manufactures of leather and glass, and three annual fairs. Pop. 2068

BURGDOFF or **BURGDORF** a tn. Switzerland, can of and 12 m. N.E. Bern, r bank, Emmen with a townhouse, hospital, several public educational institutions, and a public library of 4000 volumes. There are manufactures of ribbons, chocolate, tobacco, and some breweries. Large fairs are also held. In the vicinity are the hot n. nat. baths of Lœchbold. Pestalozzi laid the foundations of his educational system here, and had a school in the old castle. The town disputes with Rees the honour of having established the first printing press in Switzerland. Pop. 2417

BURGDORE a tn. and bail Hammer dist. Lüneburg on the Aue, 12 m. N.E. Hammer partly surrounded with a wall and ditch. It has manufactures of cotton and leather and several distilleries. Pop. of tn. 2322; of bail 45708

BURGEO ISLANDS, a group of islands, British N. America off E. coast Newfoundland lat. (S.W. point) 47° 35' N lon 54° 44' W (r). The fishing is extensively prosecuted by the inhabitants of these islands, and according to the report of Captain Leach yielded 1,575,000 lbs. between October 1847 and June 4 1849. The fish are sent principally to the markets of Spain and Portugal. The fishermen, with very few exceptions, are all Protestants. They have two churches, and a small school house, but their dwellings are miserable huts. The settlement, however appears to be in a flourishing condition and the people, notwithstanding the discomfort of their dwellings contented and happy. Pop 700 (—*Parl. Papers*.)

BURGH-IN-THE-MARSH, a vil. and par. England, co. Lincoln. The village, 2½ m. E. by Spilsby has a commodious parish church, with a lofty tower and chapels for Baptists and Wesleyans an endowed school, and two annual fairs. Area of par. 4238 ac. Pop. 1216

BURGLAND three vils. and pars. Switzerland—1 *Burgland*, can. Uri, on a small tributary of the Reuss, and the birth place of William Tell. On a height where his horse stood is a chapel, painted over with scenes from the patriot's life. Near Tell's chapel is a new and handsome parish church, with

a subterranean chapel beneath. Pop. 1215.—2 (supposed to be *Pörsch*) can. Bern, r bank, Züri, not far from the Lake of Biemles or Biel. A great number of coins and Roman antiquities have been found in the neighbourhood. Pop. 1926

—3 can. Thurgau r bank, Thur 11 m. E. Frauenfeld. It was once a place of some importance, and part of the walls and towers by which it was surrounded still remain. A considerable quantity of fruit is grown in its vicinity. Pop. 1076

BURGO (Er) a tn. Spain, Andalucia, prov. of, and 85 m. W by N Málaga. It is tolerably built, and contains a parish church, townhall, two schools, prison and cemetery. The inhabitants are exclusively agricultural raising grain, wine, oil, fruits, and vegetables and rearing sheep, goats, and horned cattle. Pop. 2113

BURGO de Ossa, a tn. Spain, Old Castile, prov. of and 38 m. S.W. by S. Burgos 1 bank Uvero. It has here square, a cathedral, episcopal palace, ecclesiastical court-house, secretary of aria, three endowed schools, founding and general hospital townhall three fountains and a cemetery. Main factories.—linen hump shoes, leather and chocolate. Trade —export of wine, fruit, cattle, and industrial and agricultural produce. Pop. 1790

BURGOS, a prov. Spain, Old Castile, between lat. 41° 32' and 43° 10' N bounded, N by prov. Santander E by Alava, Logroño, and Soria S. by Burgos, and W by Palencia and Valladolid; area, 7082 sq. m. The surface is very elevated, and consists of a series of mountain ranges, with inter-vening valleys. The mountains belong to the great systems of the Pyrenees, and the Iberian Mountains two branches, one from each system, meeting and almost meeting imperceptibly into each other near the centre of the province, on the banks of the Arizón. The principal chain in the centre de Ossa. They are generally well wooded with oak, pine, chestnut, beech and other timber. Gold, silver, iron, lead, copper, quicksilver, sulphur, gypsum, and lignite are found, but mineral operations are carried on very imperfectly and to a limited extent. Marble, and good stone for building and pavement, abound. The soil of the valleys usually consists of a blackish loam which, though sometimes shallow is fertile, and produces good grain, fruit, and vegetables the higher districts afford excellent pasturage for cattle, sheep, goats, horses, mules, and pigs. The chief rivers are, the Ebro Duero Arizón, Nájizillo &c. the chief affluents of the Ebro. They abound in fish. The climate is cold and damp, liable to sudden changes of temperature. Spring is hasty and short and is suddenly succeeded by scorching heat. Snow frequently covers the summits of the loftier hills eight months in the year. Manufactures.—linen woollen and cotton fabric hats, paper, leather hardware cutlery fine cloth and coarse garments, bricks, tiles and heavily Trade is wholly inland, and very insignificant. Education is advancing, numerous schools, non-violent institute one and scientific associations, having been recently established. but matters in this respect are still on an unsatisfactory footing. One-half of the villages of the province have no school, and the attendance is only 1 to 6 of the population. Crime is comparatively rare. Pop. as given by census in 1844, only 177,159 but *Molina*, founding on statistical data calculates that it is 234,021.—(*Molina*)

BURGOS a city Spain, Old Castile, cap. prov. of same name on a declivity sloping towards the Arizón, here crossed by three stone bridges, 112 m. N. Madrid. It forms an irregular quadrangle, of which the longer side E to W is about 2 m. and the shorter 1 m. It is walled but its chief defence is its castle, seated on an adjacent rugged hill, which is wholly enclosed by its works. The houses are in general well built of stone or brick but most of the streets are narrow and winding and heavily paved with large cobbles, fixed in their places by a whitish kind of stone, which gives the whole an appearance of mosaic. The principal square are the Plaza Mayor or De la Constitución, the centre of which is adorned by a statue of Charles III. the Plaza de la Libertad, lined with good houses, many of them recent, but some also interesting from their antiquity and the Plaza del Mercado, in the centre of which is a beautiful fountain, with a gilded column adorned with gilded stone figures, and surmounted by a lofty obelisk, which terminates in a star of gilded rays. This is only one of 10 fountains from which Burgos derives copious supplies of water. The finest street, in every respect,

le that called *Placer del Rey*. All the streets have good macadam pavement. Places of penance are numerous, but the one most frequented and justly forming the boast of the town, is the Espoleta, which is laid out in spacious walks, and has a fine view opening to the Arriaga. Burgos, up to the commencement of the 16th century shared with Toledo the alternate honour of being the royal residence and hence, its public buildings several of which have a greater magnificence than usual in a provincial town, are not so much situated in its present, as memorials of its former greatness. The

VIEW OF THE CATHEDRAL. See—From Library & Magazine

most remarkable structure is the cathedral one of the finest buildings of the kind, not only in Spain, but in Europe. It was commenced in 1211 on the site of a royal palace, which Ferdinand III gave up for the purpose, but was not finished for so long a time. It is built of white marble, in the form of a Latin cross, and is about 300 ft. long by 200 broad. Its principal entrance, on the W. has a finely decorated facade and is flanked by two towers, which have a height of 300 ft and terminate in spires of filigree-work exquisitely chiselled. The interior is of corresponding magnitude, is adorned with fine carvings and paintings and contains numerous interesting monuments in particular the tombs of Don Fernando, and the Cid, both saviours of Burgos, and celebrated throughout Spain for their heroic achievements in the wars with the Moors. Besides the cathedral, there are numerous other churches, some of them of great extent, and considerable pretensions, but generally exhibiting much less taste either in the style of their architecture, or grotesque finery of their ornaments. San Lorenzo one of the largest, has a front of Corinthian pillars, and an interior of a circular form lighted from above by a handsome dome. None of the other public buildings within the city are deserving of notice. The theatre in use is small and insignificant, and a new one, commenced on a most magnificent scale, remains unfinished from want of funds. Outside the city is the stately of Las Huelgas. The buildings are of mean appearance, but the edifice was one of the richest in Spain, and all the nuns were of noble descent. The castle which is situated to the N of the town was the palace of the early kings. It is now almost a ruin, but must have been of great strength if we may judge from its successful resistance to the repeated attempts of the British to take it. The failures of one of them and the disastrous retreat which ensued, are too well known. The benevolent and educational establishments of Burgos are numerous. Among the former may be mentioned the royal, military and founding hospitals savings-bank, and *mont-de-piété* which seems to combine a natural assistance and loan society for working men among the latter the Seminario Conciliar of San Gerónimo the College of San Nicolas, and four primary schools, supported by municipal funds. The chief criminal establishment is a house of correction, called Presidio Penitenciar, not only for Burgos, but also Logroño, Pampeluna, and Santander. The manufactures of Burgos are few and unimportant. That of fine woollen cloth, and harness tanning which once had an European reputation, are all but extinct. The only other articles worth mentioning are paper hats, linen, and

silk stuffs. There is a little inland trade, chiefly in agricultural produce. Burgos is the residence of a bishop, general, the seat of an archbishop, and of a high court, whose jurisdiction extends over the provinces of Alava, Biscaya, Burgos, Guipuzcoa, Logroño Santander &c. Before the removal of the court to Madrid Burgos was in a very flourishing condition, and contained three its present population. Since then it has continued to sink gradually and exhibits in every quarter indications of decay. The pendulum was during which the possession of it was repeatedly and heavily contested, and died greatly to its disaster. Pop. including the suburb of Vaga, on the opposite side of the Arriaga 15 924.

BURGSTADT a tn Saxony, circle, Leipzig 7 m. N N W Chemnitz with a handsome Gothic church and considerable manufactures of china and printed stuffs, and honey. It also sends a good deal of fax. Pop. 2700.

BURGSTEIN or **BURKSTEIN** a tn Bohemia, circle, Leitmeritz, about 48 m N N W Prague. It contains a handsome palace, with gardens a parish church an hospital and a manufactory of mirrors. In the neighbourhood, on the summit of a remarkable precipice of sandstone are the remains of the old castle of Burgstein. Pop. 1000.

BURGUNDY [anc *Berygunde* French, *Bourgogne*] one of the largest and most important of the

former provinces of France, and now forming dep. Côte-d'Or Seine-et-Louis, Yonne, part of Ain, and part of Aube. In more ancient times Burgundy was the name of a kingdom, and it included several districts in addition to the above province once paying the whole homage of the Rhine. Its most ancient inhabitants were the *Edii* fully described by Caesar, but its name Burgundy is derived from one of the northern nations, called, in Latin, *Berygundi* or *Berygundones* who established themselves there in the beginning of the fifth century. At a later period after the subversion of their kingdom the province was erected into a dukedom and long made an important figure in history under a race of Dukes of Burgundy. The male line having become extinct in 1477 on the death of Charles the Bold, at the siege of Nancy Louis XI who had married his daughter succeeded to the dukedom, which has ever since formed part of France.

BURHANPORE See **BOOKHATPORE**.

BURIAR, an isl. Indian Archipelago, Phihymann, between Malacca and Ceylon lat 13 11' N lon 106 5' E (a.) area, about 827 sq m. The coast is rocky but the island has some good harbours and excellent anchorage. The latter is fertile.

BURTON par Eng. Hants; 6306 ac P p. 1041

BURKA, a tn Arabia, E coast, Oman 60 m W N W Muscat, with a fort built by the Portuguese. This fort which is mounted with cannon, was once the winter residence of the Imam, and still has a garrison of about 200 men. The inhabitants live chiefly by fishing, and the raising of dates. The bazaar is much frequented by the Bedawin. The harbour is merely an open roadstead, accessible only by vessels of 80 to 50 tons. Pop. 4000.

BURKHARDTSBORGH a tn Saxony circle, Zwickau 7 m S Chemnitz. It has manufactures of hosiery cotton and linen cloth, and also has but the inhabitants depend chiefly on mining. Pop. 1850.

BURLINGTON —1 A city and port of entry U States, New Jersey pleasantly situated 1 bank Delaware, 17 m N E Philadelphia, lat. 40° 5' 10" N, lon 72° 52' 37" W. It is enclosed on the S and E by a small stream, and con

needed with the mainland by four bridges and several causeways. It has six churches, a city hall, lycæum, bank, library and several schools. The Bishop of New Jersey resides here. It has some considerable manufactures and a pretty extensive shipping trade. *Town.* (1840) 8861. *Pop.* 9484.—*3 A* Township and part of city Vermont, beautifully situated on a bay of the same name, Lake Champlain. *lat.* 44° 18' N *lon.* 73° 15' W. The village contains many elegant houses and a handsome public square. It has a court-house, jail an academy six churches two female seminaries, and a university, called the university of Vermont. *Pop.* (1840) 4371.

BURLINGTON a in England *See* RICHMOND

BURMAH THE **BURMAS** or **BURMAN** EMPIRE, OF THE KINGDOM OF *AVA* [Burmes, *Mye-ma*, or *Brum-ma* Chinese, *Mo-cho*] the most W. of the three great states of the Indo-Chinese peninsula capital, Monchohe and formerly *AVA*. Its extent, limits capabilities, &c. are very imperfectly known, the country never having been fully explored by Europeans. It is bounded, N. by Assam E. by the Chinese province *Yun-nan* by independent Laos and the *Tamerson* Province S. by the Gulf of Martaban W. by the Bay of Bengal Arakan, Chittagong and Cassy Kaboon, or Manipoor and it appears to extend from *lat.* 17° 45' to between 26° and 31° and from *lon.* 95° to about 98° 40' E. estimated area 184,000 sq. m. According to Dr Francis Hamilton,—"In fertility beauty and grandeur of scenery and in the variety value, and elegance of its natural productions, Burmah is equalled by few countries on earth and it is occupied by a people of great activity and enterprise, possessed of many qualities agreeable to strangers. The mountains are covered with fine timber and the valleys with jungle, spots here and there being cleared and cultivated but the proportion of cultivated land is small and the greater part of the country is timbered."

Physical Features.—Burmah is composed of a series of longitudinal valleys, sloping N. to S. and sowed through by the Irrawadi and its affluent the Kyau-dwen, by the Salween, and the Salween, which last stream forms the E. boundary. These valleys are formed by spurs of the Himalayas which lower in height as they proceed S. The most important are the chain of *Assam* mountains, forming the N. frontier and terminating S. in Cape Bervilla. *lat.* 18° 1' 80" N *lon.* 94° 12' E. between the Gulf of Martaban and the Bay of Bengal culminating point, 8902 ft. and the chain which separates the basin of the Irrawadi from that of the Salween, terminating S. at the Gulf of Martaban, culminating point Phoonngun 12,424 ft. near *lat.* 27° N covered with perpetual snow. From the Gulf of Martaban N. to *lat.* 17° 30' N Burmah is low champagne, interspersed with numerous small lakes well intersected in all directions by branching of the Irrawadi and Salween, within the delta of which all this district is included forming the most extensive plain in the kingdom. From *lat.* 17° 30' to about 22° N the country is hilly and elevated, but intersected by numerous fertile and well-wooded alluvia and N. of that parallel it is decidedly mountainous, the highest ranges being N. and N. E. of the capital.

The sea-coast of Burmah is above 400 m. in length. Its most important portion is along the Gulf of Martaban, which is the termination of the mountain ranges of the country the receptacle of all the great streams, and the source of access to all the ports, namely Rangoon, Martaban and Bassein.

The Irrawadi the greatest stream in the empire rises, as far as known, in the Himalayas, flows S. through Burmah near its E. frontier till it reaches Bhamo, where it takes a S. W. course to *AVA*, below which about *lat.* 21° 35' N, it receives, on its bank, its chief affluent, the Kyau-dwen, which in part of its course, forms the W. frontier line towards Cassy. The Irrawadi's course continues from *AVA* still S. W. till it approaches the Arakan frontier after which it flows S. E. and, full, by numerous mouths, into the Gulf of Martaban. These mouths afford admirable means of internal water communication and the main river itself is navigable, at all seasons, for sailing vessels of 300 tons, as far up as *AVA*, and, during the rains as far as Bhamo, a distance of about 800 m. from the sea. The other affluents of the Irrawadi worth noting are the Bhamo, Lamphayan, Mukiang, and Myingyung, all of which it receives above the confluence of the Kyau-dwen, and all navigable to a greater or less extent. The Salween rises in Lake Gmangnag, *lat.* 20° 30' N and is a comparatively small

stream. Its total course is about 250 m. direct distance to the Gulf of Martaban, which it reaches through a broad estuary and several small offsets but is not very navigable, there being no continuous channel deeper than 4 ft. The Salween or Thantayn (which see) is next to the Irrawadi in size and falls into the sea between the ports of Martaban and Moulmein. The lakes of Burmah are numerous, especially in the S. part, as already stated but small. The only one of any considerable size, as far as known is Nandokandee N. of *AVA*, above 40 m. long by about 12 broad and Gmangnag already noticed, about 10 m. long by half that breadth.

Geology and Minerals.—The N and P part of Burmah as far S. as about *lat.* 17° N appear to be of crystalline schistose formation. From N of *AVA*, stretching S. E. into the *Tamerson* Province to a band of tertiary formation. Near the junction of the Kyau-dwen with the Irrawadi is a patch of the transition series including the carboniferous formation. All the rest of the country S. and W. seems to be composed of alluvium covering apparently limestones in various states. Blue near *AVA* and dark, bituminous, and slaty between that city and Pagan and near Prome, coarse grained and sandy. The low hills in the delta of the Irrawadi are composed of blue limestones, calcareous sandstone, breccia, quartz and conglomerated iron ore. In an lower part of the course of the Salween, are abrupt hills of the finest blue limestones. In these are numerous extensive and magnificent stalactite caves, many of which, from their immensity, have been devoted to religious purposes, and are still adorned with countless numbers of images of Gaudama of different sizes and materials, some covered with gold and some formed merely of burnt clay. The minerals known to exist, and most of which are wrought to a greater or less extent, are gold, silver, iron, antimony, lead, arsenic, and sulphur, all except the first two said to be abundant. Besides these, there are limestone marble, near *AVA*, equal to that of Carrara, and monopolized by the Government, for the manufacture of images of Gaudama, nitre, natron salt, and precious stones, including rubies, sapphires, amethysts, garnets, chrysolites, and Jasper most of which are sent to China. Coal is said to be abundant in some quarters, but is not used. Petroleum is obtained to the extent of upwards of 80,000,000 lbs annually, a quantity it might be greatly increased, and is used as an oil for burning all over the country and also for paying boats, and other purposes and in the N. part of the empire, more especially on the banks of the Kyau-dwen in it is a valley of Eukong as the Assam frontier are mines of very pure amber.

Climate.—In general healthy where cleared even in the delta of the Irrawadi excepting during the rainy season, when the swampy parts become unhealthy for foreigners but even then the course of the great rivers and cleared parts remain salubrious. In this district there are two seasons similar to those in Hindoostan a dry and a wet the latter from April to October during which 150 to 200 inches of rain fall and the former from November to April N. of the delta, or *lat.* 18° N there are three seasons cold, from November to February hot, from March to June, and rainy the rest of the year. The delta, and all the lower parts of the valley of the Irrawadi, are subject to annual inundations, which continue from May to October. Earthquakes are frequent in the S. parts of the country.

Vegetation.—A considerable portion of Burmah lying with in the tropics, and many parts more especially in the N. being considerably elevated its vegetation is rich and varied. In mainly places in the valley of the Irrawadi rice of excellent quality which constitutes the favourite food of the people, is produced in abundance and on the drier grounds, maize and millet are raised. Around *AVA*, and some of the other larger towns, and in the more elevated spots, wheat and excellent tobacco are grown besides which, are cultivated kidney and French beans, some mustard (*Brassica oleracea*) from which is obtained an oil used instead of butter black and red pepper indigo, and sugar to a small extent and two kinds of cotton one red, the other white but all the processes of agriculture are performed in a most primitive manner. The opium, a Burman tobacco plant, is grown on the hills of *AVA*, but its leaf is used only as a pipe. Turmeric, used chiefly as curry and various yellow dyes, are in good variety. Among the fruits may be named the mango, orange, pine-apple, mustard apple, lemon, lime, durian, betel-nut, olive,

are among the edible roots, the ginger cassia, liquorice, arrow-root, yam, batatas, onion, &c. Timber for ship and house building is abundant, including teak though not so good as that found in Malabar; secondary oak of several kinds, fir and ebony. Of other useful trees and plants may be noted sandal-wood, agave, and Indian fig, several kinds of palms, the tamarind, also, cucumber, papaya, castor oil, cotton, lettuce, and several kinds of bamboo, sage palm plantains and, on the sea-coast, the coco-nut.

Zoology.—Elephants are numerous in the lower parts of the country and cannot great devastation among the rice fields, but are never used as beasts of burden. The white elephant, apparently an *ethiops*, is also at times found, and is an object of superstitious veneration but only among the lower classes. The king always possesses one, who is considered the second dignity of state and has a regular retinue of ministers, with numerous attendants and guards. Other animals, more or less prevalent, are rhinoceroses, tigers, leopards, buffaloes, hogs, civets, wild cats, apes, deer antelopes, otters, but no jackals or wolves, porcupines and other birds of rich plumage (jungle-fowl, peafowl, pheasants, partridges, quails, geese, ducks, and snipes). Alligators of two kinds, crocodiles, and sharks abound in the river mouths, turtles and tortoises are very common on the coast, the latter *de capillis*, a very curious species but not generally valuable, are numerous as are also scorpions, centipedes, hawks, leeches and destructive insects. The domestic animals are oxen and buffaloes, used extensively for agricultural purposes; horses small but vigorous and only used for the saddle; pigs very few and of small size, or common fowls.

Manufactures, Trade and Commerce.—Hemp, H. eight, and Muscavado.—The manufactures of Burmah are, as a whole, unimportant and inferior. The females who are the weavers make cotton cloths but not so good as those of Hindoostan and China. Durable, though coarse silks are also made, and pottery-ware, unglazed and glazed. Of the latter kind large jars have long been used in India, under the name of Pegu jars. The only steel of consequence is made in the Shan country chiefly sword blades coarse cutlery is made in some of the villages, and clumsy gold and silver jewellery is much fashioned in most of the large towns. Blacksmithing is carried on to some extent at Bhamo; this branch of industry is important, in proportion to the paucity of good roads, and the great number of excellent water ways. The vessels built are sometimes 200 and 250 tons burden, and admirably adapted for inland navigation. The Burmese excel in golding, which they make to withstand damp, apparently by means of repeated coats of wood-oil. They undertake dyeing but their colours are generally fugitive; they make paper umbrellas, carriages, saddles, and inferior gunpowder but are famous as bell-casters. The bells they make are said to be of delightful tone, but disproportionately thick and some of them are of enormous size. One at Mawgoon, near Ava, is said to be 20 inches thick, 20 ft. high, and 18 ft. 6 inches in diameter estimated weight, 500,000 lbs. that of the great and useless bell at Moscow being 443,772 lbs. It is suspended a few inches from the ground, and has no tongue. Little attention seems to be paid to the kind or proportion of the metals used the materials being supplied by the multitudes who come to witness the casting during the time the process is going on. An eye-witness describing the casting at Mandalay March 1849 of a bell 17 ft. high and 4½ in circumference, to be used in the service of Quansan, says there were employed 40 furnaces, all containing crucibles, holding about 20 lbs. of metal each. These furnaces were supplied from a heap of charcoal, which, although diminishing, was still kept up by voluntary donations. An uninterrupted stream of men, women, and children, each with an offering either of gold, silver, copper or precious stones, were continually feeding the crucibles by casting in their gifts. We ourselves saw during the short time that we were present, about 70 precious stones, consisting of rubies, diamonds, sapphires, and emeralds, thrown into the crucibles, besides large quantities of gold and silver ornaments and coins. An interval of two or three minutes elapsed between the emptying of the crucibles and the whole smelting process occupied 14 hours. The commercial transactions of the Burmese are, individually on a small scale, although the aggregate is considerable. In the lower provinces, the internal traffic is conducted

chiefly by water conveyance in the hilly districts, by land communication the means of transport in the latter case, being carts drawn by oxen, and sometimes small horses. The lower provinces supply the higher with rice, salt, pickled and dried fish, and various foreign commodities from the different sea-ports the former receive in return petroleum, sulphate lico, paper, lacquer, wax, sugar, and all fabrics from, culley, brassware, calicoes, palm-sugar, castan, tamarind, &c. The foreign trade of the Burmese seacoast, is almost wholly concentrated in Rangoon (which see). From this point a considerable trade is carried on with Chittagong, Dacca, and Calcutta, in Bengal; Madras, Manipalpet, on the Coromandel coast; the Nicobar Islands, and Penang and occasionally with Bombay and the Persian and Arabian Gulfs. The principal articles of export are teak wood, castor oil, salt, lac, wax—was elephants teeth, raw cotton, opium, gold and silver. Of teak wood the quantity exported annually is equal to 7500 full-sized trees—Calcutta being the principal market for this article. Large quantities of raw cotton, of a superior quality are sent from Ava, to the city of Dacca, in the province of Bengal where it is wrought into the fine muslins of that place.

The principal imports are cotton piece goods, British Bengal and Madras British woollens, iron, steel, galvanized copper cordage, horse, sulphur gunpowder, sulphate, firearms, coarse porcelain, English glassware, opium, tobacco, cocones and areca nuts, sugar and spirits. The Burmese carry on a pretty extensive traffic besides through Bhamo as the entrepot with the Chinese of Yun-nan, from whom they receive copper ornaments, musk, silver vermilion, iron pans, brass ware, tin lead, silver, gold and gold leaf, earthenware, painted carpets, shawl, tea, honey, raw silk, velvet and other wrought silks, spirits, musk, vermillion, dry fruits, pepper, fans, umbrellas, shoes and wearing apparel giving in return for these, raw cotton, ornamented feathers, edible birds nests, ivory, rhinoceros and deer horns, sapphires, rubies &c. The quantity of raw cotton, sold annually to the Chinese merchants, averages about 14,000,000 lbs. The whole export and import trade with China has been estimated at £400,000 to £700,000 sterling. The only coins in circulation are of lead these being made of either copper, silver, gold or any other metal. Gold and silver however are used as mediums but always in the shape of ingots, which must be weighed on every occasion of exchange; they are also of different degrees of purity which must also be ascertained by the receiver. The pieces of silver used in trade are generally of a fixed weight, or of the value of 8½ d. Gold is reckoned about seventeen times the value of silver. The principal measure of capacity for rice is the basket 55½ lbs. *avropoids*; of length, the finger breadth, hand breadth, span, and cubit. The weights mostly in use are the taal about 1½ cunus, *avropoids* and the van, equal to 100 taals, or 8½ lbs.

Religion, Language, Education.—Excepting some of the barbarous mountaineers, the inhabitants of Burmah are half civilized and adhere to the Buddhist religion, worshipping Quansan, one of the incarnations of Buddha, whose images are generally of marble, though sometimes of bronze. The priests are numerous, bound to celibacy and eat but one day. There are monasteries, and both monks and nuns or priestesses, the latter generally old women, though some are young and at liberty to marry when they must quit the sisterhood. British and American missionaries, and all religious, are tolerated, but departure from the national religion is prohibited. To the priests is committed, exclusively, the charge of public instruction, and nearly every person learns the first elements. The two principal spoken idioms are Burman and Pagan but Pali is the language of religion and literature.

People, Manners, Customs, Dress.—The inhabitants of Burmah belong to a common stock the Indo-Chinese, and are divided into several tribes, none very numerous. The most important of these are the Burmese, occupying the middle part of the basin of the Irrawadi and the Pagans the lower basin the Shans, in the E. and N.E. provinces; the Khyens, spread over the centre of the country and the Karens, between the Rangoon and the Salween. Tartar and Tibetan tribes occupy the N. parts. Chinese slaves are numerous, and the mines are wrought by Chinese. The Burmese are short, stout, active, and well-proportioned; of dark brown colour, black, leak, coarse, abundant hair, said to be hardy,

double, industrious, lively fond of music and poetry but treacherous cunning, and avenging though hospitable and courteous to strangers feeding and lodging the traveller gratis. They are good mimics; and they love theatrical amusements, boxing, cock fighting, games of chance, and athletic exercises. The Burmese marry early and though polygamy is permitted, has only one wife, whom, with the other females of his family he compels to do all the work. Divorces by either party are easily arranged, and are exceedingly common. Among the common people, the principal part of the male dress, called a *Pu-ho* covers the loins, and reaches half way down the leg. It consists of a double piece of silk cotton, or a mixed fabric, about ten cubits long and is loosely wrapped round the body. Over this a flock, of white cotton cloth, in water quilted, called an *u-pu*, with sleeves is worn reaching below the knees, and tied in front. The head is covered with a small square handkerchief commonly of British hook-cashmere, or English or Madras printed handkerchiefs, worn like a turban but leaving the upper part of the head bare. In the lower classes of women wear only a single petticoat, called a *ta-ween*, more or less open in front, according to the condition of the wearer. The dresses of the better orders wear also an *u-pu* or flock, somewhat different in form and shorter than that of the men. They wear long hair but no head-dress. Bangles are frequently worn by both sexes and umbrellas are in general use being among the principal insignia of rank or office the colour indicating the quality of the possessor. A nobleman's dress consists of a long robe of flowered velvet or satin, reaching the ankles. A mantle or scarf thrown over this, hangs from the shoulders. On the head is a high velvet or silk cap, plain or embroidered, according to his rank. Females of the higher classes generally wear a loose jacket with tight sleeves. A piece of silk or cloth girdles the waist and descends to the feet. When they go abroad a silk sash crosses the bosom while the ends are thrown over the shoulders. The priests have the head closely shaved and uncovered and only protected by a small fan of palm-leaf. The colour of the dress of the priesthood is yellow and is held so sacred that it is forbidden to cut or else to wear it. Tobacco, already on the legs and lower parts of the body is smoked by the Burmese and some of the other tribes and the chewing of betel, and the smoking of tobacco, are universal. The houses are made of timber or bamboo and have thatched roofs and doors and windows of mat none are of stone or brick, the use of these materials being prohibited, except for pagodas, &c. Rice eaten with curry and masses of stewed onions, vegetables, &c. is the principal food. Oil made from sesamum seed, and Chili pepper are greatly used as seasoning. Animal food is eaten by those who can afford it, though the law forbids the taking of life.

Government, Laws, Revenue, Military Force.—The government is despotic the King is styled Lord of life and property his office is hereditary and he rules by a council, called *Lut-d'han* composed commonly of four officers, but sometimes of five or six, which exercises legislative, executive, and judicial functions, acting for the King whose name never appears. The laws are taken from the celebrated *Maint* or *Maint* code, and are, in many respects, distinguished for the wisdom of their provisions but the punishments, in general, are cruel. Justice is easily purchased. The only hereditary public officers are the *Sauwbas*, the tributary princes of the conquered provinces. The revenue is derived from a tax upon cultivated land fisheries mines petroleum wells, exports, &c. and the King's whole income probably does not exceed £250,000. Officers are paid by gifts of public lands, and not in money. There being no military code, and the standing army being small general levies of men are made in time of war. The troops have no regular pay but are maintained at the public expense. The main army is infantry but there is also a small body of cavalry and a flotilla of boats. Twenty two-headed swords named *Dia*, spears matchlocks, European muskets, &c. are their arms.

Divisions.—Burmah is divided into several provinces of which the most important are Ava Proper or *Mranma* Pye. In the centre of the kingdom Pegu or *Talaing* formerly an independent kingdom, which, with prov. *Bassan*, comprises the delta of the great and *Sittoung* Malaya-shan on the E. and Jo or Yo Pye on the W. Frontier and the country of the Shan to the N.

Calendar.—The Burmese year is divided into 12 months, of 29 and 30 days alternately rectified by an intercalation every third year. Each month is divided into an increasing and a waning moon. The week is divided into seven days; and time is kept by a kind of elegancy, consisting of a copper coin perforated at the bottom, and placed in a vase of water. The Burmese have four epochs but the one in common use commences with a D 639.

History.—The Buddhist religion was probably introduced into Burmah about the year A.C. 901. At that period, the government was permanently fixed at Prome, where it continued for 890 years during which there reigned 24 princes. After this, it was removed under a new dynasty to Pagan, where it continued for nearly 13 centuries, during which there reigned 85 princes. In A.D. 1300 the seat of government was established at Pinya, where it continued 56 years, under three successive princes. In 1384 it was removed to Ava where it continued for 869 years, and where in the 16th century Europeans first became acquainted with the Burmese. Towards the commencement of the 18th century the Burmese were conquered by the Peguans, a people whom they had overthrown and kept in subjection for nearly two centuries before. At this period arose *Alompra*, the founder of the present dynasty. After a reign of eight years *Alompra* was succeeded by his son *Uparaja*, who made Haguig his capital. *Uparaja* reigned three years only when he died, and was succeeded by his brother *Sambuen*, who removed the capital to Ava. In 1716, *Sambuen* was succeeded by his son *Sen Ka-ka* who, after a reign of five years was succeeded by *Paung ha-cha* who removed the seat of government to *Amaraapura*. After a reign of 88 years, *Paung Ka-cha* was succeeded (1819) by *Nu-un*, who removed the court once more to Ava, but that town having been almost entirely destroyed in 1839 by an earthquake, *Manohob* has become the seat of government. In 1837 *Nu-un* died, and was succeeded by his brother *Su-a wa*, to the exclusion of the proper heir.

The first English writer who notices the Burman dominions is *Ralph Fitch* a London merchant, who travelled in India towards the end of the 16th century. He expresses the countries especially the cities to have been then in a flourishing condition and the trade and shipping of the seaport towns to be very extensive. At the close of the 17th century the Governor of Madras, Mr. *Higginson* made certain friendly overtures to the King of Ava which were graciously received and in 1709 the Burman dominions were visited by Captain *Alexander Hamilton* who wrote a *New Account of the East Indies*. In 1767 the East India Company obtained a site for a factory and other advantages. Subsequent aggressions on the part of the Burmese, accompanied by insolence to our ambassadors led to hostilities, which terminated, in 1785, in the curtailment of the Burmese power and the establishment of British rule in the provinces of Arakan, *Yea Tay Margut*, and part of *Maribah*. Pop. (1818) 4,230,558, though estimated by some at 8,000,000.—(Crawford's *Embassy to the Deities of Jannaggy Japan, Indo China, as Captains 1850 Malabar's Travels in 1822* *Annals of the Indian Archipelago*, 1849.) and See *Survey*.

The town lies 87 m. N N W Norwich, on the

Burn within 8 m. of the sea, and has a good harbour. It consists of one principal street, with several smaller diverging from it, and is tolerably well supplied with water. The church situated about 1 m. from the village, is a neat Gothic structure. There are, besides, several chapels, belonging respectively to Baptists, Unitarians, Methodists and Anglicans. Schools—seven dame schools, one day-school for boys and two national schools. Considerable quantities of corn, hay and straw are shipped for London, &c. and oysters, the trade in which forms the chief support of the inhabitants, are exported to various quarters, including France, Holland, and Algiers. The chief imports are coals, oil-cake, and timber. Area of par 3047 ac. Pop (1851) 1741.—(Local Correspondent.)

BURNLEY, a market in England, co. Lancaster on a tongue of land formed by the confluence of the Burn and (older 21 m N Manchester. It comprises six principal streets, one or two of which are handsome, and lined with excellent shops all are well kept houses chiefly of a whitish-coloured freestone which abounds in the vicinity and well built lighted with gas, and abundantly supplied with water from springs in the neighbourhood. An old faxon cross which occupies the centre of an area, is an object of some interest. The church of St. Peter is an ancient building with a massive tower and pinn of bells but has undergone so many alterations, that scarcely any traces of its antiquity remain. Trinity Church and St. James's are both new edifices—the one in the Gothic, and the other in the Tudor style. There are, besides, a Wesleyan chapel a large and handsome structure two Independent, one Association Methodist, one Primitive Methodist, and chapels for Particular and General Baptists. The schools consist of a free grammar-school which has existed since the Reformation, four national schools, in a flourishing condition, a large infant school recently built independent and Wesleyan day schools, two R. Catholic schools, but only one commercial school of importance. A dispensary has recently been established, and there are a mechanics institution, a Wesleyan institution somewhat resembling the latter but more of a religious character and the Church of England literary institution the most flourishing of the kind in Burnley and for which a new and spacious building has been lately built, the most important one of the kind in the town. Cotton spinning and weaving and woollen spinning are carried on to a great extent, the former employing 1680 horse power and the latter 60 horse power. There are also cotton-mills employing 96 horse power a large cloth printing establishment, and several iron-foundries and machine shops. The Leeds and Liverpool Canal and the East Lancashire Railway both pass through the town which is also connected by a branch, with the Lancashire and Yorkshire Railway. Market every Monday six fairs annually (Pop. in 1841 18 30 in 1851 20,829.—(Local Correspondent.)

BURNSTALL, par Eng York W Riding 31 331 ac. Pop. 1279

BURNSTLAND a small seaport and par Scotland, Fife, N shore estuary of the Forth. The town is $7\frac{1}{2}$ m. N by W Edinburgh, in lat. 56° 4' N. lon. 3° 13' W. mostly on level but partly also on sloping ground, which rises to a considerable height behind it. consists of one long and spacious street, unencumbered, and well kept, a back street running parallel to the latter also tolerably clean and a number of diverging lanes and alleys. Some of the older houses in the main street are in the Flemish style, with their gables to the front but many of the more modern are handsome and commodious buildings and the town is every year improving as sea-bathing quarters and is lighted with gas. It has three churches—an Established U. Presbyterian, and Free church—the first a large edifice, in the old Dutch style a town hall a modern Gothic structure, with a handsome steeple several schools including burg school and Free church school two or three benevolent societies a reading-room, and scientific lecture association. The fisheries are considerable shipbuilding and distillation are carried on the latter to a great extent. The harbour is spacious, of great depth, and is easily access. Burnstland is the steam boat ferry station on the passage of the Edinburgh and Northern Railway. It unites with Kinghorn Dysart, and Kirkcaldy in sending a number in the House of Commons

BURTON-UPON-TRENT a market in and par England on Stafford, and partly in co Derby. The town is pleasantly situated 20 m E. Stafford in a fertile vale, L bank Trent, which is here crossed by a fine old bridge of 36 arches, 1845 ft long. The streets, several of which are of considerable extent, are well paved and lighted with gas water abundant. The places of worship are three churches all of them elegant and ornamental structures; and chapels belonging to General and Particular Baptists, Independents and Primitive and Wesleyan Methodists. There are besides a free grammar-school, for 500 boys a school for 500 children, several other schools, almshouses for 11 poor women, a dispensary a savings bank, a subscription library a news-room and a union workhouse. Milling, rope-making tanning and iron forging are carried on to a considerable extent but the chief business consists in the brewing of ale, for which the town has been long celebrated large quantities being sent, not only to London and other parts of England, but to India and China. The town is governed by a high steward, annually elected, and bailiff appointed by the Mayor of Anglesley. The bailiff who is a justice of peace, acts also as coroner. There is a weekly market on Thursday and six fairs are held annually. The Trent is navigable to Gainsborough, a distance of nearly 80 m from whence there is a branch to this place of the Grand Trunk Canal between the Trent and Mersey. The Birmingham and Derby Junction Railway has a station about half a mile W the town. In 1822 a battle was fought on the bridge at Burton, between Edward IV and the Earl of Lancaster in which the former obtained a decisive victory. Area of par 7730 ac. Pop 9769

BURTSCHIED or **BORCKETE**, a tn. Prussia and properly a suburb of Aix-la-Chapelle, with which it is connected by an avenue of trees, being not half a mile distant from it. It contains a townhouse, and three churches (two R Catholic and one Protestant) and carries on extensive manufactures, particularly of woollens and casementers. Its thermal springs, which rise in the hill immediately above the town are celebrated. Pop 5900

BURULDA or **JAIWAR**, a dist. Hindooistan S.W. coast, Googates principally between parallels 21 and 22 N. It is bounded N by the Bettacome, F by the Burulda hills, and W by the sea. It is generally flat of a light soil indifferently wooded, and in many places the water is brackish. Its chief town is Fortunder

BURUM or **BURUM**, a vil. Holland prov Friesland, 11 m S.E. Doornik and communicating with the Lauwer Zee. A large but quiet and sequestered village surrounded by a flat dry soil known by the name of Burumland. It has a handsome Reformed church, and a school. The people live wholly by raising corn and rearing cattle. Pop 1500

BURWANKEE, a tn. Hindooistan, Candahar, dist. of same name lat. 22° 4' N lon 74° 58' E. surrounded with a double wall. It has an extensive palace but is generally in a ruinous condition. The district extends along 1 bank, Nerbanda, and is about 85 m long by 45 broad but the greater part of it is covered with jungle.

BURWELL—1 A vil and par England on Cambridge, containing the united parishes of St. Andrew and St. Mary 4 m. Vol. I

N.W. by W Newmarket. It is composed chiefly of one long street and possesses a handsome Gothic church, the ruins of an ancient castle several schools and an Independent chapel area of par 7332 ac. Pop 2187—2 par Eng Lincoln 2180 ac. Pop 158

BURWHA a negro tn. Central Africa, kingdom, Barotsi, W bank, Lake Tshad, 80 m N.W. Koko, lat. 18° 58' N lon 13° 58' E. It covers an extent equal to 8 sq m and being surrounded by a wall 13 or 14 ft high fringed by a dry ditch may be considered with reference to the practices of war in that country a place of some strength. The town is entered by two gates, which are nearly E. and W. and are defended by two mounds of earth with perpendicular fronts. Each principal hut in the town has a little enclosure, with a cow or two and some goats and fowls 1 op. about 5000 or 6000

BURY—1 A bor. market in and par England, co Lancashire. The town, which is agreeably situated on rising ground between the Irwell and Roches, 6 m E. Bolton consists of three principal streets and a commodious market-place. It is abundantly supplied with water well lighted and has within the last few years been greatly improved. The parish church, which was rebuilt in 1776, is a substantial structure, with a beautiful tower and spire, which were erected in 1844. There are, besides three other churches, and chapels for Independents Primitive and New Connection Methodists, W. Wesleyans, Presbyterians, Baptists Unitarians and R Catholics the last a handsome Gothic building, with an elegant tower. There are several excellent schools, including a free grammar-school, and national schools, to the first of which are attached two scholarships of from £20 to £25 each to the colleges of St. John's, Cambridge, and Brasenose Oxford. There are also three news-rooms, a mechanics institution a subscription library a dispensary and savings bank. The woollen manufacture, which was introduced here in the reign of Edward III is still carried on to a great extent and forms the staple of the place. There are likewise numerous factories for spinning and weaving of cotton, together with iron foundries and paper-mills calico bleaching and printing dyeing and log-wood grinding are also carried on to a great extent. There are stations here belonging to the Liverpool Wigan, Bolton and Bury Railway the East Lancashire and the Bury and Heywood branch of the Manchester and Leeds Railway. By the Reform Act, Bury was constituted a borough, with the privilege of returning one member to the House of Commons. Registered electors (1849) 605. Its local affairs are under the jurisdiction of the county magistrates, who hold petty sessions twice a week. The weekly market is on Saturday and three fairs are held annually in March May and September. The late Sir Robert Peel was born at Gleanborough Hall, within the parish in 1788. Area of par 24,320 ac. Pop 70,148 of bor 81,282—(Local Correspondent)—2 par Huntingdon 1645 ac. Pop 414—3 par Sussex 5340 ac. Pop 569

BURY ST EDMUNDS, a tn. England, co Suffolk 26½ m. N.W. Ipswich on a slope, L bank,bourne or Lark) streets straight, at right angles, clean and well lighted water abundant houses (of brick) plain but generally well built. It has three churches, two of them fine old Gothic edifices seven chapels, two Independent two Baptist, a Wesleyan, a Unitarian, and a R. Catholic also a Friends meeting-house. Other public buildings are an hospital concert and assembly rooms theatre county-hall guildhall King Edward's school and jail. Public institutions—1 a free grammar commercial, and five other schools, an asylum for twelve poor persons an hospital admitting upwards of 1000 patients yearly 99 almshouses, and several minor charities mechanics and young men's institutions, archaeological society and public library soap and candle manufactured to a small extent.

The borough returns two members to the House of Commons, and its municipal government is vested in a mayor six aldermen, and 15 councillors. Bury St. Edmunds formerly had one of the largest and wealthiest abbeys in England. Of the many fine remains still existing, the gate built in 1377 62 ft high 50 long and 41 broad is one of the best specimens of early Gothic. In part of the abbey grounds is a beautiful garden, tastefully laid out. The Eastern Union Railway has a station here. Pop 18,900

BUSHET par Eng Hertford 3188 ac. Pop. 250

BUSHIRE [properly *Ala Okla*] the father of enna the principal subject of Irenaeus prov Fars, 1154 m W S Shiraz lat 26° 5' N lon 50° 50' 15' E (n) on a low sandy point running N W on the side of a bay N E coast, Persian Gulf. The town lies on the edge of a desert, in a triangular form, having the sea on two sides and fortified on the land side, by a high wall nearly 1 m in length flanked, at every 200 yards, by a round tower with loop-holes for musketry. It has seven mosques, a few hammams or baths, two caravanserais, and an Armenian church. A large palace, built by the late Qasim Khan, stands about the centre of the town. The houses are flat-roofed two stories high, and constructed chiefly of clay, or of a soft sandstone obtained from the ruins of Babelue, a decayed town 4 m. to the S. From a distance, Babelue has rather an imposing appearance the square minarets or wind chimneys, erected on the tops of a few of the principal houses, for conveying air into the interior during the hot weather appearing like so many minarets or towers. But on a near approach, the town is found to be a mean and dirty place with streets, as in most Eastern towns, more narrow and more crooked lanes from 6 to 8 ft. wide, half choked up with filth or mud, and infested with crowds of mangy dogs. The bazaar is large and well supplied. Fruit chiefly brought from Shiraz, may be obtained here all the year round. In the hot season water melons, grapes, peaches, plums, apricots, &c. are abundant as are also oranges, apples, pears, and pomegranates in the cold season with several kinds of dried fruit. The Shiraz is famous for the fineness of its pool try and the delicate flavour of its mutton. The sheep, which are brought from the interior are of a small breed, with uncommon tails.

Bushire carries on a considerable traffic with India its merchants, who are principally Armenians or Persians supplying the greater part of Persia with Indian and European goods, for which silk and bullion are the principal returns. From Bombay, Manipalman, and Bengal, it imports chintzes, woollen cloths, muslins, and piece goods with hardware and cutlery indigo, sugar rice pepper and other spices cloves &c. and from Europe, by way of India, English cotton yam, and other goods. Among the exports are Cashmere and Persian shawls, dials, and dried fruits; tobacco carpets, pearls Shiraz wines grain and wool with various drugs, dyestuffs and perfumes. As secure trade is carried on with Shiraz by means of caravans. The anchorage is indifferent but is the best on the coast. It consists of an outer road, exposed to the N W winds and a safe inner road, with 4 fathoms water nearly bottom, 2 m from the town. In 1831 the plague carried off more than a third of the inhabitants. Pop. (1835) estimated at 20,000. — (Comprehensive Notes of a Survey on

the S. Shores of the Persian Gulf in London Geo. Jour. 1840, page 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000

BUSKERUD a bail Norway prov Agderhusen aros, 4913 sq. m. It lies N of Bratsberg, W of Agderhusen bail wick, and E. of Bergenhus, and contains the towns of Drammen and Kongsberg. Pop. (1845) 86112.

BUSHIN THORPE, par Eng Leics 1006 sq. P 51

BUSBAHER a Sikh state in N India, under British protection, occupying a mountainous tract bounded on two sides by the Sutlej and Juma, stretching N. into the Himalayas cap. Bampur; lat 31° 30' N lon 77° 30' E. It contains some fertile well cultivated tracts, which produce grain and fruits in abundance. The main articles of traffic are sheep wool, cattle gins, opium, tobacco, and musk. Manufactures — blankets and woollen cloths for plaid, trousers, &c. Bampur has at all times carried on a considerable trade with Hindoostan and Tibet receiving from the former sugar cotton cloths iron and brass ware, and indigo in return for blankets, opium, tobacco and musk and exporting to the latter grain, gins, opium, tobacco, &c. in exchange for wool, silk, Chinese silks and tea. (add. See Sui.)

BUSHELTO (anc. *Burdeth*) a tn Italy duchy of and 20 m N N W Parma 1 bank Ogina, an affluent of the Po. It is tolerably built, surrounded by walls and contains a col legiate church, in which are some fine pictures another parish church a townhouse, Jesuits college, several schools, a palace, public library hospital theatre, and barracks. Manufactures — silk woollen and linen fabrics, cutlery and wax. Pop. 2200

BUSOLENGO a tn. Austria Italy gov. Venice, 9 m. W N W Verona near r bank Adige. It is rather well built contains two churches and six oratories, has some linen manufactures and is the centre of an important transit trade between E. Lombardy and the Tyrol. Pop. 5006

BUSBORAJI BAHARA BAHARA, BARRA, or BARRA a city Turkey in Asia, pash Bagdad and principal port of the Persian Gulf r bank Euphrates or Sebati of Arab (river of the Arabs) 70 m from its mouth and 44 below the junction of the Tigris, 270 m S. E. Bagdad lat 30° 27' 30" N lon. 47° 53' 12" E (n). It is about 5 m in length, 1 m in breadth and about 7 m in circumference, which, however, includes some corn fields and gardens of date-trees. The town contains about 6000 houses is ill built, the streets narrow unkept, and extremely filthy houses mostly constructed of sun-dried bricks, as is also the miserable wall by which the town is surrounded and in which there are five gates. The only buildings having an appearance of respectability are the King's harem the residence of the governor one or two of the principal mosques, and a few of the mansions of the wealthiest inhabitants. Busborah has a vast number of khans and coffee-houses with about 40 mosques; and is interested by a

canal, which, besides conveying goods to the city supplies the inhabitants with water for domestic purposes. Other two canals surround the town, forming a ditch to the fortification. The basars are wretched structures, but are, in general spacious and well stocked, particularly with fruits and vegetables. The Euphrates is tidal as far up as Basorah, and is navigable, to this point, for ships of 500 tons burden, but there is a bar at its mouth on which there is generally but 12 ft. water so that only during spring tides can vessels pass drawing more. Its current is about 3 m. per hour during the flowing, and 3 m. during the ebb tide. A few British ships from India visit Basorah annually but the principal trade is carried on by Arabian vessels. The chief articles of import are, muslin, spices, drugs, rice, sugar, indigo, silk, cotton yarn, dye-woods, coffee, &c. from India the returns for which are mostly made in the precious metals. Arabian horses, pearls, dates, copper, gall-nuts, raw silk, gold, brims, corals, gums, rose-water, dried fruits, &c. The horses from Basorah of which great numbers are exported to India annually are of extreme beauty and capable of enduring marches. Besides its shipping trade Basorah carries on an extensive traffic with Aleppo and Bagdad by means of caravans. The climate is said to be salubrious during winter and spring but is certainly very unhealthy in summer when the town is for months surrounded by water from the overflow of the Euphrates which, on its retirement, leaves marshes and ponds from whence stagnant waters the most noxious exhalations arise.

The country around Basorah is flat and fertile, more especially on the banks of the river in many respects, indeed it resembles Egypt, both in climate, fruitfulness and in the overflows of the great river to which much of its fertility is due. The cultivated grounds yield corn, dates, olives, pomegranates, vegetables, and goat herds. There is of all kinds about. There are besides, entire fields of rose grown for the distillation of the attar of roses, and for the manufacture of rose water. Basorah belongs to the Turks having been taken by them from the Arabs in 1837. It is governed by a wazir or lieutenant, in the name of the pasha of Bagdad Pop. 60,000.—(Cheneys's *Euphrates Expedition* Fontenay *Voyage dans l'Inde*.)

BUSSUM a vil. Holland prov. N. Holland 13 m. S. E. Amsterdam on a dry sandy soil which cultivation has clothed with useful crops. It has a small E. Catholic church, a Reformed chapel, and a school. Owing to the healthiness of the neighborhood, many handsome lodging-houses have been erected here for strangers. Besides agriculture the inhabitants are engaged in the making of ships, linen, soap, paint, linen fabrics, such as towelling, pack-sheet, bed-covers, and floor-cloths and in bleaching. Pop. 740.

BUSTARD BAY (see *Wastmore*) a n. and dist. Hindostan in the Deccan prov. Gundwana. The town is in lat. 18° 51' N. lon. 82° 25' E. 300 m. N. E. Hyderabad.—The river is difficult of access, and has a very insalubrious climate, and is occupied by a branch of the range of mountains that runs N. and S. parallel to the Bay of Bengal in the rear of Cuttack and due N. Caracra. Teak wood abounds here, and through the rivers Indowry and Golewery it is floated down to the Bay of Bengal but it is only of use sufficient for the construction of such vessels as navigate the Coromandel coast. Nearly the whole country consists of jungle hills, and of pastoral nurseries; the remainder is badly cultivated. The natives live almost in a state of nature, and are extremely ignorant and superstitious.

BUSTARD BAY a bay Australia, E. coast lat. 34° 4' S. lon. 151° 50' E. discovered by Capt. Cook, in 1770 and named by him from a species of bustard which he found there. The country around is dry and sandy but the hills are covered with trees, growing separately and without wood.

BUSTO-ARZIZIO a town and com. Austrian Italy gov. of, and 16 m. N. W. Milan cap. dist. of same name, in a fertile plain which produces much excellent wine. It contains two churches one of them an octagonal edifice with numerous statues and fine paintings by Daniel Oropia a native of the town and has manufactures of fusian and dumpy. The remains of ancient buildings found in the neighbourhood, show that Busto was formerly a place of considerable importance.—The district produces corn, wine, mulberry-trees, and

fodder but great part of it is barren heath. Pop. of town and com. 10,025 of dist. 29,842.

BUSLUK or **BONNOUR**, a town Russia, gov. of, and 150 m. W. N. W. Orenburg cap. dist. of same name 1 bank, Kamara. It is fortified, has straight regular streets, and contains two churches. It manufactures leather trades in wood and has an important annual fair. Pop. (1851) 4926.

BUSVAGAN an isl. Indian Archipelago, one of the Calamianes, a group of the Philippines, S. side of the Mindoro Strait lat. (W. point) 12° 3' N. lon. 120° 2' E. separated by a narrow strait from the island of Calamian, and having numerous small islets off its N. coast. It is about 50 m. long N. to W. and about 13 to broad mountains but fertile. Birds, deer, wild dogs, apes, and rats are very numerous, and commit great devastation on the cultivated lands.

BUTCHER'S ISLAND a small green isl. India, in the harbour of Bombay between the islands Coromandel and Salsette.

BUTOOMBE, see Eng. Somerset 923 as 1 op. 250.

BUTIF a co. Scotland, Frith of Clyde comprising the islands of Bute Arran Inchmarloch and the two Cumbros (which see) Pop. 16,608.

BUTIF an isl. Scotland W. coast of same name, at the mouth of the Frith of Clyde, the N. W. portion being detached into the mainland of Cowal, Argyshire from which it is separated by a narrow strait called the Kyle of Bute, and the S. E. stretching out into the open Frith between the promontory of Cantyre on the W. and the coast of Arran on the E. its centre is in about lat. 56° 50' N. lon. 5° 4' W. 40 m. W. Glasgow and 13 m. S. W. Greenock. Extensive length about 10 m. greatest breadth 5 m. Its coast line, which, exclusive of minute sinuosities, is about 35 m. in length, is indented by several bays and good natural harbours the principal of which are the bays of Relf easy Kildrattin Kames or Port Bannatyne on the E. and of Duggill Striveness, Scalpa, &c. N. N. W. and E. N. W. on the S. The island is so little that is called romantic scenery to boast of but is distinguished in many parts for its quiet picturesque beauty besides commanding although it does not in itself possess some of the most magnificent views in Scotland, especially towards the Kyles. It has no remarkable elevations its highest summit, Kames Hill being only 875 ft. high but it has several pretty little lakes, the principal and most beautiful of which is Loch Fadh, 2½ m. long by a quarter of a mile in breadth on the banks of which is the favourite villa of the late celebrated tragedian Edmund Kean. The other lakes next in extent are Azeog and Stack. All the three lakes have water less than half a mile of each other. Bute is naturally and geologically divided into four distinct portions. The Garraich Head forming the extreme S. portion is rugged and hilly and is composed almost entirely of trap rocks proceeding N. the next division between Highland Bay and Rothbury Bay on the W. and Scalpa Bay on the E. is composed with slight exceptions, of sandstone the third portion extending from Scalpa Bay to Fitzroy Bay consists of chlorite slate and the fourth and last division between Fitzroy Bay and the Kyle of Bute, of micaceous schist. Lime, coal and slate are found in the island but they are all of inferior quality. The climate of Bute is so remarkable for salubrity as to have obtained for the island the appellation of the Montpellier of Scotland. It is on this account much resorted to by invalids.

Agriculture is in an advanced state, and is yearly improving. A complete system of drainage has been introduced and the most approved rotation in crops is observed. The more recently built farm houses are neat and commodious, and the grounds generally well enclosed chiefly with thorn hedges. There are 10,241 acres under cultivation. Average yearly rent of land about 18s. 6d. per acre. Great attention is paid to the dairy and the sheeps made use of of excellent quality. The cows are all of the Ayrshire breed. The agricultural interests of the island have been greatly promoted by the Bute farmers society which grants yearly premiums for the best ploughing for the best cattle, sheeps, butter, roots, &c. and for the encouragement of cleanliness among the cottagers. The sea-coast abounds with fish, including salmon, cod, haddock, whiting, &c. The means of education are ample, there being many well-conducted schools throughout the island. The consequence is, that there is scarcely a native inhabitant above 15 years of age who cannot read and write.

The island was long a favourite resort of the Kings of

Scotland, who resided in their Castle of Rothsay (which was) now a stately and interesting ruin. Bute gives the Scotch title of Earl and the British title of Marquis to a branch of the family of Stewart descended from a younger son of Robert II. Mount Stuart, the family seat, is beautifully situated, 4 m. from Rothesay. The Marquis of Bute is principal proprietor & 2000 souls of the island belong his property. Pop. 6860.

BUTERA a t. Sicily prov. of and 21 m. S. S. E. Calamatta, near a bank Mofra. Pop. 4081.

BUTI a t. Tasmania, of and 9 m. E. Pies, in a narrow dell of the same name, formed by a spur from the E. side of Mount Plesno, and traversed by a rapid mountain torrent an affluent of Lake Beaufort. It is surrounded by a castle, and contains a parish church. The climate is cold and moist, and the ground not favourable to cultivation. Still, by industry it yields excellent oilives from which is obtained the best oil in Tasmania. Pop. 4091.

BUTLEIGH par Eng. Somerset 446 ac. 10 p. 1015.

BUTLEES-MARSH par Eng. Warwick 1820 ac. Pop. 284.

BUTLEY par Eng. Suffolk 1941 ac. 10 p. 85.
BUTLOW a t. in Prussia, Pomerania a gov. of and 50 m. E. Berlin, on the Buttow, a valley surrounded by hills of considerable elevation with three churches, woolen and linen manufactures, and a wool fair. A height in the neighbourhood is crowned with the ruins of an old castle. Pop. 2150.

BUTRINTO a fortified town, in lat. Turkey in Europe Albania, 15 m. R. W. Delvino opposite the island of Corfu. The town is in lat. 38° 44' N. lon. 20° 2' E. Shallow water extends all across the head of the bay but in the middle large ships find good anchorage with 20 fathoms water. The town is fortified, and is the residence of a Greek bishop. In its vicinity are the ruins of the *Epistretum* of the ancients. Pop. 2000.

BUTSCHOWITZ, a market in Austria Moravia, circle of and 9 m. S. E. S. E. Delitz, on the Letaava. It contains a large and strong castle belonging to Prince Liechtenstein, and has woolen and linen manufactures particularly one of cassimere. Pop. 4000.

BUTTSFISH par Eng. Devon 49 ac. 10 p. 160.

BUTTERLEY a hamlet England co. Derby 3 m. N. Alfreton. It is the seat of extensive ironworks. In the neighbourhood is a large reservoir for supplying the Nottingham Canal.

BUTTERMARK, par Eng. Wilt 1502 ac. Pop. 194.

BUTTERWICK par Eng. Lincoln 4420 ac. Pop. 624.

BUTTER a vil and par Switzerland can. of and 19 m. N. W. Neuchâtel in a valley so narrow and hemmed in by mountains that from part of the village the sun is not visible during three winter months. The *Fayres Grotto*, in the vicinity is one of the most remarkable in Switzerland. A great number of the inhabitants are clock and watch makers. Pop. 10664.

BUTTVANT a t. and par Ireland on Cork. The town stands on the Awbeg 23 m. N. W. Cork. Having been the seat of a number of opulent monastic communities it was at one time a place of considerable importance, but has now fallen into utter decay. The houses are of the baseliest description, intermingled with the ruins of churches and monasteries. The town contains extensive barracks for infantry a fever hospital, a dispensary and two R. Catholic chapels. A little to the E. is the castle of Buttvant on a high rock, overhanging the Awbeg. Spenser the poet, resided in the vicinity and there, it is said wrote the *Rory Oreen*. Buttvant gave the title of Viscount in the Irish peerage to the Buttvant family. Fairs were held on March 27 and October 14. Pop. of in 1524. Area of par, including Ballyvaughan 11 508 ac. Pop. 3385.

BUTTINGTON par N. Wales, Montgomery P. 610.

BUTTSCHOLZ a vil and par Switzerland can. of, and 11 m. N. W. Luzern, on a tributary of the Wiggen and remarkable for a mound in its vicinity called the *Engländer-burg* or English burrow from containing the bones of 8000 Englishmen. Oliver Cromwell's family Fairs were held on Edward III. and Duke of Bedford, who, having a feud with Leopold of Austria, was devastating the Swiss cantons, when this peasants attacked and defeated him. Pop. 1768.

BUTTSCHOLZ, par Eng. Sussex 810 ac. Pop. 55.
BUTTON NESS, a prominent headland, Scotland can. Forfar. It aids the entrance into the Firth of Try. lat. 56° 28' N. lon. 2° 40' W. There are two lighthouses here, with bright fixed lights, on separate towers.

BUTTSBURY par Eng. Essex 2118 ac. 10 p. 506.

BUTTSBURY a t. in Saxo-Wesimar co. hall. of same name, 11 m. N. W. E. Wesimar. It contains a handsome church, and five schools. has manufactures of woolens and horses; also a potash-works, and mills and five large fairs, chiefly for horses. Pop. 2164. The *Wesimar*, area, 43 geo. sq. m., contains three towns and 20 villages. Pop. 18,500.

BUTTA, a vil Switzerland, cant. Argau, 7 m. N. Aarau.

BUTTA, a vil Switzerland.

BUTZOW a town Mecklenburg-Schwerin, on the Marow and in the neighbourhood of a lake. It is walled, and well built. The town church, built in 1279, has some fine wood carvings and the *Marow* church is the only one of that denomination in the duchy. Butzow has a paper-mill, worked by steam and numerous manufactures—linen cloth, soap, and candles, playing cards, straw hats and shoes. It has also numerous breweries, and a stone quarry. The town owes much of its prosperity to the earlier settlers from France by the persecutions of the 17th century. Pop. 3694.

BUTZOW a t. in Spain Old Castile prov. of and 20 m. N. F. Burgos in a plain, 1 bat. K. Oca. It has clean, paved, and spacious streets two squares, two churches, of which the collegiate one is a beautiful edifice containing some fine sculptures two well-attended schools, a townhall prison, hospital public storerooms two fountains, and a cemetery. Cattle-rearing and agriculture are the chief employments. In 1585 Juan I. at the instance of John of Austria gave his son the title of Prince of the Asturias. Pop. 2064.—Madrid.

BUTZOW a vil Hesse-Darmstadt, gov. Kasselberg, 20 m. N. W. Frankfurt on the Main. It is walled, and has two parish churches, and an old castle, now used as barracks. Its chief manufactures are horse leather and looks. It has seven annual fairs. Pop. 2300.

BUXAR (Buxana) a fortified town Hindostan prov. Bahar a bank Ganges here 1 m. broad 60 m. N. N. E. Benares lat. 25° 28' N. lon. 83° 57' E. Its rather large houses of the usual character in India, mud and thatched with a few good lungalos inhabited by Europeans. The small fort is built on an eminence near the river and is surrounded by a broad deep ditch. It is kept in good repair and garrisoned by sepoy. The Mogul chiefs, Mughal and Dowlah and Cossim Khan were encamped here with an army composed of 40 000 men, when, on October 23 1764 they were attacked and completely routed, by 856 European and 6215 native troops under Major Munro.

BUXHALL, par Eng. Suffolk 2120 ac. Pop. 560.

BUXTEHUDE a t. in Hanover duchy of Bremen, dist. Stade, 12 m. S. W. Hamburg a bank, Elbe about 1 m. above its junction with the Bill. It has walls, with several gates and its houses though indifferently built, are lofty. It is the seat of a civil and criminal court and contains a gymnasium a handsome parish church, a townhall and courthouse. Its chief manufactures are w. of iron, soap, candles, wax, starch, calico and tobacco. It has also oil and tan mills, and linen exports—timber oak bark, honey and wax, and has several annual fairs. Some of the inhabitants are employed in fishing. Pop. 2223.

BUXTON—1 A t. and fashionable watering-place, England co. of, and 29 m. N. W. Derby in a deep hollow surrounded by hills. It has two principal streets, straight, clean, and lighted with gas several handsome ranges of houses, and a fine crescent, all of stone, two churches, and Wesleyan, Independent, and Presbyterian chapels two schools (one endowed) and a bath charity. The accommodation for visitors, who come to drink the waters and amount to many thousands annually is very complete excellent hotels and lodging houses baths, assembly rooms, and pump-rooms. Buxton in June. The vicinity abounds in fine scenery and there is a vast stalactite cavern, called *Pool a Hole*, adjacent. Public walks provided by the Duke of Devonshire, 14 acres in extent. Pop. 1284.—(Local Correspondent)—12 per Norfolk 1274 ac. Pop. 569.

BUZANÇAIS, a tn. France dep Indre 14 m. N W Chateauroux, r bank, Indre, here crossed by five bridges. The town is finely situated on an alluvial and in a beautiful district, but the streets are narrow, dark, and crooked, and the houses indifferent. It has manufactures of woollen goods, a worsted and some extensive flour mills, and trades in wool and leather. There are ironworks in the neighbourhood. Pop. 8189.

BUZEN a prov Japan in N of Isl. Kiu-sin, and separated from Nippon by the Strait of Van der Capellen, here scarcely 1 m. across. It is bounded N by the sea and at the other points by the provs of Takusan and Bango is in the form of a fan. The between lat. 33° 25' and 34° N. lon. 150° 40' and 181° 25' E and comprises 23 islands all unimportant. The principal mountains are—Fikusan Obotaka Kusan Toman, Mikumayama, Kawarajama, Furokajama, and Kurokage. The mountain-chains of three adjacent provs converge at the S. border of Buzen, thence traversing the provs of Bango, in an E. direction to the shores of the sea. The principal valley is that of Sakagawa, besides which there are those of Sawa gawa, Wogawa, Ugawa, Takasagawa, and Murasagawa. The rivers bearing the four last-named names take their rise in Fikusan, and fall into the sea at Nakatani Creek between the point Hajikoma and Cape Nagasaki. The cap. of Buzen is Kokura. Dairi Takura, Matsuyama, Kanda, Ima, Bita, and Nakata, are excellent ports. Buzen is extremely fertile principal products—wheat, barley, buckwheat, silk, wax and honey. Charcoal is made copper and iron are found. At Kokura there is a manufactory of cottons of superior quality and a syrup, called *one*, is made from wheat. Buzen is divided into eight districts and has 54 towns, villages, and ports. Two of the towns are fortified.

BUZARDH BAY U. States, N. coast, Massachusetts, opposite Barnstable Bay lat. 41° 25' to 41° 42' N. lon. 70° 55' to 71° 10' W. It is 30 m. long and 7 broad, and separated from Cape Cod Bay by an isthmus only 5 m. across.

BYAM MARTIN—1 An isl. Arctic Ocean one of the N. Georgian group lat. 7° N. lon. 104° 8' W. (n) between Melville and Bathurst Islands. Discovered by Parry 1819-20.—2 An isl. S. C

FOR ARTICLES not found in C look K, S, T, or Z

CAACATY an Indian vil. state of and 77 m. E by S to the N. of Corrientes republic of La Plata. It lies in the Malaya marsh and its houses are low small and each furnished with a gallery on either side. Caacaty means striking wood, a name derived from the odour of a wood in the vicinity. Pop. 800

CABAHUBI a river Brazil, a tributary of the Rio Negro, formed by the junction of the Matanza and Bara, which unite at lat. 1° 25' N. lon. 66° 15' W. From this point, the river pursues a S. course for 120 m. and falls into the Rio Negro at lat. 0° 10' S. lon. 66° 30' W.

CABAGAN a tn. Isl. Luzon, prov Cagayan it is the second largest town in the prov. containing a pop. of 11 135.

CABALABA, a river Dutch Guinea, a tributary of the Corantyn which it joins about lat. 5° N. lon. 57° 3' W. It is about 100 yards wide at its mouth but is broader 6 m. higher up. It is extremely winding in its course, and its water is of an ochraceous colour. The banks exhibit all the luxuriance of a rich soil and the wild Aracete grows plentifully along its margin, with the splendid flowers of the *Osmanthe* (Colony) towering over them. About 17 m. above its junction with the Corantyn, a cascade occurs of 30 ft. in height, called,

by the Indians, *Iddi* or *Iddi Falls*. Here blocks of a fine-grained whitish sandstone are found which are used by the Indians as gravestones, and are of excellent quality. The Cabalaba is frequently visited by the Maroons on fishing expeditions.—Schomburgk.)

CABANES a tn. Spain Valencia prov of and 14 m. N. by E Castellon-de-la-Plana. The streets are well built and regular and the town possesses a handsome parish church two schools a townhall and a prison. Domestic weaving distilling brandy expressing oil, and husbandry employ the inhabitants. Some trade is carried on in grain, fruits, cattle, &c. Pop. 1816

CABAPUANA (called also, erroneously *Campuzan*, *Reynolds* and *Mariboca*) a river Brazil prov Espirito Santo. It rises in the N. slopes of the serras de Pico flows S. E. and falls into the Atlantic in lat. 21° 20' S. after a direct course of 80 m. of which about 80 m. are navigable for canoes. A kind of bay is formed at its mouth in which there is another 7 to 8 fathoms water.

CABEÇO DE VIDE, a tn. and par Portugal prov Alem-tago dist. Foz de Azeite, at a height, 37 m. N. N. W. Evora. It contains a church, two hospitals, and a poorhouse. Pop. 1843.

CABELLO (Pezumbo) a considerable seaport in Venezuela, on the Caribbean Sea lat 10° 30' N lon 68° 5' W. It has a good harbour and a large trade, but is in a very unhealthy situation and has a pop. of only 3000.

CABRITI (SE DA TI) LA a bay Brazil prov Maranhão. It is about 5 m square and is interspersed with islands and sandbanks, rendering it difficult of access. It is intersected by lat 5° 40' N.

CALINDA or **KALINDA** a seaport in Africa, Lower Guinea, cap. of the Eni Goro or Angway territory on the Atlantic about 40 m. N. of the mouth of the Zaire lat 5° 35' S. lon. 1° 40' E. on the side of a hill which is of a conical form, and clothed to the top with fine timber. The anchorage here is good, and there was long a considerable trade in slaves, ivory, wax, and honey. The territory around is fertile, and the whole district is justly regarded as the finest on this coast.

CALERA, or **KALERA**.—1. A town and port (anc. Tiopego) N. Africa, regency Tunis. The town stands at the foot of the mountains called Jebel Menara, in a low situation on a bank of the sea lat 33° 45' N lon. 10° E. It has some export trade in dates and berries, the latter for drug.—2. The Gulf of Calera (Golfo de Calera) at the head of which the town is situated lies between the islands of Kerkenna and Jerba.

CABESA DEL ESTE in Spain Extremadura prov. Ba. lujos, 40 m. N. E. of the town on the N. slope of the Sierra de Pericor. It is tolerably built and possesses two parish churches, several chapels, a townhall, two schools, a small damp prison, hospital, public storeroom, and three fountains. The inhabitants manufacture serge, lease cloth, linen, fabrics, shoes, and bridle, and carry on some trade in grain, cattle, and manufactured goods. P. p. 539.

CABEZAL (or **CAZAL**) in Spain Andalusia, prov. of Cordova, 24 m. S. W. of the city of Cordova. It has steep, irregular and ill-paved streets, two small squares, a parish church, three chapels, two schools, a townhouse, small prison, asylum for destitute poor, and an extensive and substantial storeroom. Limited trade in wine, cattle, and agricultural produce. Pop. 421.

CABEZON DE LA in Spain, prov. of Cordova, 24 m. W. of the city of Cordova. It has steep streets, two squares, a parish church, townhall, two schools, prison, cemetery, and several fountains. The inhabitants are engaged in weaving, refining salt, and in husbandry. An annual fair is held on the 16th of April. Pop. 2047. Several other small towns in Spain have the same name.

CABEZULTA in Spain, Extremadura, prov. Caceres, 16 m. N. E. of Plasencia. It has a town. The streets are clean and paved, and the town possesses a church, townhouse, two schools, and a prison. The people are chiefly engaged in silk spinning, expressing oil, and tillage. They also trade in grain, wine, fruit, and cattle. Pop. 2328.

CABO in Brazil, a cape Brazilian Guinea lat 1° 31' N lon 50° 10' W. It is the E. point of the marshy island of Goelbo, formed in the delta of the river Amazon. **CABO FRIJO** an ancient town and port Brazil prov. of Rio de Janeiro, and about 8 m. N. W. of the cape of same name. It is composed of two parts, the most considerable called Passagem, lies on the mainland while the principal part of the town lies on a kind of island. Between the two parts, which are united by a stone bridge, flows a canal connecting the neighbouring lake—Araxama—with the sea. The streets are broad, but cracked; the principal part of the houses are built of earth, and the most noteworthy edifices are the town hall, with the prison underneath, a convent, a parish, and two other churches. Cabo Frio has a Latin school, one of philosophy and several other schools, and its climate is unhealthy, agues being frequent. The bay and port are well protected. Coffee, sugar, and building

timber are exported to Rio de Janeiro, whence, in return, are brought jerked beef, salt fish, and general stores. Pop. 3500.—The cape is in lat. 23° 18' S. lon. 41° 58' 15' W. (n).

CABOOL (KABOOL) or **AFGHANISTAN**. **CABOOL**, a prov. in the N. E. of Afghanistan extending N. to S. from the Hindu Kush to Ghaznee and W. to E. from Damian to the Aktyher Mountains. It is about 300 m. in length E. to W. and 160 in breadth, area, about 10,000 sq. m. Its principal towns are Cabool (the capital), Istah, Ghaznee, and Kandahar.

CABOOL, **CABOOL**, or **KABOOL**, a city Afghanistan cap. of the above prov. at the W. extremity of a fine and spacious plain on the E. bank of the Cabool river, immediately above its confluence with the Logur, 6000 ft. above the sea lat. 34° 30' N lon 69° 10' E. The city is about 5 m. in circuit, and is defended merely by a line of weak ramparts, incapable of successfully resisting the attack of an enemy although formerly surrounded by a strong wall of burnt bricks and mud. Its length E. to W. is a little upwards of 3 m. and its breadth at the widest part about 1900 yards. The houses are built slightly and indifferently built, generally of mud and unburnt bricks. They are mostly two or three stories in height, with flat roofs, made of boards, coated with mud, and surrounded by a coarse framework of wood and having the windows, notwithstanding the severity of the weather in winter unplastered, and closed merely by lattices or shutters. The houses of the wealthy classes have extensive courts and gardens, ornamented with fountains. Few of the houses of Cabool have chimneys, the centre of the room being held the proper place for the fire, although in some of the better dwellings there are special winter apartments heated by stoves. The streets are, in general, extremely narrow in many cases so contracted that two horsemen

THE RALA WUZAR, CABOOL.—From the Palace of the Shah.

cannot pass each other. They are paved with stones, but the pavement is much neglected, and in winter they are rendered almost impassable by the accumulations of snow thrown from the roofs of the houses, and never removed till it dissolves, when a mixture of snow and mud keeps the streets for a long time in a miserable condition. There are no public buildings of any note in the city; even the places of worship are very ordinary looking buildings, although many are spacious and commodious. There is but one madrasah or college, and it has neither endowments nor scholars. Serais or caravanserais, and baths are numerous, but the former are elegant and inconvenient, and the latter disgusting filth. There are two principal bazars, running nearly parallel to each other one of which is three-quarters of a mile in length. But the most magnificent resort of this kind in Cabool, constructed by Ali Muztan Khan, was destroyed by the British in 1843. It is said to have been one of the most splendid structures of the kind in the East, consisting of a series of covered arcades and open areas, and was highly embellished with paintings, and provided with wells and fountains. No-

fore the shops in the bazars are a kind of counters, on which the shopmen sit with wares displayed. The manufacturers of Cabool are trifling and are confined chiefly to iron, leather and the weaving of cotton, and shawl in imitation of Cashmere, the principal export of the town being derived from a considerable transit trade. The artisans, generally, are but inferior, only skilled in their trades. In Cabool the several descriptions of traders and artisans congregate, as is usual in Eastern cities, and together are found the shops of drapers, saddlers, braders, ironmongers, armourers, bookbinders, vendors of shoes &c. But besides the shopkeepers, or fixed tradesmen there are vast numbers of itinerant traders who parade the bazars, and it is probable, says Masson, that the cries of this city equal in variety those of London. Many of them are identical, and the old clothes-man of the British metropolis is perfectly represented by the Moghat of Cabool. Besides the bazars, there are several market-places in the town. These are the cattle-market on the N side of the river where sales of all sorts of animals are effected daily the grain-markets of which there are two, and the fruit-market into which large quantities of the finest, the most beautiful, and the most various fruits are daily poured to be afterwards dispersed amongst the retail vendors of the city. There are likewise markets for wood and charcoal. Water is abundant; the S part of the city being supplied by a canal from the river and the other parts by numerous wells. Cabool is divided into districts, and these are subdivided into sects, each well enclosed and accessible only by small gates, which are walled up in time of siege or intestine war and thus each section becomes a fortress. On the S E side of the city but connected with it by streets and lanes stands the Bala Hisar on the acclivity of a hill, a fortified residence of the Sovereign. It is about half a mile long and a quarter broad enclosed by lofty stone walls strengthened at intervals by towers and the whole surrounded by a broad stagnant moat. W of this district is a town containing nearly 1000 houses, and a good bazar. The royal palace, which occupies the summit of the hill has a sombre external appearance but commands several beautiful views, particularly towards the N where the distant snowy masses of the Hindoo Koosh terminate the prospect. It is substantially constructed and contains several suites of apartments, one commodious and magnificent alone. In the S W quarter of the town is a strongly fortified district called Chandel inhabited by Kurudheshes, or Peshawars, to the number of 10 000 or 12 000. Pushtoo is the vernacular dialect of Cabool, but is spoken for the most part, by the lower classes only the higher orders speaking Persian. The people of Cabool are generally tall with dark black eyes and marked features. The women are said to have both beauty of face and elegance of form, but they are rarely seen abroad and when they do appear out of doors, they are so enveloped in a peculiar dress called the *hoor*, that neither feature nor form are distinguishable. In fine weather the men live much abroad but in winter all who can afford to remain within doors do so during the whole season. As Cabool stands at an elevation of 6398 ft above the sea the winters are very severe setting in at the beginning of October and continuing to the end of March. In summer again the heat is considerable, the thermometer in the shade at noon being found to range on different days in August, from 91 to 75. During the summer and autumnal months, but chiefly during the latter the city is visited every evening by a black bird or whistling, somewhat impetuous, but of short duration. Attached to the city are several places of burial, the larger without the walls which, in general, much resemble European localities of similar character. In summer from the influx of merchants and people from all parts of the country the city is densely inhabited and the streets and bazars crowded with strangers. The general appearance of Cabool is by no means particularly attractive, but the circumstances in part compensated by the singular beauty of the surrounding country composed of delightful gardens, orchards, and groves. In 1839 Cabool was taken possession of by a British army which in 1842 was entirely annihilated by the perfidy of the Afghans, one man only out of 8849 soldiers and 12 000 camp followers, having escaped. It was however recaptured in the same year by the British, when the treasury of the Afghans was simply avenged. Pop. about 60,000. CABOOL RN per Eng Lincoln 2860 sa. Pop 166.

CABRA, or KARRA, a tn. N W Africa, Sweden 5 m. S. Timbuctoo, 1 bank, Niger lat. 17 N lon 2 59 W Pop about 1200.

CABRA [anc. *Agobara*] a tn. Spain, Andalusia prov of and 29 m S S E Cordova, in a valley almost surrounded by mountains. It has walls and, with few exceptions, steep and paved streets, a large irregular but imposing-looking square, with four smaller ones two large and handsome parish churches containing fine monuments and pictures and numerous conventual churches a richly endowed college Latin manual and many other schools an hospital, poor-house and orphan asylum, united in a Dominican convent a theatre, town and court houses, prison and on the W over looking all an ancient castle and palace of the Dukes of Soma within whose ruined walls is an extensive cemetery. Manufactures—lunen fabrics soap, knit cloth, earthenware, hand ware, lime, and gypsum. There are also brassy distilleries, dyeworks, tanneries, stone and marble works, and oil-mills. Trade—iron timber manufactured goods rice, paper silk and potatoes. An annual fair is held for cattle, grain and general merchandise. Pop 8673.—(Madrid)

CABRA DEL BAYTO QUINTO a tn Spain Andalusia, prov of and 28 m S E Jaen on the R. de pe of the sacra Granada. It possesses a square several wide straight well paved streets, a parish church, townhall two schools, a prison, public star-house, and cemetery. The inhabitants are chiefly engaged in domestic weaving exporting oil and habundary 100 3000

CABRAS, a v l m Sardinia, prov Sassari 9 m W N W Oristano, on a lagoon which furnishes the best fish in the island. Corn, wine and excellent ravens are produced in the neighbourhood. Pop 2800

CABRERA an isl. river. See KAHNERA

CABRI RA, an isl. belonging to Spain in the Mediterranean, one of the Balearic group, 10 m S W by S. Capo Salina, in Majorca lat 33° 7' 50" N lon 3 E 33 in length S W to N E and 23 in breadth. It is mountainous and rugged, the hills are covered with pine box, &c. The only buildings are the old castle inhabited by a governor a captain, surgeon, and 14 men, detached from Palma as a garrison with a few household servants.

CABRILLAS, a river Spain, which rises near the source of the Tagus and the Júcar in the sacra Molina New Castile and pursuing a circuitous S course of about 130 n during which the only tributary of any consequence which it receives is the Moya, on a l bank it joins a l bank, Júcar near the borders of Valencia.

CABUL See CANOOL

CAÇATEIRA a tn. Brazil, prov São Paulo 70 m N W Fardo with a church and school. The inhabitants are of city Indians, engaged in raising cattle, which they sell in the province of São Paulo. Pop 40 and dist. 2000

CACCAMO a tn Sicily dist. Termini 18 m W Palermo Pop. 6394

CACAYONT a tn Cayles, prov Bañizo 5 m. S W Agaña. It has three churches, and a house of refuge. Good wine is produced in the neighbourhood. Pop. 2247

CACUERI a vil Naples prov Principato Ultra 12 dist of and 20 m N W Corroone. It stands on a sandy knoll and contains a handsome collegiate and two other churches, a Dominican convent, and two outside of walls. Rock salt is mined in the neighbourhood. Pop. 83.

CACERES a prov Spain, Estremadura cap Cáceres, bounded N by prov Salamanca E by Avila, Toledo and Ciudad Real S by Badajoz and W by the kingdom of Portugal area, 10 017 sq m. It belongs wholly to the basin of the Tagus which river intersecting the prov E to W divides it into two nearly equal portions both mountainous but that to the N the more rugged of the two. Slate iron and lead, suitable to exist, but are much neglected. The mountains yield pine oak, beech chestnut, and other useful timbers and the extensive and well-watered plains and valleys are naturally fertile though little attended to by the agriculturist. The inhabitants, comparatively few in number are chiefly engaged in raising merino sheep and swine, for which the rich pastures and the plentiful supply of mast, renders the province well-adapted. Honey and wax are gathered to a considerable extent, though bee-culture is little

produces being usually obtained from wild bees. Manufactures are confined to a principal town and the only trade is in wool and iron much retarded by miserable roads. Education is at a low ebb even the schools in the towns being inefficiently conducted. The people are honest, kind-hearted, and when roused energetic and persevering. Cortes, and the two Piaros, were natives of this province. Pop. 208,000. — (Mader).

CACHOCHA. 1. A lake (see Cacha-Cacha) Spain. Keta-madura, cap. of Alore prov. 34 m. W. by N. Truzillo, an elk and old ground. It is divided into two parts, called the old and the new towns. The old town occupies the top of the hill, and is surrounded by a strong wall defended by towers and having five gates. The new town is built round the old and forms the larger and more important portion of the two. The houses are, in general, tolerably well constructed. The streets are steep, and with few exceptions narrow and ill paved. Its principal square is lined with good houses, shops, and public buildings, and in the centre is a handsome plaza or promenade. There are seven other squares, but all small. The public edifices are four parish churches, a townhouse, a session house, four hospitals, two prisons, a theatre, university normal, and several other schools besides which there are a Jesuit college, of great celebrity some convicts, one of which is now used as a barrack. An episcopal palace, one belonging to the counts of Torre Mayorca, an elevator or castle of the ancient rulers of Cacha, and the largest ball ring in Spain. Linen, cloth, hats, leather, ropes, soap, earthenware, wine and oil are manufactured. Many of the inhabitants are also engaged in dyeing, washing wool, tilling, and so forth. Considerable trade is carried on in cattle, pigs, and lucas, lacoon, merino-wool, manufactured goods, &c. An annual cattle-fair is held in April. Pop. 1,001. — (Mader).

— 2. Cacha (Cacha) in Philippines lat. 13° 40' N. lon. 123° 25' E. lies on the river Naga, or Santa Cruz, which flows occasionally. A to the Bay of San Miguel distant from Cacha about 70 m. It is the seat of the bishop of the province is regularly built and the governor's house is elegant. Pop. 12,400. — (Mader).

CACHAO KE-CHO or KACHAO a large city, Laos, cap. Tonquin, on bank of the 90 m. W. of the Gulf of Tonquin 335 m. N. W. Hae lat. 21° N. lon. 105° 33' E. The principal streets are broad and paved with brick or pebbles. In the centre an unpaired passage is left for the elephants and beasts of burden. Most of the houses are of mud or wood some of brick and stone all are covered with leaves, straw or reeds. The ancient royal palace was of vast extent, as appears from its ruins. Its trade is now considerable and there were here formerly French, Dutch and English factories. The exports are gold, fine silk stuffs, and lacquered wares, the most beautiful of the E. imports — cloths, chinaware, &c. The Hong-ke or Tonquin river was formerly much frequented by European navigators and was accessible to ships of 500 tons but now the mouth is so much sanded up that vessels of more than 200 tons cannot enter. Pop. 160,000.

CACHAO or CACHAO a Portuguese Africa in Senegambia, on the river Cachao or St. Dominge a few miles above its estuary lat. 12° 13' N. lon. 16° 17' W. It is a military post, a fortified port and carries on trade in gold dust, wax and ivory. It is the principal Portuguese establishment in Senegambia and is under the government of the Cape de Verde Islands. Pop. 600. — The river Cachao is one of the mouths of the Juba or Rio Grande, but receives also, through several small branches, part of the waters of the Casamansa.

CACHAR, KATCHAR (see Behar) a territory India beyond the Ganges bounded N. by the Brahmaputra and by Assam, E. by Manipur, S. by Sylhet and Tipperah and W. by the principality of Jyrisah, between lat. 24° and 27° N., and lon. 92° and 94° E. length N. to S. 140 m. breadth E. to W. 100 m. area, about 6564 sq. m. It comprehends two divisions — Cachar Proper and Dharmapoor. The former occupying the S. and the latter the N. part. The country in general is mountainous and covered with forest trees, bamboo, and jungle, which afford shelter to great numbers of elephants, buffaloes wild deer &c. There is a great want of arable land but this want is to a considerable degree

compensated by the river Barak, which affords good internal communication during the greater part of the year. From June to November large tracts of the country are inundated rendering it tedious and difficult to pass from one place to another. The mountain-streams are serviceable for floating down timber, rattan, gamboge &c. During the S. W. monsoon which begins in February or March rain is frequent and heavy causing a rapid and vigorous vegetation. The climate is unhealthy owing, in a great measure, to the large surface of stagnant water giving rise to the jungle fever and to ague and dysentery. The soil is extremely fertile the chief products are rice and other grain sugar and cotton. A considerable revenue is derived from salt pits, the produce of which not only satisfies the home consumption, but is to some extent exported. The other exports consist of coarse silk, wax, cotton, timber and iron ore. The inhabitants are robust, of fairer complexion than the Bengalees, and resembling the Chinese in cast of countenance. The original Malayalam dialect is now nearly extinct the language and written character of Bengal having taken its place.

In 1774, Cachar was invaded by the Burmese army which, however, was destroyed by the jungle fever but a second expedition reduced the Rajah to subjugation and forced him to become a tributary to the King of Ava. In 1810 the Burmese placed Marjot the Rajah of Manipoor on the throne, and for five years a civil war for pre-eminence between him and his brothers Choopet and Umthine Sing, harassed the province. The latter having been deposed in 1824 a British detachment entered Cachar and expelled the Burmese, who, by the treaty of Yandaboo, in 1826 gave up all claims in favour of the legitimate Rajah but on his death, in 1830 without heirs, it became, in 1838 a constituent part of the British territory. Pop. 70,000.

CACHIMAO a river Bolivia, an affluent of the Pilcomayo, its sources are in the Cord. Chayanta, about 80 m. N. W. of Cochabamba lat. 19° 5' S. lon. 65° 5' W. when after making a bend N. E. it flows in a S. E. direction, joins the Pilcomayo at about 210 m. S. lon. 63° 50' W. total length of course about 310 m.

CACHOEIRA numerous towns in Brazil of which the only two important ones are — 1. A large commercial city prov. of and 62 m. N. W. Bahia, on the Paranaíba, which divides the city into two unequal parts. The larger is traversed by two small streams, the Talibara and Pitanga across which there are bridges and which furnish several sugar-mills. It has a municipal hall and prison, three churches, a convent of bare-foot Carmelites, and an ornamental fountain. The smaller part of the city called São Felix is on the E. bank of the river which is here crossed by a bridge. It has two churches, and is inhabited by the poorer classes. Cachoeira is the depot for the products of a considerable tract round about, and the market where the inhabitants purchase general stores, implements, &c. The principal articles of export are coffee and tobacco. This city is much exposed to inundations one which took place in December 1857 destroyed a great many of the houses. Pop. 15,000. — 2. A small town prov. São Paulo 57 m. N. W. Paria bank Jany. Its streets are broad straight, and of an agreeable aspect. It has a church and school a municipal hall, and prison. The river is navigable for canoes. Cattle-rearing is the principal occupation.

CAÇONDA (new) a town Africa Benguela, belonging to the Portuguese possessions, on the Cotaça, 170 m. S. E. St. Philip-de-Benguela. It is situated in a hilly district and used to be regarded as one of the best situated Portuguese establishments in Guinea. About 50 m. N. W. stands old Caconda on the Caporoca.

CAÇUNGO or MALHEIRA a kingdom, Africa, in Lower Guinea, to the N. of Loango. A small part of it lies along the Atlantic, lat. 5° S. and it extends S. E. as far as the river Bani. It widens considerably towards the interior but its extent is not well known. The surface is generally flat, and the soil fertile. The interior gradually becomes elevated, and the climate is said to be healthy. The chief town is Kuyunda. The other towns of any note are Caço and Malheira, which is on the coast, and was once a great slave market.

CADAMSTOWN, par. Irel Kilmore 5088 ac. Pop. 933

CADAQUEB, a w. and port Spain, Catalonia, prov. of and 80 m. N. E. Gerona, extreme E. of the province. It is colorably well built, and has a church, townhall, three schools, a prison, and public fountain. Manufactures—brandy, soap, paint, potash wine, and oil. The trade of the port is unimportant. Pop. 2787.—(Madoz.)

CADBURY (three parts Reg.—1 per Devon 1899 aa. Pop. 364.—3 (North Cadbury) par Sommerset. 2810 aa. Pop. 1089.—5, (South Cadbury) a small vil. and par Sommerset. In the neighborhood of the village are the remains of one of the strongest fortifications in England supposed to be a work of the Romans. Area of par 800 a. Pop. 206.

CADDER, or **CADDER**, a par Scotland co. Lanark N. of Glasgow 14 m. in length and about 4 in breadth. Within a few yards E. of the mansion house of Robroyston in this parish stood the house in which the celebrated Scotch patriot, Sir William Wallace is said to have been betrayed to the English on September 11 1305. No vestige of the house now remains. 1 op. 2014.

CADDINGTON par Eng. Bedford 1850 aa. P. 1866. **CADFEY** par Eng. Leicester 2180 aa. Pop. 406. **CADLEIGH** par Eng. Devon 1891 aa. Pop. 410.

CADENET (anc. *Cadenetum*) a m. France dep. Vaucluse, 81 m. S. E. R. Avignon in a fertile district, r. bank Durance, supposed from the antiquities found in the vicinity to have been a Roman station. The baptismal fonts of the parish church are amongst the finest and most ancient of the kind in the kingdom and the church itself is a remarkable edifice. Cadnet has silk mills and some trade in silk. Pop. 2195.

CADREITA a small m. Mexico cap. dist. of same name prov. of state of and 743 m. N. the city of Mexico on a small island formed by the Silla and the Santa Lucia. It is agreeably situated, well supplied with water from a distance by a fine aqueduct has a good parish church and a Franciscan convent. The district contains silver mines grows a great deal of wheat, maize, French beans, and pulco, and is famous for its breed of horses and mules. Pop. 8000.

CADREYBIS, a mountain N. Wales co. Merioneth, about 34 m. S. Dolgelly highest peak, 2914 ft. above the sea.

CADYROUSSE, a m. France, dep. Vaucluse, 3 m. S. W. Orange, 1 bank, Rhone. It occupies the site of the ancient *Vadala*, where the Romans had a temple to Jupiter Ammon. It has manufactures of serge, silk mills and some trade in silk, grain, wine, &c. Madder is extensively cultivated in the environs. 1 op. 1809.

CADLAR a vil Spain Andalusia, prov. of and 45 m. S. E. Granada, at the W. base of the Sierra Nevada, 1 bank, Cadiz. The streets are well built, and the town possesses two squares, a parish church of Doric architecture, endowed school, chapter-house, prison and cemetery. The inhabitants are engaged in agriculture grinding corn, expressing oil, and distilling brandy. Pop. 2186.

CADYRE (La) a m. France dep. Var 10 m. N. W. Toulon on a place of great strength being encircled by three walls and defended by a large castle flanked with towers but its fortifications were demolished at the commencement of the 18th century. It has some trade in olive oil, walnuts, figs and capers, the best two of excellent quality. Pop. 1240.

CADILLAC a m. France, dep. Gironde, 18 m. S. E. Bordeaux in a fertile plain, r. bank, Garonne. It is remarkable chiefly for the old castle of the Dukes of Epemon which was long regarded as second only to the royal palace, and is now used as a female penitentiary. There is here a large prison, in which from 800 to 900 prisoners are usually detained. The chief manufactures are wine-making and agricultural implements. The trade is considerable, Cadillac being the entrepot for the produce, and particularly for the wines of the district. Pop. 1164.

Vol. I

CADIZ, a prov. Spain, Andalusia, one of the three provinces into which the ancient kingdom of Seville has been divided. It lies between lat. 36° 3' and 37° N. and lon. 4° 7' and 6° 22' W. area, 8905 sq. m. bounded, N. by provs. Huelva and Sevilla, E. by Malaga, S. and W. by the Strait of Gibraltar and the Atlantic. The mountains of Ronla traverse a part of it in the F. and ramify in different directions towards the sea. The principal rivers which water and fertilize the province are the Guadalquivir and the Guadaro, and their affluents. Both these streams rise N. of Ronla, the former falling into the Atlantic in the Bay of Cadiz, and the latter into the Mediterranean N. of Gibraltar. Timber of various kinds, lime, sulphur, building-stone, and grind stones are obtained from the hilly districts, which also depasture numerous herds of cattle flocks of sheep and some horses. The warm and fertile and in many places well-tilled fertile valleys yield the usual cereal crops and legumes, olives, fruits of different descriptions and excellent grapes, from which are made the famed sherry wines of commerce. Formerly the breeding of horses constituted the principal riches of the province, but this branch of business as well as commerce generally has greatly fallen off the latter being limited chiefly to the wines of Jerez and Rota, which legumes a small quantity of oil, speria, and home-manufactured goods chiefly woollens, and silk. Besides those employed in agriculture, a small portion of the inhabitants are engaged in various manufactures which are carried on to a limited extent and others of them are engaged in fishing, tanning and seal-drying, and in preparing salt, which is of good colour and quality. Education is much neglected, only about 80 in 100 being able to read and write, but as to crime Cadiz contrasts favourably with many of the other provinces of Spain. There are many traces in this province of the Phoenician colonists and here, r. 711 King Rodrigo lost his life and throne in a battle the loss of which opened the ports of the country to the Arabs. Off Cape Trafalgar also in this province, Nelson gained his famous victory over the combined French and Spanish fleets. Pop. 358,641.

CADIZ (anc. *Gades*) a city and seaport, Spain cap. of above prov. in the Tale of Leon off the S.W. coast of Andalusia lat. (observatory) 36° 33' N. lon. 6° 17' 10" W. (a). 60 m. N. W. Gibraltar and 64 S. Seville. It stands on a narrow tongue of land which projects about 5 m. N. N. W. from the Isle, it is surrounded on three sides by water and is strongly defended both by nature and art. The entrance to its capacious bay is completely commanded by the forts St. Sebastian, Santa Catalina, and Matagorda while on the

other sides the beach is so precipitous or so surrounded by sandbanks and smitten rocks, that large vessels cannot approach within three-fourths of a mile of the city. Hence a hostile attack by sea may be regarded as almost hopeless. On the land side the only access is along a belt of land, in some places not more than 200 yards wide, and bristling with cannon. The city itself which is nearly in the form of a square 14 m. each way is surrounded by walls of great height and thickness, flanked with towers and bastions, and is entered

by five gates. It is divided into the four quarters of Santa Cruz, Real, San Antonio and San Lorenzo, and is built with so much regularity and uniformity that a stranger from west of distinguishing features, is very apt to lose his way. The houses are solidly built of freestone, and are generally of three, sometimes of four stories. They have flat roofs, with gutters to carry away or rather to collect the water in reservoirs prepared for it, so water is scarce, and the inhabitants depend on the rain for their principal supply. The houses in general have handsome fronts, are well arranged internally and are often surmounted by lofty towers, open to the sun breeze, and commanding the views of the bay. The streets are somewhat narrow but are remarkably well paved, and are uniformly provided with foot-pavement. The finest streets are the Ancha

PLAZA DE ISABELLA II. CADIZ.—From George L. Squire.

[systems] and San Raphael. The public squares are few and some of them so small as scarcely to deserve the name. The finest—not so much from its extent as the elegance of its buildings—is San Antonio, nearly a perfect square and the great place of resort in mild winter days, and moderate evenings in spring. It is considerably surpassed in extent by the Plaza de Abastos, or as it has been named Plaza de la Libertad, which was only commenced in 1837. The Plaza de San Juan de Dios, now called Plaza de Isabella II. is of considerable extent, but irregular in its shape. It contains several handsome buildings, particularly the consistory now chiefly used for municipal and public purposes. Its front, towards the square consists of a portico above which rises a row of Ionic columns as high as the roof which is surmounted by a tower in three divisions—the first square, surrounded by a marble balustrade, the second octagonal and the third circular supporting a cupola. One of the most conspicuous objects in Cadiz is the high-tower of San Sebastian, 12 ft. above the ground and visible 20 m. off at sea. The other principal edifices are—the old cathedral, now used merely as the parish church of Santa Cruz, and though of small size, one of the most regular buildings in Cadiz; the new cathedral still unfinished, of larger dimensions than the other though small for a cathedral, built wholly of white marble, except the bases of the pillars, which are variegated, and surmounted by a dome, the interior of which is of great beauty; three other churches, several monasteries and convents particularly the convent of the Capuchins, which is said to possess two of Murillo's finest pictures and two theatres, one capable of containing 1400 persons. Among benevolent establishments are the Casa de Misericordia, a magnificent edifice, and a well-arranged and richly-endowed establishment, good partly as an ordinary hospital and almshouse, and partly as a lunatic asylum; the female hospital, next in importance to the Casa de Misericordia; the hospital of San Juan de Dios, the general infirmary which annually receives about 700 patients; and the house of refuge of San Bernardino and San German, where destitute children or young criminals are instructed and reclaimed. The principal educational establishments are the Cadiz medical school in connection with the university of Seville; the seminary of San Ber-

torneo; several superior schools, also in connection with the above university; and a school or academy of the fine arts. Besides the Alameda which is well planted, though not laid out with much taste, the ramparts afford agreeable promenades, commanding a beautiful prospect of the bay and country beyond and are much frequented in the evenings by the inhabitants, who repair thither to enjoy the luxury of the cool sea breeze. But the absence of trees, to the growth of which the sea air is unfavorable is greatly felt. The bay which is formed by the peninsula and the mainland is spacious, and affords good anchorage. It is divided into the outer and inner bays. The former is exposed to a heavy and dangerous sea during the prevalence of N W winds; the inner is protected by an extensive mole, but is accessible to small vessels only.

The larger ships are obliged to anchor at a distance of three-quarters of a mile from the shore, where there is from 5 to 7 fathoms water. Opposite to Cadiz is the town of Santa Maria, the principal depot of the wines of Xeres. La caracra or the royal dockyard is situated at the bottom of the inner bay about 6 m. from the city and is defended by the cross-fire of two forts. It contains three spacious basins, and 12 docks or slips, but the whole establishment is now going to decay.

The trade of Cadiz has been for a long time in an unsatisfactory state owing to the want of commercial treaties with foreign countries and to the enormous prohibitory duties levied upon imports, giving rise to an extensive system of smuggling and consequently subjecting the government to heavy expenses in maintaining a preventive service without the benefit which would under other circumstances have been derived from the importation of useful articles of foreign manufacture. But lately Spain generally has been run again as always have been and are still being constructed commerce is increasing and a healthier state of commercial matters is established. But there is still the improved state of things and is especially benefited by the railway to Seville and Cordova which is being continued to the central and important parts of the country.

The total number of ships entered and cleared with cargo only at the port of Cadiz in 1860 was 1,110 of 569,214 tons. In 1861 2221 of 600,646 tons, and in 1862 2155 of 511,507 tons. The values of the imports and exports were as follows—

	Imports.	Exports.
1861	£13,579,678	£1,640,911
1862	£13,146,740	£1,531,455
1863	£13,877,953	£1,742,428

The principal articles of export are the well-known wines of the R. of J. and sherry. Of the latter considerable quantities are exported from Cadiz in British vessels, to the Newfoundland fishery and also to the river Plata, and the Brazils, and large quantities are also shipped on board Russian Swedish and Norwegian vessels. The chief imports are wheat and wheat from America, hides, cocoa, indigo, cochineal, dyewoods, sugar and other colonial produce from Cuba, Mexico, the Philippine Islands, Mexico, and Central America and fish from Newfoundland and coals from England. Cadiz has been often besieged. It was taken in 1506 by Lord Essex and again attacked by the English in 1598. In 1856 it was blockaded by Blake. Another English expedition was undertaken against it in 1702 but failed. In 1800 the Cortes took refuge here on that occasion the town was blockaded by the French till 1812. In 1823 it surrendered to the French under the Duc d'Angoulême. Pop. (1857) 71,514—(Murray's Handbook of Spain, Wilkinson's Spain, John's Handbook, Muller's Spain, etc.)

CADIZ (par Eng. Lancelotti 5100 an. Pop. 570). CADORE, or FIEVE DE CADORE, a town, Austrian Italy gov. Venice, 22 m. N.N.E. Belluno, 5 bank Pieve, among high mountains. The inhabitants are chiefly employed in agriculture, cattle-rearing and mining. It has some trade in wood and iron. In the vicinity, in 1797 the Austrians de-

anted the French but the place derives its chief interest from being the birthplace of Tilius, who was born here in 1477 (Pop. 1600).

CADOXTON two pars. Wales, Glamorgan.—1 82 000 ac. Pop. 7814.—2 (Jesse Barry) 1028 ac. Pop. 272.

CAEN (anc. Cadocum, Cadocum) a town in France, cap. dep. Calvados (Normandy) 128 m N W Paris, in a valley between two extensive meadows, at the confluence of the Orne with the Odon and 10 m. from the embouchure of the former. lat. 49° 11' 12" N. lon. 0° 21' W (L). The streets are broad, regular and clean two of them cross each other at right angles and extend nearly to the extremities of the town, which is also traversed by a canal supplied by the Odon and employed to drive the machinery of numerous manufactories. The houses are generally well built, of an excellent freestone which is extensively quarried in the vicinity and imported into England under the name of Caen-stone. There are four squares the principal of which the Place Royal, is ornamented with a statue of Louis XIV. The public walks are beautiful especially the covers a splendid avenue about a mile in length lined with elm-trees. Some fine promenades also extend along the banks of the new canal. It has numerous fine churches and other buildings, of which the following may be noticed—the cathedral of St. Etienne, one of the finest in Normandy; the monastic buildings of the Abbaye aux Hommes, a large plain edifice now occupied as the royal college, and containing the tomb of William the Conqueror; the church of the Trinity in the Norman style; the Abbaye aux Dames founded by Matilda, wife of William the Conqueror and converted into an hospital in 1828; the church of St. Nicholas, now con-

in Caen is that of St. Pierre, whose tower terminated by a spire, is exceedingly elegant, and as well as part of the nave, and the three porches, was built in 1308. The great porch, finished in 1384 is irregular but picturesque and the apse is justly regarded as a work of the greatest taste and elegance, and as one of the most curious and the happiest efforts of the revival of the arts in France. Five centuries have not in the smallest injured this beautiful specimen of architecture. Other buildings and mutilations are—the hotel of the prefecture, a handsome building in the Italian style; the Palais de Justice the remains of the castle built by William the Conqueror; the Hôtel-Dieu; the Hôtel-Valois where the exchange and chamber of commerce are held; the public library with 67,000 volumes; museum, cabinet of natural history botanical garden with 8000 species of plants; custom house house of correction, &c. Caen is the seat of the royal court for the departments of Calvados la Manche and l'Orne and has a court of first resort and of commerce an academy of arts and sciences, and an academy universitaire (the representative of the university founded by Henry VI of England in 1431 and re-modelled at the Revolution) a secondary school of medicine, school of hydrography societies of medicine agriculture and commerce deaf and dumb institution normal school school of surgery, and numerous other institutions for the promotion of the arts sciences, and literature. Indeed the advantages possessed by Caen in respect of education &c. have induced many English families to take up their residence in it.

The manufactures of Caen are considerable and consist of hats lace, cloth, flannels linen, cotton goods drugges Angers and thread gloves, straw hats, shot, porcelain, earthenware paper-hangings cutlery oils &c. there are also some cotton mills, dyeworks breweries tanneries and establishments for bleaching wax. Some shipbuilding is also carried on. From time immemorial the town has been celebrated for its manufacture of Angers and woollen gloves, with which it supplies most of the country districts of France. In this manufacture, indeed, Caen has no rival and immense numbers of Angers rabbits are reared in the neighbourhood for the purpose of being plucked, which operation they undergo once a year. The fur thus obtained is used without tye, and the gloves are of the grey or white. There is a considerable trade in corn, wine, brandy cider clover &c. 13 top cattle horses of good quality poultry butter fish salt provisions, iron, steel hardware, grinders, freestone, and paving stones. Six fairs are held annually and are well attended.

The port formed by the river is of little importance on account of the dangers attending the entrance to it the Orne, obstructed as it is by mudbanks. At high water however vessels of 150 or 200 tons can reach the town. Nothing certain is known of the origin of Caen. In 912 when Neustria was ceded to the Normans, it was a place of importance and increased rapidly under the Norman Duke. William the Conqueror and his wife Matilda, adorned it with many edifices it became the capital of Lower Normandy—a distinction which more than once exposed it to the ravages of war. In 1246, it was taken and pillaged by Edward III of England. It was again taken by the English in 1417 and wrested from them in 1450 by Dunois, who captured the Duke of Bourbon and 4000 troops, who had retreated to the castle. Matilda is commonly regarded as the father of French poetry. Hunt, the celebrated bishop of Arranches, and Aubert the composer were born in Caen. Pop. 38,256.

CAENBY par. Eng. Lincoln 1450 ac. 1 tp. 146.
CAERHUN par. Wales Carmarvon Pop. 1558.
CAERTYLLROCK par. Scotland on Dumfriesshire, about 6 m. in length, and nowhere exceeding 2 in breadth. It contains the ancient castle of Caerterrock, a magnificent ruin, celebrated in history and famous for its warlike associations and for the many deeds of violence and bloodshed it has witnessed. Pop. 1481.

CAERLEON an anc. in England co. of and 18 m. R.W. Monmouth on a gentle eminence, r. bank, L. L., which is here crossed by a handsome stone bridge. It contains principally of two ill-paved streets houses irregularly built, old and dilapidated; and has a chapel of ease, and a chapel for Baptists, Independents, and Wesleyan Methodists; a free school, an almshouse, an agency for the poor, the neighbourhood are extensive iron and tin works. Caerleon was

VIEW FROM THE CHURCH OF ST. PIERRE. A.
From France: Normandy of the Orne.

verted into a shot-manufactory and perhaps the only one in Normandy which presents the French style of the 11th century in all its purity—no mixture of ornament, and no modern additions having defaced the original. One of the finest churches

at one time the metropolis of Wales, and a place of great wealth and importance being reckoned the third city in Britain; it is now rapidly becoming to decay and presents but few traces of its ancient grandeur. It was also a principal and permanent Roman station, as many interesting remains sufficiently prove. These consist of a part of a wall by which the town was surrounded, and the site of an embellished fragment of Roman mosaic floor, coins, and rings, have also been found. Pop. 1381.

CAERMARTHEN or **CAERMARTHEN** a maritime co. S. Wales, and the largest of all the Welsh counties having Cardigan on the N. the Bristol Channel and part of Glamorgan on the E., Pembroke on the W. and Brecknock on the E. extreme length, 63 on breadth, 36 area, 634,800 ac. It is of a mountainous character generally but not so rugged as some of the other Welsh counties, neither are the mountains so high. Some of the valleys are beautiful and extensive particularly that of Towy which is 50 miles in length. The principal river is the Towy or Towy which rises in Cardigan shire. This river and the Tare are the only navigable streams in the county. A large part of the county is waste but the valleys are fertile, and numerous herds of small black cattle are reared on the hills. Agriculture, however is extremely backward, and drainage altogether neglected. The mineral products of the county are iron lead, coal and limestone. There are no manufactures of any consequence. The county returns two members to the House of Commons constituency 1850/4999 Pop. 110,635.

CAERMARTHEN or **CAERMARTHEN** (Welsh, *Carr Fydd*) a N. Wales, cap. of above co. 9 m. from Caermarthens Bay Bristol Channel and 14 m. N.W. Llanelli on a moderate eminence. r bank Towy over which there is a spacious bridge of seven arches. It has two principal streets tolerably straight well paved and lighted with gas houses well built, some of stone, and some of brick. The principal buildings are—the county hall N. 1/4 of a Liberal, an excellent edifice, containing numerous antique and curious monuments St. David's Church a plain substantial structure a monument to Sir Thomas Llewellyn and a well-executed statue of General Llewellyn, a native of the place. Besides the two Established churches, there are two independent chapels, two Baptist, two Wesleyan, one Unitarian and two Calvinistic Methodist of public and private schools about 20 in number the most prominent are the S. Wales training college Sir Thomas Darnley's free grammar school Queen Elizabeth's grammar school &c. There are also two infirmaries, and a literary and scientific institution. The shipping of the port is not so considerable and it has recently declared an independent customs station. Tin plate and iron works are carried on to some extent, but the bulk of the inhabitants are employed in such handicraft occupations as are likely to be most in request in an agricultural district. With Llanelli it returns a member to the House of Commons; constituency (1860) 718 1 pop. 10,224.—(Local Correspondent)

CAERNARVON or **CAERNARVON** a maritime co. N. Wales, having Caernarvon Bay W. and co. Denbigh E. the island of Anglesey and the Irish Sea. N. and Cardigan Bay S. Its extreme length, S.W. to N.E. is about 52 m. extreme breadth, 20 m., although the greater portion of it does not exceed 7 or 8 m. on an average area, 348,160 ac. It is county is traversed throughout its whole length by lofty mountains, including the Snowdon range, whose highest peak is 3557 ft above the sea. There are other summits varying from 1500 ft. to between 8000 and 4000 ft. Although however the most mountainous county in Wales, there are many tracts of low and fertile land some of it affording rich pasturage and other parts bearing large crops of barley and oats. Dairy farming and cattle large and sheep breeding are, however the principal occupations of the farmer. The cattle and sheep are of a small breed. Lead and copper ores have been found in the mountainous districts, and some attempts have been made to work them but with little success. It has been otherwise with the slate quarries in the neighbourhood of Bangor which have been extensively and profitably worked. Large quantities of this slate which is of the finest quality are exported. Agriculture though not so far behind as in some of the other counties of Wales, is still in an extremely backward state. Farm buildings and cottages are generally in a bad condition and the implements employed rude and inefficient. It sends

one member to the House of Commons constituency (1850), 1988. Pop. 87,870.

CAERNARVON or **CAERNARVON** a seaport to, and part of N. Wales, S.E. side of Menai Strait, and cap. of above co., 208 m. N.W. London. The ancient walls thrown around it by Edward I. and flanked by round towers, are still pretty entire. Within there are ten narrow but regular streets outside, many new and handsome houses have been built of late years and some spacious streets formed. The town is well lighted with gas, and is abundantly supplied with water. The magnificent castle or palace of Edward I. and in which Edward II. was born stands at the W. end of the town, and is still externally entire, though much dilapidated inside. Including its court-yards, &c. it is about 1 m. in circumference. On the N. and W. the sea dashes against the rock on which it stands, adding an appropriate feature to the imposing fortress. The parish church is half a mile from Caernarvon, but there is a commodious chapel of ease in the town, with four dissenting chapels, and several schools. A number of wealthy families reside in the neighbourhood, and the town is much frequented in the season by sea-bathers. A beautiful promenade stretches along the Menai which is much frequented particularly in the summer evenings. Caernarvon has no manufactures, but the shipping trade is considerable the port admitting vessels of 400 tons. The principal exports are slate and copper ore the imports, colonial produce, Manchester and Birmingham goods &c. The coasting trade is chiefly confined to Liverpool Bristol and Dublin, although occasionally extending to Glasgow Cork, and Waterford constituency (1850) 861 Pop. of bor 8874.

CAERPHILLY a market in S. Wales, co. Glamorgan, agreeably situated 63 m. N. by W. Cardiff. It is embosomed among hills and the scenery in the neighbourhood is picturesque and grand. The houses are neatly but irregularly built. An ancient castle, contiguous to the town was one of the most magnificent structures in the kingdom. It has a chapel once owned with the Established church, and places of worship for Baptists, Wesleyans, and Calvinistic Methodists and an endowed school for girls. Caerphilly which appears formerly to have been a place of considerable extent had been gradually declining till the beginning of the present century when it began to increase and prosper. Its manufacture of woollen cloths checks and hosiery-wool is carried on. Weekly market Thursday well supplied with corn and all kinds of provisions; six fairs are held annually for corn cattle, cheese, and other articles. Pop. 634.

CAHAREBA CAHAREBA, or CAHAREBA, CAHAREBA a small haven Asiatic Turkey Palestine lat 32° 23' N. lon. 34° 44' E. 55 m. N.W. Jerusalem. It was once a place of considerable note but is now a mass of shapeless ruins uncomprehended by a low wall of gray stone and tented only by jaculas, snakes, turkeys, &c. A great extent of ground is covered by the remains of the city the most conspicuous ruin being that of an old castle at the end of the ancient mole. Water being good and abundant, coasting vessels often put in here. The ancient city was founded by Herod the Great, A.D. 22 he then raised some magnificent edifices, and caused a sumptuous mole to be constructed for its port which is said to have been one of the most stupendous works of antiquity and has been compared, as to design and execution, to the breakwater at Plymouth. Caesars in the name of several interesting events mentioned in Scripture. Eusebius, the early church historian, probably a native was also some time bishop of Caesarea. In A.D. 638, the Saracens captured it and retained the place till 1101 when it was taken by the Crusaders; after the latter left, it soon fell into decay.—2 *Caesarea Philippi*, the same as BANIAS which see.

CAFFRISTAN, See KAFFRISTAN.

CAGAYAN a prov. in Luzon, the largest of the Philippines, occupying its S. extremity. It is mountainous, and contains numerous extensive primitive forests. Cultivation is carried on to some extent, but the sustenance of its popula-

then prevents a full development of its capabilities. Its principal vegetable production is tobacco, which is exported in considerable quantities. Cattle and timber the latter comprising a valuable species of ebony are the next chief articles of export. Gold, iron, and a red ochre are found in the province, the last in great abundance. The mountains are inhabited by numerous and various animals, particularly buffaloes, stags, hogs, cattle, and horses. The rivers teem with fish, which form a large portion of the subsistence of the natives. The climate of Cagayan is rendered very unhealthy by dense and tangled forests, but the practice of cutting down the trees in the vicinity of the villages and towns has considerably improved the salubrity of these localities. The mountains are generally houses and well disposed, and their heights are unknown. The province comprises 21 towns and villages which contain together 58,000 inhabitants.—(Mallet).

CAGAYAN SOOLOO three islands, Sooloo Sea lat. 6° 58' 6" N lon 118° 28' E. (L.) one of which is large, high, and well wooded and may be discerned at a distance of 28 or 24 m.

CAGAYANES ISLANDS, three islands, one large and two small in the Sooloo Sea. The larger is of considerable size, very high and covered with trees, and apparently of volcanic origin. The small islands are situated 5 m. S. of the former, they are of moderate elevation, and are also well clothed with timber. The large island is surrounded by a reef. Its centre is in lat. 9° 30' N lon 121° 28' E (L.).

CAGGIANO a tn Naples, prov Principato Ultra, 12 m N W La Sala, on a mountain. It has three churches and an hospital. Pop. 4429

CAGLI [anc *Celleis*] a tn Papal States, at the confluence of the Cassinone and Besno fort of Monti Petraro 13 m S. L. Rome. It has a cathedral, four monasteries, four nurseries and is the seat of the bishopric of Cagli and Pergola. Pop. 3000

CAGLIARI (CAPO DI) or DIVISORE DI one of the two military divisions of Sardinia, comprising the S. half of the island. It is divided into the six provinces of Cagliari, in glelia, Inli, Lennus, Nuoro, and Bessali. The sea-coast from Tortoli on the L. side, to Oristano on the W side is flat, with a rich and productive soil but, from June to December the air is infected from vapours from the numerous marshes and lagoons. The interior, on the contrary is mountainous with a pure and healthy atmosphere and snow lies in the higher districts for a considerable portion of the year.

CAGLIARI (GULF OF) a gulf S. and of ul Sardinia extending from Pala on the W to Cape Carbonara on the E. nearly 20 m. across. The entrance is easy and there is an excellent roadstead, with good anchorage after getting into soundings.

CAGLIARI [anc *Calaris*] a maritime city Sardinia, State, cap ul Sardinia, and of the division of Capodi Cagliari situated on a slope on the gulf of same name S. shore of the island and backed by exceedingly jagged mountains lat. (St. Paucosa Church) 39° 13' 12" N lon 9° 7' 45" E (L.). It is surrounded by a single wall defended by some bastions, and a broad but shallow ditch, neither of which are in a state of efficiency. The streets in general are broad, but the houses are very poorly built. The original part of the town now called the castle, occupies the summit of a hill about 400 ft. above the beach. This portion was built and regularly fortified, by the Pisians and a citadel has been added to it by the Medimontese Government. The vicerey and principal authorities inhabit this quarter which contains the cathedral also built by the Pisians and partly faced with marble the vice-regal palace the university three square towers called St. Paucosa, the Elephant, and the Eagle, the mausoleum of Martin, King of Sicily and the residences of the nobility. The next quarter is the Marina, extending from the middle of the castle hill to the sea shore. The Marina is the commercial quarter of the town, and contains a bonded warehouse, an arsenal, and a lazaretto. Here also is the mole. Another quarter called *Trattoria*, extends W from the castle, and contains the corn market and storehouses for grain. The quarter of Villanova extends E. and is the poorest part of the town. Cagliari has a suburb nearly a mile long called St. Avandino. Besides the cathedral the town contains 55 churches, 21 convents, a seminary a university founded in 1826, and re-established in 1764, with facilities of study,

law medicine, and philosophy attended by between 300 and 800 students an agricultural society a college for nobles, a school of medicine and surgery a mathematical school a museum of antiquities, a cabinet of natural history a library of 18 000 volumes, a mint a theatre, and several hospitals and other beneficent institutions. The town is badly supplied with water although an ancient aqueduct remains which could be restored at a moderate expense. It is reputed healthy notwithstanding the proximity of the extensive marsh of the same name to the W and the frequency of droughts. Cagliari is the seat of government for the island and of the high court of appeal for both civil and criminal cases of an admiralty court, court of first resort tribunal of commerce and fiscal court. It is also the residence of an archbishop, who takes the title of Primate of Sardinia.

Consuls from most of the European states reside here, this being the port through which most of the foreign trade of the island is done. The manufactures of the town are of little importance. They include cotton, soap gunpowder arms, leather and jewellery. There is also a royal tobacco manufactory. The salt marshes on the neighbouring island afford large quantities of salt, which forms a principal article of trade. The port is one of the best in the Mediterranean and the roadstead has good anchorage ground. Grains, vegetables, salt, oil wine, cheese, wax, hides, saffron, and rags are exported.

VESSELS RECEIVED AND C. WARD, of St. Peter of Cagliari, 1845 and 1870 to 1845.

	Yards	Cab	Yards	Ton

CAHETE, or VILLA DE RAINDIA (New Queen's town) an old tn Madrid prov Hues 10 m S. S. Bahaa lat. 19° 50' S lon 45° 10' W. Its streets are broad and straight, and its houses in general well built, though partly of earth. It possesses a fine parish church and two places churches, an hospital and a primary school. A fine castle, bearing, and mining, are the chief occupations. Pop. 6000

side. No attempt is made at symmetry, yet the whole is most harmonious. Most of these houses are built of dried bricks, few are of stone, and none of wood, and many present in their interior a true picture of Oriental luxury. The numerous beautiful minarets with which the city is adorned contribute greatly to lighten the general impression in favour of Cairo.

The city is divided into several quarters, separated from each other by gates which are regularly closed at night. The public streets are mostly crooked lanes, few of them being 10 ft. broad. The by-roads, and those in the interior quarters, are still narrower and in consequence of the manner in which the houses are built, each story projecting beyond that immediately below it, two persons may shake hands across the streets from the upper windows. The streets are not paved, but they are kept extremely clean. They are constantly obstructed by caravans of mule riders on ass-back and horseback, little regarding the pedestrians, who are few in number and composed wholly of the poorer classes. The chief square of Cairo is the magnificent area El-Rabeh which is annually inundated by the overflowing of the Nile, and the centre of which is laid out as a garden. It is surrounded with many of the finest mansions several of which belong to Government officials, including the palaces of Ali Pasha and Amet Pasha. In this square there is a monument to General Kieher who was assassinated there on June 14, 1860.

The buildings in the citadel merit first mention from their prominence, in a general view of the city, no less on account of the interest which attaches to several of them. This fortress founded A.D. 1176 by Saladin is built on a calcareous rock, in the S.E. quarter of the city of which it forms the abrupt termination within its walls, March 1, 1811, the massacre of the Mamelukes took place. It contains the most, an arsenal the Pasha's marble palace, his new mosque, &c. To make room for the latter a lofty antique edifice, called Khosrow's or Joseph's Hall, was removed in 1819. The vice-regal palace is small, but has had some short alterations made to it of late years. Joseph's Well still remains it is dug in the rock, and consists of two parts, the upper and lower well and a winding staircase leads to the bottom a depth of 280 ft. The fortress is further supplied with water from the hills, by an aqueduct, formed by Saladin. But the most remarkable building of the citadel is its new mosque—perhaps one of the most splendid in the world—built of Egyptian marble and really wonderful considering that it has been got up by native architects and workmen without any fixed plan, almost without any measurement, and, as it were, only in imitation of other buildings of the same style. Behind the citadel is a fort, upon a rock, called the Citadel of Joseph, the ascent to which is by a long causeway. It was on the site of this fort that Mahomet Ali erected a battery against the citadel, then in possession of Khosrow Pasha, by which he obtained the surrender of the place.

The most interesting edifices of Cairo are, undoubtedly its mosques, and though many of the 400 it possesses are in ruins, yet the number in repair and in daily use is very great. The oldest mosque as well as the oldest building in Cairo, is the mosque of Ahmed-ibn-el-Toloun generally known as the Jama Tayloun, of unknown date but evidently anterior to 879, and though not remarkable for beauty it is of high interest in the history of architecture. The finest mosque is that of Sultan Hassan, immediately below the citadel and built of blocks obtained from the pyramids. Its porch is lofty and beautifully ornamented, the corridor of its towering walls is rich, and its minarets, like the arches of its spacious courts, are striking. Near the bazars of the Khan Khaloul is the mosque of Sultan Kaloum, to which is attached the Maristan or mad-house, founded by that prince, in A.D. 1387 and the only one in Egypt, till the erection of the new lunatic asylum by Mahomet Ali, in 1844. In the mosque is the handsome tomb of the founder who died, A.D. 1300. Not far from this mosque is that of Sultan Berkeok, with his tomb attached. This potentate was the first sultan of the Circassian Mameluke dynasty and was renowned for having twice repulsed the Tartars under Temuchin. Besides these named, the other principal mosques are the Esna Hassanin El Hakem and those of Sultan El Ghoreh, the Sherwan, Mouftah, and British Zaynah. The tombs of the Egyptian Caliphs, which occupied

the site of the bazaar of Khan Khaloul are all destroyed but that of El Saleh Eyyoub, who died in 1250. Near them are the tombs of Sultan Baybars Nasser Mohammed, Baharite Mameluke prince, and various others, some of them remarkably elegant. The largest convent of nuns existing in Cairo was built in 1174, and between the city and Old Cairo is another. There is also an hospital for the sick poor with 500 beds, 200 of which are for women.

The principal bazars of Cairo are the Ghorehah and El an

BOULEVARD OF SULTAN BERKEOK AND PART OF THE BAZAAR OF SULTAN BERKEOK.
From the Plateau of Cairo.

Khaloul in the former cottons, silks tarbooches (Fox caps) &c are sold in the latter cloths, dresses, swords, silks, embroideries, &c. and in both goods are disposed of by public cry or auction. In the Hammoueh, silks, crapo cloth &c and most European tissues, are sold; the dealers are all nominal Christians. Some of the bazars are well covered over and all the passages are kept cool by watering and each one is confined to certain classes of goods or wares. The same observation applies to the shops. Those of the Srokoogh for instance, or sugar quarter are for sugar almonds, dried fruit &c the Naisam full of coppernails the Khordukidih where hardware, cups, coffee-pots &c., are sold the Saorjah occupied by sword mounters the Hagha, by gold and silver workers and the Oshergah, by jewellers. The Oshergah-Ghah or slave market, in the centre of the city is a large old building surrounding a large court. The slaves exposed for sale are chiefly from Abyssinia, Nubia, Dongola, and Senaar. Circassians of both sexes are also sold, but these are usually only procured to order.

Public baths are numerous but none are remarkable. The largest is the Tumbales, near the Jeb-el-Sharfeh. Many of the streets or public fountains are curious specimens of the peculiarities of Oriental taste abounding in great luxuriance of ornament. The most remarkable are those of Tossoun and Ismail Pasha, the sons of Mahomet Ali and some others of older date, in the centre of the town. There are several hotels for strangers from the West, with a number of Frank lodging or boarding-houses a few of which are specially for British or Americans.

The climate of Cairo is esteemed healthy. It is dry though in winter heavy rain is frequent. At that period also, the nights are cold. From July to November N winds prevail, and in general are very harmful to the country and the traveller, but they bring with them from the Mediterranean heavy and cold fogs, which lower the temperature suddenly and render it dangerous to be out at night without being warmly clad. In April and May the hot N winds prevail, and no dew falls. The mean temperature is about 5° 25° Feb. varying from 35° the maximum or 85° 50° the medium of August to 5° the minimum, or 56° 50° the medium of January. It is in order to find a shelter from the great heats of summer and the cold winds of winter that the streets are built so crooked and so narrow.

Besides the great Meles festival (see CONSTANTINOPLE) held in Cairo, it is the scene of two great events, annually—the ceremonial departure and return of the Hajj or Mecca pilgrims through the Bab el Nasser Gate of Victory on the

before the judicial session in the Citadel or submits them for the consideration of the vizier or his resident deputy. Questions of property family disputes and all proper cases of law come under the jurisdiction of the *Mahkamah* or Cadi's court, the operations of this tribunal are ordinarily slow but may be quickened it is said, by bribery. No foreigners can legally buy real property in Cairo. Europeans and Americans are judiciously subject to the consuls or envoys of their several Governments, and cannot be punished by Turkish law. The Cadi's court used to be held in the decayed buildings of the old Sultan's palace but a new legal edifice with courts and offices, has lately been opened.

To Mahomet Ali, Egypt owes the introduction of elementary and scientific education. In Cairo there are three primary schools, with 400 pupils, where reading and writing, and the four rules of arithmetic are taught. There are, besides, several primary schools here and elsewhere, for the solitary besides scientific academies for sailors, &c. From 4000 to 5000 pupils are educated in the schools of the city mosques. The Church of England Missionary Society has a school connected with the British chapel in Cairo for young male Orphans, and another for 100 native girls.

Omrah Bey ran to Boulaq and across the desert to Suess. In March 1851 the Pasha officially announced his intention of constructing a railway between Cairo and Alexandria—an undertaking expected to be proceeded with in the same year and which will afford a much more speedy means of transit than the water way of the Nile and the Mahommedan canal connecting those two cities.

Extremes of Cairo.—The following general view of the exterior features of the city is given by Dr. Hildesheimer (1846).—Palm trees and minarets rise in grand picturesque groups above the city walls. The central part of the background is filled by a wood of palms, stretching into the distance, near to this, on the right, rise the giant structures of the pyramids of Ghizeh. These supply the place of an outline which would otherwise be wanting to complete the picture, the foreground of which consists of a thick wood of acacia. In the interspace are fields of maize in the midst of it a plain some lake surrounded with rows of the Labakacene. On the horizon the desert may be distinctly perceived by the yellowish gray of the atmosphere which hangs over it. The cemetery or cities of tombs are seen outside the walls. Among them are the sepulchres of the Mamaluke kings of the Circassian dynasty (ruled 1382-1517) on its E. side, beyond the gate Bab el Nasser. To each tomb a mosque is attached.

The palace and gardens of Siohla lie about 4 m. to the N. of the city the road to which along the banks of the Nile, is shaded with lofty acacias. This splendid country seat of Mahomet Ali is beautified with a fine pleasure garden more than 30 Farnham wheels are employed in irrigating its grounds. In the immediate vicinity are some other villas and many lying them a row of extensive manufactories. Between Boulaq and Cairo are the fine palaces and magnificent gardens of Ibrahim Pasha.

Old Cairo (Musal el Ateekah) called *Antak* by the Arabs, is the S. or upper part of Cairo, where all duties on goods destined for the latter are levied and paid. It presents some objects of interest, including an old Roman fortress and the splendid mosque of Ameer. The inhabitants are mostly Copts, and here are several convents of that sect of Oriental Christians. Seven antique corn mounds, popularly called the granaries of Joseph, have lately been demolished. The aqueduct which conducts the waters of the Nile to the Citadel of Cairo, by a winding course of 2 m. here runs on. In the Isle of Roda, opposite Old Cairo, is the famed *Mekki* or ancient Nilometer for measuring the rise of the Nile, upon which the fertility of Egypt depends. Boulaq already referred to, is the lower part of Cairo.

The site of the city of Cairo is said to be that of the *Nebyth* of Cambrinus built on the ruins also of the pre-existing *Latois* of the Egyptians. The present city was founded

RAHELNAH, ART PART OF THIN W. L. B. CAIRO — From the Nile of Cairo.

E. or desert side of the city and the opening of the canal at Old Cairo which is also an annual ceremony of great import. There are few places of amusement. Within the last few years a theatre has been set on foot in the Frank quarter with amateur actors, who play gratis. A more useful institution in the same locality is the library and reading room of the Egyptian Society. In 1842 another society for respectable Europeans called the Egyptian Literary Association, was founded here. Ibrahim Pasha commenced a public library in 1830 and both he and his father made beginnings towards forming a museum of antiquities in which however little progress has been made.

In Cairo there are nine cotton spinning factories 10 for weaving silk and cotton 13 for manufacturing cloth 14 calico printing works 18 dyeworks 15 bleaching, 16 iron-foundries, &c. In the Citadel are a factory of small arms and cannon the latter bronze, and of small calibre iron roll ng-mill, and the mint.

There were in Cairo in a recent year about 24 Moslem foreign merchants 16 European but no British, houses 10 Catholic Greeks and six Bohemian establishments. In the city were 164 corporated bodies for the regulation or advancement of native trades. But the commerce of Cairo is much diminished. It has ceased to be a depot, as it formerly was for other articles of export or import. Alexandria, from the greater facility which its position affords, has supplanted it in importance. It is still, however a great market for guns and some other secondary articles. The stocks of goods in Cairo are consumed principally by the inhabitants of the city the buyers for the interior finding it more advantageous to supply themselves from the warehouses of the importers at Alexandria. At Cairo are resident consuls from France, Austria, and the U. States.

The police of Cairo is superintended by a *bas*-age, with an office near the Frank quarter. This functionary decides slight cases summarily but sends those of a graver character

by the Arabs, about A.D. 970 and its citadel as we have seen, was ruled by Sultan Saladin, in 1175. From that period till the year 1517 when it was taken by the Turks, it was the capital of the Saracenic Sultanate of Egypt. The latter governed it by Debas, these being formerly controlled by the Mamelukes, to whose massacre, followed by the re-occupation of rule by the Pasha, we have already adverted. Pop. of Cairo and its suburbs, about 300,000 of which 190,000 are Egyptians, 10,000 Copts, 4,000 Jews, 5,000 Syrians, 5,000 Greeks, 2,000 Armenians, and a varying number of Franks or Europeans.—(Quoting *Guide au Grand Souverain Rous in Egypte*, Wilkinson's *Modern Egypt* 2e)

CAIRO (anc. *Cyzra*) a city, kingdom of Italy, prov. Genoa, 10 m. N.W. Savona, 1 bank, Bormida. The French defeated the Austrian army here in 1794. Pop. 4500.

CAIROAN or KAIWAN a tn. Tmla. See KAIWAN. CAIROH.—1 A small market in and par England co. of and 21 m. N.E. Lincoln, pleasantly situated on the slope of a hill has an Established church, several places of worship for dissenters, and a free grammar-school. It is however chiefly noticeable on account of its antiquity having been a Roman station as numerous relics, indicative of the presence of that people are dug up from time to time. Area of par 6490 ac. Pop. 2407.—2 *Caistor* near York, par Eng near Yarmouth, Norfolk 8047 ac. Pop. 1043.—3 *Caistor*, St Edmund's par Eng Norfolk 1044 ac. Pop. 154.

CAITHNESS a maritime co. Scotland occupying the N.E. extremity of that kingdom bounded W. by co.utherland and by the N. Atlantic Ocean on all other sides. It is about 43 m long S.W. to N.E. and about 30 broad area, 448,085 ac. of which about 100,000 are cultivated and in pasture, the remainder is moor and hill. The general appearance of the country is flat and uninteresting, having neither trees nor eminences to break the dreary monotony of the scene. It contains no navigable rivers, nor lakes of any consequence the shores are bold and rocky. Until late years the dwellings of the tenantry were, in general, extremely poor but great improvements in this respect, and also in the various branches of agriculture and husbandry especially in the rearing of cattle, have recently taken place, so that the country already presents a much more cheerful and thriving appearance than it formerly did. The soil where duly cultivated is extremely fertile, yielding luxuriant crops and the sheep and lambs reared in it is county command the highest market prices. On the coasts herring fishing is prosecuted with great success about 120,000 barrels being taken yearly there are about 700 boats, manned by five men each all belonging to the county engaged in this fishery. There are also two considerable salmon fisheries one on the river Thurso another on that of Borellie. Caithness contains 10 parishes. It sends a member to parliament and its principal towns, Wick, a town with Kirkwall Dunrobin Tan Dargwall and Cromarty in choosing a representative on statutory (1850) 551. Annual value of real property in 1815 £24,409 and in 1844-45, £26,589. Its chief towns are Wick and Thurso, the former being the more important. The natives are of Scandinavian origin the country having been colonized by that people from the Orkneys, where they had been previously settled. From the 10th to the 13th century Caithness formed part of the dominions of the Orkney jarls but was finally subjected to the Scottish crown by William the Lion in 1187. Pop. 48,709.

CAJAHIRIA a small isl. Brazil, W side Bahia do Todos os Santos, opposite the mouth of the river Sergipe. It is low cultivated, and has a primary school.

CAJANO (Pocaoi l.) See Pocaoi l. CAJAZO

CAJARE, a tn. France, dep. Lot 20 m. E. Cahors, on bank, Lot in a large and fertile valley surrounded on all sides by hills clothed with vine. The streets are narrow and irregular and the houses indifferently built with exception of some along the old ramparts, now converted into a promenade. The only buildings of interest are the parish church built in 1289 and the remains of an ancient fort, apparently of a very remote antiquity. Numerous fairs are held here 1 cop. 1074.

CAJAZZO a tn. Naples, prov. Terra di Lavoro on a hill near the Volturno 10 m. W.N.W. Capua. It is very ancient is dominated by a citadel built by the Lombards, and has a handsome cathedral, several churches and convents, a Ysa. L.

seminary college and an hospital. Good wine is produced in the neighborhood Pop. 3391.

CALAHAR, a maritime dist. Upper Gambia, W. Africa, intersected by two rivers, called, respectively Old and New Calabar. The limits of the district are not well ascertained, but may be said, generally to be between the river Benue or Forama, and the Rio del Rey with the Kong Mountains in the rear and thus leaving the Niger passing through its centre. The coast here, a projecting line between the Dights of Benue and Ilafra, is uniformly low and flat unbroken by the slightest elevation and closely intersected by rivers, most if not all of which with exception of Old Calabar being branches of the Niger. Much vegetable matter and silk are discharged at every tide by these mouths, which discolour the ocean with a filthy soun of a brown colour and give forth a sickening smell for the distance of several miles. The climate of Calabar is extremely deleterious, and the coast generally inhospitable there not being a lighthouse or single harbour of refuge throughout its entire length. Hurricanes are frequent, and of the most violent character accompanied by vivid lightning and tremendous peals of thunder with rains so fierce and heavy that it is impossible to look to village or discern anything beyond a few yards distance while the noise so overcomes the loudest voice, that all orders must be conveyed by messengers. A large portion of the population of this district are slaves, and are employed chiefly in cultivating the pepper grounds or in the various kind of labour connected with the palm-oil trade, in which the slaves are engaged. Old Calabar or Bongo river is situated about 90 m. nearly due W. from New Calabar. The entrance of its estuary which is solely in the centre of the Dight of Benue, is in lat. 4° 55' N. The latter is a considerable expanse of water about 9 m. in breadth with a strong current. The traders ascend the river about 30 m. New Calabar enters the Dight of Ilafra at lat. 4° 50' N. 7 m. 7 E. Its course is from the N.W. and its depth 30 m. from the sea, 5 fathoms. This river is believed on good grounds, to be one of the numerous terminating branches of the Niger the power and volume of its current showing that it must be the embouchure of a great river.

CALABOZO a tn. Venezuela, prov. of and 120 m. S.W. Caracas, between the rivers Guariso and Uruco, in the midst of the Llanos. It is tolerably well built, and has rather a pleasing appearance. Its church, though not very handsome is commodious. The principal wealth of the inhabitants consists of cattle. The neighbouring ponds abound in electrical eels, which Humboldt describes as being from 5 ft 4 inches to 6 ft 7 inches in length and capable of killing a horse. Calabozo, formerly only an Indian village owes its existence, as a town to the Burey Company. Pop. 5000.

CAJABRIA an extensive territory Kingdom of Naples, comprising all the S.W. peninsula in which Italy terminates, from about lat. 40° N. to the Strait of Messina area estimated at 7000 sq. m. It is divided for administrative purposes into three provinces—Calabria Citra, the most northerly Calabria Ultra I. the most southerly and Calabria Ultra II. between the two former. The central region is occupied by the great Apennine ridge, wild and bleak, to which, however, whole colonies with their cattle, migrate in the summer. The plain near the coast are marshy and unhealthy and inhabited by herds of buffaloes but the valleys at the foot of the mountains are delightful, and rich with the most luxuriant vegetation. The vine, the orange and lemon trees, the fig, the olive, and all the fruits of S. climes, grow there in perfection. The climate was reckoned salubrious in ancient times but in some places the accumulation of stagnant water produces disease in the hot season. During the remainder of the year the heavy dews prevail, a delightful verdure, increased by numerous springs and streams. Corn, rice, saffron, safflower, lignum, madder flax hemp olives, almonds and cotton are raised in abundance. The sugar-cane also comes to perfection here. Sheep, horned cattle, and horses, are numerous. Near Reggio a kind of mussel is found called *Pinna murex* from whose silky byssus or beard a beautiful fabric is manu factured remarkable for its extreme lightness and warmth. Coral is also found. The quarries and pits afford alabaster, marble, gypsium, siliceous chalk, rock salt, brim stone, and the fine copper renowned since the time of Homer.

A melancholy temperament, a concentration of feelings, and a sullen distrust, render the Calabrian formidable when irritated. Even their women seem enfolded with a masonlike rigidity their features, harsh though regular are scowling and wrinkled even in youth and their ungainly dress leaves them little of the delicacy which is considered elsewhere natural to the sex. They marry early and soon fade. The men, with their short jackets close trousers, leather garters, and sandals of undressed skin, tied by thongs and a rusty conical hat with narrow brim and trimmed with ribbons and images of the Virgin may be seen strutting about behind their olive-trees, or some loose stone wall as if it was for some passenger to fall upon. The peasant labours little subsisting almost entirely on the spontaneous productions of nature, and his habitation is of the most wretched description. Hereditary hatred divides most of the families, and an individual never goes abroad unarmed. In the night they barricade their houses. They have little or no idea of social intercourse, and seldom visit each other. The language of the people is a corruption of Italian difficult to be understood, but full of original and pointed expressions. Its natives are well formed muscular and of a brown complexion with animated countenances, and eyes full of expression. Like the Gordini and Corsicans, they murder without remorse when instigated by cupidity or revenge. The robber carries religious robes in his bosom, and trusts to them for the success of his nefarious enterprises. The towns in this country are built on steep conical hills crowned with houses to the very top, the outer or lower buildings being joined together by walls, so as to form a sort of rampart. They are generally in the lowest state of wretchedness.

The arts and manufactures of Calabria are in an extremely backward state. There are some silk manufactures at Mon telesone, and olive-oil is manufactured to a large extent. Silk is produced in tolerable quantity although of a darker shade than that of the other two provinces, from the red mulberry being employed to feed the silk worms.

Calabria has long been subject to devastation by earthquakes, 10 years having seldom elapsed, during the last century, and a half without a shock, but the more severe convulsions have always been separated by much wider intervals. The last remarkable visitation of this kind occurred in 1783 when about 40,000 persons perished in the Calabrias and thirty and 20,000 more, shortly after, by causes resulting from it. By far the greatest number who died at the moment were buried in the ruins of their houses but numbers also were ingulfed in the deep fissures into which the earth was rent. It is said that the conduct of the Calabrian peasants on this dreadful occasion was singularly atrocious; they abandoned the farms and flocked into the towns in great numbers not to rescue their countrymen from a lingering death, but to plunder and were seen stripping the wounded and half buried while yet living. Pop (1844) 1,074,540.

CALABRITTO s. in Naples, prov. Principato Citra, on the Sele, 10 m. N.E. Campagna, with several churches, and a convent. Large fairs are held here. Pop. 2420.

CALADEIT s. in Spain, Aragon, prov. Teruel, 23 m. N.W. Teruel, in a plain at the base of a mountain. It is tolerably well built, and possesses a parish church, two endowed schools, a townhall prison, cemetery and several fountains. Wine and oil are expressed, and some trade is carried on in grain and cattle. A cattle fair is held in December. Pop. 2404.

CALAHORRA.—1 [anc. *Calagurris*] a city Spain Old castle, prov. of, and 24 m. E.N.E. Logroño, 1 bank, Laodicea, 2 m. from the confines with the Ebro. It has several squares, an ancient cathedral, four churches, four chapels, four schools, an episcopal palace, townhall, hospital, and a large Franciscan convent, which now serves the triple purpose of school, home, prison, and theatre. Weaving, expressing oil and agriculture are the chief occupations. Annual fair in August. Calahorra is famous for the sugar it sustained from Omeir I omeyy 810-72 by whom it was taken, after an obstinate resistance and the most dreadful suffering from famine. Portions of its ancient walls, towers, and aqueducts still remain. Pop. 5994.—2 s. in Spain, Andalusia, prov. of, and 35 m. E. Granada. It has a parish church, two endowed schools, a townhouse prison, and a magnificent palace of the Marquis of Casa, of Moorish architecture, built in the 15th century.

Some little trade is carried on in wine, oil and grain. In former times, numerous iron mines, and two of silver, were wrought in the adjacent hills, near one of which is a mineral spring. Pop. 1993.

CALAIS, a seaport in and fortified place of the first class, France, dep. Pas-de-Calais, 20 m. N.E. Boulogne, on the strait of and 27 m. S.E. Dover lat. 50° 57' 38" N lon 1° 51' 10" E. (N) It has a tolerable port, at the junction of several canals which facilitate communication with Gravelines, Arras, Dunkirk, and St. Omer and is the terminus of the railway from Lille, through which it is directly connected with the metropolis. The town is nearly square is walled, well fortified, and has a citadel on the W side and several forts commanding the town harbour and approaches. On the land side, the country is flat and can be laid under water with the exception of an approach about 200 yards wide, protected by a cross fire. The ramparts are planted with trees, and afford an agreeable promenade. The streets are broad and well paved, the houses substantially built of brick, and the hotels in general excellent. Still the town has on the whole a dull aspect, and evidently owes its importance rather to the number of travellers who pass through it, than to any particularly favourable circumstances pertaining to the place itself. The place d'armes near the centre of the town has some good houses, and here the Hotel du Villa, built in 1740 is situated. The cathedral contains a fine altar-piece in Genoa marble, and above the altar is a magnificent painting of the Assumption, by Vanduyck. Other noteworthy objects are, the *cours de Commerce* the columns erected to commemorate the landing of Louis XV. III in 1814 the public library with 12,000 volumes, theatre, barracks containing an enormous water cistern, and the hotel, *Domain*, which combines a hotel, theatre, garden, and public baths. The town is so ill supplied with spring water that the inhabitants are obliged to content themselves with the rain collected in cisterns. Calais is the seat of a tribunal and chamber of commerce the residence of several foreign consuls, and has an agricultural society school of design, and school of hydrography.

The harbour is formed by two canals which are contained seaward by wooden piers the whole being about three quarters of a mile in length. At ebb tide it is nearly dry and has

THE BELLRY AND LIGHTHOUSE, CALAIS.
From Voyage des Français en France.

not a greater depth than 15 or 18 f. at high water according to the wind. A tower in the centre of the town serves as a lighthouse, the light of which is revolving, and is 118 f.

above the sea level. A stationary tidal light at the red fort, *amouzon* when the port is accessible. Good anchorage ground from 2 to 8 m. N. W. the harbor. Galais is well known as one of the principal ports for the debarkation of travellers from England, there being daily communication with Dover by steamboat, and several times a week with London and Ramsgate. In 1849 the number of travellers that arrived by sea was 25,411 and in 1850 it reached to 53,864. The manufactures of the town formerly inconsiderable have risen of late to some importance. The bobbin net trade employs 798 looms, and from 4000 to 5000 articles. Numerous mills have been erected, steam-engines are multiplying, and the finer manufactures have been removed to make way for the factories. There are also some oil and soap works, tanneries, and a salt-refinery. Vessels are built here, and fitted out for the cod, mackerel, and herring fisheries. A considerable trade is carried on in spirits, salt, oil, grain, wine, hemp, wood, coal &c. and not less than 55 millions of eggs are annually exported to England.

In 1247 Calais was taken by Edward III. of England after a siege of 11 months. The story of his determining to execute six of the principal burghers, with the heron Estaci de St Pierre at their head, and of the sparing their lives at the intercession of his wife, Queen Philippa, is too well known to require repetition. Calais remained in the hands of the English from 1247 to 1568 during which time they improved the town, and strengthened the fortifications. In 1568, it was taken by the Duke of Guise, and was the last rule of the Gallic dominions of the Hapsburgs which at one time comprehended the half of France. Pop. 10,678.

CALAIS, a in U. States, Maine, r bank St. Croix, (nearly opposite St. Andrews in New Brunswick) 140 m. N. E. Augusta; lat. 44° 7' N lon 69° 5' W. It has an upper and lower village 2 m. apart, connected by a railroad 10 schools, and a grist and 30 saw mills, propelled by the falls, which afford excellent water-power. A low lower falls is a bridge across to the British side of the river. The tide rises here 33 ft. and vessels of the largest size can ascend to the lower village. Pop. 2354. [Add. See RIVER.]

CALAIS (JAS DE) See PAS DE CALAIS.

CALAMATA or KALAMATA (Uroek, *Falamar*), a seaport, Greece, Moravia, cap gov. Messenia, at the head of the Gulf of Koron. It stands about 1 m. from the sea, 1 bank Noton, a torrent which emerges from a rocky gorge in Mount Taygetum, and has a small suburb on the other side of the torrent, with mules and garden supplied from it, by an artificial channel. It is the seat of the bishopric of Messene of a court of first resort, and has a busy trade. Its exports consist of wool oil raw silk and figs of the first quality, and is noted for a particular kind of handkerchief, which from the brilliancy of the colours, and moderate price, is in great demand throughout the Levant. In 1847 the arrivals in the harbour were 1106 vessels, tonnage 18,024—departures, 1098 tonnage 12,430. The town was burnt by Ibrahim I. sultan, in 1825. Almost every house in Calamata contains a chamber for the wearing of silken robes. The pop. consists of 400 families of which only six are Turkish. (See *Leake*.)

CALAMATA or CALAMATA, a group of islands and prov. Philippines. The group comprises the islands Calamatas, Busuagan (which see) Coron, Lincapacan, and 1108 or 1109 between the islands of Palawan and Mindoro, besides numerous small islets. They lie between lat. 11° 25' and 12° 20' N. and three of them are intersected by meridian 120° E. The island Calamatas, having Busuagan N. and Lincapacan S. is about 86 m. long by about 17 broad. Fully fertile, and abounding in wild animals, such as deer, hogs and rats which commit great ravages on the crops. The provinces include the island group wherein it is named, the N. portion of island Palawan, and several islets adjacent. It is thinly inhabited, and produces gold, rice, legumes, excellent wax, honey, fruits, beautiful pigs, and fowls. It is hilly well wooded, and fertile soil yields turban and pearls and though in general dangerous, yet possesses some good harbours and anchorages. Pop. of prov. 16,038. (Mallet.)

CALAMO or KALAMO, one of the smaller of the Ionian Islands, between the S. end of Santa Maura and the coast of Greece, from which it is separated by a narrow channel lat. (E. end) 38° 16' N; lon 20° 54' E. It is about 7 m. long by 2½ greatest breadth partially covered with olives and

vine, but pasturage indifferent. There is a little harbour named Gerginon on the S. E. side affording good shelter where fresh water is to be obtained.

CALAMOTHA a in Spain, Aragon prov. of and 83 m. N. Teruel in an extensive plain, near r bank, Jiloca. It has a parish church, chapel two endowed schools, a *terracotta* prison and cemetery and some trade in cattle, wine, and grain. Pop. 1400.

CALA MOTTA, a in Spain, Asturias, 7 m. W. by N. Ragua, in the Adra. It is highly cultivated producing excellent wine and oil. With the neighbouring islands, Gila, pen and Maza it was either given or sold to Ragua, in 1080 by Silvestre king of Dalmatia. Pop. 500.

CALANDROOG a in Holland prov. N. Holland, on the N. Sea, 9 m. S. the Helder. It has a Reformed church and a school. This is the third church—two former ones, at considerable distances towards the W. have been swept away by the sea with a large tract of cultivated ground. Near Calandrog, the combined British and Russian forces landed, August 27 1799 and defeated a Dutch army with great loss.

CALANAB, a in Spain, Andalusia, prov. of, and 30 m. N. Huelva with a church two chapels, a townhouse, school hospital, and cemetery and some trade. In grain, flax, and cattle. Pop. 1949.

CALANIAN or KALANIAN a principal by Malay peninsula, E. coast, tributary to Sabu with river and town of same name.—The river ALAN is bounded N. and S. by the petty states, Sangora and Tringgan from which it is separated by the rivers Hanara and Baco, parallel 6° 15' N. which incloses the mouth of the river Calanian may be taken as the centre 10 of the territory which probably extends on either side about 30 m. The country is composed of vast plains and is soil clay mixed with sand. It is fertile and produces rice coffee, pepper legumes sugarcane bananas, &c. The principal mineral products are gold and tin.—The river has a tortuous course, is neither very broad nor very deep, has beautiful limpid water and sandy banks well stocked with a great variety of fish, and abounds in crocodiles.—The town which lies near the mouth of the river is composed of irregularly built huts interspersed among groves of coconuts, banana, durian and other fruit-trees. The houses, both inside and outside are filthy in the extreme.—The port is small shallow and sheltered on either side by a sand hill 1 on of principally estimated at 40 000.—(See *Journal des Voyages*, &c.)

CALANPIGA ISLANDS a group of islands N. E. coast, Sumatra lat. 0° 29' to 0° 51' 30' S. lon 104° 14' to 104° 44' E. The three principal islands are high and may be seen 4 m. from the deck. CALAP a small isl. N. Pacific Ocean Oil old Passage W. and Isl. 1 pa. lat. 16° S. lon 129° 30' E.

CILAPAN a in N. E. coast, Mindoro one of the Philippines lat. 13° 20' N lon 121° 10' E. It is a poor place, and badly built, has two small forts, but no port. The houses are covered with the bark of a species of palm, called Cabonggo, remarkable for its durability. Pop. 2799.

CILAPAN par Irel Warklow 19,384 ac. Pop. 2402.

CALANCISETTA or CALANCISETTA a in Sicily prov. of, and 14 m. N. E. Calanica v. t. numerous caverns and sulphurous springs in its neighbourhood. Pop. 4788.

CALANI ALIRA a in Spain prov. of, and 40 m. N. W. Murcia with streets badly paved and having two squares, a parish church chapel school house, four schools, a post-house and a public fountain. Waving grinding corn and rice, expressing oil, tilage and tanning cattle, occupy the inhabitants, who also trade in cattle. Pop. 6275.

CALATABELLUTA a in Sicily prov. of and 27 m. N. W. Girgenti near r bank river of the same name—the *Oriente* of the Romans. The ancient *Tricella*—the principal fortress occupied by the insurgents in the war of the slaves—was situated in the vicinity of the town. Pop. 4766.

CALATAMBI a in Sicily prov. of, and 21 m. N. S. E. Trapani. It is badly built, has a ruinous castle on the summit of a neighbouring hill, environs well cultivated, and extremely fertile. It occupies the site of the ancient *Longoromo*. Pop. 3578.

CALATAGIRON, or CALATAGIRON (anc. *Calata Hieron*) a in Sicily prov. of, and 22 m. S. W. Catania, on the slope of a hill and with its suburbs occupying a considerable extent of ground. It is reputed one of the wealthiest towns

In the island, has spacious and clean streets and its municipal regulations are judicious compared with those of the generality of southern towns. It contains several churches and convents, a royal college, hospital, and orphan asylum is the seat of a bishop, and has an academy with four professors. The inhabitants are esteemed the best workmen in Sicily in the useful arts, and manufacture good pottery-ware and cotton fabrics. Several fairs are yearly. It was fortified by the Spaniards, and taken from them by the Genoese. The famous Roger Guiscard secured extensive privileges to the town. Pop. 21 00

CALATAYUTURO, a tu Sicily prov Palermo 37 m N W W Calatimitta, on the Grande. Jasper is found in the neighborhood. Pop 2408

CALATRAVA (SANTIAGO) a tu Spain, Andalusia prov of, and 30 m W by S. Jena. It is composed of a square, and some ill made streets and contains a parish church, small townhall prison, endowed school, public storehouse, and cemetery. The people are engaged in tillage and cattle-rearing. In the vicinity is a quarry of white marble, of superior quality. Pop 1014

CALATRAVA LA VIEJA In Spain, the remains of the ancient city of Calatrava, on the R bank of the Guadiana, 65 m. S.E. Toledo known as the *Orcus* or *Orca* of the Orcus under the Romans. In the Middle Ages, it was strongly fortified, and was considered the key of the sierra Morena, the lofty barrier between Castile and Andalusia. The military order of Calatrava was founded here in 1158; the Knights at first retained the Cistercian habit, but afterwards shortened it, to make it more suitable for the field. They subsequently adopted a secular dress for common use and one for ceremony consisting of a mantle of white silk, tied with a cord and tassels. The Knights rendered themselves famous in their contests with the Moors. The institution gradually degenerated, and in 1493 the grand mastership was united to the crown. About 80 years after its union to the crown, which was destroyed in the days of its glory by the title of the pallant order.

CALATAYUD [see *Baldia*] a city Spain, Aragon prov of and 45 m. W Saragossa, 1 bank Jalon near its junction with the Jilón. It lies in a plain at the foot of two rocky ridges, the summits of which exhibit remains of several Arab fortifications. The city is divided into two parts, high and low. The former or old Moorish town called Morcia, is chiefly inhabited by a poor and miserable race of people, living in caves and hovels. The latter or modern town contains numerous clean well-paved streets and 22 squares, lined with commodious houses and handsome public buildings. Calatayud possesses in all 15 churches those of Sta. Maria and St. Raphael, are elegant, and deserve especial notice. Sta. Maria was formerly a grand Arab mosque, built prior to the conquest of the city by Alonso the Brave, in 1120 it has a lofty octagonal tower. St. Raphael built in 1611 on the site of an earlier edifice bearing date 1156, in the Doric style and contains many curious relics. Of the remaining churches two or three are handsome Gothic structures and that of Santiago was also once a mosque. The other noteworthy public edifices are—a spacious guild-hall with session-house and jail attached, three hospitals, a theatre, barracks, bull-ring, workhouse, college, several primary and other schools an episcopal palace and extensive and magnificent old castle in the environs many agreeable public walks and pleasure-gardens. Manufactures.—linen and hempen fabrics, canvas, ropes, soap, paper, wool, oil &c. Considerable trade is carried on in cattle, grain, fruit, hemp, and manufactured goods. An annual well-attended fair for cattle and agricultural produce is held in September. Calatayud is the birthplace of the poet Martial and the painter Voss. Pop. 7135.—(Hicks)

CALAYAN an Isl Indian Archipelago. See BARANAYAN.

CALBE or **KALBE**, a tu Prussia, gov of and 15 m. S. Magdeburg, circ. of same name, on the Saale here crossed by a bridge 1270 ft. in length. It has walls, with five gates contains two parish churches, several hospitals, and other endowments and has manufactures of woollens, paper, distillery oil and best root sugar. The railway between Leipzig and Magdeburg passes the town at the distance of a mile, where there is a station. 1 of 6000.—The CUCKLE,

area, 161 000 sq. m. is level and tolerably fertile. Pop. 50,175.

CALBOURNE, par Eng Hants; 6897 ac. Pop. 781
CALCA, a prov Peru, dep. Cuzco, and N the city of that name. The surface is broken and uneven, but the temperature mild, excepting on the heights, where it is very cold. The soil is extremely fertile, producing in great abundance sugar-cane, wheat, maize, &c. and a great variety of fruits. The sugar made here is the finest in Peru. Three considerable rivers have their sources in and around this province, these are the Puro or Beni the Yambari or Pauranamba, and Uruambana.

CALCAR, a tu Prussia, gov Danneberg circle of, and 8 m. S.E. Cleves, on an island formed by the little river Ley. It contains two churches (a Protestant and a Catholic), the latter possessing some fine paintings; and a handsome town house has manufactures of cloth, flannel, hosiery and has a tannery, brewery, polish work and some trade in wood and coal. It has also four cattle and two general markets. Pop. 1900

CALCESITTE or **CALCARE** a river and lake U States, Louisiana. The former rises in lat. 31 25 N. and, after a R.B.W. course of about 110 m. falls into the N. extremity of the lake of the same name which, again discharges itself into the Gulf of Mexico.—The LAKE is upwards of 30 m. in length about 10 m. in breadth, and is distant from the sea 9 or 10 m. At the N. end of the lake, and stretching from N.E. is an extensive prairie called the Great Calcasieu Prairie.

CALCH a vil and com. Tuscany prov of, and 7 m. F Pisa near r bank, 1700 It is well built, commanded by a castle belonging to the Archbishop of Pisa and possesses a handsome parish church which has a fine marble font and granite pulpit. A considerable quantity of oil is manufactured here. Pop. 2000

CALANAJA a tu, and com. Tuscany prov of and 12 m. P Pisa in a plain r bank Arno. It is well built and possesses a fine church. The city is fertile and the inhabitants are chiefly engaged in husbandry. Pop. 3222

CALCINATE, a vil kingdom of Italy Lombardy prov of and 10 m. E.E. Bergamo, on the post road to Brescia. It is tolerably well built, and possesses a handsome parish church school hospital and poorhouse. The inhabitants are mostly engaged in husbandry and cattle rearing. Pop. 1896

CALCINATO a tu kingdom of Italy Lombardy prov of and 12 m. S.E. Brescia, on a gentle declivity 1 bank Chiese. Here the Austrians were defeated by the French April 19 1796 Pop. 3673.

CALCIO a tu kingdom of Italy Lombardy prov of and 18 m. S.E. Bergamo r bank, Oglio, on the highroad from Milan to Brescia. The streets are well made and clean and the towns possess two handsome churches, an hospital and a brandy distillery woollen linen and hempen fabrics oil and wine are manufactured and considerable attention is paid to the rearing of silkworms. Calcio was formerly the capital of a small province called Calcinato, when its importance and population were much greater than at present. Pop. 2900.

CALCKEN a tu, and com. Belgium prov E Flanders, 8 m. E Ghent, 1 bank, Scheldt. It has breweries, bleach-works, flour col, snail tank, and saw mills, and an annual horse fair. Pop. 4322

CALCUTTA [Kalka Ghatik, the plant or head-quarters of the golden Kalka; in acts of Parliament called the Town of Calcutta, and Factory of Fort-William] a well-known city Hindoostan, cap. of presid. and prov Bengal and seat of the supreme government of British India lat. 22° 33' E° N. lon 88 19' S° E. (a.) situate on a level tract, 1 or E bank, Hooghly a branch of the Ganges, about 100 m. from the sea. It is about 4½ m. in length, S.E. to N.W., along the course of the river and in breadth E to W from 1½ to 1½ m. at the broadest part, which is about the centre. At either extremity the width does not exceed half a mile. Beyond these limits, however, there are numerous suburbs, villages, and detached residences. A spacious way called Circular Road encompasses it on the land side follow- ing the line of the ancient entrenchment called the Mahatma ditch and marks the boundary of the liberties of the city, and

of the administration of English law. On the W. side, or that next the river, is an extensive quay or break-work, about 3 m. long, called the Strand, 40 ft. above low-water mark, and having landing places or piers, at intervals throughout its

entire length. The river opposite the city varies in breadth from about two furlongs at the narrowest part, to about three quarters of a mile at the broadest. The approach to the capital of British India, by the Hooghly is thus described by Davidson. — On arriving at Garden Reach the stranger may begin to imagine that, not wholly without reason Calcutta has acquired the title of the city of palaces. From the lower part of this Reach, on the right the river bank is laid out in large gardens, each with a handsome mansion to its centre and the whole seems a park of opulence and splendour. On approaching the head of Garden Reach, the stranger all at once beholds Fort William, and the town of Calcutta spread out before him, and a splendid view it is. Should he arrive in the month of November or December he will behold perhaps, the finest fleet of merchant shipping the world could produce.

Calcutta is divided into two distinct portions, the one, the N. portion is occupied by natives the other the S. by Europeans. In the former the streets are narrow and dirty, the shops and warehouses mean-looking. The lower parts of the houses contain the bazaars, and the upper the dwelling-houses. This department of the city is crowded with a low and heterogeneous population; many being half-naked numbers entirely so, while others are bedizened in tawdry and fantastic garments discordant noises of all sorts, and most offensive smells, complete the repulsive character of this portion of Calcutta. It is different with the S. or European portion. Here the streets are spacious; the houses, most of them detached, large and handsome, built of brick, and stuccoed, which gives them the appearance of marble palaces.

Chowringhee, which lies E. of the fort, is the fashionable

and favourite quarter of the town, being apart from the quarter of trade and commerce. The streets there are wide, the houses handsome and detached in their own grounds. Both the Episcopal and Presbyterian burying-grounds are in this quarter of the city. The road which bounds Chowringhee on the W. is about 80 ft. wide, and runs along the E. side of the Maidan or plain, from N. to S. The new theatre called the *Sans Souci* (an elegant Grecian structure) and the Asiatic Society's House (a plain building) are the only public edifices in this quarter. The ornamental character of some of its private houses with their garden enclosures is in some degree marred by the inconspicuous proximity of native huts and open patches of uncultivated ground which are however diminishing as building extends in this direction.

The suburbs of Calcutta are extensive and Garden Reach about 8 m. S. of the town is the most striking as to architectural and park like features, which are seen and admired from on board the ships, while sailing up the river. The houses are occupied by Europeans. The grounds are extensive and lead out with fine trees, and numerous of shrubs interspersed with the bright colours of tropical plants while the scene is enlivened by the ships constantly passing up and down. On the opposite bank are the botanical gardens, remarkable for their extent and beauty and for the noble banyan and other trees which adorn them and lower down is seen, on the same side of the river the elegant Gothic structure of Bishop's College. Allpore and Ballygunge are other suburbs to the E. both healthy and having also garden houses of Europeans, but without the river view. East of Calcutta lies the suburb of Entally chiefly inhabited by Europeans or half-castes, and natives. Further towards the N. are the populous suburbs of Sealdah and Simlaah running into other like suburbs, containing the houses of wealthy natives, and the huts of their poorer countrymen show a—what is so common in Eastern cities—a commingling of the stately mansions of the wealthy with the wretched hovels of the poor.

The houses of British residents in Calcutta have the fore court or garden surrounded by a wall, the dining room on the ground floor, the middle story surrounded by a verandah supported by pillars, occupied with the sitting rooms of the family and in the upper stories, the bed chambers. Bath rooms are universally introduced and all the apartments are supplied with a *pudding*, moving noiselessly by means of a *cord* led into an adjoining apartment. Europeans, early in the morning take out-of-door exercise the air being if on cool. At nine o'clock, after bathing they take breakfast when in the case of a family they dispense for their several avocations. At the approach of sunset, every one seeks recreation on horseback or in carriages, till eight o'clock, when dinner is served everything being conducted on the most splendid scale, and including every attainable luxury. The tea is brought in large blunks from Amoy and is preserved in coolness. In the cooler season theatricals, concerts, balls and horse-racing give a variety to the social entertainments.

Trades, Dealers, &c.—The want of expensive outward decorations of the shops, and the absence of all show of goods in their windows, most strikes a stranger forcibly. But some improvements in these respects are now beginning to be made and within, no disappointment will be met with either as to the quality of the goods, or as to the skillfulness of the European tradesmen by whom they are manufactured. Everything, in short, may be obtained here which money can purchase, as readily and as good in quality as in England. Several English firms have carriage manufactories, and turn out in a style equal to that of Long, Acers, baronets, gnomes, chariots, and other descriptions of carriages adapted to the climate. The taste for the more elegant and expensive European equipage is extending among the rich natives. The principal trades practised by Europeans are those of hotel-keepers, jewellers and silversmiths, watchmakers, cabinet makers, carvers and gilders, fancy stationers, dealers in objects of vertu, book-sellers and bookbinders, hoot and shoemakers, tailors, mantua-makers, milliners, ironmongers, apothecaries, confectioners and pastry cooks, grocers, dealers in oilman's stores, tea, wine, and spirit dealers, coach-makers, heavy-stable keepers and horse-dealers, bone-balers, shipbuilders, iron-founders, and lastly undertakers.

The native shops are in what are called *bazaars*, being

houses in close narrow streets, in the native towns where the rooms in the different floors are appropriated to the selling of all descriptions of goods. Among these, the principal are *Batta bazaar* and the old and new China bazaar. In the two latter the native shopkeepers sell imported European goods. In the *Chitpore Road* are found numerous stores of

Within its walls are store-rooms, ordnance-yards, powder-magazines, barracks, a church, &c. Around the E. margin of the *Maidan*, are a series of walled tanks. At the S. extremity is the grand jail and the race-ground, of a triangular form, with a course of about 1½ m. in length. At the N. side, which is called the *Eplanade*, is the Government-house, the

palace of the Governor-general a magnificent pile, built by *Marquis Wellesley*. It has four wings, with a stupendous dome in the centre and is surrounded by a colonnade of Ionic pillars. In a line with the Government-house, and fronting the *Eplanade*, are splendid mansions, with handsome verandahs, supported by lofty columns. This is one of the healthiest localities in the city. It is also a favourite resort of the fashionable world, being the *Hyde Park* of the Indian capital. Another favourite promenade is the *Strand*, where both Europeans and Indians go to enjoy the cool of the evening and where, on such occasions, as to be seen an imposing display of handsome equipages, with crowds of ladies and gentlemen on horseback all attended by a horse-keeper to each horse called a *Agua*. After the Government-house the principal edifices worth noticing are the townhall, supreme court, Government treasury, writers' buildings, the *Metcalfe Hall* the mint, where it is said 500,000 coins can be struck off in 24 hours, and in which nearly 900 workmen,

native made furniture (after European models), of mahogany or teak wood (a red wood resembling mahogany), and teak wood but inferior both in elegance and durability to that manufactured in the workshops of European tradesmen, and therefore sold at much lower prices. The natives who practise trades on their own account cannot compete, in finish and exactitude with the well turned out articles of the European workshops where natives also labour, but under the direction and guidance of the European head, whose better training and habit of working by rule, correct their faults and defects. The butcher, poultry, fish, fruit, and vegetable markets are all designated bazzars, and are admirably supplied. The nation of Bengal is equal to the best Highland mutton and the best of the small *Bengal cow* is sweet and delicate.

Public Buildings.—At the S. W. extremity of the city is a large space of verdant, level ground, about 1½ m. in length, and about 1 m. in breadth, called the *Maidan*, bounded, E. by the *Chowringhee Road*, and W. by the *Hooghly*. In his

chiefly natives are employed the *Hindoo college*, the *Madras or Mahometan colleges*, the General Assembly of the Established Church of Scotland a institution the Free Church of Scotland a institution, the *Kemal Club* the theatre, the medical college the general hospital, the native hospital, the mechanics' institute, the orphan school, the *Irish-house* the *Martins*, the race-track, the *Anasie Society's* rooms, and the *GI* sec. for burning the dead bodies of *Hindoo*.

The monuments are, General Sir David Ochterlony's pillar on the *Maidan* the statue of the *Marquis of Wellesley* in an open *Grecian* building in *Tank Square* *Prinsep's* statue, S. of it a fort the bronze statue of *Lord William Bentinck*, in the *Eplanade*, and the bronze statue of *Lord Auckland*, on the S. of Government-house the marble statue of the *Marquis of Cornwallis* and others, within the town all and to *Bahadur* *Haider* and others in the new and old cathedrals, and the monument between the W. gate of *Fort William* and the river erected by *Lord Ellenborough* in commemoration of the victory gained at *Gwalior* during the government.

The religious edifices are, the new cathedral of *St. Paul's*, the old cathedral or *St. John's Church* the old *Mumoon Church* *St. James's Church* *St. Thomas's Church* or *Free-school Church*, *St. Peter's*, with in the fort all these belong to the Church of England *St. Andrew's Kirk* con-

secrated with the Established Church of Scotland the *Free Kirk*, built since the *Disruption* by voluntary contributions. Three *R. Catholic* churches the *Greek church* the *Armenian church* the *Maronite church* the *Sinaitic church*, in which a converted, educated, and especially ordained *Hindoo* officiates besides *Mahometan* mosques, *Hindoo* temples, and a *Chinese temple*. The churches connected with the *English Establishment* are under the *Bishop of Calcutta*, and *Metropolitan of India* and

BARAKAS ON THE CHITPORE ROAD CALCUTTA. — From *Payson's Views in Calcutta*.

THE GOVERNMENT HOUSE AND TREASURY CALCUTTA from the old *Quorum*.—After drawing by *William Prinsep Esq.*

lain, about 1 m. from the city and commanding the river being separated from it only by the *Strand Road* and the *West Dock*, stands *Fort-William* one of the largest and most regular fortresses in India. It was constructed by *Lord Clive*, after the battle of *Plassey* (1757) and has cost altogether 23,000,000 sterling. It mounts 619 guns, from 12 to 32 pounds will hold for the purposes of defence, 15,000 men contains 80,000 stand of arms, and is usually garrisoned by one European, two native regiments, and a detachment of artillery

in detail with the Established Church of Scotland the *Free Kirk*, built since the *Disruption* by voluntary contributions. Three *R. Catholic* churches the *Greek church* the *Armenian church* the *Maronite church* the *Sinaitic church*, in which a converted, educated, and especially ordained *Hindoo* officiates besides *Mahometan* mosques, *Hindoo* temples, and a *Chinese temple*. The churches connected with the *English Establishment* are under the *Bishop of Calcutta*, and *Metropolitan of India* and

the archdeacon and clergy are all salaried chaplains of the Company appointed by the Court of Directors. Calcutta was made a bishop's see in 1814 and on the creation of Madras and Bombay into bishoprics in 1838, the Bishop of Calcutta became Metropolitan of India, with jurisdiction over them, but subject himself to the Archbishop of Canterbury. The new cathedral is a splendid Gothic building on the E. of the Maidan or plain. It was erected by voluntary subscription. The old cathedral was begun in 1784, and was built by voluntary subscriptions also, under the auspices of Warren Hastings, Governor-General.

St. Andrew's Church was built soon after the appointment of the first chaplain of the Church of Scotland, in 1814 and two ordained ministers of the Established Church of Scotland now officiate therein. They are, like the ministers of a sister establishment, salaried chaplains of the East India Company. The Kirk-session in Calcutta and that of each of the two other presidencies of Madras and Bombay are subject to the ecclesiastical jurisdiction of the presbytery of Edinburgh. These three kirk-sessions jointly elect and send one minister and one elder as their representatives, to the General Assembly of the Established Church of Scotland. In 1884, a presbytery was established at Calcutta by the General Assembly with power to license and ordain native preachers in connection with their literary institution. The Greek church was built in 1781 and the Greeks declare the crown of England the protector of their church. The ministers are taken from Greece by permission of the Patriarch of Constantinople. The Armenian church was built in 1724 but has since been added to. The Armenians were invited, as far back as 1680 by Job Charnock, then Governor to settle and trade in the Company's factories and a written agreement was executed between them giving them exclusive privileges for trade, and the protection of the company.

Educational Institutions.—The educational institutions and affording religious instruction are—the college of Fort William for the members of the Company's civil service, the Hindoo college, the Madras or Mahomedan college, and the Sanskrit college, all supported by Government and managed through their committees of general instruction. The first two are situated to be below (through the medium of English) instruction in the sciences and literature of the world apart from any religious instruction. There are several schools, taught by natives for instruction in English, and in the vernacular languages and a native female school has been lately established by Mr. Bhatnagar member of council.

The educational institutions affording religious instruction are, Bishop's college founded in 1820, by the society for the propagation of the gospel in foreign parts at the instance of Bishop Middleton, the first bishop of Calcutta. It has been since supported by the Church of England at home. It has a principal and two professors from the English universities, and is intended for the education of missionaries, catechists and schoolmasters.

The General Assembly's institution established in the year 1829 its object is to spread among the native youth a knowledge of the evidences and doctrines of the Christian religion, by means of a sound and liberal education, under ordained missionaries of the Established Church of Scotland. It is divided into the normal school and college department and a theological course is now added, to prepare native youths for becoming licensed ordained preachers, under the authority of the Established Church of Scotland.

The Free Church institution was established, on the Disruption on similar principles, and with similar objects, by the able missionaries, Dr. Duff and the Rev. Wm. Mackay who raised the other institution to its high place in public estimation.

The high school, the free school, the parsonal academic institution the Christian association society the ladies school society several ladies societies for native female education, the Christian tract, and book society and the Armenian philanthropists are other institutions of a religious character. St. Xavier's College, and I. Orestes House are institutions established and conducted by Jesuits and the latter is an establishment for the education of young ladies conducted by nuns of the Ursuline order who came from England for that purpose.

The Maristines, founded under the will of General Claude

Martin, a Frenchman, who had been in the Company's service, and died at Lucknow was opened in 1836. The original bequest, with its accumulation of interest amounted in 1830 to nearly £100,000. The building cost about £25,000. It provides gratuitous board &c. and a liberal education to a certain number of both sexes, on the foundation of indigent Christian children above the lowest class of the population without respect to religious denominations. Boys, in better circumstances, are admitted as boarders and day scholars to receive a superior education at a fixed monthly fee. A course of religious instruction and a form of prayers, were it is worthy of remark, framed by the penitency and united efforts of the Protestant bishop of Calcutta, Dr. Wilson the B. Catholics, your apostolic, Mr. St. Lepor and the senior minister of the Scotch Church Dr. Charles which are used by all in the school while the children of each denomination receive private religious instruction from their respective pastors.

The Benevolent Institutions are—A government savings bank, the general hospital the native hospital the fever hospital the police hospital the Howrah sanatorium hospital the leper asylum, dispensary, phthisis leprosy district charitable society Dwaraknath Tagore's fund for blind poor Bengali military orphan institution, European female orphan institution, the sailor's home, and some others.

The Religious Societies are numerous. The most important are the Church missionary association, the diocesan committee of the society for the propagation of the gospel in foreign parts, the diocesan committee of the society for promoting Christian knowledge, the auxiliary Bible society the Church missionary association Christian institutions of the London missionary society the student's friend, or Bethel society and native Christian protection society.

The Library and Scientific Institutions are—the Asiatic society the mechanics institution the public library the medical and physical society and the nat. & medical college. The last is a most admirable Government institution, for training the natives to become efficient and skilful surgeons and medical practitioners. There the highest caste Hindu students religious motives and still may be seen handling the dead anatomy, and using the scalpel like a European without being excused by his countrymen from the privilege of his caste—a wonderful victory gained over their religious prejudices! There are also the agricultural and horticultural society and in connection with them may be mentioned the beautiful and extensive botanic gardens of the company a little S. of Calcutta, on the W. bank of the river.

Commercial Companies and Corporations.—The bank of Bengal the bonded warehouse, and the Assam tea company are corporations branches or agencies of the Agric. and united service bank, the oriental bank and of the North western bank, are established in Calcutta. There are also the chamber of commerce, the trade association, indigo planter's association the docking company the steam-tug company and a several river navigation companies, marine and life insurance offices and provident societies.

The Newspapers published in Calcutta are—the *Markata* Englishman, *Morning Chronicle*, *Eastern Star* and the *Government Gazette* besides several native newspapers in the vernacular languages.

Courts of Law.—Her Majesty's supreme court of judicature, at Fort William, was established by charter 18 Geo. III. in 1774 which vested in it criminal civil admiralty and ecclesiastical jurisdiction subject only to an appeal to Her Majesty in her privy council. It has a chief and two puisne justices, appointed by the Crown, who must be barristers of a certain standing at the English or Irish bar and either practicing in that court, or in the courts at home. It has exclusive criminal jurisdiction on with jury trial over all the inhabitants of Calcutta who are placed under the protection of British law. The civil jurisdiction of the court is equally extensive but with this reservation, imposed by the statute 21 Geo. III. cap. 70 namely that the court shall administer their own respective laws of inheritance succession and marriage and of contract to Hindoos and Mahomedans. The entire common law of England and the statute law then existing, so far as applicable to the state and settlement of the settlement, were transferred to Calcutta, by

virtue of the charter of 13 Geo. I. in 1736 establishing the first legal tribunal called the mayor's court. Acts of Parliament passed since, do not affect India, unless India be specially mentioned. Beyond the limits of Calcutta, both the criminal and civil jurisdiction of the supreme court, extends over all British-born subjects of Her Majesty and their lawful descendants, residing within the presidency of Bengal, and the provinces from time to time annexed thereto and its civil jurisdiction extends also over natives, and all other inhabitants of India, residing within those extended limits, who enter into written contracts with any British-born subject and agreeing therein, that if dispute should arise, the matters between them should be determined by the supreme court. The practitioners in the supreme court are divided into two distinct branches, as in England, namely barristers, called advocates and attorneys. An insolvent court connected with the supreme court, was established in 1839. The present insolvent act in the English statute 11 Vict. cap. 21 and, in respect of trustees, it has provisions similar to those of the English bankrupt act. A court for small causes (one of the judges in which is a Hindu) exercises jurisdiction, in some respects subject to and confined within nearly the same local limits as the supreme court.

The police officers in Calcutta are presided over by paid magistrates—justices of the peace—who exercise a criminal jurisdiction, auxiliary and subordinate to the criminal jurisdiction as exercised by Her Majesty's judges in the supreme court. The Calcutta courts of *Shudder Dwaney and Sudder Adawet* being the chief civil and criminal courts of appeal from the East India Company's local courts, in the provinces of Bengal, established under Government regulations, have no original or other jurisdiction within Calcutta. The Board of Revenue in Calcutta is invested with certain original and appellate judicial as well as with ministerial functions, created and defined by the Government revenue regulations in relation to the Company's revenue courts and officers, and the collection of the territorial revenue within Bengal.

Factories.—The factories in the city and neighbourhood using English machinery are—the Government foundry at Compoor having beautiful machinery for casting and boring brass ordnance the *Ghorat mill*, for making cotton twist the sugar manufactory at Seetpore, using vacuum pans and steam machinery and several corn, flour and oil mills, and a manufactory for steam boilers, with a foundry attached. The mill has powerful and efficient steam and other machinery for all the purposes of working the metals, and coaling country ship building was carried on formerly to a considerable extent, but is now nearly altogether extinct, *owis*, it is said, to the cheaper cost of construction in that country. The repairing of ships is, however, a considerable and lucrative business still and the Government and private docks are extensive and commodious.

Commerce.—Calcutta is now the great emporium of the East, monopolizing the whole internal trade of Bengal the nature and extent of which will be found at once fully and concisely exhibited in the following series of Tables—

		IMPORT.		EXPORT.	
		Value.	No.	Value.	No.

The principal articles of export are opium, indigo, sugar, saltpetre, rice, raw cotton, raw silk, piece goods, hides, lac &c. The principal imports—metals, piece goods, twine, and yarn, salt, hotel-stuff, books, glassware, wine, woods, woolens, &c. The banks of the Hooghly from the entrance of the river for many miles upwards, are low flat, and covered with jungle. Ships cannot venture to make the river without taking in board a pilot from the pilot schooner of the Company stationed in the bay and thithering sands with a rapid stream meeting a contending tidal rise, make the navigation of the river uncertain and dangerous, and demand the pilot's constant watchfulness and care. Therefore, as early as 1869 the Company (then having a settlement at Hooghly only 28 m. above Calcutta and up to which large vessels could then sail), obtained permission from the Mogul Emperor to organize an establishment of pilots, and the present efficient body of Europeans forming the Bengal pilot service has been the result. Government and private steam tugs, now plying on the river considerably lessen the risk of navigation, and lighten the labours of the pilots. The river stream of Calcutta, is about the breadth of the Thames at Gravesend. Ships of 1400 tons berden on and up and anchor off the city in mid-channel in 6 or 7 fathoms water or may lie at moorings within a few feet of the bank.

Government has sanctioned the construction of a railway from Howrah, opposite Calcutta to Fardham, with a branch to the Rangpur collection, in the district of Burdwan, in all about 120 m. An electric telegraph has recently been formed between Calcutta and Diamond Harbour about 60 m. down the Hooghly and it is intended to carry it down to near the mouth of the river.

Currency.—The coin now coined and current in Calcutta and provinces are the Company's gold mohur, rupee, and pice. The first is equal in value to 16 rupees, which are the silver currency and one rupee is about the value of 2s. sterling. Each rupee is equal to 16 annas (a nominal coin); and each anna is equal to four pice, the copper currency. The bank of Bengal

lowest notes, which pass current for their respective amounts and are received at the Government treasury and provincial collectors as cash in payment of Government revenue and other dues.

Climate.—The range of the thermometer in November, December, January and February demonstrated the cold season, is from 50° to 75° Fahr.; the N.E. monsoon then the prevailing wind, is bracing to the European constitution, relaxed by the preceding heat, and at this season the appetite and strength improve. Bells and gentry by night, and boating with spears, jackal hunting with bounds, and horse-racing with Arab, English New B. Wales, and country-bred horses are the amusements of the mornings during this season. European vegetables for the table are then grown and are fully equal to those produced in more temperate climates. March brings with it the S.W. monsoon and hot weather which increases in temperatures during the succeeding month and in May the thermometer reaches 90°-95° in the shade, 100°-110° in the open air; and the hot atmosphere of that month striking the face, on going out of a house from which the external air has been from sunrise carefully excluded, has been aptly compared to the heat of a blast-furnace. This heat, however, alleviated by occasional storms, called North-westers which are generally accompanied by thunder and lightning. In June the rainy season commences much to the relief both of animal and vegetable nature, and continues to the end of September; but there are very few days that have not some hours free from rain. The interval between the cessation of the rains, and the commencement of the cold weather is unhealthy from the moisture in the atmosphere, and a still powerful sun causing a rapid decay of vegetable matter. The climate has been, however, much ameliorated since the original establishment of the factory by judicious draining, clearing away jungle in the suburbs, and by opening up roads and thoroughfares and otherwise improving from time to time both the native and European quarters of the city. A permanent sanitary commission, with extensive powers, has been lately established by a local act. A stranger going to India, in order that he may be gradually acclimated, should as time has departed from England that he may arrive in the beginning of the cold weather. The sun of Bengal is singularly prejudicial to Europeans, and at no season is it safe in Calcutta to be in the open air when the sun is up without some protection from its rays. Carrages, rags with lead or hoods, or palanquins carried by natives, by means of poles resting on their shoulders, are therefore, absolutely necessary for Europeans. The proportion of deaths to the population is 9.18 per annum nearly—that of London is about 9.16 the difference being accounted for on the score of climate.

Population.—The population of Calcutta, according to the census of 1837 amounts to 229,714. But the apparent population seems much greater from the crowds of people which pour into the city from the suburbs, during the day to earn a livelihood, and which according to the same census, amount to the additional number of 177,000. The inhabitants of Calcutta may for judicial purposes be divided and classed into—1. British-born subjects and their legitimate descendents, about 8189 in number. 2. Hindoos or Gentoos, of Bengal and of the Upper Provinces of Hindoostan in number about 137,651. 3. Musulmans or Mahomedans of Bengal and of the Upper Provinces of Hindoostan, in number about 58,744. 4. Other natives of Asia, neither Hindoos, Mahomedans, nor Christians—such as Parsees, Chinese, Arakanese, Jews, Arabs and Moguls. 5. Portuguese, American French and other Christians of native or foreign extraction, together with half-castes, or illegitimate children of British subjects by native mothers, and their offspring numbering about 4,746.

The Society.—English—is excellent, being composed of members of council, judges, and heads of departments, and members of offices and boards, employed in the administration of the affairs of the Company civil, and military and of other officers and servants of the East India Company of both services, and the bishop and clergy, then the judges of the supreme court the barristers, attorneys, and merchants, who are all independent of the Company.

Steam Communication with Great Britain.—Besides the continuous communication kept up by fast passenger and other sailing vessels round the Cape of Good Hope, passengers and mails are carried once a month, to and from Calcutta, by what

is called 'the overland route, namely Alexandria Cairo and Suez. The Peninsular and Oriental Steam Navigation Company undertakes the mail service, under contract with the Imperial Government and at the same time, carry passengers in the large steamers employed by them, and which leave Southampton on the 20th, and Calcutta on the 8th, of every month. Two other companies are in the field—the one to be called the Eastern Steam Navigation Company to occupy the same line as the Peninsular and Oriental, but their steamer to pass Plymouth on the 1st of the month for Alexandria, in correspondence with one from Calcutta. The other the Screw Steam Navigation Company now carrying a mail to the Cape of Good Hope, intend extending that line to Calcutta.

Early History.—Job Charnock, the agent of the London company the first English East India Company incorporated by charter of Queen Elizabeth in 1600 was the founder of Calcutta. The first factory in Bengal of this powerful Company was established at Hooghly 28 m. higher up the river under a decree of the Mogul Emperor of Hindoostan, Shah Jehan, dated 1654. In the year 1686, the Company's then agent, Mr. Charnock, was with his council and factors driven out of it, by the Nawab of Bengal, and on December 30 while sailing down the river he was attracted by the shade afforded by a large tree in the village of Chittanuttie (the present site of a part of Calcutta) and accordingly he and his people landed and began to entrench themselves there. Finding it inexpedient to remain they left in February 1690 and did not return until some time after the treaty with the Nawab, of August 1697 was signed. In October 1699 they again took their departure, and went to Madras. Questions how ever having been made to them by the Nawab, by the orders of the Emperor Mr. Charnock with 11 council and factors returned to Chittanuttie on August 24, 1690 when the Emperor gave them permission to form a commercial settlement, but prohibited the erection of any fortifications. Here, then the settlement was permanently fixed as the head quarters of the Company's commercial establishments in Bengal. One officer and thirty men came from Madras with Mr. Charnock, that being the military establishment originally allowed by the Emperor 'to do honour to the principal agents. This period, therefore, may be considered the era of the foundation of Calcutta. Its founder Charnock, died in 1699 and lies buried in the old cemetery where St. John's Church (the old cathedral) was afterwards built. The settlement rapidly increased, being situated on a navigable river and therefore well adapted for being the emporium of the trade of Hindoostan. In 1696 a grant was made by the Nawab of Bengal confirmed by the Emperor Aurangzeb, of the village of Chuttanuttie together with two other villages called Kallighat, and Govindpore adjoining reserving an annual rent to be paid by the Company of 1196 rupees. Walls of masonry with bastions at the angles, were first raised in the same year by the permission of the Nawab as a defence to the factory against a rebel Zemindar or land holder of Bardwan. Thus originated the fortifications of Calcutta.

The old fort, called Fort William in honour of King Wil. III. was not begun to be built until the year 1699 and that fort, and the European part of the town were erected on the site of the village of Kallighat, and hence the name Calcutta. The fort occupied the site of the present import warehouse, extending to about the centre of Tank Square, then called Tank Bazar or the Park. Part of the present native portion of the city on the N. occupies Chittanuttie while the Govindpore has disappeared and in its place we now see a magnificent garden or plain, on the S. of the city in which is placed the new stadium, also called Fort William. As late as the year 1717 a forest stood immediately in front of the town to the S. on what is now the esplanade. In 1720, however, considerable improvements were made in the public buildings, and roads were opened, to contribute to the salubrity of the city. At this period, and for many years after the maiden or plain and the site of the present stadium as well as the space now occupied by Chowringhee, were a complete jungle, interspersed with the huts of natives, patches of rice cultivation and grazing ground.

Calcutta, however has had vast quantities of forests. In the year 1757 the town extended about half a mile above and below the old fort, and about 800 yards inland, the houses of the English were in number about 70 and were detached in

imperial enclosures. In the same year Calcutta was captured and plundered by the Nawab of Bengal, Saad-ud-daulah, after a spirited defence and many of our brave countrymen, after the ignominious flight of the Governor were taken prisoners, and fled from subjection in the Black Hole where they had been placed for safe custody. Colonel Clive afterwards Lord (river) with about 3000 men, assisted by Admiral Watson, with a fleet of three King's ships, were sent from Madras. They re-captured Calcutta in February of the same year, and after a few days afterwards, attacked and routed the Nawab in its vicinity. The latter then signed a treaty dictated to him by which among other things, he agreed that the Company should fortify Calcutta in such manner as they should deem proper for its defence and that money should be raised at Allisnapur (Calcutta) in the same manner as at Moorshedabad. In the year 1756, Moot Jaffer Nawab of Bengal granted a nannad to the Company for the free tenure of Calcutta. From this date Calcutta became, virtually the seat of an independent power. — (Davidson's Travels and Voyages in the East. Von (British Travels in India Orme's History of the War in Bengal) I've League Points Considerations on India Affairs) 'erolists State of Bengal Charters, Acts of Parliament and Port Reports and W. H. Kingston's External Commerce of Bengal) (Add See Butri J.)

(ALDAR) or ALDAR, a town and com. Austria, Tyrol, prov. of, and 8 m. N.W. Mozen, near bank Adige. It is a lovely well built, and has a square a handsome parish church towards the east, and two convents and a considerable trade in wine. Pop. 3719.

CALDAS (hot baths), several towns, and medicinal baths, some of which the most important are—1. *Caldas de Banhos* in Catalonia, prov. of, and 15 m. N. Barcelona. It has narrow and crooked streets, two squares, a church, a school, hospital, several fountains, and a cemetery. Manufactures—linen, woolen, and cotton fabrics, ribbons, serges, lace, and bread. Pop. 2409.—2. *Caldas de Reyes* in Galicia, prov. of, and 14 m. N. Pontevedra. It is a town at the confluence of the rivers Minia and Brena. It has a church, two schools, a townhall, prison, ancient tower and feudal palace of the Marquis of Benda. The bathing establishments are two in number and much frequented. The inhabitants are engaged in weaving, tanning, tillage, and cattle-rearing. Pop. 117.

(ALDAR, a town, Brazil in the S. of prov. Minas Geraes near the source of the Rio Parana an affluent of the Rio Grande or Parana. It has a church and primary school and its inhabitants are engaged in cattle rearing and in mining. Near it are warm sulphurous springs. Pop. 21 and dist. 2000.

CALDAS DA RAINHA, a town and par. Portugal prov. Estremadura, dist. Alentejo on the slope of a hill 68 m. N. Lisbon. It contains a church and an hospital and has a considerable annual fair but deserves notice chiefly for its sulphur baths, which are much frequented. Pop. 1550.

CALDER.—1 Two parts. Scot. Edinburgh West and Mid Calder the former about 10 m. in length, and 5½ m. in breadth the latter about 7 m. in length and 3 m. in breadth Pop. (W. Calder) 2190 (Mid-Calder) 1474.—2 *Calder (East)* a vil. Scotland ac. of, and 11 m. S.W. Edinburgh the Kirkcaldy. Pop. 1719.—3 *Calder (North and South)* two small rivers, Scotland, co. Lanark affluents of the Clyde which they both join on the R. bank, the first 6 m. and the second 10 m. N.E. Glasgow.

(ALDAR, two rivers, England.—1 a river co. York, which rises on the E. borders of Lancashire, near Barnley passes on E. course to Wakefield, then, proceeding N. joins the Aire, near the village of Castleford. It is navigable for about 30 m., is connected with a number of canals leading to Rochdale, Tollerden, Halifax, Golek, &c. and facilitates the transportation of goods across the kingdom from Liverpool to Hull—thus forming a junction between the E. and W. seas. On its banks are the important towns of Wakefield and Dursbury and numerous iron and coal works, and stone quarries.

—2 A much less important river which rises near the same source, but flows in an opposite direction, and falls into the Ribbles, in Lancashire.

CALDICOT par. Eng. Monmouth 8156 sq. f. Pop. 661 CALDONAZZO a vil. and com. Austria, Tyrol, prov. of and 11 m. S.E. Trent 2 m. S.W. Levico, near S.W. bank Lake Caldazone. Silk is produced and manufactured to some extent. Pop. 2608.

CALDY a small isl. Wales, Carmarthen Bay. W. side, on the coast of Pembrokeshire lat. (S. point) 51° 57' 54" N. lon. 4° 41' 0" W. It is 1½ m. long and half a mile broad. Some part of it is cultivated, and a few families reside on it. The remains of an ancient priory are still visible.

CALFODD a market in Ireland, co. Tyrone, on the Blackwater 11 m. S. by W. Dungannon. It is generally well built, has a handsome church with a spire and chapel for Wesleyans and R. Catholics a free school where 40 poor girls are clothed and educated, and several other schools and churches and extensive four-mills in the vicinity. Pop. 999.

CALEDONIA (New) a tract of country British N. America, W. of the Rocky Mountains included in the Hudson's Bay territory between lat. 48° and 57° N. extending about 500 m. N. to S., and nearly 400 m. E. to W. It is mountainous, and abounds in lakes and rivers—the largest of the latter called Fraser's River. The climate is unfavourable to agriculture; but potatoes, turnips, wheat, and barley are raised at some of the stations or posts, where also considerable numbers of cattle are reared and there are many fertile spots along the rivers. The thermometer sometimes falls 82° below zero but the seasons are generally milder than in the same parallel E. of the Rocky Mountains. The summer is never very hot although fires can be dispensed with from the end of May till the beginning of September. Snow lies on the ground from November till April or May and on an average six ft. deep. This part of the country is inhabited by the two great nations of the N.—the *Yukon* or Carrier Indians, and the *Astas* or Shoshone. The Carriers are of extremely filthy habits and brutal propensities. They live chiefly on salmon and prefer their meat putrid, burying it for months and a ground till it becomes a mass of corruption when it is considered a delicacy. They are quick tempered, but neither sullen nor revengeful and are singularly susceptible of ridicule. The Hudson's Bay Company have nine posts or stations in it in territory.

CALEDONIA (New) an isl. Australia, S. Pacific Ocean between lat. 20° and 32° 30' S. and lon. 154° 6' and 187° E. length 3½ to 5 E. about 500 m. breadth 80 m. It is surrounded on all sides by coral reefs, connecting numerous islets, rocks, and banks of sand—rendering the navigation ac. intricate and dangerous, so that the island can be approached by two openings only. Vessels may anchor securely at Port Dalrymple, on the N.E. and at Port B. Vincent, on the S.W. the latter having a natural harbour with anchorages in 10 or 12 fathoms, perfectly secure. Between the small island of Botany and the S. end of New Caledonia, and within the coral reef, a deep, white ship channel was discovered by Capt. Woodes in 1849.

(ALDAR, a river, England.—1 a river co. York, which rises on the E. borders of Lancashire, near Barnley passes on E. course to Wakefield, then, proceeding N. joins the Aire, near the village of Castleford. It is navigable for about 30 m., is connected with a number of canals leading to Rochdale, Tollerden, Halifax, Golek, &c. and facilitates the transportation of goods across the kingdom from Liverpool to Hull—thus forming a junction between the E. and W. seas. On its banks are the important towns of Wakefield and Dursbury and numerous iron and coal works, and stone quarries.

CAJ EDONIAN CANAL See SCOTLAND.

CALISALA, a maritime in Spain, Catalonia, prov. of and 30 m. N. E. Barcelona, at the foot of a small hill called *Monte*. Its streets are clean and spacious and it has two squares, a church, chapel, college, school, townhall, prison, hospital, dock for building vessels, and a cemetery. Many fisheries—linen and cotton fabrics, blonde lace, green paint, and ropes. Distilling brassy fish-scurfing ship and boat-building, and filigree, are carried on. Pop. 3020.

CALENZANA, a town in France, in Corsica, 5 m. S. E. Calvi. It stands in a fine valley open to the sea-breeze, and contains a large and handsome church. A good red wine is produced in the neighbourhood. Pop. 2487.

CALIBIA, a village in Spain, New Castile, prov. Toledo 3 m. S. W. Talavera, near L. bank, Tago. It has two squares, a church, townhall, prison, two schools, a cemetery and trade in cattle, grain and wine. Pop. 2598.

CAI ESTAYO, a town and com. Italy duchy of and 30 m. S. W. Ferrara, near L. bank, Bagnone, at the base of Mount Frangio. It has a church, medical seminary and primary school and in the vicinity are quarries of fine marble. Four annual fairs are held. Pop. 3654.

CALF OF MAN an inlet. See MAN (Isle of).

CALI a town, New Granada, 70 m. N. by E. Popayan lat. 8° 25' N. lon. 76° 30' W. It lies on a W. declivity of the Andes near the Cauca. Has straight streets, houses of brick, and of whitened earth, two elegant churches, several deserted convents, and one still in use. The inhabitants are wealthy and chiefly engaged in the transit trade, from the interior to the Pacific. Pop. 4000.

CALIADEP, a village in Indonesia, prov. Malwa, on the Sipsa, 5 m. N. Oquiri, with a lofty heavy walled structure, entirely devoid of architectural attractions called a water-palace, built on an insular eminence in the Sipsa.

CALIANO a village in Austria, Tyrol 10 m. S. Trent, L. bank Adige. In 1487 the Venetians were here defeated by the Austrians, the Emperor, of Austria.

CALICE DI VERA a town and com. Tuscany prov. Pisa, 11 m. S. Fontenelle, L. bank, Arno, an affluent of the Vena, it is 3 m. S. W. from the confluence with the Arno. It is surrounded by a castle and has a large parish church and some mills. The neighbourhood is mountainous, and clothed with forests of chestnut, vine and olive plantations. The low grounds in the vicinity of the river are rich, and yield grain and pasture for cattle. Pop. 3959.

CALICOUAN a town, Hindustan prov. Travancore, 116 m. N. Cape Comorin, lat. 9° 11' N. lon. 76° 23' E.

CALICUT a maritime town and dist. Hindustan prov. Malabar. The town formerly the cap. of the prov., is 45 m. S. E. Tellicherry and 100 m. S. W. Kottayam lat. 11° 15' N. lon. 75° 45' E. (N.) It is of considerable extent but a large portion of it consists of mere huts, the remainder of houses, constructed of teak-wood, or of sun-baked bricks—there being no buildings of stone. The manufacture of cotton goods was formerly carried on here to a great extent and furnished a considerable supply to Europe but this description of goods is now mostly imported. The exports consist principally of coconuts, betel nuts, pepper, ginger, turmeric, teak-wood, medicinal wood, cardamoms, and wax. The anchorage for large ships in the harbour is in five or six fathoms. Calicut was the first Indian port visited by Vasco da Gama, in 1498. The inhabitants are mostly of Arab descent, and profess Mahomedanism. The district extends along the sea-coast, and produces great quantities of pepper. [Add. See SURR.]

CALIFORNIA (GOLF OF) [Mar. Vermey, Red Sea, Sea of Cortes] a gulf of the Pacific Ocean W. coast, N. America, formed between the peninsula of Old California, the W. coast, and the Mexican states of Sonora and Sinaloa on the E. It lies between lat. 28° and 33° N., and is upwards of 700 m. long with a breadth varying from 150 m. near its entrance, to 45 m. near its centre beyond which it again expands to 120 m. Its coast is irregular forming on both sides numerous small bays or gulfs. Numerous islands are scattered over its surface—the largest being Angel de la Guardia, Tiboron, Carmen, Cerro de San Catalina and San José. Its chief affluent is the Rio Colorado, falling in at the head of the gulf, and two small streams pour into it from the E. side. This gulf was formerly celebrated for the pearl

fisheries of the Californian coast, which employed 800 divers. They are now much fallen off.

CALIFORNIA, Upper or New [Spanish, Alta-California, or Nueva-California] a large region, N. America, formerly a part of the Mexican Confederation, but now included in the possessions of the United States. When under Mexican sway it extended from lat. 32° to 42° N. lon. 106° to 124° 10' W.; and was bounded N. by Oregon, E. the Rocky Mountains, S. the Mexican states of Sonora and Old California, and W. the Pacific Ocean. Area estimated at 500,000 sq. m. Since coming into the possession of the United States, the E. portion of this region, N. of lat. 37° N. and E. of the Sierra Nevada, has been constituted the Mormon territory of Utah, sometimes also named Deseret, and the portion S. of lat. 37° N. and E. of the river Colorado has been added to the state of New Mexico, also acquired from the Mexican Confederation and the sea-board portion, W. of the Sierra Nevada, in the N. and E. of the river Colorado in the N. now forms the state of California.

California or Upper California, as thus limited, includes the region between the Pacific Ocean on the W. Oregon on the N. lat. 42° N., and a line running thence almost E. to lon. 120° W. to lat. 39° N. and thence S. E. to the Rio Colorado where it intersects lat. 35° N. and thence along that river to the boundary between Mexico and the U. States area, 189,981 sq. m. The coast is generally rugged and precipitous, and presents few good harbours for its extent, above 9° of lat. the finest, commencing at the S. and going N. are San Diego, Monterey and San Francisco (which see); the last, entered by an inlet 1 m. wide is the most spacious and important in the state. On the S. part of the coast are a few islands—Santa Cruz, Santa Rosa, San Catalina, San Clemente or San Salvador varying from 20 m. to 25 m. long, and San Nicolas, Santa Barbara, San Juan, San Miguel merely islets.

California is divided into two districts of unequal size, and of markedly different character by the Sierra Nevada, a ridge of mountains which forms the E. limit of the N. portion of the country but in the S. traverses it almost centrally. The district E. of this range is little known, and has generally speaking it may be described as sunny, sterile, destitute of trees, and even of vegetation, except along the banks of the streams, which are few and unimportant. It measures about 600 m. in extreme length, by about 250 m. in extreme breadth. In the N. however a small portion of this district is well watered, and covered by forests of the Sierra Nevada. The W. district consists of one great and several smaller valleys, all nearly parallel to the coast, and to each other; with many minor transverse valleys, formed by spurs of the chief mountain ranges. It is bounded on the E. throughout by the Sierra Nevada, or snowy range, which proceeding from Oregon, takes a direction generally S. though somewhat tortuous, parallel to, and about 150 m. from the coast; uniting, in lat. 34° 30' N., with a lower and nearly parallel range to the W. called the Coast range; both afterwards constituting one chain which lowers down, and forms the peninsula of Old California. In the Sierra Nevada are volcanic peaks, some of which are said to be active, rising far above the limits of perpetual snow to the height of 14,000 ft. and 17,000 ft., and its formation, to a considerable extent, is granitic; though trap and other igneous rocks occupy much of the upper and lower valley of the Sacramento as well as a large extent of all the N. part of the country. The coast range—a comparatively low ridge of heights—originates near the Oregon frontier takes a S. direction parallel to and at an average distance of 50 m. W. from the Sierra Nevada, with which it unites as above noted, in lat. 34° 30' N. It is formed chiefly of sandstone, with patches of basalt, and other igneous rocks. Between these two ranges lies the great valley of the Sacramento and Joquima or Tulare, 500 m. long and shut in at the N. and by spurs of the Cascade mountains. W. of the coast range are other lower ranges of hills, also generally parallel to the coast, forming valleys, each named from the stream which waters it—Barnabentira, San José, San Sebastian, Pichonema, &c. The N. part of the great valley between the two principal ranges is watered by the Sacramento, which flows E., receiving numerous affluents from the Sierra Nevada, but none from the coast range and near the centre, along with the San Joquima bursts through the coast range, and falls

into the bay of San Francisco, at that part of it called the bay of Sausalito. It flows in with from 500 to 600 yards, and is navigable inland for a considerable distance; streams at all seasons reaching the mouth of the Butte, about 80 m. direct distance. Its principal tributaries are the Americano, Feather or Plumas, Butte, Yuba, Bear River, Deer Antelope, Quenocilla, and Sycamore rivers. The S part of the valley is watered by the San Joaquin which rises in the Sierra Nevada, flows N and falls with the Sacramento, as already stated into the bay of San Francisco it is navigable, but how far inland is not known. From the head of the valley it receives the waters of the Lakes Tule, Talares or Chinleche, and like the Sacramento, numerous tributaries from the Sierra Nevada, and some from the coast range. Its principal affluents some of which are also navigable to a certain extent, are the Merced, Totalamene, Stanislaus, Calaveras, Mokelumne, and Cosumnes. The only other note-worthy stream is the Benavente, flowing N through a valley W of the coast range, and falling into Monterey Bay. Lake Tule, already named, is the only one of any considerable extent, being about 75 m. long and about 50 m. broad. It lies near the E. extremity of the great valley receives numerous streams from the Sierra Nevada, and some also from the coast range. It is surrounded by lowlands, rankly overgrown with bulrushes. There are also a few small lakes near the course of the Sacramento.

Gold and other Minerals.—From the formation of the country granite, trap, and sandstone must be plentiful. Excellent slate abounds in the valley of the San Joaquin. Copper exists near San Luis Obispo, about 125 m. E. Monterey; lead of pure quality and quicksilver abound in the same locality and iron both of them of excellent quality have been found on the slopes of the Sierra Nevada, N of San Francisco near San Jose is a quicksilver mine reputed to be one of the richest in the world and silver has been found in various quarters. No coal has been discovered, nor is likely to be so the geological formation of the country rendering such an event highly improbable. Gold however is so plentiful, that little attention has hitherto been paid to all but the main rills. Indeed, the mines of Pure Mexico and the Ural mountains, have all been thrown into the shade by the quantities of gold found in the farthest region, which until the late discovery of gold in Australia, justly claimed to be the richest surface region in the world. The gold is found in various places, containing veins of quartz, and in hypogene or primary rocks that have been protruded through them in the Sierra Nevada, both N and E. of the junction of the coast range, and in the alluvial deposits of the rivers. On the coast, also, near the Oregon frontier there has been discovered what is called a Gold Bluff; on the beach at its base the gold is found mixed with black sand supposed to have been washed down from the bold precipitous bluff by the tremendous swell of the ocean that constantly exists here. The gold-bearing sands are said to stretch along the shore for 6 m. but the heavy sea will prevent washing on the spot. Specimens of the black sand brought to San Francisco, yielded \$5 14 cents (12s. 7d.) to the lb. The first source, however above indicated, the living rock—must be the permanent source of supply for it is in the nature of surface alluvial deposits to be ultimately exhausted—a fact of which plenty of evidence is afforded by the gold-washings of Brazil. The want of capital and machinery prevented, for a time, mining operations, properly so called, from being commenced. These wants having now however to a considerable extent been supplied, several mining companies have been established and much gold is now obtained from quartz, which, after being excavated by blasting or otherwise, is crushed in a mill and the gold separated either by washing or by amalgamation with mercury. The efforts, however of individual workers or small associations destitute of capital, have mainly been directed to the solution rocks led bare in ravines by water and to the alluvial deposits. In the former gold is often found in considerable masses, imbedded between the layers of the strata, whence it is scooped out by means of a strong knife or displaced by a crow bar or other lever. The worker in such localities may at times become speedily rich by finding a few large pieces; but, generally speaking, the supply from such sources is more precarious than from the alluvial deposits. These deposits are found in the great val-

leys along the rivers Sacramento, Joaquin, and their affluents from the Sierra Nevada on the river Klamath and its tributaries on the Oregon frontier and probably on many others. They consist of all clay and gravel or shingle the last often containing numerous large stones, rendering the labor of removing them to get at the clay and small detritum very great. To what extent the great valley is pervaded by the precious metal is not yet known; but at all events, gold is probably to be found in greater or smaller quantity in all the lower valley of the Sacramento, and as far S. as the headwaters of the San Joaquin—a total stretch of nearly 300 m. The metal is found in the form of dust, or small grains, in smaller quantity in the surface deposits on the banks, or in the beds of the streams and in greater abundance in the lower and firmer deposits, and in greatest abundance (at least on the San Joaquin) next the alluvial deposits which frequently rest the gold, from its weight apparently always seeking the lowest stratum. The metal is obtained by washing the alluvium, till all the earthy matter is floated off when the gold is found left at the bottom of the vessel. The streamers stand in the water washing the shingle lifted from the bed of the stream or they dig pits on the river edge, on a hill slope, or in some other locality deemed suitable, the soil and gravel thrown out requiring afterwards to be washed. These pits, also called dry diggings, are generally found to increase in value the deeper they are dug until the slate or rock is reached, on the surface of which the metal is often found in surprising quantity. The digger or laborer however is often expended in vain, and he frequently finds it difficult to earn as much as will suffice for his daily subsistence. The total amount of gold shipped at San Francisco, September 1 1849 to December 15, 1850, was \$51,060 175, or \$6,213,035; besides, probably £4,000 000 brought away by passengers. The total amount that has left California, from June 1849, when the gold was discovered, to the end of 1850, may be roughly estimated at \$12 000 000. It may not be out of place to add here some instances of extraordinary fortune on the part of individuals, as reported in the current newspapers of the day. Between the middle and W forks of Yuba river a lump of quartz and gold was found, weighing 80 lbs. containing by estimate, 23 lbs. of pure gold on one of the alluvial of the Joaquin a block weighing 99 lbs. was discovered, one-half of which was stated to be pure metal and on another affluent the Merced, a person found a lump of nearly pure metal weighing 83 lbs. but the largest piece so far obtained was in the mines of the Mariposa, an affluent of the Joaquin—a lump of quartz weighing 700 lbs. and rich in gold.

Gold seeking can only be carried on with advantage during the dry season. The streams are too large, and the ground so saturated with water during the wet and winter season, that it is next to impossible to do any work. Even after the wet season is past, a time must elapse before operations are seriously commenced in the bed of the larger streams for the rivers being snow-fed, increase with the advance of spring, in place of diminishing consequently it is not till about June that the real labor of washing can be properly carried on in such places. The result of this state of matters is, that those who have not succeeded well during summer, are subject to great privations from poverty during winter, as doubt greatly aggravating disease contracted from exposure and exposure labor. The rise of the rivers, however, is no obstacle to the progress of the mining or dry digging, both requiring a good supply of water to wash the crushed rock of the ore, and the exhausted heaps of the other. To those so engaged therefore, the want of rain in winter which sometimes occurs, causing many of the rivulets on which they depend for water to dry up, is as great a calamity as too much rain is to those occupied in the river washings; and the rise of the streams—from the melting of the snow—which relieves the former still hinders the work of the latter. Gold seekers often unite in bands, to accomplish a definite object, and then separate. Thus they will form a company in the morning, to wash together all day and separate again in the evening; or they will unite to excavate a pit in a given locality and as soon as it is wrought out, divide the proceeds and separate. It being obviously impossible to search the beds of the larger streams by ordinary methods, dredging has been tried; and steam vessels are now occupied on the Yuba, working dredging machines with considerable success.

Climate.—California being intersected by the isothermal line of 50° has the same mean annual temperature as the N. of Spain and the centre of Italy and may generally speaking be estimated genial and mild; and the year may be divided into a dry and a wet season—there being no frost, and rarely snow, excepting on the mountains. The wet season begins in November and continues to the middle of February or the beginning of March, during which time a considerable quantity of rain usually falls, though in some years this season is called *huila* its name, and continues perfectly dry to the great detriment both of agriculturists and gold seekers. No rain falls during the rest of the year. Though the climate is generally speaking, mild still, in many places the changes of temperature are sudden and great and though in the great valley during the summer days are unknown, yet on the coast they are frequent. At San Francisco, the temperature in summer sometimes reaches 110° and in the rainy season it seldom falls below 40° the maximum and minimum differ as much as 90° in 24 hours and a scorching hot day is often followed by a night of bitter cold. The heat in the valleys is frequently oppressive, not being tempered by the sea-breezes but, on the other hand sudden changes, and great extremes of temperature do not, in these localities, appear to be so frequent or violent as on the coast. On the lower slopes of the sierra Nevada the climate is said to be that of constant spring.

Vegetation.—N. of lat. 34° 30' N. the slopes and valleys of the coast range, the district W. of it to the sea the valley of the Sacramento where not covered with sand or gravel and the E. side of the valley of the San Joaquin, will yield heavy crops of wheat and oats; indeed, the greater part of these districts is annually covered with wild oats. The soil in one place another is also suitable for maize and the other cereals and for the tubercous plants and legumes usually cultivated in temperate climates. The vegetables grown in the U. States stand here on an extraordinary scale. The districts above referred to are covered with excellent herbage, on which numerous flocks of wild cattle, deer &c. depasture, but the W. side of the valley of the San Joaquin having no permanent water-courses, and probably being chiefly composed of sand washed down from the coast range, is destitute of herbage, though covered with a profusion of beautiful flowers of the most varied hues among which however blue is the most prevalent. So destitute of herbage is this district that the cattle of emigrants employed in transporting their effects to the gold districts of the valley have frequently been on the point of starvation while browsing down a vigorous vegetation of which they refused to partake. That part of the valley near Lake Tule or Tulare is marshy and covered with a thick growth of a kind of gigantic bulrush frequently 15 ft. high called *tule*, whence the lake is named. The olives of California are equal to those of Andalusia, and the wine is similar to that of the Canary Islands. Indeed, the fruits are most varied, including apples, pears, plums, figs, oranges, peaches, pomegranates, plantains, bananas, and coconuts the figs plant also, and the sugarcane and tobacco, yield abundant returns. The lower parts of the country are interspersed with isolated tracts of various kinds. Along the foot of the sierra Nevada are open groves, composed chiefly of white oak (*Quercus laevis*), Torr and From) 5 to 6 ft. in diameter and 60 to 80 ft. high. Higher up are evergreen oaks, yuccas, cedars, and lofty pines, among which *Pinus Lambertiana* attains a height of upwards of 300 ft., with a circumference of 57 ft. Its timber is soft, white, and light, and its turpentine of pure amber colour. Its cones are 16 inches long, and the seeds are eaten roasted or pounded into cakes. The lofty plateaus characterize of this range, from which the bare volcanic peaks run like pyramids, are generally densely covered with timber. From the sterility of the rains, and the great droughts of summer agriculturists must always, in California, depend much upon irrigation.

Zoology.—Beavers, wolves, foxes, wild-cats, otters, beavers, antelope, hares and rabbits abound. Large herds of wild cattle, horses, deer, and elk depasture on the grassy slopes and valleys. The oxen are small, and the horses small, delicately formed, but capable of long-continued exertion without food or water. Mules, goats, sheep and swine, are plentiful. The mutton is good, but the wool inferior. Poultry thrives well. Birds generally are scarce the most common

are the turkey buzzard, quail and woodpecker, partridge, geese, ducks and cranes, are said to be numerous. Snakes among which the rattlesnake, and lizards of various kinds—scorpions, tarantulas, &c. are met with and mosquitoes are innumerable.

Towns, Commerce &c.—The principal town and port, but not the capital, is San Francisco, situated on a spit of land at the entrance to the bay of its name. The seat of the legislature, and residence of the governor is Vallejo, or Vallego, a new city on the N. shore of the bay of San Francisco, between the bays of San Pablo and Suisun. San José, a small town about 45 m. S.W. San Francisco was the old capital. Among the older towns Monterey San Diego Los Angeles, &c. from being unimportant places have become large cities. Of the more recently-founded places may be named, Napa Sonoma and Benicia, on the N. shore of the bay of San Pablo and Martinez on its E. shore; New York of the Pacific States, Boston, Suisun Sacramento, Fremont, Vernon, Yuba, Acapulco, &c. on the Sacramento river and its affluents and Emery city Stockton, Stanislaus, &c. on the Joaquin and its tributaries. All the recently-founded towns are built chiefly of wood though erections of brick and stone are becoming more common and houses are run up so rapidly that whole new streets are formed in a few days. Many so-called towns erected in the vicinity of the diggings, are merely collections of tents. After the discovery of the gold so many went in search of it, and the produce was so great that labour and property in the towns went to enormous prices. Servants were paid \$100 to \$200 (\$20 to \$40 per month); carmen \$6000, \$12000 a year a rifle cost \$20 and sharp and bow knives 25 to \$10 a house, the sum of a common English domestic was rented to the Miners Bank at \$75 000 (\$215 000) a shed, 15 ft. by 30 occupied by gamblers gave \$3000 but the influx of labour and more correct ideas of the income from the gold districts have now brought prices to a more natural level. Manufactured goods, having soon arrived in great plenty, sold at an early period comparatively cheap so much so, indeed that at one time it was more economical to purchase new shirts than to pay for the old ones being washed.

Regarding the commerce of the country little can yet be said. In former times hides and cattle were exported, and will likely be so again. At present gold is almost the only article of export (see p. 364) in return for manufactured goods, implements of various kinds, provisions liquor, &c.

Population.—The Spanish Californians now comprehensively a small section of the community have large strong frames, strong muscles and a ruddy fresh complexion. The Indian population now few and scattered seems at one time to have been great, as evidenced by the remains of numerous villages in the great valley. The Indians are seldom more than 5 ft. high, of a dark copper colour with low forehead, black eyes, thick lips, and rough straight hair. They are indolent ignorant, and cowardly though prone enough to murder when they can do so with safety. The main part of the population is Anglo-Saxon, and chiefly from the U. States though some are also from Great Britain and Ireland. Almost every nation has its representative here and the population forms a curious mixture of high born and low born learned and ignorant in which those accustomed to be highest are sometimes found to be lowest. Lawyers, ex-professors, physicians &c. dig canals, drive ox teams saw wood, and carry baggage while those who have been private soldiers sailors, cooks, and day labourers are at the head of profitable trading companies and often assist in the minor details of government. In 1802 Humboldt estimated the population of Upper California at 16 862; in 1846-47 Bryant estimated it at 25 000; and at present (1851) it is estimated at 800 000; of which, 60 000 are in the town of San Francisco.

History.—Upper California was discovered by the Spaniards and its shores were examined by Cabrillo in 1542 and in 1578, it was visited by Sir F. Drake, who gave it the name of New Albion. In 1602 Sebastian Visconti touched at Monterey and proclaimed the neighbouring country to be Spanish territory. The Jesuit mission of San Diego, the first settlement in Upper California, was established in 1769 and before 1808 18 others had been added, each with its tribe of Indians attached to it and under its protection. In 1823 three missions were secularized and declared public pro-

erty by the Mexican government; and in 1845 those of San Juan, Carmel San Francisco, Solano, and San Juan Capistrano, were disposed of by public sale, the remainder being subsequently transferred to the U. States. The country suffered several times from revolution and the inhabitants more than once declared themselves independent, but as often rejoined the confederation. The authority of Mexico over it was very loose for the last 10 or 12 years of the connection with that country. In May 1848, Upper California was ceded by Mexico to the U. States, and about a month afterwards the discovery was made which has in such a remarkable manner altered its fortunes. Gold was previously known well enough to exist in the country and had, indeed, been wrought to a certain extent by the Mexicans. Hakluyt, who accompanied Drake and published in 1599 says, "There is no part of the earth here to be taken up where there is not a reasonable quantity of gold and silver." Still not until June, 1848 did the surface deposits of California attract general attention, when they were brought before the world as new may almost say by accident, by some settlers, who discovered shining particles, and some heavier pieces of yellow metal in the mud in a mill-course near Coloma, on the American or American Fork an affluent of the Sacramento. Such a discovery could not be long concealed the news spread every other occupation was abandoned, and all hastened to the diggings, and wages, provisions, and property of various kinds rose to an enormous price. In course of the following year multitudes began to arrive from all quarters, Mexico, Peru, Chili, the Sandwich Islands, China, all parts of Europe and the U. States. In 18 months, 100,000 arrived from the U. States alone there was almost a continuous line of emigrants across the Rocky Mountains, the Great Desert and the Sierra Nevada, by which roads many thousands arrived accompanied by immense wagons drawn by bullocks. Great privations were endured in crossing these treacherous regions, from want of food and water for man and beast. Many emigrants and their cattle perished on the way from hunger and fatigue. Immense numbers likewise arrived by the isthmus of Panama, and numbered some a voyage of 17,000 m. round Cape Horn. Such a great influx of people was too much for existing means of government: robbery and murder became frequent: lynch-law was in many places set up, and the out-poor, after being tried and condemned by a jury selected on the spot, was hung on the nearest tree. In this dilemma the U. States emigrants decided on forcing themselves into a state. Representatives, chosen from all parts of the country met in June 1849 and adopted a constitution similar to that of New York, guaranteeing to citizens the right of trial by jury free exercise of religious worship, the privilege of the writ of *habeas corpus*, protection from excessive fines or cruel punishments, exemption from arrest on crime, except on presentment or indictment, freedom of speech, right of petition, prohibition of a standing army in time of peace, representation according to population, abolition of imprisonment for debt, protection of rights of property, &c. Since that event took place, and in consequence of the measures subsequently adopted life and property have become much more secure than they were formerly; though the administration of the law doubtless from defective organization, being somewhat tardy it is still not uncommon for the populace to visit great suspects with cordage punishment: in the execution of which they have generally exhibited an eagerness and dignity of manner strange at variance with the irregularity of the transaction, and forming certainly not the least remarkable feature in California history and of Californian society. California was admitted as a state of the Union in 1850.—(Lieut.-Col. Fremont's Report, Lieut. Emory's Narrative, Farham's *Life, Travels and Adventures in California*, Commissioner King's Report, &c.) [add. See Story.]

CALIFORNIA (LOWER OR OLD) [Spanish, *Baja or Baja California*] a state or dep. of the Mexican Confederation situated on the W. coast of N. America, and formed of a peninsula, lying N. W. to E. E. about 750 m. long, by 80 to 120 m. broad, and extending from Cape San Lucas, its most S. point lat. 22° 43' N. to 109° 58' W. (s.) to lat. 32° 35' N. bounded, N. by Upper or New California, E. by the Gulf of California, and S. and W. by the Pacific Ocean. The peninsula is volcanic, and is traversed throughout its whole length by a continuation of the Sierra Nevada, 1000 to nearly 5000 ft.

high, the culminating peak, Cerro de la Giganta, being 4800 ft.; it has two extinct volcanoes, hot springs of water and bituminous mud of it is heated by subterranean fires, and earthquakes are frequent. This mountain-range is almost bare of verdure, being only sprinkled here and there with a cluster of briars, small shrubs, or dwarf trees. Along the mountain-foot the ground is sandy or stony, and covered with cylindrical columns of extraordinary height. Among the ridges and protracted hollows, are a few spots with soil, formed generally of decomposed lava. Springs of water few in number are ordinarily found on bare rock; for water and soil are seldom met with at the same place. Where, however, this happens to be the case, the fertility is immense. The want of water is the bane of Lower California. Only two streams fall from its mountains into the Gulf of California, both near the middle of the peninsula, and only three into the Pacific; and none of them are large. In the interior are several copious springs, sending forth abundant streams, which unfortunately run along a rocky course, and are absorbed ultimately in the porous and soft, or are lost in subterranean channels. For about 80 m. N. from Cape San Lucas, the air is mild, being tempered by the sea-breeze; from that point N. to Loreto, lat. 26° 10' N. the heat is excessive, but thence N. the air is cooler. The temperature of summer on the coast of the Pacific ranges from 58° to 71°, in the day is peculiarly clear of a deep blue, and perfectly cloudless, excepting sometimes at sunset, when streaks of the most beautiful shades of violet, purple, and green appear. In winter the rains are severe, but of short duration, and accompanied by tremendous tornadoes of wind sweeping the soil from every exposed position into the sea, and causing the tiller of the ground to seek a new place in which to ply its vocation. During the rains, the thermometer falls as low as 50°. The variety of climate, however, is great, for when near Cape San Lucas the thermometer stands between 60° and 70° at the head of the Gulf it is down to the freezing point. The few fertile spots of Lower California, yield maize, manioc, wheat, beans, peas, and all manner of esculent roots: excol least grapes, from which a wine is made, similar to that of the Canaries; oranges, lemon, limes, citrus, pines, dates, plantains, pine-apples, &c. The mountains feed a few wild sheep and goats, and to a small extent, horses, black cattle, mules, goats, and pigs, are reared. If the land be barren, the sea is stored with fish in incredible abundance and variety; among these may be named halibut, salmon, turbot, skate, pilchard, large oyster, thurmball, mackerel, tarbot, bonito, salmon, lobsters, sardines, cod, tunnies, anchovies, and pearl oysters. The pearl oyster is obtained in the gulf, near the S. parts of California, and it was formerly much more extensively fished than at present: in fact, the fishing or diving for it has almost been abandoned. The pearls obtained are of a fine water and large, but rather irregular in shape, and not very pleasing to the eye. The quantity obtained in 1831 by 15 boats amounted in value to about £7000. Gold is supposed to abound in Lower California, and a mine wrought near La Paz is said to be rich. The limited exports of the country consist of pearls, gold, dates, wines, grapes, soap, figs, spirits, salt, from an inland lake on the Island of Carmen; a few goats, and hides. The chief towns are Loreto the capital lat. 26° 16' N.; lon. 113° 5' W.; with a population of 500, though it formerly had 2000; and La Paz, about 150 m. S.E. the former with a population of about 2000. The present population of the country consists chiefly of mongrel breeds of Indians, whites, and negroes.

Lower California was discovered by Hernando de Grizalva in 1524. In 1041 the Jesuits formed establishments in it; they taught the natives the art of cultivating the ground and raised them greatly in the scale of civilization. In the reign of Philip V. more especially subsequent to 1744, the Spanish establishments in California increased, and became very considerable. In a very few years the Jesuits built 16 villages in the interior of the peninsula; but in 1767 they were expelled, and the administration of California was committed to monks of the Dominican convent of the city of Mexico, who have not relinquished the same career of usefulness as their predecessors. Pop. 8000; of whom, probably 4000 are Indians. (Rumboldt, *Reise Politische und in Begonnen de la Nouvelle Espagne*, Farham's *Life, Travels, and Adventures in California*.)

CALIG a *tu Spain Valencia*, prov. Castellón de la Plana, 7 m. N. Paelencia. It is clean and tolerably well built has a square, a parish church, chapel, two schools a spacious townhall and a prison beneath, a poorly-endowed hospital, and a cemetery. Weaving distilling brandy as pressing oil and wine, making brooks and tillage, employ the inhabitants, who also trade in grain, wine hemp, manufactured goods, &c. Pop. 3070.

CALINGPATAM a small strait in Hindoostan *tu coast*, N. Cincras 18 m. N. E. Chicacole lat. 18° 20' N. lon. 84° 11' E.

CALIPUJANG a harbour *isl. Java* S. coast middle of *sla. Nuaa-Kombangan* and *Nuaa Rá* lat. 7° 55' S. lon. 108° 30' E. Though the entrance by either side of the high round island, *Nuaa Rá*, was laid down as safe in the chart, the vessel in which Mr. Earl entered struck on a sunken rock, in the E. channel. The Dutch establishment here though the largest on the S. coast of Java is small and is employed in collecting the revenue on salt and edible birds nests.

CALITHI a *tu Naples* prov. Principato Ultra, 16 m. E. St. Angelo-Lombardi, on the Ofanto. It stands on a high hill and has a handsome parish church with a Baroque convent. Cattle and sheep are reared to a large extent in the environs. Pop. 5219.

CALIUURA, a *tu Ceylon*. See **CALUTUA**.

CALIZAO a *tu*. Surinam States div. of, and 40 m. W. S. W. Guiana to the W. of Mount Oliv, and not far from the source of the Berbice. Pop. 1439.

CALKE or **CALKE** par. Eng. Derby 689 ac. Pop. 79.

CALLAC, a *tu*. France dep. Côte-d'Azur Nord, 31 m. W. S. W. Belima. It has numerous fairs. Pop. 1028.

CALLAIN a *tu*. Malay Peninsula State Selangor, Strait of Malacca lat. 8° N. lon. 101° 20' E. 207 m. N. E. Singapore.

CALLAN par. Irel. Kilkenny; 5684 ac. Pop. 624.

CALLAN a *tu*. Ireland, co. of and 10 m. S. W. highway on the King's river. It consists chiefly of four streets that meet in the centre, the other parts of the town are composed of mean straggling thoroughfares. The parish church is an old mosaic building. The St. Catholic chapel situated in a commanding position is a modern edifice. There are, also, a modern Augustinian friary and chapel a large substantial stone structure, a national school a girls' daily school a dispensary and a loan fund. A small trade in grain is almost the only business done in Callan. A few persons are employed in making flannel and a considerable number in making brogue or cowse shoes, but the great majority are either small traders or agricultural labourers. Pop. 1568.

CALLANA or **CALANEA** a *tu* and mountainous dist. W. Africa, in Senegal. The mountains form part of the Bakata range a system which branches off in a N. E. direction from the mountains of Kong, in about lon. 2° W. and terminates in the desert of Sahara. The town of Callana is about 450 m. S. E. Timbuctoo lat. 11° 12' N. lon. 2° W.

CALLANDEIR, a par. and vil. Scotland, co. Perth. The *parish* is 18 m. long E. to W. and varying from 1 to 6 m. broad. Its fine mountains and lake scenery have been rendered classical by the Walter Scott's poem of the *Lady of the Lake* the mountains Benlodi, Strid-e-chroin, and Uamh-mhor and lochs Kairine, Achmy and Veasach, being within its bounds.—The *vicarage* is beautifully situated on the N. side of a fine plain intersected by the river Teith. It consists of a long double row of neat white-washed houses, on either side of the road and contains a neat Established church, a Free church and a school. Pop. of vil. 1107. of par. 1716.

CALLAO a *tu*. Peru, dep. of and 6 m. W. Lima, of which it is the seaport, near the mouth of the Rimac lat. 12° 4' S. lon. 77° 18' 45' W. (s.). The houses are mean, built of mud with flat roofs, and are generally only one-story. There being no ruin, but frequent earthquakes stone houses are both unnecessary and dangerous. Great improvements have however recently been made the streets have been widened a fine mole has been erected and the whole town has assumed a more respectable appearance. The principal street, which runs parallel to the bay is paved, has side walks, and contains some tolerably well-built houses, of two stories. The castle of Callao, which used to be regarded as the key of Lima, has been almost entirely dismantled, and is now used as a custom-house. The market-place occupies a

square of 1½ acres. Heavy down at night supply the want of rain. Callao is theemporium of a large and increasing trade; and its roadstead is large safe, free from rocks and always smooth. Imports (1822) \$3,800,000 exports, \$2,560,000

YARMS ENTERED AND CLEARED at the Port of CALLAO, at 1824 and 1821 to 1826.

Yarms.	Entered.		Cleared.	
	Vessels.	Tons.	Vessels.	Tons.
1824	489	117,120	526	129,438
1821	1,000	450,108	1,007	452,592
1822	1,211	751,280	1,186	478,450
1823	1,564	784,971	1,351	765,640

In 1746, the town was entirely demolished by an earthquake when only 300 persons out of 4000 escaped destruction. It has been since rebuilt nearly on its former site, but a little further from the sea. At low water the ruins of the old town are still visible. November 5 1820 Lord Cochrane and a party of Chilianes cut out the *Emeralda*, a large Spanish 40 gun frigate from under the guns of the castle. Pop. 8000.

CALLAO ISLAND an *isl.* Chinese Sea E. coast Cochinchina. 9 m. from the mainland lat. (S. part) 15° 54' N. lon. 108° 30' E. It is high, one of its mountains exceeds 1400 ft. of irregular form about 6 m. in length, and from 2 to 3 m. in breadth having some hills adjoining the S. end, and others projecting W. from its N. W. part. It is inhabited well cultivated and the anchorage on the W. side in a 4 or 4½ fathoms is safe in all winds. On this side there is a beautiful spot of about 300 ac. covered with neat houses, temples

clusters of trees, and small hillocks, overgrown with shrubs. About 30 m. S. S. E. Callao is a small island, surrounded with rocky rocks called *Batas* Callao Island.

CALLAS, a *tu*. France dep. Var 6 m. N. E. Draguignan on a low hill, at the foot of the *Plat* Mountain. It is narrow crooked and excessively dirty streets polluted by the dung heaps in process of preparation for manuring the olive-yards of the environs. A good deal of oil is made here, and coal is worked in the vicinity. Pop. 1980.

CALLI E. (14) or *At KALAH*, a seaport Algiers, prov. Constantine, 31 m. W. Tiberias lat. 36° 53' N. lon. 30° E. It is defended by a fort and is a principal station of the French coral-fishery lying midway between Tiberias and Roua. The environs are fertile well wooded and garden largely rich in cork trees Wheat barley leather, and tobacco are exported. Pop. 400.

CALLFNHENG two vils. Saxony both in circle Zwettau —1 dist. Waldenberg containing chalk and tile works and possessing a chalybeate spring. Pop. 1060 —2 dist. Lich containing a handsome church and possessing some linen manufactures a mill and distillery. Pop. 1400.

CALLIANFL —1 large *tu* Hindoostan, in the Conton, 30 m. N. E. Bombay cap. dist. of same name. A considerable traffic is carried on here in cocoa nuts, oil, coarse cloths, brass, and earthenware —2 a mountain-stream in the Congoa Ghauts, on which occur numerous beautiful waterfalls, the principal of which is 1400 ft. high.

CALLIDE a *tu*. France, gov. Koclin 58 m. P. S. E. Section, on the Great and Little Barrois and Mchilsee. It has walls with three gates, contains cattle, and a church, and besides some linen and woollen manufactures, has six yearly markets. Pop. 2641.

CALLIGRAY or **KILLISGRAY** a small *isl.* Scotland Hebrides Argyshire between Harris and N. Uist. It is about 2 m. long by 1 m. broad.

CALLINGER, a *tu* and fortress, Hindoostan cap. dist. of same name, prov. of and 90 m. S. W. Allahabad lat. 24° 58' N. lon. 80° 25' E. It stands on a lofty hill, the summit of which is at least 1900 ft. above the plains below. The town which is of considerable size stands at the foot of the N. front of the hill but the whole summit of the hill comprehending a plain 5 m. in extent is encompassed by an immense mud rampart of Mahomedan construction, and composed of rough unburnt stones. In the interior are several large tanks, always filled with water. In 1810 after an unsuccessful attack, it was taken by the British, the garrison having evacuated during the night.

CALLINGTON a *tu* and par. England, on Cornwall. The town, 12 m. N. W. Plymouth, lies low and is destitute of all attraction; the houses are irregularly built, and form but one broad street, running N. and S. It was constituted a borough in the time of Elizabeth, and returned two members

to Parliament, but was disfranchised by the Reform Act, Pop. 1288. Area of par 3412 ac. Pop. 2146.

CALICO a tu. and com Belgium prov. E. Flanders, 9 m. W.W. Antwerp, 1 bank Scheldt. There is the fort of Laefkenshoek, being Fort Lillo, constructed in 1563, to control the passage of the river. The position is strong, as the whole of central Europe can easily be inundated. Calico has some trade in agricultural produce. It has also a tannery, brewery, rope-work and two flour-mills. Pop. 2147.

CALICIA a tu. and com Spain, Valencia, prov. of and 21 m. N.E. Alicante, 1 bank, Cuenca, which is sometimes called Calico, 6 m. from the sea; streets generally steep, narrow and crooked but clean and well paved. It has a parish church, four chapels, townhall, session-house, prison, hospital, cemetery, public fountain, and a magnificent bath of black marble, obtained from a quarry about 1 m. E. of the town. Hempen shoes are manufactured, and some trade is done in grain, fruit, wine, &c. Pop. 4228.

CALICIA-DE-SOTUA, a tu. Spain, Valencia, prov. of, and 28 m. S.W. Alicante, near the Segura with houses well built, chiefly of black marble, several clean, paved and spacious squares, a large and handsome parish church, two schools, a townhouse, prison, small hospital, and four convents, with churches attached. In the neighbourhood is an extensive aqueduct for conveying water from the Segura to the city of Calico. Pop. 2904.

CALICO par. E.W. Hertsford 621 ac. Pop. 129.

CALLUNDBORG tu. Denmark. See KALLUNDBORG.

CALMAE in Sweden. See KALMAR.

CALMINA a tu. N.W. Africa kingdom Dahomey 10 m. R. Abomey and about 50 m. from the coast at Windah lat. 7° 22' N. lon. 2° 22' E.

CALMUCKS, **KALMUCKS**, or **ELECTERS**, a remarkable people of Mongol extraction, found in various parts of central Asia, but occupying more especially the W. part of Mongolia, extending from Astrakhan to China proper. Both the people and the country are still very imperfectly known. They are divided into the four principal tribes of Koshaks, Sengurs, Torgots, and Durbets and are subject partly to Russia, and partly to Chinese supremacy though each is governed immediately by its own recognised chief. In customs and physical constitution, they bear a strong resemblance to the Mongolians, having oblique, narrow eyes, with angles far less obtuse than those of Europeans, their black eyebrows, small flat noses, high cheek bones, round heads, large ears, and remarkably white patches of small, tight, and heavy so as to make objects perceptible to them at very extraordinary distances. They are in the highest degree filthy and sensual, lead a nomadic life, dwelling in movable huts of skin, and though not destitute of frankness and hospitality are much more characterized by a deceitful and thievish disposition. Their habits unfitting them for agriculture, their chief employments are herding and the rearing of cattle. Like most savage nations, they are fond of intoxicating liquors, and have discovered the means of gratifying the propensity by extracting from horses milk a kind of spirit, which they call *Arlik*, or *Kumiss*. The individuals belonging to each separate horde are classed under the heads of people, nobility and priests. The people are mere slaves, the priests, with a few exceptions, are followers of Buddha the nobility consist of several grades, some being hereditary chiefs, who take the title of noon, and govern the tribes of which they are the head with little more than a nominal subjection to the khan, or head of the whole nation others governing a subdivision of the tribe, in subordination to the noon, and known by the name of *chamgans* or *nobles*, in the proper sense of the term and a third and still lower grade, exercising authority over a still more remote subdivision, in subordination to both *chamgans* and noons. The authority of this last grade extends to the infliction of punishments, but is by no means of an arbitrary nature as it must be exercised in conformity to a code of law which is not merely oral, but is used to exist in writs in the Mongol tongue. This tongue, or rather a corrupt dialect of it, is in general use among the Calmucks. Their armour consists commonly of a lance and a bow. Not a few however have a learned use of the musket, and some of the higher classes consider themselves as completely armed without a coat of mail. The dress of the lower classes is scant, frequently almost in their natural state, but often also

after they have been subjected to some process of manufacture; the wealthier classes dress in cloth or silk, and seem fully alive to the dignity supposed to be conferred by a showy exterior. Their riches consist in the number of their live stock, more especially horses, of which individuals possess to the number of 1000 each. The milk of the mares, in addition to the spirit distilled from it, as already mentioned furnishes the principal summer beverage, but in winter that of the cow is usually substituted for it. The milk of a ewe, which, as a live stock, rank next in number to horses, is chiefly employed in making butter and cheese. For purposes of transport, the camel and dromedary are frequently employed. The milky manufacture which exists in any degree of perfection among the Calmucks, is that of preparing sheep and lamb skins which form a considerable article of trade, particularly with the Russians, and are often pressed into pelises, which bring a large price. This manufacture is almost entirely performed by the women on whose shoulders, as usual in savages or half-savage nations, all labours which require careful attention and persevering industry are laid.

The Calmucks who acknowledge the authority of the Chinese emperor amount to about 50 000 and are governed by princes who trace their descent from a brother of the celebrated Genghis Khan. After coming from the N.W. and taking possession of the country around the Koko-nor where they still have their principal locality they gave in their submission to the Chinese government, and continued faithful to it till 1723, when they raised the standard of revolt and made a hostile incursion into the Chinese territory. In the contest which ensued they sustained a signal defeat, and were subjected to an annual tribute of seven sheep horses and camels, the payment of which is still exacted. A detachment of this tribe, to the number of 25,000 emigrated in 1759 to the banks of the Volga, and became subject to Russia. The Sengurs and Koshaks about the beginning of the century after expelling some of their neighbours engaged in a fierce struggle with the Mongolians and Chinese, and were then driven ultimately subdued. The Torgots, who at a much earlier period than any of the other tribes, had emigrated to the Volga, having become discontented with their condition returned in a body to their country in 1771 leaving, however a subordinate branch headed by a prince called Dandakov who with his followers, made their unwelcome submission to the Czar. This prince at a later period became a convert to Christianity and was succeeded by his son-in-law who, by the command of the emperor assumed the title of Dandakov Koshak. Besides the Calmucks already mentioned there are some who have joined the Greek church, and been assigned a residence in the town of Siarapopol gov Simbirsk. In the same district are some Calmucks who have embraced Mahometanism. The whole number within the Russian dominions has been estimated at 56 000.

CALNE, a market in par. bor. and par. Ekegrind, co. Wilt, 65 m. W. London. The town consists principally of one long street lighted with gas, and is, in general, well built and clean. The parish church is handsome, and the tower by Inigo Jones, contains a set of five chimes. There are five places of worship for various religious denominations, a free grammar-school and some almshouses. The manufacture of woollen cloth was formerly carried on extensively but this trade has now greatly declined. Calne sent two members to Parliament from the time of Richard II. down to the passing of the Reform Act, which restricted its privilege to one. The Chappellian station on the Great Western Railway is 6 m. from the town 1 op. 446. Area of par. 8973 ac. pop. 611.

CALONT See KALONT.

CALORE, two rivers, Naples—1 rises on the S. slopes of Mount Calvo, near Mount Calvo, and the town of Montella, flows in a tortuous course past Benevento and joins the Volturno about 15 m. above Capua. whole course, about 60 m. It receives the Ufita and Miseno shortly after their junction, the Tevere, and the Salvo, and continues excellent trout, eels, and carps.—2 *Calore*, Tevere or Negro, which rises in Mount Cervino, on the S.W. borders of France, falls into the bank Miseno, after a course of nearly 50 m.

CALABRO vil. Sicilian States, division of, and about 22 m. S.W. Alexandria. A good wine is made in its neighbourhood. Pop. 1800.

CALPENTYN a seaport in promontory and gulf, Ceylon, W coast. The town 81 m N Colombo, consists of some large houses roofed with tiles, and contains a bazaar and eight places of worship—one belonging to the Protestants, one to the R. Catholics, three to the Gentooes, and three to the Mahomedans. There is also a charity school, supported by Government. An email with the towns and villages of this island, it is thickly interspersed with coconut trees, which, added to the rich foliage of the scorla, give it a singularly pleasant appearance. Gardens, besides are attached to each house, in which various sorts of vegetables and fruits are produced including vines, which here attain great perfection. There are here the ruins of a Dutch fort, built in 1645, which contained some handsome houses. The harbour is not accessible, in consequence of shoals, to vessels exceeding 100 tons, even at the highest spring tides so that they are obliged to anchor in the Dutch bay at Matral, and to send their cargoes to Calpenty in small vessels. The exports from Calpenty to Malacca and other ports on the Coromandel coast, are copra, the dried kernel of the coconut, coconut oil, shark's fin, deer, honey, bees wax, ghee, fish oil, wood oil, dammar, moss, chaya roots, and palmyra timber. The imports consist of cloths, rice, earthenware, bempen thread, spices, minerals, and drugs. There is, besides, a considerable trade with Colombo in copra, salt-fish, fish roes, dried shrimps, ghee and deer's horn, in return for Calpenty, English cloth, sugar, dates, jackwood, plants, alle brooks, iron lead &c. The fisheries here are considerable and have greatly increased of late years. Calpenty was acquired by the Portuguese in 1644 and was held by them till 1649 when it was captured by the Dutch, who remained there till 1785 when it was surrendered to the British, who still retain it. The inhabitants are composed of Malabars, Javanese, and Moors and amount in number to about 4500.—The harbour of Calpenty is a long narrow strip of land, about 20 m. in length, separated from the mainland by the Gulf of Calpenty, a straight inlet, about 7 m. broad at the widest part. The soil is excessively sandy but productive.—The Gulf affords safe anchorage for vessels of considerable size, as far as Calpenty. It is plentifully stocked with fish, and a considerable mullet fishery is carried on along the N.W. coast. It abounds also in porpoises, dolphins, turtles, trepang which is occasionally collected and exported to the markets of Singapore and Penang by Chinese merchants and in clams or conch shells. In the neighbourhood of Pannu, which is near the head of the gulf, are snakes, of a venomous species exist in great numbers.

CALPI, a tn. Hindoostan. See KALPI.

CALRY par Ang. 1840. 1845. 1846. 1847. 1848.

CALSTOCK a par and tn. England Cornwall. The inhabitants are chiefly employed in the copper tin and lead mines of the vicinity area 6143 ac. Pop 4568.

CALSTONE-WELLINGTON par Ang. 1840. 1845. 1846. 1847. 1848.

CALTANICETTA a tn. Sicily cap. prov. of same name near the Balzo, 62 m S E Palermo. It is fortified and has a citadel, broad and straight streets, houses well built. In the vicinity are springs of petroleum, and of hydrogen gas, and important sulphur mines, producing annually about 5500 tons. Caltanica is supposed to occupy the site of the *Nissa* of the Romans. Pop. 16,563.

CALTRORE, par Ang. Norfolk 1846. See Pop. 194.

CALTRONICA a tn. Sicily, prov. of and 15 m. N.W. Caltanica. The sulphur works in the neighbourhood produce annually upwards of 1000 tons of sulphur. Salt is also manufactured in the district. Pop. 7060.

CALTURA a seaport in Ceylon, cap. dist. of same name, 28 m S E Colombo; lat. 6° 33' N. lon. 80° 2' E. It consists of about 300 tiled houses, and contains a handsome Wesleyan chapel and school. A great number of native vessels, belonging to the port, trade to Malacca and other places on the coast of Coromandel. Being constantly stocked by the sea breeze, it is very healthy, and as, on this account much resorted to by travellers from Colombo.—(Ceylon Gazette, 1848, the Sure.)

CALUIRE, a tn. France dep. Rhone, 1 bank Saone, 8 m N N E Lyons. It has three annual fairs. Pop. 5048.

CALUSO, a tn. Italy Piedmont, prov. Turin 12 m S. Ivrea, with a communal college. Pop. 5000.

Vol. 1.

CALVADOS, a dep. France, bounded N by the English Channel, along which its rocky shore extends about 60 m., E. by dep. Eure S. by Orne and La Manche W. by La Manche Area, 2145 sq. m. It derives its name from a range of rocks extending about 14 m. along the coast, and which were called Calvados after a Spanish vessel that was wrecked on them. It comprises the ancient Auge, Beain and part of Lescun. The department is undulating picturesque, and possesses rich pasture. Its S. portion is traversed by hills, none of which, however, in any part of the district attain an elevation exceeding 250 ft. the culminating point is Mount Pincon. The principal rivers are the Torques, Dives, Orne, and Vire, which are navigable for small vessels. Coal is the only mineral worked to any extent. Agriculture is in a more advanced state than in many other parts of France and more than a half of the whole surface is under the plough. Wheat, barley, oats, rye and buckwheat are cultivated, but the produce of grain is insufficient for the consumption. Pastures are numerous, and well managed, and large herds of cattle are brought in from the departments of Finistere, Cote-d'Or Nord &c., to be fattened on the pastures for the markets of Paris, Rouen and Caen. Horses of the Norman breed are extensively reared, and held in high estimation. Butter and cheese are made in large quantities. Cider grown in the department, is the common beverage of the country and makes upon in the open air. The principal manufactures are linen and lace, earthenware, porcelain, hats, cloth, cotton goods and straw-hats. That of lace near Caen and Bayeux employs about 50,000 hands. There are also numerous oil mills, paper-mills, tanneries, distilleries, &c. The mackerel and herring fishery is carried on along the coast, where lobsters and shell-fish are also obtained. About 2,000,000 of oysters, procured in the roads of Cancale are annually laid down in boats at the mouth of the Seulles. The department is divided into six arrondissements containing 87 cantons. It belongs to the 14th military division of the kingdom. Chief town Caen. Pop. 498,385.

CALVELLO a tn. Naples prov. Basilicata, 13 m K. Potenza, on a hill slope. It has a handsome church and two convents. Pop. 8560.

CALVENIURA ISLANDS, two groups of rocky islets in the Bay of Bengal off the E coast of Burmah delta 1 from each other about 5 or 6 m. The N.W. group consists of seven black rocks, in lat. 16° 55' N. lon. 94° 14' E. (n). The S.E. division consists of two high rocky islets, covered with trees and bushes, connected by a reef of rocks with 5 to 7 fathoms water upon it.

CALVERLEY par Ang. Devon 1841. See Pop. 95.

CALVERLEY par Ang. W. Riding York 8908 ac.

Pop. 24,487.

CALVERT or KAYE a group of small islands N Pacific Ocean, lat. (N.W. one) 8° 54' N. lon. 170° 49' E.

CALVERTON two pars. and a vil. England. —1 par. Bucks. 1890. See Pop. 505.—2 par. and vil. Netia. The village pleasantly situated in a valley consists of one street about 14 m. long and besides the parish church has chapels belonging to the Wesleyan Baptists and Quakers.

It is gradually increasing. The inhabitants are chiefly employed in framework, in its various branches of hosiery, drawers, and gloves. Lee the inventor of the stocking frame, was born in the parish Area, 3° 20' N. Pop. 1427.—(Local Correspondent.)

CALVI a seaport in France, Island Corsica, on a peninsula in the Gulf of Calvi, on the N.W. coast of the island lat. 42° 55' 12" N. lon. 8° 48' 30" E. (n). It is a fortified place of the second class, being defended by a strong citadel flanked with five bastions. The port is good and at its entrance on Point Rivaleto, is a light 289 ft. high. The trade of the place is considerable. Its chief exports are timber, wine, oil, almonds, cherries, oranges, wax, good skin, and wood fuel. A good red wine is produced in the adjoining territory. Calvi was taken by the English in 1794, after a siege of 55 days. Pop. 1746.

CALVIA a tn. Spain, Isl. Majorca, 6 m. W. Palma; with a church school, townhall, and cemetery. Pop. 2007.

CALVIBANO a tn. kingdom of Italy Lombardy prov. of and about 17 m. S E Brescia, in a beautiful and fertile plain. It is now of small extent, but is said to have been at one time a large and populous city.—The convent

is rich in grain and pasture, and contains numerous mulberry plantations. Pop. 5502.

CALVINSON a tn. France, dep. Gard, 11 m. S.W. Nîmes with a Protestant church, a brandy distillery extensive manufactures of cream of tartar and some trade in wine. Pop. 2,963.

CALW or **KALW** as near to Württemberg, circle, Black Forest, cap. bail of same name, in a deep and well wooded valley on both banks of the Nagold, which is crossed by two bridges, and divides it into the upper and lower towns, 20 m. W. S.W. Stuttgart. It has seven churches, a grammar and a commercial school. The town church and townhouse are handsome, particularly the latter which has a fine hall with arched roof. It is one of the most industrious towns in the kingdom, and has considerable manufactures of iron, woollen cloths, hosiery, worsted, glass and leather also several dyeing establishments. In the vicinity are the ruins of the castle of the former Earls of Calw the most powerful of the Swabian nobles in the Middle Ages. One of the Earls of Calw became Pope Victor II. Pop. of tn. 4190 of bail 21,872.

CALY a river, Hudsonian, which rises in prov. Gorkland flows in a S.E. direction through Delta between the Jamaica and the Ganges, parallel to, and, for a great part of its course, at equal distances from, these rivers. Laterally it bends N.E. and falls into the Ganges on the W. confines of Oude, in lat. 2° 10' N. lon. 9° 45' E.

CALZADA, several tns. and vils. Spain, of which the chief are:—1. *Cafasda* (*Santo Domingo de la*) a city Old Castle, prov. of and 25 m. W. by S. Logroño, in a fertile plain, r. bank Oja or Ojuna, surrounded by ancient stone walls, and a fence and entered by m. as gates. Its houses are generally well built, and it has well paved and clean streets four squares, a Gothic cathedral two churches, Latin and several other endowed schools a spacious townhouse session house prison rich hospital house of mercy orphan asylum, some convents and a palace of the Marquis of Curiñal. The weaving of woollen fabrics, cloth, bays, cashmere and counterpane, druggery wool and agriculture, occupy the people. Trade in grain fruits, cattle, manufactured goods, wine, wool, oil, and hardware. Pop. 2447.—2. *Cafasda* a tn. in the N. Castle, prov. of and 15 m. S. by E. Ciudad real, in a rugged plain. The houses are well built and it has clean well paved and regular streets, a parish church chapel, townhouse prison, four schools and a fine fountain. Lutes and woollen fabrics cloth, blonde lace, oil and wine are made. Pop. 3840.—3. *Cafasda de Orpesa*, a tn. New Castile prov. Toledo, 28 m. W. Talavera, having a church townhall prison, and school P. 1160.—4. *Cafasda de Ojuna* a tn. in the N. prov. of and 48 m. S. Salamanca. 1. op. 368.—5. *Cafasda de don Diego* a vil. Leon, prov. of, and 16 m. S.W. Salamanca. Pop. 195. With many others.

CAM or **GRANTA** a river England rising in the N. part of co. Hartford, and after a N.E. course of 40 m. through Cambridgehire, falling into the Ouse, 24 m. S. Ely. It has a remarkably sluggish stream and is navigable to Cambridge, 15 m. from its confluence with the Ouse.

CAM par and vil Eng Gloucester 2946 ac. Pop. 1640

CAM par and vil Gloucester 12 468 ac. Pop. 119

CAMACHO, a large, and several small lakes, Brazil prov. Santa Catharina, connected with each other by natural canals, which are navigable for Indian canoes. They lie S. of the river Taubaté, and are commonly named Jaguarez, Ourubá, and Santa Martha.

CAMACUAN or **ICAMACUAN**, a river Brazil prov. Rio-Petro-de-Rio-Grande, rising in the W. frontier of the province, flowing E. between the serras de Tapas and the serras de Herval, and, after a course of about 150 m. passing numerous falls, and receiving numerous tributaries, it enters the Lake of Pentes by several mouths. It is navigable for canoes for about 20 m. from its mouth, where the first falls occur.

CAMAJORE (anc. *Campis major*) a tn. and comm. Italy, duchy of, and 16 m. N.W. by W. Lecco, 4 m. N.E. Piotta, 1 m. S. of a small tributary of the Lambro. It is well built, and clean surrounded by walls, flanked by towers, and protected by a deep fosse. The streets are parallel, and regularly built, and the town possesses a square, a

handsome collegiate church, hospital, and numerous other neatly constructed edifices. Pop. 3750.

CAMAMU, a small but flourishing tn. Brazil, prov. of and 100 m. S.W. Bahia, 1 bank, Anacari, 10 m. above its mouth in the Bay of Camamu. It has two churches, a townhall, and prison, a Latin and a primary school, and a port, defended by a fort. It trades with Bahia, exporting coffee, cacao, manioc flour, spirits, rice, and building materials. Pop. 2000.—The bay is about 10 m. square, receives several rivers besides the Anacari, and has several islands, one of which named also Camamu is a rocky islet about 8 m. in diameter on which several families live.

CAMANA a tn. Peru, cap. prov. same name, dep. of, and 90 m. W. Arequipa, in a fertile plain near the sea. Pop. 1500.—The province is about 75 m. N.W. to S.E. and about 40 m. broad traversed by mountains and valleys, and watered by a number of torrents. The vine is extensively cultivated from the fruit of which brandy and vinegar are made. Gold mines are numerous, but yield little profit. The province is peopled by 14 different tribes, named after the valleys which they respectively inhabit.

CAMAPUAN a river Brazil, prov. Mato-Grosso one of the head streams of the Teacury or Teacuri an affluent of the Paraguay. It has a course of about 70 m.

CAMARAV an isl. Red Sea. See **AMARAV**.

CAMARANCA a river N.W. Africa Oran, which has its sources in the Koug Mountains near Laig's sources of the Niger lat. 9° N. lon. 9° 15' W. it pursues a S.W. course of about 250 m., and falls into Xavry bay on the coast of Sierra Leone.

CAMARÉ, or **PORT-DE-CAMARÉ**, a tn. France dep. Aveyron 62 m. W. N.W. Montpellier in the form of an amphitheatre, on a rock overhanging the Dordogne. It is poorly and irregularly built, and ill paved, but the suburb which stands on the opposite side of the river and communicates with the town by a very ancient bridge, has a much more agreeable appearance. Manufactures—woollen cloth and worsted. About 1 m. from Camaré are the salins daily-leake springs of Andorre, where there is a bathing establishment much frequented. Pop. 1700.

CAMARÉ, a tolerably well built vil. Spain prov. of and 6 m. S. Santander with a church and school. Pop. 2188.

CAMARÉ a tn. Mexico dep. Tamaulipas, r. bank San Juan near its junction with the Rio Bravo del Norte, 90 m. E by N. Monterey lat. 28° 10' N. lon. 98° 30' W. Pop. 2600.

CAMARÉ, a vil. Brazil prov. Minas Geraes, 6 m. N. Mariana with a church and school and an agricultural and mining pop. of 1000.

CAMARÉ (La) (*Civitas Maricæ, Civitas (lands)*) a river in France, dep. Bouches-du-Rhône forming the delta of the Rhone. It is triangular and is bounded E. by the branches called the Old Rhone and Great Rhone, W. by the Little Rhone, and S. by the Méditerranée. Area, 250 sq. m. length, N to S, 26 m. average breadth, 11 ft. is quite flat, and in cl. m. and soil—the latter composed of mud, to be arid sand or bare gravel beds, alternating with salt marshes and lagoons, raised from 2 to 7 ft. above the sea—it assimilates rather to Africa and the borders of the Nile, than to France. Even some of the animals which resort to it—the ibex, porcupine and flamingo, belong to the African continent. The ground is so impregnated with salt that the water is brackish, the surface of the soil in summer is covered with a white saline efflorescence, and when the pools are dried up, the salt forms a cake two inches thick. Here, as in the African desert, the mirage occurs during the heat. The sea is excluded by dykes, and the waters of the Rhone are successfully used in irrigation, to counteract the effects of the salt. The most elevated parts of the soil principally on the banks of the Rhone are extremely fertile, and produce large quantities of wheat and red wine, while the lower parts afford an extensive tract of excellent pasture, on which flocks of sheep and cattle, with large droves of bovine, are permitted to roam; 40,000 lambs are reared annually. The horses are small but sturdy, much esteemed for the saddle, and said to be descended from the Arab stock imported by the Saracens. There are several lagoons, the largest of which is that of Valcarlos. From these salt and soda are manufactured. The island contains nine communes.

CAMARINES (*Nowman and Borneo*), two provs., Philippines, all Luzon, both occupying the S.E. limb of the island. The N. province is partly mountainous, but contains also extensive and fertile plains. The mineral products comprise gold, iron, and various kinds of marble. There are several rivers in the province, all of which abound in fish. Most of these streams are crossed by bridges, some of stone and others of bamboo, but they are little resorted to excepting in the rainy season, the river generally being at all other times sufficiently low to be crossed on foot. The level tracts are nearly all under cultivation and produce rice, but not sufficient to supply the wants of the inhabitants. The climate is oppressive and unhealthy excepting in the months of January and February when it is sufficiently agreeable. The inhabitants are remarkable for their honesty and good nature. The S. province is traversed by a chain of mountains that run throughout the whole length of the island, but is, nevertheless, more fertile than the N. producing some quantities of rice as enable its inhabitants to supply the neighbouring territories. In other particulars it resembles the N. province. Formerly the Camarines composed but one province, having been separated for administrative purposes.

CAMBAY or **CAMBAYA**, a large seaport to Hindocetan prov. Gujarat, in the Gubwarwar dominions, at the head of the gulf of Cambay, 85 m. N. N. W. from 240 m. N. Bombay lat. 22° 17' N. lon. 72° 30' E. (N.). It was formerly a place of considerable importance, but now much decayed, in consequence of the silting up of deposits brought down by the rivers. Near the town the tides rush in with great violence, and rise from 20 to 40 ft. making it possible for large vessels to come close up at high water though at ebbs they are left dry. It has several mosques and Hindoo temples, and the remains of many more religious structures, erected by the Jains, a sect formerly predominant in this part of India. The surrounding country is fertile, producing abundances of wheat and other grains, elegant cotton, indigo, cotton and excellent tobacco. Formerly silk and cloth goods, jewellery and indigo, were exported but the trade of the place is almost entirely limited to shipments of grain to Bombay. The silversmiths here excel in the art of enamelling which they perform by filling the articles to be so ornamented with gum-lac, and painting the figures with a small brush. Beads and other ornaments of carnelian, bloodstone, agate, and other precious stones, are also manufactured with great skill though sometimes by very simple and primitive processes, such as rolling the stones together in bags for several weeks till they acquire a spherical form. Cambay and its territory prospered under the Moguls, and until the beginning of the present century were governed by a native prince, tributary to the Maharanas, since whose fall his rights have devolved on the British Government, to whom the present nabob pays tribute and owns allegiance. The town of Cambay is about 160 m. in length from N. to S., and at its entrance between Dm. Head in Gujarat and Terapoor Point in Coconan, opposite coast, 180 m. wide, but subsequently diminishes to a breadth of about 18 or 20 m. (Add. See *Notes*).

CAMBELLO, a vil. Indian Archipelago, Isl. Ceylon peninsula Hoornvohol, on a slight head of the shore. Though difficult of approach for ships, it is much frequented by foreigners, being the chief market for cloves.

CAMRERWELL, *Er Glaz*, a vil. and par. England, co. Surrey a suburb of London, S. side of the Thames. The village is about 3 m. from Blackfriars Bridge and is mostly occupied by shops in the environs, which are very beautiful are a number of elegant villas and mansions, the residences mostly of wealthy and many of them retired merchants. The new church completed in 1844, is considered one of the most elegant Gothic structures erected in England since the 18th century. There are, besides these other places of worship under the Establishment, and several chapels for Dissenters a free grammar-school, a green-coat school with several other endowed schools and minor charities. The S. Metropolitan Cemetery a large and well laid-out enclosure, is in this parish, which also comprehends the important hamlets of Dulwich and Peckham and the districts of St. George. Area of par. 4243 ac. Pop. 54,687.

CAMBIL, or **CAMBIL**, and **HALAMAR**, a co. Spain, Andalusia, prov. of, and 14 m. S. by E. Jaen, between two hills, crowned, respectively by the ruins of Arab castles after

which the town is named. The river Villanueva, crossed here by two bridges divides the town into two equal parts. Its streets are tolerably well kept, and it possesses a square parish church, endowed school, townhall, prison, store-house, and cemetery. Wine and oil are expressed, and some trade is carried on in grain and cattle. An iron foundry has also been established in a suppressed convent. Pop. 373.

CAMBING POLD, a small isl. Flores Sea, N. E. entrance of Onbay Passage, between the islands Timor and Onbay. S. peak in lat. 8° 18' S. lon. 125° 29' E. (N.). It is from 10 to 12 m. in length, and of considerable height.

CAMBODIA, or **CAMBODJA**, a territory in S. E. Asia. See *ASIA* and *SIAM*.

CAMBODIA, **CAMBODJA** or **PONTANAWAT** a tn. Siam the anc. dep. of territory of same name, on both sides of the Mekong lat. 12° 4' N. lon. 105° 4' E. It is now greatly decayed but the ruins of its royal palace and pagoda attest its ancient greatness. The Dutch had a factory here in the 17th century.

CAMBODIA, or **CAMBODJA**, **POINTE** The most S. E. point of Siam. lat. 8° 40' N. lon. 104° 55' E. at the entrance N. side of the Gulf of Siam. S. E. from the point a shoal flat stretches out a great way from the coast.

CAMBODIA, or **CAMBODJA**, **RIVER**. See *MEKONG*.

CAMBORN, (or **MACRIN**) a market tn. and par. England co. Cornwall, 11 m. N. W. Falmouth. The town, which stands pretty on the slope of a gently rising hill and a neatly built contains a handsome granite church and various dissenting chapels, with a number of daily and Sunday schools. Being situated in the midst of one of the richest mining districts in the county and in the immediate vicinity of some of its most productive tin and copper mines, it has risen of late years from insignificance to be a place of wealth and importance. The West Cornwall Railway has a station here. Area of par. 844 ac. Pop. par. and tn. 12,887.

CAMBORJIB, or **KAMBOUJ**, a tn. Siam 180 m. N. N. W. Bangkok, at the confluence of the Sra-wei and May-nan rivers, and for the most part along the bank of the former. It is a straggling place, comprising one long street with several smaller diverging from it and having in all about 500 houses, but no lazaret. It is surrounded by a wall in which are eight gates. A brick fort constructed here is said to contain 20 guns.

CAMBRAI or **CAMBRAY** a tn. France, dep. Nord, 33 m. S. by E. Lille, 7 m. Dunk, Scheldt, a branch of which traverses the town. It is generally well built, is surrounded by walls flanked with ancient round towers, and defended by a strong outwork. The Place d'Armes, at one end of which stands the Hôtel de Ville, is of great extent and the esplanade is one of the finest in French Flanders. The Revolut on of 1793 stripped Cambrai of all its principal ornaments leaving only two out of 19 churches. The beautiful cathedral and the tomb of its archbishop the celebrated Fénélon, were raised to the ground. A new monument to the memory of the latter by the sculptor David, was inaugurated, in 1825 in the present cathedral a modern church of indifferent architecture. Cambrai is the seat of an archbishopric, tribunal of commerce, court of first resort diocesan summary communal college, société d'émulation and school of design. It has a theatre, military hospital *sans-de-médecine* and a public library with about 80 000 volumes, and 1000 MSS.

The town has long been celebrated for its manufacture of the fine linnen called, from the place, cambric as other manufactures are cotton goods, net lace and cotton yarn, starch black and white, potato flower and beet sugar. There are also some oil mills, tanneries salt refineries, bleaching grounds, and several breweries. It carries on a considerable trade in grain oil-seeds wool, flax, cattle, agricultural produce, and coal. The St. Quentin canal begins here, and joins the Oise at Chateau.

Cambrai is the *Commenes* of the Romans by whom it was fortified. It is celebrated for the famous League against the republic of Venice, entered into here in 1508, and for a treaty of peace between Charles V. and France I. signed here in 1529. Louis XIV. took Cambrai from the Spaniards in 1687 and it was finally ceded to France by the treaty of Nymegen. On June 24, 1815 it was taken by a detachment of the British army under Sir Charles Colville, and thereafter to 1818 was one of the principal stations of the army of occupation. Pop. 18,508.

CAMBRISIA [Latin, *Cambriscus*] an ant. dist. France, about 35 m. long by 10 broad, which was once a dependency of ancient Flanders and now forms the greater part of arrond. Cambrai, dep. Nord. It was ceded to Louis XIV., in 1678 by the treaty of Nimegue.

CAMBRIDGE an island co. England having on Lincoln N. co. Northampton, Huntingdon, and Bedford N. W. co. Bedford and Essex S. Suffolk E. and Norfolk N. E. greatest length, about 60 m. greatest breadth, about 25 m.; area, 549,490 ac. The surface is, in general flat, although somewhat elevated towards the S. where grassy downs depasture numerous sheep and cattle. About a third part of the county is under tillage, the remainder being divided between pasture and waste. That part of the county—about one half of the whole—N. of the Ouse belongs to the site of Ely, and is wholly within the Bedford Level (which see). It is fine land, intersected by numerous canals with windmills for lifting the water into channels high enough to carry it off and grows heavy crops of oats, wheat, flax, hemp, and rye for sheep-fodder and possesses excellent pastures. The soil of the S. part of the county is chalky with some parts clayey loamy and gravelly. N. E. and E. of the town of Cambridge is the most level chalk tract in England. The more elevated tracts yield all kinds of corn especially barley and also turnips. In the fens a considerable number of cattle and long-woolled sheep are grazed, and in the N. part of the county particularly on the rich meadows on the banks of the Cam, dairy husbandry is prosecuted extensively and successfully. The butter produced here is in great demand in London, where it is sold under the name of Cambridge and also of Epping, butter. Cambridge cheese is famous, also, for a peculiarly rich and fine flavoured description of cream cheese, made at Colchester. A vast number of calves are reared here, also for the London market. Agriculture, however, on the whole, is in a backward state in this county; the farm-houses poor and the cottages miserable. There are no manufactures, excepting a little coarse potteryware, but some of the towns do a good deal of business in corn and oil. The minerals are unimportant. The principal rivers are the Ouse, which crosses the county near its centre, W. to N. E. is navigable throughout the whole of that part of its course the Cam or Granta, flowing S. W. to N. E., and falling into the Ouse, and navigable as far up as Cambridge; and the Nene, or Nona, which crosses the N. part of the county S. W. to N. E. and is also navigable. Besides its rivers, the county has several navigable canals and internal communication is further facilitated by numerous good roads, and the main-line of the Eastern Counties Railway and several branches. The principal towns are Cambridge, Ely and Wisbeach. It is divided into 18 hundreds which, together contain 167 parishes. The whole county returns seven representatives to parliament three county members two for the town of Cambridge, and two for the universities. Pop. 18,406 of which 92,699 were males, and 92,766 females.

CAMBRIDGE, a seat, bor. and market in England co. Cambridge, 50 m. S. N. E. London, on a level tract of ground on both sides of the Cam, but the greater portion on the S. bank of that river which is crossed by a neat cast-iron and several other public bridges, besides which, each college contiguous to the river has a private one. It is about 3 m. in length, E. to W. and about 1½ in breadth is wanting in elegance, and, as a town, has, with exception of its celebrated university few points of interest, and fewer of beauty. The streets, formerly narrow winding and irregular are now much altered and improved, and are well paved and well lighted. The principal market place, formerly much improved, is centrally situated, and consists of two wooden oblong squares, in one of which is a conduit, supplied by water from an aqueduct, at a distance of 8 m. erected for the benefit of the town in 1614 by Holman, livery stabler who gave rise to the well-known proverb of Holman's choice, by allowing to a rule of letting his horses by rotation only thus leaving the hire no alternative but to take the one whose turn it was to go out. At the S. end of the market-place stands the guildhall, which contains several large rooms for public purposes and near the N. W. extremity of the town is the county court-

house, a spacious and handsome structure. There are, altogether, 14 parish churches in the town and seven places of worship for different religious bodies; one for Independents, three for Methodists—Unitarian and Primitive and three for Baptists. With exception of St. Sepulchre's and probably St. Mary's the Greater there are none of the churches in any way remarkable as specimens of architecture. The former, called, from its shape, the round church was built in imitation of the Holy Sepulchre at Jerusalem. In 1848, it was re-

ST. SEPULCHRE'S CHURCH, CAMBRIDGE.—From a Photo by Rogers.

stored at considerable cost, under the auspices of the Camden Society. St. Mary's church is adorned with a massive and lofty tower crowned with four turrets. But it is to its university that Cambridge owes the interest which it excites. The buildings of this illustrious institution extend along the greater portion of the W. part of the town between it and the Cam, so both of which it runs nearly parallel. They consist of the senate-house the university library and schools,

GATEWAY OF TRINITY COLLEGE, CAMBRIDGE.
From a Photo. Manuscript of Cambridge.

the former containing about 170,000 volumes the university or Pitt press the Fitzwilliam museum the anatomical museum and the observatory, most of them remarkable for architectural elegance. The colleges are 17 in number called

respectively St. Peter's, *Clare Hall*, *Pembroke*, *Gonville* and *Clare*. *Christy Hall*, *Corpus Christi*, *King's*, *Queen's*, *St. Catherine's*, *Hall*, *Jesus*, *Christ's*, *St. John's*, *Magdalene*, *Trinity*, *Emmanuel*, *Sidney*, *Sturges*, and *Down*—the most recent, all of them magnificent structures. The greater number of the colleges are contiguous to each other chiefly along the *Cam* river but there are several in different parts of the town. The origin of this learned foundation is involved in obscurity but is supposed to date from the seventh century and to have been founded by *Sigebert* a king of the East Angles. It did not, however, assume the regular corporate form of a university till about the 13th century when the first college was erected by *Henry III.* In 1388, *King Edward III.* granted the university some important privileges and in 1430, *Pope Martin V.* invested it with extensive ecclesiastical and spiritual jurisdiction over its own scholars. In the reign of *Ricard III.* certain privileges and rights were bestowed on it, all preceding grants were confirmed, and the university declared to be incorporated by the name of the chancellor, masters, and scholars. The present university comprises, as already mentioned, 17 colleges. Each college is a body corporate, and bound by its own statutes, but under the control of the general laws of the university. Each furnishes members for the executive and legislative government of the university. The place of assembly is the senate-house. All persons who are masters of arts, or doctors in divinity, civil law, or physics, having their names upon the college boards, holding any university office, or being resident in the town of *Cambridge*, have votes in this assembly. The annual income of the university is about £55,000 arising from various sources including the produce of farms at *marketstalls*, for degrees &c. and the profits of the university press, but chiefly from the proceeds of the rectory of *Harwell*. The public professors are paid some from the university chest, some by the Government, and others from estates left for that purpose. The degrees conferred by the university are those of doctors in divinity, civil law, and medicine, and also in the sciences of music, that of master of arts, and the degree of bachelor in each of the foregoing. The academic year consists of three terms, *Michaelmas*, *Lent*, and *Easter*. The languages, arts, sciences, &c. taught, are *Arabic*, *Hebrew*, *astronomy*, and *geometry*; history, *canon*, *chemistry*, *divinity*, *laws* of *England*, *geology*, *Greek*, *Hebrew*, *modern history*, *civil law*, *mathematics*, *medicine*, *mineralogy*, *music*, *natural philosophy*, *physics*, besides various advanced lectureships. The botanical garden on the S.E. side of the town occupies between three and four acres. The anatomical school contains a large collection of valuable preparations. On an eminence, at the distance of 1 m. from the college walls, on the road to *Madingley* stands the observatory which cost £25,000. The *Fitzwilliam* museum, bequeathed to the university by *Lord Viscount Fitzwilliam*, is a magnificent structure, of the Corinthian order and contains a noble collection of books, paintings, drawings, &c. The university sends two members to the House of Commons, the privilege having been granted by *James I.* The right of election is vested in the members of the senate, in number (in 1845) 3204. The vice-chancellor is the returning officer. The principal charitable institution is *Addenbrooke's* hospital, situated at the S.E. entrance to the town. The annual cost of its maintenance is about £2800. There are, besides, several almshouses, minor charities, and free schools. The markets in *Cambridge* are well supplied with every kind of provision, but from the very great consumption of the university the articles are comparatively dear.

The weekly market-day is *Saturday*. There are two fairs annually one in *June*, the other in *September* the former continued for a week, the latter which is called *Sturbridge Fair* for 14 days but both are now much curtailed. The principal articles brought to sale on these occasions are horses, cattle, timber, pottery, leather, cheese, hops, wool and hardware. There are no manufactures in the town, but a considerable trade is carried on with the port of *Lynn* in corn, coal, timber, oil, and iron. No dramatic performances are allowed in *Cambridge* but there is a theatre in the adjoining village of *Barwell*, which is occasionally opened great annual *festivals*, however, are often celebrated in the town, where there is a permanent musical society on a great scale. *Cambridge* is a town of great antiquity in *Domesday* book,

where it is described as an important place, it is called *Greutbrige*, from one of the names of the river. The present name, derived from the modern name of the river *Cam*, being comparatively recent. In 871 it was burnt by the *Danes*, and again in 1010. Subsequently to this it was the scene, at various periods, of events which have become matter of history including several royal visits, and some military experiences in the time of *Cromwell*. Of the ancient castle built by *William the Conqueror* on the site of a Roman station, and some years used as the county jail only the gateway now remains 1 op. (1841) 24,433, (1851) 27,818 increase 184 per cent.

CAMBRIDGE a tn. U. States, Massachusetts, on *Charles* river 3 m. N.W. Boston. It is the seat of *Harvard University* the oldest and best endowed literary institution in the U. States, possessing a library which contains upwards of 50,000 volumes, an excellent philosophical and chemical apparatus, cabinets of minerals, anatomical museum and botanical garden. A law school, theological seminary and medical school, are attached to the institution. The average attendance of students is 346. Besides the university buildings which are extensive and commodious, though irregularly built, *Cambridge* contains an annual 16 churches, two banks, rope factories and numerous lumber yards. Many of the private mansions are elegant and spacious. Pop. of township, 8409.—Several other towns of the U. States have the same name.

CAMBRIDGE GULF N.W. Australia, between *Capes Dusseldorf* and *Donnet* lat. 14 45 S. It is about 30 m. wide at its entrance, and runs about 76 m. inland.

CAMBRILL, a tn. and port Spain, Catalonia, prov. of and 13 m. W.B.W. *Tarrega*, on a hill-slope, and surrounded by decaying walls. It has a parish church chapel townhall custom house, two schools, an hospital a cemetery cavalry barracks, and prison. Wine, brandy, brocade, and tiles, are manufactured, and fishing is carried on. Only small vessels visit the port. Pop. 2254.

CAMBUSIE ANG a vil and par Scotland, co. Lanark. The village has on a rising ground 4 m. S.E. *Glasgow* and a station on the *Hamilton railway* it has an established church and school, and is inhabited chiefly by weavers and masons but is chiefly noted for the *Combining* work a remarkable revival in religion which took place in 1742 under the ministrations of the Rev Mr *McCallock*.—The PARK is about 8 m. square, and abounds in freestone, coal and limestone. Pop. (1841) 3022 (1851) 3300.

CAMBUSVETILAN par Scot. Lanark 12 m. by 3 Pop. (1841) 8803 (1851) 8821.

CAMBIVNA, an isl. Flores Sea, S. coast of the S.E. peninsula of *Celebes*. Centre point in about lat. 8 21 N. lon 121 57 E. It is about 24 m. long 9 W. to N.E. about 30 broad, and rises steep and rugged from its W. extremity. It is inhabited and cultivated.

CAMDEN.—1 A city and river port, U. States, New Jersey 1 bank, Delaware, opposite *Philadelphia*, and 29 m. S.W. Trenton. It has six churches an academy three schools three printing-offices, and several factories. A railway leads to New York, and another to *Woodbury* and connecting with *Philadelphia* is maintained by three ferries. Pop. 3571. 2 A vil U. States, S. Carolina 25 m. N.E. *Columbia*, 1 bank, *Watauga*, which is passed by a bridge 1½ m. S.W. the village. It has four churches, an academy court-house, jail, and other public buildings. In the neighbourhood is an extensive cotton factory. A battle was fought here, in 1790 between *General Gates* and *Lord Cornwallis* and another in 1781 between *General Greene* and *Lord Mawdon*. Pop. 1009.

CAMDEN a maritime co. New S. Wales, 65 m. in length and 41 in breadth, area, 1400 sq. m. The surface presents a continuous succession of hills and dale, with large tracts unimproved in fertility of these, the principal are the *Cow Pasture*, so called from the large herd of cattle found there, the produce of a few runaway animals that had escaped soon after the foundation of the colony. The beautiful and picturesque region of *Illawarra* or the *Five Islands*, is in this county it comprises 150,000 ac. and extends, N. and S. 18 m. along the coast. There are some fine lakes in the county the scenery around which is very beautiful. *Camden* returns one member to the Legislative Council. The county

town in Berrima. The stock has been estimated at 8598 horses, 33,432 head of horned cattle, 8510 pigs, and 85,117 sheep. Pop. 882.

CAMDEN TOWN an extensive suburb of London, par St. Pancras, co. Middlesex 8½ m N W St. Paul's. The houses, which are in general of recent erection are regular and substantial built of brick in the upper part, the crescent, terrace, and other ranges, have a handsome appearance, and command a pleasing though distant view of the Hampstead and Highgate hills. Camden Town is intersected by the North-western Railway which has a station here of immense extent. Besides the chapel a handsome brick edifice, erected in 1828, there are two churches, and places of worship for Independents and Wesleyans. There are also a veterinary college, a museum, an infirmary a range of almshouses for decayed journeyman tailors, and an orphan working-rechool.

CAMEL, two parts. Eng Somerset—1 Queen Camel 2408 ac. Pop. 2—2 West Camel 1½ sq. Pop. 876.

CAMELFORD a small market tn. and bor. England, co. Cornwall, on the Camel 25 m N W Plymouth. The streets are spacious and well paved, but the houses are, in general very indifferent. It has a tower built erected by the Duke of Bedford a free school, and a Wesleyan Methodist chapel. The inhabitants are chiefly engaged in agriculture. It was disfranchised by the Reform Act. Previous to that period it sent two members to the House of Commons and had done so from the time of Edward VI. Pop. 708.

CAMELTON a rd. Scotland co. Sutherland 1½ m N W Falkirk on the line of the Forth and Clyde Canal. Coal making is the chief employment. Pop. 1340.

CAMEN a tn. Russia Westphalia, gov. Arnsberg 25 m. N Münster on the Wesel. It contains two churches, a Protestant and a R. Catholic. The inhabitants live by agriculture and the ordinary handicrafts. Pop. 2383.

CAMP NA, a tn. Saxony circle Bautzen 1 bank White Elster 20 m N E Dresden. It contains several churches, one of them the Marienkirche in the Gothic style, particularly handsome, and richly adorned a library a grammar school and several charitable endowments and has considerable manufactures of earthenware, tobacco, and starch several dyeworks and tanneries, numerous mills, a weekly and two yearly markets. It was almost wholly destroyed by fire in 1842. Lessing the poet, was born here June 22, 1729. An hospital was dedicated to his memory in 1826. Pop. 4600.

CAMERI a tn. Italy Piedmont, prov. of and 4 m N N E Ivrea, near the Tanaro. It has several churches and manufactures linen. Pop. 3000.

CAMPINO [anc. Camerinum] a tn. kingdom of Italy 86 m N N E Rome seat of an archbishopric, and of a diocese. The town stands on a hill, and contains some good public buildings, among which are the archiepiscopal palace, a handsome edifice, surrounded by pillars the cathedral a spacious structure and the church of Orsanna, which contains some fine pictures by the great masters. In the principal square there is a bronze statue of Pope Sixtus V. There are also 12 monasteries, seven convents and a university founded in 1727. Silk is both produced and manufactured in the town and forms an article of commerce. Pop. 5000.

CAMERON par Scot. Fife 4 m. square. Pop. 1207.

CAMEERONS, MOUNTAIN AND RIVER. The mountains of Cameroon occupies the N E angle of the Right of Biafra W Africa lat. 4 15' N lon. 9° E. It has 30 m in diameter and its loftiest peak is 12 000 ft. high it is covered nearly to the summit with trees of luxuriant growth, and seems to form the common source of a range of volcanic hills stretching N E. and ending with the Mountains of the Moon, at lat. 6° N lon. 12° 30' E. At a short distance S S E. from the Cameroon Mountain is the estuary of the Cameroons river which is the receptacle also of several other streams. It is a fine river having an average breadth, before it reaches the estuary of about 400 yards, with a depth in the dry season varying from 3 to 20 ft. The r. bank of the stream, is low and swampy for several miles towards the base of the mountains, covered in most parts with mangroves, and intersected by numerous creeks, the l. bank rises at once from the water side to the height of about 50 ft. There are several

large and thriving towns on the river through which an extensive trade is carried on in ivory and palm-oil. The latter is of a superior quality and the former generally very large, and also of excellent kind. The supply of ivory is said to be inexhaustible, 60 tons having been procured in one season. It is here all taken from dead elephants, who, in search of water have perished in vast numbers about 300 m inland S.E. from Cameroon.

CAMERTON a par and vil England, co. Somerset The village lies in a valley 8 m W Wells and is intersected by the Somersetshire coal canal. The inhabitants are mostly employed in the collieries. 1° 48' ac. Pop. 1545.

CAMETA a tn. Brazil, prov. Para, 1 bank Tocantins, near its mouth, 80 m S E Belém. It has two churches and an hospital and is a depot for goods brought down the Tocantins and other streams, and a place of resort for vessels ascending these streams. It is a populous flourishing town whose inhabitants are devoted to agriculture, commerce and navigation. Pop. including its district, which is extensive and fertile, 20,000.

CAMIGUIN ISLANDS —1 One of the Tabuyanas islands off the N coast of Luzon lat. 18° 54' N lon. 121 55' E (a.) from 7 to 9 m long high and hilly. The S. part is formed of a high mountain formerly a volcano, visible at 60 m distance. The shore is lined with coral rocks, and on the E and N sides the land is low close to the sea. On the W side of the island, S of its centre, is the port of San Pio Quinto, formed by a cove in the land about 5 m wide, and 1½ m deep, sheltered from the sea by an island of the same name, which lies in the middle of the entrance. It is the only place amongst these islands where a large ship can be considered at all safe — 2 One of the smallest of the Philippines, on the N W coast of Mindanao lat. 8° 59' N lon. 124 20' E (a.) It is high having a knob on its centre that may be seen 60 m off.

CAMINHA a tn. and par Portugal, prov. Minho, dist. Monção on a tongue of land 1 bank, and near the embouchure of the Minho, 30 m N W Braga lat. 41 52' 42" N lon. 8 45' W (a.) It is strongly fortified, but being commanded by a neighboring hill could not be successfully defended. It contains two churches, three monasteries, two hospitals, and a parsonage. The harbour is spacious, but is encumbered by a bar which renders it inaccessible to any but small vessels. The inhabitants depend chiefly on fishing and salt making. Pop. 1272.

CAMISANO two tns. Italy —1 A tn. (Austria) gov. Venice prov. Vicenza, cap. dist. of same name 11 m N W Padua. It has a parish and a subsidiary church and an hospital. Pop. 2800 — 2 A tn. and com. Lombardy prov. Cremona, 6 m. N N E Crema. Pop. 881.

CAMLIN par Irel Antrim 5709 ac. Pop. 1819.

CAMMERINGHAM par Eng I. mooln 1806 ac. P 141.

CAMMERTON par Eng Camberland 2,27 ac. P 102.

CAMMIN or **KAMMIN** a tn. to Prussia prov. Pomerania, cap. circle of same name on the Dvivenow 5 m from its mouth on the shores of the Baltic, 38 m N N Y Riga. It is surrounded with walls with three gates and has three suburbs a cathedral built in 1184 two chief churches, four monasteries, and a spacious market-place. The inhabitants live chiefly by agriculture and fishing. Cammin is of Wendish origin and was formerly the seat of a bishopric which was suppressed in 1648. Pop. 8176 — The **CIRCLE**, area, 478 geo sq. m., with exception of the downs along the shores of the Baltic, is flat, and the soil a sandy loam. 1 sq. 84,636.

CAMOLIN a small tn. Ireland, co. W and 21 m N Wexford r. bank Benn something of one long regular street of stone houses on one side and mud cabins on the other. Besides the parish church, it has a R. Catholic chapel and a Methodist meeting house. Pop. 777.

CAMONICA or **VALLE CAMONICA** a valley Italy Lombardy prov. Bergamo formed by two branches of a ramification of the Rhetan Alps, and stretching about 50 m from N.E. to S S W along both branches of the Olzio, and as far as the Lake of Iseo. It lies in one of the chief lines of communication between Italy and the Tyrol is in general well cultivated, and abounds in iron given indication both of copper and lead and has quarries of finely variegated marble gypsum and slate. The inhabitants, now about 50,000, were formerly called Camuni.

CAMORTA, *Cam Morta*, or *Moavani*, one of the Nicobar Islands, Gulf of Bengal, lat. $8^{\circ} 2' N$; lon. $98^{\circ} 40' E$; length, 10 to 15 m.; breadth, 3 to 5 m. It is separated by a narrow channel from Nonoway and along with these islands forms Nonoway harbour which is very spacious, and fit to shelter a large fleet from the winds. Camorta is lofty near the harbour particularly on the W side, where the principal village stands, at the foot of a precipice but towards the N and the centre it is flat, and contains a rich soil which not only affords good pasturage but spontaneously grows yams, pine apples, plantains, guavas, and sugar cane. Near the S.W. point is a lagoon, which extends far into the island. In the forests are several sorts of poon trees fit for masts. Camorta notwithstanding its fertility is thinly inhabited.

CAMLAGNA a tn. Naples, prov. Principato Citra, 18 m. N.E. Salerno surrounded by high mountains. It is the seat of a bishopric, and contains a superb cathedral, three parish churches, several convents, a college, an hospital, and a most beautiful and has some trade, and a large fair held August 1. Pop. 8192.

CAMPAGNA or *ROMA* an extensive district, Italy nearly corresponding with the ancient *Laticum* and with the modern deleg. Praenestina, and S.E. of the present Roman territory. It stretches S.W. along the shores of the Tiber, from the banks of the Tiber to Terracina, on the frontiers of Naples, and backwards to the Apennines greatest length about 60 m. average length 40 m. It is a low undulating tract, almost nowhere 200 ft. above the level of the sea; of a gloomy and desolate appearance, abounding with swamps, which exhale pestiferous miasmas, and give the unhappy inhabitants exposed to them a fruitful and disgusting appearance exhibiting all the marked symptoms of dropsy, jaundice and ague. Great part of this district must, in all ages, have been unhealthy but there cannot be a doubt that the desolation now extends over parts of the country once well cultivated and densely populated.

CAMPAGNATICO a tn and com. Tuscany prov. of and 15 m. S. Grosseto on the summit and side of a hill 840 ft. above the sea, near r. Cam. Once a fortified town built defended by a castle has an ancient parish church, municipal buildings and several oil and wine presses. Pop. 994.

CAMPAGNOLA, a vil. Italy ducy Modena, prov. of, and 12 m. N.W. Reggio. Pop. 2000.

CAMPAN a tn France, dep. Hantes Pyrenées 16 m. S.E. Tarbes 1 bank, Adour in the beautiful valley to which it gives its name. The houses mostly built of the marble found in the vicinity are remarkably neat and clean. One street stretches along the river and another along the road to Bigorre. In the place or square is a handsome fountain with marble basins. Woollen stuffs and paper are manufactured. In the vicinity is a remarkable stalactite grotto, and green marble of a fine quality is obtained. Pop. 3442.

CAMPANA, an isl. S. Pacific Ocean, off the W coast of Patagonia S. extremity lat. $49^{\circ} 10' S$. lon. $76^{\circ} W$. It is about 80 m. in length, N to S and 10 m. in breadth.

CAMPANA (La) a tn. Spain, Andaluz, prov. of and 32 m. N.E. by Seville 1 bank, Madre Yague, an affluent of the Guadalquivir. It has two squares, a parish church, two endowed schools, a townhall, a theatre and a public prison, public storehouse, cemetery and several fountains. The inhabitants are engaged in weaving, brick making expressing oil, cultivating grain and rearing cattle. Pop. 5380.

CAMPANARIO a tn. Spain Extremadura, prov. of and 61 m. E by S Badajoz, S. m. N.W. Castuera with narrow ill-built, and neglected streets, a parish church, chapel of ease, two endowed schools, a town-house and prison and a deserted hospital. Manufactures—linen fabrics, export robes, wine, and oil. Trades—grain, wool, and exports. Pop. 5464.

CAMPANET a tn Spain, Isl. Majorca, 22 m. N.E. Palma, on a rising ground; with well-built houses, a square, a parish church, townhouse, prison, two schools, and a cemetery. Pop. 2128.

CAMPANHA a city Brazil, prov. Minas Geraes, 230 m. N.W. Rio-de-Janeiro lat. $21^{\circ} 31' S$. lon. $49^{\circ} 50' W$. The principal streets run N and S, and others cross them at right angles. Houses chiefly of earth, and generally surrounded by gardens, contrasting curiously with the arid bare hills by

which the town is encircled, and up by the excavations whence the gold has been taken. It has a townhouse and prison, five churches, an hospital, a Latin and a primary school, and a theatre. In the vicinity are several thermal springs. Pop. engaged in agriculture and mining 8000.

CAMPBELL ISLAND a mountainous isl. S. Pacific, 80 m. in circumference, 120 m. S. Auckland Islands lat. (S . harbour) $53^{\circ} 34' 24' S$ lon. $169^{\circ} 12' 42' E$. (S.) discovered in 1810 by Frederick Hazleburgh, in the brig *Porpoise*. It has several good harbours of which two on the E side are the best. *Porpoise* harbour the more S of these two, runs about 4 m. inland the upper part of land looked with good anchorage for 100 ships to lie in safety and wood and water in abundance rises and falls of tides at mean 48 inches. This island like the Auckland group, is of volcanic formation and subject to sudden and violent earthquakes, the prostrate condition of the trees sufficiently indicating the prevailing power of the westerly storm. Its iron-bound coast, and rocky mountains, whose summits appear to the eye bare of vegetation, give it the aspect of a very desolate and unproductive rock, and it is not until the quiet harbours are opened that any green hills, save a few grassy spots, is seen. In these narrow bays, a belt of brushwood composed of trees in a very stunted state form a verdant line close to the beach. (Hooker) There are neither quadrupeds nor land birds but the albatross is plentiful and seals are found on its coasts. (Ross's *Antarctic Voyage* book.)

CAMPBELLTON—1. A seaport in royal bor. and par. Scotland, co. Argyll. The town stands on a lock or bay of same name lat. $56^{\circ} 23' 30' N$ lon. $5^{\circ} 30' 30' W$ extending along the curved shore in the form of a crescent, the principal part, however being on the S.W. side. It has two Established, one U. Presbyterian and two Free churches, with Independent, Episcopal, and R. Catholic chapels, several week day and Sabbath schools and a ragged school, established 1860. It has also an almshouse and a handsome new jail. In the centre of the main street is an ancient stone cross or obelisk of the 15th century supposed to have been brought from Iona. The town is well supplied with water by gravitation, brought a distance of 15 m. and well lighted with gas. The mill-wright business is carried on to a considerable extent; and there is a brass and iron foundry. The herring fishery is prosecuted with activity and so also is the whale fishing but the distillation of malt-whisky is the staple business of the place there being 24 stilleries in the town and its immediate vicinity. The spirit is of superior quality and brings a high price in the market about 1000 000 gallons are sent annually to Glasgow alone. There are good quays on either side of the harbour. This number of vessels registered at the port, in 1849 was 20 tons 1154. Regular communication by steam-vessels is maintained with Glasgow and Ayr. The principal imports are barley, yeast, coals, timber, iron, and general merchandise the exports are whisky malt, black cattle sheep and horses, turnips, beans butter cheese and fish, and, formerly potatoes. It unites with Oban, in every branch and Ayr is sending a member to the House of Commons. Pop. (1841) including the village of Dalnabreoch which joins the town, 6790 (1851) 6880.—The *max* or *loch* as it is called, is about 2 m. in length and about 1 m. in breadth, with a depth of 8 to 15 fathoms water. It is, in some, one of the most beautiful and secure harbours in the W. of Scotland being land-locked by Dava Island.—The *parish*, extending across all the peninsula, is about 11 m. by 9. Pop. (1841) 9634 (1851) 9361.—2. A borough in New Brunswick, co. Cumberland, 15 m. S.W. Sydney Pop. 541.

CAMPDEN a city, a market tn. and par. England, co. Gloucester 16 m. N.E. Cheltenham. The town lies in a fertile dell surrounded by richly-wooded hills on all sides but the S.E. and consists chiefly of one street, about 1 m. long houses in general modest many of them in the Elizabethan style. There are a parish church, and meeting-house for Wesleyans and Baptists a free grammar-school founded in 1487 a school for girls, and a national school for boys and almshouses, endowed by the first Viscount Campbell. The inhabitants are chiefly agriculturists. Area of par 4680 ac. 1 m. 1961.—(Local Correspondent.)

CAMPEACHY or *CAMPOTON*, a seaport in Central America, state of Yucatan, cap. dep. of same name lat. $19^{\circ} 50' N$ lon. $90^{\circ} 33' W$ (A.); W coast, peninsula of

Yacatan, on a bay of its own name and strongly fortified. It is wholly built of brown calcareous stone but the streets are narrow irregular ill-paved, and dirty. Most of the private houses are only of one story but the public buildings on the square are of two stories, and are tastefully ornamented and painted. It contains six churches, and six convents, the walls of one of which bear the marks of the injury sustained by a siege in 1840. It has also a college, with six professors and a theatre, one of the most beautiful edifices in the town. The principal suburbs, each of which has its own church, are San Roman to the S. and Candelario and San Francisco to the N. The market is well furnished with fruit, vegetables, and fish but provisions are much dearer here than in the other parts of the State. The town derives its chief importance from the exportation of logwood termed Campeschy-wood, and wax. The wood (*Logwood Campeschy*) is cut down in several places but especially on the banks of the Rio Campeche of the town and the wax is procured from the wild stingless bees which are found in the country to the E. The other products are salt, rice, and sugar, marble of good quality is found. The only important manufacture is that of cigars. The harbour is capacious, but shallow and vessels drawing more than 6 ft. must anchor 3 m. from the shore. Notwithstanding this disadvantage, vessels measuring 100 feet of lead are built here and launched by numerous artificers. The climate is healthy and though the heat at noon is extreme yet the land breeze in the morning and the sea-breeze in the evening render the atmosphere at these periods exceedingly agreeable. During the rainy season again prevail Campeschy stands on a series of subterranean caverns, excavated by the ancient Mayas. In the neighbourhood are numerous interesting ruins. Pop. 18,000.

CAMPINA (INZ), a town, Modena, dist. of and about 8 m. W. Reggio, near the frontiers of Parma. *r.* bank. 22.25. It is remarkable from the number of fountains which it contains. Pop. about 2000.

CAMPERDUIN or **CAMPERDOWN** sandy hills or downs, Holland, prov. N. Holland, between the N. sea and the small village of Camp, off which the British, under Admiral Duncan, gained a hard won victory over the Dutch under De Winter October 11 1797.

CAMPIL —1 a dist. Italy Tuscany in the Val d'Arno below Florence, containing several villages of the same name the inhabitants of which are almost entirely employed in preparing the fine Tuscan straw and in consequence of the demand for their staple, have, in recent times, rapidly increased Pop. 9782 —2 a tn. Naples, prov. Terra di Otranto, 9 m. W. N. W. Leone, with a handsome collegiate church. Pop. 4101.

CAMPILGIA DI MAREMMA a tn. and com. Tuscany prov. of, and 34 m. N. W. Grosseto 18 m. S. by S. Cecina surrounded by walls, entered by four gates and defended by a fortress. It has two churches, a large hospital and municipal buildings two annual fairs are held in May and August. Pop. 3057.

CAMPILLO numerous tns. and vils. Spain of which the chief are—1 *Campello de Alhambra* a tn. New Castile prov. of, and 85 m. S.E. by S. Coenova with level, clean, and well-paved streets a parish church, four conventual churches, two schools, a townhall, prison and storehouse. Manufactures—leather oil and wine, shoes, and silvers. An annual fair is held in September. Pop. 3149 —2 *Campello de Arona*, a tn. Andalusia, prov. of and 16 m. S. by W. Jaen having a church, townhouse, school, and prison. Pop. 1121 —3, *Campello de Llerena*, a tn. Extremadura, prov. Badajoz, 24 m. N. E. Llerena; possessing a church, townhall, and prison, two schools, a storehouse, and agricultural pop. of 1602 —4 *Campello de la Jara*, a vil. New Castile, prov. of, and 58 m. S.W. by W. Toledo. Pop. 1012 —5 *Campello de Bana*, a vil. New Castile, prov. of, and 29 m. N. by W. Guadalajara. Pop. 515 —6, *Campello* a vil. prov. of and 23 m. N. by E. Leon. Pop. 415.—(Malaga.)

CAMPILLO a tn. in Spain Andalusia, prov. of, and 30 m. S.W. by S. Malaga. In a plain, near the source of the brook El rin. It has wide and paved streets, three squares a large Doric parish church, a chapel, townhouse, prison, four schools a poor house, extensive storehouse, fine fountain, and spacious cemetery Manufactures—woollen fabrics, leather oil &c. Trade—wool, grain, fruits, cattle, and gypsum, the

last extracted from a quarry in the neighbourhood. Pop. 4410.

CAMPINA-GRANDE, a tn. Brazil, prov. of and 76 m. W. N. W. Paraíba. The greater number of its houses are of earth except the new ones, and the townhall. It has a church and two schools and, along with its district, suffers from a defective supply of water which has, on various occasions, caused considerable migrations. Pop. tn. and dist. 5000.

CAMPINAS, a city Brazil, prov. of and 70 m. N. São Paulo, in a fertile sugar district, in which are numerous sugar-mills and distilleries—the products from which are exported on mules to Rondon. Pop. tn. and dist. 6000.

CAMPINE (Flemish *Kempes* or *Kempeland*) an extensive arid and sandy tract forming part of the provinces of Antwerp and Limburg together with a narrow portion of Brabant in Belgium and continued into Holland. The greatest industry has been employed to reclaim it, but about 300,000 ac. still remain waste. See *BEELZUM*.

CAMPIO FORMIO or **CAMPIO FORMIO** a market tn. Austrian Italy gov. Venice, prov. Friuli, dist. Udine, 66 m. N. E. Venice. It has a parish church and numerous mills along the canal of Noja and is famous for the peace of 1797 between Austria and France which bears its name. Pop. 1640.

CAMPOLI a tn. Naples, prov. Abbruzzo Litt. I. 8 m. N. Turano. It has a cathedral three churches, an alms house several convents an hospital and a good *deglia*. Pop. 7125.

CAMPO —1 A vil. Tuscany S.W. coast, 101 E. Ba on a gulf of same name, 7 m. S.W. Porto Ferrajo. It contains a parish church. Pop. 1700 —The name CAMPO is given to a considerable district of the S.W. part of the island, commencing at Ancona —2 A vil. and com. Naples, prov. Calabria Ultra I. dist. of, and 7 m. N. W. Reggio. The chief employment is the rearing of silk worms. Pop. 1848.

CAMPO numerous tns. and vils. Spain —1 *Campo de Crispiano*, a tn. New Castile, prov. of and 32 m. N. E. Ciudad Real in an extensive plain at the foot of a small ridge or mesa with well built houses, clean, wide, and paved streets, a principal and six smaller squares, a spacious Gothic church Latin and three endowed schools an hospital, townhouse, police-court, prison public storehouse, and cemetery Weaving, dyeing, expressing oil and wine, and husbandry employ the people. Pop. 5380 —2 *Campo* a tn. Extremadura, prov. Cáceres, 18 m. N. Coria with a church, townhall, three schools, a prison, and cemetery. Manufactures—leather, fabrics, cloth, soap oil and wine. Pop. 2629 —3 *Campo* (*São Maria del*) a tn. New Castile prov. of, and 58 m. S. by W. Cuenca possessing a church, townhouse two endowed schools, and a prison. Pop. 1610 —4, *Campo* (*São Maria del*) a tn. Old Castile prov. of, and 21 m. W. Burgos having a church, townhall Latin and two other schools, hospital orphan asylum prison and cemetery. Pop. 681 —5, *Campo* a vil. Valencia, prov. of and 80 m. N. by W. Alicante. Pop. 1478 —6, *Campo Fino*, a vil. Andalusia, prov. of, and 40 m. N. E. Huelva. Pop. 628.—(Madoz.)

CAMPO LARGO a tn. Brazil prov. Bahia, L. bank Rio Grande about 90 m. above its junction with the São Francisco lat. 12° 50' S. lon. 45° 10' W. with a church townhouse, prison, and primary school. Pop. tn. and dist. chiefly labourers 3000.

CAMPO-MAIOR, a tn. Brazil prov. Paraíba 163 m. S.S.W. Paraíba, on the Buribim, near a lake abounding in fish. It has two churches, a school and resident magistrates. Its district is large, watered by the river Longa, and the streams Surubim and Maranhão. Pop., engaged in agriculture and cattle-rearing 5000.

CAMPO MAIOR DE QUIKERAMOBIM, a tn. Brazil, interior of prov. Ceará, 180 m. S.S.W. Fortaleza or Ceará lat. 6° 10' S. lon. 39° 20' W. *r.* bank, Quikeramobim—an affluent of the Jaguaribe. Like all others in the interior of this province, it is a poor town but still, both its trade and population are increasing. It has a beautiful church, a townhouse, prison, a primary and a Latin school. Its territory is traversed by rivers and rivulets that dry up annually. The lower grounds are very fertile but the higher ones are sterile in the warm and the rainy season, the inhabitants descend to the lower country and feed numerous herds of cattle, which find a ready market in Pernambuco. Pop. tn. and dist. 8000.

CAMPO-MAYOR, a fortified tn. Portugal, prov. Alentejo, on the Spanish frontier, dist. of, and 12 m N N E. Huelva, and 15 m N W Badajoz. The streets are narrow and dirty. It has a church, two convents an hospital, and a workhouse. In 1793 the gunpowder magazine accidentally blew up, destroying a great part of the town and walls, and killing many of the inhabitants. It was taken by the Spaniards in 1801. Pop. 4818.—Several other small places in Portugal have the name of Ocampo.

CAMPO SAN PIETRO or **CAMPO SANPIERRO**, a tn. Austrian Italy, gov. Venice, deleg. of, and 12 m N N E. Padua, r. bank, Misone. It has manufactures of linen, and several churches. Pop. 3400.

CAMPO SANTO, a tn. duchy Modena, gov. of, and 15 m N N E. the town of Modena. 1 bank, Enza. It has an annual fair of three days. A fierce battle was fought here between the Spaniards and Austrians, in 1745. Pop. 2000.

CAMPORA, a tn. Spanish isl. Majorca, 32 m S S E. Palma, 6 m from the sea. The houses are generally well built and the town contains a square, parish church, handsome chapel, two schools, a townhouse, and cemetery. Manufactures—linen fabrics, brandy wine oil and refined salt. Trade—fruit, brandy and salt. There are thermal springs and lakes in the environs. Pop. 2796.—Several other places in Spain have the same name.

CAMPORA DOS GOTTAGAROS or **SÃO SALVADOR DOS CAMPORA**, a city Brazil, prov. Rio-de-Janeiro, on a plain, r. bank Parahiba, 20 m W São João-da-Prata, lat. 21° 40' S, lon. 41° 30' W. It contains 1500 houses, chiefly of earth, only the principal streets are paved, but all are lighted with lamps. It has a townhall, prison, several churches, a primary and a Latin school, and a school of mathematics, philosophy, rhetoric, and French. The port only admits small vessels, and during the rains when the river is swollen, many small canoes arrive. An active trade with São de Janeiro is carried on in sugar coffee brandy building materials &c. The district is extensive sugar is the chief crop though rice, millet beans and mandioc are also raised as is a considerable number of cattle and horses reared. Pop. 40000.

CAMPORA NOVOA, a vil. Brazil, prov. Rio-de-Janeiro, dist. of, and 30 m N Cabo Frio. A small place, in a ruinous condition.

CAMPOBASSO, a tn. Naples, gov. Salerno, on a hill slope 52 m N E. Naples. It is fortified and is the seat of criminal and civil courts. It has a collegiate church, four parish churches, several convents, two colleges, an hospital and a almshouse. The calvary manufactured here is sold to be the best in Naples. The town is favourably placed for business on the road from the capital to the Adriatic. Two fairs are held annually. Pop. 8390.

CAMPOTRELLA, a fertile isl. New Brunswick at the mouth of Passamaquoddy Bay, lat. 44° 57' N, lon. 68° 55' W (N.) with a light on its N. point 80 ft. high, separated on the S. W. from Lunenburg by a strait, called the Narrows. This island is about 9 m long, and from 1 to 3 broad. It is for the most part in a state of cultivation has several fine harbours, particularly that of Harbour de Laite produces timber and carries on a considerable trade in fish and gypsum.

CAMPONEILLO, a tn. Sicily Val di Trapani, dist. Mazara. Pop. 5000.

CAMPOLIBETO, a vil. com. Naples, prov. Molise, on Rondo, dist. of, and 9 m. N E. Campobasso. It occupies two small hills, and makes a very good wine. Pop. 2410.

CAMPORASANO, a vil. Naples, prov. Terra di Lavoro, dist. of, and 2 m. N. Nola. The chief employment is the rearing of silk-worms. In August there is an annual fair which lasts three days. Pop. 1495.

CAMPBELL, par. and vil. Eng. York, W. Riding, houses of stone. 8860 ac. Pop. 1113.

CAMPBURY ASH, par. Eng. Suffolk. 1813 ac. Pop. 571.

CAMPBURY, a vil. and par. Scotland, on Barzillig. The village is 10 m. N Glasgow, picturesque situated at the base of the Campine hills, hills of moderate elevation. Near the village are the Kirkton glen, and Fin glen, much visited from Glasgow and the surrounding country for their picturesque beauty.—The Farnes 7 m. by 8 m. is rich in coal and alum and has extensive gravelfields, bleachfields, and chemical works. Pop. 6918.

you L.

CAMPTON, par. Eng. Bedford. 1120 ac. Pop. 1000.

CAMROSE, par. Wales Pembrokeshire. 8129 ac. Pop. 1241.

CAMBINGMOON, a seaport, China, prov. Kwang tong or Canton, about half-way between Mameo and Booca Tigrie on a small island called Keow 85 m N Hong kong lat. 22° 30' N, lon. 115° 40' E. It has a tolerable harbour which used to be much resorted to by opium vessels, and now serves as a convenient depot. Since 1844, a considerable native trading town has sprung up about it. There is a European hotel in the place. Pop. about 5000.

CAMKOS RIVER, a river Cape of Good Hope, S. E. coast dist. Uitenhage. One of the largest rivers in the colony. It is formed by the junction of the Salt and Karresha rivers, which unite at lat. 33° 57' S, lon. 23° 35' E. From this point it flows in a S S E. direction and falls into St. Francis Bay at lat. 34° 3' S, lon. 25° 7' E. entire course, about 105 m. Its largest tributary is the Kouga, which joins it about 80 m from its embouchure. It is about 320 yards wide a little above its mouth, its waters beautifully clear and its bank is here skirted by a dial of wooded hills. The Camkos was at a former period the E. limit of the colony.

CAMUS, par. Scot. Tyrone. 406 ac. Pop. 479.

CANADA, an extensive territory of America, belonging to the British formerly divided into two provinces called respectively Upper and Lower or Western and Eastern Canada separated by the Ottawa but now politically united though still differing in laws, customs and manners.

The entire territory presents an approximation to the form of an equilateral triangle, the base of which may be considered as being represented by the 60th parallel of N. lat. and the apex by Point Pelee—the termination of a long peninsula which projects into Lake Erie. Lat. 41° 47' N. The extreme S. point is generally deemed to be Cape Gaspe in the Gulf of St. Lawrence. Lon. 64° 10' W. The W. limit is undetermined, but is supposed to extend to about lon. 90° or 90° 30' W.

The E. side of the triangle to which the general outline of the territory has been assimilated and which comprises Lower or E. Canada, and the peninsular portion of W. Canada as formed by the N. shores of Lakes Erie and Ontario and the river St. Lawrence to about lon. 70° W. and which the States of Maine and New Brunswick touch at its E. limit. The W. side, again comprising Upper or W. Canada, is formed by the N. shores of Lakes Superior and Huron. The length of the former from S. W. to N. E. is about 600 m. breadth about 800 m. length of the latter from S. E. to N. W. about 750 m. breadth between 200 and 300 m. exclusive of the peninsular portion, which terminates in Lake Erie, and which is 280 m. in length with an average breadth of between 40 and 50 m. The entire length of the territory is of both Canadas, from E. to W. or from Cape Gaspe to lon. 90° 30' W. is from 1200 to 1800 m. and its average breadth, from N. to S. between 200 and 300 m. It is but proper to add that as the boundaries of Canada are not precisely determined on any side but the S. various limits will be found assigned to it by various authors true in all other directions.

Upper Canada, though by no means so level as it has been represented, is characterized by a general evenness of surface—there being few great elevations, with exception of a table ridge of considerable length, which stretches S. E. and N. W. forming a watershed between Lakes Superior and Huron, to which it runs parallel at a distance of about 70 m. and the S. portion of Hudson's Bay called St. James's Bay. A similar watershed traverses Lower Canada also as is indicated by the opposite courses of its rivers—a series of which flow N. E. towards the St. Lawrence while another pours into St. James's Bay—both emanating from a common centre. The existence of this watershed has, however, been doubted, and it has been alleged as not improbable that the rivers here, as in other parts of N. America, have their origin in lakes which lie in a plain of a nearly level surface, and are situated at nearly the same elevation above the level of the sea.

Upper Canada, though much more fertile than Lower Canada, is inferior to it as regards rural and picturesque scenery. The physical features of the latter, generally are varied and grand consisting of boundless forests, magnificent rivers and lakes, extensive prairies, bold rocky heights, and towering craters, diversified by cultivated fields, pretty villages and settlements, some of them stretching up along

mountain fertile islands, with neat white cottages, rich pastures, and well-fed flocks. This beautiful appearance, however, changes to a very different character in winter. After a heavy fall of snow descended by rain and a partial thaw a strong frost coats the trees and all their branches with transparent ice, often an inch thick, weighing on them so heavily that to a tempest whole forests are laid prostrate with tremor, deep noise and uproar. Nothing, however, can be imagined more brilliant and beautiful than the effect of sunshine in a calm day on the frozen boughs, where every particle of the icy crystals sparkles and nature seems decked in diamonds.

Mountain Rivers and Lakes.—The mountains of Canada are confined entirely to Lower or E. Canada, the elevations in the W. province not attaining that dignity. The principal ranges stretch from S. W. to N. E. and lie nearly parallel to each other. They consist of the Green Mountains, so called from the pure forests that cover their slopes, which, from the latitude of Quebec, follow nearly the course of the St. Lawrence, on the E. side of which they are situated and terminate on the gulf of the same name, between the Bay of Chaleur and Gaspé Point. On the N. side of the river is a corresponding range which forms undulating ridges of about 1000 ft. in elevation, the Mealy Mountains, stretching from about lat. 75° N. to Sandwich Bay compared to be about 1500 ft. high and always covered with snow and the W. Irish Mountains, a short range of crescent form between the Gulf of St. Lawrence and Hudson's Bay. The rocky masses connected with the mountain chains that line the St. Lawrence river advance in many places close to the streams, forming precipitous cliffs, frequently 200 and 300 ft. high. The rivers of Canada, as elsewhere remarked, of the St. Lawrence and the lakes, nearly all flow either N. or S., as they originate in the N. or S. slopes of the water-shed, by which both provinces are traversed, the one from N. W. to S. E. the other from S. W. to N. E. As this elevated ground approaches nearer to the lakes, and to the St. Lawrence than to Hudson's Bay it follows that the rivers which flow towards the latter have a much longer course and, generally, a much greater volume of water than those that fall into the former.

The principal rivers in Lower Canada are the St. Lawrence which issues from the N. E. of Lake Ontario, and which after passing lat. 45° N. is wholly within the province of Lower Canada, forming, previously to its reaching that point, the boundary line between Upper Canada and the State of New York. The Ottawa, which forms the boundary between Lower and Upper Canada, issues from Lake Temiscamingue lat. 47° 18' N. lon 75° 35' W. although its remotest sources are said to be 160 m. further N. It falls into the St. Lawrence at Montreal after a course probably of 350 to 400 m. and is now navigable for about 80 m. from its embouchure its scenery particularly during the latter part of its course, is singularly picturesque and beautiful, embellished by magnificent cataracts, and numerous richly wooded islands. The frequency with which it issues from Lake St. John lat. 46° 15' N. also falls into the St. Lawrence near Tadoussac after a course of about 100 m. The St. Maurice, or Three Rivers, originates in some small lakes in lat. 47° N. and joins the St. Lawrence about 70 m. above Quebec. Its width is about 150 m. of which 110 or 115 m. are navigable by boats, from the mouth upwards its banks are generally high, in some places from 200 to 1000 ft. and covered with large groups of majestic trees, and it has a great variety of falls and cascades, and is adorned with a number of beautiful islands. Other rivers of less note though still of considerable size, but too numerous to be particularized here, debouch on the N. shores of the St. Lawrence, below the frequency. The same, or nearly the same, may be said of the S. side of the estuary where the principal rivers are the Richelieu, Chaudière, and the St. Francis all tributaries also, of the St. Lawrence, issuing from the N. The Richelieu flows from the N. extremity of Lake Champlain, in the State of New York and joins the St. Lawrence at the head of Lake St. Peter. It is navigable for boats for 80 m. The banks of the Chaudière like those of most of the rivers in Lower Canada, are high and steep, and thickly clothed with wood, which, in many places, overhangs the flowing rapids with the most picturesque effect. The St. Francis flows through a country of great beauty diversified by hills and deep forest and meadow river and lake.

The principal rivers of Upper Canada occur in the penin-

sular portion which projects into Lake Erie. These are the Thames and the Ontonagon, the former originates in the District of London by the union of several streams, about lat. 43° N. lon 81° 15' W., and falls into Lake St. Clair after a S. and S. W. course of about 80 m. It is navigable for large vessels to Chatham, 18 m. up, and for boats nearly to its source. The Ouse rises in the Huron district, about lat. 44° N. lon 80° 10' W. and, after a S. and S. W. course of about 100 m. falls into the N. E. corner of Lake Erie. Numerous streams of smaller size, and of which the Trent is the principal, drain the Canadian side of Lakes Ontario and Erie. The chief rivers that flow towards Hudson's Bay are the Albany, Moose, Harrison, and Rupert.

The lakes of Canada are extremely numerous—the entire surface being thickly dotted with sheets of water of various dimensions, interwoven with a net-work of connecting streams. The larger are Lakes Superior, Huron, Erie, and Ontario, none of which, however, belong exclusively to Canada, being equally within the territory of the United States. Their N. and S. shores forming, respectively, the N. and S. boundaries of these countries.—For more full details regarding the lakes and rivers of Canada see the several Articles under their respective names.

Geology Mineralogy &c.—The N. parts of Canada so far as known appear to be of crystalline formation while along the banks of the St. Lawrence and the N. shores of the lakes, the primary stratifications prevail including limestone in a great variety of states. The banks of the St. Lawrence are in several places, composed of schist, in a disjunct or conglutinated condition and in every quarter granite is found, more or less inclined but never parallel to the horizon. In the Gaspé district—the most E. part of Canada—numerous and beautiful specimens of quartz have been obtained including a great variety of carnelian, agate, opal and Jasper indications of coal have also been traced. The limestone formation extends over 30 000 sq. m.; the dip is moderate, and the strata of limestone generally undisturbed. In the extensive region of the Ottawa, the limestone is invariably highly crystalline and sometimes very coarse grained in its structure, at other times its texture is so fine as to form statuary marble. Fossil organic remains are numerous. Along the shores of the estuary and Gulf of St. Lawrence, horizontal banks of recent shells appear at various heights from 10 to 100 ft. above high water mark and inland beaches of sand and shingle, with similar shells, as also elevated limestone rocks scooped out by the waves, and showing lines of lithodroma perforations—all indicating the successive upheaving of the land, since the sea was inhibited by the existing species of testacea. Earthquakes have been frequent in Canada, and some of them of considerable violence. The most tremendous on record commenced on the evening of February 6, 1663 and is said to have continued at intervals for six months, extending from Quebec to the river Saguenay a distance of about 120 m. Other accounts say that it extended more than 100 m. in length and about 300 m. in breadth—agitating a surface of 180 000 sq. m. Earthquakes of a less violent character but of forces sufficient at times to split walls and throw down chimneys, are very frequent on the shores of the estuary and the St. Lawrence. One of these occurred in December 1781 in St. Paul's Bay about 65 m. N. E. Quebec, and the inhabitants say that about every 25 years, a violent earthquake returns, which lasts 40 days.

Iron of the best quality has been found in great abundance in Canada silver in small quantities and lead, tin and copper occur in several places. The latter seems to abound most on Lake Superior where one mine alone (Cliff mine) yielded, in 1845 1000 tons. Marble, of many beautiful varieties lithographic stone, and gypsum are also found in the W. province. Climate.—If latitude alone determined the temperature of the atmosphere the climate of the Canadian would resemble that of Central and E. Europe, but, through the operation of the numerous disturbing influences by which temperature is affected it is nearly the same with the climates of Norway Sweden St. Petersburg and the S. parts of Iceland—the isothermal line diverging far to the N. of the parallels of latitude that connect it with the old Continent. Both the heat of summer and the cold of winter are much greater than in the corresponding latitudes of Europe—the thermometer ranging between 105° above, and 90° below the zero of Fah; but, in

the districts adjoining the great lakes on its E. border the climate is much milder and more equable, than that of places more remote—a natural consequence of the presence of great expanses of water. The prevailing winds in the Canadas are the N. E. W. and S. W.—the last being the most frequent. The nature of the Canadian climate is remarkable for its purity and transparency while frosts are almost unknown. In Lower Canada the winter commences about the latter end of November and lasts until the end of April when agricultural operations are resumed during this period the frost is generally intense, with N. winds, and a clear atmosphere. In Upper Canada the winter is considerably shorter and the sleighs, or sleighing season, which in Lower Canada, generally continues for five months together, scarcely lasts two in the upper provinces. The average depth of snow that falls in the course of the winter is about 80 inches, but is frequently accumulated to far greater depths during snow storms and drifts. Generally speaking, the climate of Upper or W. Canada is much milder than that of Lower or E. Canada—owing chiefly to its being nearer the great lakes. Here, spring is at least a month or six weeks earlier than in Quebec and Montreal and the extremes and sudden variations of temperature are much less intense. Indeed winters in some localities in Upper Canada sometimes pass away with scarcely any snow at all, and with a very moderate degree of cold—circumstances which never occur in the lower provinces. The sudden and great fluctuations of temperature to which the climate of the Canadas is subject, form one of its most remarkable characteristics, a change of 80° in 24 hours, or less, being frequent while it is rare that the weather continues the same for more than three or four days at a time. Notwithstanding this no climate in the world is more salubrious or more conducive to longevity—contagious disorders or fatal epidemics being almost unknown while, from the greater dryness of the climate persons suffer far less from coughs and colds than they do in England. From the same cause, the surface of the country in the latter part of the summer and autumn has not that beautiful verdant appearance which is so attractive in a moist climate, like that of England but this want is amply compensated by the magnificence and splendour of the various tints of the forest at the close of the summer season. The climate, up to 60° N. lat. is singularly favourable to the growth of most of the cereals, particularly wheat, oats, maize, and barley although in the lower province, the field labours of the farmer are interrupted for five months in the year but in the upper for a considerably shorter period.

Vegetable Productions, Agriculture, &c.—In Lower Canada, as in all cold countries, vegetation is necessarily rapid, the foliage of the forest being often unfolded in great luxuriance in the course of a fortnight. In Upper Canada, where the suddenness of the transition from winter to summer is not so great the budding and blowing are rather more gradual than in the lower provinces. The greater portion of both provinces is covered by forests—consisting chiefly of white and red pine, the former of which frequently attains the height of 100 ft. to the first branch, and occasionally 200 ft. Immense quantities of this timber are annually sent to England. The other kinds of timber are ash of various species, black and white birch, beech, elm, hickory, sugar-maple, birds eye or curled-maple, butternut tree, black walnut, wild cherry tree (*Linnaea*), bass-wood or lime tree on rich moist ground, the white spruce and button-wood tree in the marshes, alder, spotted alder, willow and varieties of thorn and in the swamps, red and white cedar and tamarack. There are besides, spruce fir, Scotch fir, larch, black oak, and several other varieties. Of shrubs, there are many kinds amongst which is the sumach. Flowers of great beauty and variety abound—the woods in summer being crowded with them they comprise many kinds now cultivated in English gardens, such as the scarlet lobelia, blue lupin, purple gentian, columbine, scarlet and other honeysuckles, and a host of others. Amongst the wild fruits are the wild cherry, wild grapes, black and red currants, gooseberries, raspberries, cranberries large quantities of which are exported, plums, strawberries, &c. many of these, however are inferior to the cultivated fruits of the same species. Nearly all the vegetables and fruits of England thrive in the Canadas, particularly in the W. province, under proper cultivation. In the E. parts, peaches and apples are produced in such abund-

ance, that the former have been sold for a quarter of a dollar per bushel and the latter for three half-pence. Pumpkins and squashes grow in the open fields to an enormous size, often attaining the weight of 50 or 60 lbs.

The extent of occupied land in Western or Upper Canada, in 1848, was 8,613,591 ac. of which 1,780,159 ac. were under tillage, and 766,768 in pasture, the remainder unutilized, or in a state of nature, with exception of a portion appropriated to gardens, town plots, &c. Of the ground under the plough there were 556,696 ac. in wheat, 33,542 ac. in 32-4 barley 385,571 oats, 69,516 peas, 51,997 maize, 76,553 buckwheat, and 56,789 potatoes sown altogether 1,166,004 ac. under crop. The live stock amounted in the same year to 555,845 horned cattle, 151,289 horses, 888,807 sheep, 424,211 hogs. Dairy produce:—3,380,406 lbs. butter and 638,357 lbs. cheese.

The returns for Eastern or Lower Canada are neither so recent nor so satisfactory as those for the Western Provinces. The returns for 1844 (others having been made for 1848) give 2,802,217 ac. as under cultivation but the whole produce in grain amounted only to 11,445,737 bushels, and in potatoes to 9,018,869 bushels. Of the grain, 922,355 bushels only were wheat, while in 1831 this crop amounted to 2,404,765 bushels showing a decrease of 3,461,921 bushels. Live stock in the same year—horned cattle, 409,851; horses, 146,728; sheep, 668,821; swine, 197,035. Wheat is the chief article cultivated by the Canadian farmer but in the Lower Provinces there is not sufficient of even that crop raised to maintain the population, the deficiency being made up by importation from Upper Canada. Farming, until within a comparatively recent period was in a very backward state in the Canadas. Bouchette, who wrote nearly 30 years since (1812) says—The improvements that I have been introduced in the European systems of agriculture are unknown in Canada, or at least, have never been adopted and the Canadian farmer is still seen guiding the old-fashioned plough used by his forefathers. The scientific rotation of crops is unknown to him and he steadily pursues the system handed down to him by his ancestors. All this, however is now much changed especially in Upper Canada. Within the last few years agriculture has begun to keep pace with the improvements introduced into England and Scotland. The emigration into the country of scientific agriculturists, with the establishment of agricultural societies, have been very instrumental in effecting this great change; stock of a different and better description has been imported, and much land that was previously considered by the old proprietors worn out, has been improved and brought back by means of judicious treatment, to its old capabilities. In order to give an impetus to the progress of improvement in agriculture in Upper Canada Government holds out every encouragement, including pecuniary aid, to the formation of agricultural societies in that province. The most usual period for sowing in spring is April, respecting commencing about the middle of August, but the time of both operations is liable to fluctuations, being dependent on the mildness or rigour of the weather. Though in general sowing in Canada is later than in the N. parts of Britain the harvest is earlier gathered in consequence of the greater warmth of the climate in summer. The other agricultural productions of Canada besides those already mentioned are hemp, flax, tobacco, and maple sugar. Of the first three, very small quantities only are produced, but of the last, the quantity is very considerable amounting on an average to upwards of 4,000,000 lbs. annually. The quantity of wool produced in 1848 amounted to 2,359,756 lbs., the average fleece being 2½ lbs.

Animals—Beavers, wolves, beavers, foxes, raccoons, otters, martens, minks, and mink-like are to be met with in Canada, but the first three are exceedingly rare, and all the others are rapidly diminishing in numbers. The lynx and wild cat were also formerly tenants of the territory but have now gone further N. Deer were at one period plentiful but are also becoming scarce. Squirrels of different colours and species are extremely abundant, and are eagerly sought after being considered excellent eating. Wild swans, wild turkeys, woodcocks, and snipes are occasionally met with pigeons are plentiful in spring and autumn; ducks of many varieties, and wild geese also abound. Among the smaller feathered tribe are many beautiful birds—jays, woodpeckers, and blackbirds

of numerous and beautiful varieties—two species of humming birds, one of a golden green, the other having a crimson throat. Some of these, however, are summer birds only migrating in autumn. Besides these, there are eagles, kites, hawks, horned owls, herons, bitterns, and cranes. Snakes are numerous, but the venomous kinds are not so plentiful as in the U. States. As yet the latter see the rattlesnake adder and the copper head. Wild bees are numerous. In the lakes and rivers the principal fish are the sturgeon, which is frequently taken from 80 to 100 lbs. weight, the lake or salmon trout, which attains a weight of from 10 to 50 lbs. the white fish, the most delicious fish in the lakes, pike, pickeral, lake, marlinclunge or muskellunge also a fine fish, sometimes

weighing 50 lbs. and fish, suckers, perch, eels, speckled trout, and lake herring, a flabby and indifferent fish.

Commerce, Trade, and Manufactures.—Timber forms the principal article of export, extending to many millions of feet annually. Large quantities of barrelled beef and pork, flour, barley, oatmeal, wheat, butter, tallow, and pork, tallow, tallow, wool, staves, and lumber are also exported. In this last trade, the lumber trade, as it is called, a vast amount of capital is invested in erecting saw-mills, log-ponts, &c. The total exports from Canada in the year 1853, amounted to \$25,950,825 1/2 the imports to \$2,905,355. The principal imports by sea consist of wines, spirits, molasses, coffee, tea, tobacco, salt, refined and maniocado sugars.

EXPORTS OF THE PROVINCE OF CANADA IN 1853 SHOWING TO WHICH COUNTRY EXPORTED.

Commodity	Total Value.	Great Britain.	America.	South America.	U. S. States.	Other Regions.

To the item of manufactures exported, we are warranted to add the ships, &c. built during the year on foreign (chiefly British) account. Their total tonnage was 49,615, and if we assume their average price to have been £12 10s. per ton it is an additional value accrues of \$299,187 10s. Further to the value of exports from inland ports add 30 per cent = £447,964 3s. and we have the grand total \$25,950,825 1/2. In 1852 it was \$23,836,091. In 1851 £8,452,501. Official returns of the commerce of the six principal ports of Canada, in two recent years:—

Exports.	In 1851.	In 1852.
Quebec.	£1,790,825	\$441,457
Montreal.	£88,191	\$22,792
T. Total.	£1,878,996	\$464,249
Hamilton.	£26,719	\$6,679
Wellington.	£1,790,825	\$441,457
St. John's.	£26,719	\$6,679

In 1853 the total number of vessels registered as belonging to Canada was—milling vessels, 694 aggregate tonnage, 81,879 steamers 91 aggregate tonnage, 9,343.

Order and are brewed and whisky distilled in great quantities in Upper Canada. Maple sugar, flaxseed, and linens are also manufactured to a great extent by the country. The first steamer in 184 to 6,403,945 lbs. of which by far the greater portion was produced in Upper Canada. The inland trade of Canada will, doubtless, be much improved when the various lines of railway now in contemplation and for some of which charters have been already obtained, shall have been completed. In the meantime it is conducted chiefly by its numerous canals, some of which are stupendous achievements. The principal are the Rideau and Welland Canals. The first is 185 m. long, extending from Lake Ontario, at Kingston to the Ottawa at Chatham, and is large enough to receive vessels of 120 tons burthen. The Welland Canal, which has been recently enlarged, unites Lakes Erie and Ontario. It is 45 ft. wide at the bottom, and 10 ft. deep. The other more noticeable canals are the Cornwall Canal 12 m. long, avoids some of the most violent rapids of the St. Lawrence; the Beauséjour Canal, about the same length, unites the Lakes St. Francis and St. Louis; the Lachine Canal extends from Lake St. Louis to Montreal; the Chambly Canal unites Lake Champlain with the Richelieu River and a number of others of lower note, many of them short cuts to avoid the rapids of rivers. Both the inland and external trade of the Canadas are likely to be greatly benefited by the railway from Halifax Nova Scotia, to Quebec, which has at last (1853) been sanctioned by Government, and a guarantee given of a fixed interest on the outlay required for its construction. This important line will give the Canadas the advantage, all winter of an open seaport, of which they have hitherto been deprived, from the freezing of the St. Lawrence.

People, Manners, Customs, &c.—The Upper Province, or

Canada W. is settled principally by emigrants, and the descendants of emigrants, from Great Britain and Ireland. There are also large numbers of U. States loyalists or persons who fought on the side of Great Britain during the American war a mixture of all nations, and their descendants and in particular localities there are large settlements of Pennsylvania Dutch and there are also many Americans scattered over the country. The Irish have rather a majority in the provinces, and next to them the English. In Lower or E. Canada, the majority of the inhabitants (habitants) are of French origin mostly descendants of settlers from Normandy established in the colony previously to 169 and to whom they still bear in many particulars a close resemblance. They are civil, polite, and hospitable, less illiterate, less warlike, less in energy and obstinately attached to old habits and usages, to the extension of all improvement. They are all in comfortable circumstances, being mostly proprietors of land and living on the produce of their own properties. Their houses are sometimes built of stone, but generally of wood, and only one story high. The walls outside are white-washed which imparts to them particularly in summer when almost everything else is green a lively and cleanly appearance. Each possesses a large kitchen or good sitting-room and as many sleeping apartments as may be thought necessary. Some of the houses have verandahs, and a small orchard and garden are often attached. The sitting-rooms or parlors and bed-rooms are lined with smoothly planed boards, and painted blue, red green, yellow &c. Till recently the chief clothing of the population was wholly of their own manufacture, but the cheapness of English goods has induced a partial use of the latter. Canadian cloth is, however, still almost universally used and the gray coats of the habitants is the characteristic costume of the country. The capote is a large coat reaching to the knee bound round the waist by a sash of the gayest colours. Thus, with a straw hat in summer a bonnet robe or a fax cap in winter and a pair of moccasins, complete the dress of the French Canadian. The women are clothed mostly after the fashion of French females in a similar condition of life. The habitants of the poorer classes are generally tall and thin with small dark lively eyes, aquiline noses, and thin lips. Those who are much exposed to the air are as dark as Indians. The women, when young, are handsome brunettes. The enjoyments of the people, as in all U. S. Catholic countries, are connected with their religious ceremonies. On Sundays, accordingly after services they are devoted to festivity. The easy and comfortable condition of the population, generally enables the habitants to spend more time in pleasure and recreation than perhaps any other people. It is owing to this that the greater part of them come from tedious labour during the winter and devote that season to visiting and merry-making. Unfortunately deep-rooted shillings of emigration, amounting to positive aversion, exist between

the French and English Canadians, arising chiefly from national prejudices, which have already led and will, probably again lead to the most unhappy consequences. The Indians, who were the aboriginal inhabitants of the Canada, are now nearly exterminated. A few reduced tribes however still occupy portions of the country. In Upper Canada they are met with on Lakes Superior and Huron, and thence towards the N. boundary. In Lower Canada, some of them occupy a reserved space on Lake St. Francis (an expansion of the St. Lawrence, 10 m. above Montreal) and others reside in villages throughout the country (all leading a life of misery and starvation). They are described as contending for the carcasses of the most worthless animals after the latter have been stripped of their skins by the Canadian hunter. It has been further stated, that the number of the unfortunate Indians who die of hunger and want would be yet more considerable, if the humanity of the servants of the Company of the Peace did not frequently supply their wants. Amongst the tribes in the unhappy condition are the Hurons the most intelligent, the bravest, the noblest, and once the most powerful of the North American Indians.

Government and Revenue.—The province of Canada, as mentioned in the beginning of this article, formerly consisted of two provinces, which were united under one legislature in 1840 with the view chiefly of extinguishing the dominion of the French party whose greater political influence had hitherto been extremely detrimental to the general interests of the colony, an effort, however, which does not seem to have been accomplished by the measure. The form of the existing Government is popular being in imitation of that of the United Kingdom. The executive power is wielded by the Governor-general, who is appointed by the Crown and is assisted in his administration of affairs by an executive council the members of which are appointed by the Governor and the tenure of their office depends upon their receiving the support of the Provincial Parliament of United Canada. The members of the executive council must hold seats in either branch of the Provincial Parliament. The Provincial House is called the legislative council the members of which are summoned by the Queen, and hold their seats for life, unless forfeited by crime. The Legislative House consists of 84 members elected by the people. In counties, a 40s. sterling freehold confers a vote, and in cities and towns the payment of a yearly rent of £10 sterling. The forms of procedure in the Provincial Parliament are identical with those of the Imperial Parliament. Bills passed by both houses of the Provincial Parliament, must receive the Queen's assent before they acquire the force of law and this the Governor is authorized to grant in her Majesty's name, or to reserve the bill for the signification of the Queen's pleasure thereon. The gross revenue of United Canada, for 1849 was £219,431. Gross expenditure for the same year £240,913. The entire public debt of Canada amounts to £2,308,640, of which £2,506,367 has been expended on public works.

Religion, Education &c.—The prevailing religion in Eastern or Lower Canada is that of the Romish Church. In Western or Upper Canada, the English Church predominates. In the following Table will be found, a record, and it is believed, correct, classification and enumeration of the various religious bodies in the United provinces—

CANADA, RELIGIOUS CENSUS.—1854.

Church of England	232,180
Church of Rome	167,480
Methodists	807,465
Presbyterians	804,449
Baptists	46,353
Lutherans	15,000
Remains of other spiritual creeds	81,571
Persons of unspecified belief	85,760

Immigration to Canada.—The entries of emigrants from Europe became official only for 1831 since that time a register of them has been carefully kept. The following are the returns for recent years. There were, in

1840	91,180
1841	92,997
1842	44,874
1843	50,148
1844	52,875
1845	53,578
1846	54,766

1847	50,110
1848	57,989
1849	55,434
1850	55,593
1851	61,078
1852	59,178
1853	56,690

It has been ascertained that about half of those who thus arrived in Canada, passed on to various parts of the U. States most if not all of them mostly having merely taken the round about way to the latter for the sake of getting a cheap passage in overcrowded ships.

Price of Land.—All crown lands, with few exceptions, are sold at 8s. currency per acre. The price of cultivated land differs in the different districts varying from about £1 18s. to £10 8s. per acre including buildings. Recent in his *Canadian Gazetteer* an apparently meritorious work published at Toronto, recommends that emigrants to Canada should not purchase land till they have been sufficiently long in the country to know its value otherwise they are certain to pay at least one-third more for it than after they have been in the country for some time. No person he adds, should purchase more land than he is able to pay for immediately and above all things, he should avoid purchasing land on long credits.

History.—Canada has its name from the *Frégolus* word *kanada* signifying a collection of huts, and which the early European discoverers mistook for the name of the country. It is said to have been first discovered by Sebastian Cabot in 1497 but the first settlement made by Europeans was in 1541 at St. Croix's harbour by Jacques Cartier, a French navigator who sailed up the St. Lawrence to which he gave its present name. In 1608 a permanent settlement was made by the French upon the present site of Quebec Canada being then called *New France*. From this period till 1760 the French continued to occupy the country though much harassed by various tribes of Indians particularly the Mohawks but in the year just named an English army under General Wolfe captured Quebec and by September 8 1760 all other places within the government of Canada were surrendered in the British and the French power in that quarter of the world entirely annihilated. In 1774 by an Act of the British Parliament, a legislative council of 23 members was appointed to assist the Governor. Seventeen years after Canada was divided into two separate provinces to be called the provinces of Upper and Lower Canada and the first parliament of the former met at Niagara on September 17 1793. In 1820 also a serious chiefly of a political and financial character began to arise between the House of Assembly and the Executive Government in Lower Canada, which went on from year to year increasing in intensity and malignity deepened by the national prejudices of the French and English colonists, the former considering themselves as having interests different from those of the latter till a crisis arrived. The spirit of anarchy and discontent extended to Upper Canada, where it began to manifest itself in 1834 the causes being substantially the same with those of Lower Canada. At length matters were brought to an issue in the latter country by the arrest in 1837 of two popular leaders, who were rescued. Warrants were issued for the arrest of others the peasantry in the districts of Chambly and of Grand Brûlé rose in arms, and were defeated by the military. Similar scenes were enacted at the same time in Upper Canada where considerable insurrection prevailed against the Government. The insurrection here, however was also suppressed but not before martial law had been proclaimed. The result of these proceedings was the re-uniting of the provinces, which took place in 1840 under the name of the United Provinces of Canada, and the changing their respective designations from Upper and Lower Canada to Canada East and Canada West. The present governor 1854, is the Earl of Elgin who was appointed in 1846. Pop. of Upper Canada in 1853 by census, 658,044; Lower Canada (1848) about 770,000—(Bouquette's *Y'all's Gookery* *Scotch's Canadian Almanac* Smith's *Gazetteer of Canada West*, *Pure Papers*) [add *See Surv.*]

CANADA CREEK a river U. States, New York, the largest branch of the Mohawk river 60 m. long. It has several picturesque rapids and cascades.

CANADIAN RIVER a river U. States, the principal affluent of the Arkansas, and formed by the union of the N. and S. Canadian Forks. The N. Canadian Fork rises in

Texas, N. of Santa Fe flows S.E. enters the Indian territory where, in lat. 35° 02' N. lon. 95° 37' W. it receives the S. Canadian Fork on its N. bank. It continues to flow S.E. to lat. 34° 30' N. lon. 97° 12' W. where it bends N.E. and ultimately falls into the Arkansas in lat. 32° 37' N. lon. 95° W. after a course of about 1000 m. It is navigable for about 120 m., and its waters are muddy. The S. Canadian Fork rises also in Texas. It is formed of numerous considerable streams, which rising in several Obseques, unite their waters in lat. 31° 55' N. lon. 100° 4' W. whence the river flows N.E. and unites with the N. Fork, as already stated, while course to head of longest affluent upwards of 800 m.

CANADIAN or ROVER CREEK, one of the two passages (N and S) into which the estuary of the St. Lawrence is divided by the lake of Anticosti. It is about 30 m. in breadth and contains numerous islands on the N. or Canadian side, the principal of which are the Morgan Islands, having passages between, and places of good anchorage.

CANALE a tn. Italy Piedmont, prov. Cuneo, 7 m. N.N.W. Alba. Some mineral springs are found in the neighborhood, which afford a neutral salt much employed by the druggists of Piedmont. Pop. 5000.

CANALE a tn. Spain, prov. of and 55 m. S. by Valencia, on an elevated plain at the confluence of the rivers Callosa and Santos. It has wide straight streets, well built houses, several squares a parish church, townhouse, two schools, a prison, and cemetery. Manufactures—glass and distill. from materials found in the neighborhood linen fabrics, paper and copper vessels, and ropes, bridle-reins, &c. from the fibre of the American alio. Trade—manufactured goods, wine, oil and corn. Pop. 2170.

CANANIVA a tn. Bahamas about 12 m. S. Abouey. It is scattered o or a great area and contains a house not apart by the king for the accommodation of white men. The surrounding country is level and cultivated. Pop. 16,000.

CANANDAIGUA a vil and lake, U. States New York. The former is beautifully situated at the N. end of the lake, 280 m. N.W. New York. It is nearly built is surrounded by a rich agricultural country and contains a population of 2700. The lake is about 35 m. long and abounds with fish. Its waters are remarkably clear and its banks highly cultivated.

CANANEA, a maritime tn. Brazil, prov. Rio-Paulo, agreeably situated on an island, bay of same name lat. 25° N. lon. 48° 5' W. It has a church custom-house, and several boat-building yards. Its port admits small vessels, of which numbers come for the excellent rice grown in the district—much of which is exported to Santos. Coffee and vanilla are also grown. Pop. 3000.—The bay formerly called Terapenda, is formed between a mountainous peninsula S. and two islands N. and measures about 12 m. N. to S. by 10 m. E. to W. Its entrance, about 2 m. wide, is obstructed by sandbanks, through which there is a channel for small vessels.

CANANORE (CANARA) a seaport, tn. Hindoostan prov. Malabar presid. Madras, 44 m. E.W. Calicut lat. 11° 51' 12" N. lon. 75° 20' 45" E. (a.) It trades with Arabia, Bengal, Sumatra, and Burma whence it imports borneo piece goods, almonds, sugar silk, opium camphor and benzoin and to which it exports pepper cardamom, sandal-wood, shark fins, and noir-cordage. It is the capital of the district of Canara, an elevated and uneven tract, extending for about 2 m. inland from the fort. The territory is now subordinate to the British. Cananore is the chief military station of the British in Malabar. Above of Cannore Point, on which a fort is built, vessels anchor in 5 fathoms water.

CANARA a maritime prov. Hindoostan, presid. Madras, comprehending the countries of Tola a, Hala, and some parts of Malabar and the Hindoo Kanakas; between lat. 12° and 15° N. and lon. 74° and 76° E. bounded, N. by Rajapoor and Goa, E. by Mysore and the Malagasy coast of

India, S. by prov. Malabar and W. by the Indian Ocean; length, along the coast, N. to S., 180 m.; mean breadth, 40 m. area, 7890 sq. m. It is divided into two districts, the one W. the other S. of lat. 13° 40' N. The surface is generally rocky and uneven, the W. granite, or branches of them, traversing it throughout its whole extent. The soil on the high ground is red and gravelly and near the sea sandy. The valleys are fertile, but the labour and expense of cultivating the land are great, owing to the irregularity of its surface, which renders it necessary to level the fields previously to ploughing them. Even after the land has been levelled and brought under cultivation it is neglected for a year or two, it is broken up by numerous deep gullies, formed by the torrents which fall during the monsoon. The chief production is rice, for the cultivation of which the climate, with its heavy rains, is peculiarly favourable and the lands along the rivers, or arms of the sea, are well adapted. The finer sort of land yields two and sometimes three, annual crops of this grain the inferior one crop of rice, and another of some coarse grain. Manure is scarce, and the incessant wet, and want of good pastures, has greatly deteriorated and stunted the breed of cattle. Coconuts, betel and pepper are cultivated but not extensively. The greater part of the lands are private property and are leased by tenants who pay as rent from one-fourth to one-half of the gross produce. The proprietor seldom raises the rent, or removes the tenant. Some sugar is manufactured from the palms and mill is made on the coast. The chief exports are rice betel-nut, black pepper ginger sandal-wood turmeric, coconuts oil and raw silk imports, cloth cotton, thread, blankets, tobacco, and black cattle. The chief towns are, in the N. division Paticollah, and in the S. division, Mangalore.

Canara is inhabited by many different tribes the Jains are more numerous here than in any of the adjacent districts, and some of their ancient temples are still pretty entire. The interior is inhabited by Nairs, Bants, and Soondras who are the chief proprietors of the land the people on the sea-coast are principally Mahomedans and about a sixth part of the entire population are Brahmins. There are upwards of 50,000, Catholics in the province mostly descendants of the Portuguese, Dutch, Danish, and other colonists. This province, which had been previously ruled by Hindoo, was, in 1768, subdued by Hyder Ali Rajah of Mysore. On the death of his son, Tippoo, in 1799 it passed into the hands of the British, where it has since remained in the enjoyment of uninterrupted peace. Pop. 1,531,707,571.

CANARIES (ISLANDS OF) (ann. *Fortunatas Insulae*) a prov. Spain, comprising a group of seven large, and six smaller islands in the Atlantic, off the N.W. coast of Africa

between lat. 37° 40' and 39° 45' N.; lon. 13° 20' and 15° 13' W. The large islands are Gran Canaria or Grand Canaria, Fuerteventura or Fuerteventura Grande, Lanzarote, Palma,

Tenerife, and Hierro or Ferro, containing, collectively an area of 5400 sq. m. The smaller are Roque del Este, Roque del Oeste, Alagran, Macanudo, and Lobos. These islands are volcanic, and from their position from E. to W. their contiguity to each other and proximity to the African continent, form probably a continuation of the great mountain system of N. Africa. Alagran is the most N. Macanudo and Roque del Este the most E. and Hierro the most S. W. of the group. All are rugged and mountainous frequently presenting precipitous cliffs to the sea, though in other parts having fertile valleys and verdant slopes, and all of them cut up by deep ravines, though the height of the interior of the islands and the steepness of the declivity to the coast, prevent the formation of rivers. The principal mountains are the Peak of Tenerife 12 182 ft. above the sea level El Cumbre, in Gran Canaria 5643 ft. Handia, in Fuerteventura, 2800 ft. and Montaña Blanca, in Lanzarote 3000 ft. Besides the well-known volcano of Tenerife, there are several others, one of which broke out in Lanzarote in 1824, and still continues active. The climate is hot, but generally healthy being tempered by N. and W. breezes and by the elevation of the ground. The S. and E. winds produce various miasmas, and often bring destructive visitations of locusts. The vegetation of the Canaries is exceedingly varied, owing to their position near the tropics and their great elevation. Near the sea, palms and other tropical plants flourish; higher up, cereals of various kinds the vine &c. are cultivated above these the laurel grows and higher still, pine trees, and white broom (*Cytisus frugosa*) occupy the still more lofty slopes. There is a great scarcity of water in some seasons of the year from the absence of rivers, property so called, the numerous water courses which cut up the islands in all directions being sometimes swelled to torrents, and at others dry. The agricultural produce of these islands, in 1842 consisted of grain, 150 000 qrs. wine, 50 000 pipes brandy 2932 pipes barrels 18,000 tons potatoes, 600 000 barrels besides these articles exquisite fruits of all kinds, including oranges, lemons, dates guavas, &c. and various vegetables, are grown honey silk, cotton, arachis and cochineal are produced, and the sugar-cane flourishes well, but is not cultivated. All kinds of domestic animals abound though sheep and goats only are indigenous. The camel has also been introduced but does not thrive in the climate. The canary bird is still plentiful, though differing in colour and appearance from those now bred in England. There is no scarcity of game, and these islands are happily free from ravenous beasts and noxious reptiles. The Canaries have few manufactures silk, cotton linen, and woollen fabrics are woven, though not extensively and the inhabitants make felt and straw hats, the latter in much request amongst the English sailors. The exports are wine, brandy silk barrels, cotton honey arachis, cochineal &c. and the imports—hardware, glass, earthenware, oil soap candles, haberdashery perfumery and other manufactured goods from England France America, and other states. The chief ports of the Canaries are Santa Cruz, in Tenerife Palma, in Canaria Lanzarote and Orzova, but though there is a great depth of water between the islands, yet the group has no secure harbours, all being open roadsides and unsafe, except in the fine season. Gran Canaria has water ground for anchorage than any other and Las Palmas Bay at its N. end, affords a secure position from all winds save the E. which is seldom violent. In 1843 111 vessels ton. 14,103 entered these ports. The fisheries on the African coast occupy so many of the inhabitants, that it is reported Spain might, on emergency obtain 3000 able seamen from them, without impoverishing the trade.

The Canaries were first discovered by a Spanish vessel, driven thither by stress of weather, about 1492. The inhabitants now are chiefly of European origin, though some still claim to be of the stock of the aborigines named Guanches who from misadventure, have disappeared. They are in general well formed, athletic and brave. The Guanches believed in one God, and in a future state of rewards and punishments embalmers their dead and deposited them in an arid position in mountain caverns, somewhat resembling the catacombs of Egypt. Some of these mummies have been found in a state so decayed as to weigh very few pounds. The inhabitants are now rigid Catholics, and generally as ignorant as degraded. The three larger islands on the E.

form one bishopric, and the four W. a second, both suffragan to the Archbishop of Seville. Pop. 1843 237 713.—(Males Tariff &c.)

CANARY (Gazette) [Spanish, Gran Canaria] a Spanish isl., N Atlantic W coast, Africa, the second largest of the Canaries, near the centre of the group. lat. (N. W. point) 28° 9' 56" N. lon. 15° 42' 12" W. It is nearly round, about 40 m. in diameter and is an enormous volcanic mass, whose highest peak, El Cumbre, near the centre, is 6680 ft. high and covered with snow a great part of the year. Its coasts are fringed with breakers and unapproachable, excepting at the N. E. side near the peninsula of Ileta, which forms the Bay of Palmas, the finest anchorage in the group. Being well watered by numerous rivulets it is the most fertile of all the Canaries, and exports some wine honey salt, silk, arachis and excellent cheese. The chief town is Palmas. Pop. 88,056.

CANASTRA a mountain range, Brazil prov Minas Geraes, stretching S. E. from the S. termination of the serras Mata Gorda, which forms part of the boundary between provs Goyas and Minas Geraes. The Rio Francisco, one of the largest rivers in Brazil rises in the N. slopes of this range. CANAVARAL-in-ALAGOAS, vil. Spain. Entrepuerto, prov. of and 25 m. N. by E. Cáceres, S. slope of a continuation of the serras de Guadalupe possessing a church, townhall, prison and school. Pop. 2355.—(Males.)

CANA YERDE a tn. Brazil prov Minas-Geraes 13 m. from Tamandua, with a church inhabitants engaged in agriculture and cattle-rearing. Pop. 8000

CANCALE in France dep. Ille-et-Vilaine 8 m. E. N. E. St. Malo on the Bay of Cauxale. It is divided into two parts—Cancale, pleasantly situated on an embankment, and La Houle a suburb close to the shore where the fishermen reside. The former is well built, and has a pretty church.—The bay of Cancale affords good anchorage ground, in 5 to 6 fathoms water with a mud bottom. A reef of rocks protects it on the outside. It is celebrated for its oysters, of which some hundred millions are taken annually without producing any apparent diminution of their numbers. Most of the oysters consumed in France are obtained here, and many are exported. Pop. 2682.

CANCAO KANG KAO or KHANAN a seaport in Siam gulf of that name, at the mouth of the Canao river. lat. 10° 15' N. lon. 105° E. It was formerly a Chinese colony and had a considerable trade, a portion of which it still retains.

CANCELLARA a tn. kingdom of Italy Naples, prov. and 8 m. N. E. Potenza. It is situated in a fine valley and has an old handsome church. Pop. 6110.

CANCU N an isl. Mexican Confederation state Yucatan near the mouth of the Usumacinta. It is and which forms a very narrow channel with the mainland is in lat. 21° N. lon. 88° 47' W. It is a narrow strip of land composed of sand-hills, is about 8 m. long by 2 broad and has some small wells, which are used by fishermen.

CANDAILAR. See KANDANAR.

CANDEISH or KANDERISH an isl. prov. and British collectorate, nearly co-extensive, Hindustan, presid. Ben by in the Deccan between lat. 20° and 22° N. lon. 73° and 77° E. It is separated N. from Malwa by the Nerbudda and is bounded E. by Gundwana and Berar S. by Berar and Aurangabad, and W. by Goojrat length E. to W., 210 m.; average breadth about 80 m. The country which is nearly surrounded by mountains, and watered by the Nerbudda the Tapi, or Tapi, and other considerable streams, is extremely fertile and as its surface is studded in many places with detached hills, having rocky perpendicular sides and lateral summits, its military strength is naturally very great. The chief products are grain, indigo and cotton, by which a tenth of the whole land under cultivation was occupied extending annually on an average, the 12 years ending in 1846 to 104,549 bays, or 55,580 ac. It is understood that the production of cotton might be greatly increased. One great obstacle to its extension is the want of good roads. Candesh is one of the original Mahratta provinces and at one time contained a number of fortresses strong both by nature and art. Early in the 16th century it was governed by independent sovereigns claiming descent from the Khalif Omar and resident at Asmerghur their capital but towards the close of that century it was thoroughly subdued and annexed to the Mogul empire.

The decline may be dated from 1802 when it was ravaged by Jemurao Rao Holcar, next year it was depopulated by famine, and afterwards more slowly but more extensively reduced by the ravages of the Pindari marauders, so also by the predatory incursions of the Bhels, Pindaries and various insurgent bodies of Araks, who had established themselves in the straghts. In 1818, Candela was ceded to the British after which the Arabs were expelled and the Bhels and other predatory tribes put down. Nearly a half of the villages were at this time abandoned to the tigers, with which the province swarmed, and impenetrable jungle covered the land once covered with luxuriant harvests. Prosperity was, however, ultimately restored to Candela, under the effective administration of General Briggs, who, besides other successful measures, put a price on the head of the tigers, and that soon reduced their numbers. In four years prior to the General's arrival they had carried off 3,000, and 24,000 head of cattle. The chief towns are Bourbounpur, Assurgur, Hindu Nudobhar and Gantur. Pop. 480,000.

CANDELA a tn. Naples, prov. Capitanata 12 m. N. E. Dorne. It has four churches, and a hospital. The environs produce good fruit, and wine of fair quality. Pop. 8500.

CANDELAHIA — A rocky islet and reef, E. Pacific Solomon group lat. 6° 10' N. lon. 159° 20' E. discovered by Bougainville in 1767. — A bay, Central America, N. E. coast isthmus of Panama, W. Choco Bay at the mouth of the Atrato lat. 8° 10' N. lon. 77° W.

CANDELARIO a tn. Spain, Leon prov. of and 40 m. R. Salamanca, on a slope of the Sierra de Regar. The houses are, in general well built, the streets steep and narrow though well paved the principal square is spacious, and contains the provincial and municipal offices. There are besides two smaller squares, both mean and insignificant a chapel, two schools, a prison and cemetery, and in the most elevated part of the town the parish church a large and elegant town structure. Manufactures — linen fabrics, paper buttons for the army wine and oil trade — cattle and agricultural produce. Pop. 9089.

CANDELEDA a tn. Spain, Old Castile, prov. of and 42 m. S. W. by B. A. at the point of junction with New Castile and Estremadura at the foot of the Sierra de Guadalupe. It has badly-paved streets three squares, in the principal of which is the town hall it likewise has a parish church, prison, hospital two schools, a storehouse, cemetery and an old castle of the Counts de Miranda which has been partly demolished, and the materials used in other buildings. The inhabitants are chiefly employed in weaving making hats, and bricks, expressing oil and in husbandry. Pop. 4730.

— (Madras).

CANDIA an is. See Creta.

CANDIA a city cap. of the island of Crete or Candia, N. shore of the island about 90 m. from its W. and about 70 m. from its E. extremity lat. (Mizure) 35 21 N. lon. 25° 8' 15 E. (a). The streets are wide, regular and clean, and ornamented with trees the houses, in general well built mostly of one story in height. It is defended by high walls of Venetian construction, with deep ditches and outworks, all kept in good order and contains a number of mosques, a Greek cathedral and several churches with a R. Catholic monastery and its chapel. It is the residence of a Pasha, and of a R. C. archbishop. The harbour is now so choked up with mud, that vessels drawing more than 8 ft. water cannot enter. The chief manufacture is soap in the preparation of which much of the oil produced in the island is employed. There are also manufactures of silk and cotton, and several handloom distilleries. In 1846, the exports, consisting of honey, cheese, oil, silk, soap, wax, wool, fruits, &c., amounted in value to £46,261 and the imports of the same year amounted to £70,844. Candia was founded by the Arabs, by whom it was called *Musadim*, signifying an entrenchment. Pop. 13,000 of which 9,000 are Mohammedans.

CANIMA DI LUCILLA a tn. kingdom of Italy prov. of 10 m. S. W. Mortara, near L. bank Sesia. Pop. 1414.

CANDLESBY par. Eng. Lincoln 360 ac. Pop. 245.

CANDLER three pars. Eng. Hants. — 1 Candler (Bosney) 208 ac. Pop. 278. — 2 Candler (Oxford) 1473 ac. Pop. 127. — 3 Candler (Preston) 418 ac. Pop. 524.

CANDY a city Ceylon. See Kandy.

CANDYAN provisions. See Kandyan.

CANE, or **KEN** a river Hindostan, Bandedool, formed by two head streams, which rise on the E. limit of the Arak hills, and flowing N. unite lat. 24° 32' N. from which point it holds on its N. course, until it falls into the Jumna, lat. 25° 45' N. after a course of about 100 m. It is too rocky to be rendered navigable, but contains fine fish and beautiful pebbles.

CANE ISLANDS or **KALIS ROCKS**, two rocky isls. Mediterranean, off N. coast Tunis, N. W. Africa lat. 37° 37' N. lon. 10° 30' E. 54 m. from Cape Zibib they are dangerous, and have several rocks under water about them, but there is a good channel between them and the shore, having from 10 to 23 fathoms water.

CANEA or **KHANIA** (anc. *Ophione*) a seaport, and the principal commercial tn. of Creta or Candia, cap. prov. of same name, N. shore of is. E. side Gulf of Khamia lat. (Candia) 35° 28' 42" N. lon. 24° E. (x). The town is surrounded by strong walls and deep ditches, but both are neglected streets spacious and well paved houses high, and old looking. It has several mosques and Greek churches, and a Catholic monastery. The harbour which had become so choked up as to be nearly useless, has been recently much improved and now admits vessels of 800 tons. At the extremity of the mole by which the harbour is formed there is a lighthouse and opposite to it a small fort for the protection of the port. It is the principal mart for the commerce of the island and carries on a considerable trade with France, Trieste, Venice, &c. Its chief exports are wax, oil, silk, fruits, wool and provisions, which amounted, in 1846, to £139,500 the imports for the same year being £181,930. It is the residence of the provincial governor the seat of the provincial council, and of a Greek bishopric. It is also the residence of several European consuls. Canes is believed to stand on the site of the ancient Cydonia, of which, however, no vestige now remains. The country around is remarkable for its beauty — being covered with olives, cornfields, gardens and vineyards watered by rivulets overflowing with roses and myrtles. Pop. 8000 of which about 6000 are Mohammedans.

CANEGHEN a vil. and com. Bolam prov. W. Fian. 15 m. N. E. Lourin. A considerable linen manufacture, and a trade in all kinds of grain, butter, poultry and cattle is carried on. Pop. 2018.

CANEL a tn. W. Africa, Senegambia, kingdom Futa Toro 1 bank, Gambia lat. 15° 30' N. lon. 15° 18' W.

CANILLAS a tn. Mexican Confederation state of and 110 m. N. W. Durango S. W. slope of the Sierra Madre. Although the climate is delightful the inhabitants, who are employed in the mines, are very subject to gonorrhea.

CANILLI a tn. Italy prov. Asti 14 m. S. E. Asti near 1 bank Belbo. It contains two churches and a convent. Limestone quarries are worked in the neighbourhood. Pop. 3500.

CANETTE, three tns. Spain — 1 Canette-la-rod, a tn. Andalusia, prov. Malaga, 18 m. N. by E. Bonda, N. side of the Sierra Subura; with houses tolerably well built, two squares, a large parish church town and courtyards, a prison two well attended schools an hospital storehouse, cemetery and several fine fountains. Inhabitants mostly employed in agriculture, and as salt-makers. Pop. 3574. — 2 Canette-de-los torres, a tn. Andalusia, prov. of and 25 m. E. Cordova having a church, castle, town hall, prison and two schools. Pop. 1960. — 3 Canette a village tn. New Castile, prov. of and 20 m. E. Lucena; with ill-built houses, church chapel town hall, prison hospital college, school and storehouse. People engaged in weaving shoe-making and hosiery. Pop. 1218. — (Madras).

CANFORD par. Eng. Essex 4071 ac. Pop. 702.

CANFIELD two pars. Eng. Hants. — 1 Canfield (Great) 2472 ac. Pop. 470. — 2 Canfield (Little) 1473 ac. Pop. 314.

CANFOO a tn. W. Africa, Borden territory House, r. bank of a head stream of the Tera 40 m. E. Kano, and 300 m. S. W. Kona lat. 11° 15' N. lon. 9° E.

CANFORD MAGNA, par. Eng. Dorset 7880 ac. Pop. 988.

CANFU or **CANFOO** called **KANFO** by the Chinese, an anc. tn. and seaport China, par. Che-keang, at the head of a considerable bay, 37 m. E. W. Champo. It was originally

the port of Haugeland and is described in the 8th century by two Arabian travellers, in the port of China, where all ships were sent. It is now deserted, in consequence of the stream which runs past it having become choked with sand. The trade which it formerly possessed is now engrossed by Canton and Champo.

CANGOZIMA, or **KANGORIMA**, a tn. and seaport, Japan S. extremity of the Isl. of Kiu-tu lat. 31° 37' N lon. 120° 29' E. situated at the head of the Bay of Cangozima, which runs about 25 m. inland, with a breadth varying from 8 to 12 m. On a high rock at the mouth of the harbour there is a square built Nighthouse. The harbour is protected by a bulwark and stone rampart, at the extremity of which is a guard-house. It is considered an important station.

CANGULU, a tn. Brazil prov Rio-Pedro-do-Rio-Grande, 80 m. S. Paro on a river of same name with a church, and including its district, a pop. of about 5000.

CANIAPUSCAW, or **KOKORAK**, a river British America, Labrador, issuing from a lake of same name, running N. by W. and after receiving two considerable tributaries, falling into Ungava or St. Bay Hudson's Strait, lat. 59° N. The lake of same name, of very irregular shape, is about 60 m. long with a breadth varying from 8 m. to 85 m. Its N. end is lat. 54° 45' N lon. 67° W.

CANICATTI a tn. Sicily prov Girgenti 15 m. S W Cataneledda well built, and most of the inhabitants engaged in agriculture. Pop. 16,455.

CANILLES, a tn. Spain, Andalusia prov Granada, 4 m. S. Baen. It has badly paved streets tolerably well built houses, three squares, parish church chapel of ease, town hall, courthouse, prison, school, and conestary. Manufactures — earthenware, bricks tiles, and sulphate oil and wine. Agriculture is the main employment. 1 op 3947 — (Mallos).

CANILLAS DE ACERVO — A tn. Spain Andalusia, prov of, and 23 m. E.N.E. Malaga, picturesque situation on the N.E. slope of the Sierra Tejeda, 1800 ft. above the valley below. It is irregularly built, and possesses a parish church, townhall and convent. Pop. 2350. — **CANILLAS DE ALBARRA**, a small tn. contiguous to the above, having a church two chapels, and a conestary. Pop. 1108. — Several other small places in Spain have the same name.

CANINDE, a river Brazil prov Piaui. It rises in the Serra of Doses-Irmãos in the S.E. of the province, about lat. 5° 27' S. lon. 41° 25' W flows N.W. 120 m. and at Ouaras receives the united streams of the Riachão and Itabim on its R. bank. 50 m. N.W. Ouaras it unites with the Piaui which joins its L. bank, from which point the joint stream flows 20 m. N.W. and falls into the Paraíba, after a total course direct distance, of 200 m. Its banks are generally flat, and present excellent pastures and near Ouaras are some fine farms.

CANINO a tn. Papal States, dioc. of and 19 m. W N W Viterbo. It has some iron-works and mineral baths and the beautiful palace of Lucien Bonaparte prince of Canino.

CANISBAY, par Book Outlines 00 m. Pop. 2487.

CANISTEAT, ISLAND, same name. Bay of Bengal, Tenasserim coast, and called, respectively the Great, Little, and W. Canister. The first and second are about 10 m. apart, and the third, 35 m. S.W. from Little Canister in lat. 15° 41' 15" N lon. 97° 45' E. It is a high steep, small round island, as is also Little Canister which is further covered with trees. Great Canister is high irregular and of considerable size. — (Horsburgh.)

CANJAYAR, a tn. Spain, Andalusia, prov of and 24 m. W. Almería, on the E. boundaries of the Alpujarras, between the slopes of Gador and Nevado, with lofty houses narrow and steep streets, and an ancient church, whose lofty tower was destroyed by an earthquake in 1804. Pop. 2200.

CANN or **SEANOR-ST. HUMOLD**, par Eng Dorset 980 ac. 1 op. 512.

CANNA an Isl. Scotland, co. Inverness, one of the Hebrides, in the group forming the Sea of Small Isles, 9 m. N. Skye. It is 5 m. long, by 1 m. broad, and is remarkably fertile, producing good crops of barley and potatoes. On its pasture black cattle are reared, of which a great many are usually sent to the S. markets. It has a sheltered, commodious, and much-frequented harbour.

CANNAWAY par Irei Cork; 5225 ac. Pop. 1241 1/2 m. L.

CANNE a vil Italy, Naples, prov Bari near the Ofanto, 8 m. S.W. Barieta, occupying the site of the ancient Canes, celebrated for the famous victory gained by Hannibal over the Romans, 216 a.c. The field of battle is still distinguished by the name of *campus de canes*, 'the field of blood'. The ancient Canne was destroyed the year before the battle but afterwards re-built, and made a bishop's see, in the early times of Christianity. It seems to have been abandoned in the Middle Ages for the places on the sea-coast.

CANNEA, a seaport in France, dep Var 7 m. S.E. Grasse, on the Mediterranean lat. (5 lower) 45° 33' 45" N lon. 7° 1' E. It is picturesque situated at the bottom of a beautiful bay on the slope of a hill projecting into the sea well built has a Gothic castle and an old church. These being no proper harbour vessels anchor in a bight opposite the quay. Perfumes are manufactured here, and oil barrels made, and some trade is done in anchovies, sardines, wine olive oil oranges, citrons fruit, grain, and the other productions of the district. Napoleon landed here, March 1 1815 on his return from Elba. Pop. 3649.

CANNARELLO a vil and com. Naples, prov Calabria Litra 1 8 m. N Reggio on the strait of Messina. It was almost destroyed by an earthquake in 1783. Chief employment, fishing. Pop. including two small *villas* m. Porto and Piale 2280.

CANNETO — 1 A tn. kingdom of Italy Lombardy prov and 18 m. E Cremona, 1 bank Oglio, near its confluence with the Chiese, a very pleasant place and the scene of several engagements in the Middle Ages. Pop. 7923. — 2 A tn. Naples, prov Terra di Bari, 9 m. S. Bari. Almonds, ananas, and currants are cultivated in the vicinity. 1 op 2124.

CANNINGS-BISHOPS, a par and vil England e. Wilts 30 m. N.E. Dev ex. The village consists of one principal street, tolerably straight and kept in good order though the houses some of brick and others of stone, are but indifferently built. The church 600 years old in the Norman Gothic style, is the only building of any interest except a national school, founded in 1580. The inhabitants are mostly employed in agriculture. Pop. (1861) 4168.

CANNINGTON a vil and par Friesland Somerset, 31 m. N.W. by W Bridgewater. The village consists of one principal street, well kept; the houses, partly of stone and partly of brick are well built. An abundant supply of good water from a brook which, running past the end of the village, drives two mills. The inhabitants are chiefly employed in agriculture. The Bridgewater station of the Great Western Railway is 4 m. from the village. Area of par 5016 ac. Pop. 1548.

CANNOCK, par Eng Stafford 10 770 ac. Pop. 3081.

CANNOUCHEE a river U. States, Georgia, after a S.E. course of 140 m. falling into the great Ogeechee, of which it is the most W. and largest affluent. It is navigable 50 m. to Cedar creek.

CANSTADT a tn. Württemberg cercle, Neckar dep. built of same name surrounded by vineyards in a beautiful and fertile country on the Neckar 3 m. N.E. Stuttgart, with which it is connected by railway. Its principal buildings are the Kartmal parish church the theatre an orthopedic institution and a bridge over the river and it has an institution for cutaneous diseases and for the insane. It is the entrepot for the traffic on the Neckar — being accessible to barges of 80 tons and has manufactures of woollens, cottons, staves tobacco, vinegar &c. with some considerable dyeing establishments. In the vicinity are a number of mineral springs saline and sulphurous, with baths and pleasure grounds forming a favourite resort of the inhabitants of Stuttgart. Roman remains, consisting of vases, coins, &c. have been found in the neighbourhood. (Close by are the royal seats of Wilhelmshaus and Rothenstein. In 1796 a battle was fought near the town between the archbishops Charles, of Austria, and General Moreau. Pop. of tn 7000 almost all Protestants.)

CANOBBIO a tn. Sardinia, Piedmont W side Lake Maggiore 17 m. S.W. Bellinzona. It was once fortified, and the ruins of its castle still remain. Its very handsome church was built by Bezzanella, and contains some good pictures and fine frescoes chiefly by Gaetano Ferra. Canobbio has long been famous for its tanneries. Pop. 2000.

CANOMA, a river Brazil, prov Para, an affluent of the Madeira, which it joins on the R. bank lat. 3° 58' S., after a N.W. course of upwards of 200 m. direct distance; and, passing

ing through Lake Cimona, about 35 m. long, by 1¹/₂ m. broad. This lake has two out-lets, the Canons W and the Furo or Abacerv N.E.

CANON two pars. Eng. Harford—1 (From) 1023 as

CANONRIE var and vii Scot. Dunfermline Pop. 2163
CANONRYA RUSSE, par Eng. Canterbury 8911 as.

Pop. 618
[CANONIA *fane Canusum*] a tn. Kaplan, prov. Term-di-Bari, 13 m. S.W. Barletta, on the site of the ancient *Canus* of the ancient town. It has two churches, of which the cathedral, built in the 6th century, is highly ornamented, and contains the tomb of Bohemond, prince of Antioch. The ancient city was one of the most considerable in this part of Italy. The ruins of an amphitheatre, aqueduct columns and tombs, attest its grandeur and extent. It was the refuge of the wreck of the Roman army after the battle of Cannae, and was successively ravaged by Goths, Saracens, and Normans. Pop. 8960.

CANOUGE, a tn. Italia. See KANOUGE.

CANOUERGE (LA a tn and com. France dep. Lozère, 9 m. S.W. Mende, on the bridge near its confluence with the Lot, from this town the centre of the manufacture of serge and other woollen goods, known by the name of *Cade-de-la-Canouerge*. It also produces calicoes, and has some trade in grain and cattle. Pop. 1910

CANSO CAPE a headland British N. America, forming the N.E. point of Nova Scotia. Lat. 45° 18' N. lon. 61° W.

CANSO (GUT of) a strait British N. America, dividing Cape Breton from Nova Scotia, and forming a narrow and much-frequented passage from the Atlantic into the Gulf of St. Lawrence. It is about 1 m. in width and varying from 1 m. to 1½ m. broad lat. (N. W. entrance) E. 45° 40' N. lon. 61° 28' W.

CANIA a prov. Peru, bounded N. by Casatambo E. by Pisco S. by Huacocha, and W. by Chancay about 105 m. E. to W. by 2 m. N. to S. intersected by the Andes. The *Canayra*, the *Pamayo* and other streams, take their rise in the province which, although generally barren, has some deep canyons on the sides of which, and in other small spots, potatoes, fruits, and vegetables, are raised. Cattle are numerous, and wild goats and a peculiar species of sheep, likewise abundant. Some silver mines formerly very productive are now filled with water. The capital town of the same name lies E. the Andes 75 m. N. E. Lima. Its jurisdiction extends over 62 other towns. P. of prov. 12 160.

CANTABRIAN MOUNTAINS, Spain, forming a W. continuation of the system of the Pyrenees with which they are connected by the *sierra d'Aralar*. Commencing with the *sierra* on the frontiers of Guipuzcoa and Navarre, they stretch W. for about 140 m., scarcely deviating from the parallel of 43° N., and terminate near the *sierra de la Baza*, a little W. of Keyona lon. 4° W. In their different parts they take the name of *sierra de Salas sierra de San Salvador* and *sierra Angula*. They are imperfectly known, but the mountains of Keyona are rugged and precipitous and covered with majestic forests and from those of Santander snow never entirely disappears. The culminating point of the *sierra d'Aralar* is 7022 ft.

CANTAGALLO a tn. Brazil, prov. of, and 85 m. N. F. Rio de Janeiro, in an exhausted gold district. It has a circular market-place, in which stands the church, with two parallel streets. The greater part of the inhabitants, however live out of the town, to which they come on Sundays and feast days to assist in Divine service, and then retire. The town, likewise, has a primary school, a townhouse, with that essential appendage—a prison. The gold being nearly wrought out in the neighbourhood, the inhabitants have turned to agriculture. The products of the district are sent on mules to the port on the Rio Mineas, whence they are exported to Rio de Janeiro. Pop. of tn. 4000 of dist. 12 000.

CANFAL a dep. France bounded N. by dep. Corrèze and Puy-de-Dôme, E. by dep. Lozère and Haute Lozère, S. by Lozère and Aveyron W. by Lot and Corrèze between lat. 44° 34' and 45° 28' N. lon. 2° 5' and 3° 20' E. Area, 2245 sq. m. cap. Aurillac. This department, formerly part of Upper Auvergne, is named from its highest mountain, *Mont Collomb* of the *sierra*. It is one of the poorest and

least productive districts of France—the greater part of it being occupied by mountains, attaining an elevation of 5000 and 6000 ft. and high lands, furnishing only timber, scrub, and pasture. The mountains are of volcanic origin, and the quantity of lava emitted has been so great, as apparently to have filled up many of the original valleys, and converted them into table land. It is watered by numerous rivers, the principal of which are the Dordogne, Gère, and Lot. Climate rather severe near the mountains. Agriculture, though the chief stay of the inhabitants, is in a backward state. The principal crops are rye, buckwheat, potatoes and chestnuts—the last to a large extent—and some hemp and flax. Of husbandry and the produce is insufficient for the consumption. Cattle, sheep, horses, and oxen, are reared in large numbers and on the refuse of the *sierra* numerous pigs are fed. The horses are of good quality, and for the improvement of their breed races have been established by the Government at Aurillac. The fat cattle from this department are much esteemed and are sent to all parts of the country. Large quantities of cheese are made and sold principally in the S. of France, under the name of *Auvergne* cheeses. These are numerous. There are quarries of granite, sandstone, slate, and limestone, but the minerals as a whole are unimportant. Hot mineral springs are abundant—those of Chaudes-Aigues being the most frequented. The manufactures are trifling and consist principally of parchment, glass, leather, coarse wool lene and lincen common lace, some hardware, paper and glass. Large numbers of the inhabitants, apparently from want of winter employment, have from time immemorial emigrated annually to Spain, or to other parts of France. Aurillac is the great market for young mules. Means for education and Recompense for fat pigs &c. Horses, cattle, cheese, leather, honey, wax, wood and scrub are exported in exchange for grain, wine, oil, salt, non copper cloth &c. Cantal is divided into four arrondissements containing 21 cantons and 265 communes. Pop. (1846) 260 491.

CANTALICE, a vil and com. Naples, prov. Abruzzo 2 lix II. 5 m. N. Città Truente, on a steep rock a little W. of Monte Terminielle with four churches and two convents. Pop. 257.

CANTALUPO a tn and com. Naples prov. Salerno or Molise dist. Jerno, 15 m. W. S. W. Capua. Many of the inhabitants perished by an earthquake in 1806. It has two annual fairs and produces a good deal of wine. The French here defeated the Neapolitans in 1798. 1 op 2990

CANTELEU a tn. France, dep. Seine-Inférieure, 4 m. W. Rouen, near the bank, Seine, on a hill partly covered by the forest of Roumare, and crowned by the fine park of the old château of Cantelieu. Indianes and cotton yarn are made here, and there are some dye-works. Cantelieu cider is produced in the district. Pop. 1114.

CANTERBURY, a city co. Kent, metropolis of one of all England, and century in itself, having a separate jurisdiction, 55 m. E. by S. London, beautifully situated in a fertile vale surrounded by gentle eminences, which supply numerous streams of excellent water. The principal thoroughfares are wide, the houses well built, and the streets in general, well paved and lighted with gas. It extends about 1½ m. E. to W., and rather more N. to S. Its four suburbs at the four cardinal points. From all points Canterbury presents a picturesque appearance, its antique towers contrasting finely with the sylvan scenery around. The most remarkable object in the city is the cathedral one of the finest ecclesiastical structures in England. The original building of which no part now remains, was of great antiquity the distinction having been claimed for it of being the first Christian church in the kingdom. The present edifice, 614 ft. in length, E. to W. and 71 in greatest breadth, has been built in different ages (the oldest part dating 1184) and presents, in consequence, various styles of architecture, but retains altogether an imposing appearance, the most tower, 235 ft. in height, being one of the most beautiful specimens of the pointed style of architecture one of the towers at the W. end has been recently built of Caen stone, of which material nearly the whole of the edifice is constructed. The cathedral derives additional interest from having been the scene of the murder of the celebrated Thomas à Becket who was slain at the foot of one of its towers, in 1171; and whose shrine was the object of an annual pilgrimage, celebrated by Chaucer and admirably

Illustrated in modern times by St. Augustine's monastery in hygienic times a rival in grandeur to the cathedral has been lately converted into a church missionary college. The N gate is particularly handsome, and is a fine specimen

LANTHIERGATE CATHEDRAL, WEST POINT.

of the decorated style of architecture. St. Margaret's church has been lately restored in excellent taste, and the church dedicated to St. Martin, which stands on a hill at some distance from the city and is believed to be one of the oldest existing Christian churches, has also been lately restored. There are, besides, numerous chapels and places of worship for various religious sects, including a Jews synagogue. Other public buildings are—the guildhall, an imposing Ionic structure, the corn-exchange, fish-market, and a theatre. In addition to the royal grammar-school founded by Henry VIII. there are numerous private schools, a mechanics' institution, museum and library, an hospital dispensary and numerous other charitable institutions. Canterbury was formerly noted for its silk manufactures, now supplanted by a superior kind of damask linen, for which it has become celebrated. Its other manufactures are—worsted vellum and parchment it is also famous for its brown. There are several extensive breweries and malting establishments in the town and the principal articles of trade are wool, corn and hops, in the cultivation of the last of which the greater portion of the labouring class are employed. Canterbury has returned two members to the House of Commons since the 28th of Edward I. registered electors (1850) 1940. It is governed by a mayor, six aldermen, and 16 councillors. The South-eastern Railway has a station here. Lord Tenterden the well known Chief Justice of England and several other distinguished individuals, were natives of Canterbury. Pop. (1841) 15,485 (1851) 18,398. (Local Correspondent).

CANTERBURY.—1. A vil. New S. Wales, co. Cumberland, 8 m from Sydney on Cook's River. Here is the establishment of the Australasian Sugar Company. Pop. 218.—2. A settlement, New Zealand, middle n. E. coast, Port Cooper district, Bank's Peninsula. This settlement was organized by a committee of Episcopalians, and is calculated to comprise an area of 2,400,000 ac., of which 636,000 acres are woodland, hill, and mountain, the remainder being fertile level ground, yielding abundant crops of grain, potatoes, fruits and vegetables. (Full. See Survey.)

CANTIANO is in Italy prov. and 84 m. S.W. Pesaro, on a small stream of its own name. It is fortified and defended by a castle and is said to be built on the ruins of an episcopal city called Lococelo. Pop. 2500.

CANTILLANA is in Spain Andaluzia, prov. of, and 17 m. N.E. by N. Sevilla, r. bank, Guadalquivir on an excellent commanding the surrounding plain. It has tolerably

well-made streets, a large square, parish church, chapel of ease, townhouse, small prison, seven schools, an hospital and cemetery. Earthquakes, soap, brandy oil and wine, are made, and some trade done in fruit, grain, cattle, &c. P. 4285.

CANTLEY two pars. Eng.—1. Norfolk; 1650 ac. 10 p. 277.—2. W. Riding York 5100 ac. Pop. 732.

CANTON (Chine, *Kuangghow*, few—broad city) a large city China, the fourth as regards population in the empire, and the second probably as regards wealth prov. Kwangchow, of which Canton is a corruption. It back, Choo Kiang, or Pearl River lat. 23° 14' N. lon. 113° 14' 30" E. is about 4 m. above the mouth of the Boon Tigris or the Boque. It stretches, for about 4 m. along the low banks of the Chan Kiang which is here about the breadth of the Thames at London Bridge at the foot of and partly ascending a range of hills, called the White Cloud Hills from which its general appearance is by no means inviting, presenting merely an expanse of red-tiled roofs, relieved only by a few large trees, some high red poles used as flag-staves and two or three pagodas. The approach to it, however by the river is striking and unimpressive. From Whampoa to Canton the banks are enlivened by villages and pagodas, the stream becomes more and more crowded with boats and vessels, and the noise and bustle attendant upon an intricate navigation gradually increases until the visitor finds himself in the midst of impenetrable war-junks and merchant proas, with thousands of fancifully painted and gay streamers floating in the breeze. Everything in short, indicates an approach to a great trading city and produces a degree of excitement and interest from its novelty of which few other scenes are capable.

The city proper or that part of Canton which is surrounded by a wall is built nearly in the form of a square and is divided by a wall running from E. to W. into two unequal parts. The northern part, which is much the larger is called the Old City the southern is called the New. The portion of Canton enclosed by walls is about 6 m. in circumference and the entire city including the suburbs or the portion of it without the walls is about 10 m. The walls themselves are composed partly of stone, and partly of bricks the former is chiefly coarse sandstone, and forms the foundation and the lower part of the walls, and the arches of the gates the latter are small and of a soft texture. The walls are from 25 to 40 ft. high and from 20 to 2.5 ft. thick having an esplanade on the inside, and a line of battlements, with embrasures, at intervals of a few feet, on the top, all around the city. The gates are 10 m. number 12 quiet and 4 lower one of the former is 12 ft. high and 15 wide. They are all shut at night, and strictly guarded both night and day. The streets of Canton are very numerous, being estimated at upwards of 600 although many of them are mere alleys or lanes. Some of the principal have such names as Golden Street Golden Flower Street Dragon Street, Martial Dragon Street, New Green Pass Street &c. They are generally short, slightly curved, and varying in width from 8 to 16 ft. the average breadth, however not exceeding 8 ft. Some, again are so narrow that a man may stand and with his arms extended touch the houses on either side while others with angles of almost every name, formed by the blind corners of buildings, oppose the progress of the wanderer and perplex him with their multiplicity. Nor are there any public squares or open areas containing fountains and shrubbery as in Europe to compensate the oppressive density and straitness which everywhere prevails. The streets however are, upon the whole very well kept, and are tolerably clean. The houses are generally small and low seldom exceeding one story in height. The dwellings of the poorest class who live in the extreme parts of the suburbs, along the banks of the river and its creeks are mere mud hovels, having but one single apartment, low dark, and dirty these along the water are all built upon piles driven into the ground. The houses of the better classes are rather more spacious, and more cleanly and are built of brick. They stand alone upon the street, and have usually but a single entrance, which is closed by a bamboo screen suspended from the top of the opening the windows are small, and rarely supplied with glass, in the place of which, paper, mica, and the interior laminae of oyster-shells are used. In this description of dwellings there are generally three apartments, one of which is used as a common sitting-room. The houses of persons of wealth and consequence, again, are large and

conditions, and are surrounded by a wall 12 or 14 ft. high which fronts the street, and completely screens the buildings within. The interior is decorated with carved work, varnished and gilded, and hung with scrolls covered with writing, or representations of landscapes, flowers, birds, &c. In the basement parts of the roof the roofs of the houses are covered with a loose frame work on which firewood is dried, clothes washed and dried and meals cooked. It also affords a lounging and sleeping place in summer, but in case of fire, which is of frequent occurrence, these lumbered roofs tend to increase the calamity. Chinese wood and mason work is showy and unsubstantial requiring constant repairs, and therefore, both gardens and houses when neglected, soon fall into a ruinous condition but when new they present a pretty appearance. A house of six apartments, and capable of accommodating 10 or 12 persons, rents about \$20 per annum. Houses are let on short leases, and the rent collected quarterly in advance. The shops in Canton are in many instances, equal to those in some European cities, considering the differences of climate. They are commodious, well stocked with goods, and are associated together very much according to their respective trades. Neat and gaudily painted signs and names give a gay appearance to the narrow streets. In most cases there are no windows in front, but the whole is thrown open by day and closed at night. At the end of the counter which is of granite, there is a niche, containing a tablet inscribed to Fivism or Manism where women are burned every day to invoke a profitable business. In the busy parts of Canton every house is a shop but there are two streets, China Street, and New China

streets in the suburbs; they contain an immense number of made dials, and are decorated with enormous fat pigs, varnished over and painted from different parts of the shop, together with varnished ducks and geese. The yearly rent of the best shops is from \$20 to \$40.

Public buildings, consisting of pavilions, halls and religious edifices, are numerous, but specimens of architecture, unworthy of special notice, although some of them are not altogether destitute of elegance. There are, also, a vast number of temples—dens of infamy and vice in which the priests and nuns are said to amount to 8000. The pagodas elsewhere situated to, and of which there are but two are conspicuous objects; one, called the *Yungy* pagoda, or *Plain* Pagoda, is about 10 centuries old; it shoots up in an angular tapering tower to the height of 160 ft.; the other is an octagonal pagoda of nine stories, 170 ft. high and 18 centuries old. There are several prisons in the city one of which is capable of holding 1000 prisoners. There is also a lunatic hospital, the children in which, when grown up, are sold and not infrequently for the worst conceivable purposes; but the charitable institutions are few in number and miserably kept. The foreign factories, or hongs, as they are called by the Chinese, in the W suburbs are the most showy in point of architectural display of any buildings in Canton. Their river frontage is between 700 and 800 ft. in length. They are built of brick stacked, with granite foundations some of them are three stories high, but most of them only two. The rents paid for these factories vary from \$240 to \$2600 per annum for each establishment. The space occupied by the

factories is crossed by a narrow alley called *Hog Lane*, unwatched in Europe for filth and the depravity of its inhabitants, who decoy sailors drag them and then rob and ill use them. The atrocious of this pandemonium have been a cause of disagreement between the British and Chinese governments.

The trades and manufactures at Canton are all more or less, connected with the foreign commerce. Many of the silk fabrics exported are woven at *Puhsan* or *Fatshan* a large town about 10 m W from the city. Fire-crackers paper mat zalls, cotton cloth and other articles, are also made there for exportation. The number of persons engaged in weaving cloth in Canton is about 50 000 including the embroiderers about 7000 barbers, and 4300 shoemakers. The barbers are a favoured class, there being strict regulations for their protection. Those who work in stone, brass, and iron, are numerous, and each trade or calling is united into guilds for mutual protection and support. The printing and book trade, also, is very considerable.

Canton is one of the five ports of China, at which according to the treaty with the Chinese, of August 29 1842 British subjects are permitted to trade. By far the largest article of export is tea. The other chief exports consist of silver silks and cloths. The imports consist of woollen goods, cotton, cotton yarn, long cloths, and various other articles of British manufacture. A contraband trade in opium is still in being, carried on in the Canton river.

NEW CHINA STREET, CANTON.—From Yachow, Yoyang street 4 Muzes

Street, which are especially the resort of foreigners, and where the productions of almost every part of the globe are to be found. This part of the city being much frequented by Europeans, every article is sold by the Chinese retailers to attract their attention. Each of them having an English name for himself—printed on the outside of his shop, besides a number of advertisements composed for them by the sailors in their own peculiar idiom. Amongst numerous attractive announcements of this kind, the following occurs in China Street. It is written in letters of gold on a lacquered board, which hangs in front of the shop—The *Sailor's Coffee Shop*, *Chun Ling*, No. 10 New China Street, where all kinds of wines and teas are sold, and goods of every description for sale. Follow you are invited to try this shop, where you will find honest dealing, and where you can have ready-made tobacco and tea, but no swindlers. * Eating shops are very

Literally there find a current spirit trade from rice. Companies liquor is not distilled, but when wanted for foreign visitors, who like it very it is twice distilled, and contains oil, camellia, and other ingredients are added.

Canton has, besides, a flourishing marine trade to Tientsin and Shanghai. All its manufactures, its abundance of sugar, its economical stores of cotton, indigo, wax, muscadine, and a variety of smaller articles, all hundreds of junks bound for the N. and its annual exports are not below 5,000,000 dollars (\$1,718,668). In return for these articles the junks bring back considerable sums of bullion, drugs from Szechuan and Leotung, felt, fruits such as dates, pears, and grapes, and merriment. This is one of the most profitable branches of commerce which the city possesses. The anchorage ground for foreign shipping is at Whampoa, about 10 m. below the city beyond which no large vessel can proceed. It is in lat. 22° 50' N. and is formed on the S. side by two high islands called by Europeans, Dames and French Islands. The harbour is safe with a moderate tide, and from 5 to 6 fathoms water with soft mud bottom, but there is scarcely room for two large ships to moor abreast, which occasions the lower part of the shipping to be moored opposite the entrance of Junk River when there are many arrivals.

Canton has also an extensive inland trade. It obtains from the provinces of which it is the capital, Quangoong silks, rice, fish, salt, fruits, vegetables, and various kinds of fancy wood, silver, iron, pearls, beads, and beads. From Foochee, black tea, camphor, sugar, indigo, tobacco, paper, lacquered ware, grass-cloth, minerals, woolen and cotton cloths of various kinds. From Cheong silks, paper fans, wines, dates, golden-flowered hams, and a most expensive tea, called *long-ting-tse*. From Ganhuyn and Kiang-soo, green tea, and silks, which obtain excellent prices. From Chieh, dates, ginseng, various skins, wine, venison, drugs and tobacco returned in cloths, cloaks, watches, and other articles of foreign import. From Shensi, skins, wine, ardent spirits and musk. From Shensi, brass, iron, precious stones and drugs returning cotton and woolen cloths, books, and wines the trade with this province is very extensive. From Kansu, gold, quicksilver, musk, and tobacco. From Szechuan, gold, iron, tin, musk, and a great quantity of drugs. Yunnan supplies the shops of Canton with iron, brass, peacock's feathers and receives cotton and woolen cloths, books, and tobacco. Similar commodities to those above enumerated are sent from various other provinces in great quantities, and similar returns to those named made from Canton. A considerable portion of this merchandise, as well as various, are conveyed into the city by canals, of which there are several.

The scenes which the streets of Canton present, are to a stranger exceedingly amusing and interesting. There are no wheel-carriages in use, but their absence is amply compensated by the nimble sedan-bearers, one class of which are called by the Chinese, *horses* without tails. These are the bearers of men of wealth, who generally appear abroad in sedan-chairs, taking up nearly the whole breadth of the narrow street, to the great annoyance of the foot passengers, whom they constantly jostle. Recovered from such a shock, a coolie or porter bearing a burden, knocks him against the wall, with a sort of grunt while he is skuffled in an opposite direction by a second. Peculiarly curious to English eyes are the number and variety of live stock which are exposed for sale in these narrow streets—puppy dogs, roping in lambs, bee cages, kittens, merriment, rats, squeaking fowls clucking ducks, quacking geese, cackling and pigs grunting. Fish swimming and earth-worms, slugs, &c. variously disposed, are exhibited in tubs and earthen pans. A barber close by tramps his iron tweezers to call his customers near him, another operates upon a patient customer seated on a tripod stand—plucking his tail, cleaning his ears, shaving his head and face, extracting all long and superfluous hair from his eyebrows, eyelashes, and nose, and finishing off by a good clumping of his back, and uncorking his joints. Hard by is a itinerant vendor of cooked food, with an enormous reed umbrella, dispensing rice, fish, pork, and stews swimming in oil and soy, which he serves out in small bowls and basins to

his hungry customers, who devour the mess with an epicure's gusto. Beside this merchant is seated a brother itinerant, the vendor of sweatbands. A little further on stands a bookseller exposing his library the contents of two boxes, which he hawks about. In his vicinity is a fortune-teller in the act of unfolding the future to an anxious dupe, and a doctor decorously seated with a string of human teeth around his neck, extending below his waist, while his box of drugs hangs before him. Then an aged woman may be seen with feet three inches long, seated under an umbrella, mending old clothes, while a passer-by wadding a button sewed on, repairs to her, and remunerates her with a cash. Not far distant a leprosy beggar exhibits his disgusting sores, and rattles two pieces of bamboo to attract attention. Suppose the air filled with the notes, cries, and vociferations of those various vendors and of the constantly-changing throng of human beings and some slight conception may be formed of Canton on approaching to Hag Lane.

But the river presents scenes perhaps still more curious and interesting to the stranger than the streets. The prodigious number of boats, amounting at one time to 84,000, with which the surface is crowded is the first thing that

strikes the eye. A large number of these—as many it is said, as 40,000, containing a population of 200,000—are fixed residences, and most of them moored stem and stern in rows.

The inhabitants are called *tanke* or boat people, and form a class in some respects beneath the other portions of the community and have many customs peculiar to themselves.

Millions are born, and live and die in these floating dwellings, without ever having put foot on dry land, while their ancestors before them for many generations were all amphibious like themselves. The dwelling or family-boats are of various sizes, the better sort being from 60 to 80 ft. long and about 15 ft. wide. A superstructure of considerable height, and covered with an arched roof occupies nearly the whole of the interior of the boat. This structure is divided within into several apartments, appropriated to different domestic purposes, all of which are kept much more clean than those in the houses of corresponding classes on shore. This kind of boat is furnished with stern-sails, that move upon a pivot, and easily propel the boat among a crowd. The smaller boats of this description are not above 25 ft. long, and contain only one room, covered with movable mats. But by far the handsomest of the boats on the Canton river are the *hwa tang* or flower-boats. The form of these is very graceful, and their

FLOWER BOAT.—From Drawing by Mr. Shaw, U.S.

raised cabins and awnings fancifully carved and painted. As they are let to parties of pleasure for excursions on the river considerable expense is bestowed upon beautifying and furnishing them.

The people of Canton have some personal peculiarities amongst them most striking of which is a great variety of complexion, the general fairness of face, and unfavourable features, and especially the strange formation of the eye, with the lid in many cases so small as to appear unsuited to its natural functions. With exception of the conjugal, the heads of the men are shaved, while in that region if its luxuriance will admit, it is permitted to grow until it reaches the heels. The girls wear the long plait, according to the fashion of the men but do not shave the other parts of the head. After marriage, the hair is braided and decked with a profusion of flowers and jewels answering to the rank or means of the possessor. The ordinary style of dress differs but little in both sexes. It consists of loose pantaloons, and an overgarment or robe with long dangling sleeves and which varies in length from the knees to the ground. Their girdles frequently answer the purpose of purse. The stockings have no reference to the shape or size of the limb, and the shoe has a thick clumsy sole turning up in front, and destitute of elasticity to aid the step. Heggars, most of whom in Canton are blind, are a numerous and privileged class, and a source of great annoyance to passengers. The people of Canton have acquired an infamous celebrity for profligacy and corruption and are usually considered about the worst specimen of the nation that can be presented, and this the more intelligent amongst themselves readily allow although claiming at the same time for the higher classes more enterprise, more on larger views, and more general information, than is to be found amongst smaller classes in most of the other large cities of China. A retiring theory thus wound up a detail of his experiences in the government of Canton:—Deceit and falsehood prevail everywhere in this city—in all ranks, and in all places. There is no truth in man, nor honesty in woman! I have endeavoured in vain to correct these evils—it has been labour lost. I am sick at heart, and wish to depart from such scenes of vice and habitual falsehood. A chief criminal judge of the city corroborates the testimony of the Viceroy. In an official proclamation by him, prohibiting the putting away of wives for slight causes, he says, 'For vile practices of this and every kind, there is no place so bad as Canton. Canton has long been the sewer of the worst of all the most turbulent and worst portion of the Chinese; and it is

said that there is an organized band of 25,000 robbers in and around the city. The police of Canton is well regulated, but is rendered worse than inefficient by the national falling—the venality and rapacity of its officers, who share with the thieves in the proceeds of their robberies, and liberate offenders whom they have seized, for a bribe. They are said, also, to be in the habit of arresting rich individuals under false accusations, and confining them in private houses, where they subject them to every kind of ill treatment, to induce them to pay for their liberation. Gambling is one of the prevailing vices, and its consequences an extraordinary amount of suicide, a large portion of which is perpetrated by women. Education is in so low a state, that it is believed that not more than one-half of the male adult population of Canton can read. The education of girls is wholly and systematically neglected, there being scarcely a school for females in the city public opinion and immemorial usage being against the educating of girls.

The prices of the principal kinds of provisions in Canton depend very much on the seasons, but nearly as much on the amount of the extortions of the local officers, they are however in general high. As an article of food, puppies and kittens are highly esteemed those intended for the table being fed on rice. Eggs, mutton, and snails are also among the delicacies, but are scarce in the market. As the articles exposed for sale in the streets are chiefly adapted to the necessities of the day, the extremes to which the principle of accommodation is carried are remarkable. Poultry and fish are dissected into very minute portions. A quart of a fowl the head and neck, and frequently the entrails alone are all to which the means of the buyer extend. Vegetables are exposed to sale in the streets in the greatest profusion.

The coins in common use are taels, mace, and candarons, and each equivalent in English money respectively to five shillings, sixpence, one penny and the seventh of a farthing. The weights or measures are piculs and catties, the picul is equal to 135 lbs., and 1 lb. avoirdupois is equal to three-fifths of a catty.

The climate of Canton is, upon the whole salubrious. Foreigners residing there generally enjoy good health if they abstain from ardent spirits, and avoid exposure to the sun. The heat, however in summer is sometimes very great, the thermometer occasionally reaching from 90° to 100° Fahr in the shade, but the average of the whole year is 72°. In July and August the average is from 80° to 85° and in January and February from 35° to 60°. A fall of snow occurred in Canton in February 1832, to the astonishment and no small alarm of the inhabitants who hardly knew what name to give it. Ice, however sometimes flows in shallow vessels a line or two in thickness. Woollen clothes are worn and fire are comfortable, during January and February, but the Chinese do not warm their houses.

Canton is the oldest city in the E. of China, and since the foundation has undergone many changes. The Chinese historians say they are able to trace their city for 3000 years, when it was called Nin Wooding, the martial city of the South and was surrounded by a stockade made of bamboo and mud. One of its earliest names, and which is still used in its books was Yang-Ching, the city of rears. In May 1840 Canton was taken by the British, and ransomed by the Chinese for \$6,000,000. It has been frequently devastated by fire, there being no other city where conflagrations have been more extensive, more destructive and more frequent than in Canton and it is said that they have not always been accidental. Amongst the latest of these disasters was one which occurred in October 1843, when 1000 Chinese buildings, and several foreign houses or factories, were destroyed; and another in December 1844, when a large theatre was consumed, and 2800 persons, men, women, and children, perished. But the most destructive fire of recent times in Canton, occurred in 1822 when between 13,000 and 14,000 houses, with nearly all the European factories, were destroyed and many lives lost. Another alarming conflagration took place in November 1836, which threatened the destruction of the entire city but was fortunately arrested by the walls, but not before an enormous loss of property had been sustained. The fire on this occasion appeared to be about 1 m. in breadth, and was in the most populous part of the city. Pop. supposed to be considerably above 1,000,000.—(Middle

CAPE BRETON a large island British N. America, between lat. 46° 30' and 47° 30' N. and lon 59° 47' and 61° 25' W. extreme length N. to S. 100 m. extreme breadth 85 m. area, extensive of the great inland gully about 3100 sq. m. It is separated on the S. from Nova Scotia by the *Gulf of Canso*, and along with Newfoundland from which it is about 60 m. distant, forms the E. entrance to the *Gulf of St. Lawrence*. It is of an irregular triangular shape, and, along the W. coast, is of dangerous access, possessing no harbour but that of *Port Hood*, near the *Gulf of Canso* and being lined throughout with precipitous iron-based cliffs. Its other shores though ragged are indented with numerous bays and bays. An inlet, called *Bay d'Or*, which is entered by two narrow passages, opens into an immense bay and arms, and, almost intersecting the island from

N. E. to S. W., forms two great natural divisions, both ragged, but not properly mountainous, the highest point in the former not exceeding 1800 ft. and that of the latter scarcely reaching 700 ft. The geology of the island is imperfectly known. Its short distance from Nova Scotia has led some to imagine that it was at one time united to the continent, and has been disengaged by some violent convulsion; but this conjecture is not supported by any striking evidence in the structure of the opposite coasts. Primitive rocks, particularly granite, prevail to the S. E. of *Bras d'Or* and are also supposed to form the nucleus of the highlands towards the N. W. but throughout the whole island the carboniferous formation appears and contains extensive fields of excellent coal. Iron-ore also, abundant and specimens have been obtained indicating the existence of copper lead, and other valuable minerals. Higher in the series vast beds of gypsium are found. Salt springs exist on the coast. There is no navigable river but the fresh water lakes are both numerous and of considerable extent. The largest *Lake Marguerite*, in the N. is about 40 m. in circuit. The climate is changeable, but not so rigorous as on the continent. Originally the whole island was one great forest, but considerable tracts have been cleared. About 50 000 ac. are under culture, and produce the ordinary cereals, and pulses, malts, potatoes, and turneps. The quantity of corn raised is not equal to the home consumption. *Lace* Breton derives his chief importance from the working of its coal mines, and the fisheries carried on in the adjoining seas. Its exports, consisting principally of timber fish and coal amounted in value, in 1844, to £70 872 imports, £24,323 The ships in the same year were—entered 335 (37,574 tons) and cleared, 331 (40,263 tons) The shipping belonging to the island was 19 053 tons. *Cape Breton*, which is admitted festively attached to the province of Nova Scotia, is divided into three counties and sends two members to the House of Assembly. It is visited by the packets from England, and its internal communications have recently been improved by the establishment of a steamer which plies regularly on the *Bras d'Or*. The island was first colonised by the French in 1713 and taken by the British in 1758 Pop. about 55,000

CAPE CLEAR, a high promontory S. extremity of *Clear Island* forming the most S. point of Ireland about 73 m. S. E. Baltimore or *Cork*. Its great height 400 ft. above the sea, and prominent position have rendered it a familiar landmark to mariners. Adjoining the Cape is a lighthouse which exhibits a bright revolving light of 31 lamps seven becoming visible every two minutes. The lantern is elevated 4.5 ft. above the sea, and may be seen in clear weather from a distance of upwards of 30 m. It is situated in lat. 51° 26' N. lon 9° 29' W. (a)——“THE MARCH of *Clear* is about 2½ m. long by about 1 m. broad. It is wild and romantic, steep and inaccessible cliffs rising up in all directions from the sea, while the greater part of the surface is merely rough, rocky pasture. The inhabitants are in a primitive state. The women manufacture a coarse kind of frieze for clothing the men who have the reputation of being expert and resolute seamen, are wholly employed in fishing Pop. of Isl (1841) 1002

CAL E COAST CASTLE, a n. and fort, *Fort Coast*, Africa, *Gulf of Guinea*, cap of the French possession on the *Gold Coast*. lat. (light on fort) 5° 24' N. lon 1° 13' 38' W. (s.) The fortress, which is large, and well built, stands on a rock close to the sea, and projects, in bold relief, from the surrounding dark, green forests. With exception of a few houses for Europeans, the town consists of straggling huts of mud built, with clusters of palm-trees, and an occasional scattered azobee. It is a principal mart for native butter; and some individuals who have been educated at the Government school in the fort, now import, on their own credit goods to the amount of £20 000 and £30 000 annually. A judicial assessor appointed by Her Majesty holds open court in the town three days a week, for native cases. Great good has resulted from the establishment of this court by inspiring confidence in British protection and the fear of justice. Climate unhealthy mean temperature 78° The principal exports are gold-dust, ivory and palm-oil Pop. estimated at 10 000. See *Grand Coast*.

CAPE HATTIEN See *Grand Coast*.
CAPE HATTIEN See *Grand Coast*.
called by the Spaniards *Guaymas*, and afterwards by the French *Cape François* named also *Cape Henry* and *Fort*

Point, nearly 90 m. N. Port-au-Prince or Port Republicain; lat. 19° 45' 42" N. lon. 72° 11' 45" W. (a). It is much on the N. side of the bay and is covered by lofty hills, and, under French domination, was considered one of the handsomest and most flourishing cities in the W. Indies. Half of it is in ruins, the effect of the Revolutionary wars. This gives it a melancholy aspect, but it still may be described as a handsome town, regularly built. The streets are wide and well paved, and the houses principally of stone; several of the squares and markets are spacious and handsome, and adorned with fountains yielding an abundant supply of good water. The cathedral, which has been rebuilt by public subscription, is an elegant structure. The military hospital, a noble edifice with large well-ventilated apartments, has also been restored and other improvements have been made. The outer part of many of the houses is occupied as stores, warehouses, and stables, the upper part only being used for residence. The entrance to the harbour is difficult, but the anchorage is safe. Cape Haytien as well as Port-au-Prince, was occasionally the seat of government, and it contained so under Christophe and Toussaint. The trade, chiefly carried on with the U. States, is still very considerable. Pop. in 1789 18,500 does not exceed 9000.

CAPE HOEN or HOEN usually considered the S. extremity of S. America, does not really belong to that continent, but is the most S. point of Heron's Island one of the Tierra del Fuego group. lat. 55° 59' S. lon. 67° 16' W. (a). This promontory is a lofty dark precipitous headland from 500 to 800 ft. high running far into the sea. When Sir J. C. Ross passed it, in September 1842, there was some snow on its summit, and the sides were clothed with a brownish coloured vegetation. The strong gales from the W. render the climbing of the Cape from the E. a matter of some danger and difficulty. But the improvements in modern navigation have greatly diminished both. Gales from the W. blow during the summer nearly without interruption but only near the Cape a few degrees farther S. they are more variable. During the winter E. winds are more frequent but the navigation is then rendered dangerous by the icebergs which approach the Cape, and are found even farther N. The Cape was first described in 1616 by the navigator Schouten, a native of Hoon, in Holland, who named it after the town in which he was born, the word having been since altered to Hoen.

CAPE MOUNT W. Africa. See MOUNT CAPE. CAPE OF GOOD HOPE [Portuguese, *Cabo de Boa Esperança* Dutch, *Kaap de Goede Hoop*] or CAPE PEAK, a celebrated promontory S. Africa, at the S. extremity of the Table Mountain having Table Bay on the E. and the Atlantic on the W., 31 m. S. Cape Town lat. 34° 3' S. lon. 18° 29' E. (a) and forming a bold promontory rising nearly 1000 ft. above the sea. This cape, celebrated in the annals of navigation, was discovered, in the year 1486, by the Portuguese navigator Bartholomew Diaz, who, not being able to double it, and having encountered much bad weather in its neighbourhood, gave it the name of *Cabo do Tormentoso* or Cape of Tempests. John IL. King of Portugal, considering this point as the goal of that gradual circumnavigation of the African continent, which had long engaged the attention of the Portuguese, gave it instead, the title of *Cabo de Boa Esperança*. Shortly after Feb. 30 1497 Vasco da Gama succeeded in doubling the Cape, and was the first European who by this route reached the Indian Ocean.

CAPE OF GOOD HOPE, or CAPE COLONY an extensive territory belonging to Great Britain, forming the S. extremity of Africa, between lat. 33° 15' and 34° 50' S. lon. 18° 30' and 27° 30' E. On the W. it is bounded by the Atlantic, and S. and E. by the Indian Ocean. Its boundaries, however have varied much at different periods, and could scarcely be said to be defined till 1847 when, by a proclamation of the Governor Sir H. Smith, they were declared to be on the N. the Orange or Orange River N.E. a branch of the main river called the Gariep and E. the rivers Kru, Khas Guita, Zwart Kal, and Plets, the Matberg mountains, the rivers Tsume and Kouskamma greatest length, W. to E. 520 m. greatest breadth, N. to S. 430 m. area, about 170,000 sq. m. Cape Colony consists of a W. and an E. province and, for administrative purposes, has been formed into divisions. Those have of course, increased with

the acquisition of territory which the colony has made at different times. Their number previously to 1847, had already been increased to 15, by the two new divisions of Victoria and Albert, chiefly situated along the E. frontier and formed out of a tract generally known by the name of the Ceded Territory. In addition to this, there is a large unappropriated tract lying between the former N. boundary of the colony and its new boundary of Orange River. It has never been properly explored, but is supposed to have an extent of nearly 50,000 sq. m. According to the report of the Surveyor-General, it is, for the most part as barren a desert as it is to be found on the earth's surface. From this sweeping assertion may probably be excepted the country in the immediate vicinity of the Gariep or Orange River which is said to occupy a climate more equable than some portions of the colony further S., to be tolerably fertile, and to depasture large herds of cattle.

Physical Features.—The coast line of the colony has an extent of about 1200 m. The N. W. portion, lying considerably out of the tract which is usually navigated, is imperfectly known, but is understood to consist of sandy plains, generally covered with scrubby plants. To the S. W. and S. E. the character and though seldom forming what may be called a bold and rocky coast, presents an almost uninterrupted series of headlands and indentations. The former occasionally stretch out into lofty promontories, the principal of which are the celebrated Cape of Good Hope, forming the extremity of the isolated mountain mass, of which Table Mountain is the culminating point, and Cape Agulhas, the most S. point of Africa. The latter are often scooped out into spacious bays, which have ample depth of water but lying exposed to some direction or others are very imperfectly protected. The chief of these bays are, on the W., St. Helen's Bay, Saldanha Bay and Table Bay, and on the E. False Bay with its important arm called Simon's Bay, St. Sebastian Bay, Mossel Bay, the Cangoes, and Algoa Bay. Among these, complete shelter is afforded only by Saldanha Bay which possesses all the essentials of an excellent harbour and Simon's Bay which has been selected for the arsenal and chief naval station of the colony. The interior of the country may be described as consisting generally of a succession of plateaus and mountain ranges, which rise above each other and increase in elevation as they recede from the coast, each range forming the boundary of a lower and the abutment of the next higher plateau and again lowering down considerably towards the Gariep or Orange River. Beginning in the W. the first mountain range is the Bokkeveld, which lies about 40 m. inland, and stretches from N. to S. in a direction nearly parallel with the W. coast, till it reaches the neighbourhood of the town of Worcester lat. 33° 40' S. Almost parallel to this range, but about 100 m. farther inland is the Roggeveld. Between these ranges lies an extensive elevated plateau which, according to its proximity to either range, takes the name of the Bokkeveld or of the Roggeveld Karroo. In like manner several mountain ranges run parallel with the S. coast. The first and lowest stretches from W. to E. without interruption, for about 200 m. leaving a belt along the coast which seldom exceeds 30 m. This range of hills connects with the Bokkeveld, and properly forms one of its branches, takes, in the different localities through which it passes the names of the Zwellendam, the Oudtshoorn, and the Stettin mountains. Behind this, and at a distance varying from 15 to 30 m., is a second range, connected likewise with the Bokkeveld, so as to form another of its branches and known by the name of the Zwart or Black Mountains. Between these two E. ranges lies the plateau of Kammanas and Long Kloof. About 70 m. behind the Black Mountains is the last great E. range, which links with the Roggeveld near lat. 33° 10' S. and takes, in succession the names of the Klein Roggeveld, the Nieuweveld, and the Renssenvy or Renssenvy Mountains, the last forming the highest mountain chain in S. Africa, and attaining a height which has been variously estimated, but probably is not less than 10,000 ft. The large space between this range and the Black Mountains is occupied by a plateau, called the Great Karroo. On the W. it connects with the Bokkeveld and the Roggeveld Karroo, and on the E. with a similar tract called Camdeboo, and thus the whole of these united Karroos may be regarded as one immense plateau, raised, on an average, 3000 ft. above the level

of the sea, surrounded on all sides by mountain ranges, and stretching continuously though with varying width for 500 m. The geological structure of the mountains appears to be very uniform. They have a nucleus of granite, which sometimes comes to the surface, and forms the predominating rock, but much more frequently the granite is overlain by enormous masses of sandstone, easily distinguished by the numerous pebbles of quartz which are imbedded in it. The mountain summit, when composed of granite, is usually round and smooth, but when composed of the quartzose sandstone is often perfectly flat, and assumes the form of which Table Mountain is a well-known specimen. The thickness of this stratum, in some localities, is not less than 2000 ft. and may then be seen forming steep vertical faces resembling masonry or exhibiting a series of salient angles and indentations, as sharp regular and well defined, as if they had been chiseled. With the granite are often associated primitive schists, the decomposition of which seems to have furnished the chief ingredients of the thin barren clay which forms the characteristic covering of the Karroo. In some places, particularly towards the E. coast, more recent formations appear and limestone is frequently seen piercing the surface.

Rivers.—Notwithstanding its lofty mountain ranges and elevated plateaus Cape Colony has scarcely any navigable rivers. Elephant, or Olifant's River which falls into the Atlantic in the W. of *Clanwilliam* is affected by the tide, and is navigable for boats for 80 m. but, like almost all the other rivers of the colony as encompassed at its mouth by a bar over which no ordinary sailing vessel can float. On the E. coast, the Breeds, which empties itself into St. Sebastian's Bay in Swellendam di. Isen admits vessels of 200 tons into the port of Beaufort which stands at its mouth but, immediately thereafter becomes navigable only by small craft. To judge by the map one might be apt to suppose that the colony was remarkably well supplied with water. Streams are there seen traveling in all directions, some of them apparently receiving numerous tributaries, and running a course of several hundred miles and the fact is, that at it is a season when rains prevail many of them are swollen to rivers of great width and of a depth which would float the largest vessel in safety. But the fall of these rivers is as rapid as their rise had been and the rains have no longer ceased than they either disappear altogether or sink down into deep channels, and occupy a shallow rocky bed overlying on both sides by lofty precipices of the prevailing sandstone. They thus not only become useless as a means of internal traffic but cannot even be made available for purposes of irrigation.

Climate.—The temperature of the colony varies much in different localities, but its general average may be stated at 87° 80° at Cape Town that of the coldest month being 57° and that of the hottest 79° Fahr. The extremes, however have a much wider range for Rumbold states that, in 1838, during his visit to the Cape the thermometer on Jan. 26, stood in the shade, at 94° and on the 28th at 90°. In the mountainous districts snow covers the highest summits during half the year and the temperature, cooled down by the blasts which descend from them, often falls below freezing. The alternations of heat and cold are frequently great, as well as sudden. The E. wind sometimes begins to blow with all the characteristics of a storm. At first it is almost stiflingly hot, and gradually gathering strength carries along with it an impalpable sand which penetrates everywhere. The whole atmosphere is alarmed, and the trees gather a coating which makes them look as if they had been painted with red ochre. Shortly however the breeze cools, its violence abates and the air regains its wonted clearness. This wind disagreeable though it is, is regarded as not prejudicial to health and the statistics of the colony certainly go to prove that there are few climates in which under ordinary circumstances, human life is more likely to run its healthiest course. Less rain falls in the interior and on the W. coast of Cape Colony than in any other part of the world, excepting rainless districts. It approximates in this respect to Patagonia and the E. coast of the S. American peninsula.

Vegetation.—The vegetation of the Cape is of a peculiar and distinctive character. To this, however there are some curious exceptions in the case of particular plants, where a connection manifests itself between the botany of this part of

the world and that of very remote countries. Such covers with the alder and also with the bramble, one of the nine species of which that are enumerated by Kuhn and Zeyher as growing at the Cape appears to be the common English bramble or blackberry. There are also links of connection, as far as regards the similarity of some peculiar genera, with the botany of Australia, and that of S. America. Yet, nowhere else are genera and species confined within narrower limits than here, without any apparent cause for a dispersion so arbitrary. In many respects, the vegetation in the E. districts of the colony differs widely from that on the W., although several plants are common to both. What is the grain most extensively cultivated at the Cape, but other cereals are also grown. With the exception of the silver-firs or Witeboom (*Leucadendron argenteum*) none of the indigenous trees in the vicinity of Cape Town attain any considerable size. The one named grows to the height of from 20 to 40 ft. and is very conspicuous from the brilliant silky whiteness of its leaves. Its timber however like that of all the other trees of the colony such as they are, is useless, being soft and brittle, but its bark is said to be stringy and to contain a considerable quantity of tannin. The main stem of this tree, which now forms groves at the back of a Table Mountain is at the foot of the E. side of the same mountain even at present it is almost entirely confined to the peninsula of the Cape. But the characteristic vegetation of the colony consists in its Karroo or heath, *Stapelia* or carnation flowers and Proteaceae. Of the first, there are about 400 species, and of the last 200 all exceedingly beautiful but having a range so limited, that none are to be seen N. of the mountains which bound the Great Karroo while by far the greatest number grow within 100 m. of Cape Town. The *Protea* *Cynaroides*, bearing a flower the size of a man's hat, is found on Table Mountain as for the singular and flashy *Stapelia* resembling a star-fish about 100 species are mentioned but they are almost entirely confined to the dry and sandy regions of the W. coast, where they cover a tract of many degrees of latitude in extent. A great portion of the E. frontier of the colony at this adjacent districts are covered with extensive thickets of a strong succulent and fleshy vegetation, denominated by the natives the bush. The most common plants of the bush are those, of many species all exceedingly fleshy and some beautiful; the great red-flowering arborescent aloe and some others make a conspicuous, though by no means graceful figure in the E. part of the colony where they grow irregularly scattered over the parched and baked faces of the hills. Other characteristic plants of the E. districts are the spekboom (fork tree *Portulacaria afra*) *Schottia* species, *Calcevia* or cedar, two or three species of *Loasium* or yew-wood, and the great succulent *Euphorbia*, which grow into trees 40 ft. high branching like a candlestick, entirely leafless, prickly and with a very acid juice the *Euphorbia* *malformis*, 8 ft. in diameter has on the ground, to which it is attached by slender fibrous roots and is confined to the mountains of Great Reymet, where also is found the extraordinary *Tectularia* or Hottentots' bread. The *Euphorbia* of which there are 18 species, all having the appearance of dwarf plants but without any similarity of structure, scarcely occur in the Cape Colony properly so called, but extend over the mountains of Kaffra, Tambouka, and Delagoa Bay almost to the tropics. The brilliant *Sarcocolla* are almost peculiar to the districts of George and Swellendam. Throughout are found various species of *Acacia* many beautiful ones of *Oxalis* innumerable species of *Isis*, *Gladiolus*, *Tritoma*, *Watsonia*, *Hypericaceae*, and other handsome *Iridaceae*, known by the name of Cape bulbs. nor ought we to omit the endless varieties of *Felagium* or Cape geranium, *Glaphalium*, *Xanthoxylum*, *Desfontainia*, *Meem* *hyperandrum* or *Ag-nardell*, shrubby *Berg* *gustonea* and curious if not large or showy blossomed *Orchidaceae*. Such is an outline of the magnificent flora of S. Africa from which the botanist has drawn more largely and the garden and green houses of Europe have derived a greater variety of beautiful plants, than from any other quarter of the world. From their presence here, and almost nowhere else, Kuhn has characterized this region as that of the *Stapelia* and *Mesembryanthemum*.

Zoology.—The animals indigenous to this colony are almost entirely varied, from the most unwieldy bulks in the most delicate and graceful forms. Among quadrupeds may be

enumerated the giraffe, elephant, rhinoceros, the hippopotamus, now much less frequently seen than formerly, the lion, panther, hyena, jackal, wolf, wild boar, quagga, buffalo, antelope, springbok, monkey porcupine, bat-eater, &c. Among birds are the ostrich, eagle, vulture, pelican, flamingo, crane, guinea fowl, turtle dove, and smaller species in great variety. The reptiles include among their number the largest and most venomous of their class, including the boa constrictor and the cobra d'aspide. In the surrounding seas and along the coasts, whales and seals exist in smok numbers, so to make the capture of them an important occupation, while both there and in the rivers there is no deficiency of smaller fish.

Skirmishes.—The original inhabitants of the peninsula of S. Africa consist of two distinct negro races—the Hottentots and the Kaffirs which are again subdivided into 10 or 12 different tribes. The Hottentots occupy the N portion of the peninsula, and the Kaffirs the N.E. The first are a mild and timid people, with some talent, but no energy. They make excellent shepherds and herdsmen and are faithful and honest. When young they are clean limbed, and well proportioned complexion a clear olive cheek bones high and prominent teeth small and exquisitely cannelled. The Kaffirs are a remarkably handsome race tall, stout, beautifully formed and graceful in their movements, cheerful and contented expression of countenance, complexion verging towards black. The offshoots of these two great families are the Korannas or Komas, the Hossamans or Bushmen, Namaquas, Damaras, Oranjas, Hottentots, Mambas, and Zoolas.

Soil and Climate.—The soil is fertile as such as ought to favour the growth of all the ordinary cereals, and the first colonists who settled in the country expected to find the principal sources of their wealth in the cultivation of them. The extent of territory allotted to them corresponded to this view and they settled down in farms which never would have been imagined of sufficient size, had they not expected to make almost every acre of them arable. Some of the tracts were apparently fertile enough to countenance this idea, but three-fourths of the country were so sterile of a very different description and the consequence was that the colony threatened for a time, to become a complete failure. Everywhere the soil was well adapted for the growth of wheat and the other cereals, the climate often proved most unpropitious. Long continued droughts destroyed the corn in the blade, and mildew destroyed it in the ear. At last a better system began to prevail. Agriculture formerly deemed paramount, because only of secondary importance. Extensive tracts which never could have yielded a profitable return under the plough were seen to be capable of supporting numerous flocks and herds and the attention of the colonists was generally turned to pasture. The native breed of cattle has been supplanted by better breeds, so improved by crosses with them so that the cattle of Cape Colony would not suffer by a comparison with those of many of the better improved districts of Europe, while the Cape sheep, remarkable only for the ponderousness of their tails have been very generally supplanted by finer European breeds and more especially by merinos, which thrive admirably and promise soon to make wool the great staple of the colony. Grain, particularly wheat, is still grown to a considerable extent in the lower districts and in ordinary years of crops, both abundant and of good quality are obtained. In some districts, and also in Cape Division, considerable attention is paid to the culture of the vine, which grows fruitfully, but, in general, is more remarkable for the quantity than for the quality of its produce. It is well known in commerce by the name of Cape wine, but is not in much repute and is understood to be extensively employed in adulterating some of the foreign wines, especially Madeira. The only wine of the colony which has obtained a high reputation is the famous red wine, which grows in a very limited district E. of Cape Town, and is called Constantia, after the celebrated vineyard near the town of that name, where alone it is produced.

Manufactures and Commerce.—The former are necessarily limited to a few articles of primary necessity the colonists supplying themselves with the ordinary manufactures from their mother country of a better quality and at a cheaper rate than they could hope to produce them.

The exports of wool E. in the colony are increasing rapidly those of wine decreasing. In 1857 only 44,441 lbs. of wool

were exported; in 1851 5,661,216 lbs. while the wine had decreased in the same period, from 740,000 to 483,540 gallons. The whale fishery which was formerly pursued with success has also declined. The total declared value of the exports from the whole colony for the year ending January 5, 1852 was 2,651,377. The value of imports, as declared for the same time, was 21,538,318. The colonial produce exported, in 1851-2 was of the declared value of 2458,941 and is composed principally of wool, skins, hides, wine, flour, meal called fish, ostrich-feathers, skins, horses, beef, pork, butter, &c.

Government, Religion, Education, &c.—The government of the Cape is vested in a governor nominated by the Crown, and assisted by an executive council composed of the commander of the forces, the chief justice, auditor-general, treasurer and accountant-general. Each province is administered by a lieutenant-governor and each district by a civil commissioner subordinate to whom are magistrates, superintending magistrates of country 15 or 20 in. in extent. Justice is administered by a supreme court of judicature, presided over by a chief justice and three puisne judges, a high sheriff and deputy sheriff for each district, a court of vice-admiralty police, and matrimonial courts, &c. The revenue of the colony has generally exceeded the expenditure, but the estimates for 1849 would show a different result though not to any great extent. The revenue for that year has been calculated at £213,424 the expenditure at £210,000. The Dutch and English Reformed Lutheran E. Catholic, and Presbyterian churches in the Cape, are all entirely or in part, supported by the Government. From returns for 1846, it appears that there were 115 congregations belonging to the two provinces of which 82 belonged to the Dutch Reformed church, 13 to the English Episcopalian, 8 to different Presbyterian denominations, 4 to the E. Catholic church, 21 to the Wesleyan church, 24 to the Independents, 5 Moravian and 9 Lutheran. Sunday and evening schools are attached to each. There are also numerous missionary schools, and Bell's Lancasterian and other free schools in each district. In numerous localities throughout the colony missionary exertions are carried on by various denominations of Christians for the civilization of the native population.

History.—The Cape of Good Hope was discovered in 1486, by Bartholomew Diaz. In 1702 two commanders of the English East India Company took possession of the country in the name of King James but no settlement was then formed. In 1650 it was colonized by the Dutch Government, and remained in their possession for 156 years. In 1795 it was taken possession of by a British armament, but restored to the Dutch in 1802. In 1806 it was again taken by the British, and conferred to them at the general peace in 1814. Almost ever since this period a succession of hostilities has occurred between the colonists and the Kaffirs on the E. and N.E. frontiers of the colony the latter revenging the encroachments of the former on their territories by plundering their cattle and otherwise disturbing them in their possessions. When these aggressions become altogether intolerable, and threaten the ruin of the colony a regular military force is sent against the Kaffirs, which ultimately succeeds, though not without much trouble, and often considerable loss of life in driving back the enemy and for a time, but for a time only putting an end to their marauding incursions. After a short interval of quietness, the Kaffirs recommence their aggressions, and the same results as in previous instances, follow, to be in turn succeeded by similar proceedings. The latest Kaffir war broke out in December 1850 and did not terminate till after fully 18 months active hostilities.

In 1851 a representative constitution was granted to the colony with a liberal free-tenancy suffrage every owner of a tenement valued at £25 or more, having a vote for members both of the legislative council and house of assembly. Pop. in 1850 Western division, 114,886 Eastern 170,893 total 285,779.—(Barnard A. Resident of the Cape of Good Hope, Cape of Good Hope Almanac Past and Present State of her Majesty's Colonies Natal Magazine Mrs. Romer's Physical Geography, &c.)

CAPE RIVER, or YANUKA, a river Central America, Nicaragua and Mosquito country rising near the city of Segovia, flowing E. by N. for nearly 800 m. and after receiving several tributaries, falling into the Caribbean Sea at

Cape Giracias & Dica. It passes through a rich and fertile country has some important towns on its banks, and is navigable for a considerable distance from the sea. The upper part of its course is obstructed by falls.

CAPE TOWN is to the African, cap of Cape Colony on the lower or S. side of Table Bay at the N foot of Table Mountain, 31 m. N the promontory of the Cape of Good Hope. The view of the town and its vicinity from the bay anchorage is

very striking. Behind rise the perpendicular sides of Table Mountain while, on either hand are the barren crags of the Lion's Head and Devil's Peak the former usually capped with a cloud. It is regularly built, lighted with gas, the streets, many of them wide but most of them unpaved cross at right angles, while the houses, with their little stoops (porches) and gable fronts, exhibit many traces of their Dutch origin. Rows of oak, poplar and pine trees, line the sides of the principal avenues and the shops are well supplied with

large, well built, contain an infirmary &c and have a large area in front as a parade-ground. Another important Government establishment is the observatory, well known by the labours of Sir J. Herschel. At noon daily a ball is dropped here as at Greenwich, to indicate true time to mariners. The botanic garden of the Baron von Ludwig contains a fine collection of plants. In the town are English, Dutch, Lutheran, Presbyterian, Independent, Methodist, and R. Catholic churches; the burgher senate-houses, the chief court-houses, several fine and other schools, a theatre, a spacious market place a commercial exchange, with a fine commercial hall and a public library of about 80 000 volumes. Provisions, fruit, and vegetables, are abundant and cheap. Water is supplied from Government tanks in the dry season. The police here is well organized on a military footing. Cruises of a flagrant kind are rare. The town is divided into 12 districts, and each district into four wards over each of which there is a commissioner and four wardmasters, chosen by the people these, together appraise town property and assess the local taxes. Within the town also, is held the supreme court of justice of the colony.

Cape Town is defended on the S. side, inland, by a regular citadel on the N. towards the sea, by Amsterdam Battery and some other works. To the port, at which is the entrance, large vessels cannot come but the anchorage in the bay is commodious, and usually safe. Two quays extending from the beach into the bay enable lighters to take in and discharge cargoes at all times of the tide. Great efforts are made both by the Government and the municipality to render Table Bay a safe harbour. It is now visited annually by a large number of vessels still the casualties do not amount to a third per cent. From 1824 to 1842, it was visited by 961 vessels, of which only 28 were lost or seriously injured. The numbers, 1841-1848 were as follows—

Vessels.	Tonnage.	V. sails.	Tonnage.
1841	433	1848	690
1842	478	1849	650
1843	405	1850	625
1844	489	1851	647

In 1862 these numbers had increased to 465 vessels of 131,424 tons, entered and 4,77 vessels of 217,385 tons cleared at the port.

The walks near the town are pretty and neatly kept. One of them, which leads along to the top of the hill overlooking the town and bay and giving a view of the sandy plain and distant mountains, with Green Point (where is a light-house) and Hoban's Island in the distance is particularly picturesque. The drives around are pleasant, especially that to Green Point, 3 m. W. The climate of the whole locality is considered salubrious and the place is much frequented by Indian residents on leave of absence, who pay (if holding official situations) is here usually continued to them. Cape Town was founded by the Dutch in 1652. Pop. 22,548.

CAPE VERD the most W. promontory and point of Africa, in Senegambian, between the mouth of the Senegal on the N. and that of the Gambia on the S. lat. 14° 22' N. lon. 17° 34' W. (N.) It was discovered by the Portuguese, Dieme Fernandes, in 1445.

CAI E VERD ISLANDS (Portuguese, *Ilhas do Cabo Verde, Ilhas Verdes*) an archipelago, N. Atlantic, W. coast of Africa, consisting of 10 principal and several smaller isles, belonging to Portugal between lat. 14° 43' and 17° 18' N. and lon. 22° 28' and 25° 27' W. They take their name from Cape Verd which is about 320 m. E. of them, and is said to be so called from the verdure of a group of enormous baobab trees which covers its summit. The largest and most important is Santiago the others are Fogo, Brava, Mayo, St. Antonio, St. Vincent, St. Lucia, St. Nicolo, Jas. Sal, and Boavista. All the islands are evidently volcanic most of them are rugged and lofty but some have sheltered bays, with good anchorage. The most elevated is Fogo, on which there is a volcano, which after 50 years

CAPE TOWN AND TABLE MOUNTAIN—FROM NEAR AMSTERDAM BATTERY

European goods. Government-house is a commodious edifice. The grounds are planted with fine old oaks, and partly formed into a public walk. The Government offices are here, and in the precincts is the E. African college. The barracks are

quasars, recently became active, and the peak of which has a height of 2157 ft. The island is fertile, and produces great quantities of maize, beans, and various kinds of fruits. The group however taken as a whole, does not deserve this

all the crops. The Cape Verde were discovered by the Portuguese in 1449 and shortly after colonized Pop. about 400,000.

CAPE WRATH the N W extremity of Scotland, co.

Sutherland. There is a light-house on it bearing a revolving light, 400 ft above the level of the sea, showing a bright and red light alternately lat. 68 38' N lon 4 58' 30" W (E.)

CABLE YONE, the terminating point of the N. E. coast of Australia, having the Gulf of Carpentaria on the W. and the Pacific Ocean on the E. lat 10° 38' S. lon 142° 33' E.; separated by Torres Strait from Papua, from which it is distant about 100 m. It is generally high and rocky with occasional grassy flats between the ridges and the sea in other places the prunines come down to the beach. A

shallow rocks at the extremity of the
Lap, which has been called Evan's
Bay lat. 16° 45' S. lon 142° 89' E.
was visited by the foregoing expedition
commanded by Captain Blackwood and
a very full account given of it by Mr
Jukes naturalist to the expedition, who
observed it as regards climate, one of
the comparatively favourable spots of Aus-
tralia, frequent showers falling there
throughout the whole year and thus
permitting (1) a existence of permanent
fresh waters, and green grass dur-
ing even the driest season. Gardens
ground and grass land to a consid-
erable extent, is also obtainable, with-
out need for horse manure, and some-
times to the full growth of

and exposed to the full wrath of a
refreshing sea-breeze. We had a
anchorage so safe. But the place has other advantages
of a most important kind, according to Mr. Jukes. In case
of accident to vessels in Torres Strait, where accidents are
frequent from the intricate and dangerous nature of the
navigation, Cape York were made the site of a station
would afford a ready place of refuge to those who might
escape in boats. The rocky elevations, besides, render it a
conspicuous object from the sea. In a military point of view
also, it would be important, in respect of affording protection,
in case of war to our commerce between the E. Pacific and
Indian Oceans and in the event of steam communication
being established between New South Wales, by way of
Torres Strait, Cape York would necessarily become one of
our most important ports. Mr. Jukes remarks that
there has been quiet and friendly, but of very low intelligence
They had the thin bodged, spare bony form, of all the Australian
lump people. Their hair however was like that of Europeans
and worn either straight, or waving in broad open curls.
Homesick and homesick, without any kind of civilization
distillate of fruits and vegetables, they pass their lives exclusively
in the chase for food, or in native industries. 'These Australian
lump, says Mr. Jukes, sat listlessly looking at us, standing
where we told them, fetching anything or doing anything
we ordered them, with great docility indeed, but with com-
plete want of interest and curiosity. On our shooting a little
part of the way they raised their heads off some of the trees
fustian, and then waved their hands. A little later, the
is open and sat it, utters and all. — (Jukes's Narrative of the
Seymourian Voyage of H. M. S. Porpoise, 1842-1845.)

CAPEL, four para. Eng.—1 Surrey 5573 ac. Pop 1103.—2 (*de Ferres*) Kent 1736 ac. Pop 185 —3, (*St. Andrew*) Suffolk 2272 ac Pop 202 —4, (*St. Mary*) Suffolk 1910 ac Pop 549

CAPELLADAS, a tn Spain Catalonia, prov of and 84 m. W N W Barcelona, in a fertile plain. It contains a parish church, chapel seven schools, a townhall, prison hospital, cemetery and some public halls. The inhabitants are chiefly employed in weaving coarse cloth, cotton and woollen fabrics, paper making, distilling brandy, and in agriculture Pop. 27,081.

THE
CAPE VERDE
ISLANDS

English Wire

character the surface is for the most part stony and cherted. The bays. Kala mounds fills water is scarce, and generally shallow. The water is brackish, and of a low temperature. The soil is poor, of mid-fine quality while the climate is decidedly unhealthy intense heat prevailing from November to July. The *hurricanes* and *fogs* during the remainder of the year. The largest of the islands is Santiago. It is 82 in long and 12 in broad, and though possessing a few fertile spots is generally sterile mountains and sterile. Its town Pto. Praya, has an excellent harbour though inferior to that of Porto Grande in St. Vincent, which is the best in the whole group. The chief products are maize, rice, and haricots, bananas, guavas, lemons, oranges pure apple, coconuts, nuts figs and melons. The soil is very fertile crops a few of the best grain yields might be made, but the Government is too poor to encourage such attempts. It has fully introduced the cotton and indigo plants are indigenous and both they and the sugar cane are partially cultivated. The Orinoli, once monopolized and then set free, has again become monopolized by the Government on the ground that the de-
terioration produced by the free traders had diminished the quantity exported, and seriously affected the revenue, which, from the Orinoli alone, has in some years reached 224,000. The principal crops are the palm, coconuts, and beach. The chief domestic animals are goats, asses, and poultry. Monkeys, wild cats, and pigeons abound, but there are no serpents or venomous reptiles. Numerous turtles frequent the coasts, and when the water is calm the swimming of the *Manatus* is seen. The number of the albatross is the smallest. The chief manufactures are all the albatross are known leather shoes and car-

[4446 tons], and cleared 78 [4446 tons] of these, 33 Portuguese guns entered and 32 cleared, 23 British entered, and 22 cleared. The natives are indolent but inoffensive, and speak a Portuguese jargon, called *Lingua Oronde*. These islands produce with some possessions on the coast, from the Portuguese provinces of Cape Verde of which the capital, formerly Porto Praya, is now Mindello, in St. Vincent. In 1830, the islands were visited by natives and hooping coughs, measles, and other diseases, killed off 700 in a population of 4500, and scarcely any individuals remained. In September of the same year a hurricane, in three or four days, destroyed about 400 houses, and great numbers of the natives perished.

CAPELLE property GENEVIEUX CAPELLE, a vil. Holland, prov N Brazil, 13 m. W S.W. Herengheboch with a handsome church school, and two annual markets. Pop. 1180.

CAPELLE-DE-MER Yverdon, a vil. Holland prov E. Holland 4 m. P by N Rotterdam. It has a church with a fine tower a school a branch of the Public Utility Society and a literary association. Pop. including surrounding hamlets 1060.

CAPESTANG [anc. *Copet Stang*] a m. France, dep Herault, 9 m. W. Beziers, on the Canal du Midi, and near the N bank of an extensive lagoon, to which it gives its name. It is surrounded by walls flanked with towers, both in a ruinous condition. The church contains some Gothic sculptures, and within the town are the remains of a Roman bridge. Pop. 1831.

CAPESTERE (LA) —1 *La Margot*, a tn. W Indies, Isl. Guadeloupe, 9 m. E. N. E. La Basse-Terre, at the S.E. angle of the island and at the mouth of the Riviere aux Peres. It is the capital of the most fertile and salubrious district of the colony. Coffee, cacao, and sugar are cultivated around it.—2 A tn. W Indies E. S. coast, Marigot-Cap. of a district.

CAPESTRANO a tn. and com. Naples prov Abruzzo, Ultra II. 23 m. S. E. Aguilu. It is situated on a hill, on which there is a castle, contains two handsome churches and a convent, and has two annual fairs. Pop. 2408.

CAPIBARI a tn. and several streams, Brazil.—1 A tn. prov of, and 120 m. W São-Paulo, on a stream of its own name, an affluent of the Tieté. It has a church and school and the building of canoes, and the distilling of brandy are carried on. Pop. 2000.—2 A river prov São-Paulo, falling into the Tieté on its l. bank, 24 m. below Porto Feliz. It traverses the town of its own name, and its banks are covered with timber suited for building canoes of the largest size.—3 A river prov Santa-Catharina, falling into the Tubarão, about 10 m. from the sea. It is navigable for about 80 m.—4, A river prov São-Paulo, a tributary of the Itaipu an affluent of the Paraná.

CAI BARBE, a river Brazil prov Pernambuco, rising in lat. 7° 50' S. lon. 45° W. flowing E. and S. and falling by two mouths into the Bay of Recife. It is navigable for canoes and flat-bottomed boats a considerable way inland. Total course about 200 m. exclusive of windings.

CAPISTRILLO a vil. and com. Naples prov Abruzzo Ultra II. 5 m. S. S. W. Avezzano, 3 m. W. Lake Fucino. It contains two churches and an hospital. Pop. 1300.

CAI ITANATA, a prov. Naples, on the Adriatic comprising the small group of Tremoli and the mts of Pannose, bounded N and E. by the Adriatic, S. by provs. Bari and Basilicata, and W. by Principato Ultra and Samnium area, 8178 sq. m. W and E. It is intersected by spurs of the Apennines, one of which terminates in the wooded promontory of Gargano. S. and E. extends a vast sandy plain called the Tavoliere di Puglia, on the excellent pastures of which more than a million and a half of sheep are annually wintered. The coast is generally low and has no good port. The province is well watered by the Gandeloro and its affluents, the Cerveno, and the Carpelle, all flowing to the Adriatic. Wheat, though cultivated only in the valleys, is superabundant; figs, apples, fruit and figs, and figs, are plentiful; the wine produced are in general good especially those of San Giovanni, Vieste, and Manfredonia and likewise the olive oil of Gargano tobacco and rumex are also cultivated. The principal riches of the province, however consist in fine large cattle, esteemed horses, and sheep, the last yielding excellent wool. Goats and pigs are reared in large numbers. Marble salt is gathered in the lagoons, and good potter's clay, limestone, and alabaster are obtained. There is little fishing and no manufactures. Trade in grain, figs, figs, honey, and wool; horses, cattle, wool, shoes, and hides. Its capital is Foggia. ports, Vieste, Manfredonia, and Rodi. The province is divided into three districts, Foggia, Bovino, and San Severo, comprising 38 circondari, and 62 comune. Pop. 394,065.

CAPIVARI, a tn. Brazil prov Rio de Janeiro, near Cabo Frio, with two churches, and inhabitants engaged in agriculture, and in falling and preparing timber for the market at Rio-de-Janeiro. Pop. tn. and dist. 3000.

CAPIZ—1 A prov. Philippines on the Panay N coast, and including several small adjacent islands, is about 80 m. E to W by 57° N to S. It is undulating and its lower grounds are flooded in the wet season rendering it fertile in rice. It has several rivers, some of which are filled with crocodiles. None of them appear to be navigable, but all are well wooded. The coasts are dangerous at certain seasons, but they have two excellent safe harbours, that of Batuan and that of Capiz, both capable of admitting vessels of medium size. Gold and silver are found in the province.—2 A tn. cap. of above prov., on a plain near the sea, and surrounded by the rivers Panay, Panitan and Irayan with some houses of stone, and the remainder of nipa palm. It is defended by a fortlet and a small garrison. In the rainy seasons it is sometimes inundated. The inhabitants are laborious, and fond of commerce and sailing. Pop. 11,145.

CAPIZ [I. *cap. Capiz*], a tn. Sicily prov Messina, 10 m. S.E. Mistrutta. Marble, petroleum, aquilinum and iron pyrites are found in the neighbourhood. Pop. 2468.

CAPIE par Eng Kent 1658 sq. m. Pop. 578.

CAPIZ-DE-SEPIA and **CARO** in SORRA (called also **CARO** in SORRA, and **CARO** in CASSANO) the two towns into which Isl. San Giulio is divided the former the N. and the latter the S. **CARO** DISTRICT (anc. *Apud*) a seaport in Austria Illyria, gov. of and 9 m. S. W. Trieste, on a small rocky island, Gulf of Trieste lat. (centr.) 46° 32' 42" N. lon. 13° 44' 16" E. It is connected with the mainland by a causeway of about 1/2 m. long. It is defended by an old fort now going to decay. Ruined walls, falling houses, and dark narrow streets give it a very gloomy appearance. It contains a cathedral a lofty edifice faced in the Venetian style with marble, and containing some fine pictures sculptures, and arabesques several other churches a handsome Gothic townhouse, a corn exchange, and theatre. It is the seat of a bishopric, and has six monasteries and two summer a gymnasium, two super or schools, several hospitals and a pest tentory. The town is very inadequately supplied with water by an aqueduct and from rain cisterns. There are manufactures of soap candles, leather and sea salt, about 18,000 bushels of the latter being manufactured yearly and a considerable trade being done in sea salt and fish, and some raising greatly extensive. The harbour is dangerous but is resorted to by fishing boats only. After the 10th century Cape d'Istria belonged alternately to the Venetians and Genoese and was made by the former in 1478, the capital of Istria. Pop. 6300.

CAI ODRISI a vil. and com. Naples prov Terra di Lavoro, 3 m. S. W. Caserta. It contains a handsome church adorned with pictures and statues, and a charitable endowment. Pop. 2415.

CAPODAGAL GANY a river Upper Canada rising in some lakes N. side the ridge of hills running parallel to Lake Superior. It flows N. joins the Neagany and subsequently falls into the Albany lat. 51° 5' N. lon. 85° 50' W. about 200 m. W by S. the entrance of the latter into St. James's Bay.

CAPORELE, a tn. Naples, prov Principato Ultra, 12 m. N. N. E. Capriana, near the source of the lake. Pop. 4460.

CAPPADOCIA an em. prov. Asia Minor, now included in Asiatic Turkey bounded N. by Pontus E. by the Eux. Pontus and Armenia Minor S. by Mount Taurus and W. by Phrygia and Galatia, between lat. 37° 16' and 39° 28' N. lon. 32° 50' 15" and 35° E. It is mountainous and well watered and was celebrated for the production of excellent wheat, as well as for its fine pasture, and its superior breed of horses, asses, and sheep. It was subdued by the Persians under Cyrus and after the time of Alexander the Great, it was governed by kings of its own till A.D. 17 when it was reduced it to the form of a Roman province. Christianity was early propagated in Cappadocia, as we learn by the address of the first general council of the apostle Peter.

CAPPADOCIA, a vil. and com. Naples prov Abruzzo Ultra II. 8 m. W. S. W. Avezzano, a little N. W. of the hill in which the Liri rises. Pop. 1771.

CAPPAGH, 2 par. Ireland.—1 Limerick 1268 sq. Pop. 408.—2 Tyrone 87 670 sq. Pop. 11,261.

CAPPAGHWHITE a vil. Ireland, co. of and 7 m. N. Tipperary. It is a constabulary police station and has five annual fairs. Pop. 711.

CAPPANACURHY a group of islets and an old castle, Inland, co. Kerry. The islets are situated 8 n. W. Kinnegor, at the head of the estuary of the river of same name and the remains of the castle are on the mainland opposite.

CAPI ELI, a l. Switzerland, can. of, and 10 m. S.E. W. Zürich. It contains an old Cistercian convent, founded in 1185, a porch once the prefecture, a presbytery school-house, &c. and a simple monument, erected in 1838 in memory of 74 n. g. the eminent reformer killed Oct. 12 1830 in a contest between the troops of the R. Catholic and Protestant cantons which took place near Cappel. P. 578

CAPI ELIN See KAPPELL

CAPPOLE, par. Irel. Lond. 1784 ad. Pop. 300
CAPRAIA, or **CAPRAIA** (anc. *Epithura*) anal. Sardinian States, Mediterranean 32 m. N.W. Elba lat. (castle, E. side) 44° 2' 30" N. lon. 9° 50' 45" E. (a) It is of volcanic origin about 12 m. in circumference, mountainous, and of difficult approach except on the E. side, where the town of Capraia is situated. The port here is safe, and defended by a fort. Wine is the only produce of the island. Most of the inhabitants are fishermen. Wild goats now as formerly abound in it. Pop. 2500

CAPRARA See TARENTI ISLAND

CAPRARA a l. Papal States, dioc. of and 9 m. S.E. Viterbo, containing a celebrated castle, built on the slopes of Mount Cimino, and to be the masterpiece of the architect Vignola, and to be unrivalled at least in Italy as a specimen of the fortified domestic architecture of the 16th century. It was built for Cardinal Alessandro Farnese nephew of Pope Paul III. and is richly decorated with frescoes and arabesque each room being devoted to some incident in the history of the Farnese family, or to some allegorical subject.

CAPRERA a small is. N.E. the island of Sardinia, and separated from it by a narrow strait. It is 6 m. long N. to S. and nearly 3 m. broad. It is fertile and produces both corn and good pasture.

CAPRI (anc. *Capræ*) an is. belonging to Naples, Me. dieterranean, 3½ m. E. Cape Campanella which separates the Gulf of Naples from the Gulf of Salerno lat. (S. point) 40° 50' N. lon. 14° 11' 40" E. (a) It is about 5 m. in circumference, and is surrounded by precipitous cliffs which afford only one landing place. The island consists of two mountains of limestone, remarkable for their picturesque shape and between them lies a well-cultivated valley which yields grain the choicest grapes, olives, and other fr. The inhabitants are occupied in the production of oil and wine, in fishing and in catching quails, which come in immense numbers from Africa to the shores of Italy. Rows of nets are placed across the breaks in the woods and chasms in the rocks, to intercept these birds in their annual flights, and the quantity taken is almost incredible. The climate is remarkably fine and a residence in Capri is recommended in cases of chronic bronchitis. The island is supposed to have been originally peopled by a tribe from the Epirus. The Emperor Augustus resided here during his illness and Tiberius used thus place the scene of his debaucheries during the last ten years of his life. He is said to have built 12 villas in different parts of the island, but, after his death they were destroyed by order of the senate. Numerous ruins and fragments of ancient monuments still remain, among which is a temple cut in the side of a hill, said to have been dedicated by Augustus to his mother besides portions of aqueducts, baths and palaces. The island contains two towns, Capri and Anacapri. Capri is the seat of a bishop. It is built on the acclivity of a hill and contains a cathedral and some other churches. Pop. about 1800 (See ANACAPRI). Pop. of is. 3301

CAI HIATA a vil. Italy Piedmont prov. Alessandria, 7 m. S.W. Novara bank, Orba. Pop. 3265

CAPRICORN (Capr), Australia, N.E. coast, about 80 m. N. Port Curtis, lat. 23° 18' S. lon. 151° 42' E. (r)

CAPRICORN (Group) an assemblage of islets and reefs N.E. coast Australia, having 155° meridian and the tropic of Capricorn passing through them whence their name. They are all much alike in their geological characteristics and general features. One of them called First Bunker's Island, about a quarter of a mile in diameter is composed of coarse fragments of worn corals and alveoli, bleached by the weather. At the back of it a ridge of the same materials, 4 or 5 ft. high, and as many yards across, completely encircle the island.

Inside this ridge, on which is a belt of small trees, is a sandy plain covered with short scrubby vegetation, a foot or two in height. Between the trees on the ridge, and in some other spots, there is a thin layer of vegetable soil. The island abounds with sea fowl and other aquatic birds, especially black noddy, with whose nests the trees are laden. Most of the islands are encompassed by coral reefs, with lagoons inside in which sharks and turtle swim about in great numbers the former of immense size and strength. Turtle is so abundant, that one night, says Mr. Johns, Lieut. now Commander Blundell, being on one of the islands observing star albatross, was actually obliged to place sentries round him, to prevent the turtle from running over his artificial horizon as it lay on the ground. They were chiefly green turtle and the kind called loggerheads.—(Joy H.M.S. Fly 1842 to 1846.)

CAPRIA (two is. Italy.—1 A tn (Austria) gov. Venice, prov. of and 15 m. N.E. Verona, cap. dist. of same name on the small river R. a tributary of the Adige and surrounded by hills. It contains a parish and a subsidiary church three chapels and a record office for the district. Pop. 8500.—2 A tn Lombardy prov. of and 10 m. N. of Bergamo, near L. bank Adda. It is well built and clean, and comprises a spacious church town hall public library and convent. Hard ware, and wearing apparel and woollen fabrics, is carried on. Pop. 1419

CAPRYCKE, a tn and com. Belgium prov. E. Flanders 12 m. N.W. Ghent with a tannery three breweries, two breweries, and manufacturers of wooden pumps and clogs. There is also some trade in agricultural produce wood cattle, and linen. Pop. 8855

CAPSALE a seaport in Ionian Islands, cap. of Corfu near S. side of the island, upon the slope of a mountain. It has a commodious harbour defended by a fort Pop. 5000

CAPUA (anc. *Capen* and *Capua*) a city Naples, prov. Terra di Lavoro in a plain 18 m. N. Naples, l. bank, Volturno, which is crossed by a handsome bridge. It is the seat of an archbishopric, is well fortified has a strong citadel and is reckoned one of the keys of the kingdom being the principal fortress that covers the approach to Naples. It has two magnificent gates, three principal streets, two handsome squares, and three public fountains. The town is dirty but the houses are well built. The principal public buildings are the cathedral with a cupola, supported by 16 columns the church of the Annunciation the governor's palace, and the town hall. There are also 16 parish churches, several convents for both sexes, a seminary a college, military school extensive barracks four hospitals, and a handsome theatre. A noted fair is held here annually on Dec. 25.

The ancient city was situated 2½ m. S.E. from the modern town which was built from its ruins by the Lombards in the 9th century. The site is now occupied by a considerable town, called Santa-Maria-di-Capua. The ancient Capua, one of the finest and most agreeable cities of Italy was of such extent, as to be compared to Rome and Carthage. Hannibal wintered at ancient Capua after the battle of Cannæ. It was a favourite place of resort of the Romans, on account of its agreeable situation and its healthy climate and many existing ruins attest its ancient splendor. Pop. 8100

CAPULI, lat. Indian Archipelago: one of the Philippines off the N.W. coast Samar lat. 12° 31' N. lon. 124° 3' E.

CAPUS? a town, Italy Naples prov. of and 7 m. S.E. Bari: in a plain and celebrated for its almonds. Pop. 8100

CAPUTH par. Scot. Perth 16,000 ad. Pop. 2637
CARA a small is. Scotland or Argyre, at the N. side of Gigha, with which it forms a parish. See Gigha

CARABANCHEL ALVO y BAZO two vils. Spain, New Castle, prov. of, and 3 m. S. Madrid, each possessing a church schools, town and arsenal houses, and being adorned with vil. gardens, fountains, &c. belonging to the nobility of Madrid. United pop. 1804

CARABOBO, a prov. Venezuela, bounded by Core and the Caribbean Sea N. Caracas E. Yaracua S. and Truxillo W. area, 8148 sq. m. Its principal productions comprise coffee, wheat, tobacco indigo, and cotton. Valmeta is the capital, 30 m. S.W. from which is the village of Carabobo whence the province is named, and where a decisive battle was fought in 1821 which secured the independence of Colombia. Pop. 95,967

CARACA, a mountain range, Brazil, prov. Minas-Geraes, N. of the city of Maracana. It is a portion of the cordillera of Mantiqueira, being one of its highest ranges and liquorice, soap, sassafras, and other medicinal plants, grow naturally on it.

CARACAS, a group of six small uninhabited isles. Caribbean Sea, coast of Venezuela, a little W. Guyana.

CARACAS, SANTIAGO-DE-LOS-REYES-CARACAS a tn. S. America, cap. of Maricao and of the dep. Venezuela, and of prov. Caracas, 3000 ft. above the level of the sea, 11 m. S. S. E. La Guayra, from which it is separated by a chain of mountains whose highest point on the road is 5160 ft. lat. 10° 30' N; lon. 66° 54' W. (N.) The river Guayra bounds it on the S.

and is everywhere fordable near the town excepting after heavy rains when it runs with great rapidity but seldom almost as suddenly as it runs. Three other streams pass close to the town namely the Aracua, across which is a handsome bridge the Caracas, which separates one part of the city from the rest, and across which is another bridge and the Catuche. The town is well and regularly built, the streets being on general about 100 yards apart, and intersecting each other at right angles. They are almost all furnished with fountains.

The houses are solidly built of brick or earth faced with stucco, often richly decorated. Many of them have terraced roofs. There are several squares, the chief of which is the Plaza Mayor or Great Square, where the market for fruit, vegetables, fish &c. is held. The E. side is principally occupied by the cathedral a clumsy structure, which was much damaged by an earthquake in 1836 the S. by the college and the W. by the public prison. The chief public buildings are the churches, of which there are seven all solidly built and in the interior richly ornamented and the convents of which there are five—three for monks and two for nuns.

The most splendid church is that of Alta Gracia. From the Catuche the town is well supplied with water which is dispensed to the inhabitants in public fountains as well as in pipes and reservoirs. Caracas is the seat of an archbishop and has a university founded in 1778 and three hospitable trade is considerable, and consists of the products of the adjacent fertile valleys. For its exports see LA GUAYRA. The climate is healthy but earthquakes are common that of 1812 destroyed nearly all the houses and upwards of 10,000 of the inhabitants and though the town has been rebuilt, the houses are inferior to what they were before that dreadful visitation.

The city founded in 1667 by Diego Lozada was formerly the capital of the Captain General of the Caracas and is the birthplace of Bolivar. 10 p. about 50,000.—The PROVINCE lies between lat. 7° 38' and 10° 28' N. and lon. 65° 30' and 68° W. bounded N. by the Caribbean Sea, W. by Carabobo and Vargas S. by Bolivar and Venezuela and Guayana, and E. by Bolivar area, 45,264 sq. m. The surface is partly mountainous and partly flat the former towards the sea coast, where several deep indentations occur and form good harbours and roadsteads, the latter towards the interior and particularly towards the S. where the country stretches out into vast plains. The most important vegetable production of the province is cacao the quality being the best of all that is brought to the European market but all the usual tropical crops are grown in perfection, among which may be mentioned coffee and indigo. The province is divided into 16 cantons, of which that of Caracas, containing the capital though not the largest, is the most fertile and best peopled. Pop. 246,835.

CARACOL, YAMACOCO, or YAMACOCO, N. W. Guyana, prov. Guayana, rising on the N. side of the mountain Caraguazito, about 80 m. S. by W. Quilo and after a S. S. W. course of 90 m. for the greater part of which it is navigable, falling into Lake Sambomambé, 26 m. N. Guayana.

CARAGLIO a tn. Italy Piedmont, prov. of, and 7 m. W. Cuneo, on the Grana. Spun silk and silk fabrics are manufactured here. Pop. 6000.

CARAMAN, and **CARAMARA**. See KARAMAN and KARAMARA.

CARAMAN a tn. France, dep. Haute Garonne, 16 m. E. S. E. Toulouse. It has numerous fairs. Pop. 1881.

CARAMANARA, a river Hindoostan which separates the prov. of Bahar from that of Allahabad. It rises in a hilly district, about 56 m. S. S. E. Benares; lat. 24° 40' N. lon. 83° 40' E. flows round to a N. N. E. direction, and falls

into the Ganges 10 m. above Buxar. Its whole course is about 75 m.

CARANAGASSEM a tn. Indian Archipelago, Isl. Ball, on the strait of Lombok lat. 8° 42' S.; lon. 116° 34' E. (N.) Ships may here obtain water, bullocks, hogs, and poultry. The country around is fertile and well cultivated.

CARANAGAMILLI, a large, shallow salt-water lake, S. Australia, dist. Portland Bay about 50 m. W. the town of Geelong. It is upwards of 90 m. in circumference, but to the S. it is so shallow as to be crossed by the natives for a distance of 15 m. it is deeper to the N.

CARANJA an isl. W. coast Hindoostan, between Bombay and the mainland lat. 18° 53' N. lon. 73° E. It is 4 m. long and 2 broad, and is low and woody excepting two remarkable hills, called Great and Little Caranja Hills, the former near the S. part of the island, the latter on the N. Great Caranja is very conspicuous, being of a tabular form, with a steep declivity at each end.

CARANO a small vil. Austria, Tyrol, prov. of, and 21 m. N. E. Trent r. bank Aven in the vicinity of which are calcareous and saline springs temperature 38 to 40° clear and of an earthy flavour and said to be efficacious in cutaneous affections. Pop. 304.

CARATE a tn. Italy Lombardy prov. of, and 15 m. N. Milan, E. slope of a hill r. bank Adige, here crossed by a wooden bridge. It was formerly fortified, and in its vicinity several engagements have taken place. Silken, woollen, and linen fabrics are woven. Pop. 2383.

CARAVACA, a tn. Spain, prov. of, and 48 m. W. by N. Murcia, on the side of a hill crowned by an ancient castle 1 bank Caravaca, here crossed by a stone bridge. The houses are generally commodious, well constructed and in many cases adorned with iron balconies. Most of the larger streets are wide, paved, and clean there are five squares, the principal of which contains the Government-house, hotel, and prison, and tower all the last a spacious and handsome structure, with an elegant balcony and a central arch, forming an entrance from the square, is to the principal street and into the noble facade. The parish church, a fine specimen of the Louis style, completed in 1600 has a lofty tower of hewn stone its interior is tastefully decorated, and contains numerous monumental and pictorial works of considerable merit. There are, besides several conventual churches and a variety of chapels. The remaining public buildings are two hospitals, a theatre, cemetery and numerous schools. Manufactures.—linen, woollen, and hempen fabrics, paper soap earthenware, copper vessels leather brandy oil and wine. There are also extensive chemical and dye works, and flour mills. Trade.—m. cattle, grain, and manufactured goods. A yearly fair is held for general merchandise. Pop. 20,573. (Madsen)

CARAVAGGIO a tn. kingdom of Italy Lombardy province Bergamo, 24 m. E. Milan, on the Lena d'Adda between the Adige and here. It was surrounded by walls, and defended by a strong castle. These have been recently demolished but the deep fosse filled with water still remains, and six bridges over it gave access to the town which has several churches, an hospital, and a *mont-de-piété*. In the principal church are some good paintings by Campi and near the town is the sanctuary of the Madonna, built in 1574 from the designs of Pollaiuolo Titian, picturesquely situated and adorned with some fine paintings. This town is famous for being the birth-place of the two great painters, both called Caravaggio, a vicario Caldar, the scholar of Raphael and Michael Angelo Morici. The commune is fertile. It produces all kinds of grain in abundance, ~~and~~ scattered over with mulberry trees. Its melons are large and of excellent quality and yield a considerable revenue to the peasantry who cultivate them on their own account, running ground for the purpose. Pop. 6208.

CARAVELJAS, a maritime tn. Brazil prov. Bahia, on a bay of same name into which flows the river Grollas lat. 17° 42' S. lon. 39° 12' W. It is agreeably situated on a rising ground and three of its streets run parallel to the shore. It has two churches, a Latin and a primary school and it exports manioc flour coffee, and fish the former two cultivated extensively in the district. Pop. 10, and dist. 5000.

CARONARA, a tn. Naples, prov. Principato Ultra 17 m. N. N. E. St. Angelo de Lombardi. Pop. 2986.

CARBONNE, a *tu France* dep. *Hauts Pyrénées*, 24 m. N.W. Toulouse, agreeably situated 1 bank Garonne, not far from where it receives the Arize. It has some woollen manufactures, a fulling-mill dye-works, brick and tile works. Its trade is in oil and wool. Pop. 1728.

CARBONNE *par Eng Norfolk* 3038 ac. Pop. 796. **CARBURY** *par Irei Kidare* 47 ac. Pop. 543. **CARIBU** *tu* Spain, Andalus, prov. of and 24 m. S.E. by 8 Cordova. It has narrow and irregular streets, a square which contains the townhouse and prison, a church, store-house, and endowed school. The inhabitants are occupied in weaving and husbandry. Some little trade is also done in grain, wine oil and cattle. Pop. 9398. — (Madox.)

CARCAGENTE, or **CARCAXENT**, a *tu* Spain, prov. of and 28 m. S. by V. Valencia, in a fertile and beautiful plain *r bank*, Júcar. The houses are well built and spacious, forming wide and clean streets. The principal square is large, lined with handsome dwellings and shops, and contains a spacious and elegant modern townhouse and prison. There are likewise a parish church, several chapels, two convents, an hospital, almshouse, cemetery, some primary schools and an extensive palace of the Marquis of Calizada. In the environs are delightful promenades and gardens. Trade — in grain, fruit, and silk. Pop. 7960.

CARLARSONNE, a *tu* France, cap. dep. Aude, intersected by the Aude and on a branch of the Canal du Midi. 53 m. S. Toulouse lat. 43° 12' 55" N. lon. 2° 21' 9" E. L. It consists of two parts, on the opposite sides of the river which is here crossed by a bridge of 10 arches the New Town in a plain 1 m. S. and the Old Town on a hill *r bank*. The former is surrounded by double walls, and has a castle. A portion of the most fine of ramparts and towers is attributed to the Visigoths, and the rest, including the castle seems to be of the 11th or 12th century. The streets are narrow dirty and dilapidated the houses falling to ruin and those that are inhabited tenanted only by the poorest class. It contains the church of St. Lazarus, formerly the cathedral within which near the high altar may be seen the tomb of Simon de Montfort, who led the infamous crusades against the Albigenses 400 of whom were here burnt alive. The modern town forms a striking contrast to the old city. It is cheerful, flourishing, and industrious, consisting chiefly of modern houses in streets at right angles with each other surrounded

The cloth manufactory has long been an important branch of industry the wool being spun, dyed, and woven here. The large fine-woollen cloth manufactory, of which there are several, give employment to 7000 persons. The cloth is exported chiefly to the Levant Barbary and S. America, where it is esteemed for its brilliant dyes. There are also distilleries, tanneries, manufactories of paper soap, woollen coverlets, stockings, linens and sails. A good trade is also done in wine, grain, flour, fruit, brandy leather and hardware. In the time of Caesar Carcassonne was a place of considerable note, and held a high rank among the Narbonnese towns. The Visigoths fortified it, and built some of the existing walls and towers. In 1309 it sustained a memorable siege by the army of familes who had been sent to extirpate the Albigenses. Want of water compelled the latter to capitulate, when scenes of miserable atrocity followed. Pop. 15 960.

CARCELAN a *tu* Spain Murcia, prov. of and 24 m. F. N. E. Albacete at the foot of a hill. The streets are narrow and steep and the only square contains the townhouse prison and a ruined tower. The town also possesses a church, poorhouse, cemetery and two schools. Manufactures — woollen and linen fabrics of and a little wine. There are marble quarries in the vicinity. An annual fair is held in August. Pop. 2019.

CAR-COLETON *par Pyr. Nord* 1200 ac. Pop. 819. **CARCES**, a *tu* France, dep. Var agreeably situated at the confluence of the Issole and Argens 16 m. W. S. W. Draguignan. It has silk manufactures tanneries and distilleries. Pop. 910.

CARDIFF (W. L. L.) *Ceredydd* a *tu* Wales and airport, S. Wales cap. Glamorganshire 1 bank Taff over which there is a handsome bridge of three arches, leading to Swansea, 3 m. S. E. Llandaff lat. (juston house) 51° 25' 58" lon. 3° 10' W. (s.) The principal streets are well built, paved, and lighted with gas, and contain some good houses and shops. But those parts of the town built by the poorer class have a mean appearance. On the N. side is an ancient castle in a tower of which Robert, Duke of Normandy was confined for 18 years and had his eyes put out by his brother Henry I. This castle has been modernized by its proprietor the Marquis of Bute who converted a part of it into a dwelling-house. The church of St. John has a lofty and elegant spire, forming a fine feature in the general aspect of the town. Besides two established churches, there are places of worship belonging to Wesleyans Baptists Independents, Calvinists Methodists and R. Catholics with an infirmary free school and a number of other schools and charities. The other public buildings are a county jail goldsmith and theatre. The town is governed by a mayor six aldermen, and 18 councillors and conjointly with Cowbridge and Llantrisant, the borough returns a member to the House of Commons. There are so manufactures in Cardiff, the inhabitants depending almost exclusively on the shipping and on the coal and iron works in the neighbourhood. The accommodation for shipping being formerly deficient, the Marquis of Bute greatly extended it by constructing a canal and two spacious docks. The commerce steadily on the increase and is already very considerable. In 1862 there entered the port 1942 vessels (ton 539,580) and cleared 4105 vessels (ton 941,388) engaged in the foreign trade and in the same year 2940 vessels (ton 251,665) entered, and 7071 vessels (ton 701,097) cleared. The exports consist chiefly of coal and iron with some tin, grain and other farm produce. Pop. of par. borough (1861) 32,954. (For Correspondent.)

CARDIGAN or **CARDMARTINE** a maritime co. S. Wales, having N. co. Merioneth and Montgomery E. co. Radnor and Brecknock S. Carmarthen and Pembroke and W. Cardigan Bay. Extreme length N. E. to S. W. about 43 m. extreme breadth, E. to W. about 30 m. area, 452,000 ac. The surface of this county like that of nearly all the other Welsh counties, is mountainous and barren, with the frequent occurrence of beautiful and fertile valleys. The mountains are, in general destitute of wood, and present a bleak appearance; some of them attain a considerable height the loftiest, Penllinmon, reaching an elevation of 2465 ft. The soil of the elevated parts is chiefly a light loam, intermixed with sand. The valleys of the lower districts have a brown mould

THE RAMPARTS OF THE OLD RAMPARTS, CARBONNE, FRANCE.

by boulevards occupying the site of the old ramparts. It has several squares planted with trees, and furnished with marble fountains. The modern cathedral and the church of St. Vincent are not remarkable. The Aber public buildings are the *Hôtel de la Préfecture* the prison the *halle* or market, and the public library containing 6000 volumes, derived principally from the *Ab* co. vaults. This town is the seat of a bishopric, tribunals of first resort, and commerce, and has a communal college, primary normal school and theological seminary.

which is extremely favourable to the growth of grass crops. In other parts, the soil is a stiff argillaceous earth, and very sterile. Its geological formation is chiefly a hard slate of the transition series. Near the sea coast are some productive tracts, yielding good crops of wheat, barley, turnips, and potatoes, and in the hilly districts rye is cultivated but barley and oats are the principal crops. The science of agriculture has made little progress here, and does not seem to be improving. Dairy husbandry, however, is well attended to. The breed of cattle, horses, and sheep, is small but the latter is of superior quality and all are hardy. Pigs and poultry are reared in considerable quantity and eggs abundant. The mineral productions are silver lead and copper great quantities of these metals were obtained here during the 17th century but the mines have since much declined in value and many of them, particularly those of copper have been altogether abandoned. Slates are still quarried but they are of an inferior quality. There being no coal in the county turf is the universal fuel. There are no manufactures, unless it be the weaving of small quantities of flannel and coarse woollen stuffs. Gloves also are made in the neighbourhood of Aberystwyth and Tregaron, which with Lampeter and Cardigan are the chief towns, the last being the county town. The county sends one member to the House of Commons registered electors (1850) 2294. Exports—cattle, butter and slaves imports—silks, muslins, and deals. Pop. 70 796.

CARDIGAN a seaport in and par. Wales, cap of Cardiganshire, on an eminence on the E bank of the Telfy, here crossed by an ancient stone bridge of seven arches, between 4 and 5 m. from its embouchure in St. George's Channel, 200 m. W N W London. The town consists of two principal streets, with a number of narrow irregular lanes and alleys formed by mean-looking houses. The church upwards of 200 years old is a venerable structure, with windows in the florid pointed style. The townhall and county jail are also handsome buildings. The ancient castle, the ruins of which occupy a low cliff at the foot of the bridge is famous in Welsh story. Two circular bastions are now all that remains of it. There are places of worship here for various dissenters, a free grammar school two or three charity schools and several schools of other descriptions. The harbour is obstructed by a bar which renders the entrance dangerous in rough weather and consequently seriously affects the trade of the port, which however is coasting is still considerable, though in foreign very trifling. In spring-tides vessels of 800 to 400 tons can come up to the town, but the general trade is confined to vessels of from 15 to 100 tons. Upwards of 10 000 tons of shipping employing above 1000 seamen belong to the port. Cardigan, conjointly with Aberystwyth, Lampeter and Adpar returns one member to the House of Commons. Pop. 4878.

CARDINGTON two pars. Eng.—1 Bedford 6170 ac Pop. 1455.—2 Salop 6712 ac. Pop. 747.

CARDINHAM par Eng Cornwall 9534 ac. Pop. 82. **CARDIOTIERA** a small isl. Grecian Archipelago, belonging to kingdom of Greece, about half way between Sicily and Polyndro, lat. 36 25 N. lon. 25 E. It has a few inhabitants and is chiefly dedicated to the Virgin.

CARDISTON par Eng Salop 2400 ac. Pop. 815. **CARDITO** a vil. Naples, 6 m. N. of the city of Naples. Silk-worms are extensively reared in the vicinity. Pop. 3750.

CARDIVA, or **KARDIVOR**—1 An isl. Indian Ocean, Gulf of Manar N. W coast Ceylon, S. end, is about lat. 6° 25' N. It is about 10 m long and 1 broad, and is mostly low, with sandy patches in some parts, and bushes or trees in others.

—2 An isl. Indian Ocean one of the Maldives lat. 4° 58' N. lon. 73° 55' E. (s.) It is nearly 7 m long a little more than 2 m broad, and is covered with high coco-nut trees. This island gives its name to the channel in which it lies.

CARDONA a vil. Spain Catalonia, prov. of and 45 m. N W Barcelona, r bank, Cardener here crossed by a bridge. It stands on a declivity is surrounded by walls entered by six gates, and is commanded by a strong castle crowning the summit of an adjacent hill. Its streets with the exception of two, are steep but, in general, well paved and clean. There are two squares both planted with trees and one of them containing the large, handsome, and ancient parish church there are also several chapels, a town-house, prison, hospital, small

Vol. I.

theatre, cemetery two convents, and a variety of schools. Manufactures—linen woollen, and hosiery flax, and paper wane, and all Trades—grain, fruit, cattle and milk. About 1 m from the town is the remarkable mass of salt noticed in the article BANCOWA. Pop. 2866.

CARDROSS, a par Scotland, no. Dumfriesshire, r bank, Clyde, remarkable only as having been the closing scene of the illustrious career of the victor of Bannockburn and the restorer of the Scottish monarchy Robert Bruce. About 1 m. from Dumfriesshire on the road to the village or hamlet of Cardross, that monarch built a castle forming the surrounding lands into a park. Here he sought relaxation in the chase and here he died, June 7 1329 his remains being carried to Dunfermline, where they were interred. No vestige of the castle now remains, but the eminence on which it stood retains the name of the Castle-hill. Pop. 4257.

CAREBY par Lag Lancashire 1454 ac. Pop. 108. **CARENAGE** (Cura) or **PORT CAUREN**, a tn. and port, W India, at St. Louis. It is the capital of the island stands at the head of a deep irregularly formed harbour surrounded by hills, on the N W coast lat. 14° 4' lon. 81° 1' W (s.). The port has deep water with good anchorage and shelter from all winds. Red mullet, and various other sorts of fish, may be caught here in abundance by hook and line.

CARENTAN (sua. *Carentanum Usellorum*) a maritime tn. France, dep. Manche 14 m. N N W St. Ló is the midst of unwholesome marshes, l. bank, Tante lat. 49° 15' 24' N. lon. 1° 14' 30' W (s.) It is built with tolerable regularity but the houses, in general are indifferent. It has a castle and fortifications contains a handsome church surrounded by a spine manufactures some lace and cotton goods and has a trade in cattle, horses, hemp, flax, cider butter and honey. Small coasting vessels come up to the town. Pop. 2009.

CARESTON par Scot Forfar 8 m by 1 m. Pop. 207. **CARGILL** par Scot Perth 3 m by 4 m. Pop. 1039.

CARGIN par Ind. Galway 2507 ac. Pop. 1043. **CARHALD** (sua. *Carvalum*) a tn. France dep. Finistere on the Ill. ers, 44 m. E by N Brest. It stands on a high hill and forms the central point of Finistere. Six main roads leading to Brest Quimper Chateaulin Yampar St. Briac and Morlaix meet here. The parish church is said to date from the 6th century and the town abounds in old houses, with projecting cornices and carved timber work. There are some tanneries and paper works. Hats, linen and drapery are also manufactured. Pop. 1827.

CAREHAM par Eng Northumberland 10 362 ac. Pop. 1363. **CARIAMATON** par Long Somerset 9734 ac. Pop. 872.

CARIAMATO a tn. Peru, 16 m. S. Pisco lat. 11° 0' S. lon. 5° 45' W. a little S. of Lake Colchibayo est. and 13 087 ft. above the level of the sea.

CARIACO or **SAN FELIPE DE AUSTRIA** a seaport in Venezuela prov. nt, and 40 m. E by N Cumana, at the head of the Gulf and near the mouth of river of same name on an extensive fertile plain, covered with plantations lat. 10° 30' N. lon. 89° 40' W. The climate is hot and unhealthy. Cotton, sugar coffee, and sugar are raised the first of which is of excellent quality. Importation of slaves is prohibited. A good deal of English rum used to be smuggled in here. Pop. 7000.

—The Gulf near the mouth of which has Cumana, is about 88 m. long by 5 to 10 m broad lying nearly E to W. There is good anchorage in all parts of it, the deepest water being 40 fathoms. On either side of the land presents an amphitheatre adorned with the most beautiful and varied vegetation. Near the entrance are some mud banks, frequented by numerous sea fowl.

CARIACO or **CARIACO**, one of the Windward Islands, Grenadine group between St. Vincent and Grenada 40 m. S. the former and 20 N the latter lat. 12° 30' N. lon. 62° 30' W. It is the largest of the Grenadines, being about 21 m. in circumference, but of irregular form. It has two bays on its N side, and contains a town named Hillsborough.

CARIATI (sua. *Castellum*) a seaport in Naples prov. Calabria Ultra, 16 m. S.E. Rossano, on a high promontory washed by the Ionian Sea. It is surrounded by ruinous walls, and has a dilapidated castle. It is the seat of a bishopric, and contains a cathedral, four other churches, a doctress seminary and a house of refuge. Silk worms are extensively reared, and the best madder of Calabria is produced in the vicinity. The coasts abound with fish. Pop. 2144.

CARIBBEAN or **CARIBBEAN SEA** that portion of the N Atlantic Ocean, lying between the Caribbean, or Lesser, and Windward Islands on the E, Guianas on the W., the islands of Haiti or St. Domingo and Cuba on the N., and New Granada and Venezuela on the S. It communicates with the Gulf of Mexico by a passage of about 120 m. in width, between Cape Cincinco in Yucatan and Cape St. Antonio, the most W. point of Cuba. Its shores are generally high and rocky and contain some gulfs of considerable extent. Being but little unobscured by rocks or islands, its navigation is, for the most part, clear and open.

CARIBBEAN, or **LESSEER ANTILLES**, usually divided into the Windward and Leeward Islands a section of the West India Islands (see sec).

CARIFE, a vil. and com. Naples, prov. Principato Ultra, 10 m. S.S.E. Anagni. It contains a collegiate church, high school convent hospital and almshouse. Pop. 2556.

CARIGNANO (anc. *Carnesano*) a tn. Italy Piedmont, prov. of and 11 m. N. Turin. It has a fine view from a wooden bridge. It is surrounded by old walls, and has a handsome square ornamented with arcades, a fine church four convents, a college, two hospitals, some silk spinning mills and a sugar refinery. Preserved remains of excellent quality. It is prepared here. From this town is named a branch through there are several manufactures of woollen, cottons, silk stuffs, &c. most of which are in Klagenfurt.

CARINATA or **NAKATA**.—A N. uninhabited is. In Jan Archipelago, off S.W. coast Borneo lat 1° 3' S. lon. 105° 51' E. (N.) about 12 m. long. It is lofty one of its peaks being 2264 ft. high well wooded, and was formerly a great resort of pirates. — *Carnata* or *Philon Passage* the passages bounded by Carinata and the islands adjacent to the S.W. part of Borneo and W. by Sulu. It is also called the Outer Channel and is taken by ships from the Malacca Strait bound by the E. passage to China or the Moluccas after October when the N.W. monsoon prevails S. of the equator.

CARINATA, a name at times given to that part of the China Sea lying between Borneo, Lamboula, and the Malacca peninsula.

CARIMON JAY, a small is. Indian Archipelago 20 m. in circumference lat 5° 50' S. lon 110° 34' E. It is high and woody with an elevated hill in the centre. Adjoining it are several small islands, some of which abound with deer and among which ships may anchor in 20 to 24 fathoms and obtain wood and water. The Dutch formerly had an establishment on the island, to prevent piracy.

CARIMON, two is. Strait of Malacca, called Little Carimon and Great Carimon lat 1° 8' N. lon. 103° 30' E. Little Carimon is about 2½ m. long by 1 broad. It is high and rocky peaked in the centre, and covered with trees. Great Carimon, separated from the S.W. side of Little Carimon by a narrow passage, is about 9 m. long. Near its N. end are two lofty peaks, but with exception of these, it consists of low level land. Off its N.E. point vessels can anchor in 5 to 6 fathoms. It is occasionally frequented by Malay and Bugis boats.

CARINENA, a tn. Spain, Aragon, prov. of and 30 m. S.E.W. Saragossa, on the high road from that city to Daroca. It has several squares, a townhouse, church, chapel prison, hospital cemetery and three primary schools. Some little trade is done in cattle grain, fruit, and oil. Pop. 1946.

CARINERENHA, a tn. Brazil prov. Bahia, on the frontier of prov. Minas Geraes, at the junction of the river of same name with the Rio San Francisco. It has a church and an extensive district. Pop. 4000.—The forest Caribolombe runs in prov. Goias, in the Serra Tebeteig, flows E. forming the boundary line between provs. Bahia and Minas Geraes, and falls into the Rio San Francisco lat. 14° 30' S. lon. 44° 42' W. Total course about 160 m., exclusive of windings.

CARINI a tn. Sicily prov. of and 11 m. W.N.W. Palermo beautifully situated on river of same name, near its mouth. It has a Gothic castle, with several churches and convents. Near it are the ruins of the ancient Hypania. Fishing is the chief employment. Pop. 1000.

CARINOLI a tn. Italy Naples prov. of and 19 m. W.N.W. Lombrati, at the foot of Mount Capri, in an unhealthy district. It was formerly an Etruscan town, and has a handsome cathedral a parish church, extensive cemetery, and a Franciscan convent. The surrounding district pro-

duces wine of good quality. The town is said to occupy the site of the *Fero Claudio*, built by the Lombards in 1008. Pop. 5455.

CARINTHIA (German, *Kärnten*) a duchy Austria, kingdom Illyria, between lat. 46° 24' and 47° 7' N. and lon. 12° 35' and 15° 10' E. bounded N. by Salzburg and Styria, E. by Styria, S. by Carniola and W. by Italy and Tyrol. Area, 8016 sq. m. It is extremely mountainous, generally sterile, and one of the most thinly populated provinces of Austria. The arable land does not exceed 390 000 acres but there are some fertile valleys, and a considerable extent of rich pasture land. It has several rivers and lakes. Of the former the principal is the Drava, and of the latter the lake of Worlich or the Osnacher See, and the Millstätter See. All of them abound with fish. The country does not yield corn enough for the consumption of the inhabitants, who import the deficiency from Hungary. The grain most extensively cultivated are rye and oats. Some wine is produced in Lower Carinthia, but it is of inferior quality. Horned cattle sheep, and horses are raised in considerable numbers, but the wares of Carinthia are the main sources of its wealth. The chief of these are iron, lead and calamine. Various kinds of precious stones are met with. The operative industry is chiefly confined to the working of the metallic ores though there are several manufactures of woollen, cottons, silk stuffs, &c. most of which are in Klagenfurt.

Carinthia formed part of the empire of Charlemagne, and afterwards belonged to the Dukes of Styria. It subsequently passed through various hands and finally became an appendage of the Austrian crown in 1231. In 1809 it was annexed to the empire of Napoleon but was restored to Austria in 1814. In the year after it was formed into the circles of Klagenfurt and Villach. It has its own diet composed of four estates—the dignitaries of the church the aristocracy the corporate towns and the representatives of towns and places with markets—but its internal administration is subordinate to the Government authorities at Ljubljana. The principal towns are Klagenfurt the capital and seat of the criminal and other judicial courts and Villach. The inhabitants are represented as indolent and superstitious and mostly R. Catholics. Pop. 484 885.

CARIFI or **CARIRE**, a tn. Venezuela, prov. of, and 40 m. S.E. Caracas, in a fertile valley of same name. In the valley is a cavern the opening into which is 65 ft. broad and 7 ft. high, which diminishes it preserves to the distance of 1548 ft. inward. Pop. 25 and value about 5000.

CARIBROOK, a vil and par. England co. Hants.—The village is pleasantly situated at the foot of a hill near the centre of the Isle of Wight, 1½ m. S.W. Newport. It was formerly a place of considerable importance having been a market town and the capital of the island till superseded by Newport. The parish church is a fine ancient structure, with a tower containing a peal of eight musical bells and there are, besides, places of worship belonging to Independents, Methodists, and other dissenting bodies. The inhabitants are principally employed in agriculture. Caribrook owes its former importance to its proximity to the seat of the same name, on the top of a considerable eminence overlooking the village, and now a heap of ruins. It is of high antiquity and is supposed to have been a fortress anterior to the Roman invasion. The latest additions are said to have been made to it in the time of Elizabeth. Here Charles I. was confined for 13 months previously to his trial and execution. The castle and grounds occupy a space of about 20 m. The extensive farms a pleasant promenade of more than 1 m. in extent. Besides objects of historical interest and curiosity the castle contains the official residence of the governor of the island, a respectable mansion with two spacious ball-rooms. A short distance N.E. of Caribrook is a neat row of houses called the New Village. Area of par 7400 ac. Pop. 6712.

CARLEE par. Eng. Lincoln 1020 ac. Pop. 549.

CARLEE or **CARLI**, a small vil. Hants, prov. of, and 40 m. S.E. Basing near which are some remarkable obelisks. The interior of the cathedral nave is 126 ft. long and 48 broad, and is supported by 21 columns of which are of elegant and beautiful workmanship each consisting of a large cap resembling a bell, finely carved, and surmounted by two elephants, with their trunks entwined, and each carrying two male and one female figure.

On several of the columns are inscriptions, from one of which it would seem that this temple was built A.D. 170. It is considerably at its termination, and is supposed to have been the work of Buddhists.

CARLENTINI is a Slavic Val-de-Note 20 m. N.W. Syracuse; built by Charles V for the head quarters of the Italian army and destroyed by the earthquake of 1693. It is now a place of little importance. Pop. 2502

CARLET is a town, prov. of, and 18 m. S.W. by S. Valencia, r bank Magla. The streets are clean, wide and lined with regularly and well-built houses. The town has six squares, a parish church two chapels, a convent, spacious townhouse prison, cemetery and two schools. Manufactures: soap, brandy oil, and wine, which with grain, salt-fish, fruits, and cattle, constitute the sole traffic of the place. Pop. 8884.

CARLTON several places, England—1 *Carlton, St. Peter par Norfolk*; 772 ac. Pop. 187.—3 *A. township and vil. W. Riding, York*. The villa is situated on a gentle eminence 2 m. S.W. Shipton consists of four streets, straight and kept in good condition. Greater part of the houses well built of stone and slated. Its church is a small Norman structure, and it has several free schools and other charities. The inhabitants are principally employed in the cotton manufacture. Pop. of the township, 214.

CARLINGFORD a seaport on par Ireland, co. Louth. The town is beautifully situated S.W. side of Carlingford Lough or Bay at the base of an extensive range of mountains, which terminates at this point, 9 m. S.N.E. Dundalk. It has rather a poor and desolate appearance. The lough is about 10 m. long inland and about 2 broad. Near the mouth is a bar with only 9 ft. water at low tide, but on which the tide rises 16 ft. Once inside the bar the lough may be navigated for 6 m. by vessels of the largest size at all times at high tide, vessels of 18 ft. draught may proceed 3 m. farther to Warren Point, and by those drawing 14 ft. to 4 m. farther to Rathfriland, where is the entrance of the canal which has a depth of 11 ft. to the town of Newry. On Black Horse Island, at the entrance to the bay is a fixed light, 104 ft. high, lat. 54° 12' N. lon. 6° 4' W. The bay being well stocked with oysters dredging for them constitutes the chief occupation of the inhabitants. The only trade of Carlingford consists in exporting a little corn and provisions to Dublin. Pop. 1110. Area of par 19 984 ac. Pop. 943.

CARLISE an anc. city and inland port, England, co. Cumberland 263 m. N.N.W. London, about 8 m. from the Scottish border, pleasantly situated on a gentle eminence at the confluence of the Eden, Caldew and Petteril the first

of the modern houses are handsome and, being built on a plain, are gradually imparting an appearance of regularity to the city. The cathedral, which is situated on elevated ground, near the centre of the town is one of the principal objects of interest. It is of Saxon origin, but has received many additions and embellishments throughout successive generations some parts of the building are beautiful, and the whole has a venerable and imposing appearance; the E. window which is 48 ft. high by 30 broad and partially filled with painted glass, is one of the finest specimens of the kind in England. In the N. aisle are preserved the remains of the celebrated Dr. Percy. The castle another object of interest from its historical associations, is situated on a slight eminence overlooking the Eden, at the N.W. angle of the city it commands a fine view and is still maintained as a garrison fortress being the only remnant of the ancient military character of the city the old walls and bulwarks having now almost entirely disappeared. Amongst the literary and educational institutions of Carlisle are—an academy for the improvement of the fine arts a library and philosophical institution with a museum and theatre for lectures a grammar school, several national and Sunday schools two subscription libraries and two new-rooms likewise three reading rooms with libraries attached for the use of the working classes. Its church accommodation, besides the cathedral consists of the parish churches of St. Mary and St. Cuthbert with their chapels of ease, Trinity church and Christ church and 12 places of worship for various religious denominations. It is the seat of a bishopric, founded by Henry I. and an extensive ecclesiastical jurisdiction over 95 parishes. The dignitaries, besides the bishop, are a dean four prebendaries and eight minor canons. The charitable institutions are numerous and well supported, and include a commodious infirmary fever hospital and dispensary. The buildings appropriated to corporate purposes are the town hall guildhall, and council-chamber. 11 a courts of justice, where the assizes are held, and the county jail are situated at the S. entrance of the city and were erected after a design by R. Smirke, R. A. at a cost exceeding £100,000. In the area, in front of the courts, a fine marble statue of the late Earl of Londonderry, by M. L. Watson is erected. Many of the public offices are exceedingly handsome. Carlisle is the seat of various, and of some extensive, manufactures of which cotton is the principal embracing the weaving of checks and gingham calico-printing, and the manufacture of cotton twist. The making of hats is also carried on to a large extent. Carlisle has long been famed for its manufacture of whips and fish hooks. There are, besides a woollen manufactory several dyeworks, tanneries iron foundries, brasseries, marble-works and an extensive helmet manufactory which employs upwards of 200 hands. It has a considerable coasting trade, by means of its canal which extends from the town to Bowmans, on the Solway Firth a distance of about 11 m. and is navigable for vessels of from 80 to 100 tons burthen. The gross amount of customs duty received at the port for 1845 was £28,335 being an increase of nearly £2400 on the preceding year. In 1848 the receipts had increased to £48,063 and in 1849 they were £41,071. The station of the Lancaster and Carlisle Railway Company (in connection with the London and North Western) is situated near the courts and is a handsome, ornamental building with a portico supported by a range of pillars and is likewise jointly completed by the Caledonian Glasgow Dumfries and South Western Maryport Carlisle, and Whitehaven Junction Railway Companies. The Newcastle Railway Station is in London Road.

Carlisle was originally a Roman station and then called *Leguonum* abbreviated by the Saxons to *Lael* to which was put the prefix *Cæsar* or *city* thus making *Cæsar-lael*, whence Carlisle. It was destroyed by the Danes in the 9th century and subsequently restored by William Rufus, who built its castle. From this period it was a frequent object of attack in the long-protracted wars between England and Scotland, and suffered severely on many of these occasions.

ENGRAVED BY W. J. MACKENZIE. FROM A SKETCH BY W. J. MACKENZIE.

here crossed by a handsome stone bridge of five large, and the same number of smaller arches the Caldew is crossed by two bridges, and the Petteril by one. The town is somewhat irregularly built, but its principal streets are spacious, well-paved, well-lighted and it is amply supplied with water. A number

Having declared for Charles I. he was subjected to severe persecution during the civil wars of that period also. In 1745, it surrendered to Prince Charles, but was retaken by the Duke of Cumberland, when a number of the officers who formed the garrison were executed as traitors and their heads exposed on the gates and walls of the city. It gives the title of Earl to a branch of the Howard family. Returns two members to Parliament constituency (1861), 1000 Pop. (1 '70) when taken by the late Dr. Hueston 7477 (1841) 23 012 50 310.

CARLINLE, a tn. L. Meade, Pennsylvania, cap. Co. Cumberland, 15 m. W. by S. Harrisburg, mostly and regular built, chiefly with brick or stone and has a college with a library containing 11 000 vols., nine churches, a courthouse, and county offices, a market house a bank, young ladies seminary an academy and 16 schools. The Cumberland Valley railroad, from Harrisburg to Chambersburg, passes through it. Half a mile from the town are the U. S. barracks, built in 1 '77 capable of holding 2000 men, and provided with a cavalry school. It has six theatres, three drill-houses, three printing offices, two breweries, and carries on a considerable trade. Pop. 4351.

CARLISLE, (N.W.) a maritime vil., Lower Canada, Camp district, N. side Bay of Chaleur. It is regularly laid out, and carries on the fishing.

CARLU, a small isl. Russia, Gulf of Bothnia, 18 m. W. Luleå, in Finland lat. (W. point) 65° 2' N. lon. 24° 35' E. (L.).

CARLUHAGO or **CARLUHAGO** a tn. Austria, Croatia, a rich, Thaur Save on the E. of the strait which separates the island of Pag from the mainland. It is fortified and contains a R. Catholic parish church, and a cloister. Pop. 960.

CARLUHOTT, a tn. kingdom of Italy, isl. San Pietro near the S.W. coast of isl. Sardinia. It is defended by walls and the port is commanded by a castle on a neighbouring height. There are extensive salt-works in the vicinity and the coral and anchovy fishery are carried on by the inhabitants. Pop. 2500.

CARLOS (SPAN.)—1. A tn. Venezuela, prov. Carabobo 130 m. S.W. Caracas, on the Acuzco. It is large, handsome and well laid out, and before the wars of independence was one of the most populous cities of the Capitan-generalship of the Caracas. The surrounding savannahs have large plantations of sugarcane, coffee and cotton and rear vast numbers of oxen, horses, and mules. Pop. 16000—2. A tn. Chili, cap. prov. and on the N.E. coast of isl. Chiloé. It is fortified and an excellent harbour and is the principal entrepôt of the island, exporting planks, bams, and woollen stuffs.—3. A port, N.W. coast, E. Falkland Island, near the N. entrance to Falkland Sound, with anchorage for large vessels, and where fuel and water may be obtained. lat. (Penguin Head, S.W. summit) 51° 27' S. lon. 49° 15' W. A river of same name flows in at the head of the anchorage forming the port.

CARLOS (SPAN.) a tn. Spain. See CARRAGA.

CARLOTA, a L. Spain, Andalusia, prov. of and 17 m. S.W. from C. or Iova. The principal streets are lined with trees, and the houses, many of which are detached, are, in general, tolerably well built. The town has two squares, an old palace, now serving the double purpose of townhouse and theatre, a parish church, three chapels, three schools, a prison, barracks, and cemetery five dwell-houses, four soap-works, seven oil-mills, and a number of wine-presses. A small trade is done in cattle and grain. 1. pop. 2252.

CARLOW, an island on Ireland, prov. Leinster, having W. and S.W. co. Kilkenny, N. Queen's co., Kildare and Wick low and E. and N.E. co. Wicklow and Wexford, extreme length N. to S. 29 m. extreme breadth, at the N. end about 16 m. at the S. extremity it terminates in a point, gradually diminishing from 5 m. to less than a quarter of a mile. Area, 211 238 ac. of which 64 059 are arable, 81 249 uncultivated, and 627 plantations, 1065 wooded wastes. The surface generally consists of gentle undulations, excepting in the N. where it rises into a mountainous ridge, whose highest summit is 2604 ft. above the sea. Although this part of the country presents a sufficiently elevated and barren aspect, there are there in which are numerous broad and fertile valleys, and where the hills are cultivated to their summits. Dairy husbandry is carried to a greater extent in this county than perhaps in any other in Ireland. The principal produce is

butter of a superior quality; very little cheese being made, and that only for domestic consumption. Wheat, barley, oats, turnips and potatoes are successfully cultivated, and are the principal crops, but flax, hemp, rape, vetches, &c. are also grown, though to a limited extent. Agriculture is in a comparatively advanced state here being much more so than in any of the adjoining counties, while the implements employed are of the most approved kind, and the staple trade is in agricultural and dairy produce, of which large quantities are exported. Carlrow is divided into seven baronies—Cader Forth Idroma, E. and W. Rathvilly and St. Mullin's Lower and Upper, contains 47 parishes, and sends three members to the House of Commons—two for the county, and one for the borough of Carlrow. Pop. 68 775.

CARLOW, a port town and cap. of above co., pleasantly situated on l. bank barrow 24 m. S.W. Dublin, with which it is connected by a railway. It has a neat and cleanly appearance, and has upwards of 14 respectable streets, of which the two principal intersect each other at right angles and it is increasing in size. A bridge of four arches leads over the barrow to the suburban village of Greigue in Queen's County. The principal public buildings are the parish church an old edifice, with a handsome modern spire, the R. Catholic cathedral church, an elegant structure and the R. Catholic college a plain, but spacious building. There are also barracks, a lunatic asylum a handsome courthouse a jail and an infirmary with numerous charity schools and charitable institutions.

Carlrow is the principal mart for the agricultural produce of the surrounding country and carries on an extensive trade in corn flour and British herring consumption by the barrow with the ports of Ros and Waterford and with Dublin, both by a canal and by railway. There are in the town some extensive flour-mills, a large malting establishment, two breweries and a distillery. It sends one member to the House of Commons. On a rising ground on the S. side of the town where a small stream, called the Barrow, falls into the barrow stand the ruins of the ancient castle of Carlrow formerly a place of great strength and still preserving a very imposing appearance. Pop. 6121.

CARLOWITZ, or **KARLOWITZ**, a tn. Austria, beloved circle of and 7 m. N.E. Peterwardein, l. bank Danube well built but much overgrown stretching along the banks of the river like a large village rather than a town. The best part is that which joins the archiepiscopal palace. It contains one Greek cathedral, two other Greek churches a R. Catholic church a gymnasium, a Greek theological seminary and lyceum, a German upper school a national school and an hospital. It is the seat of the Greek Metropolitan Archbishop, the head of the church of the dissenting Greeks in a tn. Austrian dominion. The palace of the archbishop contains a valuable library. Carlrowitz is a free community and is governed by civil magistrates consisting of an equal number of R. Catholics and Greek members. Though within the military frontier yet its inhabitants are exempted from duty that they may devote themselves to trade and manufactures. An excellent wine is produced on the hill district between Gamsnitz and Carlrowitz. Scourge is caught in great quantities in the Danube, close by the town. Peace was concluded here between Austria and the Turks in 1699 and here too, Prince Eugene defeated the latter in 1716. Carlrowitz is a station for the steam-boats navigating the Danube. Pop. 5600.

CARLSBAD or **KARLSBAD**, a tn. Bohemia, circle, Ellbogen, 70 m. W.N.W. Prague, in a romantic narrow valley on the small river Tepl near its junction with the Egge. Some of the houses are built far above the level in recesses cut out of the rocky and precipitous sides of the valley. The Tepl is crossed by six bridges, some of them mere pathways and along its banks are the two most spacious streets. A monument of Charles IV. which stands in the market-place, the high church, an hospital and a granite bridge of one arch across the Tepl are the only objects in the town worth noticing. Carlsbad is the most celebrated watering-place in Germany and its springs the hottest in Europe. They were known in the seventh century but were lost sight of till 1347 when according to a tradition of the country they were rediscovered by Charles IV. whose attention was drawn to the spot, while hunting, by the cries of one of his hounds that had fallen into a hot spring when pursuing a stag. He subsequently established regular baths here, to which he gave his name, and bestowed

on the borough certain rights and privileges, which it still retains. Carlsberg is said to stand over an immense subterranean reservoir of boiling water the depth and extent of which is unknown, although several attempts have been made to ascertain these points. Holes are bored in the ground in different parts of the town to allow the ascending vapours to escape, as, without such precaution serious explosions would occur. These holes must be cleared out every three months, as they are continually filling up with concretions of lime deposited by the waters. Substances immersed in the Sprudel Spring get coated with this lime, which is so hard that it admits of being polished. This spring is covered with a solid mass of masonry to prevent accidents from the expansive force of the steam below which forces up the water in jets of 3 and 3 ft. high. Its temperature is from 165° to 168° Fah. The Hügels Spring has the same degree of heat. The other springs are the Bornherde, 145 to 157 the Neubrunnen 144 the Miltbrunnen 138° the Markbrunnen 135 the Theresienbrunnen 131 the Schlossbrunnen, which disappeared in 1809 and reappeared in 1833 131 the Spital well 125° and the Felsenbrunnen used for shower-baths, 97 Fah. It has been calculated that the whole of the springs yield 1 925 180 gallons of water per day of which the Sprudel and Hügels alone supply 1 689 300 gallons. The principal chemical ingredients of the two latter springs are carbonate of soda, sulphate of soda, (Glauber salt) chlorine, and sodium. They are chiefly efficacious in the removal of complaints of the liver kidneys, &c. A salt, known by the name of *Sal Carol Henrico*, is produced from the waters of these springs by evaporation. There are here some thriving manufactories of articles in steel and brass, of needles and lacquered ware and around the town a number of pleasant walks, and some elevated points, from which extensive views are obtained. Carlsberg was the favourite residence of Goethe Hoffman and Werner. The permanent population is about 8000, to which about 4000 strangers are added in the summer season.

CARLSBURG or **KARLSBURG** a fortified town, in Austria, Transylvania, on Wassenberg's bank Maros, 83 m N W Hermannstadt. lat. 46° 0' 50" N lon. 28° 34' 29" E (n). It consists of an upper and lower town the former built on a hill and the latter in a valley. A bridge, 210 paces in length, crosses the Maros from the lower town. The citadel built by Charles IV is surrounded by a wall with seven bastions. The principal gate is finely sculptured. The town contains two R Catholic churches, one of them the cathedral church of the bishop of Transylvania, possessing a number of ancient monuments a Lutheran church, two synagogues two monasteries the residence of the bishop of Transylvania a canon's college containing the archives of the province the royal mint where the gold and silver obtained from the mines of Transylvania is purified and coined the observatory in which is a good collection of instruments and an excellent library an arsenal barracks &c. There are also a theological college, a R Catholic gymnasium a normal school and an hospital. The manufactures of the place are insignificant, with exception of saltpetre, which is considerable. The Jews here enjoy under the special protection of the bishop, a perfect equality of civil rights with the other citizens, a privilege denied them in every other part of Transylvania. Half a mile from Carlsburg on the Maros is the Maros Puerto, the chief shipping place for the Transylvanian rock-salt. Carlsburg occupies the site of the ancient *Apylon*. Several Roman antiquities have been found in it. Pop. 12,800.

CARLECRONA or **KARLSKRONA** [Charles's crown] a seaport in Sweden, m.p. 110 or 60 of same name, on the rugged mt Trotte's but some smaller isolated rocks, but one noted with the contiguous mainland by several long bridges lat. 56° 42' N lon 15° 25' 30" E (n). It is well built, and has uncommonly broad though sometimes hilly streets, three churches, a townhall freemasons' house, and school-house but it suffers from want of good water for domestic use, which has to be brought from Sykkaby distant about 3 m. The trade has much fallen off, though sugar refining, and the manufacture of tobacco are still carried on. The harbour in which the Swedish navy is stationed, is one of the best in Europe; it has three entrances of which only one is suitable for the larger war vessels and there are two docks, the old and the new a royal shipbuilding yard artillery park, arsenal, anchor forge, and a model room, con-

taining models of various kinds of vessels several of which were prepared by the hand of the well-known Chapman, of whom there is here a marble bust. The entrance to the harbour is defended by the two forts Drottningholm and Kongsholm. The town was made the Swedish marine station and arsenal by Charles XI. in 1680. It thenceforth took his name. The admiralty offices however are still located at Stockholm. Pop. 15,466. — **THE LAK or COUNTRY** also called *Zickings* is the smallest in Sweden area, 1193 sq m. It is bounded, N by Wexio and Kalmar W by Christianstad and E and S by the Baltic. It is hilly but not mountainous granite and granite are the prevailing formations between the hills are fertile valleys, and a strip of low land runs along the coast. In some parts the soil is sandy in others clayey but generally it is fertile yielding potatoes and rye plentifully. Oats, peas, and wheat are also cultivated and, in some localities, buckwheat. Cattle are reared to some extent and garden culture is attended to by the peasants. Wood is still plentiful consisting chiefly of oak beech fir and birch and the fisheries afford a considerable amount of employment. Several islands belong to the lak and some of them are thickly wooded. Pop. 77 609.

CARLSHAMN [Charles's haven] a seaport in Sweden lat. 56° 10' 15" N lon 14° 52' E (n). It lies at the end of a beautiful valley is pretty and regularly built, and its square market-place, planted on all sides with trees, has a fine appearance. It has two churches, an elegant townhouse, a good harbour and an active trade. Wood of various kinds, with oak and beech staves, constitutes the chief exports. The manufactures are—mill-cloth sackings hats tobacco, leather and there are dyeworks, soap-boilers, and a shipbuilding yard. Pop. 4406.

CARLSBOFF an mt N 10° lat. 15° 40' N lon 14° 38' W (n). It is about 8 m in circumference has a lake in the centre, and was discovered by Roggewein, the Dutch navigator in 1728.

CARLSRUHE or **KARLSRUHE** [Charles's rock] a city esp. grand duchy of Baden on a fine plain, 4 m. S bank Rhine lat. (Schloss) 49° 0' 00" N lon 8° 24' 44" E (n). It is in the form of a wheel, of which the dual palace is the

centre or nave from which 32 openings radiate. These were originally and many still are, mere avenues leading to the dual residence, but more than a third of them are now lined with buildings, and converted into streets, which gives the town the wheel or fan like form by which it is characterized. The streets are wide well paved well lighted and furnished with foot-paths. The houses are built in a variety of styles, and many of them exceedingly handsome. Karlsruhe is, in part, walled, and has seven gates, one of which the Brühliger is a beautiful specimen of architecture. There are five principal squares, 10 one of which, the market-place, is a monument of red sandstone, erected in memory of the founder of

the city who lies buried beneath. The grand ducal palace, or Schloss, is built in the old French style, and consists of a main-building or centre, and two wings. Extending from these are, on one side, the orangery and hot houses, on the other the stables and riding school. From the turret of the palace, called the *Blüthenturm*, a fine view of the town and surrounding country is obtained. Among the more remarkable public buildings are the Protestant and the Catholic churches, built by Weinbrenner, the synagogue, the palace of the Dowergo Margravine of Baden and the polytechnic school, in the style of the Middle Ages. The Protestant church founded in 1807 is built in the pure Roman style. The Catholic church is adorned with a handsome portico supported by eight Ionic columns, and lighted by a cupola 100 ft. high, and of the same width. The synagogue is in the Oriental style. Besides the two palaces mentioned, there are several others, belonging to the nobility deserving of notice. There are also the townhall, the town mint, and the house of the Legislative Assembly post-office, infantry and cavalry barracks, arsenal, cannon and bell foundry and several hospitals one of which was founded by Rutila, the celebrated London tailor who endowed it with 100,000 florins (£8,000). The theatre, another handsome structure, was destroyed by fire in 1847 when many lives were lost. Connected with the ducal palace are a library consisting of 80,000 volumes, and containing also many valuable MSS., a cabinet of coins and a museum of natural history including a great variety of fossil remains. There is also a public library containing 90,000 volumes, and a botanic garden. There are numerous elementary schools, Protestant, Catholic, and Jewish. The more special schools are the polytechnic, veterinary military, evangelical, normal, and music. The manufactures are—chemical stuffs, machinery (including locomotives, tobacco playing cards, jewellery, carpets, cloth, mustard, and cottons), and a considerable amount of trade is carried on by means of the Rhine, and of the railways which connect the city with Frankfurt-on-the-Main, with France, Switzerland, &c. (Austria) is a modern city its foundation having been laid in 1745 by Charles William Margrave of Baden, in a locality that served as a hunting rendezvous. Pop. 22,619 of whom 14,568 are Protestants and 8081 Catholics.

CARLSTAD in Sweden, has of same name N shores of Lake Venern, on an island formed by the two mouths of the Klar and connected with the mainland by a bridge across either stream, one of which is the largest and most beautiful stone bridge in the kingdom. It is beautifully situated, regularly built, is the seat of a bishop, and has a cathedral, gymnasium, town-house, freemasons' hall, theatre and small harbour. Pop. 7108.—The lake bounded N and W by Norway N.E. by Fala Mts., E. by Ornsjö, S. by Mariestad, and W by Wenersborg area, 6,588 sq. m. consists of several valleys generally lying N.W. to S.E. and has numerous streams and lakes. Though hilly it is not mountainous, its highest points being barely 1000 ft. high. Oats and rye and to a less extent other kinds of grain are cultivated and cattle reared, and wood is exported from the numerous forests of the country. Pop. 189,617.

CARLSTADT [anc. *Carolsburgum*] a town, Austria, Croatia, circle, Hither Save, on and 34 m. N.W. Agram, agreeably situated on a perfectly level and richly-cultivated plain, near the junction of the Kulpa, Kruska, and Dobra. It is surrounded with walls, flanked with bastions, and consists of the town proper and the citadel, together with the suburbs of Dubovica, which is entirely built of wooden houses the proprietors having been allowed to erect them on the understanding that, in the event of an enemy appearing, they are to be burnt or torn down at a moment's notice. Carlstadt, though not a place of great strength, used to be considered as the bulwark of Croatia against that angle of the Ottoman empire which is called the Trochæne Gorge, or Irvy Frontier. It is tolerably well built, and contains five Catholic churches, and a Greek one united through a Franciscan cloister barracks, and armoury for 30,000 stand of arms, a gymnasium a head and a girls school, and a civil and military hospital. It has almost no manufactures, but the transit trade is considerable. Pop. 6000.

CARLI K.K. par Scot. Lanark 8 m by 4½ Pop. 6283. **CARMAGNOLA** a town in Italy Lombardy, prov. of and 1½ m. S.E.E. Turin, 2 m from 1 bank Po. It has two suburbs and streets tolerably well laid out, some of them, and also the public square having arcades covering the footpath. It also has 5 churches, four convents and an hospital a good trade in silk, being linen, grain, and cattle and animal furs well frequented. In 1691 and 1796, it was taken by the French. Pop. 3500.

CARMATHEN CO. and in Wales. See **CARMARTHEN**. **CARMATHEN**, or **CARMARHAN** a vil. France, dep. Tarn, 1 bank Cèze, 9 m N. Alby. Its vicinity coal is wrought. Pop. 1961.

CARMAV-CRANGE, par Scot. Lanark, 769 ac. P. 807. **CARMEI**, or **ELMUL**—1 An anc. ruined in Amale Turkey Palestine, about 7 m. from Hebron and believed to be the place mentioned in Scripture, 1 Sam. xv 12 & xv 2. The ruins scattered about the head, and along the sides of a valley among the mountains of Judah, indicate a town once of considerable extent; the most remarkable ruin is that of a quadrangular castle, occupying a knoll in the midst of the town.—2 Carmel (Mount), a range of hills, Asiatic Turkey, Palestine, extending N.W. from the plain of Esdraelon ending in the only great promontory upon the coast of Palestine, and forming the Bay of Acre. These hills form a curve of about 6 m and vary in height from 1500 to 1800 ft. At their N. foot runs the brook Kishon and a little farther N. the river Belus. The whole range is of compact limestone, and contains hundreds of caves. Upon the summit of Carmel is a convent, which gave name to the name of that name in Europe. It was destroyed in 1521 by Abdallah Pasha but, by the aid of contributions from Europe, has been rebuilt.—3 Cape Carmel a promontory Palestine S. side of the Bay of Acre, and the termination of Mount Carmel lat. 32° 51' 12" N. lon 34° 57' 45" E. (n).

CARMEN a town and two islands, America.—1 A town in La Plata, prov. Buenos Ayres near the confines of Patagonia, on the side of a steep sandstone bank 1 bank Rio Negro, 16 m. from its embouchure in the S. Atlantic lat. 41° 48' S. lon 62° 50' W. The streets are very irregular and the houses are for the most, mere huts of one story built of mud and bricks. The most conspicuous edifice in the place is a mill and fort, defended by seven old, and almost useless pieces of artillery. This fort was erected by Francisco Pizarro, at the formation of the settlement, in 1579 and was intended as a military station for the protection of the Spanish settlements on the W coast of S. America. The soil in the neighbourhood of the town is fertile and produces wheat, barley Indian corn and various kinds of fruits and vegetables. Sheep, horses, cattle, and goats are also abundant. Pop. about 1830.—2 A town in Gulf of California lat. (R. point) 26° 10' N. lon. 111° 2' W. (n). It contains an island taken from which a considerable quantity of salt is annually obtained.—3, An isl. Gulf of Mexico, Yucatan at the entrance of the lagoon of Terminaco lat. (W end) 18° 38' 24" N. lon. 01° 50' 42" W. (n).

CARMICHAEL par Scot. Lanark 18 sq m Pop. 806.

CARMIGNANO a town and com. Tuscany prov. of, and 18 m W Florence, E. end of Mount Albano. It has a parish church and several other public edifices. Pop. 1544.

CARMÖE, or **KARMOE**, an isl. S.W. coast, Norway well Stanger at the mouth of the Bokke-fjord; lat. (S. end) 59° 19' N. lon. 5° 10' E.; separated from the mainland by

a street about 2 m. wide. It is 20 m. long, by about 6 broad, and is well cultivated; cattle-rearing and fishing are also carried on. Harold Häcker died here A.D. 988. Pop. 3000.

CARMONA (anc. Carwo) a tn. Spain prov. of, and 20 m. N.N.E. Seville cap. dist. of same name. E. extremity of an elevated ridge, overlooking a rich and extensive plain, covered with olive trees. It is surrounded with walls and is, in general, clean and well-built, containing a number of good houses, and several handsome mansions, belonging to some of the nobility, who though usually resident in Seville, spend part of the year here. It has besides two principal squares, one of which is well planted and is partly formed by a handsome church of Gothic architecture, with a lofty tower, while the other is used as the market-place, and partly formed by

THE MARKET PLACE, CARMONA. — From Robert's Spanish Sketches.

several of the most important public edifices. One of the most conspicuous objects in the town is an old Moorish castle, still in tolerable preservation, flanked with many towers faced with tin and blackened by age. The other principal edifices, in addition to those already mentioned, are six parish churches, all in Gothic, or semi-Gothic style, and more or less handsome the comendatorial buildings occupying the old Jesuit college of San Toodomiro several well-endowed hospitals, and educational establishments two ancient human gales, particularly the one called the Gate of Cordova, and a handsome theatre, of recent construction. The manufactures consist of ordinary woollen cloth coarse frises, hats, leather, earthenware, tiles for roofing and pavement, soap &c. There are also several flour and numerous oil-mills, and an important fair, chiefly for cattle, which lasts three days. Pop. 15 121.

CARNAC, a vil France dep. Morbihan, 15 m. S.E. Lorient, on a height near the coast. It contains a handsome church, enriched by the vestige offerings of pilgrims who annually visit it in great numbers. The great circular mound of Carnac the most extensive in France, is situated about three-quarters of a mile from this village, and is traversed by the road from Auray. In the midst of a wide heath stand about 10 000 rude blocks of gray granite, set on end, and singular showing no marks of polish, and covered over with long moss, indicating the great length of time they must have stood in their present position. They are in the form of obelisks, with the vertex reversed none of them exceeding 18 ft. high, and are arranged in 11 lines forming 10 avenues, with a curved row of 16 stones at one end. There are many gaps in the stony lines, as every house and wall in the vicinity seems to have been built from this ready quarry. The origin of this remarkable monument is unknown. Pop. 2800.

CARNARVON co. and tn. Wales. See CARNARVON.

CARNARVON a co. W. Australia, the most N.E. in the colony lat. 31 S about 65 m. in extreme length, E. to W. and about 45 in breadth. In its centre are several granite hills, called Highclere Hills on the S. are some low wooded hills, and extensive tracts of grassy country. There is also a pretty large lake of fresh water in the county called Lake Brown which is dry in October.

CARNARVON OR **CARNARVON BAY** a large inlet of St. George's Channel W. coast, Wales, counter Carnarvon and Anglesey extending 84 m. from near Holyhead on the N. to Bruchy Fwll on the S.

CARNATIC, an extensive marl time prov. S. Hindoostan, extending along the Coromandel coast, from Cape Comorin to the river Gundegum or between lat. 8° and 16° N. and lon. 77° and 81° E. length, S to N about 660 m. Average breadth, about 90 m. intersected, S.W. to N.E. by a ridge of mountains called the Ghats the culminating peak of which as far as yet ascertained is Mount Permain, 7364 ft. high the loftiest known summit S of the Himalayas. It is divided into S., Central, and N. Carnatic. The first extends from Cape Comorin to the river Coleroon about 260 m. the second, from the Coleroon to the river Pennar about 220 m. the third, from the Pennar to the river Gundegum, about 70 m. Madras is situated near the centre of Central Carnatic. The general division of the country is into high and low lands, or Upper and Lower Carnatic. In the first, all kinds of grain are cultivated in the last, rice. The soil is fertile in the high watered valleys, but poor on the high grounds. Sugar and indigo are cultivated in small quantities. The cotton chiefly raised is the common dwarf kind. Few trees grow here spontaneously and none will thrive, under any treatment, near Madras around which the soil is very poor consisting of a heavy sterile, salt loam, and there are other tracts equally barren. The climate of the Lower Carnatic or country between the ghats and the sea, is the hottest in India. On the coast, this excessive heat is tempered by the sea-breeze but 10 or 12 m. inland its intensity is rather increased than lessened by it, in consequence of its passing over the heated intervening tract. When the sea-breeze fails which it sometimes does for several days together the heat on the coast becomes intolerable the thermometer rising to 120° in the shade. In May June, and July showers are frequent, which have the effect of cooling the air and promoting vegetation. The principal rivers are the Pennar the Palnar the Coleroon, and the Vaygaroo, all of which have their sources in the table land above the ghats; and discharge themselves into the Bay of Bengal. The majority of the inhabitants of the Carnatic are Hindoos the Mahometans being chiefly scattered over the country. A large portion of the land is rented by Brahmans but these seldom labour with their own land, employing slaves of the inferior Sudra tribes to cultivate their farms. There are a few Mahometan farmers who possess slaves; but the most numerous class of agriculturalists are Sudras, who are looked down upon by the Brahmans as an inferior race and, in towns, are not permitted to dwell in the same street with the latter. Few provinces of India can exhibit so many large temples, and other evidences of former wealth and civilization, as the Carnatic. Its forts and fortresses were also exceedingly numerous but these are now falling rapidly into decay. The Carnatic was conquered by the British in 1769, but was not finally ceded to them till 1801. Pop. about 7,000,000.

CAROLINA a *town* *New Granada*, *prov* *Antioquia* lat. 6° 45' N Pop. 1072.

CAROLINA (La) a *town* *Spain*, *Andalusia*, *prov* of and 56 m. N.E. *Se. Jaen*, on a slope of the *sierra* *Morena*. The streets generally in a right angle, and are noted for cleanliness and uniformity. There is a square, and a *bull-ring*; a parish church, townhouse, prison, two schools, a cemetery and some handsome fountains. Manufactures—linen and woollen

fabrics, oil and a little wine. This town is the capital of the German colonies, formed in the reign of Charles III. The settlers received a grant of land and various other advantages; even yet, the district is distinguished by the superior industry and activity of its inhabitants. Pop. 1789.—(Madox.)

CAROLINA (North) one of the northern U. States, between lat. 35° 50' and 36° 50' N and lon. 75° 45' and 84° W bounded N. by *Virginia*, W. *Tennessee* & *South Carolina*, and E. the *Atlantic* *Ocean*, E. to W. 450 m. breadth 180 m. 48,000 sq m. A ridge of sand runs along the whole coast of this state and is partially separated from it by arms of the sea of greater or less extent. The passages into them are shallow and dangerous, and the only ones through which vessels can pass is *Oceanock* inlet, formed by *Cape Hatteras* and *Lookout*, off which, particularly the former disastrous shipwrecks are of frequent occurrence. The surface, for 60 or 80 m. from the coast is a dead flat covered with swamps and marshes through which muddy streams pour as a sluggish course. The chief natural product is the *pitch* pine which attains a great size. The soil is generally poor and sandy but in many of the swamps along the margins of the rivers, rice of fine quality is raised. The climate of this part of the district is very unhealthy. Farther inland for about 40 m. though the soil continues sandy the surface loses its monotonous appearance, and becomes undulating after which it gradually ascends becomes more fertile, and assumes the form of a table land, being 1800 ft. above the sea, and forms the base of a portion of the *Alleghany* Mountains. The principal eminences are *Crandall's* Mountain, 5556 ft. high *Rose* Mountain 6034 ft. and *Black* Mountain, 6478 ft. the greatest height in the U. States E. of the *Rocky* Mountains. The soil of this elevated district, particularly its W. slopes, is generally fertile and when not brought under cultivation is occupied by magnificent trees of oak, walnut, hick, and cherry. The climate here is pure and salubrious. Winter is occasionally severe. The principal minerals of N. Carolina are gold and iron. The former which has been found in veins and masses and lumps along both sides of the *Blue* *ridge*, was at one time obtained in such quantities as to have produced that district the name of the gold region of the U. States. The produce has progressively declined and being now eclipsed by that of *California* will probably cease to be sought after. Iron, of excellent quality abounds and traces of both lead and coal have been discovered. The principal rivers are the *Chowan* *Cape Fear* *Pamlico*, *Roanoke*, *Nenaw*, *Yadkin* and *Catawba*. They are admirably fitted for internal communication but owing to the sluggishness of the latter part of their course are cumbered at their mouths with bars, which retard them the navigation of large vessels. They are well supplied with fish but near the coast are infested with voracious alligators. The chief wild quadrupeds are the *wild* cat and the *wolf* among wild birds, the first place belongs to the *turkey* the worst reptile is the *rattlesnake*. The chief agricultural products are *Indian* corn, rice wheat, oats tobacco, and cotton. The cane grows luxuriantly but comparatively little sugar is made the greater part being consumed in green by cattle, particularly hogs, which in *Carolina* for one summer every other class of domestic animals. Neither the trade nor manufactures of this state are of much importance. The latter are chiefly cotton yarn ironware earthenware, soap, leather and flour. The former in consequence of the want of harbours is chiefly conducted through the neighbouring states. The chief exports are rice, cotton and the products yielded by the *pitch* pine, namely *pitch*, *tar*, *turpentine*, and *timber*. The exports, in 1847 amounted to £26 963; imports £23,478. N. Carolina is one of the slave-holding states, and exhibits in its condition not a few of the baneful effects of that nefarious practice. Its internal improvements contrast unfavourably with those of some of the N. states, and neither religion nor education can be said to be flourishing. The most numerous religious denominations are the *Methodists*, *Baptists*, and *Presbyterians*; but the whole number of their communicants less short of that of the white persons above 20 years of age who can neither read nor write. The Legislature consists of a *Senate* of 60, and a *House* of *Commons* of 120 members, both elected biennially the former only by persons possessing a freehold qualification of 50 acres of land, who vote in districts regulated by the amount of state taxes paid; the latter by all free white men of 21 years of

near Carpenedo from the mouth of the Noia, which falls into the Danube 41 m. E. Belgrade to the source of the Tisza, and forming the boundary between Austria and the principality of Wallachia and Moldavia the latter proceeding from the sources of the Thyrus and the Pruth, and terminating on the banks of the Danube W. of Freiburg and forming the boundary between Hungary and Galicia. The principal mountains of the E. group are the Harghaz and Szemleik, near the sources of the Noia and Tisza in the Banat, the Kossuth Pass, and the Tisza near the sources of the Selyk in Transylvania, the Mural E. of the pass of the Rothenthurm; the chain of the Tisza E. of the town of that name, the Yvernia, the Tisza E. of the pass of Terebany, the Varga Kapel and Kossuth, the Lakota and Kigol, the Beca Vapa, the Lokava, the Stronoma, Pietra, Ullat, Pietrosu and Husk. The W. Carpathians, at first lower than the mountains of Transylvania, rise to the W. of the Pappas and form the remarkable group of Tatra, separated by the little river Ar, from an other group called Beskud who principal summit is the Zylora, above 7000 ft. and covered with snow. This group meets with a chain which forms the W. limit of the Carpathians and presents a series of heights, the chief of which are the Javorina and the Wetering or Weterburg. The greatest heights of the E. Carpathians are—Liska Pevana 5000 ft. above sea level, 5087 ft. Bistrica in Transylvania, near Kromau 8645 ft. Durbes in Wallachia, 9412 ft. Hetrail 8500 ft. and Lentezhu, 844 ft. The greatest height of the W. Carpathians are in the Tatra range, namely the Krivna 8000 ft. the Vnuka, 821 ft. the Tatra 8000 ft. and in the mountains of Lomnits, the E. Thalerpitz 8021 ft. The Gril neoseptate 8240 ft. the Hundsdoerferpitz 8118 ft. and the peak of Lomnits 8440 ft. The principal intersection of the mountains, forming the most remarkable and most frequent passes, are the Tatra, a leading from Orsova to Timisoara, of the Tisza forming the valley in which the Delia flows, and the Rothenthurm, a gap formed by the Aluta, at the foot of Mount Saural. The outer bend of the Carpathians is a much steeper than that which descends towards the valley of Transylvania and Hungary. The mountain branch which stretches N.W. towards the Tatra and the Tatra, a parallel to the Delia, runs from the Tatra, also from the line of separation between the basin of the Tatra and that of the Black Sea. From this line as far as Jaldunian in Moldavia, all the streams from the N. slope fall into the Vistula, thence all the streams from both sides of the Carpathians belong to the Danube. The only important rivers which actually rise in the chain are the Vistula, the Dniester and the Theiss. The E. part of the Carpathian chain from Orsova to the source of the Danube near Kromau is entirely composed of granite rocks. These are covered by grey granite which extends to the source of the Theiss and is only interrupted by a few groups between the pass of Borgo and the source of the V. A great chain of trachyte appears on the frontiers of the Bukovina and stretches to the point where the Aluta begins to flow N.W. To the W. of this chain on approaching the plains, an extensive tract of sandstone, belonging to the coal formation begins to appear, and covers the greater part of Transylvania. Tertiary formations surround the vast plains of Hungary, which consist of a rich alluvium and must once have been the bed of a lake. Basalt frequently occurs, but no distinct traces of extinct volcanoes have been found. The Carpathian range is rich in minerals, including gold silver quicksilver copper and iron. Salt occurs in beds, which have sometimes a thickness of 600 or 700 ft. and are apparently inexhaustible. Vegetation also is vigorous. On the plateaus corn and fruit are grown to the height of 1000 ft. Higher up, the mountain slopes are covered with forests of pine, some of them as high as 2500 ft. About 6000 ft. seems to be the vegetable limit. Above it a few lichens may be found, but in general nothing is seen but bare steep rocks many of them in the form of conical peaks. (—*Oronopsis de l'Europe*, &c.)

(*ABE ENEDOLO*) a town and Kingdom of Italy. Low landy part of 21 m. N.E. of Verona, near 1 bank, Chiese. It contains 1 church and two hospitals and has manufactures of silk. It is a weekly market, it has a fair twice a week. Pop. 4,777.

(*ABE ENEDOLO*) a town and Kingdom of Italy. It is a town of 1,000 ft. high, near 1 bank, Chiese. It contains 1 church and two hospitals and has manufactures of silk. It is a weekly market, it has a fair twice a week. Pop. 4,777.

CARPENTARIA (Town of) an immense gulf in N. Australia between Cape York, and Cape Wessel the N. point of the Wessel Islands, and Cape Arnhem on the mainland. It is about 400 m. in width and about 400 in length, taking the coast line of York peninsula, which forms the E. side of the gulf. The land on the E. and S. is so low for a space of 600 m. that no part of the coast is higher than a ship's mast head. The W. shore of the gulf is rather higher.

CARPENTRIS (anc. *Carpendron*) a city France, dep. Yvelines, 14 m. N.E. Argentan, 1 book. Argentan, is a rich and fertile district at the foot of Mont Ventoux. It is surrounded by walls in good repair flanked with towers, and has four gates exactly opposite each other. The streets are rather narrow but most of the houses are well built, and almost all are supplied with water from the fountains in the public squares. Outside of the walls is a broad esplanade planted with trees. The principal public buildings are—the cathedral a Gothic edifice with a spire of the age of Charlemagne the *Lez d'Arce* a very perfect arch surmounted by a high tower the palace of justice formerly the episcopal palace, those by which is a most triumphal arch, the hospital erected in 1711 public wash houses theatre markets, new prisons and public library containing 22,000 volumes 2000 M.S., 6000 medals, and various antiquities. The aqueduct a massive structure which crosses the valley of the Arce by 48 arches and supplies the fountains of the town, was finished in 1784 (Carpendron is the seat of the assize court for the department, if a court of first instance, communal college and society of rural economy. There are here largely spirit of wine, and various distilleries manufactures of silk and glass, wax, candles and silk yarn. There are also smaller mills, tanneries and dye works. Carpendron is the resort for the productions of the district and the weekly markets for the disposal of them are among the most considerable in the S. of France. A considerable trade is likewise carried on in olive oil fruit, almonds madder clover lucerne seed, wax honey &c. The Romans embellished Carpendron with many edifices, of which the successive ravages of the Goths, Vandals, Lombards and Saracens, have left few traces. In 1315 Pope Clement V. fixed his residence here and made it the seat of the Pontifical See on a banister at cost the town dear as at his decease the cardinals were so numerous that his successor that the people, worn out with their endless disputes and consultations, are free to the village where they had assembled, and the same evening commenced a large portion of the town. The present walls were built by Pope Innocent VI 50 years after that event. The bishopric founded in the third century was suppressed by the concordat of 1801 10p 769).

(*Carpendron*) a town, Italy duchy Modena, cond. of nation name, 8 m. N. Modena, and of a bishopric suffragan to Bologna. It is surrounded by walls defended by a citadel and has a cathedral a seminary and manufactures straw hats and spun silk. Two fairs are held annually but the trade is trifling. The neighbourhood produces rice, wheat hemp, and flax. Pop. 6500.

(*Carpendron*) a town in Naples prov. Capriana, 2 m. N.E. St. Eustachio, near Lake Varese. It has three churches. Pop. 6000. (*Carpendron*) a town in Spain, 1 m. N. Andalusia, prov. of 17 m. N.E. Cordova 1 bank. (Ranquiquier) an edictory on the summit of which stands a castle. It is tolerably well built, and possesses a parish of arch, townhouse ladies seminary two primary schools, a prison and several convents, brick and lime kilns and oil mills. Some trade is carried on in cattle grain fruits &c. Pop. 2080.—2 *Carpendron*, a town New Castle, prov. of 24 m. W. by S. Toledo, in a hilly locality houses indifferently built, and streets irregular. It has a church twinned prison, cemetery and three schools. Borgo glass, and oil are manufactured. Pop. 2497.—3 *Carpendron*, a town, prov. of 2 m. S.W. by S. Valladolid 1 bank. Trancas houses poorly built. The town contains a church, a palace of the counts of Carpio, and a primary school 10p 600.—Several other places in Spain have the same name.

CARRA LOUGH, a small lake, Ireland, co. Kerry, 2½ m. S. Castlemaine harbor about 3 m. long, by 1 at the greatest breadth abounds in trout and salmon, and exhibits scenery little inferior to that of the far-famed lakes of Killarney.

CARRACA (La) a tn. Spain, Andalusia, dep. of and 4 m. E S.E. Cadix. It is the chief naval arsenal of the government, and one of the most complete in Europe. It stands in the channel E. of the Isle of Leon, and has been completely isolated from the mainland by artificial means. Its situation is so low and swampy that the buildings have been erected upon piles. It is defended by four batteries and in addition to the extensive buildings connected with the establishment, contains a handsome parish church. A little E. of Carraca, and between it and San Fernando, on the N.E. of the Isle of Leon a new town to be called San Carlos, was commenced in 1776, on a very magnificent scale but few buildings of any consequence have been completed.

CARRAGH par. Irel. Kildare 3784 ac. Pop. 733.

CARRAN par. Irel. Clare 14,461 ac. Pop. 787.

CARRAN TUAL, a mountain, Ireland, co. Kerry rising 3410 ft. above the level of the sea—being the highest summit of that remarkable range called Macgillycuddy's Reeks.

CARRANCA a tn. Brazil prov. Minas-Gerens between Resende and São-João-del-Rei with a church and an agricultural pop. dist. included of 4000.

CARRARA a tn. Italy, duchy Modena, 3 m. N.W. Massa. 1 1/2 bank, Aversa, 1 1/2 m. above its entrance into the Mediterranean. It has a cathedral begun in imitation of that at Pisa, but unfinished several churches, a convent, an academy of sculpture, and numerous workshops for sawing, cutting and polishing marble for which water power is employed. There are also four oil powder and paper mills Carrara is the seat of a district court, and forms part of the episcopal see of Massa and Carrara. The marble quarries from which this town derives its whole importance, occupy three or four descending ridges which meet in a rocky mountain called Monte Negro. For upwards of 2000 years, the marble has continued to be exported and still there remains stores apparently inexhaustible. They are of various shades but the kind most prized is the transparent white kind used for statuary of which however the quantity obtained is small in comparison with that of the inferior kinds. Pop. 6063.

CARRIFRA JSEER, a small island group Spain off E. coast Galicia, prov. Coruña, 22 m. N.W. Vigo. They form part of the parish of San Pío de Carrifra, with less on the mainland along the bay of Arosa and less a large and well built parish church. Pop. 3241.

CAREFTAO a tn. Brazil prov. of and 120 m. S.W. P. N. Goias, with a church, and an extensive and fertile district. The inhabitants, however, are chiefly devoted to raising, though those who follow cattle-rearing are the rest.

CARRICAL or **KARRAL** a tn. Hindooon, in the Carnatic coast of Comorandil 153 m. S. Madras lat 10° 35' N. lon. 79° 53' E. It was formerly a place of importance and strongly fortified but is now wholly abandoned.

CARRICK a dist. Scot. co. Arr. (which see)

CARRICK four para. Irel. —1 Kildare 5197 ac. Pop. 394 —2 W. Wexford 2104 ac. Pop. 360 —3 Tipperary 2428 ac. Pop. 8397 —4 Wexford 3009 ac. Pop. 2012

CARRICK ARLIDE, an isolated basaltic rock, Ireland co. Antrim about 4 1/2 m. N.W. Ballyvaughan separated from the mainland by a chasm 60 ft. wide, and more than 80 ft. deep. Here is a valuable salmon fishing station, as the fish can easily be intercepted at this place in their retreat to the rivers. A communication is maintained with the mainland by means of a rude bridge of ropes thrown across the chasm and allowed to remain during the fishing season.

CARRICK-ON-SHANNON a tn. Ireland co. Leitrim 85 m. N.W. Dublin 1 bank Shannon, over which is a bridge to a struggling suburb in the county of Roscommon. The town consists principally of two streets, intersecting each other at right angles is badly paved, and has a handsome church with a spire, a R. Catholic chapel, two Methodist meeting-houses, and parochial schools a county courthouse, bridewell jail, and the county infirmary with dispensary attached. Being the capital of the county the games are held here, as are the general and petty sessions. It is the chief market for grain and provisions in Leitrim and carries on an extensive trade in butter and provisions with Dublin and Newry. It has also some trade in coarse linen, druggists, furs, coarse flannel, and yarn. The prosperity of the place has been greatly increased by recent improvements on the Shannon, which have

rendered that river navigable to Lough Allen about 8 m. N. of the town. Pop. 1793.

CARRICK-ON-SUA, a tn. Ireland co. Tipperary 85 m. S.W. Dublin, on a plain, 1 bank, Suir which is navigable, up to the town, for ships of 200 tons burthen. Carrick-bag, a suburb situated on the S. bank of the river. The town consists of four streets, three of which are of a good width, and a number of lanes houses mostly of stone and well built, though of unequal heights water abundant. The public buildings, exclusive of the churches, are a courthouse, bridge and barrack, an old castle or monastery built by the Earl of Ormond in 1560 for Franciscan friars and an ancient abbey in Carrick bag founded in the year 1146. This last antique structure presents a curious architectural peculiarity. The tower is considerably broader than the body of the wall, on which it is supported by an inverted pyramid, commencing

CARRICKBEG ABBEY as described by Rev. John Smith in 1788.

on two stories one projecting from either side. Resting on these projecting, the tower rises to a height of 84 ft. 3 inches and thus balanced for there is no central base it has stood unshaken the tempests of ages. The churches are the parish church and a R. Catholic chapel both large, but neither of them particularly handsome. There are a parish school under the Church Educational Society a school kept by the monks, and run or two private schools. The town was formerly celebrated for the manufacture of coarse broad-cloth for the use of the army. It still manufactures rather a coarse woollen fabric, but the trade is now very much reduced. A considerable export trade in corn butter bacon, and live stock is carried on. Pop. 6314.

CARRICKBAGGOT par. Irel. Louth 821 ac. P. 278.

CARRICKFERGUS, a par. bar and seaport, and port of Ireland co. Antrim. The town lies N. side of Belfast Lough 11 m. E. of Belfast, with which it is connected by railway. It extends nearly 1 m. along the shore, and consists of the town within the walls and two suburbs called the Scotch and Irish quarters. On the N. and W. sides of the town some portions of the old wall are still entire. The houses are mostly built of stone, roofed with slate and have many of them a substantial and respectable appearance especially those built within the last 40 years. The parish church an old, patched, ungainly building is surrounded by a fine modern square. There are, also a R. Catholic chapel and places of worship for various dissenting congregations with numerous charities, and a dispensary. The ancient castle of Carrickfergus an object of considerable interest, is perched on a rocky promontory projecting into the sea, and is still maintained as a fortress having a number of guns on the walls, and being garrisoned by one or two companies of foot. The trade of the town was at one time considerable, but has been nearly extinguished by the rivalry of Belfast, to which it has now become subordinate the registry of vessels, and the custom duties being included in the returns of the latter port. The small importations still taking place here consist of coals iron, timber bark, salt, slaves, &c. the exports of

black cattle and grain. The spinning of cotton and linen yarn is carried on to some extent and there are a large distillery and some extensive tanneries. A good many persons are employed, also in weaving cotton goods for the Belfast and Glasgow manufacturers. But the chief dependence of the town is on the influx of visitors during the summer season when it is much frequented by bathers, and on the dairy in the bay which affords employment to a large portion of the inhabitants, and is very profitable. King William landed at Carrickmacross castle 16 days previously to the battle of the Boyne and in 1700 it surrendered to a French squad run under Thurst, who was soon after killed, having been attacked by some English ships under Commodore Elliot. In 1718, the celebrated Paul Jones captured the Drake sloop of war in the bay but made no attempt on the town. Pop. 3543 Area of par. 16,700 ac. Pop. 8530

CARRICKMACROSS, a tn and par. Ireland co. Monaghan. The town 46 m N.W. Dublin, consists of one long street, with several smaller ones branching from it. It has a clean respectable appearance, and contains several good shops. The parish church is a handsome building, with an elegant steeple. There are here a grammar-school two national and various other schools, a dispensary a mendicant society a savings-bank, and a bride-well. A considerable retail trade is carried on with the surrounding country and soap, candles, buggies, and coarse hats are manufactured in the town. There is also a tannery, a brewery and a distillery. Pop. 1937 Area of par. 16,700 ac. P. 19,557—(Local Correspondent)

CARRIDEN par. Scot. Linlithgow 423 sq. m. 117°4. **CARRIGAHOLT**, a maritime vil. Ireland co. Clare, on bay of same name estuary of the Shannon, 10 m W. Kilrush. It has a pier at which agricultural produce is shipped and is frequented by fishing craft. Here are the ruins of an ancient castle, on the verge of a cliff overhanging the sea. Pop. 426

CARRIGALINE, par. Ireland Cork 14,499 ac. P. 6715 **CARRIGALINE** or **CARRIGALINE**, a vil. and par. Ireland co. Leitrim. The village, 19 m. E. N. L. Carrick-on-Shannon, is a constabulary police station, has petty sessions every alternate Saturday, a weekly market, and several fairs. Pop. 478 Area of par. 1730 ac. P. 5930

CARRIGDOWNNAVE par. Ireland Cork 79° ac. P. 156. **CARRIGLEAMILLARY** par. Ireland Cork 3330 ac. Pop. 709

CARRIGROHANVEHL par. Ireland Cork 2061 ac. 1438. **CARRIGTOTHILL**, a vil. and par. Ireland co. Cork. The former 13 m W by S. Youghal is chiefly one long irregular street, and is a constabulary police station and has several fairs. Pop. 693 Area of par. 10,310 ac. Pop. 1443

CARRIG E, or **CARRIGROTTLE**, a small vil. Ireland co. Kerry in the Shannon, 14 m. N. W. Hallylongford. It is about 14 m. in circumference, has a battery and bomb-proof barracks for 20 men, and is a military station. The castle of Carrigrohilly, belonging to the O'Learys, offered a determined resistance to Cromwell, and was one of the last taken by him.

CARRIL, a tn, Spain Galicia, prov. of and 10 m. N. W. Pontevedra, near the mouth of the Ulla. Houses in general, badly built. The town has a parish church custom-house, primary school, and several marble stone-cuts. The average value of exports is about £26,000 imports, £36,000. Pop. 1100.

CARRINGTON par. Scot. Edinburgh 24 m. by 2 m. Pop. 210

CARRION, a river Spain, Leon, prov. Palencia. It rises in the mountains of the Asturias, flows S. and, passing Saldaña, Carrion-de las-Casas, and Palencia, falls into the Pisuerga, 22 m. N. E. Valladolid after a course of 75 m. exclusive of windings.

CARRION-DE-LA-CRISTINA, a tn, Spain, New Castile, prov. of and 7 m. N. E. Ciudad-real, near I. bank, Guadalupe. It is indifferently built, and possesses a large and highly-decorated parish church a chapel, convent, stone-cuts, prison, secondary and four primary schools. Wine and oil are exported here, and some trade is prosecuted in grain, cattle wool, and oil. Pop. 3157.

CARRION-DE-LOS-CORTEZ, a tn, Spain Leon, prov. of, and 22 m. N. Palencia, I. bank, Carrion. Most of its streets are narrow ill paved, and dirty and it has three squares, the principal containing the town-house, public storehouse, and other offices. Its remaining public buildings are—three churches, several chapels, convents, and schools, a prison, hospital and secondary. In the environs, along the banks of the river, are many pleasant public walks ornamented with trees and fountains. The inhabitants are engaged in tanning, dyeing, exporting wine and oil, and in husbandry. Trade—cattle, grain, fruits wool &c. A large and well-attended cattle fair is held in September. Pop. 5132

CARRON a vil. Scotland, co. Stirling celebrated for its extensive iron foundries, about 2 m. N. E. Falkirk.—The river of same name is a small stream, rising in an extensive meadow called the Carron bog, near the centre of the county and after an R. course of about 11 m. falling into the Forth at Grangemouth. The stream is supplied by some antiquaries to have been the boundary of the Roman provinces of *Albania* and several memorable battles have been fought on its banks. In its course it supplies water to several private fields and the great reservoir of the Carron works and drives some paper-mills.

CARRONSHORE, a vil. Scotland, co. Stirling, 2 m. below Carron works, partly in the parish of Larbert, and partly in that of Bothkennar. Pop. 636

CARRON MOUTH, a lake Inverclyde co. Mayo, 5½ m. N. W. Tulloghann Bay and ¼ m. N. E. Broadwater Bay. It contains several islands its waters flow by the rivulet Mankin into the Avonmore and through it into Tulloghann Bay.

CARRU a tn Italy Piedmont prov. Cuneo, 9 m. N. E. Mondovì. Pop. 3600

CARSTAIRS par. Scot. Lanark 11 840 ac. P. (1851) 1068. CART two streams Scotland co. Renfrew—1 The White Cart rises in Carrot Moss, S.W. Eaglesham flows N.W. and passing Cathcart and Pollockshaws crosses the Levens, passes through Paisley and falls into the Clyde 4½ m. below Glasgow after a course of 20 m.—2 The Black Cart, a small unimportant stream issues from Castle Semple Loch 5½ m. S.W. Paisley flows N. E. and falls into the White Cart, about a mile above its confluence with the Clyde.

CARTAGENA, or **CARTAGENA** (anc. Carthago) a tn and seaport, Spain prov. of and 31 m. S. E. Murcia, esp. dist. of same name (at noon light) 37° 56' N. lon. 0° 50' W. (n.) about 17 m. W. Cape de Pal a. Its harbour one of the largest and safest in the Mediterranean has depth of water for the largest vessels, is sheltered from all winds by lofty hills, and guarded from the sea by the island of *Escambrera*, which forms a complete natural breakwater. It stretches N. and is narrowest at its mouth, where it is defended by the castle of *Castro*, occupying one of the heights on the N. and the castle of *St. Julian*, occupying one of those on the E. The town, situated at the N. end of the harbour is surrounded by a lofty wall flanked with bastions. The space enclosed is much larger than the actual population requires, and everything above the place bears strong evidence of extensive, rapid, and comparatively recent decay. The principal streets are spacious and regular and many of the houses, though of simple architecture, well built, and provided with balconies. The most important squares are the *Married* or *Market-place*, the largest of all, lined throughout with elegant buildings, and adorned with a fine fountain, furnishing the purest water so copiously as to supply the greater part of the inhabitants and the *Monjas*, of less dimensions than the former but occupying both a more central and airy situation. The *Alameda*, in the N. W. near the Madrid gate, is well planned, and affords both a healthy and picturesque promenade. The principal edifices are the cathedral, possessing little architectural merit, and now since the bishop's see has been removed to Murcia, converted into a simple parish church, the old castle (*Castello Arzobispal*) supposed to date from the foundation of the city by the Carthaginians the *Real* or *General prison*, or convicts establishment, the military hospital, and hospital de Caridad, the military park, the observatory, the convents of

St. Augustine and Mompas, and several other convents and churches. When Spain possessed her colonies, and was in a flourishing condition, Cartagena was one of her most important naval stations and carried on a very extensive commerce, but

1. Royal Hospital (Hospital Real).
2. Arsenal (Arsenal de Guerra).
3. Light House (Faro).
4. Cathedral (Catedral).
5. Church of St. Augustine (Iglesia de San Agustín).
6. Church of St. James (Iglesia de San Jaime).

7. Palace (Palacio).
8. Arsenal (Arsenal).
9. Church of St. James (Iglesia de San Jaime).
10. Church of St. James (Iglesia de San Jaime).
11. Church of St. James (Iglesia de San Jaime).
12. Church of St. James (Iglesia de San Jaime).

everything has since gone to decay and the town can hardly be said to have either trade or manufactures. The latter consists chiefly of red lead, earthenware, cordage, exports maize, and glass. The mines, chiefly argentiferous lead, extensively wrought in the neighbourhood, give employment to several smelting furnaces and foundries. The chief articles of export are berries, gums, and spermo. In addition to other causes of decay, Cartagena has suffered greatly by its unhealthiness. Reported epidemics have raged within it, and carried off the inhabitants by thousands. Pop. including suburbs, 33,698.

CARTAGENA or **CARTAGENA** a seaport in New Granada, cap. prov. of same name, on a small sandy peninsula, connected with the continent by an artificial neck of land lat. (dome) 10° 25' 36" N. lon. 75° 34' W (a). On an island, communicating with the city by means of a wooden bridge, is a large suburb called *Xiximin*. Both the former and latter

lary of *Nuestra Señora de la Piedad*. The height of *La Piedad*, which is unascendable, as it has several times caused the fall of Cartagena without a single shot almost being fired.

The port is magnificent, and is the only one on the coast fit for the repair of vessels. It also possesses excellent building docks. The bay, which is land-locked, and has smooth water extends N to S. 7 m and affords excellent anchorage. There were two entrances to the port—the *Boa Grande*, close to the town, and the *Boa Chica* (narrow mouth) many miles farther S. but the latter to defend the approach, the former has been blocked up by sinking old vessels in it, in consequence of which, ships are compelled to go round by *Boa Chica*, a circuit of 30 m. to gain the usual roadstead for frigates which is 3 or 4 m. from the town. The *Boa Chica* is defended by two strong castles. The entrance to the port is rendered somewhat difficult by shoals. The town and suburbs are well laid out and well built. The houses are generally of stone, two stories high with balconies and lattices of wood which, in this climate, has the durability of iron and the streets, though not very spacious, are straight and well paved. Among the public buildings are numerous churches and convents some of them of great magnificence a general and a military hospital a townhall a theatre a cinema, and a college, with an average attendance of 200 students. The spring water is bad, and the inhabitants are in consequence obliged to obtain supplies from immense distances, contrived for the purpose of collecting rain water. The weather especially during the rainy season is excessively hot and thus both heat and damp combine to render the climate, particularly from May to November most insupportable. Leprosy is common, and yellow fever often makes fearful ravage. In recent years, owing partly to greater attention to cleanliness mortality is said to have decreased. The chief manufactures are ropes and sail-cloths. The trade of Cartagena, at one time considerable, has declined very much in consequence of the rivalry of the ports of Santa Marta and San Juan. The export trade is now almost confined to specie and bullion, conveyed by the steamers of the Royal Mail Steam-packet Company to England. In 1845 the arrivals and departures of vessels were 89 tons, 5641 value of cargoes imported, 256,786 exported, £13,488. In 1846, the vessels numbered 42 tons 6505 cargoes imported, 252,708 exported, 243,713 A canal of 80 m. to connect the bay of Cartagena with the river Magdalena, is now in progress, and it is anticipated that on its completion the trade of Cartagena will revive. Pop. about 10,000.

CARTAGO—1 A in Central America, cap. of Costa Rica, a city of a river of its own name. It was formerly a place of considerable commercial importance, and had a population of about 37,000. It then contained 3000 houses and eight churches, but it was so utterly ruined by an earthquake on September 2, 1841, that only one church and 100 houses were left standing. Near the town is Mount Cartago rising 11,480 ft. above the sea level and presenting indications of having at one time been an active volcano.—2 A in New Granada, prov. Popayan in the valley of the Cauca, on the V. rep. The streets are broad and straight, and it has a spacious and handsome square, a cathedral and two parish churches, and a well-conducted Lancasterian school. Its trade is principally in dried beef, live pigs, fruits, coffee, superior cacao, and tobacco. The sugar-cane thrives well here. Minerals of various kinds abound, and the hills contain silver. Cartago is the emporium for the

CARTAGENA, SOUTH AMERICA.—From Shipping by John Bullen, R.N.

are surrounded by strong fortifications of freestone, and at a short distance from the city on the mainland, is an entrenchment about 150 ft. high, on which is built a strong fort commanding the fortifications. This entrenchment communicates on the E. with a range of more elevated hills, terminating in a summit 550 ft. above the sea, on which stands the Augustine monas-

trade of Santa Fe de Bogotá. The climate is hot but dry and healthy. Pop. 5500.

CARTAMA, a in Spain Andalusia, prov. of, and 14 m. W. Malaga at the base of a hill called in Virgin, crowned with the ruined walls of an ancient fortress. It has wide and paved streets a square, which contains the church a chapel,

school and several fountains. The inhabitants are chiefly employed in agriculture, cattle-raising and exporting oil. Pop. 4563.—*Madrid*

CARTAYA, a tn. and port Spain, Andalusia prov. of and 9 m. W. W. Huelva. 1 bank. Picta. Its houses are irregularly built, and it has a large square, in which is situated the town hall, now ruinous. It also has two churches, a prison, school, hospital, public primary, now used as a warehouse, custom house and an old Moorish castle, now converted into a cemetery, docks for ship and boat building, and a marine storehouse. In 1843 57 vessels entered and sailed from the port. tonn. 2907. The bulk of the people are fishermen. 1 op. 407

CARTAGET an Isl. R Pacific, Solomon Archipelago lat. 8° 50' S. lon. 160° 45' E. It bears the name of the English navigator who discovered it in 1767

CARTHAGE, the anc. cap. of a famous country of same name, N Africa. The site of which is believed to be a few miles N the city of Tunis, on the N part of a small peninsula lat. 36° 55' N lon. 10° 10' E. About 30 years after the destruction of Carthage city (c. 161) the Romans attempted to establish a colony on its site, which did not prosper but a second, under the name of *Colonia Carthago* rose into importance and became the first city of Roman Africa. In 439, the Vandals under Genseric seized it. It was retaken by Belisarius in 533 but was finally destroyed by the Saracens in 698. The few ruins that now exist belong to the Roman city. Not a trace remains of the Carthaginian metropolis. In 1841 a monument was set up in the locality by the French in memory of their King Louis IX. (better known as St. Louis, who died of the plague May 4 1270, while besieging the neighbouring city of Tunis.

CARTHAGE, (Carp. N. Africa, gulf of Tunis lat. 36° 52' N lon. 10° 40' E. E. (N). The cape is on the W side of the gulf about 10 m. E from the city. A light-house has been erected on this promontory with a revolving light performing a revolution every three minutes

CARTHAGENA See CAELAGENA

CARTMEL, a vil and par. England co. Lancaster. The village is in 4 m. W. Kestel, a valley surrounded by lofty and picturesque hills, consists of two principal streets well kept, and is abundantly supplied with water. The church is a fine old cruciform structure, formerly a priory, founded in 1188. There is an ancient endowed grammar-school, with some small parochial charitable institutions. People of redy employed in agriculture. Area of par. 6350 ac. 1 op. 1134.

—(Local Correspondent)

CARLIANO, a seaport in and dist. Venezuela, prov. of and 5 m. N E. Maracaibo, about a few miles S. Maracaibo lat. 10° 47' N lon. 62° 27' W. Apparently situated at the opening of two fine coves. The place is said to be healthy and the inhabitants are of a gay and lively temper fond of dancing. A battery raised on an eminence, defends the port. It has some traffic in horses and mules, and in 1847 the arrivals at the port were 17 ves. ch. tonn. 789. Departures, 67 ton 1186. Pop. 5000

CARTIN, a tn. France, dep. Puy-de-Dôme, 14 m. E. Bethune 10 m. N E. Arras with manufactures of starch leather, earthenware, beet sugar and potato flour. 1 op. 4038

CARTWELL, a seaport in Hindostan, prov. Canara, 30 m. S. R. G. S. lat. 14° 50' N lon. 41° 11' E. It was formerly a noted seat of European commerce, the English East India Company having had a factory here so early as 1603, but during the 17th century it fell into utter decay

CALYFORD, a small vil. Ireland co. Wicklow and 5 m. R. W. Rathfriland, formerly a priory, containing two members to the Irish House of Commons. It has a free school founded by Charles I. which is numerously attended.

CARYTENA, a vil Crete, some 40 miles, 17 m. W. Tripolitana near the Carbonara. It has an old castle repaired by and for years the residence of the celebrated chief Colocotroni. 1 op. 1690.

CASACALANDA, a tn. Naples, prov. Roccia, 18 m. N. E. (arrives) at the foot of a hill. It has three churches, one of which is in the good Tuscan style and a convent. Silk-worms are reared in the neighbourhood, and the district produces wine and fruit of good quality. Pop. 5190

CASALANGA, a vil and com. Naples, prov. Salerno Citta, dist. of and 11 m. S. W. Vasto. Pop. 2806.

CASALBORGONE, a vil Italy Piedmont, prov. of and 14 m. N E. Turin. 1 op. 2000.

CASALBUHTANO, a tn and com. kingdom of Italy Lombardy, prov. of and 8 m. N. W. Cassano, on a navigable canal between the mountains of Brescia and the Olis. It contains a parish church, and four oratories; has manufactures of linen and cotton, and numerous silk-mills one of the largest silk houses of Italy having its establishment here 1 op. 2903

CASALDUNI, a vil and com. Naples prov. of and 19 m. S. Campobasso. It has an annual fair. Pop. 3300

CASALE, (anc. *Bodincennensis*) a town, kingdom of Italy province and 16 miles N. W. Alessandria, right bank I. o. The castle, founded in 1590 by Duke Ycaas was one of the strongest in Italy. The castle or palace, is still standing but the ramparts have been converted into promenades, and the defences are now insignificant. The cathedral is said to have been founded in 741. There are several other churches, a seminary several convents, two hospitals an orphan hospital college public library theatre corn magazine several silk spinning-mills a parade, and public gardens. The trade of the town is considerable. Casale is the seat of a bishopric and a district court of justice. It was the capital of the ancient marquisate of duchy of Montferrat. In 1640 the Duc d'Orleans defeated the Spaniards here. Casale was taken and retained several times by the French and Austrians, and it formed, for a time, part of the department of Marungo in the French Republic. Pop. 21 000.—The province covers 22° 4 sq. m. is 11 ly to the S. and W. Its products are—grain fruit, hemp silk and wine. It is divided into 15 manducates and 3 comune. Pop. 112 000

CASALMAGGIORE, a tn Italy Lombardy prov. of and 22 m. E. P. Crema, 1. bank. I. o. from the mountains of which it is with difficulty provided by strong embankments. It is the seat of several courts and public offices, and has several churches, an abbey barracks, and a custom house, various schools and charitable institutions a *monte di pietà*, and a theatre. Its manufactures consist of earthenware, glass, and cream of tartar some tanneries, and brandy distilleries and it has markets twice a week and an annual fair which lasts seven days. Inhabitants chiefly engaged in agriculture, particularly in cultivating the vine. 1 op. 4190.

CASANOVO, a tn. Italy prov. Calabria Ultra, 9 m. N. W. Nicotri near 1 bank. Vele. 1 op. 1610. —2 A tn. prov. Principato Ultra 13 m. N. Policastro, 7 bank. Vele. Pop. 2401

CASANOVO three tns. Naples.—1 A tn. prov. Calabria Citta, 8 m. N. E. Cassano. Pop. 6600.—2 A tn. prov. Calabria Ultra, 31 m. N. P. Reggio almost entirely destroyed by the earthquake of 1783. The neighbourhood produces silk. 1 op. 8241.—3 A tn. prov. of and 6 m. N. E. Naples. Pop. 3120

CASALPISTERI, a tn. and com. kingdom of Italy Lombardy prov. of and 18 m. S. E. Lodi L. bank, Lombardy. It is the seat of several public offices contains a parish church and sanctuary has manufactures of linen and silk goods and earthenware and carries on a considerable trade, particularly in Parmesan cheese which is here made in great quantities and of the best quality. There are limekilns in the neighbourhood. Pop. 6601

CASALTRINATA, a vil and com. Naples, prov. Capitanata, dist. of and 80 m. E. R. E. Foggia, and about 1 m. S. Lake Salto. There are silk-worms in the neighbourhood belonging to the crown. Pop. 2735

CASALVECE, (1110)—1 A vil and com. Naples, prov. Capitanata, dist. of and 1 m. S. W. Sansevero. Great quantities of olives are raised in the neighbourhood. Pop. greater part Albanese or Arnaute, 1020.—2 A tn. in com. Sicily prov. of and 80 m. R. W. Messina, dist. of Castoreale. Pop. 3653

CASAMANZA, a river Senegalensis between Carban and Gambia. Falls into the Atlantic lat. 11° 44' N. lon. 16° 50' W. Sources unknown. On the entrance of the river there are only 4 or 5 fathoms water at the distance of 8 or 9 m. from the land. There is a French factory at its embouchure another called Berris 80 m. higher up and a third, Zingichor belonging to the Portuguese, 9 m. above the latter. The river is navigated by large schooners to a considerable distance beyond the farthest settlement.

CASAMASSIMA a tn Naples, prov of and 14 m S E. Bari. It has several churches, a convent and two abbeys. The district produces wine and almonds of good quality. Pop. 4290.

CASAMICCOLA, a tn Naples, prov Naples, lat Ischia at the foot of Mount Sordani, near the sea coast. It produces earthenware and has some hot baths, which are much frequented, and a curious house. Good wine is produced in the neighbourhood. Pop. 8123.

CASANARE—1 A prov New Granada, dep. Boyaca extending from the E. slope of the Andes to the Orinoco. It is very mountainous on the W but the remainder is an immense plain covered with forests and marshes traversed by numerous rivers rich in fish and game but little cultivated. The banks of the Orinoco is the only part inhabited. Pop. 12,000—2 A river in the above prov rising in the mountains of Chita, and, after an E course of about 180 m through immense plains, nearly under the parallel of 6° N falling into the Meta, a little E. the confluence of the Chira lat. 5° 58' N. It is navigable for small craft throughout the year—3 A tn. on the above river lat. 5° 56' N. lon. 71° 10' W. It has a good harbour and 900 inhabitants chiefly Indians. **CASANDRINO** a vil and tn Naples, prov of and 5 m. N city Naples. The chief employment is rearing silk worms. Pop. 2195.

CASANANO a vil and com Naples prov Otranto 11 m N N E Gallipoli. It contains an hospital, orphan asylum, and two convents and has an annual fair. Pop. 2748.

CASANOVA-LACONTE, a vil Spain Estramadura, prov of, and 8 m N by W Cáceres with a Gothic church, townhall prison, hospital, several schools, a public storehouse and three fountains. Manufactures—linen and woollen shawls, shoes and boots of all kinds. Pop. 602.

CASARILLIL, a tn Spain Andalusia, prov of and 52 m. E. Sevilla, r bank Yaguar. The houses are well built, the streets spacious. It has a small square, a church, chapel, chapter-house, prison and two schools. Inhabitants occupied in burning charcoal, distilling brandy, expressing oil and in husbandry and in trading in grain, fruits and cattle. Pop. 3120.

CASAN, several tn Spain. Those noteworthy are—1 Casade-V. a tn. New Castile, prov of and 42 m S E Albacete, on the borders of Valencia, r bank Gabriel. It has wide and regular streets lined with substantial houses and an extensive square containing a handsome townhall, also has a parish church, two schools, a prison, storehouse, and cemetery. Inhabitants engaged in weaving, currying and in husbandry and in trading in grain, fruits, cotton, wool and silk. Pop. 3395.—2 Casan-Isabel, a tn. New Castile, 4 m. N the former possessing a church, townhall prison, Moorish cemetery and two schools. Inhabitants employed in domestic weaving and tillage. Pop. 2891.—3 Casan-de-Millem, a vil Estramadura prov of and 30 m N by E Cáceres, r bank Tagus. It possesses a square, church, townhouse, school prison, and cemetery. Woollen and silken fabrics are manufactured here, and some trade is done in grain, fruit, and pigs. Pop. 1812.—(Major).

CASAS-GRANDES a tn Mexican Confederation state Chihuahua, 35 m S E. El Paso, apparently at one period a place of considerable extent and importance, the country for some distance around it is covered with the ruins of buildings capable of accommodating about 30,000 inhabitants. The ruins are of various kinds comprising aqueducts and other works. In the immediate neighbourhood of the town the soil is extremely fertile, and the verdure perpetual. Its present inhabitants, of very indigent character amount to about 800.

CASATE-NUOVO a vil and com Italy Lombardy prov of and 18 m N by E Milan with a church and small convent. Pop. 2400.

CASBIN or **KASBIN** a city Persia, prov Irak 90 m N N W Teheran lat. 36° 5' N lon. 49° E. on a plain and described by Souhag as the best-looking town he had seen in Persia. Many of its buildings are of kiln-burnt bricks, which gives them a livelier and more agreeable aspect than when built of those that are sun-dried. There are several spacious and well constructed bazars, 48 caravansaries, and 24 mosques, some of which are very elegant structures. Deserted and ruined houses are singularly numerous in the

town, and its prosperity generally is much impeded by the scarcity of water. There are no manufactures of any consequence but it has a great transit trade with Hamadan, Rehit, Teheran, and Tabriz. Pop. nearly all Mahomedans, about 40,000.

CASCADE or **PRESIDENT MOUNTAINS**, a mountain-range, U States Oregon, running parallel to and about 80 to 100 m E from the coast. It may be said to commence with Mount Baker near the frontier of British N America, lat. 49° N and to terminate S. with Mount Shasta which closes up the head of the valley of the Sacramento in California total length about 300 m. A it is separated by Fraser's river from the mountains of New Georgia and S by the Sacramento from the Sierra Nevada. Besides Mount Baker its highest peaks are Mount Jefferson, Hood, St. Helens, and Rainier some of which are 12,000 to 14,000 ft high.

CASALE, a small seaport in Portual prov Estremadura, about 6 m N W the mouth of the Tagus, and 18 m. S W Lisbon, defended by two forts. It contains two churches carries on some trade with the W Indies, and it has some manufactures of woollen stuffs. There are thermal springs in the vicinity. Casale is the birthplace of a pilot named Albuquerque Sanchez who is alleged by the Portuguese, to have been driven out to sea by a violent tempest, to have reached N America, returned with three or four companions, sold survivors of the voyage, by way of Madeira, and to have left a journal which fell into the hands of Columbus, thus reaching there, and furnished him with his first ultimately led to his celebrated discovery. Pop. 2080.

CASCANTIA, a city Spain Navarra, 6 m S E Sanja, 7 m S S W Tudela, 1 bank Quiesco. Its houses are tolerably well built, and it has a spacious square, two churches, several chapels, two endowed schools, a townhouse prison, and cemetery. In the environs is a public walk, adorned with trees. Manufactures—linen fabrics, alspeter, brandy oil and wine. Trade—grain, fruits, cattle, and colonial produce. Pop. 2244.

CASITA a tn kingdom of Italy prov 1 regno, 12 m N by S. Pop. 3200.

CASLEA or **CASTRO** a vil Tuscan prov of and 10 m S E. Pisa, m N W in the Val di Ecca. It has a parish church and bells which take their place in a hill of marble tufa in the vicinity. Pop. 1122.

CASCIANO numerous small places Tuscan none of them deserving notice except a vil prov of and 9 m S S W Florence, on the Fiume, in the vale of Arno. It contains a parish church, and its manufactures coarse woollens, artificial flowers, and straw bonnets. A good wine is raised in the neighbourhood. Pop. 1800.

CASCIU a tn and com Tuscan prov of and 9 m. P R E. 1 m N bank Arno. It is of a quadrangular form, surrounded by walls, and has a parish church, and a castle, some silk manufactories, oil-mills, and wine presses. Pop. 2080.

ASCOLI, par Eng Hantsford 2048 ac. Pop. 122.

CASCU RAY U States Maine extending 20 m to its entrance between Cape Vinalmont and Cape Small Point, containing 300 small but generally very productive islands. It includes several smaller bays, and runs by various rivers.

CASALLE, a tn Italy Piedmont, prov of and 8 m N N W Turin, on a branch of the Stura. It has two churches, a convent, an hospital and manufactures of Indian silk, and paper besides several fulling mills. Pop. 3500.

CASERTA, or **CASERTA NUOVA** a tn Naples, cap prov Terra di Lavoro, in an agreeable plain 7 m S E E Capua. It contains a royal palace commenced in 1742 by Charles III. of Spain a large, elegant, and profusely ornamented structure, to which is attached gardens adorned with numerous statues, ancient and modern. The park of great extent, is regularly planted and supplied with water from Mount Taburno, by an aqueduct 22 m in length. The town has several churches, a convent of noble ladies an hospital military school handsome public square, and spacious barracks for the troops. In some buildings attached to the palace a silk manufactory has been established and the produce, some of which are unembroidered are reckoned equal to the best stuffs made in Europe. The district produces excellent fruit as I wren of superior quality. Pop. 5000.

CASHAN See KASHAN

CASHEEN—A bay Ireland, co. Galway W side of Garraun, 84 m N the Aran Is. It is easy of access, and well sheltered. A river flows on. Key is famed by the confidence of the Fells, the Gulls, and the Birds, 64 m W. Latrovel and, after a short W course, falling into the Shannon.

CASHILL, a city and par. ter. Ireland, co. Tipperary 86 m. S.W. Dublin. It consists of one principal street from which several others diverge irregularly and has, on the whole, a mean and poverty-stricken appearance, although in some parts the houses are good, and one or two of the streets look clean and respectable. The supply of water is scanty and in the summer season altogether inadequate. The cathedral and St. Catharine chapel are both modern buildings, and both spacious. The archbishop's palace is a large and handsome mansion, with extensive gardens attached, and a library containing 9000 volumes. There are also here a convent of nuns, and a Methodist meeting-house, an infirmary, barracks, and court-house, a brewer's and handsome infantry barracks, and some interesting ruins of Hore Abbey or Grey Friars the Dominicans Abbey and those on the celebrated rock of Cashel. This remarkable rock rises abruptly from a plain, close by the city which it overlooks. On its summit are a series of rounded mounds, consisting of Cormac MacCallin's chapel, built in the ninth century a round tower 56 ft in circumference, and 80 ft in height, of unknown date, but supposed to be the most ancient building on the rock. a cathedral, castle, and monastery all built about the 12th century

CASHILL, from the North.—From Burdett's Survey and Antiquities of Ireland.

and presenting such a variety of ecclesiastical architecture, as to render them the most remarkable and interesting ruins in Ireland, an interest not a little increased by their singular and conspicuous position. There are no manufactures of any consequence in the town. It returns one member to the House of Commons constituency (1869) 141 1 op 1851) 1247

CASHILL and Islands, par. Irel. Longford 15,860 sq. Pop. 5227

CASHIGAR, KASHGAR, or KASHGAR, a m. and dist. of the Chinese empire, dependency of Thien-shan-shan-Loo, of which Cashgar forms the most W portion. The town of Cashgar is situated on a river of same name, 140 m. N.W. Yarkand lat. 39° 28' N; lon. 73° 57' E. It is the most W place of note in the Chinese empire, and is strongly garrisoned with troops. In the middle of the town is a large square, from which four hazyards branch off towards the gates. It has considerable manufactures of jade, gold silk, cotton, gold and silver cloths, and carpets, and is also an important trading locality the several routes which centre in it making it the emporium for the commerce of Central Asia. It came into Chinese possession by conquest nearly a century ago. Cashgar is said to have been a commercial city before the Christian era, and was once capital of an independent kingdom. Pop. variously estimated, from 20,000 to 40,000 but some authorities make it as high as 80,000.

CASHMERE, or KASHMIR, a country in N.W. Hindostan, Punjab dominions. It consists of an extensive valley of an irregular oval form, lying N.W. and S.E. 5400 ft. to 6000 ft. above the sea, and surrounded on all sides by lofty mountains, secondary ranges of the Himalayas. As laid down on Arrowsmith's Map of the Punjab Kashmir etc. it is comprised between lat. 33° 27' and 34° 37' N. and lon. 74° 30' and 75° 14' E. area estimated at 4500 sq. m. The alluvial plain in the bottom of the valley is estimated at 75 m long by 40 m broad. The mountain range which encloses the valley is on the N. called the Durratir and Kailash Mountains. N.E. the Haramukh and Roanang Mountains E. the snowy Parnal S. the Pir Parnal and Parnal of Parnal and W. the Pir Parnal. Excepting for a fifth part of the circumference S.W. of the capital Resingur their summits appear to be covered with perpetual snow. The highest peak seems to be the Pir Parnal, 15,000 ft. high, on the S.W. boundary of the valley and on the N.E. the Haramukh is 14,000 ft. The mountains generally appear to be of basaltic formation, presenting at times beautiful amygdaloidal trap in the N.W. schistose rocks, penetrated by quartz veins, rise to the height of 500 or 1000 ft. and N.W. of these gypsium appears. Primary rocks are rare and though granite boulders are some times met with, these rocks have not been found in situ. Felshy conglomerate sandstone and clay covered gray gneiss on the lower slopes of the mountains. Earthquakes occur. In 1828, about 200 shocks were felt, and in June of that year 1200 houses were destroyed, and 1000 persons killed in Resingur. Some have supposed the valley to have formed the crater of a volcano at all events, it has evidently once been the bed of a sea, as is shown by the great beds of limestone, containing marine fossils. Iron has been found abundantly embedded in the limestone and is worked and copper is known to exist in the valley. Phosphoric stone in the Pir Parnal excellent limestone exists in inexhaustible quantities some of it in the form of fine black marble. The valley is entered by numerous passes, 11 of which are said to be practicable for horses but none of them for wheeled carriages. The most important are the Haramukh and Parnal on the W. front the latter 8500 ft. high. Parnal on the S. 6000 ft. and has on the S. all practicable at all seasons of the year. The Pir Parnal is 12,000 ft. high, and the Hindurir leading to Iskard, is 11,271 ft. (altitude is watered by the Jelum or Helmut which rises in the mountains of the S. further flows N.W. through the centre of the valley receiving numerous streams from both sides, and expands into lake Wuller which is also the recipient of several other streams. From the S.W. end of the lake the river stretches, pursues a W. by E. course, and leaves the valley of which it is the sole drain by the Baramula Pass. The channel of the Jelum is very winding and the river is navigable for boats of considerable burden from near Islamabad to its exit from the valley. The principal lakes are the Dal or City Lake, close by the capital, 6 m long by 4 broad the Manas Rai small but said to be deep and the Great Wuller Lake, which is merely a shallow expansion of the Jelum, 10 m. long by 9 broad. Besides these, which are on the E. bank and there are numerous small pieces of water in the mountains. The whole of the valley is thus most perfectly watered, and admirably supplied with the means of irrigation.

The climate, though subject to extremes of temperature, is, on the whole, salubrious. In consequence of the great elevation of Cashmere, the cold of winter is rather severe. Night frosts set in about the middle of November and early in December snow begins to fall covering the ground to a depth of 2 ft., and clothing the surrounding mountains in a dazzling whiteness but the Jelum is seldom frozen over. The hottest season is from the middle of July to the middle of August, when a peculiar stillness for which the air of Cashmere is remarkable, renders the heat greater to the sense than it really is, the thermometer ranging, at noon, from 80° to 85° in the shade. Rain falls plentifully in spring and the beginning of summer. The soil is in general, exceedingly fertile.

Rice is the principal crop, the returns being from 30 to 40 fold, and in favourable seasons, as high as 60 or 60. Wheat, barley, millet, and maize are also cultivated, but are a precarious crop, in consequence of the scanty rains in summer. Buckwheat is extensively cultivated. Cucumbers and melons are raised in small artificial floating gardens on the City Lake. Tobacco is also cultivated, but to a very limited extent. Cotton more largely. Great quantities of cotton, of excellent quality is grown, and most of it exported. Grapes are cultivated, but with indifferent success. Excellent vegetables are produced in great variety and abundance including kidney-beans, turnip, cabbage, beet-root, radish, capsicum, &c. Amongst the natural productions the most valuable is the *Singhara* or water-lily, the seed of *Tropaeolum*, on which a large portion of the poorer inhabitants almost wholly subsist. It grows in the Wular Lake, from which about 60,000 tons are annually taken. The nuts are eaten raw, boiled, roasted, or ground into flour and made into gruel and, though insalubrious, are extremely nutritious. The principal fruits are apples, pears, plums, cherries, apricots, &c. Amongst the finest trees of Cashmere are the *deodar* or Himalayan cedar (*Deodar deodara*), the *shimar* (*Platanus orientalis*) the poplar, and the lime, all of which abound, and attain a great size and luxuriance, and the wild olive-tree, growing in a zone extending that of the European variety, some measuring 100 ft. from the ground to the parting of the branches. Maple, willow and white thorn are common and on the steep declivities of the mountains birch alder and various kinds of pines. Flowers of various kinds and of surpassing beauty grow everywhere in vast profusion, especially roses, which are carefully cultivated for the sake of the stier extracted from them.

The wild animals are bears, brown and black, a sort of leopard, of a white colour with small black spots, jackals, foxes, otters, stags, gazelles, the ibex wild goats, muntjaks, and other species of deer, argals and caracals, but no lions. Birds of prey are numerous including various species of vultures, one of them said to be the largest in the world, and so unwieldy that it is often killed before it can rise from the ground; the other kinds are eagles, hawks, and falcons. There are also various kinds and vast numbers of geese, ducks, cranes, bulbous, snipes, woodcocks and small pelicans, various game-plumbers and partridges. The smaller kinds of birds are numerous, including the bulbul or nightingale, which however is a different species from the European one, to which it is also greatly inferior in song; venomous reptiles, rare. The waters abound in fish including a species called *ash*, which often attains the weight of 24 lbs. is firm in the flesh and of fine flavour. The horses are small and altogether of an inferior description, though said by Hilg to be bravelly hardy and tractable. Black cattle, sheep and goats are numerous, the breed of the black cattle small but they give a abundance of milk; the mutton is said to be well flavoured.

Cashmere has been long celebrated for its shawls. The wool used in the manufacture is of two kinds, one obtained from the tame, the other from the wild goat, wild sheep, and other wild animals. It is the fine down growing next to the skin, along that taken, the long hairs being all picked out by the hand. Three shawls are employed in an embroidered shawl of an ordinary pattern for three months, but a very rich pair will occupy a shop for 18 months. They are dyed in the year and carefully washed with rice flour instead of soap after the weaving has been finished. The embroidered border of the finest shawl is generally made separately and joined skilfully by sewing to the field or middle part, which sometimes consists of as many as 10 different pieces, neatly joined. The first cost of a pair of fine shawls has been estimated at £200 that is, for labour materials dyeing duty and other charges. The demand for the shawls of Cashmere has, from various causes, greatly fallen off late years and is still on the wane. Cashmere has long been nearly as famous for the gun and pistol barrels as for its shawls. The artisans employ extraordinary pains in fabricating them and produce work of singular beauty and excellence. Paper and leather for saddlery are also manufactured, both of superior quality. The paper is said to be the finest made in India. Lacquered ware, of the most beautiful description and finest workmanship, is likewise amongst the products of Cashmere and the lapidaries excel in taste and skill those of Europe.

Vol. I

the stier of roses made in the valley is considered superior to any other.

The total amount of the exports of Cashmere has been estimated at £400,000 and the imports at £50,000. Of the former the principal articles are woollens and rice of the latter shawl wool.

The greater part of the population are Mahomedans. In physical qualities, the natives of Cashmere excel all other branches of the great Indian nation being tall robust and handsomely formed. In disposition they are lively witty and good humoured but addicted to all the vices common to the other tribes of India. They are selfish intriguing dishonest, and false. The language is a dialect of Sanscrit, containing a large admixture of Persian, in which the records and correspondence of Government are written. The pronunciation of the natives is broad coarse, and uncouth. The dress of both sexes consists of a long loose wrapper and trousers, the former of woven cloth. In cold weather both sexes carry a little wicker basket, containing a small iron or earthenware vessel holding lighted charcoal and called a *kanger* which they apply to such parts of the body as require to be warmed. Cashmere contains 10 towns, and 2,800 villages the chief towns are Cashmere or *Baramulla* the capital, Chitral, Gilgit, Islamabad, and Peshawar. In 1586 Cashmere was subdued by the Emperor Akbar and was incorporated in his empire. The Afghans vanquished it in 1722 and it remained under their sway till 1819 when it was conquered by the Sikhs, and since that time it has continued under the dominion of the Maharajah of the Punjab. Pop. about 200,000 to which number it has been reduced in 20 years from 800,000 by earthquakes, pestilence, and famine.

CASHMERE is in SW. ASIA.

CASHMERE is in SW. ASIA.

CASHMERE is a dangerous group of rocks in the Channel about 7 m. W. Alderney on the N. point of which is a light-house; lat 49° 43' 24" N. lon 2° 23' 30" W. The Victory a ship of 110 guns, was fired off these rocks in 1744. CASHMERE is a tu and com. Tuesday prov. of, and 18 m W by N. from an elevated plain. It is surrounded by walls com. surrounded by a fortress and contains a fine collegiate church and a handsome palace. Pop. 1300.

CASHMERE is a tu, Naples, prov. Abruzzo Citra 10 m. W. Lanciano with several churches and two normal schools. Pop. 5866.

CASHMERE is a tu and com. kingdom of Italy. Lon. fairly prov. of and 11 m. N.W. Java. It is tolerably well built and contains a church in which some fine pictures and frescoes are preserved. In 1259 the M. lines commanded by Lord Vico on the island a decisive victory here over the Umayyads, in the day, Mar. 10 of Aug. 1000. Pop. 4900.

CASHMERE is a tu, Naples 6 m. N.W. E. bay. It has four fine churches, and is the residence of a district judge. Silk is produced in the neighbourhood. Pietro Marino, the painter was born here. Pop. 7024.

CASHMERE is a tu, Spain, Aragon prov. Saragossa, 12 m. N.W. E. Alcañiz, L. bank Guadalquivir near its confluence with the Ebro on several small hills and in the intervening valleys. It is paved streets, com. principal and more smaller squares a handsome Gothic collegiate and two other churches, several chapels, three schools, a townhall and prison in a suppressed convent an hospital and several public fountains. Manufactures—wool, oil and soap and some trade is also carried on in grain and cattle. Two annual fairs are held Pop. 7,000.

CASHMERE is a tu, [Caspian Sea, or Tyrrhenian] a large island sea, lying for the most part between Europe and Asia, 2 m. precisely between lat. 39° 05' and 47° 30' N. and lon. 46° 48' and 5° 25' E. Greatest length from N. to S. 730 m. greatest breadth 8 part about lat. 45° N. 270 m. narrowest part between Cape Apollon in Europe, and Cape Tauris in Asia, 150 m. Bounded N. and W. by Russia and Persia. E. by the Kirghiz steppes and Kurra, and S. by Persia. Area 140,000 sq. m. draining in Europe alone, an extent of 850,000 sq. m. Although at some points, the Caspian attains a considerable depth. However having in no place found no bottom at 480 fathoms. It is remarkable for its shallowness generally especially along its shores, where it seldom exceeds 3 f. for a distance of 100 yards from the

78

land. Its R. and W. coasts, particularly the former are deeply indented with bays and gulfs while the S. shore is almost unbroken. The principal bays on the Asiatic side are Emba Bay, Morsk Bay, Black Lake Bay, Mangyshlak Gulf, Ishkharishan Bay, Akkordinsk ulf, Kara-Bugha, Gulf and Balkan Bay. On the opposite, or European side, occur the gulfs of Zial, Azov and Kuma, with several less marked indentations. The only one on the W. coast is Astrabad Bay (or the lake of Euzei) which has only four feet water be excluded.

The Caspian owns no numerous islands, but not many of any great extent. The largest are on the Asiatic side, the greatest number on the European particularly about the mouth of the Volga and along the coasts to the N. E. and N. W. of them, where they are closely crowded together in countless numbers, most of them however being mere islets.

The waters of the Caspian are salt, but not nearly so much as those of the ocean. It has no tides and no outlets, its superfluous waters being carried off solely by evaporation in the region of the Volga, including the territory from that river E. E. to the Baku, and W. W. to the bank of the Euzei, the whole of which is covered of recent alluvium deposited by the several streams. From E. to W. Sakas, Akhmeta, the coast is a upper terrace formation, broken in to some points by carbonaceous strata. E. of it is the Volga, and round the 8° extent of the sea the coast is low and sandy—lacked at some distance by the hill. The E. and W. coasts have generally a flat, as the sea is covered by moving sand and are generally flat (Cape Karagan, formed by movement of the same name being an exception).

Sturgeon and caviar are caught in the Caspian in great quantities and there are also salmon trout, perch, "Pike" Sturgeon, Bismarck, two kinds of carp, "Pike" fish, "Scales" about in the upper course of the river, between the mouth of the Volga and the lake. The mollusks are few and to be only four—*Cardium rusticum*, *Cardium squamatum*, *Mytilus galloprovincialis*, and *Mytilus galloprovincialis*. The chief fishery for sturgeon is at and near Astrakhan. In and about the river Euzei it is common 500 m. from the mouth of the Volga to the gulf called M. rivus, and about the island of Tobolsk near the Gulf of Azov, and not far from the cape of that name contains a fish establishment for smoking drying and salting fish. In the surrounding waters the fish Europe and India was carried on partly by its waters about the middle of the 13th century. Astrakhan on the N. E. Caspian, and M. Baku nearly in the same latitude on the Black Sea, forming the chief entrepôts till 1840 when the Black was superseded through the extension of the Genoese, for the given establishment at Kaffa, which then became the transit station for the Asiatic European trade, and so continued till 1453 when the Turks, having seized Constantinople, and barred the Bosphorus, the accustomed trade was forced into other channels, and the Caspian deserted except by the few vessels which carried on a small local trade between Moscow, Persia, and Central Asia.

About 1550 an English trading company endeavored to open up commerce by way of the Caspian with Persia and Turcomania, but with no good results. From that time till late in the 17th century the annals of navigation give few notices of this sea. At the latter period Peter the Great, partly in the hope of diverting the Indian trade into the direction of his dominions, caused the coasts of the Caspian to be explored by Dutch navigators in his day. His intention was, as one means to him and to found trading stations on ground ceded by treaty or taken by force, on the Persian seaboard. But this he failed to do, and when he died his project lay dormant, and the Russians made no encroachment beyond what Peter had already effected till the reign of Catherine II. whose conquests in his S. region were not secured till our own times. (Honnore de M. B. *Strages de la mer Caspienne* Zimmernann, *Denkschrift über den westlichen Lauf des Caspien* de.)

The basin of the Caspian is most extensive on the N. and W. from which it receives the Volga, the Terek, the Kura and numerous other streams of less note. By means of small cuttings in Russia, between the head streams of the Volga and the rivers Terek and Kuma, water communication is established between the Caspian and the Baltic. The basin of the sea is limited by the Elburs mountains, and V. the main range (Khyva) and it only short streams, and of great importance on this side is evidently at one time near the Dnieper or Anzou, now an affluent of the sea of Azov. Indeed the Caspian and Lake Azov were, doubtless, at one period united. They are apparently on the same level and, though the plateau of the Caucasus might

at first sight appear to present an insuperable obstacle to the idea of a junction ever having existed, yet it is of this plateau and in the course which the Caspian probably followed is a low tract leading into the head of what at one time was the estuary of the Orux, but now is a sandy waste, E. and S. of Kara-Bugha gulf which formed its termination. Both lakes belong to the great depression of W. Asia—a depression at one time supposed to be much greater than it is believed to be now, though it either a rise in the land has taken place, it is difficult to determine. The exact amount of the depression has not yet been satisfactorily settled—the most trustworthy data we possess being at variance. The last two levellings were executed, the one in 1837 by Messrs. F. and S. Salter and F. and S. Salter under the auspices of the *Académie Impériale de Médecine* and the other in 1838-9 by M. Honnour de M. B. According to the former measurement the Caspian is 81.4 ft. below the level of the Black Sea. But, according to the latter it is only 11.4 ft. below about 384 ft. Should the latter measurement be ultimately found to be correct, what has hitherto been supposed to be the depression of W. Asia, may turn out to be actually above the level of the ocean. The sinking up of streams lowering the accession of water and contracting the stream, with the great depression about 1000 ft. in addition to other causes in operation, are gradually reducing the size of this inland sea. It has been supposed to increase and decrease in area, at certain times; but this when it is believed to be explained by the fact, that in my winds beating for any length of time upon the flat here sometimes drive the water up over a great extent of land. M. Honnour de M. B. alleges that a rise of even 10 ft. would flood the steppes of the Kuma for a vast distance beyond the Terek and Astrakhan and the Terek, and although every year house and military staff in on the line. It was consequently be taken for granted that such a rise has taken place at all events since the beginning of last century when the first Russian settlements in these regions were established, otherwise we should have had authentic records of such a visitation.

The notices of early commerce upon or by way of the Caspian are few and uncertain. Even for several centuries after the Christian era its authentic trade records are nearly a blank. The chief portion of the commerce between W. Europe and India was carried on partly by its waters about the middle of the 13th century. Astrakhan on the N. E. Caspian, and M. Baku nearly in the same latitude on the Black Sea, forming the chief entrepôts till 1840 when the Black was superseded through the extension of the Genoese, for the given establishment at Kaffa, which then became the transit station for the Asiatic European trade, and so continued till 1453 when the Turks, having seized Constantinople, and barred the Bosphorus, the accustomed trade was forced into other channels, and the Caspian deserted except by the few vessels which carried on a small local trade between Moscow, Persia, and Central Asia.

About 1550 an English trading company endeavored to open up commerce by way of the Caspian with Persia and Turcomania, but with no good results. From that time till late in the 17th century the annals of navigation give few notices of this sea. At the latter period Peter the Great, partly in the hope of diverting the Indian trade into the direction of his dominions, caused the coasts of the Caspian to be explored by Dutch navigators in his day. His intention was, as one means to him and to found trading stations on ground ceded by treaty or taken by force, on the Persian seaboard. But this he failed to do, and when he died his project lay dormant, and the Russians made no encroachment beyond what Peter had already effected till the reign of Catherine II. whose conquests in his S. region were not secured till our own times. It is the seat of a bishopric, and has a cathedral four convents, a seminary an hospital and an old almost inaccessible castle. The district produces cotton, legumes, grain, fruit, silk, and wool, and the inhabitants manufacture macaroni, leather and table linen. In the vicinity are hot sulphurous springs, and plaster and stone quarries. Pop. 6000.—2 A to prov Principato Ultra, 8 m N W. St. Angelo de Lombardi on a hill washed by the Calore. It has a handsome church and several two charitable institutions and a paper manufactory. Pop. 4620.—3 A to prov Bari 12 m N. I. Alcamara with a parish church a convent, hospital three charitable institutions, and two manufactures of copper ware. Pop. 4713

CASANO ADRIA a to Ital. Lombardy pr. v. of d. 16 m N. E. Milan pleasantly situated on a hill 3 m N. of it. It is very old, and built mostly of bricks. A bridge of 800 piers connects it with the opposite bank of the river. There are here numerous silk mills. Casano is famous for the victory gained here on August 16, 1705 by the French under the Duke of Vendôme, over the Imperialists under Prince Eugene and for the defeat sustained on Apr. 1, 1798 by the French under Moreau from the Austrians and Russians under Suwarow. Pop. 1125.—Two other places in Lombardy have the name of CASANO

CASAY or KATIKER a prov. India, between the Ganges between lat. 23° 30' and 25° 20' N and lon. 95° and 95° E bounded N by Assam, E by Burmah and W by Cachar. It contains an extensive valley 80 m long by 10 broad covered with grass, jungle, and swamps but the country generally is mountainous, having elevations of from 4000 to upwards of 8000 ft. Some parts of the lower districts are fertile yielding good crops of rice tobacco indigo, cotton sugar spinney, and mustard. It is celebrated also for its breed of horses. Numerous rivers, some of them of considerable size, intersect the province. The largest are the Barak Imajel Teerool and Kyen-dwan the last two affluents of the Irrawaddy. Casay is an independent province, and is governed by a hereditary Rajah. The principal town is Manecpoor or Munpoor which name is sometimes applied also to the entire province. It was formerly tributary to Burmah but at the conclusion of the war between that state and the E. India Company Casay obtained its freedom

CASSEL (anc. *Cassellum Moguntinum*) a to Franco. dep. Nord on an isolated conical hill in the middle of a rich and extensive plain 16 m S. Dunkirk on the railway thence to Lille. The streets are clean, and provided with fountains the houses well built of brick, and in general having gardens attached. Lace linen hats, stockings, soap, and pottery are manufactured here. There are also several oil-mills, bleach fields, breweries, and tanneries, and a considerable trade in agricultural produce. This town is of great antiquity and is said to have been the capital of a district in the time of Julius Caesar. In 1571 it was surrounded by thick walls and bastions, of which there are few remains, except three gates,

two of them attributed to the Romans. The view from Mount Cassel is one of the most extensive in Europe. It extends over the plains of Flanders, and as far as the white cliffs of England and takes in 82 towns and 100 villages. This hill was one of the principal signal stations of the great trigonometrical survey for measuring an arc of the meridian. Pop. 2550

CASSEL, or KASSEL (anc. *Cassellum Catorum*) a to Germany prov. Lower Hesse cap. of Hesse Cassel, and of circle of same name beautifully situated on both banks of the Fulda, 91 m N N. Frankfurt-on-the-Main. It is divided into the Altstadt or Old Town the Upper Neustadt or Upper New Town, the Lower Neustadt or Lower New Town with the Wilhelmshöhe and Frankfurt suburb 1 bank of the river and Leipzig suburb, &c. &c. The two portions of the town are connected by a stone bridge of three arches, across the Fulda, 258 ft. in length. The old town lies low down close to the river banks and consists of narrow and dirty streets while the new part built upon an elevation formerly occupied by a fortress is airy and agreeable the streets spacious and well laid out, and the houses handsome. The Upper New Town contains a number of squares, in the principal of which the Friedrich's Platz, the largest in any town in Germany stands the Elector's palace, an indifferent structure, and next to it, the museum the handsomest building in the town containing a library with 100,000 volumes, and many valuable MSS. Within the same edifice are a collection of antiquities, a number of fine rare objects of art and science, including some interesting Roman remains found in Hesse Cassel, coins, medals and seals and a picture gallery containing 1400 pictures, among which are some by Rubens Rembrandt, Van Dyke, Tintoretto, &c. This square is lined on three sides by a double row of fine trees, and at the centre is a colossal marble statue of Frederick II. The other most noticeable public areas are—King's Platz, in the form of a crescent and remarkable for possessing a siffling echo. Charl's Platz, which is a statue of the Landgrave Charles and William's Square. In the Old town are the old town hall the Government buildings, the Stadthaus appropriated to public

ST MARTIN'S CHURCH AND GOVERNMENT PLACE, CASSEL.
From Large A. station on Düsseldorf.

AMUSEMENTS St. Martin's church with the staircase beneath it, in which the remains of the Sovereigns of Hesse Cassel are deposited the Lutheran the Brethren's and the Garrison churches a synagogue an orphan hospital and asylum an arsenal foundry for cannon and a house of correction. In the Upper New Town there are, besides the F. Catholic churches, the most excellent academy lyceum, buildings spoken on above, the mint a cadet academy lyceum, a normal and civic school, a theatre, the New Town and the F. Catholic churches, an hospital, and an infirmary. The Lower New Town contains an ancient fortress, now used as a state-prison the Lower New Town church, a Protestant orphan asylum, infirmary lying-in hospital, house of correction, and common prison. In the Leipzig suburb are an

hospital and infirmary, in the Frankfurt suburb a house of industry and in the Wittenbergschloß suburb a large hospital. Casen has, altogether, eight churches—seven Lutheran, and one synagogue, with a Jewish theological and practical school. It has also academies for painting, sculpture, &c., an observatory and several associations for the promotion of trade, agriculture, and manufactures. Its trade is considerable, but is improving. It has manufactures of cottons, silk, and woollen fabrics, hat gloves, leather hats, carpets, porcelain, musical instruments, dyes, playing cards, soap, gold and silver lace, earthenware, lacquered wares, linen, damask, starch, hardware &c. Casen is partly walled, and has 11 large and small gates. It has two fairs, and a wool-market, annually. There are many fine walks and public gardens in the vicinity, amongst the latter are the gardens of Wittenbergschloß, in which is situated the Elector's summer palace. Casen is connected by railway with Leipzig and Frankfurt-on-the-Main. 1 op. of W. 22,516 of cereals, 68,475.

CASSEN or **KASSAB**, a in E. Africa, territory Berait, a mountainous and woody country lying immediately S. of Nubia and W. of the R.W. portion of Abyssinia, 1 bank, Tassat.

CASSINE a in Italy Piedmont prov of and 14 m. S.W. Alcantrane near bank, Roraida. It has three churches and three con. est. 7 m. 2500.

CASINGTON par Eng Oxford 2970 as Pop. 4-4 **CASQUILLARI** or **LAMPUNIER**, a deep rapid river S. America, 1 meanders, forming the S. bifurcation of the Uruguay, by which that river has navigable communication with the Rio Negro. It leaves the Uruguay in lat. 3° 10' N. lon. 68° 5' W. about 20 m. S. Esmeralda, and, after a S.W. course of 12 m. falls into the Rio Negro near San Carlos, in lat. 2° 5' N. lon. 67° 40' W. It is 100 yards broad where it joins the Uruguay, and about 500 yards at its junction with the Rio Negro. Slope 560 ft. per second and, between Esmeralda and San Carlos, falls 220 ft. By means of this river water communication is established for canoes over an immense tract of S. America, it being practicable to sail from the interior of Brazil to the Llanos in Venezuela, through the Amazon, the Orinoco, and their affluents.

CASSIR, a seaport in France, dep. Bouches-de-Rhône, 9 m. S.E. Marseille, on the Mediterranean lat. 43° 13' 46" N. lon. 5° 12' 12" E. The houses are not so elegant in the square as in the Orinoco, and about 500 yards at its junction with the Rio Negro. Slope 560 ft. per second and, between Esmeralda and San Carlos, falls 220 ft. By means of this river water communication is established for canoes over an immense tract of S. America, it being practicable to sail from the interior of Brazil to the Llanos in Venezuela, through the Amazon, the Orinoco, and their affluents.

CASTAGNARO, a vil. Austria Italy gov. Venetia, 4 m. S.E. Verona, 7 bank, Adige, at the head of the canal of its name, which enters with the Canal Biadon. P. 1800.

CASTALLA a in Spain, Valencia, prov. of, and 24 m. S.W. Alicante, at the base of a conical and isolated hill surrounded by an ancient and decayed castle. It is divided into two portions, the old and new. The former occupies the upper part of the hill, contiguous to the castle, and is composed of narrow steep, and inconvenient streets and lanes. The modern erections are situated at the foot of the slope, and consist of four squares, and three, wide, and well-paved streets. The whole contains two churches, several convents, a large and handsome townhall, a court-house, two schools, a prison, hospital cemetery and two public fountains. Wine and oil are manufactured trade considerable. Pop. 3002.

CASTA MHC. **CASANKHOU**, or **KASTANOU** a in Asia Turkey, prov. Anatolia, 100 m. N.E. Angora lat. 41° 21' N. lon. 32° 40' E. It is a valley on the W. bounded by hills, on a spur of which stands the ruins of an ancient castle. The houses are of two stories, in general all built of wood the streets are narrow and dirty and a deep channel into which all the filth of this town is collected, runs through

its very centre. It has no public buildings deserving of notice, but has numerous mosques and baths, a Greek church, and tolerable new barracks. The chief manufacture is printed cottons, for which there are said to be 25 printing houses, having from four to eight presses each, also 23 dyeing houses, of which six are for red, and 16 for blue dye. The chief trade is in wool that of the neighbourhood being considered little inferior to the celebrated wool of Angora. Pop. estimated by Alauwer at 46,000. (Lond. Gen. Jour.)

CASTANO or **CASTERO** a vil. and com. Italy Piedmont, prov. of, and 18 m. W. N.W. Milan in a pleasant and fertile plain, between the Ticino and the Grand Canal. It contains a parish and two auxiliary churches. Pop. 2608.

CASTEL, a fortified in Hesse-Darmstadt, 7 bank, Rhine, opposite Mainz, with which it is connected by a bridge of boats and a station on the Taunus Railway from Frankfurt to Wiesbaden. Around it the vine is cultivated. Pop. 2600.

CASTEL-A-MARE (castle by the sea)—1 A seaport in Naples, prov. of on the gulf of and 17 m. S.E. the city of Naples lat. 40° 41' 20" N. lon. 14° 28' 16" E. (N.) It is fortified has a small mole, like a hook, running out N.W., is the seat of a bishopric, contains a royal palace, a cathedral five churches, several convents, a military hospital, good barracks, and a tolerable dockyard. has several manufactures of linen, silk and cotton fabrics, besides tanneries has a N. exposure, and is much frequented during summer chiefly on account of its hot baths. The environs are celebrated for their beauty and fertility but in autumn the situation is damp, chill and disagreeable. Castel-a-mare occupies the site of the ancient Stabia destroyed by Sylla during the civil war. It was overwhelmed, with Herculaneum and Pompeii, by an eruption of Vesuvius, A.D. 79 and it was here that the elder Pliny met his death by approaching too near to the burning mountain, when in a state of violent emotion. The modern town was afterwards built from the ruins of Stabia. Pop. 18452—2 A seaport in Sicily prov. of and 30 m. E. Trapani on the gulf of same name lat. 38° 1' N. lon. 12° 53' E. It lies low in a fertile district, and is dirty. Wine fruit, grain, madder, oil, fax, saffron and aniseeds are exported in considerable quantities. Pop. 8034.—The walls are about 15 m. E. to W. at its mouth, contracting, in a semi-circular manner on either side, to about 6 m. it is about 14 m. N. to E. It has deep water and good anchorage near its shore, but is not safe in N. winds to which it is much exposed.

CASTELLAZZO a town in Italy Piedmont, prov. of and 4 m. S. Alessandria, between the Bernina and the Orba. It has four churches five convents and some trade in the products of the country around. Pop. 5000.

CASTELLETTO-SORFA a town in Italy Piedmont prov. of and 19 m. N. Novara, r. bank Ticino. It contains a church and a convent. Pop. 2069.

CASTELLINA DEL CHIANTI, a tn. Italy Tuscany prov. of and 12 m N by W Siena, on a hill top, W of Monte Chianti tolerably well built; has walls, entered by two gates, is commanded by a castle, and has a handsome parish church. Pop. 874.

CASTELLU BARONIA, a tn. and com. Italy Naples prov. Avelli. 12 m S of Ardea. It contains a castle and two churches, and manufactures a few coarse woollens. In the neighborhood are sulphurous and alkali-beds springs. Pop. 1434.

CASTELLO DE-VINA, a tn. Portugal prov. Beira-Baixa, esp. dist. of same name, on a height, 9 m N Portalegre. It is surrounded by ancient walls, and defended by a strong castle contains three churches, and has considerable manufactures of woollen cloth. A great number of wines are annually killed here. In the vicinity are no fewer than 300 springs. Pop. 3841.

CASTELLO-MANCA, a tn. Portugal, on prov. Beira-Baixa, and the see of a bishop, on a height, near L. bank Lusa or Lusa, 26 m S of Coimbra. It is surrounded by walls, flanked with seven towers, and is defended by an old castle but the streets are steep and the houses indifferently built. It contains the bishop's palace which is surrounded by fine gardens two church and two monasteries outside the walls two hospitals, and a richly-endowed porchouse. Pop. 9760.

CASTELLO-DE-LE PLAZA, a prov. Spain one of three into which the ancient kingdom of Valencia was subdivided in 1542 between lat. 39° 38' and 40° 4' N. and lon. 0° 55' E. and 1° 25' W. area, 2844 sq m bounded N by prov. Teruel and Tarragona, E by the Mediterranean Sea, S by Valencia and W by Teruel. On the N and W it is extremely rugged and mountainous, with a sharp, bracing climate exposed to the boisterous N and W winds while to the E and S it abounds with rich valleys and fertile plains, and enjoys a soft atmosphere the oppressive summer heats tempered by refreshing sea breezes, and sheltered in winter from the piercing blast by the adjacent hills. The mountains are chiefly of sandstone their more elevated summits capped with snow during the greater part of the year the prevailing part being Peneolite, 9000 ft. above sea level their lower slopes generally covered with pine, oak, beech, holly and other hardy trees and shrubs. Iron copper cobalt, quicksilver and lead, vermilion silver and other metallic substances are found and mined in various localities and several quarries of marble, granite, &c. are wrought. The plains and valleys are generally well cultivated for Spain and produce grain, fruits, and vegetables, of all classes of good quality and in great abundance. They are watered by the rivers Mijares, Moncayo, Jergueta, Cuenca, Cerrato and numerous smaller streams and in some districts, irrigation is successfully practiced. Mineral springs are numerous. The inhabitants till the ground, rear cattle, fish, manufacture linen, woolen, hemp and cotton fabrics, paper soap, earthenware, hardware carpentry, work in iron and copper foundries, distill brandy and express oil and wine to some extent. Education is much neglected there are numerous schools in the towns but the great proportion of the people are lamentably ignorant. They are generally robust and hardy in constitution, and temperate in their habits but though fond of amusement, idleness and vindictive in disposition. Pop. 247,741.

CASTELLO-DE-LE PLAZA [see *Castello*] a city and port, Spain, esp. of above prov., 40 m N N E. Valencia, in an extensive and fertile plain, irrigated by the Mijares, whose waters, through the medium of an ancient aqueduct, cut for a considerable distance through solid limestone rock, are conveyed 5 m. into the town, affording a copious supply to the inhabitants, and dispensing life and verdure in the vicinity. The great work was probably the construction of James the Conqueror King of Aragon about 1240. The defences of the city were strengthened and increased, by the addition of batteries and a fossé, in 1537 but the works are now falling to decay for want of repair. The houses are in general well built and commodious, and the streets wide, straight, clean and, though unpaved, many of the more important in good condition. It has also squares, a town and earthwork and parish church, whereas are some good palaces, numerous convents, six chapels of ease, Latin, human and primary schools, an hospital, porchouse, theatre, barracks, orphan-asylum, bull ring, two prisons, a cemetery

several convents, and a spacious and handsome episcopal palace. Manufactures—linen, woollen and hempen fabrics, especially sail-cloth, also ropes, paper soap, vermillion, glass, earthenware, bricks, tiles, fire-arms, brandy wine, oil, &c. Much attention is paid to the rearing of silk-worms. Imports—sugar coffee, alcohol cotton clothes, vinegar and salt fish annual value, about £18,000. Exports—hemp grain, fruits and manufactured goods annual value under £15,000. The vessels frequenting the port are numerous, but small the average annual tonnage being 15,000. Castellon was taken from the Saracens, in 1233, by James I. of Aragon, and subsequently given by him to the monastery of San Vincente of Valencia. Francisco Ribalta, the painter and his son, Juan Ribalta, also an artist, were born here. Pop. 16,952.

CASTELLON DE-AMPUZAS, a tn. Spain Catalonia, prov. of and 20 m. N E Gerona, on a small hill & bank, Muga. The houses are small and inconvenient, and the streets narrow and mean. It contains, however, a magnificent church, several convents a fortalice college, prison, several schools, a theatre, hospital, and public promenade ornamented with an avenue of trees and a fine fountain. The inhabitants are chiefly engaged in husbandry cattle-rearing and fishing. Pop. 821.

CASTELLON DE-JATIVA or **VILLANUEVA DE CASTELLON**, a tn. Spain prov. of and 30 m. S. by W Valencia, in a plain, & bank Albufera. The town is surrounded by a wall, and entered by four gates. The houses are, in general, spacious and well built, forming a principal street, several diverging lanes, and four small squares. It also has two churches two chapels, a townhouse, prison, porchouse, cemetery and two primary schools. Manufactures—oil earthenware, tiles and bricks but the chief employment is rearing silk-worms. Pop. 1999.

CASTELLON-F.—1 A tn. and com. Naples, prov. Terra di Lavoro 4 m N. Gaeta, on the old Appian Way and near the centre of the Gulf of Gaeta. It contains a church and two convents and in the neighbourhood is a town, said to be traced to Cicero near the spot where he was slain. Pop. 3840.—2 A tn. and com. Naples, prov. Terra di Lavoro, 25 m N N W Paduano in a mountainous district, near the source of the Volturno. Pop. 1446.

CASTELLON-HIO several places Italy.—1 A tn. Italy Lombardy prov. Cremona, 14 m. E of Crema, on the V. no Ouse. It contains a parish church, a chapel and two mills. Pop. 2000.—2 A tn. and com. Naples [see *Agua* *Loraine*] prov. Salerno 9 m W N W Larino. It contains a collegiate church, an hospital and two almshouses. Pop. 267.—3 A tn. and com. Naples, prov. Terra di Lavoro, 6 m. S. W. Nola, pleasantly situated on a hill. Pop. 1229.—4 *Castelluccio Inferiore* and *Castelluccio Superiore* two vills. and com. Naples, prov. Basilicata, both in dist. and about 15 m. S. E. Lagonegro. P. of former 2993 of latter 2463.

CASTELMORON, a tn. France dep. Lot-et-Garonne, & bank, Lot, about 1 m. N E. Marmande. It has a Calvinistic consistorial church and some trade in flour. Pop. 1012.

CASTELNAU several small tns. France. The most populous is *Castelnaud-Montclair* dep. Lot, 14 m. S. E. W. Cahors. Pop. 1111.

CASTELNAUDARY [see *Castellon* *Ar* or *Sotomayor*] a tn. France, dep. Aude, 21 m W N W Carcassonne, in the form of an amphitheatre, on an eminence near the Canal du Midi. It is indifferently built, and the church of St. Michael and the general hospital a well-endowed establishments, are the only noteworthy buildings. To the S. the canal forms a basin 1800 yards in circumference, surrounded by good quays, warehouses and yards for building vessels employed on the canal. Above this basin is the public promenade. The manufactures consist of coarse cloth earthenware, pottery and bricks. There are also distilleries, tanneries, and corn-mills. Lime and gypsum are found in the environs. The grain and flour market is one of the largest in the S. of France, and some trade is carried on in timber, iron, copper &c. It has a tribunal of commerce and of first resort, an exchange, agricultural and polytechnic societies, and a communal college.

Castelnaudary was formerly the capital of the county of same name, and strongly fortified. In 1227 the Inquisition visited it, and not only condemned the living to the flames, but entombed the dead, and made their remains figure in the

antes de 46. In 1356, it was almost totally destroyed by the Prince of Wales. In 1632 the famous coulat between the troops of Louis XIII. and those of Gaston of Orleans took place below its walls. The Duke de Montmorency who commanded the latter was wounded taken prisoner, and shortly after executed at Toulouse. Pop. 8216.

CASTELORIZO or **KAWKORIZO**, an Isl and resort in Turkey in Asia, near Anatolia lat. 38° 5' N lon 39° 14' E.—The island the largest and richest in the coast, is entirely barren, and ill supplied with water. The town and harbour are on the N.E. side. The harbour though small is snug; and merchant vessels can move within 100 yards of the town.—The town which consists of 500 or 600 houses scattered over the face of the rock, is governed by a Turkish Aga, but most of its inhabitants are Greeks. A little corn is collected here for exportation and several small vessels are constantly employed in conveying fire-wood from this part of the country to Egypt. It is also a favourite place of resort for merchant vessels, both going to and returning from Syria and Cyprus. Pop. 8000.

CASTELROTTO or **CASTELROTTO** a vill and com Austria, Tyrol prov of and 14 m N.E. Bolson on a mountain near L. Isenach. The district is mountainous and affords good herbage for the numerous flocks. Pop. 3342.

CASTELVETERE several places Naples particularly 1. *Castelveteri*, supposed are *Castellum*, a vill and com. prov Calabria Ultra 12 m N.E. Gerace. It contains 87v. churches and a castle, but was partly destroyed by the earthquake of 1783. In the neighbourhood much wine is produced and many silk worms are reared. Pop. 5117.—2. *Tn* and com. prov Salerno 17 m S.E. Campotese. It has a collegiate church and an hospital. Pop. 3294.

CASTENKOLDA a vill and com. kingdom of Italy Lombardy prov of and 6 m S.E. Brescia. It occurs on a slight rise on the road between Brescia and Mantua, as well as it, and contains a parish church and several chapels and sanctuaries. The district around produces good crops of corn has fine pastures, and timber plantations. Pop. 2009.

CASTERTON two par. Eng. Rutland.—1. *Great* 1500 ac. Pop. 889.—2. *Little* 1450 ac. Pop. 119.

CASTIGLIONE numerous places Italy particularly—1. *Vill* and com Naples prov Calabria Citra, 5 m N.E. E. Cosentino. Pop. 1800.—2. *Tn* and com. Naples prov Calabria Ultra 11 m N.W. Noastro, near the Adriatic. Pop. 3500.—3. *Two villa.* and com. Naples prov Abruzzo Ultra 1 both in dist. Puzos, from which the com. *Castiglione della Pescara*, is 8. 18 m pop. 1815 and the other *C. di S. Maria* *Benavente*, 6 m. N.W. pop. 2382. In the neighbourhood of the former is the fine royal abbey San Clemente di Casamara.—4. *Castiglione-Messer-Mario*, a vill and com. Naples, prov. Abruzzo Citra, 20 m S.W. Vasto. It stands in the midst of mountains, and has five churches and a convent. Pop. 2485.—5. A vill and com. Sicily prov of and 80 m. N. Catania, and on the S.E. side of Mount Etna. Pop. 2847.—6. *Castiglione del Stiviere* a small city Italy Lombardy prov and 17 m S.E. Brescia. It is well built surrounded by walls defended by an ancient castle, and contains a large square adorned with a central fountain three churches, and a townhall. A well-attended annual fair is held in June. The French obtained here a decisive victory over the Austrians on August 2 1796, which gave to Marshal Aguerre his title of Duc de Castiglione. Pop. 5581.—7. A vill Italy Lombardy prov Bergamo 6 m. N.E. Cassena. Pop. 1623.—8. A village, Italy Lombardy province Como 4 m N. Tradate. Pop. 1800.—9. A vill Italy Lombardy province and 3 miles W. Sondrio, r. bank Adia. Pop. 1154.

CASTIGLIONE-FIORENTINO [anc. *Arctium Adens*] a vill and com. Tuscany prov of and 9 m. S.E. Arezzo. It is pleasantly well built, and has a large square, a handsome collegiate church, a chapel, manifold buildings, hospital orphan asylum and college. Pop. 4952.

CASTILBLANCO a sp. Spain, Extremadura, prov Badajoz, 15 m. S.E. L. Zorogon on an eminence near r. bank, Guadiana. Its houses are indifferently built streets, though paved, irregular; and its townhall prison, and storehouse with other buildings, were burnt by the Carlists in 1807. It has, however, a parish church, chapel cemetery and two schools. The inhabitants are chiefly employed in domestic

weaving husbandry and in rearing cattle and pigs. Pop. 1700.—Several other small places in Spain bear the same name.

CASTILE (New) [Spanish *Castilla La Nueva*] an ancient prov. Spain, corresponding to the old kingdom of Toledo, and occupying nearly the centre of the peninsula bounded, N. by Old Castile, W. Extremadura, S. Andalusia and Murcia, and E. Valencia and Aragon. greatest length, 2. to W. 240 m. average breadth about 155 m. area, 42,004 sq. m. It is traversed from E. to W. by three lofty mountain chains, nearly parallel to each other—the mountains of Toledo and Sierra Molina stretching almost across its centre, the Sierra Guadarrama forming its N. and the Sierra Morona forming its S. frontier. Between these elms, which form the great water-sheds of the province, lie two extensive plains or plateaux with a general incline up to the N. that to the W. of the central chain belonging to the basin of the Tago by which, or its affluents, all its waters are received, and that to the S. belonging to the basin of Guadalupe except a small portion of the E. which is separated from this basin by a transverse ridge and sloping, S.E. sends its waters to the Mediterranean. These plains from being very poorly wooded, have in winter a bleak, and in summer often an arid appearance. They are chiefly devoted to the raising of grain as wheat, in many districts, but of great fertility since notwithstanding the arid system of agriculture pursued, the produce more than equals the consumption. The other principal crops are hemp and cotton. Many of the lower plains are clothed with vineyards from which much wine of good quality is obtained. In the higher mountain valleys the pastures are excellent, and feed vast numbers of mules, cattle, sheep, goats and swine. A mountain product of considerable importance is the *esparto* of which a variety of articles and particularly the famous mats so much in demand. The mountains are also rich in minerals, of which it may be sufficient here to mention the quicksilver mines of Almaden, which were long, and probably still is regarded as the richest in the world. Manufactures which at one period had attained a high degree of prosperity are greatly decayed and the whole province is miserably deficient in real and all the great branches of industry. The inhabitants have a grave, indolent cast of countenance and have often distinguished themselves by a peculiar aptitude for scientific acquirement. They are however generally indolent in their habits, and live on from day to day as their fathers did before them, seldom attempting to better their condition and at the same time indulging, a self-complacency which to a stranger borders very much on the ridiculous. It must be admitted on the other hand that as the most people in the world, they are really better than they seem, and possess to a higher degree the salubrious qualities of civility generosity and probity. This ancient province now forms the five provinces of Madrid Ciudad Real Conant, Guadalajara, and Toledo 1 1490 799. **CASTILE** (Old) [Spanish, *Castilla La Vieja*] an ancient prov. Spain bounded N. by the Bay of Biscay N.E. by Navarre and Aragon, E. Aragon, N.W. by Castile, and W. Leon greatest length N.E. to S.W. 210 m. breadth, 170 m. area 26,768 sq. m. It is traversed by three mountain chains—the Sierra de Guadarrama, which takes an N.E. direction, separating this province from that of New Castile, and extending to the frontier links in with the Sierra de Guadalupe, which runs to the N. and separates Old Castile from Aragon, a central chain apparently a continuation W. of the Sierra de Guadalupe and the Cantabrian Mountains in the N. at no great distance from and almost parallel with, the coast. Numerous minor ramifications penetrate between these chains and diversify the surface but the greater part of this space consists of extensive well-watered and generally fertile plains. The largest of these is the S. of the central chain, belongs to the basin of the Duero, which, flowing across it E. to W. drains it either directly or by numerous affluents. Even a considerable part of the plains N. of the central chain sends its waters to the Duero. The remaining portion belongs to the basin of the Tago. Besides these two large basins, a smaller one in the S.W. of the province belongs to the Tago, and another equally small, in the province of Santander, and to the N. of the Cantabrian Mountains, sends its waters directly to the sea. The far greater part of the arable land of this province is devoted to the culture of grain, particularly wheat, which is

raised in such abundance as to furnish a large surplus for the supply of other provinces, and enables this one to be regarded as the principal granary of Spain. In addition to cereals, the principal crops are flax and madder. The vine thrives well, and much excellent wine might be produced, but the inhabitants either by idleness or too indolent to pursue them pay little regard to this most lucrative branch of rural economy and produce only a little wine of very inferior quality. The pastures, both of the mountains and the plains, are excellent. The former are depastured in summer and the latter in winter. In this way an ample supply of food is obtained throughout the year and immense flocks of sheep are fed. The wool thus produced was long famous throughout Europe, and though it is said to be rivalled by that of Saxony and still more recently by that of our own Australia, the wool of the province still forms one of its principal sources of revenue. The minerals of Old Castle remain yet to be perfectly explored. There can scarcely be a doubt that they might be made of great value, but at present they are scarcely of any economical importance. Old Castle now forms the provinces of Santander, Burgos, Logroño, Segovia, and Avila. Pop. 1,427,472.

CASTILLO several towns and villages. The most important are—**Castillo de Lerida**, a town in Catalonia prov. of 25 m. S.W. from the N. side of the Sierra Alcanada. Most of the streets are narrow, ill paved and steep. In the public square are the remains of an Arab fortress, called Villets. There are a handsome parish church, with a highly decorated Cornelian portal, five chapels, two schools, a townhouse, hospital, prison, store-house, cemetery and some convents. Manufactures—linen, woollen and hempen fabrics, vinegar, wine, and oil. In the environs several quarries of jasper, amethysts and talisians are wrought. An annual cattle fair is held in September. Pop. 25,100. **Castillo de la Guardia** in the Aragon, prov. of and 30 m. N.W. from the N. on an elevated site, commanded except on the N. by lofty hills. Nearly all the streets are paved steep, and lined with tolerably well built houses. Its townhall and prison are of recent construction. It also possesses two churches and two primary schools. The inhabitants, mostly engaged in weaving and handicrafts, carry on a small trade in grain, wine, oil, honey and coal. In the neighbouring hills are abandoned mines of copper, lead, and silver. Pop. 2,287. **Castillo de Otero**, a town in Navarre, prov. of and 27 m. S.E. from the N. on a declivity overlooked by a ruinous castle belonging to the Marquis of Villena. It possesses a parish church, two convents, and does some little trade in cereals and oil. Pop. 1,185.

CASTILLON (anc. *Castile*), a town in France, dep. Gironde, on the banks of the Garonne, 26 m. W. Bordeaux. Nails, cordage, barrels, bricks, tiles, cotton, and woollen yarn are made here, and there is some trade in wood. In the environs are the remains of the Chateau de M. d'Angouleme where the celebrated conquest of that name died, Feb. 13, 1453. In 1541 the English, under Talbot, were defeated by the French before the walls of Castillon. Pop. 27,000. **CASTILLON** is the name of several other small towns and villages in France.

CASTINE, a seaport on the U. States, Maine. It is one of Penobscot Bay opposite Baldie 75 m. E. Augusta. It has an excellent and commodious harbor accessible to ships of the heaviest burden at all seasons of the year. Considerable trade in timber, waxing, and the fisheries. It was in possession of the British during the war with America. Pop. (1840) 1,180.

CASTLE, numerous towns. England—1 **Cambridge** 2,043 ac. Pop. 949.—2 **Castle (Norfolk)** (Cambridgeshire) 1640 ac. Pop. 346.—3 **Castle (Cheshire)** (Stafford) 3774 ac. Pop. 2,315.—4 **Castle (Cornwall)** (Wilt) 1494 ac. Pop. 567.—5 **Castle (Essex)** (Wilt) 1966 ac. Pop. 338.—6 **Castle (Essex)** (Durham) 1935 ac. Pop. 491.—7 **Castle (France)** (Hereford) 1411 ac. Pop. 283.—25 **Castletown**, Cork 4754 ac. Pop. 1102.

CASTLE-ACRE, a vil. and par. England on Norfolk about 8 m. N. W. from the town. The village which stands on a bold acclivity has three main streets, paved as if irregular while the houses are almost entirely cottages of flint or brick. There is a fine parish church of the time of Edward IV. and four chapels belonging to Baptists, Wesleyans and Primitive Methodists. The population is entirely agricultural. Area of par. 3748 ac. Pop. 1569.

CASTLE BLINGHAM a small town in Ireland on Louth agreeably situated on the Glyde, 44 m. N. from the town. It has a handsome parish church, a school, a dispensary and the inhabitants are engaged in linen weaving and in an extensive brewery which is here. Pop. 539.

CASTLE-BLANKET a vil. and par. Ireland on Galway 11,483 ac. Pop. 2660.

CASTLE-BLANFAY a market town in Ireland on Monaghan, on a gentle eminence, about 10 m. N. Carrickmacross. It consists of four principal streets, straight, clean and well kept and the houses, which are mostly of stone, are well built and slated good supply of water. The residence of Lord Blayney adjoins the town. The market house townhall council house and statues of the Duke and the Marquis of Eglinton are the chief buildings. It has a parish church with an elegant spire, a B. Catholic chapel, a Methodist, two Presbyterian meeting-houses, and three schools. Near the town are two extensive flax mills, but the people are chiefly employed in agriculture. A. P. 2077.

CASTLE-BY-FALL, or **CASTLE HOUSE**, par. Wales, Pembrokeshire 2827 ac. Pop. 266.

CASTLE CAERLEON par. Wales Montgomery 6540 ac. Pop. 329.

CASTLE-CARNEY par. Eng. Somerset 201 ac. P. 1860.

CASTLE DOUGLAS (formerly **Castletown**) a market town in Scotland, on Kirkcubright 18 m. S.W. Dumfries. It is mostly of recent erection and is built on a regular plan on a gentle declivity terminating in a lake called **Carlisle Loch**. The houses, the general handsomely and substantial streets wide and spacious crossing each other at right angles. It was erected into a burgh of barony in 1702 and has a handsome modern townhouse with a tower. It is the great mart for all the produce of the county. weekly market on Monday at which great numbers of black cattle and sheep are sold besides large quantities of all kinds of agricultural produce. Pop. 1847.

CASTLE-PINN a small town in Ireland, on the coast about 8 m. W. from the town. It lies on the Fium which is navigable to the town. Pop. 637.

CASTLE-GRUBBORY a small wretched looking town in Kerry 4 m. from the shore. Tralee Bay 12 m. W. Tralee. It has a B. Catholic chapel a national and a parochial school. The people are principally employed in agricultural labour and in fishing at certain periods of the year in netting of which occupations, however can they boast of any skill. Pop. 816.

CASTLE-MARTIN, par. Wales, Pembrokeshire. Pop. 404.

CASTLE-MARTYR, a post in Ireland co. of and 18 m. E. Cork, on the Maine, here crossed by a bridge. It consists of one spacious street, of large well-built, and whitewashed houses, which give the town a cheerful and agreeable

appearance. It has a church, dispensary, fever-hospital, and other charities. It returned two members to the Irish House of Commons till the Union. There are two fairs annually and petty sessions every alternate Wednesday. Pop. 800

CASTLE POLLARD a tn in Ireland, co. Westmeath 11 m. N. by E. Mullingar, beautifully situated in a fertile valley having S.W. Lough Derragh and S.E. Lough Lene. It consists of several well-built, closely-kept, and handsome streets, having in the centre a square, in which stands the market-house. It has a handsome church, R. Catholic chapel, parochial school, savings bank, dispensary and fever-hospital and four annual fairs. Pop. 1083

CASTLEWELLAN a market tn. Ireland, co. Down, agreeably situated 104 m. S.W. Downpatrick. It is well built, and the houses generally are neat and comfortable. It has chapels for R. Catholics, Presbyterians, and Wesleyan Methodists, a free school and infantry barracks. The linen manufactures, in all its branches of flax-dressing, spinning and weaving is carried on. There are also extensive bloom fields in the neighbourhood. Pop. 849

CASTLEMAN a tn in Ireland, co. Mayo, N. extremity of lake of same name, 126 m. W. by N. Dublin. It consists of one principal street 1½ m. in length, spacious and regular, though tolerably well built, from which several smaller streets and lanes diverge, and has also a sort of square—a green area around which are many handsome houses. The parish church is an elegant structure in the later English style with a lofty square embellished tower the R. Catholic chapel is large and well proportioned and there are a Wesleyan Methodist meeting-house, some schools an infirmary two Dispensaries, and a barracks for artillery and infantry. The court-house and petty court are both extensive and well arranged, the latter having a mutilated front, and containing 140 cells. The assizes for the county are held here, and also the quarter sessions in January and October besides petty sessions every Saturday. Linnen, and linen yarn, are manufactured here to a considerable extent as are also tobacco, snuff soap, and candles. There are likewise a brewery and a tannery in the town but the general trade is in grain and other agricultural produce. Castleman was taken by a French force which landed in Killybegs Bay in 1798 but was evacuated shortly after on the approach of Lord Cornwallis. Pop. 4027

CASTLEBARY a hamlet, Scotland, co. of, and 9 m. S. by W. Stirling and one of the stations on the Edinburgh and Glasgow Railway. Near it are the remains of a Roman fort, covering six acres of ground, and vaulted underneath.

CASTLECOMB a tn and par. Ireland, co. Kilkenny. The town lies on the Dean 54 m. S.P. Dublin and consists of one spacious main street bounded by a row of trees on either side, and several smaller streets and lanes is regularly built, and has a clean and respectable appearance. It has a commodious parish church, a R. Catholic chapel and near it a convent, a small Wesleyan meeting-house, a court house, a dispensary small infantry barracks, and various schools. The chief dependence of the place is on the cottoneries in the neighbourhood, which have been worked for more than a century producing the peculiar kind of mineral known by the name of Kilkenny coal, which contains no bitumens, burns without smoke or soot, and yields a strong heat. A great proportion of the coal is conveyed to Dublin by the river Nore and Barrow and by the Grand Canal. The town was attacked by the rebels in 1798 and great part of it destroyed by fire. Pop. 1895 Area of par. 21,562 ac. Pop. 8766.

CASTLEFORD a vil and par. England York, W. Riding. The village, 21 m. S.W. York, on the York and N. Midland Railway, is built on an acclivity consists of two main streets one of them crooked and not well kept, and the houses miserably of brick are but indifferently built, a great deficiency of water. Besides the parish church a fine Gothic structure, there are two chapels belonging to the Wesleyan and Primitive Methodists, with a national and other schools. The male population are chiefly employed in glass-works and pottery. Area of par. 2040 ac. Pop. 2581

CASTLEREAGH a market to Ireland co. of, and 15½ m. W. W. Roscommon, on the Slane, which runs through the centre of the town. The houses are all of limestone, rough cast, and many of them are well built. It has a court-house.

house, school-house, Protestant church and R. Catholic chapel, and three schools for males, females, and infants. There are no manufactures, but a large amount of general trade is carried on. The people, who are chiefly employed in agriculture, are moral and industrious. Pop. 1311

CASTLETON par and vil. England, co. Derby. The village, 18 m. W. by S. Sheffield is situated at the bottom of a rugged embankment, on which stands the ancient castle called Peak Castle, crumpled by William Pevensey, natural son of the Conqueror. The houses are chiefly of stone. It contains the parish church a fine specimen of the early pointed style a Wesleyan chapel and a free grammar-school. The inhabitants are mostly employed in mining but many derive a subsistence from the manufacture of ornamental articles from pine and from strangers raising the remarkable natural crucifixes in the neighbourhood, the most extraordinary of which is the Peak Gavern, or Devil's Cave, consisting of a series of subterranean chambers which can be explored only by torch light. The entrance to this cavern is in the face of a precipitous limestone rock, at the height of 50 ft. from the ground, and is 46 ft. high, by 120 wide. The whole depth of the excavation towards the outward opening is 2300 ft. The founder of the Peak of St. Walley Booth's novel of that name was the supposed founder of the original castle at Castleton. Area of par. 10 206 ac. Pop. 1333

CASTLETON par Eng Dorset 69 ac. Pop. 157
CASTLETON OF BRANKMAR, a vil Scotland, co. of and 50 m. W. by S. Aberdeen a little above the confluence of the Glinne with the Doe. It has a chapel of ease communicated with the Established church, a free school, and a R. Catholic chapel. Pop. 245

CASTLETON a tn in exp. of Isle of Man at the N. extremity W. shore of bay of its name. It is intersected by a small stream over which are a draw bridge for foot passengers, and a stone bridge for carriages. The castle of Rushen which stands on the N. bank of the river and was originally the principal fortress of the island is a large quadrangular building surrounded by a lofty wall and fane, and defended by a glacis of stone. The keep which is still entire, is the only prison in the island. The market-place consists of a spacious area, near the castle wall and a market-house was erected in 1830. It has a handsome chapel and places of worship for Primitive Methodists Wesleyans, and R. Catholics. King William's college, founded in 1830 the buildings of which were, very handsome, was consumed by fire in 1844. In the town and its vicinity are several breweries, tanneries, lime kilns and corn mills. Pop. 2479

CASTLETON a par. Scot. Roxburgh 18 m. by 12 m. Pop. 2180

CASTLETON ROCHIE a tn and par. Ireland co. Cork. The town on the Avonbeg 7½ m. W. N. W. Killybegs consists of one principal street, mostly composed of miserable dilapidated cabins. It is well supplied with water and has a handsome Episcopal church with a tower and spire a R. Catholic chapel a national school and one under the R. Herol Education Society a dispensary and two large flour mills. The inhabitants are agriculturists, and very poor. The celebrated Edmund Burke was born in the neighbourhood. Area of par. 6486 ac. Pop. 338 of the 1832

CASTLETON par Eng Norfolk 15½ ac. Pop. 545

CASTOR a vil and par. England co. Northampton. The village 4 m. W. Peterborough, on a branch of the London and North-western Railway consists of one irregular but well kept street and some side ones, and is almost united to Alsworth, another village, consisting of a single street. The houses in general are of a respectable description. The parish church is a handsome cruciform structure, with an elegant Norman tower surmounted by a spire. There are besides, two chapels of ease and an Independent chapel, and a free school. Inhabitants chiefly agriculturists. Castor is the Darbyshire of Antiquity, and remains of many buildings, as baths and villas with colonnaded pavements, have been found here. Area of par. 7020 ac. Pop. 1896 of vil 772

(Local Correspondent.)
CASTRES (anc. *Castro Albiense*), a tn. France, dep. Tarn, 23 m. S.E. Albi, on the Agout, which divides it into two parts—Castres Proper N. side, and Villages, S. side the river which is crossed by two stone bridges. The streets are narrow and winding. The public buildings are the Hotel

de Villa, formerly the Episcopal palace, which contains a public library with 7000 volumes, and has a garden laid out on the plan of the Tuilleries. Three churches, one of them Protestant, two hospitals, a theatre, cavalry barracks, &c. There are several fine promenades, and a handsome square. The manufacture of the town is in a thriving condition. They consist of fine cloths, coarse cloth for the troops, flannels, blankets, and other wondrous goods linen, glass, and black soap. There are, also, blanching-grounds, dyeworks, tanneries, paper-mills, forges, and brass foundries. A considerable trade is carried on in the above articles, and in silk, cotton, hosiery, as a confectiory. Castro has a tribunal of first resort, and of commerce, an agricultural society, commercial college and two seminaries. The bishopric of which this was once the seat was suppressed at the revolution of 1793. Rabin the historian was a native of Castro. Pop. 12,590.

CASTRICUM vul. Holland. See CASTRUM.

CASTRIDE (RAY or) a bay Chius Manchoora, Gulf of Tartary between Manchouora and Mal. Sagalla lat 51° 28' N. lon. 141° E. (s).

CASTRIDE (PORT) See CARRERAGE.

CASTRO (see Mytilene) — 1. A seaport town, Asiatic Turkey lat Mytilene of W coast cap. of the island lat 39° 4' N. lon. 26° 33' E. situated on a point of land which forms two small ports or harbours and surrounded by a double wall flanked with towers, and defended by a castle streets narrow and dirty. Small vessels are built here. The ruins of the ancient town of Mytilene are scattered over a considerable space of ground to the W of the present town. Pop. upwards of 6000. — 2. A seaport in Naples, prov. of, and 11 m S.W. Otranto. It is the seat of a bishopric and has a cathedral and an old castle. The district produces grain, wine, fruit, and cotton, and fish are plentiful on the coast. In the 16th century the town was sacked by the Turks, who carried off the women and children as slaves, and since then, it has frequently suffered from visitations of the Corsairs from Barbary. The port admits only small vessels. Pop. 760. — 3. A town and seaport, Chili, E. coast, in Chile, head of a fine bay of same name, its port is good and it does some trade. It was founded in 1660 by Don Lopez Garcia, then Viceroy of Peru. Pop. 8000.

CASTRO several places. — 1. Castro Daire, a town and par. prov. Beira-Alta 18 m S.E.W. Lamego, with a church and an hospital. Pop. 7400. — 2. Castro Lohoreiro, a town and par. prov. Muho, 62 m N.E. Paredes Luma on an elevated plateau, in a mountainous district near the frontiers of Spain. It contains an old ruined castle, and owing to its great height, and total want of shelter by trees, is considered the coldest place in Portugal. Pop. 1500. — 3. Castro Marim, a town, prov. Algarve, in the N.E. corner of the kingdom on the Guadiana, and near its embouchure 15 m N.E. Thure on the Spanish frontier. It was once fortified, but the fortifications are now in ruins. The inhabitants are employed chiefly in fishing and smuggling. There are salt springs in the neighbourhood. Pop. 2360. — 4. Castro Verde, a town and par. prov. Algarve, r. bank, Corbea, 26 m S.W. Beja. It contains a collegiate church, university and hospital. Pop. 2665.

CASTRO-Castellano, a town, Spain, prov. of and 40 m S.W. by W. Loma, r. bank, Eura, tolerably well built, and has a parish church, chapel, and two primary schools. Inhabitants mostly engaged in weaving and agriculture. Pop. 1494.

CASTRO-Bez-Rio, a town Spain Andalusia, prov. of, and 17 m S.E. by R. Cordova, on a declivity r. bank, Guadalequiv. The more ancient part of the town is surrounded by a double-pitched wall, flanked with towers, and entered by one gate, which was defended by an Arab castle now also ruinous. The modern portion is outside the walls and extends along the foot of the hill on its N. side. Most of the streets are wide and regular lined with well built houses and handsome public edifices. Its parish church is spacious, has three naves and a lofty tower containing a clock and peal of six bells, the decorations of the interior are tasteful, and have been renovated. Here are two colleges, several primary schools, some convents with churches attached, and an economic society. The remaining public buildings comprise six chapels, one hospital, a spacious town hall, prison, stockhouse, and armory. Manufactures — linen, woollen and hampden fabrics, earthenware, tiles, bricks, wine, brandy, wheat, oil and vinegar

Trade — wheat, cattle, oil, honey &c. An annual fair in September. Pop. 9099.

CASTRO GIOVANNI (sua. Enea) a town Sicily prov. Olsinetto, 13 m. N.W. Piana, near the centre of the island on a high table-land, formed by the union of the three chains of mountains extending in different directions from this point. Its height above sea level is more than 4000 ft. The plateau on which it stands is still remarkable for fertility, while in ancient times it was adorned with the groves and temples of Ceres, the presiding goddess of the locality who is said to have been a native of Enea. Her most sacred temple was erected on the spot occupied by the modern town, but all traces of it have disappeared. An old castle still remains probably built by the Normans who occupied Sicily in the Middle Ages. Castro-Giovanni is miserably poor and appears to be going still further to decay. Sulphur is obtained in the district to the amount of 46,875 ewts. During the first servile war Enea was the head quarters of the slaves who held out against the power of Rome for some years, and fought three successful battles with her armies; but were at last subdued and the town was taken by the consul Marius. Pop. 12,000.

CASTRO-NOVO, a town Sicily prov. Palermo 23 m. S.W. Termini. Marble is found in the environs. Pop. 5908.

CASTRO-NOVO a town and com. Naples prov. Basilicata, 20 m E.N.P. Lagonegro. It has an annual fair. Pop. 2855.

CASTRO-PROFANO a town and com. Naples, prov. Salerno 5 m. N.W. Campobasso near I. bank. Biferro. It contains four churches and a convent, and has a paper-mill. P. 2756. CASTRO-LAVANNA, a town and par. Sicily, prov. of, and 24 m E. by R. S. S. in a plain, at the N.E. base of the Alcorn de Paudo. The town is defended by a wall on the land side, and by numerous batteries and is commanded by an ancient and strong castle. The houses, particularly the modern portion of them, are well constructed, and the principal streets well paved and clean. In its principal square stands the town-hall, a spacious structure of hewn stone. The parish church is ancient, and there are also a convent, chapel, national mathematics, and several primary schools, and a short distance from the town is an hospital. There is a dock and near it a handsome public fountain. Manufactures — linen fabrics, silk, rope, leather, fish-netting, tiles, bricks, &c. A great portion of the inhabitants are occupied in fishing and salted fish and in the docks. The trade of the port is very limited consisting chiefly of iron, wine, brandy, salt-fish, and hides. Pop. 3110.

CASIMAJERIZ, a town Spain, Old Castle prov. of and 17 m. W. by S. Burgos, at the R. base of a hill crowned by a castle built by Julius Cesar. It has wide clean and paved streets, which are supplied with footpaths and the houses are generally well built. It has a spacious market square, containing the townhouse, prison, one of the churches, and an extensive portico supported by pillars of hewn stone, and forming an agreeable promenade, in wet weather. It has a fine collegiate and several other churches, seven convents, a Latin grammar and some primary schools, seven hospitals and a cemetery. Manufactures — linen and woollen fabrics, glass, earthenware, bricks, stoneware, hats, wine, &c. Trade — green fruits, honey and cattle. Pop. 9420.

CASTROMOL, a town and par. Spain Asturias, prov. of and 68 m W.W. Oviedo on a declivity at mouth of the Eo. The houses in general are irregularly built and the streets, though clean are irregular and badly paved. The town possesses three squares, a parish church, and spacious townhouse, built on the site of an ancient palace formerly belonging to the Bishop of Oviedo, and serving the combined purposes of guildhall, police-court, and prison. The other town edifices are two chapels, a custom house and school. Weaving, fishing, and husbandry are the chief occupations. Pop. 1246.

CASTROREALF a town Sicily prov. of and 23 m. W.S.W. Messina on the Castro. Good wine and oil are produced in the neighbourhood; and there is a chalybeate spring a short distance from the town. Pop. 8469.

CASTROVILLARI a town Italy Naples, prov. and 84 m N. Cosentino, I. bank, Cosentino. It is well built, partially fortified and has three churches, several convents, and an hospital. It has also a tolerable trade in wine, cotton, marmalade, silk, and fruit. Pop. 7100.

CASTROVIREINA a prov. and vil. Peru, dep. Ayacucho, bounded N. by Angaraes, E. by Cangallo, S. by Ica, and W. by Lima. Length, 55 m.; breadth, 75 m. It is in general hilly and barren, with a cold climate, but some places produce corn and potatoes. The warmer valleys produce fruit, and abundance of pasture for cattle and sheep. The village is a very small place, situated on a mountain where the soil is excessive. Pop. of prov. 14,000.

CASTUBERA, a tu. Spain. Batasmadura, prov. of and 67 m. E. by B. Badajoz, near bank, Guadalequiv. Most of its streets are straight, clean and well paved. It has two squares, faced with white marble. The principal one contains the town hall, prison, and episcopal modern parish church. Here are also several chapels, three schools, and an extensive cemetery. The inhabitants are engaged in weaving, making earthenware, tiles, bricks, shoes, &c. Trade is carried on in cattle, wool, wine, grain, and oil. Pop. 5578.

CAT KAYS, a group of islets, Great Bahama Bank, the largest about 70 m. S. W. the nearest point of Great Bahama Island, and 10 m. from the Bahama Islands. It has a lighthouse, erected by the British Government, the base of which is 26 ft. above high water with a tower 65 ft. in height. The light revolves once in every minute. The tower stands in lat. 25° 34' N. lon. 79° 18' 34" W.

CATALDO (St.) a tu. Sicily prov. of and 5 m. W. S. W. Catanzaro. The sulphur works in the caverns produce annually about 27,500 cwt. Pop. 7679.

CATALINA (Santa).—1. An isl. in Pacific Ocean off the coast of Upper California from which it is separated by the channel of Santa Barbara, here about 18 m. wide. It is about 45 m. in circumference.—2. A small isl. California Sea, 95 m. E. the Mosquito coast, and a little N. Old Providence Island.—3. A small fort, Portugal prov. Beira, 28½ m. W. S. W. Cambrá on the bank and at the mouth of the Mondego.—4. A harbour E. coast, N. Newfoundland in N. Trinity Bay and 11 m. S. Cape Bonaville. lat. 48° 55' N. lon. 53° W.—5. A cape, W. coast, Central America, state of and 70 m. S. S. W. Nicaragua. lat. 10° 55' N.

CATALONIA (Spanish Cataluña) a principality and old prov. Spain, forming the N. E. corner of the peninsula between lat. 40° 30' and 42° 51' N. and lon. 0° 10' and 3° 21' E. bounded N. by France, E. and S. by the Mediterranean. S. by Valencia, and W. by Aragon. greatest length 185 m. greatest breadth 130 m. but being of an irregular form it diminishes S. ward to a breadth of about 32 or 23 m. area, 12,111 sq. m. It is extremely mountainous. The province being covered by numerous offsets of the Pyrenees, which separate it from France, and which generally have a S. direction and it is traversed S. W. to N. E. by the Sierra de la Jula which is separated by the Ebro on the S. from the mountains traversing the N. part of Valencia and the E. of Aragon, and which in the N. end carries down with one of the offsets of the Pyrenees, and thus forms a watershed through the centre of the province. All the higher mountains of Catalonia are perpetually covered with snow and the lower hills with wood the valleys are verdant, and generally watered by a rivulet. The principal rivers are the Ebro, the Llobregat, and the Ter all of which fall into the Mediterranean. In the N. part of the province is a number of extinct volcanoes, and near the centre is a remarkable mass of rock-salt, called the Mountains of Cardener (see BARCELONA). Marble and minerals are found in the mountains, withypsum and alabaster, the finest at Tortosa and Gervera. Iron abounds in the Pyrenees, which contain also copper mine, and manganese. There are lead mines in various districts, and coal is obtained at Ripoll and Turis. The coast, which stretches from S. W. to N. E. and is about 180 m. is generally bold and rocky. The principal ports are Tarragona, Barcelona, Mataró, and Rosas. Cereals are said to be the best cultivated province of Spain, but although its inhabitants are remarkable for their industry and for the pains which they take to extract produce from the soil the province does not supply one-third of the grain consumption the deficiency both in corn and cattle, being furnished chiefly by Aragon. Irrigation is carefully attended to, water being in many cases drawn from wells for that purpose. The soil is light, and the cereals produced are wheat, rye, maize, barley oats and millet. Hemp, flax, saffron, madder wood, mace and liquorice, are also grown. Fruits abound orange, lemon, citron, figs, almonds,

apples, pears, cherries, quinces, medlars, apricots, peaches, walnuts, chestnuts, and filberts the last, known by the name of *Bercedana*, are exported in great quantities. The wines of Catalonia are strong and rough, and are largely used in adulterating those of Oporto. Some of them, however, are very good those of Tarragona, when matured by age, excellent. Timber is plentiful in Catalonia, including the cork tree, which abounds in the forests, and the bark forms a principal article of export. The counts swarm with fish, the taking of which occupies a great number of persons and produces excellent sailors the Catalans being reckoned the best seamen of the Mediterranean.

Catalan manufactures silk and woollen goods to a considerable extent. The cotton manufacture commenced in 1763 but has progressed slowly notwithstanding the efforts of a society which was formed in Barcelona in 1780 for its encouragement. Linen paper hats, cordage, soap, glass sheet-iron and shoes are also manufactured in the province. The distillation of brandy is carried on to a great extent. Smuggling is universal. Every body smuggles, especially the custom house officers, commissioners, and private guards. The plea of protecting the infant manufactures of the country by heavy duties, against foreign wares is the official excuse, which prohibited goods are clandestinely introduced. The English import into Spain about a million, and a half in value and take at least double in wine, oil, fruit, and other Spanish produce. (Murray's *Handbook of Spain*.)

The people of Catalonia are of a different race from the rest of Spain, and the traces of their distinct origin are visible, not only in their language but in their manners, their dress, and their superior activity and intelligence. In person, the Catalan is a strong and manly patient under fatigue and privation brave, daring and obstinate not very courteous or hospitable to strangers, and extremely rude in his manners. The lower orders are brutal. The men wear long loose cloth or plush trousers, of dark colours, a gay silk waist short jacket, which is fine merino they have, over their shoulders. In winter they wear a sort of capote, which supplants the Spanish cape. A red or purple cap completes their costume. The women are described as being neither handsome nor amiable. Their ordinary dress is a tight bodice with a handkerchief, or a serge mantle on the head. They wear earrings so large and heavy as to require to be supported by threads hung over the ears. The entire aspect of Catalonia presents a striking contrast to the other provinces of Spain. Here all is activity and the traces of a laborious and never-ceasing industry are visible everywhere. The houses and cottages have a strong and cheerful appearance externally a character which the interior fully maintains, being neat, clean, and well furnished. Peasants are more general and better kept and every one is busily employed in some profitable pursuit or other. Education however is miserably neglected and the bulk of the people being without the means of instruction are in a state of deplorable ignorance. Their better condition is thus owing entirely to their superior energy of character and in no degree to superior knowledge.

Catalonia was anciently under the dominion of the Romans who were afterwards dispossessed by the Goths and they again by the Moors. It was finally reconquered by the Spaniards, when it was divided into departments, and governed by deputed counts. The national liberties were secured by a code of *Usages* and the people were represented by local parliaments. In 1040 the sovereignty became hereditary. In 1137 the province was united to Aragon, by the marriage of Ramon Berenguer IV. with Petronilla the heiress of the former. Turbulent and impatient of restraint, the subsequent history of the Catalans presents but a series of rebellions which finally terminated in their subjugation by Philip V. who after the capture of Barcelona in 1714, expressed their ancient rights, and curtailed their liberties and privileges, having previously laid the country waste by fire and sword.

The principal towns are Barcelona, Tarragona, Gerona, Lerida, Reus, Manresa, Tortosa, &c. Pop. 1,359,784.

CATAMARCA cap. Rep. del Sur. CATAMARCA.

CALAMARCA a dep. or prov. Republic of the Plata, of uncertain dimensions, but lying between the parallels of 25° and 29° S. and the meridians of 66° and 69° W. It is

bounded, W by the Andes, which separate it from the N provinces of Chili, and on the other side by the departments Cordova, Rioja, Salta, and Tucuman. It is extremely fertile, producing abundance of corn and pasture, supplying the surrounding departments with cotton of excellent quality and sending great quantities of red pepper to Buenos Ayres. Its capital, of same name, is in lat. 27° 30' S. lon. 68° W. Pop. of dep. estimated at 25,000 of which number the city contains 4000. Incl. See Surv. 1.

CATANDI ANDI an ind. Indian Archipelago, one of the Philippines, off S.E. coast Luzon lat. (N.E. point) 14° 13' N lon. 124° 10' E. about 44 m. long, and 30 broad. It is fertile, well cultivated, and watered by several rivers the principal of which is called the Catandagan. The sands of the streams are surfaceous. The inhabitants are industrious, make good sailors, and excel in boatbuilding, disposing of their boats to the people of the neighboring islands. The women are of the same stature as the men, and envelope themselves in a long loose mantle when they go abroad making no such ornaments, also, a great display of jewelry.

CATANIA a prov Sicily bounded N by prin. Mesole, E. by the Mediterranean, S by Syracuse W by Catanzetta, and N.W. by Palermo length N to S about 45 m. breadth, 53 m. The province is partly intersected by spurs of the Neptunian range but its principal mountain is Mount Etna, in its N.E. part. The S. part of the province is formed by the plains of Catania, extending the more fertile district in Sicily and traversed N.W. to S.E. by the Giardini or Fiumicino, the largest river in the province. Grain wine oil fruit, hemp, and flax are produced, amber is found in large quantities on the banks of the Carata, and excellent marble is obtained from the hills all of which with soda, cheese, shagreen, cardamom, manna, and silk form articles of commerce. The province is divided into the three districts of Catania, Catanzetta, and Nicosia which are subdivided into 26 circondario and again into 65 comune. Pop. about 300,000.

CATANIA a city E. coast Sicily cap. above prov. 17 m. S.E. the water of Mount Etna, 31 m. N.W. Syracuse, on the gulf of its name lat. (Mile) 37° 23' 18" N lon. 15° 12' E. (n.) This ancient and celebrated city was almost totally destroyed by the earthquake of 1693 and on three several occasions it suffered severely from volcanic eruptions but it has been rebuilt in a style greatly superior to the generality of Italian cities. It is nobly situated on the roots of Etna, its despoiler and its benefactor. Overwhelmed as it has often been by torrents of liquid fire, it has risen, like the phoenix, more splendid from its ashes. The dry substance which once ravaged its plains, has by its own decomposition, covered them with soil fertile as the fabled garden

and a variety of toys whilst a natural mole of lava defends the shipping from the fury of the tempest. The plan of the city is superb, and no one is permitted to deviate from it. —(Highgate) The two principal streets are long and broad and intersected at right angles by the streets of the second class. The squares are spacious and regular and, like the streets, paved with lava. One of them contains an antique statue of an elephant bearing an obelisk. The houses, in general are well built, and most of the public edifices have an air of grandeur observable in but a few Italian towns. The palace of the senate is esteemed a model of architecture. The cathedral is also a fine building. It was founded in 1094 by Count Roger and rebuilt after being partially destroyed by the earthquake of 1693. There are 49 churches, 19 monasteries and 11 convents among which, the Benedictine monastery of St. Nicholas has long been celebrated for its relics, and for the splendor of its various buildings. There are also several hospitals, a flourishing hospital, a most beautiful handsome theatre, several public libraries and some interesting museums. The university founded by Alfonso of Aragon in 1445, is an extensive establishment, numerously attended, and enjoying great privileges. Catania is the seat of a bishopric a court of appeal a high court of judicature and a civil tribunal. The principal authorities of the province reside here. The inhabitants are said to be distinguished for their urbanity, and for the courtesy they manifest towards strangers. They were enlightened enough to introduce the culture of the cotton when a strong prejudice existed against it in the country and they had the merit of introducing illumination as early as 1742. The manufacture of silk forms the principal branch of industry carried on in the town. Several thousand individuals are engaged, also, in manufacturing the amber found on the banks of the Giardini. The snow of Mount Etna is another source of wealth, and is exported to a large extent.

The climate is salubrious and suitable for the culture of wheat, grapes, fruit, &c. Grain potatoes, olives, figs, almonds, silk, wine, oil soda, manna, cardamom, have, and all the manufactured products of the town among which are articles in corn, again, and lava are exported. Catania is supposed to have been founded by the Phoenicians. It was occupied by the Romans under the name of Catana, and by them it was adorned with edifices of great magnificence, most of which however have been destroyed by earthquakes, and by the lava from Mount Etna. The ruins of the amphitheatre which was more extensive than the Colosseum at Rome, or than any other edifice of its name kind now known to exist, are still to be seen, as also the remains of the theatre, baths, aqueducts, sepulchral chambers, hippodrome, and several temples. Besides being destroyed by the earthquake of 1693, the town again suffered from a similar calamity in 1783 and 1818; and, so late as 1846 an earthquake reared many of its houses. Its population is said to have diminished upwards of 11,000 between the years 1832 and 1839. At the latter period it was estimated at 86,000. —The canal commencing N. at La Trinita, extends S. to Santa Croce 17 m. forms a semicircle, of which a line drawn between the points above named, would be the chord. The gulf forms a denotation on the coast about 10 m. deep.

CATANZARO (anc. Catanzaro) a town Naples, cap. prov. Calabria Ultra II on a mountain 5 m. from the Gulf of Squillace. It contains a citadel, 11 churches, a cathedral, several convents, a seminary a royal academy of sciences a lyceum three hospitals, and a wealthy most de-

pidict. Silk, velvet, cloth, and other tissues are manufactured. Some trade is done in wheat, wine, oil, and agricultural produce. The inhabitants bear a high character for ability and industry and the women are esteemed the handsomest in Calabria. The town

THE SQUARE OF THE EARTHQUAKE CATANIA — From the Monastery of the Phoenicians.

of the Phoenicians; and on all sides the material of destruction is turned to the purposes of ornament and utility. The streets are paved with lava; houses, palaces, and churches are built of lava in the form of ornamental chimney pieces, tablets,

is the seat of a bishopric, and of one of the four great civil courts of the kingdom a high court of judiciary and a district civil court. It suffered severely from the earthquake of 1788. Pop. 12,698.

CATAPULICHE a river, S America, rising on the E. side of the Chilian Andes, about lat. 39° 15' S. and, after a course of 66 m. almost due S through the S.W. extremity of the Pata, falling into the Rio Negro about lat. 40° 5' S.

CATARUNJA, a vil. Spain prov. of, and 6 m. S. Valencia, P. bank, Turisima. The houses are generally spacious, and commodiously arranged for an agricultural population. It has three squares a good-looking townhouse, and several other special buildings, including a large storehouse, a church, and two schools. Pop. almost exclusively agricultural 8580.

CATAWA, **WATER**, or **SANTEE**, a river U States, rising in N Carolina in the Blue Mountains, near Morganton running E. and then S into S Carolina, where it is known for some distance as the Wateree, till after the confluence of the Broad River when it takes the name of Santee, runs E. by B. and, after a course of 270 m. falls by two mouths into the sea, between Charleston and Georgetown.

CATBALOGAN a tn. Philippines cap. of lat and prov. Samar W coast, lat. 11° 52' N. lon. 124° 50' E. in a small bay about 5 fathoms water. It is regularly built, the houses generally of nipa palm with a small number of stone. It has also a church and a townhouse. P. 6238.

CATEAU (Lat) or **CATAC** CAMBODIA, a tn. France, dep. Nord, 16 m. E. R.E. Cambry P. bank Belle. It was formerly fortified, and had a feudal castle, but is now an industrious little manufacturing town, producing cotton and woollen yarn, merinoes, cambric, shawls, starch, black soap, and earthenware. It has also tanneries, several breweries, distilleries, a salt refinery, brass and iron foundries, and tanneries. A considerable trade is done in the above articles, and in the agricultural produce of the district. It has a communal college. The treaty between France and Spain known in its phonetic history as the treaty of Cateau-Cambrisis was signed here in 1556. Pop. 751.

CATEL (Tex) or ST. MARY DE CATERO, par lat Guernsey Pop. 3181.

CATFERRAM par Eng Surrey 2400 ac. Pop. 487. **CATERINA-SANTA** a tn. ad com Sicily prov. of, and 6 m. N.N.W. Caltanissetta, near lat. S. Salvo. It is a fortified place of the fifth class and has a manufactory of fine earthenware. Fine agates and jaspers are found in the neighbourhood. Pop. 8700.

CATERINI a maritime in Asiatic Turkey on the sea of Marmara, 170 m. N. S. Smyrna lat. 40° 58' N. lon. 29° 5' E.

CATESBY par Eng Hants 1990 ac. Pop. 921.

CATFIELD par Eng Norfolk 2938 ac. Pop. 730.

CATHARINA (SANTA) a small maritime prov. at bay Brazil.

THE PROVINCE, in the S. of the empire, is bounded N by prov. São Paulo, E by the Atlantic S and W by Rio Grande do São Pedro, from which it is separated by the mountain-ridge of Santa Catharina, the commencement of the Brazilian coast range, and including the lat. of same name, and several smaller ones on the coast length, N to S 240 m. breadth E to W 120 to 60 m. area, 51,746 sq. m. It is composed of a series of valleys running W to E formed by spurs of the boundary mountain-range, and flowed through by numerous streams of which Rio-São-Francisco, Araryty, Tapero, Tijoco, Tubarão, &c. may be named, all falling into the Atlantic. The soil though in the lower lands sometimes sandy is remarkably fertile in diverse soils, and the seasons regular. Sugar cane, manioc, millet, beans, onions of immense size, and garlic, are the chief cultivated products, considerable quantities of which are exported to Rio-de-Janeiro. The indigo and cochineal plant grow spontaneously and wheat and flax give good returns. The province is well wooded producing excellent timber both for the pulper and cabinet-maker. The Indians claim the supremacy over some of the forests, which are likewise frequented by oncas, cougars, monkeys, pigs, and other animals. Birds are numerous, including several varieties of humming birds and the lakes and rivers are frequented by innumerable geese and other water-fowl. Some of the rivers are navigable for a short distance from the sea; and many might be rendered much more serviceable than they now are for the purposes of inland

travel, were they freed from obstacles easily removable. The Legislative Assembly is composed of 30 members. Pop. 90,000.—The harbor, 8 m. to S. from the coast, is 57 m. N to S and about 10 m. E to W lat. (S.) and 37° 47' S. lon. 48° 40' W. It is fortified, and is of irregular figure, hilly and has on its coast numerous islands, some of which are also fortified. On its E. coast is no secure port, but between the island and the mainland is a commodious sheltered bay. Its soil is fertile the higher grounds yielding coffee, wheat, millet, and European fruits, and the lower grounds yield rice. Ipecacuanha grows spontaneously and bananas, oranges, melons &c. flourish, and the garden fruits are cultivated, the best in Brazil. But little attention is paid to cotton and commerce there is almost none and the people are in a poor condition. Pop. 12,000.—The bay formed between the island and the mainland, is separated into two divisions by projecting spits of land. It is sheltered from every wind except the N.E. and its depth varies from 5 f. to 30 fathoms. Wood water and provisions are to be obtained on it.

CATHCART a par and two vils Scotland, co. Renfrew. The villages of Old and New Cathcart, adjoining each other are nearly 8 m. S. Glasgow near the river Carr and have a pop. respectively of 174 and 330.—The parish is 5 m. by 1 Pop. vils inclusive, 2916.

CATHERINE par Walon Brecon 1067 ac. Pop. 204. **CATHERINE** or **(ATZELING)**, several isles.—1 A group of three small low islands N 1 settle Ocean, Gildula 1 isle lat. 0° 34' S. lon. 128° 11' E.—2 *Catherine* 81 m. ad. l. Sixies, Georgia off the mouth of the New York River between St. Catherine's Sound on the N. and Sapelo Sound on the S. It is 10 m. long and 5 broad.—3 Several small islets off the extreme S point of Beothia 1 isle lat. 69° 20' 37" N. lon. 94° 31' 65" W.

CATOCHE (Cape) a headland, Central Ancon, forms one the N.E. extremity of the peninsula of Yucatan lat. 21° 35' N. lon. 87° 6' W. (p.) This is the first place on the American continent at which the Spaniards landed and within 6 m. of which, according to the and ority of Bernal Diaz, they saw a large town, which they named Grand Castro.

CATORCH, a tn. Mexican confederation state of, at 1 1/2 m. N. San Luis de Losos. Near it are extensive salt mines, formerly the richest in Mex. co. (p.) See Huam.

CATRAL, a tn. Spain Valencia, prov. of, and 28 m. S.W. by W Almoneda, in a large and fertile plain, slightly elevated on the E. It is regularly built and has a church, townhouse, prison, two schools, a poorhouse, and consistory Trade—in wines, oil, grain, and hemp. Pop. 2268.

CATRIMANI or **CATRIMANI**, a river Brazil prov. Para rising in a mountain range which forms a continuation of the Sierra Caranani about lat. 2° N. and after a S.E. course of about 100 m. falling into the Rio Imamu, near Carmo, in lat. 0° 29' N. lon. 63° 5' W. The bed is much impeded by rocks and cataraacts and at about 60 m. from its mouth is a settlement of Panahana Indians.

CATRINE, a vil. Scotland, co. of, and 10 m. F. Ayr. It is regularly laid out, with a large square in the centre, and streets diverging from it to the S.E. and W. which again are crossed by others at right angles. The inhabitants are chiefly employed in cotton spinning, which is here extensively carried on. Pop. (1841) 2700.

CATSFIELD par Eng Sussex 2644 ac. Pop. 550.

CATSKILL MOUNTAINS a mountain range, U States, New York, commencing near the Hudson, and bending N.W. in the form of a crescent towards the Mohawk. Round Top, the highest summit, is 3504 ft. above sea level. These mountains, which are precipitous on the E. and greatly sloping towards the W. are inhabited by bears, wolves, and other wild animals.

CATSKILL, a tn. U States, New York, 34 m. E. Albany pleasantly built on both sides the creek near its junction with the Hudson. It contains the county buildings, five churches, 19 schools, two banks, great and saw-mills, two paper-mills, one brewery an extensive ash dist. &c. several

fish, and various mechanical establishments. It is a place of considerable trade, and exports large quantities of sole leather, grubs, floor butter, brick, hay, timber, faxwood, pot and peari salmon, hard fallow hares, &c. Pop. 3800.

CATTARO a seaport in Austria, Dalmatia, S.E. on twenty-four miles, 83 m. S.E. Ragusa lat 43° 35' 34" N lon 15° 46' 30" E. It lies at the foot of steep limestone rocks, strongly fortified, and surmounted by a castle connected with the town by means of a zig-zag path. It is also surrounded with walls entered by three gates, and defended by towers. The buildings are in the Venetian style, and the streets narrow, irregular and dark. It is the seat of a R. Catholic bishop, and the cathedral is a well-built edifice of brown stone. There is likewise a Greek church. Cattaro is the seat of courts of justice, and the residence of a military governor. Its harbour is spacious but little frequented, the export trade being inconsiderable. Outside the F gate is the market, frequented by the Montenegrins, who cross the mountain ridge, bringing butter, eggs, cheese, potatoes, dried fish, smoked meat, sheep, oxen, pig, vegetables war honey, yellow hides, wool, tortoise shells, fowls, Indian corn, rice, fruit, Turkish and Montenegrin tobacco, charcoal, &c. The climate is apparently hot in summer and excessively wet in winter. Cattaro stands on the site of the Roman *Adriacum*. It was founded in the sixth century and was formerly capital of a republic of same name. In 1663, and in 1677 it was nearly destroyed by earthquakes. Pop. 4000.—(1) *Atlas Highlands and Islands of the Adriatic*. Wilkinson's *Dalmatia and Montenegrin*.—The *SEUL* is an extensive and peculiarly formed harbour in the Adriatic, well defended both by nature and art. It is composed of three basins or lakes connected by narrow channels, under half a mile wide, while the outer entrance to the first basin is only about 14 m. wide, becoming to under a m. le. The first basin of irregular form is about 3 m. long by about 2 m. broad the second somewhat triangular in shape, is about 6 m. by 5 m. in its greatest extent and the third about 8 m. by 3 m. greatest dimensions, forms two smaller basins, from the most S. of which proceeds a long narrow arm, at the extreme end of which lies the town of Cattaro. The entrance to the gulf is somewhat difficult.

CATTAGAT *See Kerevats*.
CATTARICH, a vil and par England, York, N Riding. The *VILLAGE*, which stands on a plain near the Swale, consists of one street well kept. Houses mostly of brick of a respectable appearance, ample supply of good water. It has a parish church, an old Gothic structure, a Methodist chapel an academy and an endowed school. The people are almost wholly employed in agriculture. The Catterick Bridge Station of the York, Newcastle, and Berwick Railway is about 1 m. from the village. Area of par 29,399 ac. Pop. 5014.—(*Local Correspondent*).

CAUR, *See Kaur*.
CAUR, a to Nassau, hill St. George's, r bank Rhine, 24 m. W. by K. Meers, and at the foot of a steep slate hill. It has a church, and its inhabitants live by cultivating the vine, traffic on the Rhine, and by trading and working the excellent slates of the vicinity. To the Rhine castle, a stronghold on a rock in the river opposite the town the hall of the Elector Palatine of the Rhine used to go to be confined. A toll is still levied at this castle for Nassau, a remnant of the taxation that was formerly made upon all the traffic on the river passing the castle. Pop. 1502.

CAUBOL. *See CAUBOL.*

CAUDA, an old dep. New Granada, bounded by the dep. Isthmia, Magdalena, and Cauca, and by the republics of Ecuador and by the Caribbean Sea, and the Pacific. Area estimated at 66,800 sq. m. Pop. 198,000; divided into the four provinces of Popayan, Choco, Buenaventura, and Pasto.

CAUCA a river New Granada, which rises in that part of the Andes called Paramo-de-Guanacas, within the province of Popayan, Antioquia, and Cartagena, and after a course of about 800 m. S. to N. between the central and W. Cordilleras of the Andes, falls into the Magdalena, between the small towns of Pisto and Tancol, in lat. 9° 25' N. Of its numerous tributaries the Nechi which joins it on the right is the largest, and of the towns on its banks the most considerable are Cali, Toro, and Antioquia.—The *VALLEY* of the Cauca is one of the richest, most fertile, and most populous districts in S. America. It consists of two plateaus of very different elevation and temperature. The soil is deep the pastures rich and the lands well cultivated. Cattle of a superior description are reared in great numbers; and the fields and farm-houses present an appearance of opulence and comfort. On all sides the earth, dyed with red and yellow indicates the presence of gold, many masses of which precious metal are found here, all situated in the upper part of the valley.

CAUCASUS, a gov Russia, bounded, N. by govs. Don, Cossacks and Astrakhan, E. Caspian Sea, S. Transcaucasia, and E. Cossacks of the Black Sea. greatest length, N. W. to S. E. about 880 m. greatest breadth N. to S. 170 m. It is traversed N. to S. near its centre, by a low manifestation of the Caucasus Mountains, but with this exception, the surface is flat, consisting generally of an alluvial plain towards the E. appears to be of very recent formation. It is not traversed by any river of importance (the Kura, which is the lower part of its course was lost in the sand, no longer deserves the name) but is watered on part of its N. frontier by the Merikhi, and on the S. by the Kuban and Terek. The climate is in general very mild, and there are some fertile tracks particularly in the neighbourhood of the Terek but great part of the alluvial flats is covered with salt pools and marshes, which make the soil when they prevail, altogether unfit for cultivation. The survey is in some measure, compensated by the large quantities of excellent salt which is obtained from them. Some of the steppe yield tolerable pasture, on which numerous herds of cattle are reared. The chief products of the soil are corn, including maize, and wine. The mulberry thrives well and considerable attention has recently been paid to the rearing of silk-worms. Bees also are carefully attended to, and the honey and was obtained from them forms a considerable article of export. Owing to the neighbourhood of the warlike mountaineers of the Caucasus a considerable army is always maintained within the government, and most of its towns are fortified. The cap. is Georgievsk Pop. 536,400.

CAUCASUS an extensive and high range of mountains the centre chain of which stretches N.W. to S.E. for about 700 m. between the Black Sea and the Caspian, and there forms the boundary between Europe and Asia. From the central chain numerous branches are thrown off. One of them to the N. proceeds through the government of Caucasus into Astrakhan and onward to the banks of the Volga, while the branches to the S. traverse the greater part of the government of Georgia, and in the S. of that government link on with the mountains of Arrat. The highest point in the range is Mount Elbrus, which stands near the middle of the central chain and has an altitude of about 18,000 ft. The next highest is Mount Kasbek 16,800 ft. across which is the celebrated Eng Pass, which gives Russia her only carriage communication with the Trans-Caucasian dominions. The N. side of the range is much more abrupt than the S. Great part of the mountain still remains to be geologically examined but an admirable section is furnished by the Eng Pass, and has been fully described particularly by Wagner who not only travelled over it, but resided several months among the mountains of Kasbek and ascended them in the limit of perpetual snow. According to him, stratified rocks appear at the bottom of the mountains, and rise to a considerable height on their sides. These rocks consist chiefly of thick beds of limestone, conglomerates, and clay slates. Higher up are seen however crystalline masses composed of granite, gneiss, soapstone, and gabbro. These masses, though higher in pos-

tion, are evidently lower in the geological series than the stratified rocks, which in many places have been unharmed by them, and in consequence have a considerable dip. Highest of all is trachyte porphyry which forms the great body of

dior from a variety of stocks, and speaking a variety of languages, they are all distinguished by one noble quality—an almost inextinguishable love of freedom, and in bodily constitution are at once so robustly and so elegantly framed that what is known as the Caucasian race is universally acknowledged to be the finest physical type of man.—(Wagner's *Koschus Koob's Karte von dem Kaukasus* *Indien*, &c.)

CAUCASUS (INDIAN) See HINDOO COAST

CAUDEBEC, a seaport in France, dep Seine-Inférieure, 18 m N.W. Rouen, r bank, Seine, at the embouchure of the Caudébec. Though commodious, and favourably situated between Bonin and Havre, the port is little frequented. The town has old walls and ruined fortifications, a parish church, built in the 15th century remarkable for the elegance and delicacy of its architecture and manufactures of sailcloth, starch, leather and soap, cotton mills, blacksmiths, and tanneries, with a considerable trade in ship-burial, grain, fruit, poultry &c. Prior to the emigration of the Protestants after the revocation

MOUNT ELBRUS. After Prince Gergory Goussakov.

all the principal summits of the central range. That this trachyte is the youngest of all the rocks is proved by the fact, that in many places it is seen piercing them, and throwing them into the wildest confusion. Judging from the composition and general appearance of these great trachyte masses, Humboldt and other celebrated geologists are of opinion that the Caucasus, and all the loftiest summits of the great mountain-ranges of both hemispheres were upheaved contemporaneously and within a comparatively recent period. The limit of perpetual snow in the Caucasus is 11,000 ft. and below, as some of the mountains rise from 5000 to nearly 7000 ft. above this there is an extensive range for glaciers. It would seem, however, that the supply of moisture which the atmosphere affords is far less than might have been anticipated. Scarcely a single lake of any extent is to be found in the Caucasus, and the scenery thus remains destitute of that which constitutes one of the most magnificent features in the Alps of Switzerland. In height and magnitude Mount Elbrus must yield to many mountains of the Caucasus, but in all the other essentials of sublimity it still remains unequalled. Numerous cascades tumble down the N. steps of the Caucasus, but none of them are remarkable either for volume or height, and the only rivers of any consequence which are fed by them are the Terek, Kuban, and Kura. The minerals of the Caucasus, so far as may be judged from the very imperfect examination of them which has been made, are not of great value. It was at one time supposed that gold abounded, but a worthless material of the same colour called out gold appears to have been mistaken for it. The only mineral which has yet been ascertained to exist in such quantities as to make it capable of being worked to profit is lead. Vegetation is very vigorous. Magnificent forest trees clothe the higher mountain slopes almost to an incredible height, lower down all the finer fruit trees of the climate are found growing in wild luxuriance; while lower still, where human labour can be made available, almost any degree of culture, however imperfect, is rewarded with an abundant crop. The ordinary cereals grow 7000 ft. above sea level while valuable shrubs, plants, and flowers, in almost endless variety, deck the valleys and lower plains. A animal is not less vigorous than vegetable life, and the forests abound with almost every species of game—among quadrupeds wolves, boars, jackals, deer goats, and hares—among birds pheasants, and partridges. A large species of wild cattle, called *ovoceros*, roam at large, and the herds of the Caucasus have been famed from the remotest antiquity. The inhabitants include a great variety of tribes, the principal of which are the Tcherkesses or Circassians, Georgians, Ossetes, Lezgians, and Abkhases. Evidently de-

ived from the Râkiet of Nantes, Caudebec was famed for its manufacture of hat. Pop. 2333

CAUDEROM, a pretty little village in France, dep. Gironde, about 3 m. from Bordeaux, surrounded by numerous country seats, and much frequented on holidays by the inhabitants of Bordeaux. Pop. 1485

CAUDY, T. B., a town in Spain, New Castle, prov. of and 50 m N.E. Albacete. It has three squares, a town-hall, prison and several fountains, a parish church, Carmelite convent, and a hermitage, used as a chapel for the cemetery. Agriculture and distilling brandy are the main occupations. Pop. 5002

Carcassonne 1 bank Argent-Double. It has a fine church

formerly belonging to the Benedictine abbey founded in 791

and supposed to be the Revolution of 1793. Cloth and brandy

are made here, and in the vicinity are extensive marble quar-

ries. Pop. 3040

CAUNTON par Eng Nottingham; 4150 ac. Pop. 611

CAURA a considerable river Venetian Galesina, formed by the junction of the Tursani, Ezeraviti, Margareta,

and their tributaries, which take their rise in the Sierra Par-

ma, near the centre of the territory. The *Caure* is formed

about lat. 6° 25' N. from which it flows N., but with a very deviant course till it falls into the Orinoco, at lat. 7° 40' N.; lon. 56° 1' W. Its whole length is about 150 m.

CAUSADÉ, a tn. France, dep. Tarn-et-Garonne, 23 m. N. E. Montauban. It is agreeably situated, and the suburbs by which the old town is surrounded are well built. Its only noteworthy buildings are the Hotel de Ville, and the parish church. Manufactures—canees linen, and woollen goods, sugar and tanneries. Trade—grain, saffron, spices, produce, cattle, wool and agricultural produce. Pop. 2400.

CAUTZ, or **CAUTZ**, a river Chli, Arica, Chile, has its sources on the W. slopes of the Andes, at about lat. 38° 44' S. from which it flows nearly due W. and falls into the S. Pacific Ocean at lat. 38° 48' S. flowing but a slight difference of parallel between its source and embouchure. Its whole course is about 150 m. It has six or eight large tributaries, some of them not much of it all inferior in size to itself. There is a town of the same name situated on the R. bank, and near where it is joined by the Paracatu. lat. 38° 45' S.

CALTO a river Cuba near the E. extremity of the island. It has its sources in the sierra de Colera, near Santa, about lat. 20° 20' N. from which it flows in a N. W. direction for about 45 m. when it bends round to the E. W. and, lat. 20° 30' N. falls into the bay of Hicuta Bay, about 70 m.

CALX (PAYS) [anc. *Pygus Colcahu*] a dist. France, formerly a dependency of prov. Normandy cap. Caudebec. It comprehends the greater part of dep. Seine Inferieure, comprising in particular Arrou. It re, almost the whole of arrou. Bieppe and Yvetot, and part of arrou. Neufchâtel.

AVA a small fort. Scotland one of the Orkney group, on Caithness lat. 58° 55' N. lon. 3° 5' W. It is upwards of 5 m. in circumference, and produces good crops of oats and bere. P. 201.

AVA a tn. Naples prov. Principato Citra, agreeably situated in the valley of Penastua d. m. N. W. Salerno. It is the seat of a bishop, suffragan to the Pope and contains a cathedral, three other churches, a car vault, a house of refuge, an hospital and a seminary. Silk cotton, and linen are manufactured here and in the numerous small villages that surround the town. The district is extremely unproductive, but the inhabitants have become wealthy by their industry and commerce. About 3 m. from Ava is the magnificent Benedictine convent of the Trinity which formerly contained an excellent library now transferred to Naples. This library with its archives was considered the richest in the kingdom. Pop. 18,025.

CAVADO or **CAVADO** a river Portugal which rises in the sierra de Cizez, on the frontiers of Galice a little N. Montalegre, flows S. W. passes Barcellos, and falls into the sea at Esporoso, after a course of 65 m. of which about 6 m. are navigable.

CAVAGLIA a tn. Paduana States, Piedmont, division of and 30 m. N. E. Turin. Pop. 2600.

CAVALIEN (anc. *Calvion*) a tn. France dep. Vaucluse, 14 m. S. E. Avignon on bank Durance, near the embouchure of the Lons. It is agreeably situated but ill built, with narrow dirty streets. The only public building of note is the Hotel de Ville. The surrounding district is one vast garden, producing excellent fruit in particular much esteemed melons and peaches. There are numerous silk, mulberry and oil mills also manufactures of vermilion, and of brassen materials. A considerable trade is carried on in silk, olive oil, almonds, fruit, mulberry &c. A large silk market is held weekly in the weekly is a remarkable cavern, in which 4000 sheep are penned during summer. The Romans had an important colony here, and erected many edifices, of which almost the only remains are some tombs, and the fragment of a triumphal arch. Pop. 3914.

CAVALCANTE, a tn. Brazil prov. of and 306 m. N. E. Goyas, near I. bank, Parana, with three churches and a school. The gold mines in the vicinity formerly rich, are now exhausted or exhausted, and the inhabitants are chiefly engaged in agriculture and cattle-raising. The produce is sold in the maritime provinces. Cavalcante is a centre point for travellers and carriers between Mato-Grande, Goyas, and Minas-Gerões.

CAVALESE, a tn. and com. Tyrol, prov. of, and 25 m. N. E. Trent, on bank Aversas well built and has a fine parish church adorned with marble pillars. Pop. 2142.

CAVALHO a small tn. W. coast, Africa, lat. (N. and) 11° 30' N.; lon. 15° 41' 15' W. It is 1 m. long and 3 m. broad of volcanic origin produces in abundance a species of plum, supposed to be anti-scurbutic and its seeds eaten with a kind of fish called cavalro, from which it probably derives its name.

CAVALIERE (Carr) a broad headland, S. coast, Atlantic Turkey on the Mediterranean lat. 36° 7' 30' N.; lon. 28° 45' 45' E. (N.) It resembles an island, and exhibits cliffs of white marble rising up perpendicularly from the sea to the height of 735 ft., and connected to the main by a low narrow isthmus, which forms a small bay on each side.

CAVALLER-MASQUENS, a tn. Italy Piedmont, prov. Cuneo 10 m. N. E. Saluzzo, near I. bank, Maiza. It has two churches and four convents. Pop. 5300.

CAVALLY a tn. point, and river W. Africa, Guinea Coast, E. of Cape Palmas. The town stands on the point of the same name; lat. 4° 21' 15' N.; lon. 7° 55' 35' W. with three villages a little to the E.—The town, which may be distinguished from the adjacent marshy shore by its black rocky appearance, is encompassed by reefs, extending 3 m. to seaward.—The river, a little E. from the town issues between two low sandy points with a bar before it, which is not always passable by boats.

CAVAN an island co. Ireland, prov. Ulster having, N. Fermanagh, N. and E. Monaghan S. Meath Westmeath, and Longford, and W. Leitrim. Extreme length, 51 m. extreme breadth 20 m. although throughout one half its length it does not exceed an average of 6 to 8 m. Area, 406,280 ac., of which 375,478 are arable, 71,918 uncultivated, and 7326 in plantations. The surface is broken, extremely irregular and in the N. rises into mountainous elevations, while to the N. W. the prospect is bleak and dreary, the soil is generally light and poor except along the courses of the streams. Good copper and lead appear to exist, and there are numerous mineral springs, of which that at Stranishel is the most celebrated. The lakes are numerous but small and some of them picturesque with well wooded margins. Agriculture is in a backward state in this county; draining and irrigation are wholly unknown the fences are mere ridges of earth, and the ploughing slovenly and inefficient. The chief crops are oats, potatoes, and turnips, but no coarse forage also is grown in considerable quantities, while wheat has become in some places a more common crop than formerly. The principal manufacture is that of linen which forms the chief dependence of many of the inhabitants, almost every family carrying it on to a greater or less extent. Bleach-grounds are consequently numerous, and although several have ceased operations there are still a good many of these establishments actively employed. The number of national schools in Sept. 1848, was 155 attended by 16,311 children. Principal towns. Cavan the capital Ootobhill and Ballybrack. The county is divided into eight baronies—Castlerea, Glenties, Glenties, Loughlin, Lower and Upper Tullyhanney, Tullyhann, and Tullyhann and contains 56 parishes. It sends two members to the House of Commons constituency (1840), 684. 1 op. 174 071.

CAVAN a tn. Ireland, co. Cavan, 57 m. N. W. Dublin in one of the remotest parts of the country. In the principal street are some good houses, but, on the whole, the town has but an indifferent appearance a large portion of it being composed of mean-looking buildings and more so, though it is said to be improving. The parish church is a neat structure, with a slender spire. The other public buildings are a R. Catholic chapel, a Presbyterian and a Methodist meeting-house, an endowed school founded by Charles I. municipal and county offices, jail union workhouse a courthouse, an infirmary—a plain building; and a fever hospital. It has also several Sunday and parochial schools, supported by subscription. The trade is inconsiderable it includes the manufacture of a little linen, and a retail business with the surrounding country. Cows and butter are the staple articles of sale. The assizes for the county general assembly at Hillery and winter and petty sessions every week, are held here. Pop. 2637.

CAVANAR, a port or harbour Cuba, on the N. W. coast of that island, 88 m. S. W. Havana lat. 23° 5' N.; lon. 82° 55' W. It is a fine deep bay having its entrance between two extensive reefs. Within these is room enough for several

hundred sail of ships. It is protected by a battery of five guns, with a marble tower of one gun in its centre, walled in at the bank, with loop holes facing the harbor.

CAVAREZE-MAURO-SINISTRO a vil Austrian Italy gov of, and 25 m S W Venice, traversed by the Adige, which divides it into two parts. It contains a parish and three auxiliary churches, and has a considerable trade in cattle, corn, hay, wool, and silk. Pop. 7000.

CAVATO a market in Austrian Italy gov Venice prov of, and 80 m S W Trieste. It contains a parish church and several chapels and oratories and has manufactures of woollen and linen cloth and hats, dye-works, and fulling-mills. Pop. 2600.

CAVE, two towns and two parts, England E Riding York.—1 *Cave (North)* the town, situated on a plain consists of two principal, regular and well kept streets houses in the modern style and built of brick. Ample supplied with excellent water. It has a parish church, and a Methodist and a Friends meeting-house, and two schools. Area of par 6913 ac. Pop. 1133.—2 *Cave (South)* the town 2 m from N Cave stands at the foot of a hill called Mount Airy and has a parish church, and an independent and a Methodist meeting-house, and two schools. Good supply of excellent water. In the neighbourhood is Cave Castle an old Gothic edifice. People chiefly agriculturists. Area of par 8600 ac. Pop. 1431.—(Local Correspondent.)

CAVERY a river Hindostan, to the waters of which Mysore and the Carnatic owe much of their agricultural wealth. It rises from several head streams in Coorg and Mysore, near the confluence of Malabar and between lat. 11 37 and 19 20 N flows E. through Mysore, Coimbatore and the Lower Carnatic and after a winding E course of about 450 m. falls into the Bay of Bengal, by numerous mouths, in the province of Tanjore, the plains of which are fertilized by its B. branches. In N. Colimbatore the Cavery forms an island, called Sivana Sumatra, near to which are two magnificent cataracts. The cataract of Gargana Chikil occurs in the N. Channel where the water falls over a perpendicular rock 600 ft. high. The S. cataract called Thura Chikil has a fall of 100 ft. in 10 or 12 streams. The Cavery is filled by the monsoon rains in May and July, but is not navigable excepting by small boats.

CAVERTPAUK a tn Hindostan Carnatic 67 m W S.W. Madras lat. 12 53 N lon 79 51 E. It is mostly built, and the adjoining fort, at one time a place of some strength, is now in ruins. A victory was gained here by the British over the French and their allies, in 1764. Near the town is an immense water-tank, 8 m. long by 2 broad which fertilizes a large tract of country and is, perhaps the finest work constructed in S. India for the purpose of irrigation. The tank is lined on the inside with large stones, and supported by a mound of earth 30 ft. high.

CAVI a tn Papal States, 28 m E R. Roma. It extends in a beautiful district, and is finely built on a rock rock on the slopes of Mount Mavorola. Near it is a fine modern bridge of 20 arches, built over a deep torrent, one of the tributaries of the Lano. Cavi was built by the Celotians as early as the 11th century and is memorable for the peace signed here, in 1557 between the Duke of Alba and the Caraffa. Pop. 9000.

CAVIANA an Isl Brazil prov Para, in the mouth of the Amazon, N the Isl of Marajo, on the equator. It is of irregular form, measures 60 m N W to S.E., and about 20 m broad. It is well wooded.

CAVITE, a tn, and prov in Luzon, one of the Philip. Islands. The town is situated at the extremity of a point of land which projects, in a N.E. direction, into the Bay of Manila, E. coast; lat. 14 39 30' N; lon 120 58' E (N); about 11 m. S.W. Manila. It is capital of the province, is well fortified, and is the place of residence of the governor.

VOI 1

It contains a church, barracks, convent, and hospital; houses nearly all of stone. A manufactory of cigars lately established has added considerably to the commercial importance of the town. Cavite has a reputation for salubrity and is much resorted to on this account by foreigners from Manila. The docks and arsenals were at one time famous, but have been long going to decay.—The province is situated partly on the Bay of Manila, which, with the province of Tondo, bounds it on the N. the Lao de Bay on the E., the province of Batangas on the S. and the sea on the W. It is advantageously situated, but is not very fertile although much more could be made of it by a more industrious people, and by which it is inhabited who are extremely indolent, and so unanimously disposed that it is said more criminals come from this province than from any other in the island. The chief productions are rice, sugar, indigo, and coffee, some of the latter it is said equaling, if not exceeding, that of Mocha. A great variety of fruits likewise are grown including mangoes, dates, bananas, water-melons, oranges, and lemons. There is also some trade in cattle, sheep, and swine. Fish is another principal source of subsistence. Cavite is celebrated for its pottery and porcelain. Pop. of prov 84,495

CAVOR, or **CAVOVA**, a tn kingdom of Italy Piedmont prov Turin 7 m. S.E. Phierolo. It stands in a fertile plain at the foot of the Alps, contains a communal college and has manufactures of linen, tanneries, silk mills, some trade in corn and two annual fairs. It suffered much by an earthquake in 1808. Marble and slate are quarried in the neighbourhood. Pop. 6000

CAWDOD a par Scotland 4 m square chiefly in co. Nairn, but partly in co. Inverness remarkable only for containing the remains of the castle in which, as tradition asserts, though on more than doubtful ground, King Duncan was murdered, an event immortalized by Shakespeare. The present castle a fine specimen of ancient fortification, was built in the 16th century rendering it impossible it could be the same in which the Scottish monarch was assassinated, that tragically having taken place in the 11th century, he about 400 years before. Macbeth a second time was *Traitor of Cawdor*. P. 1203

(A.W.I.W.L.L. par Eng Lincoln 540 ac. Pop. 40
CAWNPUR, or **CAWNPORA**, a tn and dist Hindostan, presid. Bengal, N.W. prov. The town is bank Ganges, which is here about a mile in breadth is 216 m W Allahabad lat. 26° 30' N lon 80° 12' E. It is of considerable extent but as, on the whole, mean looking and dirty with exception of the chowk or principal street which is composed of well-built brick houses two or three stories high, with balconies in front. Hardly any of its temples or mosques are worth noticing with exception of one small masjid an

IN MOSQUE AT CAWNPUR.—FROM AN ORIGINAL DRAWING BY CHAS. H. SHARPE, GEN. RAJ.

elegant little structure, ornamented with three egg-shaped domes a large one in the centre and a smaller on each side, and having a tall and graceful minaret at either end. Saffron, harness, gloves, and jewellery are manufactured here to some extent. Cawnpur is one of the most important military stations in India. The cantonments extend along the bank of the Ganges for nearly 7 m. comprising many hundred hussars, the barracks for the troops, the barracks, the

80

whole presenting a very imposing appearance. Several of the hampsteads are most pleasantly situated on the lofty banks of the river which here runs to a height of 100 ft. They are fitted up luxuriously and have extensive gardens, in which tamarinds, mangoes, bananas, avocados, and fig-trees overshadow a rich expanse of flowers, of the most brilliant colours and graceful perfume. The hampsteads are mostly built of masonry or sun-baked bricks, and roofed with tiles or thatch; the latter however is preferred, on account of its keeping the apartments much cooler, the tiles becoming so heated by the sun as to render the house inside like an oven. Within the enclosures are a handsome suite of assembly-rooms, supported by voluntary subscription and a commodious and elegant theatre, a public drive, called the Course, a fashionable resort after sunset a race-course and several club-houses. There are here, also, a Protestant church, a St. Catholic chapel and schools for the children of the soldiers. Cawnpore is well supplied with every description of goods, both European and native, which are to be had on very moderate terms. In May and June the thermometer ranges from 95 to 104 and in the winter months falls as low as 43 at night, but in the day stands at 70°. During at least half the year the roads through and about the cantonment are ankle-deep in dust, which, when a N.W. wind blows, is whirled into the air in dense clouds, so thick that frequently an object cannot be seen half a dozen yards off, totally obscuring the sun, and penetrating into every room in the house notwithstanding the precautions of instantly closing every door and window. About 2 m N.E. stands the old town of Cawnpore where there is a long range of handsome ghats, adorned with a few temples, and terminated by the palace of the Rajah a striking and picturesque object, but now falling into ruin. The military force quartered at Cawnpore usually amounts to 8000 men, of various arms.—The river is composed of seasons to the British Government by the Bahadur of Oude, is bounded E. by the Ganges, and on the other side by the districts of Ennah, Pootnah and Bundelkand area 3650 sq m. But but productive in wheat, barley, maize, rice, sugar-cane, cotton, grain, Indian millet, and indigo. Potatoes, peas, cauliflower and many other vegetables, grow in the gardens, but the potatoes are rumped. [add See E. P.]

CAWOOD a par and vil England, York W Riding. The village, situated on the Ouse, about 9½ m S. York is remarkable only for having been long the residence of the Archbishop of York who had here a magnificent palace and for having been the place of retirement of Cardinal Wolsey after his fall, and where he was arrested by the Earl of Northumberland on a charge of high treason. CAWTHORPE (JITTY) par Eng Lincoln 400 ac Pop 233

CAXA DE MUERTO (the coffin, or dead-chest) a small isl. Caribbean Sea, off the S. coast, Porto Rico about 6 m. from the shore lat. 17° 50' N lon 66° 51' W (a.) It has a very conspicuous and remarkable appearance, much resembling a coffin whence its name. The shore towards Porto Rico is flat and sandy; on the S. side it is high and stony. There is no fresh water on it, nor trees of any kind but for fuel. Fish and turtles abound here, the latter laying their eggs on the sandy bays.

CAXAMARCA a town in Peru dep. Libertad, cap. prov. of same name, 80 m N.E. Truxillo; lat. 7° 2' S; lon. 78° 31' W. In a valley E. face of the Andes, on a small river of its own name, a tributary of the Marañon. The streets are broad and straight, the houses, built of earth are tiled and whitewashed churches numerous, and being built of richly-etched stone, and ornamented with cupolas and spires, have a very elegant appearance. Manufactures—woolens, linens, cottons, sword-blades, daggers, and other articles of steel, and of the precious metals. A considerable trade is carried on with places on the coast, to which Caxamarca furnishes its own manufactures, and whence it returns its necessities from Europe. In the environs are some thermal springs and baths, used by the natives, and still much resorted to. Here are the ruins of the ancient palace of Atahualpa, the last Emperor of Peru, in the prison chapel of which he was executed by

the Spaniards. Pop. 7000.—The province, area, 3185 sq m., is traversed by the chain of the W Cordillera, in which rise a great number of rivers, all affluents of the Marañon. The people are employed in agriculture, the rearing of cattle, the manufacture of coarse cloths, the working of mines, and washing for gold. Pop. 55,000.

CAXAMARQUILLA a town in N. Peru, prov. Pallas, dep. of and 100 m N.E. Truxillo. Pop. 8000.

CAXATAMBO, a town in Peru, in dep. Junin, cap. prov. of same name, 140 m N.E. Lima. W. the foot of the Cordillera, in a fertile valley traversed by one of the arms of the Barranca. The adjoining of woollen yarn and trade, occupy the inhabitants. Pop. 5000.—The province, area, 1484 sq m. is mountainous has a rigorous climate and is one of the poorest and most barren in Peru. From the traces of ancient cultivation, the remains of aqueducts, and the vestiges of towns and villages it would appear that before the arrival of the Spaniards this country was in a very flourishing condition. The ridges of the mountains still afford good pasture, and feed some oxen and sheep. Preparation of wool of superior quality which is exported to Lima, and to the neighbouring provinces, is one of the chief occupations. A considerable trade is also carried on in vitriol sulphur and salt. Pop. 2,000.

CAXIAS, or **ALDEAS ALZAS**, a town of considerable extent, Brazil, prov. of and 172 m S.E. Maranhão, 7 hours, 100 m, navigable up to the town. It has two churches and is a depot for the products of the province, and consequently has a considerable transit trade. Its inhabitants are chiefly engaged in agriculture and cattle-rearing.

CAXO or **CABO** an isl. Grecian Archipelago lat. (S.W. point) 35° 19' N lon. 26° 50' E. 4½) 13 m long, and 6 or 6 m broad, surface uneven and rocky. At its N. side is a little bay where there is a village, consisting of about 100 houses, occupied by Greek fishermen. There is but one practicable place on the landing-place on the island. The natives cultivate a little corn and grapes making wine from the latter for their own consumption. Off the N. side of the island, and at the distance of 3 or 4 m. from it, there is a small islet, surrounded by others of less size, called Caxo or Cabo Ponto.

CAXOUEIRA See CACHOEIRA

CAYTON par Eng. Cambridge 2000 ac. Pop. 630

CAYAMBE UNCU a lofty mountain Paezador in the Colombian Andes, directly under the terrestrial equator lon. 78° 19' W 45 m N.E. by E. Quito. It is of a beautiful conical form, and rises to a height of 19,885 ft. From its geographical position and great elevation, it forms one of the most remarkable landmarks on the face of our globe, summit covered with perpetual snow.

CAYONS, or **CAIRO**, a group of isls. islets and rocks, Caribbean Sea, between lat. 21 and 22 N lon. 71° 20' and 72° 30' W. The Grand Cayon, which is the largest, is about 20 m long by 3 or 4 m. wide and has several good harbours.

CAYENNA a seaport town, and cap. French Guiana on the N.W. part of isl. of same name lat. 5° 27' N lon. 52° 20' W (a.) It consists of an old and a new town the former a miserable place, with steep and narrow streets, badly paved, and irregularly built, surrounded by walls, with high bastions and a ditch. But, in the new town, the streets are wide and clean and the houses good. There are here also, large warehouses for storing merchandise and a handsome church. In the old town are the Government-house, and an ancient Jesuit college. The harbour is shallow but not objectionable otherwise. It is protected by a fort and several batteries. The produce of the country is exported from Cayenne chiefly to France, and in 1841 amounted to £214,000; imports in the same year to £197,400. Pop. 5000.—The channel is separated from the continent of S. America by a narrow channel on each side runs a river that to the N., near the mouth of which the town is situated, is called the river Cayenne while that to the S. is called the Oya or Oyak. It is about 18 m. long, N. to S., and between 10 and 12 m. broad. On the N.W. part of the island there are some hills and elevated grounds, but in the S. it is low and swampy, and in the rainy season mostly inundated. The plantations of French Guiana are mostly on this island, at the mouth of the Cayenne. The chief productions are sugar, cotton, annatto, cloves, coffee, pepper, maize, &c. [add See SUPP.]

travels irregular. The climate, however, is on the whole salubrious, the heat, which would otherwise be insupportable, particularly in the plains and valleys, being greatly tempered by a sea-breeze by day and a land-breeze at night. When these breezes fall the air becomes very unhealthy and the province has been repeatedly scourged by pestilence. Coahuila is divided into 25 towns districts, which take the names of the different towns in the neighbourhood but the political or administrative division is into ten comarcas, which appoint eight deputies to the general legislative assembly and four senators and 25 deputies to the provincial assembly. Pop. 100,000.

CEBAZAT (anc. Sabancos) a tn. France, dep. Puy-de-Dôme 4 m. N. Clermont Ferrand on the rivulet Badat, in a rich fruit district. The inhabitants are engaged in tillage and cattle-rearing, and export fruits and vegetables to Paris. Two annual fairs are held in May and August. Pop. 2060.

CEBRELOS a tn. Spain, Old Castile, prov. of and 30 m. S.E. Avila, on a rising ground, 1 bank, Alberche, crossed in the vicinity by a handsome stone bridge of four arches. Its streets are in general, wide, and paved and the principal square is large and lined with fine houses possessing porticoes. The town also has three smaller squares, a capacious and magnificent church several chapels, a prison, storehouse, cemetery and three primary schools. On a hill to the N. stands an ancient watch tower now much dilapidated, and used as a telegraph. The inhabitants are engaged in weaving, tanning, expressing wine and oil and in husbandry. Pop. 2714.

CEBU an isl. and tn. Philippines. See Zebu.

CECINA a river and vil. Tuscany. The river rises about 38 m. S.W. Siena flows N.W. and then S.W. through the marshes of Pisa and Volterra, and falls into the Mediterranean, 21 m. S.W. Leghorn.—The village stands at the mouth of the river. It has a copper foundry and near it is a grand ducal castle. Pop. 600.

CECLAVIN a tn. Spain, Estramadura, prov. of and 20 m. N.W. Cáceres, 10 m. N.E. Alcantara, on a small hill. The houses in general are well built, streets clean and well paved and in a spacious square stands a tower containing the town clock. It likewise has a parish church, hospital, town-hall, prison, storehouse, convent, and four primary schools in the vicinity are sulphurous springs, much esteemed as baths. Linen and woollen fabrics, hardware soap, wax, candles, earthenware, wine, and oil are manufactured and some trade is carried on in cattle, grain, fruits, and wine. An annual fair is held in June. Pop. 4656.

CEDAR KAYS, three small isls. U. States, Gulf of Mexico, W. coast, Florida, and W. side of Yucatan Bay lat. 22° 5' N. lon. 82° 57' W.

CELDAR MOUNTAINS, a mountain range N. Africa, Cape Colony extending from lat. 31° 57' to 32° 24' S. and nearly along the meridian of 19° E. They are of primitive formation, and have a remarkably picturesque appearance, with peaks varying from 1600 to 5000 ft. above the level of the sea. In the higher parts an ice-coloured granitic sandstone appears to predominate while the secondary range, at a height of 2000 ft. contains many marine fossils. Fine oolite trees, of gigantic size, formerly covered these mountains and still do so to a considerable extent occupying ravines in the higher parts of the range, even at an elevation of 5000 ft. At a height of from 300 to 1000 ft. above the valley are many Dolomitic caves, varying from 30 to 40 ft. in depth, and containing numerous well-executed drawings in red ochre by that primitive people. In the valleys between the hills is an exceedingly fertile, dark-coloured vegetable mould, on which corn, tobacco, and wine are raised whilst the supply of water is more or less abundant, in constant and abundant.

CEPALLU (anc. Cephalonia) a seaport in and dist. Sicily, prov. Palermo at the foot of a rock, 50 m. S.E. E. Palermo; lat. 38° 0' N. lon. 14° 4' E. It is surrounded by an old wall, and has a cathedral with several churches. The port

is capable of receiving only a small number of vessels, and the commerce is trifling; but the sea fishery is prosecuted with activity. On a neighbouring hill, may be seen the ruins

CEPALU.—From Daily Express. Reconstructed Architecture of Italy.

of a castle built by the Saracens. The town is the seat of a bishopric. Pop. 8940.—The territory of Cephallenia is divided into six cantons.

CEPHALLIA, or KAVENLER per Wales, Radnor 4125 ac. Pop. 890.

CEGOAMA, a tn. Spain, Biscay prov. Guipuzcoa, 14 m. S. by W. Tolosa, at the N. base of the Pyrenees. It is a small well built flourishing principal street, with a central square; a large portion of them, however are detached. The town possesses a church six chapels, a townhouse, prison, Latin, music, and two primary schools, two cemeteries, and in the environs, a sulphurous spring. Manufactures—woollen stuffs, linen, ropes, pottery, machinery, nails, bolts, agricultural implements, and every description of hardware. The Carlist general Don Tomas Fontanarregal, was brought by his sons to Cegoama in 1835, after having been wounded at the siege of Bilbao, and died here eight days afterwards. His body was interred in the church. Pop. 2123.

CEGLIE, a tn. Naples, prov. Terra di Otranto, 25 m. W. Brindisi, on a hill. It contains several churches. P. 1930.

CELEGIN a tn. Spain, prov. of and 39 m. W. N. W. Madrid, 4 m. E. Caravaca, on a declivity facing the S. It has numerous spacious streets, and two squares lined with substantial houses and most public buildings comprising a parish church, three chapels, town and court-house, a prison, hospital, theatre, cemetery and several schools. Manufactures—paper, cloth, soap, potteryware, brandy wine, and oil. Trade—grain, wool, hemp, silk, wax, cotton &c. In the neighbourhood various quarries of jasper and variegated marbles are wrought. Pop. 10,354.—(Madrid.)

CEICER-DE-TRAIXE, and **CHICER-DE-MER**, two small isls. China Sea, off the N.E. coast of Cochin China. The first, called by the natives Hon Sau, is in lat. 11° 18' N. lon. 108° 48' E. It is rocky and barren, with exception of a little grass or green moss on the flat part. The second, Ceicer-de-Mer, is 41 m. S.E. the former lat. (centre) 10° 32' 30" N. lon. 108° 53' E. It is 4 or 5 m. long, and about 1 broad of easy access on the W. well-cultivated, and inhabited principally by Salucum, who pay annual tribute in salt fish and bird's nests to the King of Cochin China.

CEIDIO, par. Wales, Caernarvon 1081 ac. Pop. 160.

CELANO a tn. Naples, prov. Abruzzo Ultra IL, N. side of Lake Celano or Fucino, 6 m. S.E. Avezzano. It has several churches and a paper manufactory and two annual fairs. Pop. 2668.

CELAYA or **CELAYA** a tn. Mexican Confederation, state Guanajuato, 130 m. N. W. Mexico, and 6030 ft. above the level of the sea, on a high, Rio-Grande-de-Santiago over which is here a handsome bridge. It has numerous churches, among which, the Carmelite church is an imposing structure of mixed architecture with Corinthian and Ionic columns;

interior sombre and gloomy but enriched with a great quantity of gold and silver ornaments. There is also a large collection of storerooms. Manufactures—saddles, bridles, and other articles of leather. Great quantities of all kinds of goods, and horses and mules are bred in considerable numbers in the environs. Pop. 7000.

CELEBESIDE, a market in Ireland on Killybegs 82 m N. E. Maynooth, pleasantly situated, 1 bank, 1500 houses in general well built, supply of water plentiful. The church is a handsome edifice, with a tower and spire. There is also a free school, a dispensary and a fever hospital. Woollen cloth was formerly manufactured here to a considerable extent and adjoining the town there is an extensive cotton factory. Petty sessions are held every Monday. Pop. 1674.

CELEBES [called by the natives, *Negeri Orang Borneo* and also *Tanah-Bongka* for *Tanah-Manggese* contracted into *Manggese*] one of the larger of Indian Archipelago between Borneo on the W and the Moluccas on the E extending from lat. 1° 45' N to 5° 55' S and from lon 118° 45' to 125° 17' E. area, 71,791 sq m. Celebes is properly the name of the E. part only and *Manggese* of the W. From its singular shape it has been compared to a herring, or to two horse shoes joined at the fore parts. It mainly consists of four large peninsulas, stretching to the E and S and separated by three deep gulfs. Of these peninsulas, that of Menado on the N sweeps N then E and, lastly N. E. for 400 m. with a breadth varying from 12 to 60 m. that of Balatana on the E is 160 m long, and from 80 to 95 m broad. The S. E. peninsula has much the same length and breadth as the latter, and that of Mangassar on the S W forms a pretty regular parallelogram 200 m. long and 55 m broad. They are all formed by chains of mountains running from a common central territory 150 m long and 100 m broad. The gulf of Tomini or Gorontalo on the N. E. is 240 m long, and widens from 55 m. at its mouth to 100 m at its farther extremity which is marked on the latest maps as very little known. That of Tomaliki or Tolo on the E has, on the contrary a wide mouth and narrow upper end and that of Mangassar or Bona, on the S. washes the E side of Mangassar for 200 m. and varies in breadth from 55 to 80 m. To these must be added the bays of Menado, Amurang, Kwandang, and Tonoliki on the N. of Paloe and Puerre-Puerre, on the W of Balatana, Talawa, Nipa-nipa and Searung on the E. and many more or less considerable, in the gulf of Bona.

General Aspect.—Celebes is high and mountainous chiefly in the centre and the N. where there are several active volcanoes. The absence of extensive deltas, and the intervention of broad grassy plains between the forests distinguish it from the other larger islands of the Indian Archipelago. All that is most majestic and lovely in these, is thought to be concentrated in Celebes. It abounds in the most picturesque and varied scenery and the most beautiful and magnificent tropical vegetation.

Climate.—Though cut by the equator and wholly under the torrid zone, Celebes is thought remarkably healthy the natives often enjoying a vigorous old age and Europeans living longer than anywhere else in the E. Its extreme heats are tempered by the sea-breezes, by monthly rains, and by the N. winds that prevail for part of the year. The E. monsoon lasts from May to November and the W during the remaining months.

Geology.—The soil generally consists of a bed of vegetable mould from 10 to 20 ft. thick, on decomposing basalt. Gold is found in all the valleys of the N. peninsula, which is often convulsed by earthquakes and abounds in sulphur. Copper of good quality occurs at various points, and in Mangassar tin also, as pure as that of Banca. Diamonds are sometimes found almost at the surface of the ground and precious stones are carried down to the sand of the torrents.

Mountains, Lakes, and Rivers.—Lampoo-Batang is reckoned the highest mountain in Celebes being above 7000 ft. high. Near Menado, Mount Klobet, and the summits called the Two Sisters, stand conspicuous. The largest lake is supposed to be one in the central part of the island as yet unvisited by Europeans, and said, by the natives, to be surrounded with villages. That of Tondano, in the N. peninsula, is 2000 ft. above the level of the sea. But the most important of all is that of Tupan-Kendjo, or Lohay, in the S. W. It commu-

nicates W by navigable streams with the sea, and E with the Gulf of Boni and is the original seat of an early native civilisation, which has sent its ramifications over the whole archipelago. The largest river the Chirrana, flows from that lake, and is navigable for European vessels for some distance, and by the natives probes as far as the lake. The Boni enters the sea at Boni on the N. On the S. coast, there are many rivers navigable for some miles from the sea.

Zoology.—The island is entirely destitute of the large carnivorous animals and pachyderms. None of the cat kind from the tiger downwards, harts its forests nor has it the elephant the rhinoceros, or the tapir. Deer and wild hogs abound together with the Babirusas, and herds of antelope. Poisoned animals, unknown in the Sundas islands, here first come; also a singular sunbathing animal (*Cercus depressicornis*) the sup-koosim of the Malays and the monkey of the natives. It holds both of the ox and the deer and hunts the most solitary places of the S. of the island. The monkeys are of various kinds, and both numerous and dangerous. The white monkey is particularly mischievous. The *Tarsius spectrum* hides itself in the most woods of the plains, but when pursued, leaps from bush to bush like a frog, and though most insignificant, is held in superstitious awe by the natives, who attribute magical qualities to its large round, prominent eyes. Here, too are found the camelion and the flying-dragon, one of the marian tribe, with wings attached to the base of its flaps, forming a sort of parachute to facilitate its leaps from branch to branch. Monkeys, moles, rats, field-mice and scorpions are kept down by the numerous snakes of the island, from the enormous tiger python (*Boa constrictor*) 80 ft. long but not venomous to the small but deadly *Atractaspis*, more dreaded than the crocodile. Among domesticated animals are found small but vigorous horses, Indian oxen, sheep resembling those of the Cape of Good Hope and pigs. Many of the birds of Celebes differ totally from those of the Sundas lakes. Some seem to occur nowhere else and others, though found in the Sundas have peculiarities not found there. Green is here the prevailing hue of the parrot tribes, while bright red and scarlet predominate in the Moluccas. Beautifully-coloured pigeons, not yet scientifically described abound in the woods. Celebes is the first island in the Archipelago in which that angular pinnaceous fowl the *Macropygia* is found (see *AVICULARIA*, p. 260) as also a new kind of Moleo (*Macropygia*). The sea swarms with fish, so that 200 different kinds are sometimes offered for sale at the Mangassar market. The shores are frequented from time to time by the Dugong (*Halosaurus dugon*). The troping fishery and the catching of turtle, occupy thousands of the *Trans-Baljo* race.

Botany.—Naturalists have visited only four points of Celebes but as almost every plant or animal taken by them was more or less new a rich harvest may be expected from future researches. Dense woods clothe the mountain sides and in these are found the oak, the teak, the cedar the yucca—both *Artocarpus tomentosa* and *Styphelia tomentosa*—the one a tree, sometimes 100 ft. high the other a climber but both yielding powerful poisons together with countless other trees useful or precious, the clove and nutmeg tree, the negro and other palms, which supply the natives with coverings for their houses, clothing, cordage, household vessels, oils and intoxicating drink. To these may be added the pepper-plant, the sweet-smelling sandal wood, and that which, when fresh cut, yields a red dye. The sacred *marangani* sometimes presents, in a single tree the appearance of a forest. The bamboo attains the height of 40 ft. while its trunk though hollow is hard enough to serve for house supports and rafters the natives use its tender shoots for stems or reeds, or extract common vinegar from them. Aild to these the mango, the locust, the silk cotton-tree (*Bombyx mori*) the bamboo, from which the famed Mangassar oil is extracted smelted or fuel-wood, ebony the betel-nut tree and ginger plant. Among plants requiring more careful cultivation, there are the coffee-tree, Indigo the cocoa, sugar-cane, the manioc root, banana, and tobacco. Mountain rice, of which there are three varieties, is that chiefly cultivated, and also maize. In the gardens, cabbages, turnips, and other European pot-herbs, are cultivated. **Anthropology.**—The climate is too hot for the African of the interior that being the name generally applied to all mountain tribes that have been driven towards in many of the

islands by invaders of their coast. Those of Celebes are of middle stature, fairer in complexion than the Malays, and milder and more intelligent than the Alfurians of other islands. They believe in the agency of evil spirits, and the Polydemoniacal Ache prevails among them. But by far the finest race in Celebes, and indeed in the whole archipelago, are the Boegias, supposed to have come originally from Borneo. Like the Dyaks they are a remarkably handsome race, physically resembling the Malays more than the Malays to which race, also, they are far superior in point of honesty, energy of character, and general conduct. The bare word of these modern Thucydides is more to be trusted than the most solemn oaths of the natives of Bengal. Their commercial enterprise is unequalled in any soul, male or female from the princes to the peasant being more or less engaged in trade, and the most arduous voyages being undertaken by them in vessels ill adapted to brave the perils of the ocean. They are the chief, and almost the sole carriers of the archipelago, and annually visit even the V coast of Australia with from 80 to 100 prahus in order to collect cargoes of trepang. The Massosars are also a fine people, and supply the Dutch with their bravest and most faithful soldiers. The Celobans, generally are fond of active exercise, particularly on horseback, and as their country abounds in open grassy glades, they are much addicted to having the deer. They bring up their children in a sort of Spartan fashion rubbing their limbs with oil and water to strengthen them, and sending them to their friends, at 5 or 6 years of age, to prevent their being spoiled by the endearments of home. After some years attendance at school, the boys are taught handicrafts and the girls, who are educated by their mothers, learn silk and cotton weaving. Among those in easy circumstances, some of the women learn to read and write—a very rare practice in the East.

Language.—The languages and literatures of Celebes differ essentially from those of the continent to the W. The letters of its alphabet are, in form as unlike the Javanese as the latter are unlike the Arabic or Roman. The three great languages of the island, not reckoning the dialects of the savage tribes, are those of the Boegias, the Massosars, and of Mandhar. The ancient Boegia is the language of science and religion, and is thought, by some, to be the mother tongue of the three. The modern Boegia is the most cultivated and employs the Massosar as script and its literature more exactly both are distinguished by a soft and vocal pronunciation. The Boegia has a considerable body of literature, consisting, both of native tales, founded on national legends, and of translations of Malay and Javanese romances, and of works on law and religion from the Arabic.

Religion.—The Alfurians have their own vague superstitions. The more civilized inhabitants profess Mahometanism but previous to the introduction of that faith the Hindus had brought their religion to the island and the natives say that there are five Hindu monuments in the interior that have not yet been visited by Europeans.

Government.—Several independent nations inhabit Celebes, and their governments are more regular than their otherwise low degree of civilization would lead one to infer. The chiefs are elective. Constitutional principles are said to exist in full force among them. Some chiefs reign by right of inheritance, but, with the concurrence of inferior chiefs representing the general interests of the country. The most usual form of government is the federal and republican, composed with the monarchical and elective principle. The native princes so far recognize the authority of the Dutch, who have had a footing in Celebes ever since they expelled the Portuguese in 1660 with the exception of the four years occupation by the British. Much public respect is paid to women, and they occasionally reign as queens.

History.—The native annals reach back, with any certainty to only about 400 years, and exhibit a history full of wild energy, unceasingness, and warfare. In 1512 when the Portuguese first visited the island they found but few Mahometans in it and it was not until a century afterwards that Mahometism was generally adopted. The Massosars first conquered the Boegias, and compelled them to become followers of Mahomet. Afterwards the latter revolted were aided by the Dutch, and subdued the Massosars in turn. But even with the aid of their European allies, they failed in establishing a free gov-

ernment, and the system of monopoly now widely abandoned, but long forced by the Dutch on all the native chiefs, prevailed in every way destructive to the progress of the population.

Population.—Vaguely estimated, but, by the latest computations, thought to be about 2,000,000.—(Van der Aa; Temmink; Raffles Crawford; Earl's Eastern Seas; Willk's U States Exploring Expedition, &c.)

CELEBENZA, the name of two places, Naples.—1. A vil. and comm. prov. Abruzzo Ultra, dist. of 16 m. S.E. W. Terno. Pop. 1863.—2. A tn. and comm. prov. Capua, dist. of 22 m. W. S.W. Sansevero. It contains three convents, and has an annual fair. Pop. 3340.

CELLAN per Wales, Cardigan 3645 ac. Pop. 500.
CELLER, a tn. Hanover at the confluence of the river Aue with the Aller in the midst of a sandy plain, 23 m. N.E. Hanover. It is well built and well paved, and contains seven churches, a gymnasium, a library, a lying-in hospital, a medical school, a workhouse, and a penitentiary. It has also a royal palace with a fine chapel. In what is called the French garden is an indifferent monument to Maria, Queen of Denmark, sister of George III. who died here. The old parish church contains the burial vault of the house of Dennewitz-Lüneburg. Its inhabitants are noted for their industry; they manufacture excellent linen, dannel, hats, tobacco &c. and carry on a considerable trade with Bremen and other places, by the Aller which here becomes navigable. By railway, it communicates with Hamburg, Hanover and all parts of Germany. The royal family of England is descended from one of the dukes of Cella. 1 pop. 12,000.

CELLERFELD see KELLERFELD.
CELLIO a vil. kingdom of Italy Piedmont, prov. Val Sesia 55 m. S.E. Varallo. Pop. 3300.

CELORIDIO da ALICIA in Portugal prov. Beira Alta, in a fertile district, 11 bank, Mondego, 11 m. W. N. W. Guarda, it is divided into three parishes, each of which has a church, one of them collegiate and contains some ancient remains. Pop. 1931.

CEMBRA a tn. and comm. Austria, Tyrol, prov. of and 9 m. N.E. by N. Trento, bank, Auser. Pop. 1513.

CEMMES, a vil. and par. Wales, co. Montgomery 64 m. N.E. Machynlleth. The village, romantically situated on the Dovey contains a handsome church, chapels for Independents and Calvinistic Methodists, a day school and Sunday schools belonging to each of these religious denominations, and several charities. There are three annual fairs. Pop. 2247.

CHENED a tn. Austria Italy gov. Ven. on prov. of and 22 m. N. Treviso on the Masi. It is defended by a castle is the seat of a bishopric and of the district government, and has a cathedral and several other churches. It has a theological seminary and a gymnasium, five paper-mills, a hall foundry, some tanneries, and dyeing establishments, with manufactures of cotton and woollen cloths and silk. There are mineral springs in the vicinity. Pop. 4650.

CENIA (La) (anc. Cenis) a tn. Spain, Catalonia, prov. of and 56 m. S.W. Tarragona, 13 m. S.W. Tortosa, 1 bank, Cenis. It is well built, and has a square, adorned with a central fountain, a parish church, town hall, prison, and two schools. Employments—paper wine, and oil-making and husbandry. Pop. 2043.

CENIS (Morr) or MORIS (Cenis) a mountain and pass, Cottian Alps on the confines between Piedmont and Savoy and forming part of the watershed between the valleys of the Arie and the Dora. The unimpaired point of the mountain is 2224 ft. above Lans-le-bourg, in the former valley and 6773 ft. above the sea level. Its strata consist of alternate beds of schist, limestone, and gypsium. Beasts, serpents, and it is said quarts, also occur. In principal summits, Ronche, Ronche Michel and Ronche Malon, are usually surrounded by clouds, and covered with snow. Between the first two summits on the E. and Little Mount Cenis on the W. is a plateau covered with meadows and pastures, and partly occupied by a lake, which contains excellent trout, and discharges itself by a mountain torrent, which, rushing down towards here, and forms a section of the cascade. The vegetation of the mountain is particularly rich in rare Alpine plants, and is much resorted to by botanists. The pass has been practicable from the earliest times, but the road was very bad, and exposed to avalanches. The present

admirable road, one of the safest and most frequented over the Alps, was finished in 1810 at an expense of \$300,000, under the orders of Bonaparte.

CENON *v. a. Bastide*, a vil France, dep. Gironde, 2 m. from Bordeaux. Pop. 2641

CEYVALLO *v. a. Italy* Piedmont, prov. of and 7 m N N E. Corn near r. bank, Grana. It has a castle the former residence of the Marquises of Suse. Pop. 5000

CEUTO *v. a. Italy* prov. and 18 m N Bologna. E. bank, canal of Canto and near the river Reno. It is surrounded by a rampart and ditch, and contains several churches, convents, and a cathedral. The celebrated painter G. F. Barbi, commonly called (Guerino) who founded a school of art in 1616, was a native of this place. Pop. 4000

CEVTORE [*anc. Cevituro*] *v. a. Sicily* prov. of and 17 m W N W Catania, on a rock. It has only one street, a church, and a convent; but numerous ruins exist in the vicinity where also is found a stone that dissolves in water like soap. Pop. 4455

CENTRAL AMERICA. See AMERICA, p. 124

CEOR, *anc. Greece*. See *See*

CEPHALONIA, or **KEPHALONIA** *v. a. Mediterranean* and one of the largest constituting the Ionian Republic W coast, Greece, opposite the Gulf of Patras, between lat. 38° 4' and 39° 29' N and lon. 20° 21' and 20° 49' E. Greatest length, 82 m. breadth, varying from 5 to 12 m. area about 845 sq m. It is separated from Ithaca on the W by a strait about 2 m. broad, and stretching the whole length of the latter island, which lies parallel to its N extremity. Cephalonia is generally mountainous. A calcareous ridge traverses the island N W to N E, the highest summit of which, called Orso Alino, is about 5000 ft. above sea level. This lofty peak was anciently crowned by a temple of Jupiter of which no trace remains the mountain being now entirely covered with wind. The only plain in the island of any extent, is in the S W near Argostoli. It is about 8 m. in length, and is chiefly planted with vines. There are other fertile spots throughout the island, but the soil is in general extremely thin. The coast line is very irregular and deeply marked with indentations, the principal of which are the bays of Samos, Zola, and Argostoli. The last extends about 7 or 8 m. Island has good anchorage and is almost completely land-locked, having but a narrow opening of 1½ or 2 m. wide, with a range inside of nearly 10 m. of generally deep water.

The climate is mild, but subject to sudden changes of temperature, and to violent storms which are frequent. The principal produce of the island is currents, of which large quantities are exported annually. The other products are wheat, corn, olive oil, wine, cotton, flax, and salt, with various kinds of fruits, including oranges, lemons, figs, carobs and melons. The manufactures of the island are inconsiderable, consisting of cottons, and of carpets of uncolored wool and goat's-hair with some pottery, and distilleries of liquor. The inhabitants are intelligent, industrious, and enterprising but are charged with being quarrelsome and venal. Great numbers of them are brought up to the medical profession, and afterwards emigrate for practice to various parts of the continent, especially to Turkey where there is hardly a town without a practitioner from Cephalonia.

The greater part of the population are of the Greek church the others are of the Latin church, and have a R. Catholic bishop, and several convents of Franciscans. There are 11 free schools on the island which are supported by the Government and 78 private schools.

Cephalonia was known anciently by various names being called Samos by Homer in the *Odyssey* and Tethylos by Theophrastus. In 169 A.D., the island came under the Roman dominion, and so remained till after the division of the empire, when it became subject to the Byzantines till the 13th century falling afterwards successively to the Normans, Venetians, Turks, and again to the Venetians who retained possession of it till 1797 when it was taken by the French who were, in

turn, driven out by the Romans in 1799. Cephalonia was then made part of the new State of the Seven Islands under the protection of Russia. By the peace of Tilsit in 1806, the French again obtained possession of it, but were soon after driven out by the English, under whose protection it now remains. The island is divided into four districts and sends seven members to the Legislative Assembly and one to the Senate. The principal towns are Argostoli and Lixouri; there are besides, however several large villages, amongst which are Kalata and Zola, both on the N W coast of the island. Pop. (1851) 69,054.

CELI ALONI *v. a. Italy* and some Naples prov. Principato Ultra, dist. Avellino and 5 m S Benevento. It has an annual fair. Pop. 2818

CLPRANO *v. a. Italy* 11 m S K Frosinone and near r. bank, Lati. 109 8000

CERAM, called also **CEIRAM** and **ZERAM** and **SHIRAO** by the natives an Isl. Indian Archipelago the second largest of the Moluccas, lies between Boorneo on the W and Papas on the E, and immediately N Ambon. It stretches from lat. 2° 47' to 3° 58' S, and lon. 127° 31' to 133° 56' E, area, estimated at 10,500 sq m. As the object of the Dutch war of late years, was not to increase the pecuniary products of the Spice Islands, but to sell small quantities at exorbitant profits, their agents in Ceram have been content to know no more of the island than was required for the extraction of clove and nutmeg trees, and otherwise enforcing the monopoly prescribed by the Bongan contract of 1676. Ceram, accordingly is still very imperfectly known. It is traversed from end to end by mountain ranges rising from a table-land of considerable elevation, and sending down innumerable streams to the sea. The mountains vary from 6000 to 8000 ft. in height, and that called Noonah rises to 9750 ft. But little is known of their formation, nor is it certain that there are any volcanoes among them. As the mountain ranges incline to the N the largest rivers flow N. The vegetation of Ceram is luxuriant and significant the magnolia, in particular is more abundant here than in any other of the adjoining islands, which consequently supplies of agar are exported. It grows 100 ft. high, and instead of 400 lbs. as at Amboyna, a single tree will sometimes yield 1200 lbs. of starch. Clove and nutmeg trees grow wild in the woods, which abound, likewise, in magnificent forest-trees, but none have been found as yet, adapted for shipbuilding. Near the h. and N side, in the

VILLAGE OF WARUO.—From Ducrest's *Orbis*, Vague on Plate III.

village of Waruo on the bay of same name about lat. 3° 25' N lon. 130° 40' E. The bay affords good anchorage and water and other refreshments may be procured in it.

The coasts are peopled by a Malay race of bold and enterprising fishermen and traffickers, who carry the products of their labours in large prahus, called *hore hore*, with from 30 to 60 rowers each to the Banda Islands and Singapore. The interior is peopled by the Alfoures or Hadahehans, a classical apparently with those mountaineers of Celebes and the Philip-

plans. Though the past policy of Holland has retarded the cultivation of the land in Ceram, her Christian missions have not only made numerous converts along the coast, but have stimulated a sedentary industry even among the idolaters of the interior. It is doubted whether the cutting off of hands, for the use of giving salt to a marriage or other festivity now exists in Ceram, and a Dutchman did there in 1846, what a Spaniard dared not venture to do in Luzon. A sub-renter, Mr. Steinhilber, passed through their mountainous forests, and though he found human skulls used both as private and public ornaments, the atrocious custom of procuring them from living victims was apparently abandoned. After three days travelling Mr. S. reached the elevated and almost inaccessible table-lands of these barbarous aborigines, and even amid such hideous tokens of old customs, found them a simple, honest and peaceable people, living happily with each other and in habitual respect for their own patriarchal government. The travellers were received without the least apparent distrust at the native village, which consisted of spacious cabins placed at some distance from each other at a cheerful and picturesque spot. The inmates of the huts were clean and simple, the furniture consisted of a few coarse utensils, two muskets of English manufacture, and three large tables five human skulls, suspended across the roof, left no doubt of the tribe being Alfurians. It numbered about 500 souls, of whom 100 could bear arms, and had about 70 muskets among them. The women engage in field-work the men do so only when fresh ground has to be cleared. The chief article of culture is maize and the surplus supply of that and several other vegetable productions, is exchanged at the small towns along the shore for arms, powder and shot, articles of dress, and fermented drinks. The men when not engaged in war hunt the wild boar and deer large serpents &c. The Alfurians of the E. of Ceram have an open expression, projecting features, large eyes, a well proportioned nose, large but not prominent lips, and long frizzled hair. They are generally mild in disposition, servicable, and faithful, and being both brave and obedient, make good soldiers. The other inhabitants of Ceram are subject to several chiefs, who again are subject—those of the W part to the Dutch resident at Ambona, and those of the E. to the resident at Banda. A part of the centre of the island is nominally governed by a prince called the Sultan of Ceram, yet this prince, whose paternal propensities have led, at last, to his deportation to Java. The local princes meet the Dutch residents once in two years to have their disputes settled by a court composed of 24 rajahs and at which the resident presides. Sir Edward Bulechier happened to be at Ambona at the time of its meeting there, and was surprised to find that most of the rajahs had adopted the European dress and manners.

The aborigines of Ceram are mostly idolaters, and the coast population, generally speaking Mahomedans though of 600 souls in the village of Makar to whom Mr. Steinhilber landed, 433 were Christians, 11 only Mahomedans, and 171 idolaters. But the Christians were suffering from neglect. Notwithstanding its superabundant fertility Ceram is very thinly peopled. This is attributed to the frequent ravages one of the Malays among themselves, the attacks of the Alfurians from the land side and of pirates at sea, and the scourges of the small-pox. The present pop. is roughly estimated at 236,000 — (Van der A. in 1846). *Minister des Indes.*

CERAM LAUT INLEP, a cluster of small islands, Indian Archipelago, lying off the E. and of island Ceram, from which they are separated by the island and strait of Koffing. The chief island is about 5 m. long, mountainous, and uninhabited lat. 2° 45' S. lon. 131° 0' E. (u.)

CERAMI a tn. Sicily prov. Catania, 7 m. N E. Nicotia. Silver copper salt, sulphur and slate are found in the district. Pop. 3667

CERANI a vil. district of Italy Piedmont, prov. of and 8 m. S. S. F. Nizza, the Maira. It has silk-mills. P. 8500

CERANS Fontenay-lez, a vil. France, dep. Sarthe, 13 m. from La Flèche. Pop. 1238.

CPRCAIN a prov. Pers. having Liss, the cap. of the country about its centre on the coast. It is 39 m. long by 24 m. broad is watered by the Rindas and Larin. Although very little rain falls here even in winter the territory is extremely fertile, and produces various fruits and plants in great abundance. The climate is mild, but unhealthy; and

the country though not subject to high winds, is frequently visited by earthquakes.

CERCHIARA a tn and com. Naples, prov. Calabrie Citra, 9 m. S. S. E. Casertovici. It contains two churches and a flourishing hospital. Pop. 3090

CERDAGNE, or *Cerdania* (Halia, *Cerdania* or *Cerdania*) an anc. dist. occupying both sides of the Pyrenees, and partly in France, and partly in Spain. The French portion was a dependency of the former prov. Roussillon and had Mont Louis for its capital. It now forms part of Pyrénées-Orientales the Spanish portion, of which Pay Corda was the capital is included in the modern provinces Barcelona, Girona, and Lerida.

CERE, a small river France which rises in the Ploomb de Castel dep. Cantal and, after a circuitous W course of about 60 m. joins the bank, Dordogne, 14 miles below Brezonnax, dep. Lot. No part of it is navigable.

CERE (St.) a tn France dep. Lot, 17 m. N N W Figeac, on an island formed by the Rons. N of the town is a remarkable conical hill the summit of which, about 600 ft. above the river is surrounded by a rampart 8 ft. thick encircled by a single gate. There are also two isolated massive towers on it—the principal of which is 124 ft. high and 98 ft. in each face. The origin of this fortress is unknown. The town produces good hats, and has a considerable linen trade. Pop. 2918.

CEREA, a vil. and par. Austrian Italy gov. Venice, prov. of and 12 m. S. S. E. Verona, between the Tartano and Mincio. It contains a parish and two auxiliary churches, numerous oratories, and four mills. The Austrians defeated the French here in 1798. Pop. 2800

CERES, par. Scot. Fife. 8 m. by 4 m. P. 2838

CERRE a vil. kingdom of Italy Piedmont, prov. of and 2 m. N W Turin near the confluence of two branches of the Stura. Pop. 2000

CERET a tn France, dep. Pyrénées-Orientales, 15 m. S. S. W. L'aripian s. bank, Tech, 4 m. from the Spanish frontier. The river is here crossed by a bridge of a single arch of 147 ft. span—the highest and widest structure of the kind in France. Ceret is surrounded by walls, flanked with towers, outside of which is a promenade planted with trees. The streets are narrow but the suburbs are agreeable. Cocks, chickens and hencocks, are much bred here, there is also trade in grain, oil, cork, &c. In 1850 the population of France and Spain met here to fix the boundaries of the two kingdoms. Pop. 2665

CFRIANA a vil. Italy Piedmont, prov. Port Maurice 5 m. N. Y. Nemo. Pop. 1100

CERIGNOLA a tn. Naples, prov. Capitanata, 24 m. S. E. d'Agrop. It has a college, several convents, and an hospital. The inhabitants manufacture linen and the district produces large quantities of almonds and cotton. In 1593, the Spaniards here defeated the French, when the Duke de Nemours who commanded the latter was slain Pop. 10,500

CERIGO or *Kerigo* [ana. *Cythera*] one of the Ionian Islands, S. of the Moros of Ormus, about 15 m. from Cape Malos, or St. Angelo S. E. the entry of the Gulf of Laccadia, lat. (N point) 36° 23' N lon. 22° 57' 15' E. (s.) This island, between 50 and 60 m. in circumference, is hilly and its shores steep and dangerous, from corals and sudden gusts of wind the safest anchorage is at San Nikolo on the E. coast. The climate is very mild and salubrious. The island has little wood on it, but some good pastures, with a few fertile valleys yielding small crops of grain, vines, olives, &c. Some fine honey is produced, and part of it exported. On the island there is a convict station. Cerigo forms, with Lengotto one of the administrative provinces of the Ionian Islands. It contains two towns, including the capital Cephalo on the S. coast, and 29 villages. The people are of Greek origin, and are all of the Greek church. The island sends a representative to the Republican Assembly; and, conjointly with Ithaca and Paxos, one senator. Cerigo was celebrated in ancient times for the worship of Venus and near the fortress of San Nikolo are some ruins of the ancient city of Cythera and its temple. Cerigo was long subject to the Lacedaemonians; and belonged, in turn, to Macedon, Egypt, Rome, and Venice; in later times, it has shared the fortunes of the other Ionian Islands. Pop. (1851) 12 555

CERIGOTTO, or **KANIGOTTO** [anc. *Epula*] the most S. of the Ionian Islands, about 18 m. S.E. Orygia, and the same distance N.W. Cape Basso, at the NW extremity of the island of Candia or Crete. Length about 6 m. breadth varying from 1 to 2 m. Its general aspect is mountainous. Principal produce, oil of olives. It has been for a long while a favorite resort of Greek pirates. Pop. about 800

CERINA, or **TRACINA**, [anc. *Corinæ*] a tn. and port, tel. Cypria, N coast, 11 m. N Rhodus; lat. 36° 18' N; lon. 28° 30' E.; situated amidst plantations of oranges, lemons, olives, dates, and other fruit trees. All the unincorporated parts of the plains around, are covered with bay myrtle, and lentiscus. On the W. side of the town are extensive quarries, among which are some calcareous—the only remains of the ancient *Corinæ* or *Corynæ*. The harbour is small and very indifferently.

CERLEY LA BALLE, a tn. and cont. France, dep. Manche 7 m. E. Coutances. Muslin, calico, lace, and other fabrics are manufactured here; and the vicinity is remarkable for its numerous Druidical remains. Annual fair in November. Pop. 2827

CERMIGNANO a vil. and cont. Naples prov. Abruzzo Ultra I. dist. of, and 12 m. N.W. Penna. It occupies the summit of a hill containing two churches and a convent, and has an annual fair. Pop. 3140.

CERNAY or **SEVENHEIM** a tn. France, dep. Haut-Rhin, 17 m. N.E. Belfort, agreeably situated, 1 bank Thur. Many natural—gravel, galls, calcareous cotton yarn, paper, spinning, cordage, machines. There are also some bleaching grounds and a furnace. Pop. 3610

CERNE AMAS, a tn. and par. England Dorset. The town, 5½ m. N.W. Dorchester stands in a loath-covered valley; has three principal and four back streets; some of the houses antique-looking, and built of square blocks of chalk, and plastered over the greater part, however are of brick, and well built. Water abundant, forming a stream at the edge of the foot-hills. It has a church and is independent and a Methodist chapel, several schools, including an infant and a ragged school. The millwrights prepare skins for parchment, and make leather articles including gloves and excellent mats in great quantity. There are here the ruins of an ancient abbey. Area of par. 4063 ac. Pop. 1343. (Local Correspondent.)

CERNE-WETTER, par. Eng. Dorset 845 ac. Pop. 103

CERNÉY two par. Eng. Gloucesters.—1. (North) 4128 ac. Pop. 209.—2. (South) 8100 ac. Pop. 1108

CERNIOW a vil. Bohemia, archb. Kielegitz, near Paudica. It contains a Roman Catholic parish church, two Protestant chapels and a Roman Catholic school. P. 1814.

CERNIN a tn. and several vil. France.—1. *Cernin* (St.) a tn. dep. Cantal, 8 m. N by W Aurillac, in a hilly district. The parish church is a venerable and magnificent edifice, of high antiquity and in the neighborhood are several fine feudal residences, and the old castle of Marcegnac. Husbandry and cattle-feeding chiefly occupy a pop. of 3046.—2. *Cernin* (St.) a vil. dep. Lot, 14 m. from Cahors. Pop. 1048.—3.

Cernin de l'Arche (St.) a vil. dep. Corrèze, 8 m. from Brives. Pop. 560.—4. *Cernin de l'Arche* (St.), a vil. dep. Dordogne, 20 m. from Sarlat. Pop. 781.—5. *Cernin de Bellac*, a vil. dep. Dordogne, 17 m. from Sarlat. Pop. 437

CERNISI [anc. *Mogesi*] an Isl. Mediterranean, W coast Sicily lat. 37° 59' N. lon. 13° 25' E. It is about 8 m. long, and averaged about 1 m. in breadth.

CERNOWITZ a tn. Bohemia, circle of, and 14 m. S.E.E. Taber chief place, a lordship of same name. It contains a parish church, castle, and townhouse and has a manufactory of potash, and five mills. Pop. 1693.—The town is situated among mountains in the S.E. portion of the circle, and has a population of 5543

CERNUSCO-ANICARNO, a town, Italy Lombardy provinces of, and 7 m. N.E. Milan. It stands on both sides of the canal of Martesana, across which there is a handsome bridge and contains a parish and sundry churches, and numerous good houses, surrounded by beautiful gardens. Pop. 3694

CERNO-DE-ARREVAL, a tn. Spain, Andalusia, prov. of and 24 m. N by W Huelva, 26 m. S.W. Aracena, on the crest of a hill. Its streets are generally paved, but steep; and it has two squares, the principal containing the parish church.

Vol. I.

of Doric architecture and townhall. The other public buildings are several chapels, a prison, cemetery and two primary schools. The inhabitants are principally occupied in weaving, oil-making and husbandry. Some trade is carried on in wool and in timber: with the latter of which the adjacent mountains are profusely covered. Pop. 3728.

CEREO-DE-PASCO, a tn. Peru, dep. Junin, 138 m. N.E. Lima, 14,280 ft. above sea level. In the neighborhood are several volcanoes. Pop. 12,000 to 16,000

CERRO, an Isl. N. Pacific W. coast of OH California at the S. entrance of the bay of Sebastian Yumino; lat. (8 point) 28° 2' N. lon. 115° 11' W. It is 80 m. long, and 75 in circumference. Its coast presents several indentations and in the S. part is a lofty mountain, which terminates at the S.W. extremity of the island in a bold promontory. The island appears desolate of vegetation.

CERRETO [anc. *Corneum*] a tn. Naples, prov. Terra di Lavoro, 11 m. E.S.E. Piedimonte, on the slope of Mount Matese, near r. bank Caserta. It is one of the best built, and most agreeable towns in the province, and has a handsome cathedral, containing some good paintings; a collegiate church three convents, a seminary two *monasteria* and several manufactories of coarse cloth. In conjunction with Teleso, it forms an Episcopal see. Good wine is grown in the neighborhood. In 1558, the plague carried off half the inhabitants and in 1688, an earthquake destroyed the town. Pop. 5564

CERRETO-GRIN, a tn. and cont. Tuscan prov. of and 20 m. W. Florence, near r. bank Arno. It is situated on a rising ground, overlooked by a castle surrounded by walls, and possesses a handsome church adorned with paintings, bas-reliefs, and frescoes. Silk and coarse earthenware are manufactured here. Pop. 3605.

CERRIG LEINWEN par. Wales Anglesey 1562 ac. Pop. 532

CERRIG Y DRUDION par. Wales, Denbigh, P. 1118

CERT, a tn. and par. Cornwall prov. Cornwall near a small stream of same name, an affluent of the Zennor, 32 m. S.E. Cornub. It contains an ancient fort, built by Bectonius a church convent, hospital and infirmary. Pop. 2336.

CERTALDO a tn. Tuscan prov. of and 15 m. S.W. Florence r. bank Elsa. The more ancient part of the town like all the older walled towns of Tuscany occupies the isolated summit of a cone-shaped hill, and consists of but one street. At the bottom of this hill is the new town

formed along the course of a modern road which runs beneath the ancient town. Certaldo is, in itself, sufficiently insignificant and obscure, but is famous as the home and last resting-place of Boccaccio who was born here in 1313.

The house of the poet stands in the main street and within 100 yds of the church. It is exceedingly small though dignified with a tower. In one of the rooms are collected all the ancient articles of furniture of the poet's day which remained in the house—a little cabinet, containing rare and early editions of all his works some manuscript relating to his history; a specimen of his autograph and a large fresco painting of him by Benvenuto of Florence. Pop. 2113

CERTES CAPE, or **RAS DURR** a headland, Persian Gulf coast of Laristan lat. 26° 30' N. 14 m. S.W. by W from Cape Bozhan and the Bay of Mogno.

CERVARO a tn. Naples, prov. Terra di Lavoro, 32 m. S.E. Nola, agreeably situated on a hill. It has four churches and no hospital. Pop. 3778

CERVARGA, a tn. and cont. Kingdom of Italy Piedmont prov. of and 5 m. S.W. Cant near 1 bank, Susa. It contains two parish churches. Pop. 8000.

CERVATOS-DE LA CUBRA a tn. Spain, Leon, prov. of and 28 m. N.W. Palencia, in a somewhat rugged plain, near 1 bank, Cueva. It consists of several streets, of which only some are paved, and a square, in which is a handsome parish, forming the entrance to the consistorial buildings. It contains two parish churches, both of them handsome buildings, a boys and girls school, and several charitable endowments. Pop. 744.

CERVERA, a city Spain, Catalonia, prov. of, and 38 m. E. by N Llerda, on the highest thence to Barcelona, r. bank Cervera. It is surrounded by sweet wilds, now much discoloured, though strengthened at intervals by towers, and entered by nine gates; a castle, also ruinous, commands the

W approach. The houses are, generally well built, forming regular and tolerably well-paved streets, and four squares. Its magnificent university founded by Philip V in 1717 and

PRINCIPAL CHURCH OF THE UNIVERSITY CERVERA
From *Picturae Municipium et Urbium de Hispania*.

authorized by a Bull of Benedict XIII in 1735 is not now used as a seat of learning its classes having, 1837-1841 been transferred to Barcelona. There are here several colleges or seminaries, and primary schools. Amongst the noteworthy public edifices are the townhall a spacious and highly ornamented structure of hewn stone and the two churches, the principal of which is a Gothic building and has been renovated since 1820. The city possesses, besides, numerous convents and chapels, three hospitals a jail public storehouse, and cemetery. Manufactures—linen, woollen hangings, and cotton fabrics, wine, oil &c. Trade—grain, fruit, and cattle. The prosperity of the town has much declined since the withdrawal of the university. Pop. 4099. —CERVERA is also, with various affixes, the name of numerous other small places in Spain.

CERVERA DEL RIO-ALHAMA, a tn. Spain. Old Castle, prov. of, and 40 m. S.E. Logroño, r. bank Alhama, crossed here by two stone bridges. Its streets are tolerably well paved, and the houses substantially built. It has two squares, two churches, some chapels, town and country houses, a prison convent, cemetery and several primary schools. Linen, woollen, and cotton fabrics, soap, linoleum and oil are manu- factured. Trade in grain, fruit, &c. Pop. 3578.

CERVERA DEL MARTE, a tn. Spain. Valencia, prov. of, and 41 m. N.E. Castellon-de-la-Plana, l. bank, Cervera. The streets are poorly built and the town possesses a church townhouse, prison, school &c. Inhabitants engaged in husbandry and distilling brandy. Pop. 1496.

CERVETEZ [anc. *Cervetia* or *Appia*] a tn. Papal States, 20 m. W by N Rome; lat. 43° 07' N lon. 12° 7' E. It was one of the most important cities of ancient Etruria, and is mentioned by Pliny as having possessed a collection of paintings long before the foundation of Rome. Many valuable Etruscan remains have been discovered here and the place, though now a poor village, still bears traces of its former greatness. Pop. 750.

CERVIA a tn. Italy prov. and 11 m. S.E. Ravenna, near the Adriatic, where it has a port, with which it communicates by a canal. It is regularly built, and contains several churches, convents and a cathedral, and is the seat of a bishopric. W

of the town is a vast marsh called the *Valle di Cervia*, containing the most productive saltworks in the state. About 50,000 tons are produced annually. Pop. 4000.

CERVIGALES, or CERVIGASTA, a group of small islands in the S.E. coast of the island of Corfu lat. 41° 35' N. CERVIN (MONT) [German, *Matthorn* Italian, *Monte Cervino*] a mountain Switzerland Pennine Alps, on the S. frontier of can. Valais, about 6 m. W S.W. Bernese or Prarogues, from which a road leads to the Col St. Theodora, a pass over the mountain into Piedmont. It is one of the most magnificent objects in nature, an inaccessible shielok of rock rising up from an immense glacier to a height scarcely 1000 ft. lower than that of Mount Blanc. The glacier which differs from the lower glaciers in not being included like them between bold walls but occupying a vast and desolate table land, is nearly 10,000 ft. above sea level. The height of the peak is 14,837 ft. It is composed of felspar slates or gneiss. On the summit of the pass, 11,098 ft. are the remains of a rude fortification, supposed to have been erected two or three centuries ago, to prevent incursions from the Valais. It is, probably the most elevated spot of the globe on which fortification has been attempted.

CERVINARA, a tn. Naples, prov. Principato Ultra 12 m. N.W. Avellino. It contains six churches, and a convent. Pop. 6294.

CESANA, a vil and par Austrian Italy gov. Venice 11 m. S.W. Belluno, near the Piave. It contains a parish and an auxiliary church. Pop. 2000.

CESANO MADERNO a vil and com. Italy Lombardy prov. of, and 10 m. N. by W Milan, on the Sesvea. Here are the remains of a castle with its walls and moat, and a palace called *Cesano Borromeo*. Pop. 3840.

(FSAREA See CARRARA)

CESARIO (SAR), a tn. Naples, prov. and 4 m. E. Lecce. It contains a magnificent palace, and raises fine tobacco. Pop. 3448.

CESARO a tn. and com. Sicily prov. Messina dist. of, and 20 m. E.R.E. Mistretta, on a hill. Pop. 2000.

CESENA [anc. *Cesene*] a tn. Italy prov. and 11 m. S.E. Ravenna, on the bank, Bivio at the foot of a mountain. It is the seat of a bishopric, is well built, has a handsome townhouse a cathedral 14 monasteries seven churches, a seminary an agricultural society and some mills. Its trade is principally in the wine and hemp produced in the neighbourhood and large fairs are held twice a year. There are sulphur mines in the vicinity. Popes Pius VI and VII were natives of this town. Pop. 14,000.

CESENATICO a tn. Italy prov. and 17 m. S.W. Ravenna, near the Adriatic, where it has a port, with which there is a communication by a canal. Fair fairs are held here annually. The town was bombarded by the British in 1800. Pop. 3000.

CESSENON a vil France, dep. Herault 15 m. E. St. Pons. beautifully situated l. bank, Orbe. Two annual fairs. Pop. 1278.

CETONA (SANTA CAIX DA) a tn. Spain, Biscay prov. Guipuzcoa, 11 m. N.W. Tolosa, 30 m. E. Bilbao, on an eminence 400 ft. above the sea, r. bank Urola crossed in the town by a bridge of two arches. It has a parish church townhall, two schools, and a prison. The neighbouring mountains are well wooded, and in these iron and other minerals, including Jasper crystal marble &c. are wrought. Cetona is principally noted for its medicinal baths. The waters have a temperature of 69° to 70° Fah. are clear inodorous, and of saline flavour contain chiefly chlorides of sodium and sulphate of calcium and deposit a red colouring matter composed of hydro-carbonates of iron, and carbonate sand. Pop. 1506. (Astoria.)

CETONIA, a settlement, Liberia, W coast Africa, for emancipated slaves, at the entrance of the river of the same name, on a promontory called St. George Point lat. 5° 35' N lon. 9° 28' W. A terrible surf rolls over the bar at the mouth of the stream. There has been a British factory here for a number of years.

CETON, a tn. France, dep. Orne, 22 m. S.E.E. Montagne-sur-Orne. Three annual fairs. Pop. 1010.

CETONA (ALTA AND BASSA), the name of two vills, and com. Tuscany prov. Arezzo, in the Val di Chiana, dist. of, and 6 m. S.W. Chiusa, near ruins of same name. The

sometimes of volcanic origin, have been counted. The Ceynnes are rich in minerals, containing mines of copper, iron, lead, and coal, and quarries of granite, porphyry marble, and plaster.

CEYENNES a country France, which formed the N. part of the gov. Langue, and comprised the Vivand, Vahy and Ceyenne. During the wars against the Albigens, its mountains and valleys, like those of Piedmont, were the asylum of numerous bands of Mafomars, who had renounced the corruptions of the Romish church for three centuries to continue to furnish numerous victims to the Papal persecutors. It now forms part of depts. Haute-Loire, Loire, Ardèche, Gard, and Aveyron.

CEYICO-OR-IA-TOMAS, a In. Spain, Leon, prov. of, and 12 m. S.S.E. Palencia. The houses are in general substantially built, and form streets, clean, regular and well paved. It has three spacious squares, a parish church, three chapels, two schools, a cemetery and palace of the Count of Oñate. The inhabitants manufacture potteryware, and trade in grain, fruit, honey and cattle. Pop. 3002.

CEYLON (India, *Diophila* anc. *Tropæum*) an Isl. Indian Ocean, belonging to Great Britain, 50 to 60 m. S.E. the S. extremity of Hindostan, from which it is separated by the Gulf of Manar and Palk's Strait. It lies between lat. 5° 50' and 9° 50' N., and between lon. 80° and 82° E., having the shape of a pear with the broad end S. Length about 370 m. E. to S. average breadth 100 m. circumference, about 680 m., exclusive of indentations area 24 600 m. The N and N.W. coasts are flat and mountainous, those on the S. and E. bold and rocky presenting a highly picturesque appearance, which is further heightened by its exuberant vegetation. Its noble palm forests, luxuriant corn fields and the verdant slopes of its mountains smothered with bright flowers, herbs, and creeping plants whose delicious perfume spreads far and wide. Many parts of the coast, both at its S. and N. extremities, are studded with small, rocky and verdant islands, some of them overgrown with palms, and presenting a singularly beautiful appearance.

The two principal harbours are those of Trincomalee on the E. coast, and that of Point de Galle on the S. coast the former is one of the finest harbours in the world, and is capable of accommodating any number of the largest ships. Some anchorage is also to be had, at certain seasons in the ruins generally diffused, and somewhat abundant; plumage is also obtained in such quantities as to constitute an article of export, and is increasing. Most of the gums for which the island is celebrated, occur in granite rock though also found washed down in alluvial soil in the beds of rivers. Ceylon affords all the varieties of quartz, as rock-crystal, amethyst, rose-quartz, cat's-eye, and prase. Rock-crystal occurs in abundance, both massive and crystallized of various colours, of good quality and in large masses. Amethysts of the most beautiful kind, are also plentiful, and the finest cat's-eye known are those of this island. Garnets, green moon stones, zircons, and rubies are also among the gems of Ceylon. Of indissoluble minerals two kinds occur: graphite and sulphur but neither mineral nor medicinal water abounds, and the saline productions are few.

Roads, &c.—British enterprise and industry are effecting extraordinary changes in the noble island, by opening up means of internal communication through which, as though so many arteries, the blood of civilization will circulate. It is recent times, several lines of public carriage roads have been formed, the principal of which are those from Colombo, the seat of Government, to Kandy; from Colombo to Galle, from Colombo to Negombo, and from Kandy to Rambodde. In the early part of this century there was not a single road in the country merely a few pathways, the greater part of the island being then covered with impenetrable forests. The formation of these roads is said to have impressed the native tribes with a much higher opinion of British facilities and power, than any manifestation of its military superiority.

Climate.—The climate of Ceylon, like that of most other countries, varies with the different localities, being more salubrious in some places than in others according to the conditions of the surface, from which almost all atmospheric influence is derived. Where the jungle has been cleared away and the land drained and cultivated, the country is perfectly healthy where low wooded tracts, and the marshy

more numerous. In some districts, the mountain chains run in a parallel direction. In others, even adjoining mountains do not correspond with any regularity in their direction. It is still more remarkable, that there is no proportional correspondence between the heights of the mountains, and the depths of the adjoining valleys. In general, the width of the latter bears but a small proportion to their length; often they are extremely narrow. The deepest are in the heart of the mountains. Some are between 3000 and 4000 ft. deep, and not over half a mile wide.

Rivers and Lakes.—The rivers of Ceylon, though numerous, especially on the S. and S.W. sides, are small being merely mountain streams, navigable only by canoe, and that but for a short distance from their mouths. The principal are the Mahaweli Ganga, which rises about 80 m. S. of Kandy and falls into the sea about 8 to 10 m. S. Trincomalee; the Kalu Ganga, the Kulu Ganga, and the Walawa Ganga, all of them rising in the central mountain mass. During the freshes, the first named river is rendered useful in floating down rafts of timber to the bay of Trincomalee. This timber consists chiefly of halimille, ebony and satin wood which grow on its banks, and in the vicinity. There are a few pretty extensive lagoons in the island, but no lakes worth noticing, the largest being only 4 m. broad. This want of lakes gives a serious monotony to the scenery which would be dreary and uninteresting in a country clothed with less exuberant vegetation and through there are rivers and streamlets rushing along in every direction amongst the mountains, they are so overgrown with superabundant vegetation as to be frequently invisible. On the level spaces between the hills and the muddy hillocks near the sea, on the E. coast, are the salt water lakes or marshes, called Kaloopons, from which large quantities of salt are made for exportation. Being connected by channels, they also afford some means of internal communication.

Geology and Minerals.—Generally speaking Ceylon consists of primitive rock, the most common being granite or gneiss. It is remarkable for its richness in gems, and equally so for its poverty in the useful metals. Its mineral productions may be classed under two heads, those attached to granite rock, which constitute the greater part, and those pertaining to dolomite. The only metallic ores that can be said to have been found hitherto in any quantity deserving of notice, are of iron and manganese. Iron in different forms, is pretty generally diffused, and somewhat abundant; plumage is also obtained in such quantities as to constitute an article of export, and is increasing. Most of the gums for which the island is celebrated, occur in granite rock though also found washed down in alluvial soil in the beds of rivers. Ceylon affords all the varieties of quartz, as rock-crystal, amethyst, rose-quartz, cat's-eye, and prase. Rock-crystal occurs in abundance, both massive and crystallized of various colours, of good quality and in large masses. Amethysts of the most beautiful kind, are also plentiful, and the finest cat's-eye known are those of this island. Garnets, green moon stones, zircons, and rubies are also among the gems of Ceylon. Of indissoluble minerals two kinds occur: graphite and sulphur but neither mineral nor medicinal water abounds, and the saline productions are few.

Roads, &c.—British enterprise and industry are effecting extraordinary changes in the noble island, by opening up means of internal communication through which, as though so many arteries, the blood of civilization will circulate. It is recent times, several lines of public carriage roads have been formed, the principal of which are those from Colombo, the seat of Government, to Kandy; from Colombo to Galle, from Colombo to Negombo, and from Kandy to Rambodde. In the early part of this century there was not a single road in the country merely a few pathways, the greater part of the island being then covered with impenetrable forests. The formation of these roads is said to have impressed the native tribes with a much higher opinion of British facilities and power, than any manifestation of its military superiority.

Climate.—The climate of Ceylon, like that of most other countries, varies with the different localities, being more salubrious in some places than in others according to the conditions of the surface, from which almost all atmospheric influence is derived. Where the jungle has been cleared away and the land drained and cultivated, the country is perfectly healthy where low wooded tracts, and the marshy

lands abound, covered with a rank, luxuriant vegetation, the climate is evidently unhealthy, showing what is now generally well understood, that mere heat has little to do with the unhealthiness of tropical climates. So far as military experience goes in regard to the health of troops, Galle on the S coast, and Nicara Ella in the mountainous regions in the interior, province of Kandy are the most healthy stations on the island. The heat is not so great as on the neighbouring coast of India, the sea breezes moderating the temperature. At Colombo, on the W side of the island, near the 7th parallel of N. lat., the mean daily variation of the thermometer is not exceed 5° and the annual range of the thermometer is from 76° to 86° 30' Fah. At Galle the mean daily variation is 4° and the annual range from 70° to 87°. At Jaffnapetam it is from 74° to 90°. At Trincomalee from 74° 30' to 81° 30'. At Kandy 1457 ft. above the sea, the mean daily variation is 6° and the annual range 56° to 84°. At Nicara Ella, the annual range is 85° 86° to 80° 30'. The E part of the island being exposed to the N. E. monsoon has a hot and dry climate, resembling that of the coast of Coromandel while the W division being open to the S. W. monsoon has a temperate and humid climate like that of the Malabar coast. The interruption which the course of the monsoons meet with from the mountain ranges of the island causes deluges of rain to fall on one side, while the other is parched with drought. The inhabitants on the former making every effort to protect themselves from foundation, while those on the latter are carefully doing out the scanty remnants of former superabundance. The quantity of rain that falls annually in Ceylon is estimated at three times the quantity that falls in England, the rains being less frequent, but much heavier. At Kandy in the interior the average annual fall of rain is 85.3 inches. At Colombo, on the sea coast, 75 to 80 inches. The prevalent diseases are those of the liver and intestines, often accompanied by fever. Elephantiasis and other cutaneous complaints are common. The disease called berh (*Hydrophoeranthus*) occasionally occurs, being almost peculiar to the island.

Animals.—Most of the animals found on the opposite continent are native to this island excepting the royal tiger which does not exist here. Elephants are numerous, especially in the N and E. provinces, where they sometimes do great injury to the growing crops. Under the Kings of Kandy they were trained to perform the office of public executioners. In the performance of this duty they first thrust their tusks through the criminal's body and afterwards tore him to pieces, limb by limb, with their trunk. The elephants of Ceylon are esteemed for their superior strength and docility. But the capture with which they are hunted has greatly diminished their numbers. Deers, leopards, hyenas, jackals, monkeys and tiger cats are numerous. There are several species of deer of which the elk and fallow deer are most abundant. There is also a kind of moose-deer which is caught by the natives, and exposed for sale in the markets. Wild hogs are numerous on the plains to the E. A large and fierce baboon is met with near Jaffna. Foxes, sheep, mousons, arviculles, squirrels, and mungoses are also to be found. Flying foxes and rats are numerous, and annoying. Pinnas, snipes, red-legged partridges, pigeons, peacocks, and a great variety of birds, of the most splendid plumage, are plentiful. Alligators, serpents, and reptiles of all sorts abound. Of the snake tribe consisting of about 25 different species, six only are venomous.

Vegetable Products.—In the luxuriance of its vegetable productions Ceylon rivals the islands of the Indian Archipelago, and in some respects bears a strong resemblance to them. Its most valuable are coffee, cinnamon, and the coconut. The quantity produced of the first named article is rapidly increasing the export to the United Kingdom having risen in the space of 10 years (from 1835 to 1845) from 1,970 148 lbs. to 18,667 123 lbs., while in 1849 it rose to 85,840,900 lbs. The quantity of land adapted to the growth of this valuable commodity is unlimited. Cinnamon, called by the Sinhalese *coriandru* grows in the S. W. part of the island, to which it is almost exclusively confined, requiring a shady soil, with a moist atmosphere. The trade in this spice was reserved as a Government monopoly by the Dutch when they had possession of the island all that was collected beyond the quantity which it was thought

could be sold at a monopoly price being burnt. This absurd system was followed up by the English for some years after their conquest of Ceylon, but was abandoned in October 1832 when the trade in cinnamon was declared free, subject to a duty on exportation. The coconut-tree grows along the coast in countless numbers, each tree producing from 50 to 100 nuts in the year. Every part of this invaluable tree, and of its product, is capable of being turned to profitable account. It yields its fruit at every period of the year the husk and nut in all its different stages, from immaturity to ripeness, appearing on the tree at the same moment. The husk yields a liquor called toddy, which when fermented and distilled furnishes arak of the best quality. From the juice vinegar also is made, and a description of sugar called jaggery. The fibrous husk in which the nut is enveloped called coir is convertible into cordage and carpeting and is applicable to various other purposes. The kernel constitutes wholesome and nutritious food and also yields a valuable oil, used in the island, when fresh, for culinary purposes, and exported in large quantities for conversion into candles and soap. The refuse stalks, called *poomah*, furnish good food for poultry and pigs and makes a valuable manure much used in coffee plantations. The shells are formed into globules, ladles, and other domestic utensils. The leaves are woven into mats, and are employed for a roofing of houses, being lighter than straw and equally strong and lasting. The *Almyra* palm which grows principally in the N part of the island, is of hardly less importance than the coconut, being productive in seasons of drought, when the crops fail. The leaves are used in the construction of native hats, also as a substitute for paper and various other purposes. Toddy is extracted from it, as from the coconut-tree the timber is exported in large quantities and from the fruit a jelly is made, on which the poorer classes subsist in seasons of dearth. The S. parts of the island produce the *latal* tree, the bark of which yields a coarse sugar and its fruit, dried and pulverized, serves as a substitute for rice flour. The *latal* palm also yields also the *latal* and bread-fruit trees, the fruit of which is used by the natives for food both raw and cooked the timber also of the jack-tree not being subject to be attacked by the white ant is much used by the natives for making furniture, and in house building. The Ceylon areca nut, celebrated for its superior qualities is exported in large quantities. Tobacco is raised principally in the N. district, and is of excellent quality. The quantity of this article has also increased prodigiously of late years. Indian gourd wild, but is not sought after. The cardamom plant is abundant, but inferior to that of Malabar. Fruits and culinary vegetables are produced, the latter in the elevated districts, in great variety and profusion. The island abounds with timber of various descriptions, including salamander satin, rose, myan, iron, jack, mahallie, and other beautiful woods adapted for cabinet work.

Agriculture, &c.—Agriculture generally and the cultivation of the more valuable native products of the island in particular are improving. In the interior provinces coffee succeeds well but sugar has failed, an entire failure everywhere, both on the coast and inland. Coffee however has not turned out a profitable crop, in consequence of which the sales of land by Government fell off, from 59,900 acres in 1842 to 4182 acres in 1846. The extent of ground under coffee cultivation is between 90,000 and 100,000 acres. An agricultural society has been formed, which has been of great service to the island having, amongst other things introduced a variety of European vegetables and roots, introducing the potato into the elevated districts, where they are succeeding admirably. The land lying on the sea coast, between Tangalla on the S. shore, about lat. 6° N. and Negombo on the W coast, lat. 7° 20' N. a distance of about 140 m., is the most favourable on the island to the growth of the coconut-tree and there they of course, most abound. The cinnamon of commerce is produced in the gardens on the coast, and chiefly within 20 m. of Colombo, where the temperature is equable. That grown in the interior is very inferior, hardly fit for use. The time for stripping off the bark is from May to October. The bark, after being removed from the *lunchea* previously cut from the tree, is set up in bundles for 24 hours, during which a sort of fermentation takes place, which greatly facilitates the separation of the outer part of

the bark from the outside and epidermis. It is then rolled up into quills, or pipes, about 3 ft. in length and thereafter conveyed to Colombo, where it is sorted by Government inspectors into three kinds, the two finest of which are exported to Europe, and the third is reserved, along with the chips and the refuse, for distillation yielding oil of cinnamon. The area of land under cinnamon cultivation is estimated at about 14,750 ac. Rice which is carefully cultivated by the Malabars of the N and N E districts, is grown chiefly on the level lands, but also in the valleys and on the slopes of hills, various contrivances being adopted to supply the grounds with water by artificial irrigation. There are two rice harvests in the year: the first crop is sown from July to October and reaped from January to March; the second is sown from March to May and reaped from August to October. The quantity of rice raised however is not sufficient for the wants of the island; the deficiency is made up by importation from the Malabar and Ceylonese coasts. The value of the rice imported in 1848 was £398,000, the value of that raised in the country about £270,000, the produce of about 300,000 ac. the estimated area of the rice crops. Notwithstanding the acknowledged facility of Ceylon the capabilities of its soil where justice is done, and the efforts now in progress to develop these capabilities, by far the largest proportion of the island is still unutilized, and lying waste there being in 1842 only 769,321 ac. in crop, and 4,897,298 ac. unutilized. There are a few natives who possess considerable estates in land but the law of inheritance has for the most part, caused a minute subdivision of the soil to a degree very favourable to its improvement. The British Government claims the proprietorship of all the waste lands, which are now disposed of by public sale.

Pearl Fishery.—The pearl fishery of Ceylon is now apparently extinct, there having been none since 1837, nor scarcely can any trace of the pearl oyster now be found although Government still continues a strict surveillance over the banks, and occasionally subjects them to a careful examination. No cause has yet been discovered for the disappearance of the oyster. When the pearl fishery was in existence it was confined to the Gulf of Mannar, the Bay of Cutch and being the central rendezvous for the boats employed in it. The banks, where it was carried on, extend several miles along the coast from Mannar to E of Arripo, Cutch and Pampore; the principal ones being opposite to Cutch and lying out at sea about 20 m. and extending about 30 m. N to E. and 20 m. E to W. The fishery was a Government monopoly. The places and times where and when it was to be pursued and the number of boats allowed to engage in it were announced by advertisement. One-fourth part of the pearl-oysters raised was the property of the divers, the remaining three-fourths were sold at public auction. The banks on which the oysters were found are coral ridges, with 5 to 7 fathoms water. They were divided into three or four different portions, fished successively in succession each portion being set up to sale and fished separately a sufficient interval being allowed between them to admit of the oysters attaining their proper growth, which is supposed to be in about 7 years, soon after which, it is said, they perish. The fishing season commenced in February and ended about the beginning of April. Each boat employed in the pearl fishery carried a skiff or scow and 20 or 24 men, one-half of whom were trained and skilled divers in ascending the other half were divers who went down by five or six at a time and by thus alternately diving, gave each other time to resurface for a fresh plunge. The length of time they remained under water was about two minutes. They often made from 40 to 50 plunges in a day bringing up each time about 100 oysters, which they gathered into a netting suspended from their necks. The pearl fisheries of Ceylon, in 1797 yielded a revenue to Government of £144,000; in 1798, £192,000 a third, in 1799 £22,863 and for 14 years thereafter this sum was not much exceeded, excepting in three instances while in 1837 the last year in which any oysters were taken, it was only £10,500. The Ceylon pearls are whiter than those of Ormus or the Arabian coast. The shell or scow fishery was at one time carried on to a great extent, employing about 600 divers, but is abandoned owing to the little demand now made for them in Bengal, where the greater part were sent. The shell is a sea shell (*Volva pyrum*), adapted for cutting into

ribs, and formerly used in great numbers by the native women of Hindoostan for bracelets and necklets.

Manufactures, Trade, &c.—The manufactures of Ceylon are very unimportant, with exception of arrack, which as elsewhere stated, is extracted from the blossoms of the coconut tree. Weaving, though little progress has been made in the art—and the produce is generally of the coarsest kind—gives employment to many persons. The articles manufactured are handkerchiefs, table-cloths, raphias, towels, mid-cloth, but chiefly a coarse kind of cloth used for their dress by the natives. The number of looms employed in producing these fabrics was, in 1843 8853. There are also oil-mills, for pressing the coconut kernels the number of these mills in operation, in the year above named, was 231. The Cingalese are expert workers in gold and silver and excel in the manufacture of lacquered ware. Salt is now collected by Government officers from shallow lagoons, called, in the colony *leaves*, which at certain seasons are overflowed by the sea; or it is manufactured in pans, the property of the Government, and let for that purpose. The *leaves* or lagoons and pans, are stated to be capable of producing annually 800,000 bushels, yielding an annual revenue of about £40,000. Both the internal trade and foreign trade of Ceylon have been rapidly improving of late years. In 1843, the imports amounted to £265,597 and the exports, to £216,145; which, in 1849 had increased to—exports, £1,206,149, &c. &c. imports, £1,347,549 &c. &c. The increase in the value of the exports is chiefly caused by the increased quantities of coffee now produced in the island. The principal articles of export to Great Britain are coffee, cinnamon, and coconut oil all to other places, chiefly to India and British possessions, rice, copra and just, sugar, tea, boards, plancks, and tobacco which goes almost wholly to the continent of India. The principal articles of import from Great Britain are cotton manufactures, beer, ale, and wine from unwharfed, and iron and steel manufactures, machinery, books, and stationery. From other countries dried fish, rice, paddy, wheat, sugar, tea, coconuts, &c. The quantity of cinnamon exported in 1845 was 506,688 lbs. Mercantile accounts are kept in British currency but the following monies also circulate in the island, namely 3 chakras = 1 pie, 4 pie = 1 fannam = 16 annas = 1 rupee = 12 dollars = 160. The Company's rupee is current at 2s. and the Spanish and American dollar at 4s. 2d.

Government &c.—The Government of Ceylon is conducted by a governor and two councils, executive and legislative, of both of which the governor is president. The first is composed of 6 members, including the governor the other 10 members, 6 of whom are named by the governor—namely 3 European merchants, 1 barrister and 3 natives. The councillors are selected either by the governor himself or by the Secretary of State for the colonies. The powers of the councils are limited being wholly subservient to the governor who can carry into effect any law without their concurrence. All laws, before being acted on, must be approved of by the Secretary of State. By recent regulations, any individual properly qualified may be appointed to the most responsible situation, without reference to caste, nation or religion.

The island is divided into 6 provinces—the E. W. N. E., Central and N. Western, which again are subdivided into districts. In each province is stationed a Government agent for the administration of justice throughout the island, there are, in the civil and criminal departments, a supreme court, established at Colombo also a vice-admiralty court, and provincial courts, stationed in various districts besides magistrates.

The establishment of the Church of England is composed of a bishop, archdeacon, and 12 European colonial chaplains the Church of Scotland of 2 colonial chaplains the Dutch Presbyterian Church 1 colonial chaplain.

The forces at present (1851) maintained in Ceylon consist of two regiments of infantry two companies of the royal foot artillery a mounted body-guard for the governor and a regiment composed principally of Malays—a brave, faithful, and soldier-like body of men, about 1500 strong. The principal fortresses are those of Colombo, Trincomalee, Galle, and Jaffa. The chief sources of revenue are the customs duties, the export duty on cinnamon, land rents, and salt taxes. The revenue for the year ending 31st December 1849, was £469,806, 14s. the expenditures for the same period,

£210,000, 15s; thus leaving an excess of expenditure over revenue of £2117, 18s.

Religion, Language, Public Education, &c.—The Hindoo religion prevails exclusively among the population of Indian extraction, which forms a large proportion of the inhabitants of the E. and N. E. districts of Ceylon. On the W and S W coast, the majority of the Singhalese profess the R. Catholic religion, the Kandians, and those of the interior, are mostly

BURIALS IN THE WOODS: PRIESTS AND PARISH AT KANTH
After The Burial.

Buddhists. There are now 16 Protestant churches in the island, subordinate to the Bishop of Colombo 32 dissenting places of worship and a number of R. Catholic chapels. Buddhism however still prevails in the interior and generally among the Singhalese of the sea-coasts. It is maintained and protected by the British Government, agreeably to the treaty of 1815.

The Singhalese have a colloquial language peculiar to them selves, but their classic and sacred writings are either in Pali or Sanscrit. The Malabars use the Tamil. The Ceylon Portuguese prevails in the European settlements but its use is not universal among the natives. With regard to education, says Mr. Knighton much has been done and much remains to do. Fifty schools, containing 2800 scholars, are maintained by Government, of which the Colombo academy is the most important. There are schools maintained, also, by the Church Missionary Society by the Wesleyan the American and the Baptist Missionary Societies, besides a number of private, and some regimental schools. The total number of scholars, in 1842 was 30,630.

People.—The present population of Ceylon is composed of Singhalese, Cinghese, or Ceylonese, Malabars Mahometans or Moors, Veddhas, a small proportion of Europeans and their descendants, and negroes. The Singhalese inhabiting the coasts, are a wild, timid race obsequious to strangers, but hospitable and humane. They are, however said to be indolent, cowardly vindictive, and regardless of truth but this unfortunate character of them, though often repeated, has been denied by those who have good opportunities of knowing them. Their stature is rather below the middle size their limbs slender but well shaped eyes dark, finely-cut features, hair long, smooth, and black turned up and fixed with a tortoise-shell comb on the top of the head Colour varying from brown to black, or rather from the lightest to the darkest tinge of bronze. The Singhalese of the interior, or Kandian Singhalese, are a superior race, being stouter, handsomer and of more manly and independent bear-

ing with a greater degree of intelligence. The Malabars of Ceylon are still inferior in all respects to those of the continent, being the same active, enterprising, crafty race, in their character of merchant, politician, jeweller, workmen in metals, sailors, fishermen, jugglers, &c. The Mahometans or Moors are found in all parts of the sea-coast as well as in the interior. They are an energetic and industrious people, and engage a large proportion of the commerce and traffic of the island. They class themselves into four orders—merchants, weavers, fishermen and bankers. The Veddhas, a savage race, are supposed to be a portion of the original inhabitants of Ceylon. They inhabit the most secluded and inaccessible parts of the island, and subsist entirely on wild fruits and animals. A cloth round the loins is their only clothing; and their habitations, generally of small dimensions are formed for security amongst the branches of large forest trees. They are a robust and hardy race, but extremely peaceable and inoffensive. The other inhabitants of the coast consist of Dutch Portuguese, and English colonists some Kaffirs and Javaneses, a few Chinese and Parsee traders, and a various population sprung from the intermarriage of these races with each other. There is yet another class, called Burghers, the descendants of Europeans and natives. Many of this class fill public offices and subordinate situations under Government.

The habits of the Singhalese are simple. They rise at dawn, and retire about 9 or 10 o'clock at night they have two principal meals, one at noon and the other at 7 or 8 o'clock in the evening. The favourite dish consists of rice, with curry, milk, ghee oil and fruits, are also common articles of diet. Meat is never eaten but by the lowest classes. The houses are generally of mud, a single story in height, with thatched roofs. Their furniture consists of a few stools, mats, and earthenware dishes a stone hand mill a pestle and mortar for rice. The dress of the men consists of a handkerchief wrapped round the head and a long cloth reaching from the loins to the ankles. The dress of the women is much the same. Their manners are courteous and polished but their intellectual powers limited. In arts and sciences they have made little progress.

The general population of the island was decreasing for several centuries. It is now however on the increase and latterly this increase has been rapid. In 1832 the entire population scarcely amounted to 1,000,000 of whom 6500 were whites. In 1842 it had increased to 1,857,000 of whom about 7500 were whites whilst in 1843, it is stated at 1,421,681 being an increase, in one year of 166,000. This amount of population gives about 59 individuals to a square mile. It consisted of 1,413,958 coloured, and 9375 whites. A considerable part of the increase in the population is, it is said, to be attributed to the great number of Malabar coolies who come from India for employment on coffee estates.

Antiquities History &c.—The Singhalese annals contain a historical record of events for 24 centuries and their authenticity as regards descriptions of ancient towns and buildings, and other works of art, is established by existing ruins, proving that the island had been, at a remote period, inhabited by a powerful and numerous people. The lake of Candeeley nearly 15 m. in circumference, was embanked in several places with a wall of huge stones, each from 15 to 14 feet long and broad and thick in proportion, had regularly use over the other. At one point in this majestic work, two hills are joined together in order to collect the water of the lake, by an embankment nearly 100 ft. in breadth at the base and 30 ft. at the summit. In this part of the wall arches are to be seen and over these, in the work which is under the level of the water as opening is made exactly resembling the conductors used by the Romans in some of the lakes of Italy for letting out the water. Another of these remarkable remains of antiquity was discovered in the year 1816 in the centre of a very thick forest. It is supposed to have been a Buddha pagoda, reared like the Egyptian pyramids in honour of the dead. The site of the building is gigantic the basis of its cone is about a quarter of a mile in circumference and on the top and sides large trees have fixed their roots among the ruins and that up to the height of 50 or 60 ft. It is surrounded by a square enclosure, 1 m. in circumference, consisting of a broad wall, made of brick and mortar and having within it a number of cells. In the

the downstream will bring above half a mile broad, while a great portion of the N. side is not the tenth part of a mile in breadth. It is low not being more generally than 8 or 10 ft. above the sea at high tide. The French used to have a small settlement on this island consisting of slaves and a few Europeans, who prepared cocoa-nut oil and salt fish for small vessels which came annually from Mauritius. A variety of fish abound in its harbour the entrance to which is at the N. W. end of the island, and excellent green turtles visit the shores on the outside of the island. The land-crabs, which breed on the cocoa-nuts as they fall from the trees, are also wholesome food and good fresh water may be had in almost every part of the island, by digging 8 or 10 ft. deep. Next in value and importance to the island just described, is a group called Petre Banhos. It forms nearly a square of 50 m. in circumference, containing 27 islands of small extent low and covered with cocoa trees, from the nuts of which about 84,000 gallons of oil are obtained annually. Fodder, pigs, fruit, vegetables, and water can be procured here. This group was discovered by the French in 1744 its situation is between lat. 6° 18' 30" and 6° 27' 30" and lon. 71° 47' and 72° 10' E. The other islands of any extent are Eggmont Islands, the largest of which is at lat. 6° 40' S. lon. 71° 28' 30" E. These islands produce 6000 gallons of oil yearly pigs and poultry in abundance also, yuccas and land-crabs. Water also is easily procurable. Eagle Island lat. 8° 11' S. lon. 71° 28' E. There is a village on the N. W. side of this island. It produces annually about 6000 gallons of cocoa nut oil a small quantity of cotton seed and tortoise-shell. Salt fish is also exported. Wood water and poultry are readily obtained here. The Chagres islands and banks were very imperfectly known till 1785, when they were surveyed by Capt. Arnold Blair of the Bombay Marine. They formerly had the general name of Banks or Chagres.

CHAGRES, a town and port New Granada Isthmus Panama, N. coast, at the mouth of a river of the same name lat. 9° 21' N. lon. 79° 18' W. (q). It stands on a healthy site, on both sides of the river the person on the bank being called the American Town and that on the right the old Spanish and Indian Town. The former is composed of wooden houses, with shops, stores and lodging-houses the latter of huts, thatched with palm-leaf and a few wooden houses also. Here is a rude old church with bells hung on a scaffold in front. The population of American Town consists chiefly of natives of the U. States that of Indian Town of negroes, half breeds, Indians, Spaniards, and a few English. From its low and damp situation the town is unhealthy and heavy tropical showers are almost continuous but behind the town there are some fine heights, and beautifully wooded dells. Although the spot on which the town stands is flat the coast on each side is bold with precipitous cliffs. The harbour is very indifferent, so heavy a sea rolling in when the wind is from the N. E. N. W. and W. that it is with the greatest risk although the holding ground is good that any vessel can ride at such times. Ships, however may water off Chagres, especially small vessels, several copious rivulets here pouring over the rocks, whence one can lie in perfect security using wood while the water is rising, and that in great loads, with much ease. Chagres is the port at which the W. Indian Steamers land the mails for the W. coast of S. America and it has been recently much associated with the proposed line of communication between the Atlantic and Pacific Oceans, through Central America, and is pretty generally believed to be that adopted as the starting-point of the railway now in progress across the Isthmus of Panama. But the locality is generally fixed upon at 8 m. N. E. Chagres, the locality where the harbour though not of the best description, is much better than at Chagres. The line will terminate on the opposite side, at Panama, the distance in a direct line being 38 m. but with many rivers and ranges of hills intervening. In March, 1851 the rails were nearly laid from Navy Bay to Gamu, 5 m. on the way to Gorgona, which is half way across the isthmus. The river rises in the mountains, about 30 m. N. E. Panama, flows through a fertile country W., and then N. and falls into the Caribbean Sea at Chagres. Its mouth is the Gamu Purgina, and Trinidad after the confluence of the last of which it has a depth of from 16 to 20 ft. but the navigation is impeded by rapids and numerous falls.

YOL. I.

CHAHARRAG a town Afghanistan 80 m. N. Cabool, cap. of a dist. lat. 34° 57' N. lon. 69° 9' E. It comprises about 500 houses, has a tolerably well-supplied bazaar and a manufactory of swords, gun-barrels, and cutlery.

CHALCO a town and lake Central America state of and 18 m. S. E. Mexico. The town agreeably situated on the borders of the lake, enjoys a mild temperature, and has a population of about 9000. The lake, nearly circular, and about 2 m. in diameter serves when necessary to replenish the lake of Mexico, for which purpose proper sluices are provided. On it are floating gardens, formed of birdweed or other materials, and covered with mould which are moved about the lake by the wind.

CHALCOMBIE par Eng Northampton 1694 ac. P. 506.

CHALDEA the name given to an ancient territorial division of Asia, on the borders of the Euphrates the extent of which has varied much at different times. In some parts of the Old Testament the name of Chaldeans appears to be used as a general designation for the whole subjects of the Babylonian empire and in accordance with this some of the oldest profane writers, and particularly Berossus, speak of Babylon as a great resort of the people inhabiting Chalde. Ultimately however the term was much restricted in meaning and Chaldees was used to designate only a particular district at the S. W. extremity of Babylonia, extending along the Persian Gulf and upwards between the r. bank of the Euphrates and Araxes. In this district Ptolemy places the towns of Shanda, Babatharna, and others along the river and towards Chumara, Bethara, Berazina, and Oclera. All these places have disappeared and we now find within the district which they occupied the modern city of Basrah or Bassora, and the towns of Dhwanyah, Lamun, Kurah Zohad &c.

CHALKY ISLAND one of the Frisian Islands, W. of Marnum, 18 m. from Groningen. It is the second largest of the whole group, and the most beautiful. It is hilly with fertile valleys between. In which corn, fruit, and wine are raised, and cattle reared. There are three convents on the island, one of which is now a college, where ancient and modern Greek are taught. It is much resorted to by visitors, on account of the beauty of its scenery and agreeable climate.

CHALKY (Makara and Bari) New Zealand. The Makara, in which the bay is situated is off the S.W. extremity of Makara Island, lat. (21.40) 46° E.; lon. 168° 10' E. about 7 m. in length, and from 3 to 4 broad at the widest part. It is not composed of chalk, as its name would imply, but of hard white rock. It is covered with wood, which produces myriads of flies, of a very poisonous description, that bite severely. The bay is at the S.W. end of the island. On the S. side of it, is Port Chalky an excellent harbour generally used by ships visiting that part of New Zealand.

CHALON-EN-SAONE, or CHALON (anc. *Cobilloni*) a vi. France dep. Saône-et-Loire 83 m. N. Mâcon at the commencement of the Canal de Centre, a bank bridge here crossed by a bridge of five arches, communicating with the suburb of St. Leger. The houses are in general well built, and a fine quay lines the river but the public buildings are not remarkable. They consist of the cathedral, a Gothic edifice of the 13th century, the church of St. Peter a general hospital, and one for aged persons and orphans the Hotel de Ville, palace of Justice, an obelisk to commemorate the opening of the canal, the college, a small theatre, public bath, and the public library containing 70,000 volumes. Chalons is the seat of a tribunal of first resort and of commerce, and has an exchange, agricultural society and commercial college. Hats, vinegar oil and imitation pearls, are manufactured here. There are also dyeworks, foundries, potteries, oil and flour mills, and a considerable trade in grain, flour the wines of Burgundy and the South cattle, wool, wood, charcoal, coal, iron, plaster tiles, &c. It is a considerable entrepôt of goods both for the N. & E. of France, and has a very thriving omnibus trade. The Saône becomes navigable for steam-boats here. Caster had galleys stationed at Chalons, and it became the capital of Burgundy under Gontier. In 1273 Edward I. of England, being invited to a tournament here on his return from Palestine attended with 10,000 men-at-arms and some disputes having arisen the English attacked the French, killed a great number and left the living-ground strewn with the dead. This event is known as the little war of Chalons. The town suffered considerably from the civil wars of the 15th and 16th century and from the invasion of the allies in 1814. It was formerly very unhealthy but has been much improved in this respect by drainage. Pop. 15,937.

CHALONNAIS (Latin *Pagus Calalonensis*) a small dioc. France, formerly included in prov. Champagne and now forming part of dep. Marne.

CHALONNES-SUR-LOIRE, a vi. France dep. Maine-et-Loire, 12 m. S.W. Angers agreeably situated, L. bank, Loire. It has manufactures of hosiery, serges, and heady Pop. 2232.

CHALON-SUR-MARNE, or CHALONS (anc. *Calalonensis*) a vi. France, dep. Marne (Champagne), 94 m. E. Paris, with which it is connected by railway, lat. 48° 27' 32" N. lon. 4° 41' E. (p.) R. Reims, 2 bank, Marne, here crossed by a handsome stone bridge of three arches, built in 1787. Low walls now supply the place of the old ramparts, the entrance being by six gates, which open to six main roads. The houses are inferior being principally of timber, that, and plaster, but the general aspect of the town is agreeable. The public buildings are, the cathedral, a fine edifice three other churches the Hotel de Ville built in 1773. The Hotel de la Prefecture built in 1764, one of the finest buildings of the

kind in France; the barracks, formerly a Benedictine abbey, riding school, theatre, royal school of arts, college, public library, containing 80,000 volumes, museum, hospital, poor-house, &c. There is a fine promenade, occupying about 18 ac. planted with superb oaks from Chalons is the cap. of the second military division of the kingdom, and has a tribunal of commerce and of first resort, consulting chamber of manufactures, societies of agriculture, arts, and sciences, commercial college, and two seminaries. It is the seat of a hallopie, and of one of the three royal schools of arts and trades, where 480 pupils are maintained and instructed at the public expense. There are manufactures here of woollen and cotton goods of various kinds also, cotton mills, tanneries, and chamois-leather works. Barres, a considerable trade in grain, hemp, wool, rape-oil, oil, and sparkling champagne. Chalons was fortified and established by the Romans. Christianity was preached here about the year 260. In 481 Attila was defeated before its walls. From the 10th century it formed a kind of independent state governed by its bishops, till 1560 when it was united to the Crown. In 1591 the Parliament of Chalons publicly burnt by the hands of the executioner the bull of excommunication launched by pope Clement VIII. against the King of France. Under its countships it was a considerable city with 60,000 inhabitants. Its privileges were subsequently withdrawn, and its colonated fair divided away after the union of Champagne with France. Pop. 13,732.

CHALON a vi. Tibet midway between two lakes, about 60 m. S.E.E. Chamois-to-moo lat. 28° 20' N.; lon. 89° 25' E. The lakes are frequented by flocks of migratory birds, including ducks, geese, snipe, and large cranes the eggs of the cranes are collected in great quantities on the banks. One of the lakes is much venerated by the inhabitants of Bootan, who fancy it to be the haunt of their deity.

CHALONSE (La) an anc. dioc. France, which was included in prov. Guineas, and of which St. Bevoir was the cap. It now forms part of dep. Landes.

CHALTON par Eng Southampton 1728 ac. P. 708. CHALT (S. town) France, dep. Haute-Saône, 18 m. S.W. Lamoignon. It is of high antiquity, commanded by a large and strong castle surrounded by walls and flanked by numerous towers. It has some trade in horses and mules several annual fairs are held. P. p. 1143.

CHALVINGTON par Eng Sussex 729 ac. Pop. 170. CHAM (anc. *Curia Zepa*)—1. A vi. and par. Switzerland, can. of and about 3 m. W. N. W. Zug. It is beautifully situated on a height near the N. W. shore, where the lake of that name discharges itself into a tributary of the Rhene, and contains a large and handsome parish church, with a fine organ and a good altar piece by Hansard of Lunz, two schools, and baths. A good deal of wine is produced in the neighbourhood and splendid views are obtained of the lake and surrounding district. Pop. 1182.—2. Cham or Kamm, a vi. in Bavaria circle Oberpfalz, a little below the junction of the Kamp with the Regen 86 m. N.E. Regensburg. It contains a palace, town-house and two churches has some linen weaving and a trade in linen and flax wood and cattle. Garnet and earthenware are found in the neighbourhood. Pop. 267.

CHAM-COLLAO an old Chinese town, N.E. coast of Cochinchina, S. part in lat. 10° 54' N. lon. 108° 30' E. having some ships adjoining the S. and others projecting W. from its N. W. part. It is inhabited, well cultivated and the anchorage on the W. side, in 4 or 4½ fathoms, may be considered a safe harbour in all winds. About 15 m. S.E.E. from Cham-Collao is another small island but of considerable height, with a reef projecting from its S. extremity called False Cham-Collao.

CHAMA a river Venezuela, prov. Merida, rising in the Sierra Nevada de Merida, about lat. 9° 15' N. lon. 71° W. flowing first to E. then turning N. and falling into the lake of Maracaybo after a course of about 100 m.

CHAMALARI, CHUMALARI, or CHUMALARI, one of the highest peaks of the Himalaya mountains, on the N. frontier of Bhutan, near its W. extremity; lat. 28° N.; lon. 89° E. Its height is variously stated, from 23,979 ft. to 27,300 ft. a discrepancy so great, being no less than 3321 ft. as to supply almost every circumstance of antiquity, or antiquity of measurement. One of the lower estimates, 23,980 ft., is given in Humboldt's *Aspects of Nature*, vol. 1 p. 92.

CHAMALIERES [*anc. Commaria*] an anc. tn. France, dep. Puy-de-Dôme, 14 m. from Clermont-Ferrand. It is well built, and has a large square, adorned with a central fountain. It has an old castle, with a lofty tower called the Saracen's Tower and near the town are two monasteries with handsome churches. Chamalieres is chiefly noted for the thermal springs in the vicinity. Resident pop. 1926.

CHAMAS [*anc. Sotus Aemulius*] a tn. France, dep. Rhodan-de-Rhône, 84 m. N.W. Marseille, N. shore of the lagoon of Evre. It is divided into two parts by a hill through which a tunnel, 318 ft. long, has been driven and by which the two parts are connected. The E. and most ancient portion is surrounded by ramparts, and has broad straight streets. The other is regularly built, and inhabited principally by the maritime population. An extensive Government powder manufactory occupies the ground between the hill and the lagoon. The port, to which about 40 fishing vessels belong, is frequented by small vessels, and by the tenders from Arles, which come to load powder. Old of excellent quality flour wine, olives, and other productions of the country are also exported. Pop. 2709.

CHAMBERSBURG a tn. U. States, Pennsylvania, cap. co. Franklin, 22 m. S.W. Harrisburg, finely situated in the valley of Conococheague Creek, a tributary of the Potomac. It has a courthouse and county offices, eight churches, a bank, a tannery, pottery, paper-mill, cotton woolen, and edge-tool factories, an oil and two flour mills, four printing-offices, two breweries, manufactory of cutlery and many other mechanical and manufacturing establishments, also, four academies, and six schools. In the environs, which are fertile and well cultivated, blue limestone freestone, and marble abound. Its trade is considerable, and has received an additional stimulus by the completion of the line of railway from Philadelphia to Pittsburg. Pop. 4680.

CHAMBERY a tn. France, cap. dep. Savoie, agreeably situated on the Lys and Albie, between two mountains at the border of a fertile plain, 45 m. S.W. Geneva. It was formerly surrounded by walls and a ditch, with four gates, three of which led to three extensive suburbs. A citadel on a hill, still remains, and contains a handsome church. The town is tolerably well built; houses mostly of three stories but the streets are narrow, crooked, and have a very dull appearance, with exception of the Rue Corvetto where most of the business is carried on. Chambery possesses several public squares, ornamented with fountains, a cathedral, three other churches, several convents, four hospitals, an orphan hospital, a Jesuit college, an agricultural society, a royal society corresponding with the Royal Academy of Turin, a public library containing 16,000 volumes, a theatre, public baths, and two fine promenades. Among the most conspicuous buildings are three barracks erected by the French. The manufactory consist of soap, silk gauze, hats, silk and woolen stockings, common lace and nails. There are also paper and marble works, a silk spinning-mill, a refinery for alum, and some smeries. Grain, silk, cattle, wine, liquors, and copper form the principal articles of trade. Chambery is also the seat of an archbishopric and of the high court of appeal for the whole of Savoy. The inhabitants bear a high character for urbanity and the women are said to be the handsomest in Savoy. The air is pure, and the climate mild. The environs, at least the low grounds, are fertile, and the mountains present many cascades much visited by travellers. About 1 m. E. of the town is Les Charmettes, the residence of Rousseau and of his friend Madame de Warens. Chambery was founded about the 10th century and remained under feudal lords till 1290, when it was ceded to Thomas, first Count of Savoy, who built the castle where the princes of Savoy resided till the Government was removed to Turin. The castle was burnt in 1745 and again in 1798, and restored in 1803. On September 14, 1792 the gates of the town were opened to the French, who made it the capital of the department of Mont Blanc, and retained it till the second treaty of Paris, November 20 1815. St. Real and Count Xavier de Maistre were born in Chambery. Pop. 14,009.

CHAMBOUR or **CHAMBOUR VILLAS**—1. A tn. France, dep. Creuse, 28 m. E. Guéret, at the confluence of the Turdus and Vouze. It is the ancient town was the capital of the Comblav. 2. A square temple, of Gaulish origin, to which the Romans had made some additions, now forms part of the

church. Chambon manufactures leather and trades in cattle. Pop. 1258.—2. *Chambon-Farguier* a tn. France, dep. Lot, 4 m. S.W. St. Etienne, on the Dordogne-Vézère the water of which is said to be peculiarly adapted for tempering steel. It has thriving manufactures of nails, cutlery, files, saws, and articles in cast steel, ribbons, and tape; and has forges for iron and steel. Pop. 1786.—3. *Chambon* is also the name of several vills in France one, in the dep. Haute-Loire, 9 m. S.E. Yvergues, has a pop. of 401.

CHAMBOURD a vil. and royal castle France, dep. Lot-et-Garonne, 9 m. E. Bioul. The village, situated on the Garonne, is inconsiderable, having only about 300 inhabitants. The castle or chateau which is of great extent is situated in a walled park 20 m. in circumference abounding with deer, and other game. It was commenced in 1526 by Francis I. after designs by Primaticcio. It was continued by Henry II, Henry III., and Charles IX., and Louis XIV. and Louis XV. made some considerable additions, but the original designs were never completed. The building itself has a fantastic, and, from the darkness of the stone, rather a fearful appearance. A vast group of towers, minarets, and some or inverted female, rise from a solid basement, the chief features of which are six external round towers, of prodigious size 60 ft. in diameter which seem the types of all these which characterize French chateaux. Its architecture marks the transition between the fortified castle and the Italian palace, and is a fine specimen of the age and taste of Francis I. It contains 440 chambers, and the grand staircase in the central tower is a double spiral so contrived that parties ascending do not meet

LANTERN IN THE GARDEN OF CHAMBOURD.
From France: Monuments of Architecture.

those descending. The castle was inhabited by Francis I., who made it the scene of his gallantries by Louis XIII. and by Louis XIV., who gave brilliant fêtes here, at one of which Molière and his company performed for the first time his play of the Bourgeois Gentilhomme. Louis XV. gave it to Stanislaus, King of Poland, who remained here several years after which it was successively possessed by Marshal Saxe, the Crows, the Polignac family, and the Bonapartes, who burnt the tapestries to obtain the gold and silver with which they were wrought. After the battle of Wagram, Napoleon constituted Chambour a principality and gave it to Marshal Berthier as Prince of Wagram. When the widow of the Marshal offered the castle for sale in 1820, a company was formed, which bought it for 265,590, and gave it to the Duke

of Berdama, in the nurse of the people of France, on the day of his baptism, May 1 1521. It is now uninhabited, dismantled, and without rule.

CHAMÉ POINT is headed on the S.W. coast of the isthmus of Panama. lat. $8^{\circ} 40' 18''$ N. lon. $79^{\circ} 40' 18''$ W. (a.) **CHAMÉ**, an Isl. Russian America, bay of Good Hope, Kotzebue Sound lat. $66^{\circ} 13' 13''$ N. lon. $161^{\circ} 46' 18''$ W. It is covered with a thick swampy moss, except to the E. where it ends in a low sandy point. Its highest point is 231 ft. above sea level.

(CHAMOND 89) a la France dep. Loire, 6 m. W. E. St. Etienne, at the confluence of the Gier and Ban, and on the railway from St. Etienne to Lyons. It is well built, has a handsome parish church, a promenade, public baths, commercial college, and a consulting chamber of manufacturers. The old castle, on the side of a steep hill and now in a ruinous condition, presented the singularity of a belltry below a church, and a church below a meadow round which a carriage could be driven. A hill in the vicinity furnishes excellent building-stones from its summit, while the base is a mass of coal in which extensive workings are worked. This is a thriving town sustaining towns carrying on three principal branches of industry: namely, milling silk, the manufacture of sails for the navy &c. and the fabrication of silk ribbons and laces. There are also dyeworks, bleaching-grounds, foundries, forges, and furnaces, and a considerable trade in horses and cattle. Pop. 8236.

CHAMONIX CHAMONIX or LA PRINCE (anc. *Camponis*) a vil. Savoy, France, in the valley of same name, 39 m. E. S. E. Geneva. It has several hotels, and is supported chiefly by visitors to the scenery of the valley. It originated in a Benedictine priory founded by a count of Geneva in 1059.

CHAMONIX, or **CHAMONIX** a celebrated alps. France, dep. Haute Savoie, dist. Faucigny in the Pennine Alps and 3 45 ft. above sea-level. It is about 1 $\frac{1}{2}$ m. long by 1 to 6 m. broad. has N.W. to S.E. its E. end formed by Mont Blanc and other lofty mountains of the same range and its W. by Mont Breven. It is traversed as its whole extent, N. to S. by the Arve, which rises on the confines of canton Valais, receives numerous rivulets in its course, and leaves the valley by a narrow gorge on the S.W., through which also passes, high above the river the highway to Sallanches and Geneva. At its N. end the valley commences with canton Valais, by the passes of the Col de Balme and the Tête Noire, both practicable for mules and it may also be left by other passes, as the Col de Gant. But they are both difficult and dangerous, and only suited for practised and daring pedestrians. The mountains on the W. side of the valley though attaining a height of 8500 ft. above sea level are not covered with snow in summer, but those on the E. side, in the range of Mont Blanc, being from 10,000 to upwards of 15,000 ft. high are always snow-clad, excepting where the peaks are too perpendicular for snow to lie. From the snowy ranges alone, of course, proceed those remarkable features of the valley the glaciers, some of which approach close to the cultivated fields. They are very numerous, and of different sizes, but the two most important are the Glacier des Barmes, and the Glacier de la Vierge, the latter the most extensive glacier in the Alps. From its lower extremity called the Glacier des Barmes, the meltings of the glacier flow off in greater or less volume, according to the season of the year from under a naturally-formed ice-arch called the source of the Arvion, the name given to the stream thus formed which is an affluent of the Arve. The waters of this and other glacier streams are muddy in the extreme, from the quantity of crushed rock suspended in them. The lower slopes of the mountains are covered with timber through which it frequently is to be seen the devastating course taken by the avalanches in winter in summer but very severe in winter which lasts from October to May during which the snow lies 8 ft. deep in the lowest parts, and all communication with the external world is cut off. The soil is not fertile, but it is occasionally cultivated; and the inhabitants, who are gathered together in numerous villages, of which Chamouni or La Pruney is the chief take barley, oats, rye, flax, and potatoes, raw cotton, and train-bone, from which most excellent tallow is obtained, and a considerable quantity exported. During the winter years, cloths, hats,

and implements are made, and many beautiful articles of wood are carved. All the valley is famous for its country, which was first brought under public notice by Windham and Pouchon, two Englishmen, who visited it in 1741. Pop. 3600.

CHAMOREUIL, or **CHAMOREUIL**, a lake Central Asia, Ladak lat. (N. extremity) $33^{\circ} 56' 18''$ N. lon. $78^{\circ} 20' 18''$ E. length about 15 m. breadth $1\frac{1}{2}$ m. 15,000 ft. above sea level. Water brackish, of a blue colour and supposed to be deep. It is surrounded by lofty mountains, rising in some places 6000 ft. above the surface of the lake. Although several considerable streams flow into it it has no outlet, being kept at its level by evaporation alone.

CHAMOUNI, valley and vil. See CHAMONIX.

CHAMPA See ANAM.

CHAMPAGNE (anc. *Compendia Gallie*), one of the largest and most important of the former provinces of France. It was subdivided into 12 districts, and, along with Briz, was one of the 12 governments of the kingdom. It now forms depa. Marne Haute Marne, Aube Ardennes, and parts of depa. Yonne, Aube, Seine-et-Marne, Meuse, Côte-d'Or, Haute-Saône and Vosges. The well known wine, Champagne takes its name from this province.

CHAMPAGNEY a tn. and com. France, dep. Haute-Saône, 5 m. E. N. E. Vesoul with manufactures of leather and tiles and some trade in bark. The cherry crop of the district is important, the fruit being principally made into a spirit, in appearance resembling gin or whiskey and called *brandy* (cherry water). In the vicinity is an extensive coal mine. Pop. 501.

CHAMPAGNE, a tn. France, dep. Jura, 19 m. N. E. Lux. a bank, Ain. It is favourably situated for trade on the road from Paris to Geneva, and has an abundant command of water-power. There is here one of the largest wire-drawing and nail manufactures in France. Ketting-needles and carriage drags are also manufactured and there are several saw-mills. Pop. 3201.

CHAMPANAGLE a tn. Hindostan, prov. Behar 2 m. W. Boghpoor lat. $25^{\circ} 14' 18''$ N. lon. $86^{\circ} 55' 18''$ E. There is here a monument, of some note and of great size, as a Mahomedan relic.

CHAMPALFERT a vil. France dep. Marne, 23 m. S. W. Châlons. On February 10, 1814, Napoleon defeated the Prussians here. Pop. 231.

CHAMPION BAY, a bay Australia N.W. coast, Geelvink Channel lat. $28^{\circ} 47' 18''$ S. lon. $114^{\circ} 36' 18''$ E. (a.) The depth of the bay is regular with five and six fathoms fine white sand. It was visited by Capt. Stokes in 1840 who gave it its present name the neighbouring heights he represented as having a brown and arid appearance, and as being deficient of timber.

CHAMPLAIN (LAKES OR) a lake of considerable extent chiefly in the U. States, between the states of New York and Vermont, but the N. end of which is within Lower Canada. extreme length, N. to S. about 120 m. breadth from half a mile to 15 m. area, about 600 sq. m. 90 ft. above the level of the sea. It was discovered in 1609 by Samuel Champlain, a French naval officer and Governor-General of Canada, from whom it takes its name; it is navigated by steamboats and other vessels, and is deep enough for ships of the largest class. Its outlet to the river Richelieu, flowing N. to the St. Lawrence, is navigable for barges throughout, and for ships as far as St. John's, and the most frequented line of communication between U. States and Lower Canada. The S. end of the lake is connected, by a canal with the Hudson river thus affording water communication between the St. Lawrence a few miles below Montreal and the Atlantic, at New York. Upwards of 60 islands are scattered over its surface and it receives numerous streams, none of which are very important. The scenery along its sides is picturesque. It abounds in salmon, steel, pike, and other fish, in winter it is usually quite frozen over and is passable on the ice. The chief port on its banks is Burlington.

CHAMPLAIN a vil., port, and township, U. States, New York, near the N.W. extremity of lake of same name, 167 m. N. Albany and 86 m. S. by E. Montreal. It lies on the Chazy about 5 m. from its mouth, and has a Presbyterian and a Methodist church, a grist, and six saw-mills, and a tannery. The river is navigable for ships to within 2 m. of the vil. Pop. of township, 6695.

CHAMPLATTE, a *fin* France, dep. Haute-Saône, 80 m W Yvonand, on the Saône. It manufactures lace-works and already has a trade in grain wax and the wiles of the district. Pop. 2770

CHAMPON, or **CHAMPONNOS**, a *fin* Lower Rhine, 1. bank, Payring lat. 10° 51' N lon 9° 28' E. 212 m. S.W. W. Bank. It was formerly considered by the Bismarck an important military post. Excellent timber and shipbuilding, resins, and tin, are found in the environs.

CHAMPSAUR, a *fin* France, in the former province of Dauphiné now comprised in depts. Hautes-Alpes and Drôme

CHAMUSCA, a *fin* and *par* Portugal, prov. Estremadura, comarca of, and 10 m E.E. Santarém, on the E. side of the Tagus from which it is distant about 1½ m. It has two annual fairs, of three days each. The vicinity produces a much esteemed red wine, of which about 1500 pipes are made annually. Pop. 2800.

CHANAK KALESI See CHANNAKALESI

CHANCAÏ a *prov* and *river* Port The PROVINCE, dep. Lima, is about 80 m long, and as many broad. The part of it which is occupied by the Andes is arid, but in the valleys on the sea-coast it is extremely fertile. The most considerable rivers are the Pucallpa and the Huancayo. Grano has long been used here as a manure and in the valleys, which are naturally very fertile, immense crops of maize and sugar are raised by the instrumentality of this valuable fertilizer. —The towns esp. of above prov., is situated in a beautiful valley near the embouchure of river of same name in the Pacific, 87 m. N.W. Lima. It has a good and well frequented harbour. —The river, rises in the Cordillera of the Andes, and after a W course, falling into the Pacific, in lat. 11° 30' S. lon. 77° 15' W.

CHANCE ISLAND Bay of Bengal W coast Lower Hind. about 35 m from the mainland lat. (highest peak) 9° 27' N lon. 97° 58' E. It is from 8 to 5 m. in length and about the same breadth with three or four small islets on its N. and W. sides.

CHANDAH a *fin* in Hindoostan prov. Gaudwana esp. dist. of same name, 80 m S. Nagpur lat. 20° 2' N lon. 79° 23' E. In walls, of freestone, and flanked by round towers, are 6 m. in circuit, and from 15 to 20 ft. in height. It consists of straggling streets, detached houses, gardens and plantations. In 1803, it contained 5000 houses; in 1832 only 2800. Within the walls stands a citadel named the Bala Killa. In 1818, Chandah was taken by the British who found there 290 000 in money and a great deal of valuable property. —The distance is about 88 m. in length N to S and 65 m. in breadth E to W.

CHANDANEKE a *fin* and dist. Punjab The town is situated on the brow of a hill in lat. 33° 21' N lon. 76° 5' E. about 76 m. S. by E. Saragarh.

CHANDEL EUR (Huez and Bay) a group of small low uninhabited islands Gulf of Mexico near the coast of the U. States, Louisiana, between lat. 29° 30' and 30° 5' N lon. about 88° 50' W. These isles with those of Grand Greaser and Briton form the Bay of Chandelour a gulf on the E. extremity of Louisiana, near the delta of the Mississippi.

CHANDEROUVA, a considerable *fin*, Hindoostan, prov. Bengal, 65 m. W. by N Calcutta lat. 23° 45' N lon. 87° 44' E. Pop. (1814) 16 145

CHANDEREE, **CHANDEREE**, **CHANDEREE**, a *fin*, and dist. Hindoostan prov. Malwa. The town is a strong hill fort lat. 24° 23' N lon. 78° 10' E is 110 m. N.N.E. Bhopul. —The distance is 90 m. from E to W and 70 m. from N to S.

CHANDERNAGORE, a *fin* Hindoostan, prov. Bengal belonging to France, a bank, Hooghly river 16 m. N.W. Calcutta lat. 22° 55' N lon. 88° 27' E. It has straight, well-paved but now deserted streets houses of brick whitened outside and two stories in height adorned with colonnades in front, and terrace-roofs. Though formerly flourishing it has now no trade, except with Calcutta, and no manufactures, excepting some cotton cloths. It is the residence of an administrative judge, and the seat of a court of first resort. In 1676, the French obtained permission to establish a factory here, which, in 1688, along with its territory—area, 3225 ac.—was ceded to the French E. India Company by Aurangzeb. The town was subsequently fortified, and the factory continued to flourish till 1767 when it was attacked by Admiral Watson and Colonel Clive, who took it and dismantled the fortifications.

It was restored to the French in 1816. Pop. (1830) 10, and territory 81 256.

CHANDOLE, a large *fin* Hindoostan in Gujarat, 85 m. E.N.E. Baruch, a bank, North lat. 22° 1' N lon. 73° 40' E. By the Hindoos it is held in veneration as a place of great sanctity.

CHANDORE, a fortified *fin* of considerable size, Hindoostan prov. Candahar pres. Bombay, 78 m. N.W. Aurangabad lat. 20° 16' N lon. 74° 21' E. The fortifications commands one of the best passes on the range of hills on which it stands, and is quite inaccessible everywhere but at the gateway where it is strongly fortified. Nevertheless, it surrendered, with little resistance, to the British twice first, in 1804, and again in 1818.

CHANERALL, a bay and *fin* Chili The bay is 1 m. N. Carril Bay well sheltered from N. and S. which but exposed to gales from the S.W. —The strait, which has about 4 m. W. is 2 m. long lat. 29° 1' S. lon. 71° 40' W. (N.)

CHANG-CHUEN CHAM, or St. John's Island on the S. coast, China, prov. Guangdong lat. (S. point) 21° 15' N lon. 112° 50' E. It is about 15 m. in length, and 8 to 5 m. wide and has generally been considered as two islands the high land at each extremity appearing separated by a large bay or vacant space, which on a near approach is found to be a low narrow isthmus of sand, uniting the high land, and having a bay on each side one of these on the W. side has 6 m. 17 fathoms water at the entrance. There is a watering-place on the S. side of the bay and a village at the head of it.

CHANG CHUO WOO —1 A city China, prov. Fokien 86 m. S.W. Amoy which is nearly the port of the city lat. 24° 55' N lon. 117° 50' E. It lies in a valley enclosed in hills, and is intersected by a river here crossed by two bridges one of which is of somewhat angular construction built up on 25 piles of stone, about 30 ft. apart, and 20 ft. high. Large beams are laid from pile to pile these again are crossed by smaller ones, which are covered with earth and then paved with enormous blocks of granite, some of which are about 45 ft. long and 5 ft. broad. This singular structure is about 9 ft. wide, half its length on both sides is occupied by boats. The city is surrounded by a wall 4½ m. in circumference, inside of which it is thickly planted with large trees. In the wall a gate, formed of a door for foot-passengers, and a canal for boats, is placed at each of the cardinal points. The streets are from 10 to 12 ft. wide, and many of them are well paved slopes numerous, and well furnished and houses in general two stories high. This is the great centre of the silk manufacture of the province, and the streets present a bustling and animated appearance. In the suburbs, which are extensive there are large silk and sugar manufactories and from an eminence near the city about 60 populous agricultural villages may be seen in a large plain 80 m. long by nearly 20 m. broad. Pop. of city exclusive of suburbs, variously estimated at from 800 000 to 1 000 000.—2 A city China, prov. Kiang soe 75 m. S.E. Nankin lat. 31° 50' N lon. 121° 43' E.

CHANG-MAT, a *fin*, Laos, a bank, Nankin lat. 30° 10' N lon. 99° 2' E. Pop. 26 000

CHANG-SHA a city China prov. Hoonan, a bank, Head Kiang 50 m. S. its embouchure in Lake Tong Ting-Hou lat. 28° 18' N lon. 118° E

CHANGAMA, a *fin* Hindoostan Carnatic, 115 m. S.W. Madras, at the end of a pass, to which it gives its name. It has a lofty pagoda.

CHANIERS, a vil. France, dep. Charente Inférieure, 4 m. from Salntes. In its vicinity good red wine is produced and it has two annual fairs. Pop. 1200

CHANNAKALESI or **CHANK KALESI** (red castle) a *fin* Asiatic Turkey, pass Anatolia, near the S.W. entrance of the Dardanelles, about 8 m. S.W. Alydus lat. 40° 10' N lon. 28° 25' E. It is composed entirely of wooden houses, which, while new and uniform, have a peculiar and somewhat pleasing effect, resembling the Swiss villages. It has been often seriously damaged by fire. The town takes its name from the manufactories of crockery carried on in it, and it, therefore, erroneously named in our maps Sultana or Saltana. Its castle is one of the most famous on the Dardanelles.

CHANVEL ISLANDS, a group of *fin*, in the English Channel, off the W. coast of dep. La Manche, in France, between lat. 49° and 49° 50' N; and lon. 2° and 2° 45' W. They

consist of Jersey, Guernsey, Alderney and Sark (which see), with some dependent islets. They are celebrated for a peculiar breed of cattle, known by the name of Alderney or Norman cattle. They are almost totally exempt from taxation, and enjoy besides, all the other privileges of British

islands. Some export trade is carried on. Quarries of granite are worked in the neighbourhood. Pop. 39,000.

CHANTILLY, a town, a dist. and a tn. Som. territory of Cambodia, at the foot of a ridge of mountains, E. side, Gulf of Siam. It produces cardamoms, muscard, dyewoods, ship timber, hides, horns, ivory, lac, and bannoin.

The town, cap. of the dist., is a place of considerable trade; its chief export is pepper and in its vicinity are mines of precious stones. It lies 2 m. up a small river in lat. $12^{\circ} 45' N$ lon. $102^{\circ} 18' E$.

CHANTILLY, a tn. France, dep. Oise, 26 m. S.E. Beauvais, on the Normans, celebrated for its manufacture of bobbinets and silk lace, introduced by M. Mennet in 1710. There are now seven establishments in the town and seven in the surrounding district. The manufacturers give out the materials and patterns, and the work is done at the homes of the lace-makers. Porcelain hosiery and hardware are also made here. The splendid chateau of Chantilly built by the great Condé, and where he spent his latter years, after retiring from military life, in the society of Racine, Boileau, Boissieu, and the other literary men of his age, was ravaged by the mob at the Revolution of 1793. The great chateau and stables, considered to be among the finest in Europe, still remain. There is a good hunting park here, built and enclosed by the Prince de Condé. Races are held in the month of May. The headless body of Admiral Coligny killed at the massacre of St. Bartholomew was interred in the chapel of the castle. Among the natives of Chantilly was the Duc d'Enghien, shot in the ditch at Vincennes, March 21, 1804. P. 2335.

CHANTONAY, a tn. France, dep. Vendée, 15 m. E. Bourbon-Vendée. Near it an extensive coal field, of the same name is wrought, and in its vicinity in 1793 a bloody battle was fought between the Republicans and the Vendéens. Pop. 1176.

CHANZA, an affluence of the Guadiana forming during the greater part of its course, the boundary between Spain and Portugal. It rises near Cortegana, prov. Sevilla and, proceeding S.W. joins I. bank, Guadiana, a little above San Lúcar-de-Barbadena, whence about 40 m.

CHAO-WEI-LONG, a tn. and par. Portugal, prov. Beira-Alta, on a lofty mountain, crowned with an old castle, 24 m. S.W. Coimbra. It contains a collegiate church, convent, hospital, and almshouse. Pop. 1160.

CHAO-HING, a city China, prov. Chekiang, on a river 80 m. W. Ning po; lat. $30^{\circ} 15' N$ lon. $120^{\circ} 18' E$. It stands on a fertile and extensive plain, is intersected by canals, has broad, clean and well paved streets, and is remarkably healthy. The inhabitants are famed for their knowledge of the laws, and from among them the great mandarins and governors of provinces choose their secretaries.

CHAO-KHING or **CHAO-KHUI**, a city China, prov. Guangdong, 50 m. W. Canton, on the Si-king. It is well built, and strongly fortified and is the residence of the governor of the provinces of Quang-tung and Quang-nam. There are some beautiful gardens in one of the suburbs.

CHAO-NAM-BOU, a tn. Mongolia, territory on the Chao-tou, 165 m. N. by W. Peking; lat. $43^{\circ} 25' N$; lon. $116^{\circ} 18' E$. This town which is of vast extent, consists of a collection of houses without any regard to regularity and crowded, there is an indifferent foot-path on each side

subjects. The government of the islands is in the hands of states, some members of which are named by the Crown while others are chosen by the people, and others sit ex officio. These islands are a very costly appendage of the British Crown. They have been fortified at an immense expense, and their defence, in time of war is supposed to cost fully £500,000 a year which has to be wholly defrayed by Britain the total revenue collected in the islands not amounting to £20,000 a year. The Channel Islands form the only remains of the Norman provinces once subject to the British crown. Pop. (1841), 76,006.

CHANNELKIRK, par. Scot. Berwick 22 sq. m. P. 28. **CHANNI KHAN DIGOT**, a tn. Bahawalpur 18 m. N.E. Khampoor lat. $28^{\circ} 50' N$ lon. $70^{\circ} 54' E$. It is a small, but thriving place. The surrounding country is dry sandy and overgrown with tamarisk jungle.

CHANTANQUE (LAKE), a small lake, U. States, near S.W. extremity of the state of New York. It is 18 m. long and for the most part from 1 to 3 m. broad. It is 720 ft. above the level of Lake Erie, and 1921 ft. above that of the Ocean, and is said to be the highest body of water in the U. States on which a steamer floats. It is navigable for steamboats and rafts proceed from it to the Gulf of Mexico. **CHANTELLE**, a tn. France, dep. Allier 26 m. S.W. Moulins, r. bank, Beaulieu. On a neighbouring eminence are the ruins of an immense fortress, formerly belonging to the Salengrains de Bourbon, and now a quarry whence the country people obtain supplies of building stone. Pop. 1708.

CHARENTAIS, a tn. and tom. France, dep. Lower Loire, 14 m. from Nantes, r. bank, Loire. It is well built, and the inhabitants are engaged in the manufacture of white cloth, fishing, husbandry, cattle-rearing, ship and boat building, &c.

for pedestrians, but carriages and beasts of burden must pass their way through a black, deep, and disgusting mass of mud. The principal meetings are the Buddhist temples, which are numerous. In spite, however, of its unpropitious appearance, and the natural disadvantages of its situation—being surrounded by a sterile country and subject to intense winter cold, as well as stifling heat during summer—this town is a place of immense bustle and activity. The inhabitants are removed throughout Tartary and the most remote parts of Tibet for the sake of its iron and brass which they turn out from their foundries and all the countries addicted to the worship of Buddha are furnished by them with idols, bells, and the different vessels employed in their idolatrous ceremonies. The commerce of the place is also extensive. Russian merchandise is brought to it through Kiahkhi. The Tartars bring numerous herds of oxen, camels and horses in exchange for which they receive tobacco, cloth and tea. Merchants from the province of Chuen are extremely numerous, but invariably return to their own country after improving their circumstances. Indeed, it is remarked that the Chinese, in this commercial place, always and by making a fortune, and the Tartars by running themselves. The population, though not easily estimated, is said to be very great.

CHAO-TCHBOO-POO a city and dist. China. N. division of Quangong or Chuen prov. The city is situated in a mountainous region about 150 m. N. Canton city lat. 24° 55' N. lon. 118° 15' E. at the confluence of the Hsiao and Tanghai, the union of which streams form the river Pe-kien; both are navigable. It is a large place, and its walls run for a great distance along the Pe-kien here crossed by a bridge of boats. There are considerable manufactures and trade in the place but the locality is unhealthy. Pop. estimated at about 10,000 families.

CHAOUSSY or **TOUHAU** in N. Russia gov. of, and 27 m. E. by S. Mogilev. It has two churches a synagogue, and a school. A great market is held here annually. P. 8400.

CHAPADA (AKAIA, PA) a small town or vil Brazil prov. Goias, 6 m. N. Natividade on one of the low flat table lands called Chapadas whence its name. Gold used to be found in the country around, and a number of slaves were employed in washing the soil in search of the precious metal but the pursuit is now almost abandoned, the slaves being more profitably occupied on plantations. Pop. about 1000.

CHAPALA a large lake, Mexico, state Guadalupe and Michoacan, about lat. 20° 20' N. and between lon. 102° to 103° 45' W. area, 1500 sq. m. It contains numerous islands, and is traversed by the Rio Grande. The scenery on and around the lake is extremely beautiful.

CHAPARI, a river Bolivia, rising in the mountains of Cochabamba, and after a course from S. W. to N. E. of about 100 m. joining the Mamore in the parallel of 17° S.

CHAPEL—1 par. Ire. Wickford 3,898 ac. Pop. 1015.

—2 *Chapel or Garwick* par. South. Berkeley 10 m. by 5 m. pop. 2102.—3, *Chapel, or Fonthill*, par. Eng. Essex 1145 ac. Pop. 452.—4, *Chapel Colston* par. Wales. Fern broke; 170 ac. CHAPPEL ALLESTON a chapelry and vil. England co. York, bor. and 2½ m. N. Leeds, very pleasantly situated, and the residence of many respectable families. It has a handsome Episcopal and a Wesleyan chapel. P. (1851) 8497.

CHATEL, *par. de France*, a market in and par. England co. Derby. The town 11 m. N. W. Derby has a neat parish church a Wesleyan chapel two endowed schools, and a library. Cotton-weaving and paper-making are the chief employments. Near it are lead and coal mines, and limestone quarries. Area of par., 13,280 ac. Pop. 8214.

CHATELLE (LA) a vil France, dep. Vosges, 16 m. from St. Dié. Near it is a slate quarry. Pop. 1259.

CHAPPELL-DE-DEUX (LA) a vil France, dep. Sarre, forming a N. suburb of Paris, being a continuation of the Faubourg St. Denis and commencing outside the walls. Manufactures—liquors, chemical stuffs, starch, waxcloth, brandy and salt. Pop. 12,911.

CHAPPO or **CHAPU** a fortified station in Chuen prov. Che-king, N. side of a large bay 35 m. N. Ning-po lat. 30° 40' N. lon. 120° 25' E. The houses are, in general

small with walls of brick, plastered and white-washed. The houses are all detached, each being surrounded by a wall about 7 ft. high. A particular portion of the town, surrounded by a wall and planned on the model of a camp, is assigned for the residence of the Manchoo troops, who form the garrison. Chappoo is a place of very considerable commerce, and the only Chinese port which is permitted to trade with Japan. In May 1842 it was attacked and taken by the British after a vigorous resistance on the part of the garrison.

CHARNIAKOVAN one of the Kurile islands, N. Pacific Ocean, subject to Russia, and separated from the island of Onokotom by a channel 8 m. wide lat. 49° N. lon. 154° 39' E.

CHARBAR, or **CHOTMAR BAY**—1 A bay Baluchistan, prov. Makran, on the Indian Ocean. It is of circular form, and about 9 m. in diameter. Near Charbar its E. point, is lat. 25° 10' N. lon. 60° 36' E. This bay is one of the best on the coast. Fresh water of good quality is easily procured and goats and sheep may be obtained but neither bullocks nor poultry are to be had. There are here some small gardens which produce turpentine, onions, potatoes, carrots &c.—2 A tn. of same name, on the E. side of the bay near its entrance composed of straggling mat houses occupied mostly by weavers. The country around here is arid and barren, that families are of frequent occurrence, compelling the inhabitants to abandon it in great numbers.

CHARD a tn. bor. and par. England co. Somerset. The town 43 m. S. S. W. Bristol contains a townhall an extensive market-place, an hospital and a free grammar-school also places of worship for Baptists and Independents. The lace manufacture employs about 1500 hands. The clothing, mending and corn trades are also considerable. This borough sent members to Parliament in the reign of Edward I. and two succeeding reigns, when it lost this privilege through the negligence of its freemen. Pop. of in 2291 Area of par. 5448 ac. Pop. 2597.

CHARDAK, a tn. European Turkey Bulgaria, mukal of and 10 m. E. Salutar, and 77 m. W. by N. Lake Resoun.

CHARDAK, or **HAN GRUL** (pilgrimage) a salt lake, Asiatic Turkey, pass. Anatolia, E. extremity lat. 38° N. lon. 30° E. About 10 m. in length, and 5 broad. Large quantities of salt are collected from this lake.

CHARDESTOCK par. Eng. Dorset 5800 ac. 1 pop 1387.

CHARENTE [anc. *Carantonus*] a river France, which rises on the frontiers of the dep. to which it gives its name, and of Haute-Vienne, near Charenton in a range of hills forming part of the watershed between the basins of the Loire and Garonne. It first proceeds N. W. to Civray dep. Vienne, then turns round and proceeds almost due S. to Mande. Here, its course becomes extremely tortuous till it reaches Angoulême, near the centre of department Charente. It now proceeds almost due W. passing Cognac, and flowing onwards to Saintes, where it resumes its original course of N. W. and falls into the Bay of Biscay at Rochefort, where it forms a fine marine harbour. Its principal affluents are the Bognure, the Tourne, the Xé the Sienne and the Bortonne whole course, about 300 m. It is fit for navigation from Civray and navigable from Montignac, 60 m. above its mouth. The Charente flows generally through a rich and fertile valley and is of great importance both from the facilities which it gives for transport, and the numerous public works which are placed along its banks. A little above Rochefort, two canals, the Bognure and Charente, lead off the one from the 1 and the other from its 2nd bank, intended to drain the salt marshes around Rochefort, which made the whole district very unhealthy. They have proved of essential service.

CHARENTE, an island dep. France having N. the dep. Deux-Sèvres, and Vienne, E. Haute-Vienne, S. Dordogne, and W. Charente-Inférieure, formed chiefly out of the ancient province of Angoulême, and deriving its name from the river Charente, by which it is traversed, between lat. 45° 35' and 46° 15' N. and lon. 0° 25' W. and 0° 54' E. area, 1,467,447 ac. sup. Angoulême. It is in general traversed by hills covered with abundant trees, sandy plains, meadows, &c. Soil dry and arid, one-third devoted to tillage, a third to vineyards, and the remainder meadows, woods, and waste lands. The principal rivers are the Charente, joined by the canal of Fontenay with the Vienne the Dronne, Tonnay, Bende, Teuvre, and N. all abounding in fish. Waterfalls

are numerous. The climate is temperate, atmosphere clear and extremes of heat or cold are almost unknown. The principal productions are wheat, rye, maizé, oats, millet, and buckwheat. But the produce is insufficient for the local consumption. Trades are abundant. The wines of the department are of inferior quality and in little request for the table but they yield the best brandy in Europe. The celebrated cognac brandy is made in the districts of Champagne, Cognac, Jarnac, Rouillac, and Aligre, from a grape called the *folle blanche* which yields a white wine. The red wines furnish an inferior brandy without the bouquet that distinguishes the genuine cognac. In good years, the wine produces a fifth of spirit at 25 to 28. In bad years, on the contrary 9 or 10 parts of wine are required to produce one of brandy. The wine growers themselves carry on the distillation, each estate being furnished with stills and the necessary apparatus. Factors are scarce, but cattle are fattened to some extent. Large numbers of pigs are also fattened and poultry is abundant, as well as game of all kinds. In some districts, bees are reared in great numbers and in one commune, saffron is cultivated. Iron ore is found in the department and small quantities of lead and antimony. Excepting brandy and paper the manufactures of the department are considerable, consisting of making cloth, cordage, hats, cork, and earthenware. The paper made at Angoulême is said to be the best in France. The department is divided into five arrondissements: 29 com. and 465 com. It forms the diocese of Angoulême. Pop. (1846) 579,031.

CHARENTE INFÉRIEURE (lower Charente) a maritime dep. France, W coast having N, dep. Vendée, N E Deux-Sèvres, E Charente S E Dordogne, S Gironde, and W the Atlantic Ocean, between lat. 45° 5' and 46° 21' N and lon. 0° 5' and 1° 37' W. It comprises parts of the former provinces of Angoumois and Poitou areas, including the islands of Ré, Oléron, Madame and A. 1,668,926 sq. m. Surfaces in general flat, one-fourth consisting of marshes drained and cultivated, formerly sources of disease and death now healthful and productive. Soil chalky and sandy fertile, and well cultivated and a considerable portion planted with vines. The lands have a superficial layer resting on a subsoil of chalky and friable tuff are called *champs de tuff* and furnish the best wine for distillation. The pastures are good, and well stocked with cattle, horses and sheep. Along the coast are extensive salt marshes, from which an immense quantity of salt is produced. The extent of coast, including the E. bank of the Gironde is about 100 m. on which are numerous bays, several ports, and good roads. The principal rivers that traverse or bound the department are the Charente, Gironde, Sèvre, Boutonne, and Sèvre Niortaise, all of which are navigable, as well as the canal of Bourdeaux and that between Niort and Rochelle. The climate in general is temperate and healthy, but the districts of Marais, Rochefort and Rochelle are subject to fever and rheumatic affections, arising from the exhalations of the neighbouring marshes. The produce consists of grain of all kinds more than sufficient for the consumption of the inhabitants. The wine is of common quality and chiefly used for making brandy. Game is plentiful and large flocks of wild fowl frequent the marshes. Oysters and sea-urchins abound on the coast. Salt and brackish are the only articles manufactured to any great extent. Wool, leather goods, luxury leather, pottery and sugar are also made and shipbuilding is carried on in the seaports, where vessels are equipped also for the cod-fishery. Principal towns—Rochefort, Marennes, Marianne, Saintes, and St. Jean d'Angély. The department is divided into six arrondissements, containing 29 com. and 460 com. Pop. (1846) 468,103.

CHARENTON-LE-PONT a town, France, dep. Seine, 4 m. S.E. Paris, r bank, Marne, near its confluence with the Seine. It is divided into two communes, one of which containing a lime-works, with accommodation for 400 patients, was called Charenton-le-Pont, till 1842, when its name was changed to St. Maurice by royal ordinance. The town owes its name to a bridge across the Marne, which has always been considered one of the keys of the capital and the frequent scene of conflict when Paris was approached by its enemy. The present structure consists of 30 arches, and was built in 1714. Soap, chemical salts, and porcelain, are manufactured here. Pop. 2804.

CHARFIELD par Eng. Gloucester 1869 ac. Pop. 516. **CHARFORD**, two par. Eng. Hants.—1, (North) 570 ac. Pop. 63.—2, (South), 358 ac. Pop. 71.

CHARIKAR, a town, Afghanistan, Kohistan, 31 m. N Cabul lat. 35° 2' N lon. 69° 5' E. It is one of the most flourishing, as well as one of the largest towns in the Kohistan or hill country having a large trade in the coarse cotton cloths manufactured throughout the district, and as iron, both in pigs and manufactured into horse shoes. It has also a considerable transit trade to Turkestan and Central Asia. It contains a bazaar about 400 yards in length, and is well covered to exclude heat. At the entrance of the town is a large masjid, the residence of one of the great chiefs of the country. Charkar is the place of residence, also, of the Hissar or Governor of the Kohistan and duties are levied here on merchandise passing between it and Turkestan.

CHARING par Eng. Kent 4551 ac. Pop. 1891. **CHARITE** (La), a town, France, dep. Nièvre, 15 m. N N W Nevers, r bank, Loire. It has a fine bridge across the Loire, and a port on that river. The streets are good, but the houses indifferently built. There are here manufactures of iron goods and tools, files, steel, metal buttons, etc. with dyers, glassworks, potteries, distilleries, vineyard-works and tanneries. Trade—wheat, wine, wool, charcoal and hemp, sheep, anchors, etc. and it is the entrepot for the iron of Berry. Pop. 4521.

CHARJUI or **CHARROOK**, a town, Bokhara, 1 bank, Oxus, 70 m. S.S.W. the city of Bokhara, on the high road to Persia lat. 39° 5' N lon. 63° 40' E. Pop. about 600.

CHARKOV See KRAKOV. **CHARLBURY** par Eng. Oxford 11,320 ac. P. 8171. **CHARLHOLM**, par Eng. Somerset 371 ac. Pop. 34.

CHARLOTTE par Eng. Warwick 2190 ac. Pop. 286. **CHARLTON** a hamlet and fortress, France, N.W. frontier dep. Ardennes. The works of Charleroi and Givet occupy both banks of the Marne, about 75 m. S. Namur at the junction of several rivers on a steep hill, and completely command the river. Charleroi rises from a narrow rock, 400 ft. high, and the only side on which an attack can be apprehended is defended by six bastions, a horn, and crown works, and several detached works.

CHARLEVOIX a town, Belgium, par Eng. Hulsant, 20 m. S. by E. Brussels, on both sides of the Sambre, the low town standing on the S. and the middle town and high town on the E. bank. The last stands apart, and is regularly and strongly fortified. Charleroi is the seat of a court of first resort, and possesses a college, an academy of design, a commission of agriculture, an hospital and several primary and other schools. The only public building deserving notice is the parish church which is handsome, and was built by Louis XIV. The town is well suited for manufactures and trade, being the centre of an extensive and valuable coal field, and having ample means of communication by railway, canal, and good roads, with the surrounding districts and the most important towns of the kingdom. It has considerable manufactures of cloth, cutlery, soap, and tobacco, numerous glass-works chiefly for window glass several forges, extensive nail-works, sugar-refineries, dye-works, brick works, limekilns, and foundries, at some of which ordnance is cast, and steam engines are made. The chief exports may be said to consist of coal, iron, and soap. Pop. 5575.

CHARLES, two par. Eng. Devon—1 2429 ac. Pop. 844.—2 (St. Martin) 1737 ac. Pop. 19,548.

CHARLES (Cape)—1 The most E point of Labrador lat. 53° N lon. 55° 30' W.—2 A cape, U. States, Virginia, forming the N part of the entrance to Chesapeake Bay lat. 37° 18' N lon. 75° 45' W.

CHARLES ISLAND—1 One of the Galapagos lat. 1° 15' 34' E. lon. 90° 51' 45' W. (a) 29 m. long N to S. and about 15 m. broad. Like all the other islands of this group it is of volcanic formation. The settlement on this island is 1000 ft. above the level of the sea.—2 A small of the S coast of Mythenberg; lat. (S point) 78° 13' N lon. 11° 55' E (N.)—3 A small N. America Hudson's Strait lat. (E. point) 62° 44' N lon. 74° 18' W (a.)—4 A small British N. America, in the Gulf of St. Lawrence, near its N coast lat. 50° 12' N lon. 69° 16' W. It is 3 m. long, and 1½ m. broad. On its N side it has a small though commodious harbour.

exp. La St. Thomas, one of the Virgin Islands, belonging to the Danish. It has the island, with a large factory at its extremity. It has an excellent harbour fit for all kinds of shipping, and in which whole fleets may lie secure, and land-locked from all winds. The town is defended by a citadel and batteries. It contains several churches belonging to many different religious denominations and is a considerable entrepot for goods for the neighbouring islands. The W India mail steamers call regularly. Pop. (1847) 10 000 of which nearly a fifth are slaves.

CHARLOTTE (Queen) ISLAND.—1. One of the Low Archipelago, 8 Pacific lat. 1° 16' S lon 138° 43' W [n.] discovered by Capt. Wallis in 1767. It was visited again by Capt. Beechey in 1826, who reports that the coral had so grown up, that no lagoon could be perceived in the centre and not a single specimen was to be seen of the numerous cocoa trees found by Capt. Wallis.—2. A group of isls. S. Pacific between lat. 10° and 12° S. and lon 163° and 168° E. Five or six of them are of considerable extent, the remainder small. The largest, Santa Cruz, is about 30 m. long E. to W. and about half a mile wide. They are all of volcanic formation, and of them the volcano, lat. 10° 23' 30" S lon. 163° 36' E. is still in a state of activity. The islands are generally well wooded, and very populous. They produce the cocoa nut, the bread fruit and all the products of the Friendly Islands. The labourers are good-natured but given to theft. It was on one of these islands Mallicote, that La Perouse the celebrated French navigator was wrecked and lost with all his crew. Queen Charlotte's Islands were discovered by Mandans in 1803.—3. A large isl. off the W. coast, N. America (see *St. James* lat. extreme 4. point) 51° 55' N lon 181° 10' W 10 m. long and about 30 m. average breadth throughout three-fourths of its length N to S the remainder tapering rapidly to a mere point. Area, estimated at 5000 sq. m.—4. An isl. N. Pacific, Ocean Gilberts group lat. 1° 54' N lon 179° 45' E. (n) It is a low-lying island length N. E. to S. W. 16 m. average breadth 5 m. On the E. side the land is covered w. coco-nut and pandanus groves, with some undergrowth. The N. W. and W. side is a continuous reef 4 or 5 feet above the water's edge on which are many islets. About the centre of the reef S. W. side, is a slip of channel into the lagoon, which is half a mile wide. Water the only thing in the way of supplies to be obtained here, is flat and brackish. There are a number of towns on the island which appear to be thickly inhabited. It is also called Apia.

CHIA LAI TEBNUIG a. to Prussia priv. Brandenburg 1. rank, Speer, 5 m. W. Berlin. It consists mostly of villas and taverns being much resorted to in summer by the citizens of Berlin. There is here a seat of the King of Prussia built by Frederick I. who married Sophia Charlotte, daughter of George I. of England after whom the town was named. The palace has beautiful gardens attached at all times open to the public and an extensive orangery. Within a small Doric temple in the garden are deposited the remains of the late beautiful and unfortunate Louisa, Queen of Prussia, over which is a monument by Rauch—the figure of the Queen resting on a marble sarcophagus—estimated one of the most successful efforts of modern art although, remarkably cancelled by another statue of Louisa, executed 15 years later by the same artist, in the royal gardens at Potsdam. There are some manufactures of cotton and woollen stockings here, also a spinning-mill and bleaching grounds. Pop. 3269.

CHARTREUSE par. Eng. Surrey 7000 ac. Pop. 1320. CHARTREUSE or CHARTREUSE-DE-MONTELLA, a. to France dep. Isere, 16 m. N. W. Epinal 1 bank Moselle here crossed by a bridge of 10 arches. It has a Gothic church, ornamented with painted glass, in good preservation. A hand some public fountain and manufactures of lace, khachwater and leather with trade in grain wine wood &c. Pop. 5011

CHARTREUSE par. Eng. Dorset, 4098 ac. Pop. 908. CHARTMOUTH par. Eng. Dorset; 518 ac. Pop. 564. CHARNÉUX a. vil. and com. Belgium, prov. Liège, 9 m. N. W. Verrieres. It has manufactures of cloth, two breweries, two worsted, and four flour mills. In the environs are the remains of the old abbey Val-Dieu. Pop. 2557.

CHARO [anc. *Malitang*] a. in Mexican confederation, state of Michoacan at the foot of the Sierra Otzacumli, upwards of 6000 ft. above sea level. It carries on a considerable commerce. Pop. 8800.

CHAROLAIS (anc. *Agus Quadrifidus*) a small dist. France, belonging to the old province of Burgundy and now included in dep. Saône-et-Loire. Its capital was Charolles.

CHAROLLES a. in France, dep. Saône-et-Loire, 38 m. N. W. N. W. Macon, at the confluence of the Semence and Arconce. It is well built and has a court of first resort, and of commerce, an agricultural society, communal college, public library 1st manufactures tile-works, lincolns and a plaster mill and iron-works in the vicinity. Trade in grain wine wood iron coal and cattle. A hill above the town is crowned by the picturesque ruins of the castle of the Counts of Charolles of which prov. Charolles was capital. Pop. 2226.

CHARONNI (Italy, *Charona*) a. vil. France close upon the barrier of the faubourg St. Antoine, and, properly only a suburb of Paris. It contains a very ancient church and a school of arts and has manufactures of stained paper refined wax wax candles, paints, and chemical products. Pop. 5435.

CHARSFIELD par. Eng. Suffolk 1230 ac. Pop. 611. CHARSILMBA or T. CHARSILMBA a. to Anatolia Turkey push Roum dist. Djanikly r. bank, and 10 m. from the mouth of the Jekil trunk on the Black Sea lat. 41° 11' N lon 36° 40' E. The greater number of the houses are surrounded by gardens and the land in the vicinity is fertile and well cultivated.

CHART three par. Eng. Kent.—1. (Free) 8281 ac. Pop. 14.—2. (Little) 15 8 m. Pop. 296.—3. (West-Batton) 2073 ac. Pop. 605.

CHARSTILMBA or T. CHARSILMBA a. to Anatolia Turkey push Roum dist. Djanikly r. bank, and 10 m. from the mouth of the Jekil trunk on the Black Sea lat. 41° 11' N lon 36° 40' E. The greater number of the houses are surrounded by gardens and the land in the vicinity is fertile and well cultivated.

CHARTRES (anc. *Audunensis* *Carolis* *Carorum*) a city France, cap. dep. Eure-et-Loire, 49 m. N. W. Paris lat. 48° 7' N lon 1° 29' E. situate on the slope of a hill at the foot of which flows the Eure and partly enclosed by walls and ditches surrounded by ramparts planted with trees, which form an agreeable promenade. One branch of the river runs inside, and another outside of the ramparts of the lower town. Most of the houses are built of wood and plaster and have their gables toward the street. The streets are narrow and crooked and so steep in some parts as to be inaccessible to carriages. There are several public squares, one of which is of gr. at extent. The only public buildings of note are the cathedral the church of St. Peter, contiguous to a huge barracks once a Benedictine abbey and the obelisk to the memory of General Marceau. The cathedral one of the most magnificent in Europe is rendered conspicuous by its two spires, one of which is 408 ft. high surmounting the hill on which the city stands. It has fully 180 windows filled with stained glass, of admirable workmanship and in the choir Henry IV. was crowned in 1594. Chartres is the seat of a bishopric, court of first resort, and of commerce, communal college, seminary and agricultural society and has two hospitals, a cabinet of natural history botanical garden and a public library containing 40 000 volumes and 800 MSS. Manufactures—woollen, linen, hats, earthenware and leather. It is also celebrated for its game pie. A large trade is carried on in grain, wool, cattle, game, clover-seed, and wood. The largest weekly game markets in France are held here and the business usually does not occupy more than three-quarters of an hour. The measuring and selling of the grain, and receiving payment for it are managed by an ancient corporation of women, remarkable for their integrity and implacably trusted by the owners. Chartres was the capital of the Carmanes, and considered the capital of Celtic Gaul at the time of the Roman invasion. Towards the end of the 11th century it was fortified and in 1445 St. Bernard preached in its cathedral the first crusade. Pop. (1846) 15,804. CHARTREUSE (La Grande), a celebrated monastery France, dep. Isere 18 m. N. E. Grenoble, in an extensive meadow in the wild valley of the Quier 2590 ft. above sea

level, surrounded by the mountain forests of the Alps. It was founded in 1094 by St. Bruno, near the village of Charvonnay, the name of which he gave to the order of the Chartreux. Until the Revolution of 1793, it was the head quarters of the order of the Chartreux. The present buildings were erected

MONASTERY OF GRAND CHARTREUX.—From Yverdon (see 1) A. Indivert, France.

in 1678 after the monastery had been for the eighth time destroyed by fire. They are of great extent, but are more remarkable for the solidity than the beauty of their architecture. Previous to 1789 the monks were owners of many villages but the Revolution of 1793 stripped them of their possessions, and all that remains to them is a garden the right of cutting forest wood, and pasture for their cows of which they have about 50. Some of the monks who were driven out by the Republicans returned in 1818, when the buildings that had escaped entire destruction were restored. Near the Grande Chartreuse is a remarkable grotto called the Tron-de-Glace or Glass (ice-hole) from ice being preserved in it for the whole year. It is 727 ft. long, and contains very large transparent stalactites.

CHARWELTON pop. 281. Northampton 234° 40' N.

CHARYBDEI, a whirlpool near Messina. See SCYLLA and CHARYBDEI.

CHARGO or SHINGO a water of the Afghaniestan with a mud fort, in a fertile spot, 13 m. N. Ghazni, and on the route thence to Cabul 8697 ft. above the sea lat. 33° 45' N. lon. 68° 27' E.

CHIAHSHI LOU DOO or THEROON-LOOONON a tn. Tibet 100 m. W. by S. L. Hissa or Lassa lat. 21° 40' N. lon. 89° 5' E. (L.) on a plain surrounded by high sterile mountains. It is properly a large monastery consisting of 800 or 400 houses, the inhabitants of the Buddhist monks, besides temples, mansions and the palace of the Tesho Lama, who resides here. Its buildings are all of stone and some less than two stories high, flat roofed and covered with a parapet

running considerably above the roof, composed of boughs and brushwood. Above 4000 ft. and suna perform daily their devotions here. A large manufacture of liquors is established at which the most skilful workmen are employed but there are few laymen except the servants of the Lama. A Chinese functionary resides here to watch the proceedings of the priests. Some hundred mendicants from India and Nepal are also maintained by the Lama at the public expense.

CHASTLETON pop. 230. Oxford 1769 ac. Pop. 230. CHAT or CHATEAU CAPE, a round projecting headland Lower Canada, S. side the estuary of the St. Lawrence lat. 46° 1' N. lon. 68° 50' W. A small river of same name falls into a bay 4 m. E. the cape.

CHATEAU (Lac) or CHATEAU d'OLRON a tn. France, dep. Charente-Inférieure, 6 m. W. S. W. Marennes, on the S. E. extremity of the ul. of Oléron. It is a place of some strength, ranking as a fortress of the third class has buildings, batteries, and rope-works and carries on a trade in corn, maize, wine, brandy salt, &c. Pop. 1314.

CHATEAU-CHIRON (anc. Castrum Caudion) a tn. France, dep. Nièvre 29 m. E. by N. Nevers, near L. bank Yonne, formerly defended by a castle, and surrounded by double ditches, of which some vestiges still remain. The present town is tolerably well built, on the summit of a hill. It has a court of first resort; an agricultural society manufactures of coarse woollens and flannels large tanneries and a considerable trade in wood and charcoal for the supply of the capital leather wool, grain, horses, and cattle. Pop. 1944.

CHATEAU D'OL (Swiss, Olk, anc. Castrum Olon) a tn. Switzerland, cant. Valais, chief place of the dist. Enchaub. Romand r. bank Sarine, 23 m. E. Lausanne. Here are the ruins of an old castle of the Counts of Gruyère. Important cattle fairs are held. In 1812 a considerable sum was left to the parish by two brothers named Henschel, to endow a higher kind of school at which the youth of the Alpine districts might obtain an excellent general education 1 op. 2010 mostly Calvinists.

CHATEAU DU LOIR, a tn. France, dep. Sarthe, 24 m. S. E. Le Mans, near r. bank Loir. It consists of one straight street, from which numerous small crooked and steep streets run in different directions, has two squares a Bonaparte-Ville, the centre of a considerable manufacture of fine linen employing about 800 looms in the neighbouring communes. There are also cotton-mills and tanneries. Trade in grain cloverseed, hemp flax chestnuts, game poultry cattle, and wine of the district. Pop. 2746.

CHATEAU GOMBAUX a tn. France dep. Mayenne 18 m. S. E. Laval on the Mayenne, here crossed by a stone bridge concerning the town with its municipal authority, on the opposite side. Its houses are well built, but the streets are all laid out. It has a court of first resort, an agricultural society and communal college and linen and large manufactures, bloodfields tanneries with some trade in cloverseed linen, thread, iron wood wine, &c. 1 op. 6454.

CHATEAU LAMON a tn. France, dep. Seine-et-Marne 15 m. S. Fontainebleau 1 bank Sozay. It has in a fort 116 m. S. E. three churches and in the 12th century was occasionally the residence of the French Kings. Cons of Charles the Fair (Louis XII) 1414 1. Louis VI. and VII. were struck here. It manufactures woolen, and has some trade in grain and wine. Pop. 3420.

CHATEAU FOMEN (Lain. Castrum Fomen) a vil. France, dep. Ardennes, 26 m. S. W. Metz, partly r. bank Aisne and partly on an island formed by that river. On a steep rock overhanging the town are a donjon tower and some fragments of walls forming all that remains of an ancient strong castle. The manufacture consists of serge, flannel, muslin, and cambric. There are also cloth mills in work and several tanneries. In a hill N. E. of the town, the foundations of walls, Roman coins, and other antiquities, have been discovered. Pop. 2656.

CHATEAU RENAUD (two tns. France)—1 A tn. dep. Bouches-du-Rhône 11 m. N. E. Arles, 1 bank Durance with two towers the remains of a castle of the 12th century. In the vicinity are limekilns. Pop. 1696.—2 A tn. dep. Loiret, 10 m. S. E. Montargis. It had at one time a castle, and was fortified, but having become a stronghold of the Protestants during the wars of religion Louis XIII. ordered the works to be demolished in 1627. It has manufactures of cloth for the troops and some trade in linen, wool and stuff. Pop. 1447.

CHATEAU RENAULT a tn. France dep. Indre-et-Loire 10 m. N. E. Tours, agreeably situated at the foot, and on the slope of a hill, in a beautiful country. It is traversed by the Aisne, has narrow and irregular streets and possesses an old castle from which it derives its name built in 961, and still in good preservation. It is famous for its leather and has also manufactures of woollen cloth, serge and silk. 1 op. 80° 9.

CHATEAU SALINS, a tn. France, dep. Meurthe, 18 m N.E. Nancy, r bank, Petite Scille. It has seven towers and remains of its ancient fortifications. It originated in some salt-works established here in 1330 and a castle built soon after by Isabel of Austria. The Government manufactory of salt carried on here was abandoned in 1826. There are here manufactures of glass, leather and knitted hosiery with some trade in sucking and plaster. Pop. 2521.

CHATEAU THIERRY a tn. France dep. Aisne, 28 m. S.W. Laon, r bank Marne, on the slope of a hill the rocky summit of which is covered by the ruins of the old castle of Thierry said to have been erected by Charles Martel in 730. A considerable suburb extends along the left bank of the Marne, communicating with the town by a stone bridge of three arches. Another suburb along the Soisson road is separated from the town by an ancient gate. It is the seat of a court of first resort, and communal college and has manufactures of linen, cotton yarn, dye-works, and potteries, with a trade in grain, wine wool agricultural stock planter glass-stones, &c. A sheep fair is held annually at which about 50,000 are sold. In February 1814 the town was the scene of several conflicts between the Allies and the French troops. During the Revolution of 1793 it bore the name of Egalité-sur-Marne. La Fontaine was born here in 1621 and a handsome statue has been erected to his memory. Pop. 4147.

CHATEAU VILLAIN or VILLE NEUVE AUXOIS (Latin *Castellum Villanum*) a tn. France dep. Haute-Marne, 11 m. S.W. Chaumont, r bank Aube. It was once surrounded with walls flanked with towers, and still contains an old ruined castle. It has manufactures of leather and a trade in horses and cattle. There are blast-furnaces, and other iron-works, in the neighbourhood. Pop. 1930.

CHATEAUBRIANT a tn. France, dep. Loire Inférieure, 36 m N.E. Nantes, on the Cher. Some remains of the old castle or chateau, built by Brant Count of Penthièvre, in 1012 and from whom the town derives its name, still exist. Its houses are irregularly built in bad taste and are old. It has a court of first resort an agricultural society manufactures of woollen goods, earthenware tiles and leather with a considerable trade in cattle, grain, wood &c. It is famous also for its conserves of liquor &c. Pop. 3068.

CHATEAULUN a tn. France, dep. Eure-et-Loir, 26 m S.W. Chartres, near r bank Loue. Its streets are straight and terminate in a square, from which a complete view of the town may be obtained. It has a court of first resort, an agricultural society communal college and a small public library. The Hotel de Ville and college buildings are deserving of notice. The old castle of the Counts of Dunois overlooks the town. Chateaulun has manufactures of blankets and large tanneries, and some trade in agricultural produce. Pop. 5756.

CHATEAULIN a tn. France dep. Finistère 14 m N. Quimper on the Aulne which divides it into two parts, and forms a port for vessels of 60 or 80 tons. It is still built and some remains of the old castle of the Bishops of Chateaulin and in the vicinity a mineral spring and two intermittent fountains. It is the seat of a court of first resort, and has an agricultural society and a trade in cattle, fish, butter, iron, lead, slates &c. Salmon and caride fishing is prosecuted. Pop. 1523.

CHATEAUMELLANT (Latin, *Castellum Mellicianum*) a tn. France, dep. Cher 86 m S.W. Bourges in a beautiful district, on the small stream Sologne. It is a place of great antiquity and contains the ruins of an old castle, consisting principally of two large towers, and a number of octagonal turrets, decorated with fine sculptures and curious arabesques. The trade is almost confined to chestnuts. There are nine annual fairs. Pop. 1710.

CHATEAUNEUF-DE-BANASS a small tn. France, dep. Lot-et-Garonne, 12 m N.E. Meauce on a hill. It was formerly fortified and is celebrated for the ages sustained by the English garrison in 1890 against the troops of Charles V. commanded by the valiant Duguesclin. During this siege, the English Governor who had been hard pressed, promised to surrender to Duguesclin at the expiry of 15 days, if no succor arrived. Shortly after, and before the expiry of the time agreed on, Duguesclin died, whereupon the Marshal de Biron, announced the Gu error who replied that he had given his

word to Duguesclin, and would yield to no other; and when informed of the hero's death, he said, "Then I will carry the keys to his tomb." Accordingly the Governor sallied forth with the garrison to Duguesclin's tomb, and on his hand-kissed, laid his sword and the keys of the town on the bier. In 1830, a simple commemorative monument was erected at the hamlet of Blazillac, on the spot where this event occurred.

CHATEAUNEUF-SUR-CHARENTE (Latin, *Castellum Novum*) a tn. France dep. Charente, 12 m S. by W. Angoulême, on a fertile district, l bank, Charente. It was once a place of strength and was in possession of the English about a siege of four years by the French, but was ultimately taken. It has some trade in cattle, wine, brandy, salt, and ship timber. It has also a monthly fair. There is a remarkable skeleton grotto in the vicinity. Pop. 1798.

CHATEAUNEUF-SUR-CHER a tn. France dep. Cher 16 m S.S.W. Bourges. It stands on an island formed by the Cher and was once defended by a strong castle of which only some vestiges now remain. Its trade is in wine, horses and cattle. Pop. 3041.

CHATEAUNEUF-SUR-LOIRE, a tn. France dep. Loiret, near r bank Loire, 16 m E. Orleans. It has manufactures of woollen cloth and refiners of beet-root sugar. Pop. 2748.

CHATEAUXOUX a tn. France, dep. Indre 144 m S.S.W. Paris, in an extensive plain l bank, Indre lat 46° 48' 50" N. lon. 1° 40' 51" E. It was formerly a miserable-looking place but has been greatly improved since 1820. It has straight broad and tolerably well paved streets, and spacious squares. A Hotel de la Tréfecture, Hotel de Ville, public library, modern theatre, Gothic church, public gardens and some fine promenades. It is the seat of a court of first resort, and of commerce consisting of number of manufactures societies of arts, sciences, and agriculture, communal college and normal school. The cloth manufactures in which the wools of Berry are almost exclusively used, are extensive, employing about 2000 workmen. Cotton, woollen yarn, tiles, paper and parchment are also made and there are tanneries and dye-works. There is likewise a considerable trade in grain, wine, iron, leather, poultry, and cattle. The town owes its origin to a castle built in 850 by Raoul de Larche, of Deols, still in a tolerable state of preservation. It was considerably extended in the reign of Louis XIII. who constituted it a duchy in favour of the descendants of Henry II of Bourbon, Prince of Condé. Charles of Bourbon sold it to Louis XV. who conferred it on one of his mistresses, at whose death it returned to the crown. During the Revolution of 1793, it was called Indre-Ville. Pop. (1846) 18,554.

CHATELLET a tn. Belgium, prov. Hainaut 4 m E. Charleroi, r bank Sambre. It has manufactures of pottery which bear a high name, nails common cloth and other woollen and cotton stuffs, tanneries, a salt-refinery and a brewery. Its trade with the neighbouring towns and provinces is considerable and it has three weekly markets, a monthly cattle, and other four annual fairs. Pop. 2859.

CHATELLERAULT a tn. France dep. Vienne, 20 m N.N.E. Poitiers, r bank Vienne which here begins to be navigable. On the opposite bank is a suburb connected with the town by a handsome stone bridge, at one end of which is a castellated gate formed of four large towers, said to have been built by Sully. The old walls and fortifications have been converted into promenades. The town is ill built, but has some good public edifices, among which are several churches, a theatre, public fountain, and the royal manufactory of swords and bayonets. The manufacture of cutlery has long been carried on here to a great extent, employing about 800 families. Jewellery hardware, and lace are also manufactured and there are bleaching grounds for wax and linen. The river port gives rise to a large trade in grain, linen, brandy, clover and horse seed, fruit, hemp, silk, iron, steel, slates, slaves, and millstones, of which this town is the entrepôt for an extensive district. It has a court of first resort, and an agricultural society.

The duchy of Châtelleraut was bestowed by Henry II upon James Hamilton, second Earl of Arron, Regent of Scotland, 1546, to induce him to consent to the projected match between his ward, the infant Queen Mary and the Dauphin Francis. The deed title is still possessed by the Duke of Hamilton. Pop. 9738.

CHATELAIN, a th. France, dep. Bas Rhin, around Scheldt, about 26 m. S.W. Strasbourg. It stands at the foot of the Vosges, overlooked by the imposing ridge of an ancient castle which covers a lofty mountain covered with forests. Its manufactures consist of cotton goods and paper. There is a mineral spring in the neighbourhood. Pop. 1860

CHATHAM, a naval arsenal and seaport, England, co. Kent. The town lies on the Medway about 59 m. S.E. London, adjoining Rochester so closely as to form rather a suburb of that city than an independent town. A great portion of it is irregular and ill built, and the houses, many of which are of wood, have a mean appearance although considerable improvements have taken place of late years. The parish church, built in 1788, is a plain brick structure a more modern

branch of trade connected therewith. The dockyard, and upper and lower barracks are situated within a few streets of the city. By the Reform Act, Chatham was united with Rochester in returning members to Parliament, but now returns a member itself registered electors (1850) 1357. The Rochester station of the Gravesend and Rochester Railway is 1 m. from the town. Pop. of par. exclusive of the barracks, hulks, and hospitals, 23,399.

CHATHAM a m. Upper Canada, pleasantly situated on bank Thames 12 m. from its embouchure in Lake St. Clair and 66 m. S.W. London. It exports agricultural produce, timber &c. Pop. (1852) 2070.

CHATHAM BAY a bay U States, S.W. coast Florida, in the Gulf of Mexico extending 75 m. from Cape Romano on the N to Cape Sabel on the S. It receives the Suwannee, and Calumet rivers.

CHATHAM (Clark) S. coast Australia lat. 34° 28' S. lon 118° 28' E. (p.)

CHATHAM ISLANDS — 1. A group of three islands, S. Pacific Ocean.

The largest or Chatham Island the native name of which is Ware-Kauri lat. (S. point) 44° 7' S. lon 176° 49' E. (W.) is between 800 and 850 m. E from the N. E. coast of the middle island of the New Zealand Islands, and is from 80 to 90 m. in circumference. The other islands are Harp, Harte or Pitt Island, 12 m. long by 8 broad and Ranga Tira or South East Island, a narrow rock. Between 10 and 12 m. N from the W end of the larger island and on the 177th meridian are two pyramidal rocks called the Two Sisters, about 100 ft. high, covered with mossy bushes and frequented by several numbers of sea birds. The land on the N. side of Ware Kauri is undulating of small levelling, and clothed with verdure to the water's edge. The N. shore, especially to the W. is flat, and the head lands of the bays run out in long wooded tongues of land. The S. shore is abrupt and precipitous, but the land on the

one was erected in 1821 there are, besides, several Dissenting chapels, two national schools, a British school for boys and girls, and two infant schools and a mechanics institution two public subscription libraries an hospital for decayed seamen, and three or four minor charities. But the great attractions of Chatham are the naval and military establishments at Brompton in its immediate vicinity. The arsenal, storehouses, and dockyard cover a space of ground nearly a mile in length. In the latter are five wet docks capable of receiving vessels of the largest class, six building slips and about 500 houses for the accommodation of the various artificers employed in the works. In the smitheries, anchors are manufactured of five tons weight and in the rope-house, cables of 100 fathoms in length and 25 inches in circumference. The navigable course of the Medway that is between Chatham and Sheerness, is only about 10 m. yet the water is deep enough to carry the largest ships up to the former place, an advantage to which great importance and prosperity. The barracks consist of the lower or common barracks, the upper or Brompton barracks, and the new or artillery barracks, with a park of artillery. The artillery hospital contains wards for 100 patients. Here is also, a school for engineers in which young officers and recruits are instructed in a practical knowledge of their duties. The convict establishment, which usually contained 900 to 1000 convicts, was removed several years ago. Immense quantities of every necessary for naval equipment are accumulated here, with machinery of every kind suitable for the various processes and operations required, and all of the most improved description, and so complete is the system adopted, and the care, promptitude, and despatch observed in all the different departments, that a first-rate ship of war may be fitted out in a few days. In the time of war about 3000 artificers are employed in shipbuilding, and repairing and in the other

branches of trade connected therewith. The climate is mild and agreeable, and the air cool and moist. The soil is in many places fertile, and produces potatoes of superior quality but corn cannot be grown in consequence of the vast numbers of parrots by which the island is infested, and which destroy the grain before it is ripe. Turneps, cabbages, pumpkins, and tobacco are successfully cultivated. The creeks and shores abound in fish, many of them excellent sharks, of formidable size are numerous. The original inhabitants, now nearly extinct, were a cheerful and good-natured race. About the year 1830 they amounted to 1200 in 1840 their numbers, according to Dickson, were under 50. The destruction of this unfortunate people is attributed to the cruelty and tyranny of the New Zealanders who found their way here in large numbers some years ago and, by the superior energy and ferocity of their character soon became masters of the ill-fated and despotic natives. The present population consists chiefly of New Zealanders and of persons from E. Cape and Port Nicholson. The island has now a very

bad reputation, though, says Commander Stokes, "considered as a nest of rogues, several vessels having been robbed there. The Chatham Islands were discovered by Lieut. William Robert Broughton, of H. M. brig *Chatham*, and taken possession of by that officer in the name of his Britannic Majesty Nov. 23, 1791. — *Dr. Duffinbach*; *London Geo. Jour.* vol. 11, p. 190. *Ross's Antarctic Voyages*. U. S. *Exploring Expeditions*. — 2 Anvil W coast, Patagonia, between Hanover Island and the mainland. N. lat. 50° 30' S. lon. 74° 30' W. It is about 30 m. long, and about 10 broad. — 3, *Chatham*, or *St. Clement's Island*, one of the Galapagos.

CHATELLOUX SUR INDRE, a tn. France, dep. Indre, 57 m. N.W. Chateauroux near l. bank, Indre, on a height crowned by the ruins of an old castle. The church built about the 10th century is remarkable for its antique sculptures and the market-place commands a fine view of the Indre valley. Coarse woollen goods are manufactured. Pop. 2507.

CHATELLOUX SUR LOIRE, a tn. France, dep. Loire, 45 m. E. by S.E. Orleans, agreeably situated in a valley on the river and canal of Loing. Admiral Coligny who was assassinated during the massacre of St. Bartholomew was born in an old castle which overlooks the town, and in the chapel attached to it his tomb is still to be seen. In 1648, the town was erected into a duchy in favour of the Admiral's grandson. Some trade in wool and charcoal. Pop. 2019.

CHATELLOUX SUR LOIRE, a tn. France, dep. Loiret 1 bank, Loire. 45 m. S.E. Orleans with some trade in wool.

Marble and building stone are quarried in the vicinity. P. 2303. **CHATELLOUX-VALENTIGNEY** a tn. France, dep. Côte d'Or 45 m. N.W. Dijon, on the Seine. It is well built, clean, paved and rapidly increasing. Has a *Hôtel de Ville*, palace of justice, several old churches, a public library hospital college, and an old castle, surrounded by a beautiful park, through which flows the Seine. It has a court of first resort and of commerce, manufactures of cloth, serges, and then iron furnaces, forges, paper works, tanneries and breweries grain, tanning, and bark mills wax bleaching grounds, and distilleries with some trade in iron, wool, leather and gut skins. Pop. 4611.

CHATELRE (L.) a tn. France, dep. Indre 21 m. S.E. Chateauroux, r. bank, Indre. Its streets are irregular but the general aspect of the town is agreeable. It has a pretty parish church and a public fountain, a court of first resort, and communal college. Manufactures of cloth some extensive tanneries, and a considerable trade in wool cloth, was goat skins quills and cattle. Pop. 4078.

CHATELRE or BRATZ a tn. Russia, gov. of and 65 m. N.W. Tashov in a fertile plain on the Chataia. It contains five churches, and has some trade in grain cattle, wool and hemp. Pop. 6500.

CHATTABOOCHEE, a river U. States, Georgia and Alabama, rising in the Appalachian Mountains, about lat. 34° 46' N. lon. 83° 30' W., and flowing first W and then S., and forming for a considerable distance, the boundary between the above states. In its lower course, after the junction of the Flint River from the E. it is named the Appalachian, and it navigable to Columbus in Georgia for steam boats. Total course, about 120 m.

CHATTERIS, a market tn. and par. England on Cam bridge, Isle of Ely. The town 18½ m. N. Cambridge, is well built, excellently kept, amply supplied with water and partially lighted with gas. It has a handsome parish church, and seven chapels belonging to Methodists Baptists Independents, and Friends national, British infant, and several private schools a literary institution, reading-room, and several charitable societies and a handsome cemetery. The inhabitants are chiefly employed in agriculture. A considerable town-market on Friday two fairs annually. Area of 16 1/2 1/2 sq. m. P. p. 5138. — (*Local Correspondent*).

CHATELPOUIL, a tn. Hindostan prov. of and 150 m. S.W. from Allahabad formerly a flourishing place and still possessing considerable manufactures of coarse cotton wrapper (old *See* *CHATELPOUIL*).

CHATTIN par. Eng. Northumb. 17 000 ac. P. 1760. **CHAI CHINA** a tn. Spain Andalusia, prov. of and 12 m. from Granada is an extensive but marshy plain. It is very poorly built. All the houses are of mud, excepting a few of more modern construction which are of brick, and the streets are so badly paved, as to be almost impassable in wet

weather. The market-places is of considerable extent, and among the buildings are a parish church in a dilapidated state, surmounted by a massive tower a consistorial house partly occupied as a prison, and several primary schools. A plentiful supply of water is brought into the town by an aqueduct but owing to the dampness of the locality intermitting fevers are frequent. Pop. 1744.

CHAUDÉPONTAIN, a com. and vil. Belgique, prov. of and 6 m. S.E. Liège, r. bank Tendre with mineral springs, known as early as 1850, and well frequented. Pop. 1073.

CHAUDÉPONTAIN (anc. *Calvetia Boni*) a tn. France, dep. Cantal 28 m. E.S.E. Aurillac, in a deep gorge at the foot of the mountains that separate Aveyron from the Gévaudan. The road leading to it from St. Flour is cut out of the granite rock for a distance of 5561 ft. On the right hand is the mountain, and on the left a precipice from 300 to 500 ft. deep, at the foot of which flows the Truyère. The town owes its importance to its hot mineral springs, of which there are 12 all having their sources in a volcanic mountain. The water of these springs has the property of discharging the grime from slabs of marble and a vast number of scrofulous sent hither from the department of Aveyron to be washed. From November to April the hot water is used for warming the town, being conveyed into the houses in wooden pipes the police seeing to its equal distribution. Some woollen goods and leather are manufactured here and there are glass works in the vicinity. Pop. 1422.

CHAUDIERE — 1 A river Lower Canada, which rises on the borders of Maine near the sources of the Kennebec lat. 45° 20' N. lon. 70° 51' W. and after a N. course of about 170 m. falls into the St. Lawrence, 8 m. above Quebec. Three or four miles above its entrance into the St. Lawrence, there is a remarkable estuary, of about 120 ft. perpendicular. — 2 A lake on the confines of Upper and Lower Canada, 18 m. long, and about 8 average breadth formed by an expansion of the Ottawa 6 m. below the falls des Chats. A strong current runs through it from N.W. to S.E.

CHALDWAR, an anc. city Hindostan, prov. Oude, near Cuddah now in ruins. The ruins extend for many miles but few are above ground below the mounds of temples. There are numerous reservoirs and the remains of temples. It is not known when or why this great city was abandoned. — (*Journal of the Asiatic Society of Bengal*).

CHAUFFAILE a tn. and com. France, dep. Saône-et-Loire 15 m. S. Chareilles. Before the Revolution it was an insignificant village, but has now become a thriving manufacturing town producing large quantities of calico, with which it supplies the markets of Reims, Beaune Lyons and Villefranche. It has also cotton spinning-mills. Pop. 5705.

CHAUMONT or CHAUMONT-DE-BELMONT a tn. France cap. Haute-Marne lat. 46° 47' N. lon. 4° 56' E (n.) 141 m. S.E. Paris, l. bank, Marne 13 m. above its confluence with the Seine. In general it is well built, with broad clean streets some of which however are difficult of access. The upper part of the town is surrounded by fine promenades. Water was formerly scarce and the inhabitants were obliged to use raw water collected in cisterns but a hydraulic machine now affords an abundant supply from the Seine. Among the public buildings are the church of St. John, the college with its chapel the hospital *Hôtel de Ville*, and a kind of triumphal arch consecrated under Napoleon, and finished under Louis XVIII. It has a court of first resort and of commerce, societies of agriculture arts and sciences a royal college, and a public library containing 35 000 volumes. The celebrated abbey of Val des Ecoliers, founded in 1212, was 2 m. from Chaumont. The manufactures of the town are considerable and consist of woollen hosiery ornamented with needlework leather gloves serges, druggists, common cloths, wax tapers, &c. There are also wool and cotton spinning-mills a wax bleaching ground tanneries, and a sugar refinery with a trade in iron cutlery gloves, tapers, brandy &c. On March 1 1814 the allied powers concluded a treaty here against Napoleon, 19 days before the capture of the Congress of Chaumont. This treaty formed the basis of what was afterwards called the Holy Alliance. Pop. 6604.

CHAUMONT a vil. France, dep. Haute Saône dist. Carouge, 9 m. S.W. St. Julien formerly fortified. Its castle, once the residence of the Dukes of Nemours was destroyed in the wars of the 16th century. Pop. 1000.

CHAUMONT-sur-Loire, a vill. France, dep. Lot-et-Garonne about 9 m. S.W. Blois, beautifully situated 1 bank Loire, at the foot of a wooded hill, crowned by an old castle of great extent, and most picturesque appearance. This castle,

THE CASTLE OF CHAUMONT. From France Magnanimous of Paris.

which is an irregular structure with machicolated towers built at different periods and forming three sides of a square was long the property of Catherine de Medici, who used to retire to it with her astrologers to consult the stars. It was occupied for some time by Madame de Sévigné.

CHAUNY a vill. France dep. Aube, 10 m. W by N from r. bank, Oise at the beginning of the St. Quentin Canal (one half of the town is situated on an island formed by the Oise, which is here navigable). It has manufactures of socking, worsted stockings, soda, sulphuric and nitric acids, cotton-mills, hydraulic machines for polishing the plates glass of St. Gobain large bleaching grounds and tanneries with a trade in grain, elder oil, timber, hosiery, cordage, coal, horses, and cattle. Pop. 3504.

CHAUSSEY a small en. English Channel belonging to France, dep. Manche, opposite Granville, 7 m. from the coast, lat. 48° 52' 13" N. lon. 1° 49' 10" W (n). Several smaller islands and rocks surround it, and the whole group is sometimes termed the Chausey Islands. It contains quarries of excellent granite, with which the wharves of the works about the harbours of Granville and St. Malo have been constructed. It is inhabited only in summer and by the quarrymen. It contains numerous numbers of rabbits.

CHAUX-de-Fond (la) a vill. Switzerland can. of and 9 m. N.W. Moudon, in a deep valley of the Jura, which is 3000 ft. above the level of the sea, and is traversed by the road into France. The district around it is extremely bleak, but the town is built well built and of considerable extent, most of the houses being new and handsome, and standing apart, surrounded by a piece of croft or garden ground. The parish church is elegant. The whole town, indeed furnishes one of the numerous examples in which Switzerland shows how well the hand of industry can compensate for the rigour of nature. A numerous community of monks and nuns on a soil barely adequate to furnish a tenth of its subsistence. The manufacture to which this pleasing result is chiefly owing is that of clocks and watches, and other forms of men and ingenious mechanism. The workmen generally carry it on in their own homes, and appear to be in comfort under all circumstances. In a recent year 108,236 gold and silver watches were made here. The subdivision of labour is well understood and each man confines himself to a particular piece of the work, while the finishing of the whole the gliding, enamelling, painting, &c. all form separate departments. The mechanists here, whose wonderful automata have acquired an European reputation, were born here. Chaux-de-Fond possesses two remarkable subterranean mills, which stand in an artificial hollow 66 ft. below the surface. The scenery around the town is exceedingly picturesque. Pop. 8500.

CHAVES [ann. *Agua Flavia*] a tn. and par. Portugal prov. Trás os Montes on the frontier of Spain, r. bank, Tago, here crossed by a Roman bridge of 18 arches, 41 m. W Braganza. It stands in a fertile valley of same name, and is a place of some strength, being defended by three forts. It has two suburbs, a parish church, two convents, two hospitals, an almshouse and bathing establishment, supplied by mineral springs. Its annual fair lasts three days. There are several other Roman antiquities besides the bridge. Pop. 8900.

CHELDUBA, or **CHELDUBA**, an isl. Bay of Bengal about 25 m. off the coast of Aracan lat. (W point) 18° 51' N lon. 92° 5' E. (a) It is 15½ m. long, and nearly the same in breadth. Area, somewhat under 200 sq. m. Its general appearance and character is that of a fertile, well wooded island of moderate height (8 peak, 1700 ft. high) and irregular outline. A level tract, of varying breadth extends around its coasts, within which the low undulating hills of from 50 to 500 ft. in height, but in the S part of the island several summits attain an elevation of about 1400 ft. The geology of the island presents some features of great interest. About 90 years since, a large portion of its present coast, with those of the adjoining country was suddenly elevated out of the sea by volcanic action, accompanied by a violent earthquake, which, however, did no damage. Other elevations had taken place at several previous periods, and at such equal distances of time (100 years) that the inhabitants look upon it as a periodical occurrence and contemplate, without alarm the recurrence of the phenomenon in a few years. There are several small volcanoes on the island some of which are in constant ebullition. Its minerals are of little value, with the exception of pyrites which is obtained in considerable quantities, and might be more extensively worked. Coal has also been found, but its quality is doubtful. The climate is extremely unhealthy to Europeans (although) instances of great longevity among the natives are far from being uncommon. The most agreeable season is between the end of October and the middle of March, during which time the air is temperate the least rarely exceeding that of England in summer.

The general character of the soil is that of a light grayish coloured clay mixed more or less with vegetable mould, and in some places with fine sand. Rice is the staple produce of the island, and is exported in considerable quantities. Tobacco, of excellent quality is a principal product and cotton, sugar and indigo are also grown to a small extent. Yams are large and good, and pumpkins, gourds, chilies, and chilies are plentiful, the last being in universal and daily demand for curries. Cattle and buffaloes are numerous, the former of a small breed but of good quality the latter in a domestic state, and chiefly employed in agricultural work. Domestic fowls, deer wild hog, and squirrels are plentiful. Bees abound, and yield excellent honey. The coasts are simply fringed with palm trees, a kind resembling the coconut, which is taken in great quantities, and, after being prepared, is exported to the mainland. Turtles are likewise common.

The population is, with trifling exceptions, entirely Mugh descendants of Burmese. In person, they are well proportioned, though generally small, they are a simple, honest and industrious race, frank in their manners, and of a cheerful and forgiving disposition. They are superstitious, and have a great dread of evil spirits. Their language is nearly the same as that of the Burmese, as are also their religion, and all the leading customs and points of character. Chelduba is a dependency of Aracan, is under British dominion, and is, with the former immediately dependent on the Presidency of Bengal. The revenue is raised from the produce of the land and is collected without difficulty. There is a native police, but their duties are light, neither personal violence nor robbery being known. Pop. (1847) 8,634.

CHELDWORTH par Eng. Gloucester; 4690 ac. P. 983

CHELDY par Eng. Somerset; 1435 ac. Pop. 509.

CHEERSA, early Chinese Empire, in Trans-cham-son-lon, 70 m. E.S.E. Khotan; lat. 36° 30' N; lon. 81° 30' E. It is a place of considerable size, and silk of excellent quality is produced in the neighbourhood. Pop. estimated at 20,000.

CHEFF-BOUTRONS (Latin *Cepus Follens*) a m. France, dep. Deux-Sèvres, at the source of a stream of the same name, 24 m. S.E. Niort. It is a very ancient place, being referred to by Caesar; has manufactures of serge, druggot, and dolt-sare, and carries on a trade in corn, wool, and cattle. Pop. 1872.

CHEHEL TAN a lofty mountain Beloochistan, 10 to 15 m. N. Meeanee, about lat. 30° 15' N lon. 68° 5' E. Its elevation is supposed to exceed 11,000 ft. Opposite to the principal peak is another of somewhat lower altitude. On the summit is a altar or place of pilgrimage, held in great veneration by the Mahomedans. The view from the top is magnificent, and of vast extent.

CHEKIANG a maritime prov. China, between the parallels 27° and 31° N., and, including the Chusan Archipelago, which forms a portion of its limit, the meridians 117° and 123° E. The continental part is bounded E. by the Pacific N. by Kiangsoo, W. by Ningpo and Kiangsoo, and S. by Fokien area, 89,150 sq. m. being considerably the smallest of the Chinese provinces. The S. portion is rough and hilly but the whole of the territory is remarkably fertile, producing in great abundance, rice and other grains, with tea silk, and cotton while its forest and fruit trees comprise the most valuable varieties known in the provinces. The rivers, of which 14 principal ones are enumerated as having their rise in the province, are short, but rapid in their course. Of these the most important is the Tseungiang which rises in the hills near prov. Kiangsi and after a N.E. course of about 150 m. through a beautiful and romantic country falls into the sea near Champo. The climate is healthy. The industry and skill of the inhabitants are attested by the marvellous beauty of their silk fabrics, which are highly esteemed in every part of the civilized world. Cotton and linen manufactures are also carried on to some extent and tea, crockery, lacquer, ware, paper ink and other articles are exported. Harbours, the sea, lies in lat. 30° 30' N lon. 120° 7' 34" E. The other principal cities include Ningpo, Ching hai and Champo. It is divided into 11 departments. Pop. 26,256,764.

CHEKSYA a river Russia. See *Sarkysa*.

CHELMSFORD a town in England, cap. co. Essex, 29 m. N.E. London, on the Eastern Counties Railway, situated in a beautiful valley between the Chelmer and Cam. It consists of one principal street, with three or four smaller ones, well paved, and well lighted with gas. Houses mostly substantially built, and have gardens behind extending to the rivers. The Chelmer is crossed by an elegant iron bridge and the Cam by a handsome one of stone. The church is a fine old building of the 14th or 15th century with a square embattled tower crowned with pinnacles and surmounted by a tall spire. There are places of worship besides, for various religious denominations, and an unusual proportion of benevolent societies and institutions. Besides the numerous minor charities, there is a free grammar school, founded by Edward VI. and two charity schools. Several of the public buildings and structures are exceedingly handsome amongst the former is the shirehall, containing the corn exchange, the courts of assize, residences and an elegant assembly room. Close by this building is a finely-constructed conduit, to which a plentiful supply of water is brought by pipes from a well distant about 1 m. from the town. There is also in the town a theatre, and public baths, with a reading-room attached. There are no manufactures, but a considerable trade in corn and malt is carried on. On the banks of the Chelmer are several large flour mills, and, in the vicinity of the town some flourishing pear plantations. On Galley Common 2 m. from the town races are held every July. Area of par 2844 ac. Pop 7796.

CHELSEA a lofty mountain on the S.E. frontiers of Albion, and W. frontier of Greece, about 12 m. S.E. of Arts, and forming the most conspicuous summit in the chain E. of the Gulf of Arta. Its height is 6212 ft.

CHELSEA a town and par England, co. Middlesex, in the Kennington division of the hundred of Cusseton. The town formerly a village, in the neighbourhood of London is now a suburb of that city being blended with it by intermediate buildings, stands on a slight eminence, 1 bank, Thames, and along that part of the river called Chelsea Reach, the widest above London bridge. The older part of the town is irregular and has a mean appearance, occupying the river front above the hospital which has numerous fine buildings, but the more modern portion towards Hyde Park consists of handsome houses, regularly laid out. In the old church are monuments to the memories of Sir Thomas More chancellor of Henry VIII and Sir Hans Sloane, the founder of the British Museum both of whom resided here. But the most remarkable object in Chelsea and that from which it derives its chief interest, is its military hospital a handsome structure of brick ornamented with stone built at an expense of 2150 000 from a plan furnished by Sir C. Wren. It consists of four quadrangles and is situated in the midst of extensive and exactly laid-out grounds, with gardens reaching down to the Thames. The annual expenditure for its maintenance of this noble establishment, and for the support of old and infirm soldiers, for whose benefit it is appropriated is about 21 000 000. The number of in-patients is usually from 500 to 550 they are provided with clothes lodging and diet, and an allowance in money varying according to rank, from 5s. to 2s 6d per week. The out-patients whose numbers are not limited by law amounted in 1844-45 to 469,883. The expense of the hospital is defrayed chiefly by an annual grant from Parliament. There is another excellent institution here connected with the military profession called the Military Asylum, built at the national expense, at the suggestion and under the auspices of the late Duke of York its purposes are to support and educate the orphan children of soldiers and non-commissioned officers, and the children of those who are on foreign stations the boys, on leaving, enter the army the girls are apprenticed. This institution is upheld by Parliamentary grants, and by an annual contribution from Chelsea are also worthy of notice those of the Apothecaries Company consist of 4 ac and are situated on the banks of the river at the E. end of Cheyne Walk the others established by Mr William Curtis author of *Flora Londinensis*, and the Botanical Magazine, are situated near Sloane Street and consist of 6 ac. In former times Chelsea was a favourite place of residence with many persons of note including Queen Elizabeth, who had a palace there. Area 965 ac. Pop. of par 56,533

CHELVY, a town in France, dep. Maine-et-Loire, 12 m. E. Beaupreux, on the Lonna. It manufactures salted handkerchiefs, and cotton yarn, and has bleaching grounds and paper-works. A large cattle market is held here every Thurs day. Pop 1897

CHEMNITZ, a town Saxony circle, Zwickau, cap. dist. of same name, in a beautiful and well watered valley on the banks of the Chemnitz at its junction with the Kappel 29 m. S.W. Dresden. It was formerly fortified but its walls have been pulled down and their site converted into a pleasant promenade connecting the old town with the suburbs. It has some handsome streets and squares, five Protestant, and one R. Catholic church a lyceum, school of design, a cloth hall, and revolved fan, with several associations for the promotion of the arts and sciences, and the encouragement of industry

It is the seat of a tribunal of justice, and of the district Government. Chemnitz is the principal manufacturing town of Saxony. The cotton goods especially stockings, for which it is chiefly celebrated and to which it owes its present prosperity rival even the English in quality and cheapness. The American market is largely supplied with the cotton hosiery, hatters, &c. of Chemnitz. One manufactory alone, has 18,000 spindles. But the stocking weavers for the most part work in their own cottages. The imports of cotton for the use of the manufactory in 1842 was 100,000 cwt. of English yarns 1,000 cwt. of woollen yarn 8000 cwt. of dyed cotton yarns, 6000 cwt. and of dyeing and coloring materials for the extensive dyeworks of the town 18,000 cwt. About 100,000 pieces of cotton are manufactured yearly and upwards of a million pairs of stockings gloves &c. There are here, also, seven machine manufactories which consume annually 1250 tons of iron. There are besides, manufactures of woollen stuffs and laces and of a beautiful description of shawls done in great numbers, and also weaving, with wool cotton, and silk, on Jacquard looms of which there are about 8000. The weavers of Chemnitz cultivate in their own gardens the potatoes and other vegetables which form their usual and principal food. The state provides them with gratuitous instruction. Chemnitz was for 400 years a Free Imperial city and still displays in its buildings marks of its antiquity. In 1539 the Reformation was introduced here by Henry the Devout and towards the latter end of the 17th century a cotton weaving was established. In 1780 there were upwards of 3000 looms which supplied all the cotton fabrics at that period used in Germany. In 1855, Chemnitz became the centre of the stocking manufacture, carried on in the villages in the neighbourhood. In 1700, Schellweil of Hamburg introduced the art of cloth printing. English quilt weaving was introduced in 1775 and English hand-spinning machines in 1790 and the spinning machines of Arkwright in 1789. Chemnitz is the birthplace of Puffendorf. A railway from Riesa to Zwickau which will pass through the town, is now (1851) in progress and partly finished. Pop. 25,000 of which about 500 are Catholics. (—Glossary—) Handelsstadt.

CHEENANGO a river U. States rising in New York and after a S. course of 50 m. falling into the Susquehanna at Binghamton on the borders of Penna. (v.)

CHENAU or **CHENAU**, a river U. States which has its source in the Himalaya Mountains in a small lake; lat. 35° 40' N. lon. 77° 9' E. whence it flows S. W. to Ghoris there S. W. between the Himalaya, and to Kanchi Mountains, to near Kachnar lat. 33° 20' N. lon. 75° 3' E. whence it flows S. W. and is joined by the Jaitun at lat. 31° 30' N. lon. 75° 15' E. and by the Ravi at lat. 30° 35' N. lon. 72° 1' E. After a course of about 145 m. to 150 m. from this point it falls into the Indus near Mitankote lat. 28° 55' N. lon. 70° 30' E. At a distance of 10 m. S. Lahore and upwards of 850 m. from its junction with the Indus, it is about 14 m. in breadth in the wet season, 14 ft. deep and with a current running at the rate of about 5 m. an hour. In the dry season its breadth at this point is reduced to about 300 yards. It is believed to be the Acinthus of Alexander.

CHENAU, a village in Belgium, prov. of and S. of S. W. Liège, at the confluence of the Ourthe and Vandre, which a little below forms a magnificent cascade. It has several forges, at which saws, and tools and most of the article used in Belgium are made numerous millworks, glassworks two distilleries, and three mills. Pop. 1925.

CHENAU-THOUREN, a village and par. Switzerland can. of and S. of Geneva, in a well cultivated district covered with handsome villas, and long the residences of Swiss nobles the market of the Italian Republic and other esteemed works. On a hill in the neighbourhood is the fine abbey of Landerbach commanding a splendid view. Pop. 3076.

CHENAU, or **CHENAU**, a village and par. England, par. Eng. Bucks. 1744 a. c. Pop. 585.

CHENAU (Lat) or **CHENAU**, a village and par. Switzerland can. Vaud, S. W. end of Lake Joux, 20 m. W. by N. Lausanne. Pop. 2715.

CHENAU, a village and par. England, par. Eng. Bucks. 1744 a. c. Pop. 585. The town lies 12 m. S. by E. from Monmouth and 14 m. N. by W. from Bristol. It has a fine view from an elevated bridge, and has a station on the South Wales Railway. The

town stands on a hill gradually ascending from the river and has a cheerful appearance, while the views from several points around are exceedingly beautiful. Streets spacious, well paved, and well lighted but indifferently supplied with water. The church is a fine specimen of the early pointed style. There are, besides, places of worship for various religious sects including a R. Catholic chapel (the town has an endowed charity school, a national school, two hospitals, and a number of minor charities. The interesting and extensive ruins of the ancient castle which dates from the 11th century covers a large space of ground on the summit of a lofty cliff overlooking the Wyre. Henry Martyn one of the judges of Charles I. died in this castle after being confined in it for 30 years. The Wyre is navigable to Chepstow which is only about 24 m. from the Severn. The tide flows up the river with dangerous rapidity and rises 40 and 50 ft. in ordinary spring tides, and between 50 and 60 at high springs. Large ships are thus enabled to reach the town, while lighter vessels of 80 tons or so ascend as far as Hereford fully 30 m. higher up taking the windings of the river. The town has no manufactures but exports a considerable foreign trade, importing wines from Oporto, and skulls, hemp, flax and pitch from Norway and Russia. Its exports are chiefly bark iron, elder coal and millstones. It sends also large quantities of timber to Plymouth, Portsmouth and Deptford, and a great deal of grain to Bristol. Shipbuilding is carried on here to a considerable extent, and several thousand tons of shipping belong to the port. Area after 1834 a. c. Pop. 4335.

CILBER, an island dep. France, having N. Loiret, P. Loiret, S. Allier and W. Loire and Loire d'Ar between lat. 46° 26' and 48° 38' N. and lon. 1° 50' and 3° 31' E. and formed of parts of Berry and Montmorancy. It is named from the river Cher which traverses it S. E. to N. W. Area 1,000 a. c. or 2,47 sq. m. cap. Bourges. This department is included in the basin of the Loire which forms the greater part of its E. boundary. The surface is in general flat but is intersected in the S. by chains of inextinguishable hills. It is various, but fertile in the neighbourhood of the Loire and Allier. Wheat and corn are all in the S. districts. The forests occupy about a sixth of the area, and furnish large quantities of fuel for the iron works, and timber for shipbuilding. Pastures extend and sheep very numerous. More grain and wine are produced than the demands of the inhabitant require. Hops and chestnuts are also largely cultivated. The best wines are those of Châteauneuf and Sancerre and in ordinary years only the spoiled wine is distilled. Beet root, buckwheat, flax, and hemp are also grown. Hops are reared to a considerable extent. The minerals consist of iron lithographic stones, good building and grind stones of all marble, cere and potash earth. The preparation and manufacture of iron called Berry iron is the principal branch of industry. In 1853 there were 25 smelting furnaces and 42 refining furnaces, employing 689 workmen. The other manufactured articles are fine and common cloth, woollen goods, porcelain and earthenware, seeking beet-sugar, cotton, paper and glass. The dep. is divided into 3 arrondissements 29 can. and 291 com. Pop. (1840) 294,540.

CILBERASCO (anc. *Cilberasco*) a village in Switzerland, dep. of and 29 m. S. E. of Geneva, near the confluence of the Rhone and Tanaro. It was formerly strongly fortified, but the works were demolished by the French in 1801. The town is well built, and watered by a canal derived from the Rhone. It has seven churches and several silk-spinning mills driven by water power. The town was taken and retaken by the French and Austrians in the wars of Italy which terminated, in 1831, by a treaty of peace concluded here. The French took it, April 25, 1796 and on the 26th, the Austrian commissioners concluded with Napoleon the Armistice of Châtillon, by which the French troops obtained a free passage throughout the Austrian dominions. Pop. 8500.

CILBERATTE, a village and com. Belgium, prov. of and 8 m. N. E. Liège. In its vicinity are numerous coal-pits. Pop. 2282.

CILBERBOURG (anc. *Cilberburg*) a principal naval seaport France, dep. Manche, 196 m. W. N. W. Paris S. side of the English Channel, nearly due S. to the W. and of the Isle of Wight, at the mouth of the Divatte and the head of a bay formed S. by Cape Lark, and W. by Cape la Hague; lat. 49° 28' 34" N.; lon. 1° 37' 16" W. The town lies in the

bottom of the valley of the Divette, which opens out to the sea under the quartz hill of Bonde. Apart from its consideration as a naval station, it is an important street narrow and dirty notwithstanding the number of public fountains. The

covering them with solid blocks. This was continued to the time of Napoleon, who directed the formation of a fort on the centre of the dyke. A mole was constructed, and a battery raised on it, mounting 20 guns.

In 1808 a tremendous storm swept away all the buildings, and drowned 104 men. By this disaster the operations of 16 years were nearly destroyed. A survey made in 1838 showed that the foundations had shifted, in the course of 40 years, to a considerable distance from the position in which they had been first placed. Under Louis Philippe the work was carried on with great activity and completion. The passage or entrance E. of the dyke is 3,890 ft. wide, and that to the W 9,678 ft. A fort and lighthouse occupy the centre of the dyke, and there are also lighthouses at each entrance to the roadstead and one at the entrance to the commercial port. The defences consist of the batteries of Fort Royal of 100 guns, on the Isle Pelée, and Fort du Honale on the W with various other works which render Cherbourg, it not impregnable from the sea

while edifices are the arsenals, civil and marine hospitals, parish church, an old tower which forms part of the ancient fortifications, Hotel de Ville, prison, lodges, barracks, and the buildings connected with the dock yard. The port is divided into the commercial and naval ports, which are quite distinct. The commercial port consists of a harbour and a basin 1,938 ft long and 416 ft wide. The basin communicates with the harbour by dock gates, which prevent the reflux of the water. The channel from the harbour to the sea is 1,168 ft long and 164 ft wide, lined by a granite quay with parapets. In it a channel there is always 19½ ft. water. The port for ships of war (grand port) occupies a triangular space of ground, one side resting on the sea, and is surrounded by fortifications. The Port Militaire, and Arsenal de la Mer, planned but only partly begun by Louis XVI. have been more than 40 years in progress and the new works commenced in 1821 will take many years yet to complete. These consist of a port, 984 ft long and 754 ft wide capable of containing 16 sail of the line and accessible at all times of tide for vessels of the largest class, a floating basin closed by lock gates and a third basin, begun June, 1838, and now in progress. These basins have been excavated from the solid slate rock which forms the foundation of the entire yard, the two former to the depth of 56 ft. There are four slips for vessels of the largest dimensions, the masts of which, 85 ft high, rest on arches supported by piers of granite and slate. Adjoining them are slips for a dry dock and beyond are the smithy and workshops, with machinery for planing, turning, screwing, and cutting rods, beams, screws &c. of iron. The timber shed is 953 ft long supported on 190 stone pillars. A portion of the dockyard called Chantier, has sheds for building frigates, and a rope walk 540 yards long. The great work however for which Cherbourg is celebrated is the dyke or break water stretching across the roadstead which though protected on three sides by the land was open to the heavy seas from the N. To secure a safe and strong harbour opposite Portsmouth has long been a favourite object of the French and no expense has been spared to accomplish that object. The dyke was commenced under Louis XVI and has been continued ever since, with occasional interruption. It is 22 m. from the harbour in water varying from 42 to 64 fms. deep. Its projections, as compared with Plymouth break water are—

Dyke	Altitude	Direction	Length
Break-water	1700	100	100

The foundation was laid by sinking large caissons of timber loaded with stones, but this plan did not succeed and another scheme was resorted to, of forming a bank of small stones and

at least very difficult of attack. On the land side it has hitherto been almost open but the fortifications recently constructed are intended to render it more secure.

Cherbourg is a fortified place of the first class and is the seat of a tribunal of first resort, maritime tribunal and prefecture. It has a school of navigation, royal academy, society, communal college, public library and marine library, theatre museum, and cabinet of natural history. Its principal industry is centered in the works of the dock yard, the commercial trade and manufactures being comparatively insignificant. There are however chemical works sugar and salt refineries dye-works, tanneries, and stocking manufacture. A lace manufactory conducted by four sisters employs 360 females the younger of whom are also educated. Large quantities of eggs are shipped for England and mules and salt provisions for the W. Indies.

Cherbourg occupies the site of a Roman station, and Alrold king of Denmark resided in it about A.D. 945. William the Conqueror founded a hospital in it, and built the castle church. The castle, in which Henry II frequently resided was one of the strongholds of Normandy and escaped the fate of the town which about 1250 was pillaged by an English fleet from Yarmouth but it sustained a further three memorable sieges in 1373 1418 and 1450. In 1718 the town was taken by the English without opposition notwithstanding that the garrison was large. They kept possession of it eight days, destroyed the fortifications, carried off the artillery and the bells, and only retired after having exacted a heavy ransom from the inhabitants. Pop (1840) 22,460.

CHERCHILL, or ZENABUL, a seaport in Algeria, 35 m. W. Algiers. The manufacture of common pottery is carried on, and there is an active trade. Though the harbor which was formerly spacious and secure has been materially injured by earthquakes. This is the Julia Caesar of the Romans, on the site of which a town was erected by the Moors who were expelled from Spain at the end of the 16th century and which was taken possession of by André Doria in 1561. Pop (1847) 2012 (add see surr.)

CHEREPONOV, or TANGEROPOV, a European Russian, gov. of 350 m. E. N. K. Novgorod, 1 bank, Shabara, near the confluence of the Volga. It has a cathedral and four other churches, and is the seat of three great annual fairs. Pop. (1843), 16,439.

CHIFFILL, per Eng. Willis 1817 as Pop 836. CHERIBON (properly TIRIKON) a prov., Isl. Java, once a kingdom, cap. same name having, N. the Java sea, W. prov. Krawang S.W. and S. Pranger and E. Tagal and Macassar. Among its lofty mountains is the Marak

able volcano, Tjornei. The broad-bait tree thrives along the coast, where, also, much salt is made. Cherkov has few wild animals, but a prodigious abundance of poultry, wild fowls, and sea and river fish. The population, notwithstanding the prevalence of fever on the coast, is large, on ailing of 1,360,000 Japanese, and 200,000 Chinese, Arabs, Europeans, and half-breeds. The produce reported in 1844 was—Paddy 8 482 143 cwt.; coffee, 65,000 000 lbs. sugar, 7 150 000 lbs. indigo, 834,000 lbs. tea, 10 000 lbs. sacks of pepper 70 000 pieces; cinnamon, 1700 lbs. Cloves and oilcloves are also raised. Potatoes and cotton-raising employ part of the people. — The river winds on the N coast, half way between Batavia and Samarang and 125 m from each. The horses, except those of the Dutch resident and the Sultan, are of bamboo. The finest town in Java, that of Syech Moelana, who brought Mahometanism with him from Arabia, is in 1406, and is now revered as a saint stands close to the town.

CHERKOV or **TOCHERKOV** is in European Russia, gov. of, and 50 m S.E. Mogilev r bank, Sij. It has two Greek Catholic churches, and a synagogue. It was founded in 1504 by Sigismund III., King of Poland. Charles XII of Sweden, attempting to cross the river here in 1708 was repulsed by the Russians. Pop. (1811), 3168.

CHERTINGTON two pars England.—1 Gloucester 1881 ac. Pop. 270.—2 Warwick 390 ac. Pop. 543.

CHERTON par Wales Glam rgan 1419 ac. 1 312 **CHERTON** several pars Eng.—1 Kent 1861 ac. P 108.—2 Hants 3090 ac. P 603.—3 (Bishop) Devon; 478 ac. 1 806.—4 (Wid) Somerset 1068 ac. P 763.

CHERTON **VILLAGE** a par and thirv. r.v. England, co. Devon. The **VILLAGE**, 4 m. N.E. by N Crediton, consists of one principal street, with several smaller ones all kept remarkably clean. The places of worship are a large and handsome parish church and an independent chapel. There are some well-conducted seminaries and several smaller schools also some almshouses, and other useful local charities a tanyard and flour-mill. Inhabitants chiefly agricultural are noted for their longevity. Area of par. 324 ac. Pop. 1207.

CHERKASK a town in Russia, gov. of, and 35 m S.W. of Don Cosacksk. It is on the N. bank of the Don, on an island formed by that river the Akum, and one of its branches, called the Vasilovka. The streets are narrow and crooked and the houses which are of wood are for the most part built on piles, raised 5 or 6 ft. above the ground on account of the inundations to which the town is subject, from the beginning of April till the end of June. It has several public buildings, some of them of wood including seven churches, an academy, several schools, a prison and a townhall. It is the seat of a considerable commerce and fishing is carried on to some extent. Its foundation is attributed to a colony of Ureks. Under the Russians it became the chief place of the government of the Don Cosacks, and such it continued till the seat of Government was removed to New Cherkask Pop. 16,000.

CHERKASK (New) or **NOVOI TOCHERKASK** is in Russian gov. country of the Don Cosacks 40 m N.F. Azov and 11 m N. Old Cherkov on a hill r bank, Akum. The streets are dirty and neither paved nor lighted. The houses are chiefly of wood. Among the public buildings and institutions are the cathedral a large hospital an arsenal and a gymnasium, where the Latin French, and German languages with history geography mathematics, &c. are taught. The town was founded in 1805, on the recommendation of the Hetman, Platoff. Pop. about 11 000.

CHEROKEES, a tribe of N American Indians, occupying a territory W of the States of Missouri and Arkansas, the possession of which has been guaranteed to them for ever by the U. States Government. They are governed by their own laws, and are extremely jealous of any encroachments on their privileges and liberties, for the protection of which they send each year two ambassadors to the Congress at Washington. The Cherokees are the most enlightened of the Indian tribes they have been instructed in the pure doctrine of Christianity the arts of civilized life have made considerable progress among them and a native weekly newspaper is extensively circulated. They are in general supposed to be Christian people. Their numbers were stated in a document laid before Congress, in 1844, to be 26,911.

CHERRAPOONJEE, or **CHERRAPOONJEE**, a British station and vil. India, beyond the Broomapootra, in the Comor or Coosya hills, between 4000 and 4090 ft. above the sea, and 20 m N. Suhal. It is resorted to by invalids from Calcutta, from which it is distant 280 m. N. W. E.

CHERRY HINTON par Eng. Cambridgeshire 2048 ac. Pop. 684.

CHERSE an isl. Adriatic, belonging to Austria, Illyria, separated from Istria by the Gulf of Quarnera, in the Comor 44° 57' and 45° 10' N. and lon. 14° 18' and 14° 30' E. length about 40 m. N to S. breadth, 5 to 7 m. It is mountainous and rocky with some fertile spots which produce olives, figs, wine, grain &c. A few sheep and horned cattle are reared, but the former are very indifferent. In the N. part of the island are extensive forests, from which timber for shipbuilding is obtained. Game is met with and fish abound, especially the turbot and anchovy. The inhabitants are industrious and manufacture coarse woollen cloth and liquors. Shipbuilding—confined, however to a very small class of vessels for the coast trade—is also carried on. In 1854, a bridge was thrown across the narrow channel between the island of Istria and that of Lussin. — The town of Cherse cap. of the isl., is situated on the W. side, at the head of a bay nearly in the centre of the island. It is ill built and dirty contains a cathedral and several other churches, a primary school two convents, and a custom-house. There are four dockyards at the distance of about a quarter of a mile from the town. Pop. about 3500. — The only other town on the island is Cherse also on the W. side. It has a cathedral, with a handsome steeple and was formerly the seat of a bishopric. It has some trade in timber. Pop. 1500.

CHERSON a gov. and in Russia. See **KHERSON**. **CHERSONESUS** [Greek *χέρσος* or *χέρσος*—continent, and *χέρσος*—land] the name given to several peninsulas and promontories, particularly *Chersonesus Taurica*, the modern Crimea, in the S. of Russia, between the Black Sea and the Sea of Azov and the *Chersonesus Thracica*, the modern Hellespont, forming part of Turkish Gallipoli and lying between the Gulf of Saros and the Bosphorus of the Dardanelles.

CHERT is in Spain Valencia prov. of and 33 m N. Castellon de la Plana on the side of a hill above 1 bank Vallivana. It is ill built and has steep uneven ill paved streets. It contains a parish church court house, prison, and boys and girls schools. There are a few manufactures of woollen linen and hempen cloth and several flour-mills. Pop. 1778.

CHERTA is in Spain Catalonia, prov. Tarragona, 8 m from Tortosa, in a plain. It is well built, being formed of several spacious streets, and two public squares contain a parish church, consistorial building and prison an hospital supported by voluntary contribution and an endowed primary school and has some manufactures of leather and numerous mills. The trade is chiefly in fruit and agricultural produce. Pop. 2432.

CHERTSEY a tn and par England, co. Surrey. The town 20 m S.W. London, on the Southwestern Railway is pleasantly situated r bank Thames, over which there is a handsome bridge, connecting it with the N or Middleside, side of the river. The houses are mostly of brick and in general well built. The church (St. Anne's) is a handsome structure, with a square embattled tower and contains a tablet to the memory of Charles James Fox, the well-known statesman, who resided for many years at St Anne's Hill, close by the town. There are, besides, places of worship for Baptists, and Methodists. It has several almshouses, and various minor charities, together with a school founded by Sir William Perkins, in 1725, for clothing and educating 60 children—35 girls and 25 boys the number is now greatly increased. The town contains a library and scientific institution, two libraries, and a reading-room. There was formerly a monastery here of the Benedictine order in which Henry VI. was interred, and where his remains lay till removed to Windsor by Henry VII. The principal trade of the town is in malt, flour bricks and tiles, large quantities of the latter two being made here. Vegetables are extensively cultivated in the vicinity for the London market. Cowley the post dist here his study is still preserved. Area of par 10 529 ac. Pop. 6026.

CHESAPEAKE BAY the deepest indentation on the E. coast, U States, and wholly within the States of Virginia and Maryland. Its entrance (centre about lat. 36° 55' N. lon. 75° 45' W) between Cape Charles on the N. and Cape Henry on the S. is about 20 m. in width. It is about 180 m. in length, the first 70 to 80 m. being from 25 to 80 m. broad, and the remainder from 10 to 15 m. greatest depth about 9 fathoms. This spacious bay has many commodious harbours, and a safe and easy navigation for vessels of the greatest burden. It receives the waters of the rivers Potomac, Susquehanna, Rappahannock, York, and James, all large and navigable, besides a number of smaller streams, draining together a surface estimated at 70 000 sq m. The Chesapeake and Delaware Canal and the Dismal Swamp Canal afford in connection with Chesapeake Bay an extensive inland navigation from N. to S.

CHESTER a town and par. Eng., on Buckingham. The town is 2½ m. N.W. London, pleasantly situated in a fertile valley with some beautiful sylvan scenery in the vicinity and a number of handsome country seats. It has a parish church several dissenting places of worship, an almshouse, and a Lancasterian school. The principal manufacture carried on is that of coarse woollen-wares which however has much declined. Shoe-making and straw-plaiting also employ a number of hands. There are several corn and paper mills in the vicinity. Area of par. 12 867 ac. Pop. 6036.

CHESTER a town, par. Eng. Bucks. 905 ac. 1 cop. 135. **CHESTER**, a maritime, on England (cap. Chester) having E. parts of the counties of Derby and Stafford, N. Lancashire, and the River Mersey; S. Shropshire and part of Flintshire, W. Denbighshire, Flintshire and the River Dee and N.W. the Irish Sea. Extremes length E. to W. upwards of 50 m. extreme breadth N. and S. about 30 m. Area, 675 290 statute acres, of which 920 000 are arable meadow and pasture lands including parks and pleasure grounds. The surface is generally level, although there are a few inequalities, the most considerable of which are some hills on the E. border of the county and a ridge of about 10 m. in length, in the W. part of it. The soil is generally composed of clay and sand, and although there are extensive tracts of moor and waste land there are many districts clothed in the richest and most luxuriant verdure, forming the finest pastures in England, the result of a mild and humid climate. The cheese of Cheshire, the principal product of its numerous dairies, is in high long in great request not only in this country but on the Continent and in America. London alone takes it is said, 14 000 tons annually. Dairy husbandry is therefore a primary and arable but a secondary object in this county. The forests of Cheshire were in ancient times of great extent, but have gradually been disappearing. Large quantities of Beech timber however are now grown on the estates of the nobility and gentry. Coal, copper, lead, and cobalt, are amongst its mineral products but the principal is rock-salt, of which the supply is inexhaustible. The most extensive mines are in the vicinity of Northwich. From these about 90 000 tons are taken annually most of which is exported for fish curing, &c. A large quantity of white or common salt is also made from the brine springs in the neighbourhood of the rock-salt mines. Cheshire abounds with rivers, brooks, and large abscs of water called meres, many of which contain fish. Its principal rivers are the Dee, the Mersey and the Weaver the first and second being boundary rivers—the one separating the county from Denbighshire, and Flintshire, the other from Lancashire. The Weaver which falls into the Mersey has been rendered navigable by locks for 20 m. for vessels of 100 tons burthen. There are, besides various canals, the principal of which is the Duke of Bridgewater's. The manufactures of Cheshire are considerable. As Stockport, all the branches of the cotton trade are carried on extensively and the silk-factories of Macclesfield and Congleton are on a large scale. Hats are also manufactured in these towns in great quantities, and in other there are works for smelting copper and making brass. There are 780 parishes in Cheshire, exclusive of the city of

Chester. It sends altogether 10 members to the House of Commons. Pop. 455 725.

CHESHUNT a vil. and par. Eng. on the N. Harin, 4½ m. S. by E. Hertford, near the London and Cambridge Railway. In a house still shown in the village, Richard Cromwell, under the name of Clarke spent his latter days, and died in 1712 at the advanced age of 80 years. Area of par. 8495 ac. Pop. 6579.

CHEILBORNE par. Eng. Dorset. 3580 ac. Pop. 406. **CHEIMSIE**, or **CHESMIE** (the fountain) a town, Asiatic Turkey, near Anatolia, opposite Isl. 820, on the channel of that name, 45 m. W. Smyrna lat. 38° 18' N. lon. 26° 30' E. pleasantly situated partly on the brink of a creek or inlet, and partly on the face of a slope covered by the ruins of an old Genoese castle. It contains several mosques, small but neat public baths and numerous coffee-houses or shahs for lounging and smoking. The remains of a wall round the town are now only to be traced but another Genoese castle, of small size much dilapidated, stands on the shore of the creek, nearly at the end of the town, retains its original form. Cheimsie owes its prosperity to the exportation of raisins exclusively which are grown in great quantities in the neighbourhood nearly all the fruit sold in Britain as Smyrna raisins being from this quarter. Pop. about 6000 or 7000.

CHELSEA par. Eng. Surrey 1929 ac. Pop. 329. **CHESTER**, a town, Spain prov. of and 19 m. W. Valencia, in a plain. Its houses are regularly built and it has four squares. It contains a tolerably handsome parish church, a court-house two prisons a boys and girls school both well endowed and near the town a cemetery. It has manufactures of coarse white soap bricks, and tiles, besides a distillery of brandy and several flour-mills. A number of the inhabitants are employed as mill-wheels. Pop. 8773.

CHESTER, a city, a city, and co. of itself, England, on Chester 34 m. N.W. Manchester and 103 N.W. London, pleasantly situated on a rocky height, a bank Dee by which it is half encircled. It is surrounded by a wall 5 or 6 ft. broad, evidently of Roman construction, the only entire specimen of ancient fortification in Great Britain. From this wall, which is used as a promenade by the citizens extensive and beautiful views are obtained. The town consists of four principal streets radiating from a centre, and a number of smaller streets crossing each other at right angles. They are lighted with gas and many of them have been recently well paved and flagged. The town is tolerably well supplied with water from the Dee. The four principal streets have the peculiarity of being sunk considerably below the level of the lowest inhabited parts of the houses, and below the footways

WATERGATE STREET, CHESTER, AND EXTENSION OF THE DEE NOW FROM BRIDGE BY J. & P. 1800.

also, which are within piazzas called the Rows, in front of ranges of shops at some height above the street; thus, while the carts and carriages are rolling along below the foot-passengers are moving on in safety above on a pathway pro-

used by a railing. Flights of steps, at convenient distances, connect the carriage-way with the Rows. There are shops, also, underneath the Rows, on a level with the streets, and among the more remarkable modern public structures are

INTERIOR OF THE ROW, W. THURLEY STREET, CHESTER.
From Sketch by J. F. Frost.

the new bridge across the Dee, consisting of a single arch, of 200 ft. span, the iron hall erected by the Irish merchants in 1790, the asylum, in 1808, the union hall, and commercial hall, the castle, the county hall and just a fine Grecian structure the transept-cathedral of Tudor architecture, erected in 1842, and the railway station, in the Italian style, one of the largest in the kingdom. There are also some fine specimens of timber houses but they are fast disappearing. The cathedral is a large old Gothic structure in various styles of architecture, and contains many interesting memorials of former times. There are nine parish churches, and two others not parochial with a number of chapels for various religious communities. The benevolent institutions are numerous, including an infirmary, houses of industry, almshouses, and a great many charity schools. A new cemetery on the banks of the Dee, and two public parks in the vicinity of the city have been recently laid out, and a spacious cattle-market has been lately erected. The principal manufactures of the place are paint, patent shot and patent lead-pipes. Whips, thread tobacco and gloves are also made in a small extent. Chester imports butter provisions, lard, tallow, timber, iron, brass, wine, oil, &c. Its chief exports are cheese, lead, calamine, copper plates, cast iron, and coal. Shipbuilding formerly on the declivity, from the filling up of the Dee, has now regained more than its ancient prosperity, and the trade of the port has in like manner been more than restored by the spirited improvements effected on the river. The gross amount of customs duty received here for 1847 was £290,751, and in 1848, £283,945. Registered shipping belonging to the port, January 1, 1847, 117 vessels, of 11,605 tons. Society in Chester is superior to that in most provincial towns. Market days, Wednesday and Saturday, and many fairs throughout the year, including eight cheese-fairs, recently established, all of which, the city being in the heart of a great cheese-making district are well attended. In spring and autumn, races take place on a fine level called the Race-course immediately beneath the walls. The city is governed by a mayor, ten aldermen and 30 councillors. It returns two members to the House of Commons. Registered electors (1848) 2529. By railway it is connected with Liverpool, Wylton, Shrewsbury and Crewe. Chester was a Roman station, called by them, *Demonia* or *Dona*, probably from being half encircled by the Thra. Its British name was *Caeir Llan-cwr*, and it was called by *Ælfred*, *Lancaster* and *Lancaster*. Pop. (1841) 28,115 (1851) 27,765.

CHESTER-LE-STRANGE is a town and par. England, co. of 6 m. N. Durham on the railway to Newcastle, in a valley W. of the river Wear. It consists of one street about 1 m. long on the Roman wall, very road between Durham and Newcastle. The church is a handsome stone edifice with a tower

surmounted by a spire 156 ft. high, one of the most elegant in the N. of England. There are places of worship for Independents, and Wesleyan Methodists, an endowed school, and a mechanics institute. Ropes, sails, and tiles are manufactured to a small extent in the town. In the vicinity are corn and paper mills, and extensive collieries and iron works. Area of par 31,061 ac. Pop. 18,119.

CHESTERFIELD is a town and par. England co. Derby on a rising ground, at the junction of the small rivers Hipper and Rothe on the Midland Railway 30 m. N. Derby. There are two principal streets the one an irregular line running nearly N. and S., and the other at right angles to it. Houses in general, irregularly but substantially built the old core of brick, roofed with tiles the more modern of stone (with which the country abounds) and covered with slates lighted with gas and amply supplied with water. The character of the place has for the last few years been undergoing a considerable change. The number of families with showy equipages has been rising off with the middle and working classes have increased. The parish church, a fine building of a cathedral form is chiefly remarkable for its crooked spire of wood covered with lead. There are two other churches—Trinity church and New Hampton church both Gothic, having square towers and lancet windows, and also two

independent chapels one Wesleyan one Primitive Methodist, and one Unitarian the town hall guildhall and grammar-school, are respectable structures. Of several schools, the most important are the old grammar-school, endowed in 1594 in which 40 boys receive gratuitous instruction, and the Victoria school, in which 100 children are taught and clothed solely at the Vicar's expense. There are also several almshouses, a dispensary, savings bank, mechanics institution, and a literary and philosophical society. Lace-making silk throwing and the manufacture of pinguin are carried on to some extent and afford employment to a good many of the inhabitants as does also the manufacture of earthenware. The railway trade is also of some importance. But the principal employment for the lower classes is derived from the iron-works pits collieries and smelting furnaces in the neighbourhood. Chesterfield gives the title of Earl to a branch of the Sturges family and Mrs. Radcliffe the well known romance writer was born in the town. Pop. 7181. Area of par 11,451 ac. Pop. 13,421. (Local Correspondent.)

CHESTERFIELD INLET is a golf British V. America N. W. corner of Hudson's Bay 245 m. long P. to W. by about 15 m. average breadth. It contains numerous islands, and its upper part called Baker's Lake receives the waters of numerous lakes by the rivers Cathawabeg and Doobanuk.

CHESTERFIELD-ORD is a (roof) a vil and par. England co. Essex the former's tents on the borders of Cambridgeshire, on the banks of the Grantham, 26 m. N. W. Chesham. It has a fine old church an endowed school and a station on the Eastern Counties Railway. A horse fair is held July 6. Numerous Roman remains have been discovered in the neighbourhood. Area of par 3030 ac. 1 pop. 1024—2 (Little) par Eng. Essex 1260 ac. 1 pop. 372.

CHEVIOT FELS, a mountain-range, 8 miles Cape Colony extending E. to W. in an S.W. direction, between the Great Berg on the W. and the Hyndhope Hills on the E. about lat. 32° 30' S. The head waters of the Delvaux descend from its S. and those of the Tarka from its N. side

CHEVIOT HILLS, a range of hills which divide the Roxburgh, Scotland, from the Northumberland, England and are thus situate on the confines of the two countries. They extend from a point nearly opposite, and about 2½ m. E. Yetholm, S.W. to another point nearly opposite to and about the same distance E. Causton, their whole length being upwards of 85 m. The highest summit, called distastefully the Cheviot, is 2558 ft. high, and is in Northumberland the other great elevations are from about 1800 to 2000 ft. which is the height of Carter Fell. The hills are in general smooth, slope rapidly and are covered for the most part with a close green sward. The well known and much esteemed breed of sheep, called Cheviots are bred on these hills

CHEVREPLAT a town and com. France dep. Savoie-Orléans, 11 m. N.E. Rambouillet, on the Yvette. Formerly a place of importance, and had one of the strongest castles in the province, besides giving its name to a dukedom. It has almost manufactures of tanneries and tanning-works and wool washing is carried on. Pop. 1730

CHILWAGNA a vil and par England co Somerset, the former pleasantly situate on a rising ground, 1 back Ulver 6 m. S. Bristol. It has a spacious church whose walls are some interesting monuments and places of worship for Baptists, Wesleyans and the Society of Friends. A portion of the inhabitants are employed in soil-mines and others are employed in the manufacture of stockings. In the parish are some handsome country seats an old circular camp and a wall of reputed efficacy in the cure of diseases of the eye. Area of par 5006 a. Pop. 2141

CHLW TOKK per Eng Somerset 2094 sq. 1 819
CHLW TOKK a vil and com. Eng co Somerset the former situate amongst the Mendips hills 5½ m. N.W. Wells. It contains a handsome church and a Wesleyan chapel. The inhabitants are chiefly employed in the mine, and governed by laws peculiar to themselves. Earl Waldegrave describes the inferior info of Ymout from Clewton Area of par 6514 a. Pop. 1119

CHIANGA (anc. Chiana) a river and valley Italy, in Tuscany and the Papal States. The river formerly flowed into the Paglia at Orvieto after a course of about 56 m. through a swampy and unhealthy valley. About the middle of the 12th century the stagnant waters of this river took their course towards the Arno but, in consequence of important works begun in 1441 and completed only in 1823, the valley of the Chiana was drained and the course of the river divided into two portions or distinct streams by a wall of partition formed at Callone da Chiana 2½ m. S.E. Chiana, at the boundary between Tuscany and the Papal States. The first, or Pontifical Chiana, comprises the lower part of ancient Chiana and enters the Paglia by the bank at Orvieto, after a course of 41 m. it is navigable during winter. The second, or Tuscan Chiana, forms the navigable canal of Maestro della Chiana, which begins above the Lake of Chiusi, and enters the Arno by the bank 7½ m. N.W. Arezzo, after a course of about 87 m. It forms the two small lakes of Chiana and Montepulciano. The draining of the valley of Chiana has brought into cultivation about 86 sq. m. of the most fertile ground in Tuscany

CHIANGIANO a town and com. Tuscany 8 m. W.N.W. Chiusi, in the valley of Chiana. It occupies the lower slopes of a spur of Mount Maddalena, and contains a handsome collegiate church with numerous ancient inscriptions. In the neighbourhood are quarries of the marble, and mineral springs. Pop. 2630

CHIANTI that part of Tuscany which lies between the sources of the Arbia, Arno, and Ombrone forming part of the watershed between their basins and that of the Arno. About the 11th century it was completely covered with

forests, and abounded with game. The greater part of it is now covered with vineyards, which supply the most celebrated wines of Tuscany

CHIANTILLA a river and its Central American Guatemala, prov. Totonicapán. This river rises in the volcanic chain which traverses the centre of Guatemala, and, after a N.W. course of 150 m. joins the Usumacinta on the bank, in lat. 17° 10' N. lon. 91° 55' W. The river flows on the E. bank of the river 138 m. S.W. Guatemala

CHIAPA—1 A state, Mexican Confederation bounded N. and N.W. by Tabasco, W. by Oaxaca, S. by Sonora and E. by Guatemala between lat. 15° and 17° 45' N. and lon. 91° 15' and 94° 12' W. area, 83,600 q. m. It is in many parts mountainous, and covered with immense forests; it is intersected by several considerable rivers. In the valleys the climate is warm and moist, and the soil fertile. Maize, sugar, cocoa, cotton and cochineal and 1 good, which is the principal export, are produced in abundance, the horses are highly valued. In a dense forest at the N.E. extremity of Chiapa, are some curious ruins, apparently of a large city extending for more than 20 m. along the summit of a ridge. This state formerly belonged to Guatemala, but, in 1825 it joined the Confederation of the Mexican States. Pop. 16877 estimated at 52,000—2 A town in above prov. 83 m. N.W. Ciudad Real r bank. Chiapa the most commercial and most populous city of the State. Its principal trade is in sugar and logwood. Pop. 15,000

CHIARAMONTE (anc. Cleromonte) a town Silly prov. of and 62 m. W. by S. Syracuse on a hill. It is regularly built and has good streets. The environs produce wine of good quality. Pop. 8000

CHIARAVALLI a town Naples prov. Calabria Ultra II 17 m. S.W. Catanzaro at the foot of a hill surrounded by a fertile district. It suffered considerably from the earthquake of 1798. Pop. 2107

CHIARI (Latin Chiari) a town Italy Lombardy prov. and 14 m. W. Brescia and 6 m. E. the river Oglio. It is well built has several churches two convents an elementary school an hospital and a public library. It was formerly fortified and some of its ancient defences still exist. It has manufactures of silk, linen and cotton and some tanneries. Pop. 8000

CHIATUMONIA a town Naples, prov. Basilicata, on a mountain 40 m. S.E. 10 miles. It contains two churches, a convent and a very dry park and wine of good quality are produced in it in Lombardy. Pop. 2948

CHIAVARI (Latin Chiavari) a maritime town, Italy Piedmont, division of and 23 m. S. by S. Genoa cap. port (havan) on the Gulf of Rapallo, at the mouth of the Stura. It is one of the most considerable places of the ancient Genoese territory and has quite the aspect of an old Indian town. Many of the houses are well and substantially built, with open arcades, which skirt the narrow streets. It has several churches, the principal of which is annexed to an ecclesiastical seminary intended for 70 students. There is also an hospital an agricultural society several lace manufactories, and some silk mills. Large quantities of mohair are caught here and the surrounding district produces wine, olives, and silk. Pope Innocent IV. was a native of this town. Pop. 9598

—The province in this division of Genoa is between lat. 44° 14' and 44° 56' N. area, 353 sq. m. of which about a fourth part is cultivated a sixth uncultivated a half is forests, and the remainder is productive. It is mountainous traversed in its N. parts by the Apennines but it has fertile valleys yielding grain legumes grapes, and olive oil in superabundance chestnuts are likewise plentiful. Horses, mules and draught oxen are reared in small numbers also cattle sheep, goats swine, and silk worms. The province is divided into 8 mandamentos and 28 communes. Pop. 25,570

CHIAVENNA (L. in Clessewa) a town Italy Lombardy prov. and 38 m. N.W. Bergamo on the Mera, beautifully situated in a valley and surrounded with groves of cypress and laurel trees. It has six churches, the former palace of the Republic of Grisons and several charitable institutions with manufactures of silk, cotton, paper and earthenware, and some breweries. It enjoys also a considerable transit trade, being situated at the junction of two passes over the Alps the road to the Splügen going through it. The scenery of the neighbourhood is very fine. Pop. 8500

CHICLA-BALAPOOF, or CHINABALAPU, a to. Hindoo temple, Mysore dominion, 56 m. N. by E. Bangalore. Sugar cane and other crops of superior quality are manufactured.

CHICAGO a city L. KANSAS, Illinois, S.W. shore of Lake Michigan, at the mouth of the Chicago river which here forms an excellent natural harbor; lat. 41° 52' 30" N. lon. 87° 35' W. It has several churches and schools, is regularly laid out, and, being built of a pitchy stone, in which black and white are mingled, presents a singular appearance. Chicago is the largest and most commercial city in the state and possesses direct communication with the Atlantic by the lakes, and by railway and canal with the valley of the Mississippi and the eastern states of the Union. Its trade is in fish, timber, wool &c. and it is one of the chief grain ports of the world. In 1864 it shipped 12,908,320 bushels grain of all kinds, of which 1,860,636 were wheat. Total imports (1854) \$6,000,000 exports, \$5,000,000. It was settled in 1831. Pop. (1840) 4858, (1855) 70,000 [said See Sci.]

CHICAPAPA, a to. Mexico, state Oaxaca, 25 m. N.W. Tehuantepec, on a river of same name. Near it are silver mines once important but now neglected.

CHICLA W. or CHICLA WITA, an ancient ruined city. Yucatan, about 55 m. S.W. Tulum. The ruins are of the most magnificent description and are minutely calculated to deepen the interest, not unassociated with awe, with which these mysterious remains of a former civilization and an unknown people are viewed, and of which Yucatan is the great repository. Chichen, though in a better state of preservation than most of the other ruined cities in this territory has a greater appearance of antiquity. A ruin holds features of many of these extraordinary structures in their utter unaccountability, it being impossible to conjecture for what purposes they were intended. The most singular instance of this which occurs at Chichen is in the case of a series of small columns the highest of which were only 6 ft. so arranged as to form a spacious parallelogram each row being three feet and five deep, from the outside to the enclosed space within. These were considered by Mr. Stephens as at once the most remarkable and most incomprehensible remains he had met with. Adjoining the area formed by these pillars there rises

around, surrounds the city and being lined with lofty stone graves is a singularly picturesque appearance. There are four principal streets, running in the direction of the cardinal points, having smaller streets at right angles, and a few oblique Gothic crosses at these intersections. They are spacious and nearly straight, have paved foot-paths, and are lighted with gas. The houses, of brick, and, for the most part, roofed with tiles, are in general handsome. Water is abundant. The principal buildings include the corn market, with fine Doric portico, built in 1832, about 200 ft. long and 50 ft. wide; the townhall the last remains of an old priory, and the council-chamber built in 1773. The cathedral the most interesting object in the town, is an imposing structure, but with exception of the spire, which is reckoned one of the most graceful in England, possessing no great architectural pretensions. It exhibits almost every variety of Gothic architecture and contains many curious monuments, both ancient and modern, amongst the latter is one to the unfortunate poet Collins, who was born and died in this city. There are nine parish churches, and one extra parochial chapel besides the cathedral chapel attached to St. Mary's hospital. Most of these churches have a most picturesque appearance. There are several dissenting chapels for the most part small and without any attraction schools numerous. The most important are the prebendal grammar-school the Whitty charity where boys are educated clothed, and fed, and a portion of them supplied with pecuniary aid on leaving the school diocesan college, and colleges for training teachers. There is an excellent infirmary besides almshouses, and St. Mary's hospital for the support of 12 aged poor. The literary and philosophical society lately amalgamated with the mechanics' institution has an excellent library and museum. There is another extensive library maintained by annual subscription with a reading-room attached to it. Leather parchment, and candles are manufactured to a very small extent, but the inhabitants, who are in a driving condition are chiefly employed in the shop trade. (Hickstead has a very extensive corn market, and one of the largest cattle-markets in the kingdom. The latter is held every alternate Wednesday when from 5000 to 5000 beasts are penned in the principal streets of the city. It returns two members to Parliament. Pop. 8468.—(Lond. Correspondent.)

CHICLIA one of the Fijee or Viti islands S. Pacific Ocean lat. (S.W. point) 17° 48' S. lon. 179° 18' W. (a.) It is nearly circular and 3 m. in diameter surrounded with a shore-reef having no opening but for canoes. Above it the summit rises to a height of 800 ft. In some places it is thickly wooded. The soil is rich, and extremely productive, yielding everything in the greatest abundance. Extensive coconut groves clothe its low points. Pop. about 700.

CHICLAJA a to Spain Audaloux prov. of and 12 m. S.E. Cadix, in a plain between two hills, and on both sides of the Liria. It is well built, and has a very cheerful appearance, the houses being all built of a brown stone white at snow and surrounded by gardens, which have wooden or iron railings, painted of different colours. Many of the streets, however, though spacious are badly paved. The principal buildings are the hospital or Casa de Misericordia, situated near the centre of the town, a magnificent building with an extensive garden and orchard forming a very complete establishment, both for the relief of the aged and the maintenance and education of vagrant and abandoned youth; another hospital for infirm persons of both sexes two parish churches, a well decorated theatre, capable of containing 1000 persons, a sonatorial building, now used as a prison, an old Augustine monastery now used for the courts and public offices and an

THE CASTLE CHICHEN ITZA.—From Rastrelli's Views of the Ruins in Central America.

from the same plain on which they are ranged, a lofty pyramidal mound crowned with a ruined building called the Castillo, represented as the encompassing wood-cut. The mound measures at the base on the N. and S. sides, about 196 ft. and on the E. and W. 202 ft. It is built up apparently solid from the plain to the height of 16 ft. The platform on the top of the mound measures 61 ft. from N. to S. and 64 ft. from E. to W. and the buildings measure in the same directions, 49 and 49 ft. respectively.—(Stephens's Yucatan.)

CHICHEBURY a city England, co. Essex on a gentle eminence nearly surrounded by the Larent, about 66 m. S.W. London, on the railway from Brighton to Portsmouth. A. J. old wall still in good preservation, of about 14 m. in

Argentine summary. The manufactures consist chiefly of linen, separate fabrics, earthenware, starch, and brandy. The trade is in corn sent into the interior where exported partly to America, and fruits and garden stuff for Cádiz. The annual fair is very numerously attended, but agricultural produce is the chief article dealt at. One of the principal attractions of Chichula is its baths which are much frequented, particularly by the inhabitants of Cádiz, to whom, indeed, most of the houses in the town belong. They have a temperature of 86° are chiefly composed of common salt, lime, magnesia, soda, and sulphur and are said to be very efficacious, particularly in cutaneous affections. About 1 m. S.W. Chichula is Barrova, where the British, under Lord Lynschoy, March 5, 1811, defeated the French under Marshal Vissier. P. 21 046.

CHICO a river Patagonia, supposed to rise in a lake in the interior. After a S.E. course, it falls into the estuary of Santa Cruz.

CHICUANA or **CHICUANA** a tn. La Plata prov. of and 25 m. S. by W. Salta, on bank Quebrada del Toro in a desert country. Pop. 2000.

CHICOREA the most N. of the Fjords mts. S. Pacific Ocean lat. 15° 48' N. lon. 179° 51' W. (n.) It is of an oval shape, and is formed of two lacunae, of considerable elevation: It is 3 m. long S.E. and N.W. and 12 wide, and is surrounded by a shore-reef which has no openings, except for boats.

CHICOVA a tn. in S.E. Africa cap. of a territory of same name, 7 m. S. Zambesi lat. 10° 30' S. lon. 32° 15' E. 300 m. N.W. Quilluana. It was at one time celebrated for its silver mines.

CHICSOI a river Guatemala, forming the head stream of the Lacunama. It rises in a mountain range about 40 m. S. the city of Guatemala, flows N.W. and, after receiving as its affluent the Pasion, San Pedro, and other minor streams, enters the Mexican state of Chiapas, where it assumes the name of Lacunama. Total course to the Mexican frontier, exclusive of windings, 150 m.

CHIESEN or **CHIESEN** a lake, in S.E. Bavaria, circle Insar dist. Trossburg, 49 m. S.E. Munich greatest length, E. to W. 10 m. greatest breadth, N. to S. 6 m. area, 56 ges sq m depth, about 480 ft. It is of an irregular shape, very much indented and contains three pretty islands—Krautinsel, Horrenwirth, and Frauenwirth. Each of the last two had at one time a convent. The shores of the lake are generally marshy but in the S. a range of hills descends inland, and forms a fine back ground. From these the lake receives numerous streams, particularly the Prien and Achen. It discharges itself at its S. extremity by the Ache. Since 1845 a steam-boat has plied on the lake, and furnished easy means of viewing the fine scenery around it.

CHIENTI—1 A river Central Italy The Marone, a lagoon of Cambrino and Macerata, rising in the E. slope of the Apennines, and after a course, chiefly N. by N. of more than 40 m. descends falling into the Adriatic 2 1/2 m. S.E. E. Ancona—2 A tn. Naples, prov. and 53 m. N.W. Foggia. Pop. 1000.

CHIERI (anc. *Carra Polenta*) a tn. Italy Piedmont, prov. and 8 m. E.B. Turin on the slope of a hill. It is surrounded by walls and is tolerably well built has four public squares several convents, and the largest Gothic building in Piedmont the church of Santa Maria della Scala, founded in 1400, annexed to which is a very ancient baptistry. The Dominican church was built in 1210. Chieri is one of the most ancient manufacturing towns in Europe. Its manufactures of fustians and cotton stuffs were annually made towards the middle of the 16th century and they still continue to flourish. It has also silk, cotton and linen-thread factories. Pop. 12,000.

CHIERI (anc. *Chavre*) a river almost wholly in France, but rising in the duchy of Luxembourg about 5 m. beyond the French frontier. It enters department Moselle near Longwy, and proceeding W. by a circuitous course, reaches Metz, department Meuse, proceeds E.W. joining r. bank, Meuse. Vol. 2.

about 4 m. above Sedan whole course, 55 m. of which about 15 m. are navigable.

CHIERRE or **CHIERRE**, a river Italy Lombardy which rises in a branch of the Rhaetian Alps, S. slope of Mount Adamo, about 20 m. W. Trunt, proceeds E. and then S.E., enters the valley of Sesbia, and forms Lake Iseo. Taking thence at Pieve, it proceeds S.E. till its junction with the Oglio a little to E. of Cennetto whence it flows S.E. and falls into the Po lat. 45° 2' N. lon. 10° 48' E.; whole course about 80 m. It only becomes navigable near its mouth.

CHIETI (anc. *Tusca Marrascorva*) a tn. Naples cap. prov. Abruzzo C. tra, on a hill, near r. bank, Pescara, 108 m. N. Naples. It is well built, and adorned with some handsome public edifices, contains a cathedral four other churches, two numerous several monastic establishments, an extensive seminary a royal lyceum, society of arts, agriculture and commerce, a large hospital several charitable institutions a *mont-de-piété* theatre, and as an industrial manufacturing town and other fabrics and has some trade in wool silk, wine wheat, and oil. It is the seat of an archbishopric, a high court of justice and a civil court. The ancient Tusca was the capital of the tribe of the *Marrucini*, and was one of the largest and most important cities in this part of Italy. It appears to have been possessed for some centuries by the Greeks, after which it passed successively into the hands of the Romans, Goths, Lombards, Franks and Normans. In 1802 it was taken by the French troops. Pop. 13,679.

CHIEVEI par Eng Merks 7837 ac Pop. 2029

CHIEVRES (anc. *Cervet*) a tn. Belgium prov. Han ant. 12 m. N.W. Mons, on the Humelle, near its junction with the Dender. It contains an old Gothic castle, a church, remarkable for the number of its fine ancient monuments, with various chapels an hospital townhouse and numerous educational establishments. A great number of individuals are employed in spinning flax and weaving and there is a considerable export trade in grain, flour oil liquors, &c. Chievres has also brick and tile-works breweries, salt-works, a tannery a dye work, several flour and oil mills a limestone quarry and limekilns a weekly market, and an important annual horse fair. Pop. 3055.

CHIGNAL par Eng W. York 2550 ac—1 (Specially) 476 ac Pop. 69—2 (St. James) 808 ac Pop. 218.

CHIGNAGO a bay and straits, Nova Scotia. The bay which runs E.N.E. may be considered the N.E. arm of the Bay of Fundy. It is divided from the Minas Channel by the peninsula of which Cape Chignago is the W. extremity. The width of the bay at its entrance, between Cape Chignago and the opposite point on the coast of Nova Brunswick, is about 18 to 20 m.—The straits in the neck of land, about 5 m. wide, by which the peninsula of Nova Scotia is connected with the N. American continent, situate between Bay Verte in Northumberland Strait, and Cumberland Head at the N.E. extremity of the Bay of Fundy.

CHIGNOLO a tn. kingdom of Italy Lombardy prov. and 16 m. E.E. Pavia. It is well built, and possesses a church, townhall and a handsome feudal palace. The neighbourhood is fertile and the inhabitants chiefly engaged in agricultural pursuits. A fair is held for cattle and grain in August. Pop. 3922.

CHIGWELI, a vil. and par. England co. Essex, the former agreeably situated 13 m. N.W. London close to Epping Forest, on the road to Ongar L. bank, Boding. It contains many good houses, and has an ancient church, also a grammar and free school, founded by Archbishop Hackett in 1539. In the former of which Wm. Penn, the founder of Pennsylvania, was educated. An annual fair is held Sept. 20. About 1 m. distant is Chigwell par. consisting of villas, and possessing extensive and beautiful views. Area of par. 4522 ac. Pop. 1985.

CHIHUAHUA a state, Mexican confederation, cap. same name, bounded N. by Upper California, E. by the Bravo del Norte and the desert of Bolson de Mapim; and on other sides by Durango Sonora, and Coahuila between lat. 27 and 32° 45' N. lon. 108 50' and 108° 40' W. area, 107,584 sq m. It is traversed by the Sierra Madre and the Sierra de Carney; and its most important water courses are the Rio del Norte, and the Conchos one of its affluents. The soil is ex.

travels there but the country abounds in gold, silver, copper, iron, saltpetre and other minerals. This state is greatly infested by the Apache Indians, who inhabit the S. parts of Upper California and the banks of the Rio del Norte, and carry on a series of constant hostilities against the Chihuahuas, preventing them from working their valuable mines to any profitable extent. Game of various kinds abounds in the state. Two species of bears are found in the mountains and elsewhere, and other deer of various kinds, are equally abundant on the slopes and in the plains. Hares, rabbits, wolves, with birds, reptiles, and a host of various kinds, are also common. Some little trade is carried on in the exportation of cactus and lead. Pop. 190,000.

CHIHUAHUA a very Mexican confederation, esp. of above state, on a small tributary of the Conchos, in the midst of a sterile plain, 210 m N by W Durango; lat. $28^{\circ} 50' N$ lon $104^{\circ} 17' W$ (L). The houses are generally well built and the streets regular. The cathedral is a large and rather imposing structure, of no particular style of architecture, but having a handsome facade with statues of the 12 apostles. A little below the Plaza Mayor is the unfinished convent of San Francisco, begun by the Jesuits in 1671 prior to their expulsion from the country and now converted into a state prison. The city is supplied with water by an aqueduct, supported by a number of stupendous arches and communicating with the small river Chihuahuilla, whence it supplies itself into a large stone cistern in the public square. The city is surrounded by minor mines, and contains many furnaces for smelting the ores. Here also is a mint, at which was coined in 1846, of gold, £23,400 and of silver £102,700. The people are described as being inhospitable to strangers addicted to gambling and of loose morals. The trade of the place is considerable. Chihuahua was founded in 1691. Its population, according to Mr. Hardy formerly amounted to 70,000 and its permanent inhabitants are now estimated, by Mr. Reuten at from 8000 to 10,000.

CHILILI a river, Chinese name, Manchouira, rising on the S. slope of the Hsienan mountains on the confines of Nihara, and after a course of about 450 m N N W to S S E, falling into the Amoor a little above Bagain Oala. It is very rapid and, at its confluence with the Amoor it is about $\frac{1}{2}$ m broad.

CHILIA, a river, Peru, flows in the Andes, and after a W course of about 105 m falling into the Pacific about 75 m S.E. Arequipa.

CHILIAIA, a Mexican confederation state of and 1.5 m S. Mexico about 10 m. from the S. bank of the river of the same name. lat. $17^{\circ} 5' N$ lon $99^{\circ} W$. It has several manufactures of silk. — The river Chilapa rises in the N part of the state La Puebla, near Tascalua, about lat. $19^{\circ} 20' N$ and flowing S., divides that state, longitudinally into two nearly equal parts, and falls into the N Pacific Ocean near lake Ocuila, about lat. $16^{\circ} 25' N$ lon. $99^{\circ} 15' W$. Its whole course is about 220 m.

CHILAU or **CHILAU** a small town Cayen W coast, 45 m. V Colombia lat. $7^{\circ} 48' N$ lon. $79^{\circ} 40' E$. on the S. bank of the stream of the same name.

CHILWILTON par Eng. Dorset 3100 ac. Pop. 394. **CHILWA** — 1. A small town, port, Peru 40 m. S.S.E. Lima, about lat. $12^{\circ} 29' S$ lon. $76^{\circ} 52' W$. The town which is about 5 to 10 m. N the port, is a miserable place but, from the numerous ruins scattered around, was evidently of some importance under the Government of the Incas. The inhabitants, who are Indians, and who have carefully avoided mixing with people of other races for upwards of 800 years employ themselves in plucking straw for hats, and sugar cane. The latter they make in a singularly beautiful style, with white and coloured straw which they plant into various figures and patterns. Some of these sugar cane tall, it is said, for upwards of 200. The country in the immediate vicinity is utterly barren. — 2. A small lake, Buenos Ayres, 42 m S. Cape St. Antonio, 42 m upon the coast.

CHILI or **CHILIA** an independent state, S. America, consisting of a long narrow strip of country on the W shore of that continent, bordering on the Pacific Ocean and extending from lat. $25^{\circ} 25' S$ to $45^{\circ} 30' S$ and between lon. 70° and $74^{\circ} W$. Its entire length from N to S, being 1550 m its breadth varying from 130 m at the broadest part, which is towards the S. extremity to about 88 m at the narrowest or N end. It is bounded, N by Bolivia, S by Patagonia and the territory of La Plata from which it is separated by the Andes W and S, by the Pacific Ocean. The country is generally hilly being crowded with ramifications from the Andes which gradually diminish in height as they recede from the central ridge and approach the sea, forming elevated plateaus often covered with timber and a rich vegetation, and between them deep valleys, some of them of considerable breadth, and many of them fertile, though numerous others are mere ravines. The richest and most luxuriant districts are in the S where the country is pleasing and picturesque, especially the valley of Aconcagua, which varies from 1 to 6 m. in width, and is covered with farm houses and hamlets, surrounded by trees and vineyards. Proceeding N towards Valparaiso the hills begin to look bleak and naked being thinly clad with a stunted brush wood. At Coguimbo even this brushwood disappears, its place being supplied by a scanty sprinkling of very grass. Farther N a scene of utter desolation presents itself the hills and plains being covered with bare sand, and no trace of vegetation visible.

The mean elevation of the great chain of the Andes that runs along the E limit of Chili is from 15,000 to 14,000 ft above sea level but many of the peaks rise much higher. The loftiest summits are the peak of Aconcagua S. of 22 the peak of Tupungato S. of 22 the volcano Maypo or Pucallanca near 34 the peak of Descabazco N. of 56 and the volcano of Antuco V. of 27°. A remarkable feature of the Chilean Andes is their range in many instances, so abruptly from the plains on which they stand that one foot may be placed on the latter and another on the base of a mountain rising 6000 or 7000 ft. high. Several mountain-passes traverse the great range of the Chilean Cordillera. The most frequented is that of Aconcagua, whose highest point is upwards of 12,900 ft. above the sea. Another at the pass of Portillo, upwards of 14,000 ft. There are, besides these the pass del Planchon the pass of Antuco, and others of less note. The portion of the Andes which forms the E boundary of Chili, is thickly studded with volcanoes, some of them of the most formidable description. They are most numerous S. of 36 where seven are found within a space not much exceeding 550 m. and it is supposed that as many still more exist both in this and other regions of the Chilean Andes. Few of them however are in a state of activity and hence the frequency, it is believed of these tremendous convulsions that are continually spreading terror and dismay throughout the country. The last visitation of this kind of a very memorable description, occurred on Nov 19 1822, when the town of Valparaiso Quilota, Casa Blanca, and Lanchi were destroyed, and a number of their inhabitants hurled in the ruins. The shock of this earthquake was felt at distances of 500 m. from its centre, which was centred at the S. of Valparaiso. A fine of coast, of 50 m. extent, was raised on this occasion nearly 3 ft. above its former level. On April 3 1851 another severe earthquake visited Chili. Opposite the mouth of the Maypo river it was felt 40 m. off at sea. About 300 houses in Valparaiso, including many of the principal public buildings, were rendered uninhabitable, or seriously injured and a lake calamity befell the capital, in which the damage done was even still greater. The coast is bold and rocky with deep water close in shore. The principal harbours are—Valdivia, Concepcion, Valparaiso and Quilota. There are few rivers, and only three or four that have water all the year round. The largest rivers are the Biobio the Copiapo, the Huasco,

and the Chupac, the others are mere mountain streams, which, having their source in the Andes have water only in the spring. The whole of Chili belongs to the basin of the Pacific, excepting the valley of Uspallata, in the latitude of Valparaiso, and formed by a bifurcation of the Andes, which sends its waters to the Atlantic.

Political Division.—Chili is divided into the following 12 provinces, and subdivided into 53 departments—

Province.	D. in	Pop.	Chief Town.	Area.
Atacama	2	21,000	Copio	8,000
Cochilco	2	94,000	La Serena	1,000
Antofagasta	2	110,000	San Felipe	8,500
Valparaiso	2	187,000	Valparaiso	60,000
Concepcion	2	80,000	Valdivia	20,000
Temuco	2	37,000	Temuco	4,000
Magallanes	2	11,000	Magallanes	1,000
Chilo	2	170,000	Chilo	3,000
Antofagasta	2	100,000	Concepcion	4,000
Antofagasta	2	28,000	Valdivia	2,000
Chilo	10	60,000	La Serena	1,000
Total	2	1,300,000	Area, 170,000 to 175,000 sq. m.	

Climate.—The climate of Chili is one of the healthiest in the world but the temperature near the sea-coast is less subject to variations than in the interior. The months of January and February are the hottest in the year the thermometer frequently rising to 90 and 95° F. In the shade but after sunset the air is cooled by a refreshing breeze, which continues during the night. Hail falls only in the winter months, June to September and after they have occurred, the whole country throughout the more favoured regions, is drenched with flowers. The rains often last several days, and are so excessively heavy as to occasion a general suspension of all active operations. Public offices are closed, shops and warehouses shut, and the streets deserted. In the interior parts of the Cordillera snow falls at intervals during the winter, and from June to November the more lofty ranges of hills, &c. of the range are covered with it. It, however, generally disappears before December although extensive patches may be met with in the deep gorges at more advanced periods of the year. In the central parts of Chili storms of hail, thunder and lightning are frequent in the winter season.

Minerals.—Gold, silver, copper, lead and iron are found in Chili the last two, though abundant are little sought after. Gold and silver are not considered much more profitable objects of pursuit, the expense of obtaining them often exceeding the value of the quantity obtained. Copper is the staple commodity of the country, there being according to Capt. Hall 500 mines of copper but one of gold, and 15 for one of silver. The copper mines are most numerous in the N. districts that of Copuapo is the most valued. About 80,000 quintals of copper are exported from Huasco, Coquimbo and Valparaiso annually and from 150,000 to 200,000 quintals, of 100 lbs. of copper ore are shipped annually to England, and 100,000 marks of 8 oz. of silver in bars. A large quantity of the copper goes to the E. Indies and the U. States. Zinc, antimony, manganese, arsenic, the sulphur, alum salt, and nitre are plentiful. Coal has been found near Concepcion, and is now wrought there.

Vegetable Products. *Agriculture.*—Though possessing many fertile tracts, the greater portion of Chili is unsuitable of cultivation being naked and mountainous especially towards the N. The S. provinces present a different appearance. Here a prodigious vegetation prevails dense forests are spread over the land, and the sides of the Andes are covered with herbaceous plants and flowers of the richest and most beautiful hues. Laurel, myrtle, cypress, and other evergreens, attain here a gigantic size their timber being available for various purposes. Hard woods, of different descriptions, also abound. The lands of Chili, says Mr. Miers, may be divided into two classes—those adapted for cultivation, and those in which cattle may be reared. No one must imagine, he adds, that any of the modes of farming which have been carried to such perfection in Europe have been adopted in Chili. We may remove from our minds all ideas of high level meadows, fine grass pastures, enclosures, farm-houses, sheds, barns, mow-lands, &c. and bring back our notions to a more primitive condition, and fancy the country in a wild and

natural state. Fences or inclosures are almost unknown the boundaries of estates being marked by rivers or ridges of mountains. The surface of a cattle farm generally consists of a series of heights, and of deep hollows and ravines, the first being studded with bushes, the intervals between which are covered with little flowers, herbaceous plants and tuberose roots which, after the first rains, produce a pleasing verdure, and afford a tolerable sustenance to the cattle. This show of verdure, however, lasts only for five months, or from May to October. In November the whole tract begins to assume a burnt-up appearance, and from December to May the country presents an aspect of extreme barrenness. Thus though great numbers of cattle are reared, paucity in the S. provinces their supply of food is still inadequate, and the consequence is, that both the beef and mutton are very inferior and the milk and wool equally indifferent. The implements of husbandry in use are of the most primitive description; the plough consisting of part of the trunk of a tree, with a crooked branch for a handle, and having a pointed flat-plate of iron nailed to the forepart of the trunk, which is wedge-shaped for a coulters and share. The yokes are fastened not to the shoulders, but to the horns of the oxen, and for a harness, a bag of bulrush loaded with stones is employed. In the N. districts maize is cultivated and in the S. wheat and barley the former is the staple of the country considerable quantities of flour being exported to various places. Legumes are grown abundantly especially different kinds of beans, quantities of which are also exported. Hemp is raised in the country N. of the Maipo and is reckoned superior to that of Russia. Vegetables are not much cultivated except near Santiago the capital. In the N. districts however potatoes are grown in large quantities. Fruits are abundant in the winter season—apples, pears, apricots, peaches, plums, pineapples, cherries, figs, grapes, oranges, lemons water-melons and gourds.

Animals.—Chili is remarkably free from the larger and fiercer animals, and from noxious insects and reptiles. The animals common to the continent however are found here including the guanaco a species of the llama the cougar or puma, the jaguar, monkeys, and the shark, remarkable for its offensive odour it emits. Among the feathered race are the great condor, vulture, pelicans, parrots, and parakeets. On the coast, whales dolphins, cod, pilchard, &c. are caught. Black cattle, as elsewhere mentioned, are raised in great numbers from 4000 to 20,000 being reared on one farm. The horses are strong hardy and capable of performing long journeys with very little sustenance. The mules and asses are also excellent. Sheep, goats and hogs abound but are of indifferent quality.

Manufacture Commerce.—The principal manufactures of Chili are ca. Chinaware jars, of a superior description, hampers, cloths, cordage, soap, copperware, leather, brandy, tallow and charcoal. The commerce of the country is increasing rapidly. The exports consist of copper, silver, wheat, linen, wool and hemp. Thirty thousand hides are exported principally from Valparaiso. Five to six hundred quintals of wool are shipped annually from Concepcion. The grain and country produce are generally sent to Peru and Ecuador. By far the greater part of the foreign trade is with Great Britain, from which the cotton goods imported in 1849, 1850 and 1851, were as follows—

Year.	Chili.	Others.
1849	10,000,709	14,007,616
1850	10,000,000	14,000,000
1851	10,000,000	14,000,000

Woolen goods hardware iron, &c. are also imported from Great Britain. In 1847 1073 vessels, ton 262,635 entered the ports of Chili and 1081, ton 305,516 cleared. The imports consist principally of linens from Germany, silks, paper, perfumery, leather, wax and brandy from France; silks, hankens, tea, sugar &c. from the E. Indies and China; tobacco, spermaceti, candles, oil, sugar and manufactured goods from the U. States; dyes, coffee, pearls, sugar cane, tobacco, cotton, rice, salt, and spirits from Peru and Central America. From La Plata and Brazil cotton, Paraguay tea, and European goods. The coins, weights, and measures are the same as those of Spain.

Government, Public Finance.—Chili is a republic, and is considered the best regulated in S. America. It is under a

President elected for five years and a council of state, together forming the executive power. The legislature is composed of a senate consisting of 20 members elected for nine years and a house of deputies consisting of a member for each 50,000 inhabitants, elected for three years. Foreigners require 10 years residence to obtain citizenship, if unmarried six years, if married three years, if married to Chilean six years, if married to foreigner three years. The revenue of the Government in 1852 amounted to \$1,098,096 and the expenditure to \$987,460. The international war consolidated debt amounted in 1854 to \$286,760 bearing interest of 8 per cent. The foreign debt, held wholly in England amounts to \$420,800.

The peace establishment of the army is 3000 men, eight companies of foot and horse artillery, two regiments of cavalry and three battalions of infantry. The navy consisted in 1854 of eight vessels, carrying a total of 98 guns.

Catholicism is the state religion, other sects being merely tolerated.

People, Customs, Education, etc.—The Chileans are mostly of Spanish and Indian descent. They are remarkable says Captain Wilkes, for their love of country and attachment to their homes. They are generally fond of agricultural pursuits and the lower orders are better disposed towards foreigners than in most other parts of S. America. Schools and colleges have been established, and a desire to extend the benefits of education is evinced, having been of late one of the constant arms of the Government. The Chileans, though possessing few positive virtues, have few vices of a very flagrant character. Instances however of dissipation and profligacy are by no means rare while cunning and a propensity to pilfering, are pretty general amongst the lower classes. The Chileans are represented however as possessing a considerable amount of activity and to form an honorable exception to the indolence which generally characterizes the Spanish race. They are extremely fond of the dance called the *Sancti*, which may be considered the national dance. It is performed on a kind of stage, under an open shed and somewhat resembles the fandango. The higher classes of females have the name of being virtuous and estimable in their domestic circle but it can hardly be said that they are beautiful. They dress their hair with great care and taste, leaving it to fall down in long tresses behind. Their feet are small and they have a graceful carriage. The French fashion of dress prevails, with some not ungraceful modifications, as may be seen in the accompanying wood-cut, and they are just beginning to wear bonnets. The attire of the men however seems to partake but little in the grace of such distinctions that of the women.

OF MUMER OF THE FEMININE OF CONCEPTION

to chief points are the never absent poncho, and a circular broad brimmed hat according to many of them particularly pleasing. The advancement of civilization is rapid and the imitation of foreign habits and customs will soon predominate

over those of Chili. In towns, the evening owing to the excessive heat of the day is the gay period, then the shops are lighted up, the streets crowded with females, unattended parading from shop to shop, for the men never walk with the women the public walks are crowded with people of all

CITY OF THE BY HOUSE OF A STATION—FROM THE

classes, who meet to enjoy the cooling breeze. This continues till near midnight, when having previously supped they retire to rest, the bed being often laid in the open air from which they again rise at day-break in the morning. It is customary to dine at twelve or one o'clock and all without exception make it a rule to sleep from that hour till sunset.—(Miers, vol. i p. 890.)

The Chileo Indians, or aboriginal population of Indian Chili the country to the E. of the river Biole are more advanced in civilization than the wandering Indians of the Pampas. They excel in weaving and in the manufacture of potteryware. The women are laborious, not only spinning weaving and dyeing, operations performed solely by them but cultivating the land, while the men stand by unemployed. They know nothing of the fine arts but are generally of amiable disposition, possessing few of the vices of other primitive races. They live in a state of independence being subject to their own chiefs only and being governed by their own laws.

History—Chili originally belonged to the house of Peru from whom it was wrested by Alvaro, who in 1535 sent Almagro to invade the country he himself having previously conquered Peru. Almagro carried all before him till he encountered the warlike tribes of the E. who arrested his progress. He was succeeded by Valdivia who completed the subjugation of the country with exception of Arica. From this period (but continued a colony of Spain till 1810 when a revolution commenced which terminated in 1817 in the independence of the former. Several internal commotions have since occurred, particularly in 1830 when some violent proceedings took place on the part of the Government opponents, but nothing very serious resulted from them. An attempted rising, made, April 20, 1851 by Colonel Urriola and a battalion of troops, in Santiago was speedily suppressed by the President and ministers backed by the National Guard. The leader of the revolt was slain in the conflict, and other 26 lives were lost. The principal towns are Santiago, the capital, Valparaiso, the chief port, Coquimbo, Concepcion, and Valdivia. Pop. estimated at 1,200,000.—(Narrative of the U. States Exploring Expedition. Miers's Voyage to Chili, and La Plata Hall's Voyages From Tschudi's Peru Exploring Voy. of the Adventure and Beagle.) (Add. See ECH)

CHILICOTHE, a tn. U. States, Ohio, 44 m S. Columbus & bank, Scioto. The principal streets run parallel to the river and are crossed by others at right angles. It has a courthouse and jail, two market-houses, four churches, and two academies. The Ohio Canal passes through the town. Pop. 2077.

CHILKA LAKE, a remarkable lake, Hindoostan, prov Orissa, 60 m. S. by W Cuttack, generally supposed to have been formed by an irruption of the ocean. It is 65 m. in length, by 18 in breadth, and is separated from the sea for many miles by a long narrow strip of sand, seldom more than 300 yds in breadth. To the S. it is divided into numerous narrow channels by large insulated islands. The general depth is about 4 or 5 ft. greatest depth, 8 ft. It is believed to be rapidly filling up with the sand and mud brought down by the streams that fall into it. On the Cuttack side, the shores are flat, marshy and destitute of picturesque beauty but the opposite banks present some fine scenery. The islands consist of huge rounded blocks, of a highly indurated porphyritic granite containing large crystals of felspar, tased and piled on each other in the wildest confusion exhibiting every symptom of violent convulsion and presenting the most extraordinary and fantastic forms. They are studded with small hamlets, as are also the banks of the lake. The lake yields valuable salt, called *Karkash*, obtained solely by evaporation. Extensive fisheries are also carried on in it, the produce of which, when dried, forms a considerable article of export.

CHILKHAH an island in Hindoostan, prov Delhi, on the borders of Kunaw 110 m. N.E. Delhi lat. 29° 34' N. lon. 79° 7' E. It is one of the principal marts of trade with Kunaw, and through that district with Tibet and Tartary but is abandoned in the unhealthy season, when malaria prevails.
CHILAMBARAM a maritime in Hindoostan Carnatic, 84 m. S. Pondicherry lat. 11° 28' N. lon. 79° 47' E. In the neighbourhood are some celebrated antique Hindoo temples. There was an extensive indigo manufactory here some years since.

CHILIANWALLA A. a vil Punjab, about 5 m. from 1 bank Jullum lat. 32° 37' N. lon. 75° 50' E. About 14 m. N. from this village was fought, on January 13 1849 the celebrated battle which now bears its name between the Sikh army and the British forces under Lord Gough. The result of this engagement was more than doubtful, the loss of life was more than usually heavy. On the side of the British 2389 officers and men were killed and wounded on that of the Sikhs 4000. The British remained masters of the field but the Sikhs, who fought with great bravery and had taken several guns and standards of colours, were found on the following day in compact order and ready for another encounter which in fact took place eight days afterwards, at Goofect, about 27 m. W. Chilianwalla, when the Sikhs were not only defeated, but their military power nearly annihilated, with comparatively small loss to the British.

CHILLON a famous castle, Switzerland, can. Vaud, on the Lake of Geneva, 64 m. S.E. Vevey. This castle was built in 1218 by a Count of Savoy and was once an important stronghold, guarding a mountain pass. France restored prior of St. Victor Geneva, was imprisoned here from 1530 to 1536 it being at once a prison and a fortress, like most of the great feudal castles. It is now partly used as a military storehouse; and, having acquired additional interest from Byron's poem. The prisoner of Chillon is much visited.

CHILLON a town in Spain, New Castile prov. of, and 64 m. S.W. Ciudad Real on the crest of a hill, surrounded by lofty and rugged mountains. It contains a parish church a large and handsome edifice, consisting of three naves several primary schools an hospital and almshouse. The inhabitants are chiefly employed in the quietest of mines, which are extensively worked in the neighbourhood. Chillon obtained an unenviable notoriety in the beginning of the 16th century by the cruel bigotry with which it persecuted all who were supposed to be infected with heresy. A woman, who distinguished herself in this infamous work, has a marble statue erected to her honour in the public square. Pop. 2415.

CHILMANT (Chalmant) a in Hindoostan, prov Bengal, on the Brahmaputra, 120 m. N. by W Dacca lat. 26° 50' N. lon. 88° 42' E. An annual festival is held here, on the Varuni Chur a sandbank in the bed of the river, which is frequently attended by 60 000 to 100 000 pilgrims and others.

A considerable amount of business, likewise, is at the same time transacted.

CHILMARK, prov Eng Wilt 8154 ac. Pop. 610

CHILOE a large isl. S.W. coast of S. America, and forming with a number of smaller islands lying between it and the mainland a province of the Chilean republic. It is situated off the S. extremity of Chili, and W. coast of Patagonia, being separated from the former by a narrow channel, and from the latter by a passage about 35 m. wide, called the Gulf of Amad. In W. point, Capa Quilan, is lat. 48° 17' S. lon. 74° 28' W. (u.) It is 120 m. in length, N. to S. and about 50 in breadth at the widest part, but a deep indentation in its centre reduces its breadth at that point to little more than 15 m. It is mountainous, and is covered with magnificent but almost inaccessible forests, which give to the whole island a singularity agreeable and picturesque appearance. The W. shores are composed of rocky masses, rising abruptly from the ocean to the height of 1500 or 3000 ft. but the E. shores are of moderate elevation. There are numerous inlets on the coast, which afford secure anchorage, but few harbours of any extent. The principal are St. Carlos, Chacao, Delahoe, and Castro. Of the interior little is known. No mines have yet been discovered in Chiloe, or any of the islands of the province, although many of the streams are strongly impregnated with mineral substances. Some have a copperish taste while others pure and lumpy appear to be impregnated with carbonate of iron. Traces of coal also have been found in several parts. The climate is extremely moist and cool, but far from unhealthy as the appearance of the inhabitants sufficiently proves both men women, and children having fair and rosy complexions. Although perfectly salubrious, it is however on the whole, very unpleasant, being damp and wet for at least 10 months of the year while, even in the summer, there are seldom two fine dry days in succession. The soil is in many parts rich though never manured it consists of dark mould and fine loam upon chalk. The trees of which the forests are composed are chiefly a bastard cedar of great durability and well adapted for beams and rafters. The other more valuable trees are the avellana (*Quercus heterophylla*) the coble (*Fagus obesa*) Tigu, laurel manni marmo, and sumo (*Myrica cuneata*). The cultivated productions are wheat, barley oats, maize potatoes all sorts of European vegetables and fruits, thus two fine dry days in asplines and years. The grape manured are however produced in but small quantities and only in a few spots. For on account of the constant moisture, cereals do not thrive. Potatoes grow wild in Chiloe, but though adjoining the native land of that root, they are greatly inferior to the cultivated kind both in size and its use. Agriculture is little understood in the island, and the implements used are of the rudest description they have no plough but, instead two long pointed poles worked by two Indians, who by a peculiar mode of managing these apparently unsuitable implements contrive to produce a furrow which they repeat at a vast expense of labour until the entire surface of the field is broken up. Oxen sheep horses, and pigs are bred. The horses are small and not hardiely formed but very spirited and strong. The cows, sheep, and swine are small and lean. The last swarm throughout the island, being domesticated, and generally living in the houses. The hams of Chiloe are celebrated for their quality and high flavor. Twisted olives, particularly ducks, which, as they are not much approved of for eating have wonderfully multiplied, although it was only about 1850 they were first introduced. Amongst the native wild birds, the most remarkable are the eagle the osprey and osprey, and the barking bird. The harbours and coast in general abound with all sorts of fish, including the finest oysters and other shell fish. The supply of the latter is apparently inexhaustible and the quality of many of them excellent. They form a principal article of food with the inhabitants, who have a peculiar mode of cooking them, by which they are rendered exceedingly tender and palatable. The use with which this descript on of food can be obtained, is said to be the principal cause of that want of industry which is so remarkable in the Chilotes. The principal manufactures of Chiloe, as of the other islands that compose the province, are some coarse woollen cloth, two and a half or three yards long, and three quarters of a yard wide used for men's garments and of very durable quality. Potatoes, a kind of cloak

blankets, and a variety of other furs, known only by their native names are also among the manufactures, but none, with exception of the ponchos, are exported a sufficiency for home use only being made. Cabbages, lemons, and roses are also manufactured. The exports consist chiefly of lemons, plums, and bread, a little wheat, some dried fish, straw and brooms. The imports are sugar wine, brandy, salt, woollen apparel and household furniture. The inhabitants of the island consist of whites, Indians, and people of mixed blood. The Indians, who are of the Arawaca race, are now few in number they are short and thick-set, and have long, straight coarse hair. Their faces are round and full eyes small and countenance wanting in intelligence. The whites are either Chubcos or Spaniards the latter are almost the only Europeans who have become settlers here. All classes are of good disposition, obliging, temperate and honest. Murder robbery and drunkenness, are unknown the last never being seen except when European vessels are in port. No private dwelling in town or country has a lock on the doors. The dress of men in the lower orders consists of a pair of trousers and a shirt, over which is thrown the all-concealing poncho. The women are as slightly clad but instead of a poncho they wear a rebozo, or shawl, which, however is very often depressed with the language in common use is Spanish, the original Indian tongue being almost forgotten.

—The province of Chiloe is composed of the island just described of 65 smaller islands situate between it and the coast of Patagonia, and of which 50 are inhabited, and of that portion of the mainland lying between its extreme S. point and the S. bank of the Manifiesto or about lat. 42° 23' N. The civil political and administrative Government of the province is exercised by an intendant or civil Governor who is an army man, and by the commander of the forces either in person or by deputies the latter governing in their respective districts. The principal revenue consists of a tax to the extent of a tenth of all produce which is farmed out annually and yields from £1600 to £1800. The chief towns are San Carlos, the capital situate in a fine bay at the S. extremity of the island and Castro, in the centre on the E. coast. Pop. of Chiloe and islands attached to it, in 1833 45,833. —(*Voyage of the Adventure and Beagle* Von Teuch's *Pura* Capt. Blinckley in *Four Voy. Voy. Voy.*)

CHILON a vil. B. h. v. dep. of 130 m. S.W. Santa Cruz de la Sierra, on the frontier of dep. Chuquisaca. It is mostly in ruins, and has in an unhealthy district the most of the inhabitants being afflicted with gonorrhea. In the vicinity potatoes, truffles, tobacco and pimento are cultivated for exportation. Pop. 1,000.

CHILPAN7INGO a tx Mexican confederation state of 130 m S by W Mexico. In a fertile valley upwards of 4000 ft. above sea level on the road to Acapulco. Pop. 2700.

CHILTERN two pars. Eng. Wilt. — 1 (AR. Saints) 4476 ac. Pop. 4,000. — 2 (AR. J. J. M. ac. 1 up 349.

CHILTERN HILLS, a range of flat and chalk hills, England, extending from Henley-upon-Thames, in Oxfordshire, to Tring in Hertfordshire passing through the centre of the county of Buckingham, where its loftiest summit attains a height of 906 ft. above sea level. These hills were anciently covered with forests, and were infested by numerous bands of thieves. To protect the inhabitants of the neighbouring districts from the depredations of these banditti an officer was appointed by the Crown, called the steward of the Chiltern Hundreds, and although the duties have long ceased, the office still exists, and is made use of to afford members of the House of Commons an opportunity of resigning their seats when they desire it. Being a Government appointment, though without either duties or emoluments, the acceptance of it disqualified a member from resigning his seat.

CHILTHORNE Downes par. Eng. Somerset 1392 ac.

CHILTINGTON, a vil. Eng. England, co. Sussex,

4½ m. N.W. by N. Lewes. It has a handsome chapel of 600. 1 m. 800 — 2 West par. Eng. Sussex 3917 ac. Pop. 660.

CHILTON several pars. Eng. — 1 Barks 1416 ac. Pop. 282. — 2 Bucks 2080 ac. Pop. 398. — 3 Suffolk 9½ m. S. W. 1½ m. — 4 Farnham, Somerset 631 ac. Pop. 118. — 5, 1½ m. by Barks 3740 ac. Pop. 748. — 6 (Trinity) Somerset 1848 ac. Pop. 53.

CHILVERN-Corcor par. Eng. Warwick 5780 ac. P 2612. CHILWELL a vil. England, co. of and 4 m. S.W. Nottingham, containing a Methodist chapel a Sunday school, and two almshouses. The inhabitants are chiefly engaged in the manufacture of stockings and lace. Pop. 760.

CHIWORTH par. Eng. Hants 1400 ac. Pop. 158. CHIMAL or CHIMAY a tx Belgium, prov. Hainaut, 81 m. S.E.E. Mons, at the S.E. extremity of the province. It is commanded by a castle, built on a huge rock in its centre, and surrounded by an extensive park intersected by the river Maniche. The streets are regular and well kept; and there are a church and college a dye-works, and several breweries and considerable manufactures of woollen and cotton fabrics, lace, tobacco, leather and hardware. Marble is extensively quarried in the vicinity and forests, with iron, timber and agricultural produce, its principal trade. Three fairs are held yearly. Pop. 2922.

CHIMALAJA a vil. Central America, state of and 55 m. N.E. Guatemala. Several years ago it contained about 90 houses and the ruins of a church.

CHIMANAR, a group of islets, Caribbean Sea, off the coast of Venezuela about lat. 10° 15' N. lon. 64° 51' W.

CHIMBARONGO a river Chile, prov. Colchagua. It rises in the Andes, about lat. 34° 45' S. flows in a N.W. direction to lat. 34° 2½' where it is joined by the Tinguirica, the united stream subsequently joining the Rapel at lat. 34° 12' It waters and fertilizes some fine valleys, abounding in pastures where vast numbers of cattle are reared. There is a small VILLAGE of the same name on its S. bank, 10 m. S. San Fernando.

CHIMDO a tx Ecuador 69 m. N.E. Guayaquil on a river of same name. It carries on an active transit trade with Peru.

CHIMBORAZO a well-known mountain S. America, and the culminating point of the Colombian Andes 10 m. S. by W. Quito and about 110 m. from the coast lat. 1° 39' S. lon. 79° 5' W. It was long believed to be, not only the highest summit of the Andes but the highest in the world. It is now known to be the sixteenth highest peak of the Andes only being surpassed by four in Peru and one in Chile while it comes far short of the culminating peaks of the Himalaya chain in which occur at least 18 summits of much greater elevation. The height of Chimborazo, as ascertained by Humboldt, is 21,424 ft. above sea level, but above the valley of Quito which forms its base is only 10,000 ft. an apparent height not quite equal to that of Mt. St. Blanc above the valley of Chamonica, and much less than that of Mount Ararat above the plain of the Aras. The vast mountain, the top of which is covered with perpetual snow presents a most magnificent spectacle when seen from the shores of the Pacific, after the transparency of the air has been suddenly increased by the long rains of winter. It was ascended in 1802 by Humboldt and Bonpland to the height of 19,228 ft. and in 1851 by J. R. Bonussagant to the height of 19,699 ft.

CHIME ANIPES PICK a river Lower Canada, falling into the Gulf of St. Lawrence N. side, about 30 m. S.W. Sever Island Bay lat. 50° 25' N. lon. 66° 40' W. after a S.W. course of about 100 m.

CHIN YU TAO an lat. China Yellow Sea, W. coast Corea, lat. 36° 18' N. lon. 123° 10' E.

CHIN-GAR or TCHIN NEAR a tx China, prov. Quingse, on an island of the Ng-yu Kiang lat. 23° 15' N. lon. 106° 25' E.

CHINA SPA that part of the N. Pacific Ocean bounded N. by Formosa, N.W. by China W. by Annam and the Malay peninsula, S.E. by Borneo and E. by the Philippines. It contains numerous islands, receives several considerable rivers, and forms the important Gulfs of Siam and Tongkin. The currents in this sea are very mutable, depending much upon local circumstances.

CHINACHIN a tx Nepal r. bank of an affluent of the Gogra lat. 28° 10' N. lon. 81° 40' E. It is a large and scattered place. All the houses are built of brick or stone, and have flat roofs. It contains two remarkable temples and has a daily market, in which, amongst other things, are exposed to sale two highly esteemed birds, known by the names, respectively of the massal and dampfya. There are also exposed to sale on these occasions many sharp and goats, loaded with salt, musk, medicinal herbs, &c.

CHINANDEGA a to Central America, Nicaragua, 20 m. N.W. Leon lat. 12° 30' N. lon. 87° W. It is closely built towards the centre, but on the outskirts the houses are mostly furnished with gardens which keep them about 40 or 50 yards apart. The fences are often of bamboo, but more frequently of the cylindrical maguey, which runs up to 20 ft. The houses generally built of adobe are of one story, with an open court in the centre. The church is large, and a notable building. The produce of the vicinity is chiefly maize, sugar-cane, cotton, fruit, poultry and hules. Coffee also has been grown and produces well, but none has been yet exported. The population has been estimated at 8000.

CHINCHA 181, LAND 181 A group of small islands off the coast of Peru lat. 15° 58' S.; lon. 76° 28' W. They are granitic, arid, and destitute of vegetation, and the coasts bold and difficult of access. Immense deposits of guano were discovered on these islands a few years ago. On the N island this substance was said to be 30 ft. thick in 1846.— 2 Town and river on the main and of Peru nearly opposite the islands the former is 30 m. N. Pisco, and the latter about half way between these two places.

CHINCHAYOCUE (LAKE) Peru, prov. of and 12 m. S. Pisco lat. N.W. extremity is on lat. 10° 42' S. lon. 75° 40' W., at a height of 13,000 ft. above sea level about 36 m. long, and 6 or 7 m. broad. It is the largest of the S. American lakes next to the Laguna de Titicaca. As Chancha coasts lower, by various outlets, much more water than it receives from its tributary sources, it is evident that it must be fed by subterranean springs. Its marshy banks are overgrown by totora (*Alcaldecola totora*) and are inhabited by numerous water fowl. The Indians entertain a belief that this lake is haunted by huge fish-like animals, which at certain hours of the night leave their water abode to prove to the adjacent pasture lands, where they cannot graze have among the cattle. The S.W. end of the lake is intersected by a marshy place of lowland, interspersed with swamps, called the *Chancha*, which forms a communication between the two banks of the lake.

CHINCHU a report in China, on a bay of same name lat. 24° 55' N. lon. 118° 53' E. It is a place of some trade and the river has sufficient depth of water for vessels of 17 ft. draught, to come within 7 m. of the harbour. Junks lie close to the town but cannot pass the bar excepting at high water. In the bay is a station for merchant vessels.

CHINCHU 11 A. city Spain, Murcia, prov. of, and 10 m. S.E. Albacete, on a rocky eminence. It is surrounded by a wall flanked with towers, entered by three gates, and commanded by a castle. The houses are in general substantially built, and form several regular streets and seven squares, the principal of which is lined with handsome edifices, and ornamented with rows of balconies. Its handsome parish church has three naves, and a lofty tower containing six bells the machine is well decorated, and has many valuable pictures and other works of art. The city also has several chapels and convents, town and chapter houses, a prison, hospital, theatre, barracks, store-houses, seminary, poor house, Latin and numerous primary schools. Manufactures—linen, woollen and kaespan fabrics, glass, earthenware, tiles, bricks, leather shoes, hardware, brandy wine and oil. Trade—cattle, wool, grain, fruits, building stone, &c. Numerous quarries of granite, alabaster, gypsum and lime-stone are wrought in the vicinity. Two annual fairs, for cattle and general merchandise, are held in March and August. Pop. 7465.—(Oxley).

CHINCHON a tn. Spain New Castle, prov. of and 23 m. S.E. Madrid, agreeably situated on the brow and summit of a hill well built houses all of two stories, often handsome, and generally provided with large subterranean cellars for the preservation of wine. In the centre of the town is a public square of an oblong shape, and tolerably level. The streets are for the most part spacious regular and paved but some of them, from the site of the town, are necessarily steep. They are all well drained. The principal buildings are a handsome modern church, completed in 1840, to replace one which the French had burned down; the public courts and offices, occupying the buildings of a suppressed Augustinian convent; the grammar school, an hospital and storehouse. The inhabitants are chiefly employed in agriculture but there are some manu-

factures of common linen, leather and earthenware and several mills. Pop. 6288.

CHINCHOO a tn. in Hindoostan, presid. Bombay prov. Aurangabad lat. 18° 37' N. lon. 78° 56' E.; on the road from Bombay to Poona. It is a thriving commercial town, with many good houses and shops but is chiefly remarkable as the residence of Chintaman Das, considered by a great proportion of the Mahatras to be an incarnation of their favourite deity Ganesha.

CHINE (La) lv. Lower Canada. See LAMIER.

CHINESE EMPIRE an immense territory stretching from the centre to the E. extremities of Asia and occupying nearly a third of the surface of that continent between lat. 18° 20' and 56° N. and lon. 70° and 143° 30' E. bounded N. by Siberia, W. Independent Tartary and the Punjab S. Hindoostan, Burmah, Laos Annam and the China Sea, E. the forest areas of the N. Pacific Ocean, under the names of Tongay or E. Sea, Whangho or Yellow Sea, Sea of Japan and Sea of Okhotsk greatest length S.W. to N.E. 8350 m. greatest breadth 2100 m.; area, about 5,000,000 sq. m. This vast empire is usually divided into China proper which forms its nucleus and the following dependencies—Korea or Corea, Manchuria, Mongolia, It including Bureghia and E. Turkestan Koko-nor Tibet and numerous islands the largest of which are Formosa and Hainan. The authority which the Chinese exercise over their dependencies is by no means uniform. Some of the dependencies, as Manchuria, are so closely connected with the empire, as almost to be incorporated into it, while others are merely tributary and not a few so independent as to do little more than profess a nominal allegiance. As the dependencies will be described under their respective heads it may be sufficient here to give a general idea of the whole empire by mentioning that it has a coast line of 3850 m. a extent of 12,000 m. an area nearly equal to a tenth of the habitable globe and a population of at least 400,000,000.

CHINA PROVERB (see *Chinese Proverbs*) Middle Kingdom forms the S.E. portion of the Chinese Empire and occupies about a third of its whole extent. Not including the island of Hainan it lies between lat. 20° 30' and 41° N. and lon. 98° and 123° E. and is bounded N. by one of the most remarkable of human structures the Great Wall which proceeds directly over mountain and valley and, for a length of 1250 m. forms the barrier between China and Mongolia W. Tibet, S. Burmah, Laos Annam and the China Sea, and E. the N. Pacific Ocean. Extending a considerable prominence on the N.W. a second in the N.E. and another of smaller dimensions in the S. it bears no considerable resemblance to a semicircle, the diameter of which has obliquely N.E. to S.W. for a length of about 1600 m. while the curve bends round from each extremity and attains its greatest convexity in the E. The coast line exceeds 3500 m. and the mainland frontier 4400 m. area, 1,297,998 sq. m. or more than a third that of Europe. For administrative purposes it is divided into prov. ones, the names, areas and population of which are as follows—

Name.	Area in sq. m.	Population	Prov. sq. m.	Capital.
Chihle or Pechilin.	89,949	27,990,871	478	Peking.
Shantung.	85,104	28,265,416	511	The new do.
Shensi.	54,956	14,704,910	243	The new do.
Honan.	68,104	23,027,171	254	Kao-fu & Co.
Kiangsu.	44,881	27,548,101	214	Nanking.
Shanghai.	68,461	84,198,069	774	Shanghai.
Kiangsi.	72,178	21,499,999	461	Ning-chang-fu.
Chihing.	20,216	25,466,784	107	Hang-chang-fu.
Yunnan.	68,461	14,777,610	276	Yunnan-fu.
Hopei.	70,480	27,570,068	217	Woo-chang-fu.
Hokan.	56,830	18,468,607	114	Chang-chang-fu.
Shensi.	67,650	10,877,848	114	Shan-shan-fu.
Korea.	68,808	18,198,123	106	Yan-chang-fu.
Seikien.	104,600	31,445,678	158	Ohung too-fu.
Shensi.	70,484	18,147,607	114	Chang-chang-fu.
Guangdong.	70,290	23,118,996	94	Kao-fu & Co.
Kochin.	64,444	8,868,119	83	Woo-yung too.
Tuamoo.	107,969	6,661,260	51	Tao-tai-fu.
	1,297,080	387,828,907		

Physical Features.—Owing to the barriers, both natural and artificial which guard the frontiers of China, and the rigid exclusion of foreigners from its interior, great part of the country

must be regarded as a *terra incognita*. The coast line, which could not be made inaccessible, is pretty well known. Forming an irregular curve of about 2000 m. it gives about 1 m. of coast for every 520 m. of area. One of its peculiar features is the vast number of inlet groves by which it is bordered. It is not deeply penetrated by gulfs. The only one of great extent being that of Pechelie in the N.E. but numerous indentations of sufficient dimensions to form safe and spacious roadsteads are found in a cry quarter. With exception of a bold and rocky peninsula in the province of Shantung, the river, from the gulf of Pechelie S. to the island of Chusan, is flat, and in many places so little raised above the sea level, as to be extremely inundated during a continuance of strong winds. From Chusan to the mouth of Canton river it is usually rocky bold and precipitous; from this point S.W. falls, occasionally interrupted by bold headlands, again prevail. The interior of the country commences in the N.W. in a series of lofty mountain ranges, forming the abutments of the great table land of Central Asia. The principal chain, called Yun-lin, has its main axis N. to S. Its average height is not known, but many of its summits are described as towering far above the blue of perpetual snow. Its most important ramifications take an E. direction, and becoming the leading water sheds of the country divide it into three great basins, the waters of which are accumulated in mighty rivers, and carried E. to the sea. The general slope of China, as thus indicated by its prime ridges is W. to E. the mountains lowering gradually as they proceed towards the coast, and ultimately sinking down by a succession of descending terraces into level tracts the largest of which called the Great Plain, has a length of not less than 700 m. and a width varying from 150 to 400 m., and consisting generally of a deep alluvium which is of unequal fertility and probably maintains a denser population than any other portion of the earth's surface of similar extent. The geology of China is very imperfectly known, but there is no doubt that all the leading geological formations are found in it. Primary formations are most largely developed in the mountainous regions of the W. where granite, gneiss, and primitive schists prevail. The same formations exist to a more limited extent in the S.E. where black mountains of granite in that district its distinguishing feature. The secondary formation including the carboniferous and cretaceous systems occurs to a small extent in the central province of Honan, and the space traversed by the imperial canal in uniting the Hoang-ho and Yang-tse-kiang, but more largely in the neighbourhood of Peking, where a mass of no great width but considerable length, forms an irregular curve from N.E. to S.W. and contains beds of coal from which the capital and the surrounding districts obtain their principal supplies of fuel. The tertiary formation has its largest development in the N.E. and probably underlies the greater part of the alluvium which covers the surface of the Great Plain.

Rivers and Lakes.—No country of the world is better watered than China. The Yang-tse-kiang which traverses the country centrally W. to E. has a course of 2900 m. The Hoang-ho, the next in size, has a course of 2000 m. during the larger and lower part of which it gradually approaches the former and being connected with it by the imperial canal which has a length of 700 m. furnishes what is said to be the most magnificent system of water communication in existence—a system which brings all the provinces into direct communication with each other, and gives an inland navigation which meets with only one interruption from Canton to Peking. Besides these rivers and their numerous tributaries, the most deserving of notice are the Hong-kiang of considerable size but still more commercial importance, having its embouchure at Canton and the Zu-ho which, instead of the E. course followed by the great rivers of China, flows N., forming part of the line of the Imperial Canal and falls into the Gulf of Pechelie. The lakes of China are mere dilatations of the rivers and of small dimensions, are not individually of great extent. The largest, Tungting province Honan, which furnishes an important affluents to the Yang-tse-kiang has a extent of 220 m. The next in size, Poyang, province Kiangsu, is 90 m. long by 20 broad abounds in fish and is remarkable both for the picturesque scenery around it and the numerous beautiful and populous islands which it encloses in its bosom.

Climate.—The greater part of China belongs to the tem-

perate zone, only a small portion of the S. lying within the tropics. It has what is called an excessive climate, and has a far greater range of temperature than is usual within the same parallels of latitude. Peking, the capital is nearly a degree S. of Naples, and yet while the mean temperature of the latter is 68° that of the former is only 54°. In summer however the heat reaches from 90° to 100° in the shade, while the winter is so cold that the rivers usually continue frozen from December to March. Hence in the N. of China dikes, the common dress of summer are in winter exchanged for fur and woollens. At Hong Kong notwithstanding the influence of the sea is checking extremes, the thermometer in June and July the hottest months, frequently stands at 90° and in winter from December to March sinks nearly to the freezing point. At Canton and the adjacent hills, snow though rarely has sometimes fallen. At Shamp-hoo lat. 31° 30' the range of temperature is still greater the maximum reaching 100° and the minimum falling at least 30° below freezing or 12° Fah. Still the climate is ecologized as one of the finest in the world. In the S. the S.W. and N.E. monsoons blow with great regularity and nearly divide the year between them. In the N. they are more variable, and the wind not unfrequently blows from other quarters. Among the greatest scourges of the country, and perils of the adjoining seas, are the dreadful gales known by the name of typhoons, a corruption of the Chinese Ta fung or great wind. They never fail to commit great devastation though their effects are doubtless much modified by the dilated and timely notice which they give of their approach and the consequent preparations which are made throughout the whole of the threatened districts to guard against them.

Natural Productions.—From its vast extent the varieties of structure in its geological formation and its range of temperature which includes both tropical heat and almost Siberian cold, and is so widely that much have been estimated from the number of degrees of latitude over which it extends, China naturally contains numerous specimens belonging nearly to every class of the three kingdoms—the mineral animal and vegetable. A brief reference to each is the utmost that can here be attempted.

Mineralogy.—Perhaps the only metal which China is not known to possess is platinum. Gold, though not thought to be very abundant, is obtained by washing the sand of several of the rivers particularly those of the upper branch of the Yang-tse-kiang and in the mountains and some inaccessible regions of Yunnan. Silver is also found in the same regions. Much of it is of great purity and is well known under the name of *goss silver*. The quantity also must be considerable, since it has not only furnished the vast sums exacted by the British in compensation for the last war but also suffices for a large annual export, chiefly in payment of opium. Copper besides forming the ordinary currency in limited mercantile transactions, is worked to a great extent for economical purposes. A species called *peking* or white copper and when polished scarcely distinguishable from silver is said by some to be peculiar to China, while others with more probability assert that instead of being a simple metal it is merely a compound of copper and zinc. Quicksilver in the form of cinabar is of frequent occurrence, and is much used both for colouring and medicine. Its fumes, the poisonous nature of which is well known are even said to be inhaled like opium or tobacco. There is no want of zinc either in the form of rich hematite, or in that of the carbonate of the coal measures, from which almost all the iron of Britain is derived, but the quality is said to be inferior. Lead tin and zinc exist, but owing either to a deficiency in quantity or ignorance of the method of extracting them economically from the ore, the native product falls short of the consumption, and leaves room for a large importation. Refractories have already been made to the coal fields of China, and the extensive use of coal for fuel. It occurs both as bituminous coal and anthracite, but the quality is injured both by the presence of sulphur and a preponderance of ash. As soon of it is raised without machinery by the naked arms of manual labour, the price being necessarily high confines the use of it in a great measure to the rich, while the poorer classes are obliged to content themselves with coarse mixtures of ash and earth, or other still more inefficient and less attractive compounds. Among other mineral substances may be mentioned iron, alum, gypsum,

and, more important than all, inexhaustible beds of basalt or porphyry earth, the early possession of which by the Chinese and their great skill in working it, has given the name of China to the beautiful ware which so long monopolized the market of Europe. A peculiar species of nephrite, called *jeh shu* or *jade*, of a green color and valued chiefly for the property of emitting a musical sound when struck, though not peculiar to it appears to be found in China in its most perfect form and is there held in the highest estimation. Various precious stones also are found, and silver especially admirably wrought, form a particular article of commerce, but it is supposed that many of the fine stones are not native but imported.

Zoology.—Of this, almost all that is yet known is derived from the casual glimpses of ambassadors and their suits in passing along some of the great thoroughfares, from merchants not allowed to go beyond the suburbs of frontier towns, and from missionaries, whose opportunities have indeed been better, but whose accounts savour more of credulity than dispassionate truth. But the emperor having now thrown open the country to the investigation of travellers we may expect, in due time, to obtain more accurate information on this and on many other subjects of which we are at present comparatively ignorant. Of quadrumanous animals one is described as perfectly resembling man, but longer armed and hairy all over called *fo-eh*, most swift and greedy after human flesh. This is evidently an exaggerated picture of some animal identical with or allied to the orang-outang. Of the same order is the *doer*, commonly called the Ooshin-China monkey and remarkable for the variety of its stripes and colours. Still more curious is the *lecken* or proboscis monkey in which the combined properties of man and beast seem to be ludicrously caricatured. Of feline animals the lion appears to have only a fabulous existence. Tigers and leopards were at one time so numerous as to have been hunted on a magnificent scale by the emperors. That much of these is now abandoned and the native existence of the animals which formed the objects of it begins to be doubted. A small species of wild cat exists in the S. is sought for as game and served at table as a delicacy. Bears are frequently mentioned, and their paws are said to be in high request among Chinese gourmands. Both camels and elephants, though not indigenous, are largely domesticated. Hens are numerous one in particular is said to be as large as a hen and is extensively used as food. To the indigenous animals already mentioned may be added the wild hog porcupine, racoon faced dog or Chinese fox and several species of rats, most especially one of a yellow colour larger than those of Europe and much prized for its skin. In feathered tribes, China is understood to be extremely rich. Linnæus in particular are famous both for abundance and for beauty. Among others are the well known gold and silver pheasants, and above all the barred-tailed pheasant, a most magnificent bird with tail feathers sometimes 7 ft. in length but extremely rare even in China, and so highly valued, that the exportation of it is prohibited under the severest penalties. Water birds of almost every kind abound but perhaps the most remarkable is the *le-tse* or fishing cormorant, the training of which forms an important employment, and is so complete, that when a bird has secured a fish, which from its size he cannot manage singly his neighbour darts down and assists him to complete the capture. The reptiles of China include several serpents of monstrous size, not regarded as dangerous, and one of a black and white colour hence called *po-ty-hah*, which never exceeds 3 ft. in length, but is very venomous. Tortoises of various sizes are common and are often to be found domesticated in gardens and pleasure-grounds. No country is said to have a more complete ichthyology than China. All its waters—in rivers lakes, pools, canals, and even ditches are full of fish. This is partly owing to the artificial means by which the natural supply is vastly increased. Boat-loads of water containing spawns, are carried to distant parts and deposited in ponds, where the fry when so small as to be scarcely visible are fed with various species of insects or with yolk of eggs. It is not uncommon even to resort to the more curious device of hatching spawns by plunging it under a hen in an egg previously supplied of its contents, and re-opening it a few days after, with the young fish in a state of imperfect development.

Botany.—This is only beginning to be known. Mr. For-

ster's late *Wanderings*, under the auspices of the Horticultural Society of London, have done much, both in displaying arborescent ideas previously entertained, and actually exhibiting the gardens of Europe with numerous fine plants the extent of which was only conjectured or altogether unknown. Among trees, the bamboo, as in India, is perhaps the most valuable of all, not on account of its magnitude, though stems up to twenty plumes of 50 ft. in height are not uncommon, as on account of the almost endless uses to which it is applied. Several species of willow attain a large size. *Bambusa* mentions one with a girth of 15 ft. Oaks of different species are common, and the economical uses of the various parts—the wood bark, and galls are perfectly understood. Even the acorns of some kinds are ground into flour and converted into a farinaceous paste. Coniferous trees are represented by numerous forms of pine *yew* and *spruce*. One of these, a cedar called *nan-shuh* or southern wood, having the property of resisting both time and insects, is deemed too good for common use, and reserved for imperial purposes. The cypress and camphor trees abound, and the lac-tree, a species of cypress, furnishes paper from its inner bark. Palms are not abundant, but the coco-nut flourishes in Hainan and on the adjacent coast. The *gambusia* or screw pine is abundant, but the date palm is not known. The chestnut, walnut, and hazel are all indigenous. The fruit trees include many species of fig—the mango guava, wampee, orange, peach, pomelo-grape, quince, castanet, plum, and apricot. In general the fruits are of indifferent quality. Among shrubby plants, the first place is unquestionably due to *Flora* bushes and *Flora* vines of which mention will afterwards be made. The next in importance is the malberry. Among flowering shrubs or trees the rose, with its numerous varieties, are most conspicuous. Nor must we omit to mention the hydrangea, the *pausien* flower the *lagrostoma*. In its white, purple, and red varieties. Indian pride, the Chinese tamarisk, the castus, the *cerise* soon sometimes in the S. with more than 500 splendid flowers in full bloom. In the S. in almost all climates is a variety. No department of the Chinese flora is richer than that of the *males*, of which Mr. Fortune says "We can form any idea of the gorgeous beauty of the *males* old hill when on every side the eye rests on masses of flowers of dazzling brightness and surpassing beauty. He adds, Nor is it the *males* alone that claims our admiration. *climatus*, wild roses, honey suckles and a hundred others, mingle their flowers with them, and make us confess that China is indeed the central *flower* land. Describing as a favourite occupation of the Chinese gardeners and no small degree of scientific acquaintance with vegetable physiology is implied in the success with which they manage to cram the natural growth of plants, and force them to assume the most fantastic forms. Many of the shapes are curious in the extreme, but the pity is that so much labour and ingenuity should be so perverly employed. Several plants of economic importance, not here mentioned, will be referred to under the following head.

Agriculture.—This first of arts has always been held in the highest veneration in China. The Emperor himself, to do it honour repairs annually to an appointed spot with three princes, nine high officers 40 old and 40 young husbandmen and taking the plough in his hand, draws a furrow and sows some seed. A similar festival is held in the capital of each province. A branch of industry thus honoured can scarcely have failed to make great progress, and accordingly the agricultural of the Chinese has been lauded in high terms by almost all who have had opportunities of witnessing it. In the important processes of sowing the seed and eradicating weeds, sowing manure, and applying them in the form best fitted to nourish the crops and bring it to maturity they display unvaried industry and so small degree of skill. It is a mistake, however to suppose that they are adepts in what may be called the science of agriculture. They slavishly follow a routine which has been handed down, without change, from countless generations, and not only display no inventive powers themselves, but from overweening conceit obstinately refuse to profit by the inventions of other countries when placed before them. Their implements generally are of the rudest description and though improved British ploughs have been sent out and urged on their acceptance, they reject them with disdain preferring a rude shapeless thing drawn by oxen or

Indians. They appear to have no idea of raising improved breeds of horses and cattle by the arts so well known and practised in this country. The only animal of which the Chinese can be said to have furnished us with an improved breed is the pig. Rice, as the principal food of the people, is the staple crop. The rich alluvial plains which cover a great part of the surface are admirably adapted for its culture, and by careful management, yield amazing crops—not one merely but in the S. latitudes two crops of rice in the hot season besides a winter green crop usually ploughed in for manure. In the neighbourhood of Ningpo lat. 30° where the summer is too short to mature two crops in succession, they are still obtained by an ingenious device. The rice is sown in seed beds, and afterwards planted out in drills. A first planting is made about the middle of May and in two or three weeks after a second planting is made in the intervals between the previous drills. When the first crop is reaped in August the other is still green, but being stirred and manured and having plenty of light and air comes rapidly forward, and is reaped in November. The whole steps of the process are conducted with the greatest care and the water-wheel worked by the hand, or by an ox or buffalo is kept in daily operation from the first planting to the last. The heavy iron ploughing instrument is not unlike our sickle and the crop, when not thrashed on the field as is generally the case is carried home and built up into stacks which so much resemble our own, particularly in the N. that the farm yards at a distance are scarcely distinguishable from those of Europe. The rice is not always grown on alluvial flats. The sides of the hills are often laid out in a succession of gently sloping terraces, which sometimes rise to the height of 600 or 800 ft above sea level and planted with rice in drills running across it to each side thus admitting of being irrigated by streams which retarded at every step more as they forward without acquiring any impetus. In the first stages of the crop, these terraces are clothed with luxuriant green, which contrasts finely with the rugged steepness of their neighbourhood, and forms an enchanting landscape. The same mode of culture being evidently applicable to other crops is in general use, and is noticed with admiration by almost all travellers as a distinct guiding feature in Chinese husbandry. After rice the staple crop of the terraces is the common wheat and in the neighbourhood of Canton the common winter crops are our own ordinary garden vegetables—potatoes, peas, onions and cauliflowers for the use of European residents in the N. their crops principally consist of our ordinary cereals and legumes—wheat, barley, peas, and beans. The two last are the same as our field kind and are indigenous the two first are inferior varieties. Both the heads and grains are small and the straw of wheat in particular is so short that instead of being cut it is pulled by the hand. Varieties of the cabbage tribe are extensively cultivated for the sake of the oil extracted from the seeds. The raising of green crops to be ploughed in as manure has already been adverted to and is common in all the districts where rice is cultivated. Two kinds of plants are chiefly employed one of them a trifolium grown on ridges similar to those which form the intervals in our barley beds. Among other crops regularly and extensively grown may be mentioned sugar cane, used chiefly in a green state. Indigo, particularly a kind called *teh-chung* favoured by Fortunate and now ascertained to be the *Indigo tinctoria* the most oil plant and numerous plants grown for their roots. Three other plants of the greatest economic importance, and so extensively grown as to form important branches of Chinese agriculture, deserve a separate notice. The first is the mulberry. Judging from the quantity of raw silk annually exported, and the general use of silk for dress, at least by the wealthier classes of the country it is evident that thousands of acres must be appropriated to the cultivation of this shrub, and millions of persons employed in the different processes connected with it. In a journey which Fortune followed through an interdicted road from Kiangpo to Shanghai, he passed through an extensive district where the mulberry was a principal object of cultivation and at a time when the natives were busily employed in gathering the leaves and feeding the silkworms. He states that the plants are all grafted, and produce very fine thick leaves. They form trees, or rather bushes which are allowed to exceed from 4 to 6 ft in height, and are planted in rows often along the banks of

canals. The mulberry farms are small and are generally worked by the farmer and his family who not only plant, graft, and cultivate the mulberry but gather the leaves feed the silkworms, and wind the silk of the cocoon. The trees are kept in round bamboo stakes placed on shelves, fixed up in dark rooms. The Chinese silk is much heavier than the Italian and preferred in fabrics requiring lustre and firmness. Whether it owes its quality to a particular variety of mulberry or to the climate or soil, has not yet been ascertained. The second plant more particularly deserving of notice is the cotton plant. That used in China, and called in the N. provinces the *Mix* what, is of the same species as the American, namely *Gossypium herbaceum*. The yellow cotton used in the manufacture of nankeen appears to be of a more standard habit than the ordinary *gossypium* but has no characters which constitute a distinct species. It is chiefly cultivated in a level tract around Shanghai, forming part of the Great Plain and is the staple summer crop. The culture differs little from that of other cotton countries, more especially the cotton districts of India, and therefore need not be particularly detailed. The cotton harvest field of China, however presents a more pleasing scene than that of the great cotton growing country of the N. W. Instead of the gangs of slaves, are seen the farmer and his family sometimes consisting of three or even four generations, all busily engaged in reaping a harvest which is their own and by the produce of which their own comforts are to be increased. The last crop to be here mentioned, and to us and our Government the most important of all raised in China is that of tea. There are two varieties of the plant—*Thea bohea* and *Thea viridis*, and though it was long supposed that it formerly only yielded the black and the latter the green teas expected to this country it is now proved that both kinds of tea are obtained from each. The plant whose botanical affinities ally it to the camellia in its natural state as seen in Assam attains the height of 30 ft but in China only from 3 to 6 ft where it is kept down by prunings, and made to assume a bushy form presenting a dense mass of foliage on an infinite number of small shoots. The leaf is dark green, of an oblong oval shape, as if the flowers are single white and without smell. The seeds, three in number are enclosed in a husk resembling that of the hazel nut having a somewhat bitter and taste and, by extraction, is an oil which is used for various purposes. The great tea provinces are Kiangtze, Fokien and Chekiang. In the first the *Thea bohea* is grown and the tea is of inferior quality in the other two the *Thea viridis*, which yields all the finer qualities, and furnishes the greater part of all that is exported to this country. In these two provinces where the culture is most extensive and carried to its highest perfection the tea plantations are usually formed in a deep rich loam never on the low lands but on the low hilly slopes. The plants consisting of seedlings previously grown in nursery beds are placed in rows about 4 ft apart from each other every way and when grown look at a distance like little shrubberies of ever green. The tea farms as common throughout China in all kinds of culture are small and their management including not merely all the steps of the culture of the plant but the preparation of the leaves for market is almost invariably confined to the farmer's family. The leaves are gathered three or four times the middle of April when the last buds are beginning to unfold about a fortnight after. In the beginning of May when the leaves are fully grown and when the leaves are again newly formed. The first gathering yields a fine and delicate harvest in small quantities, and with considerable injury to the plants hence both scarce and expensive, but highly valued by the natives, and generally distributed in small quantities as presents. The after processes, for the purpose of drying and curing the leaves, are performed chiefly by means of heat applied to shallow iron pans heated by fire and accompanied by steady manipulations not unlike those which a baker uses in working up his loaves.

Manufactures.—In all the arts necessary to the comfort of life and in not a few of those conducive to luxury the Chinese have made considerable progress. One peculiar feature in their processes is the general absence of machinery. In almost every production the great moving power is manual labour. Even to give the names of all the arts practised by the Chinese would far exceed our limits and therefore, little more than a simple reference to those most remarkable for

their economical importance or the skill and ingenuity displayed in them is here attempted. The silk stuffs of China have long borne a high name, and in several qualities are still unsurpassed. The loom in common use is worked by two persons, one of whom sits on the top of the frame, where he pulls the threads and assists in making the various changes which must be made on the machine while in operation. By means of it the workmen can imitate almost any pattern and ornament particularly in creases and flowered stuffs, and damasks for official dresses. Everybody wears silks. It is the prescribed attire of high officers; soldiers are not considered in full uniform without it. The finer kinds of it form the ordinary dresses of the gentry, while the poorest manage to deck themselves in coarse if not on cotton, at least on gaily dyed. The embroidery of silk is carried on to an amazing extent, the perfection to which it has been brought creating an almost unlimited demand both domestic and foreign and employing myriads of the inhabitants. In cotton goods the Chinese might have been supposed to excel; but for the wonderful inventions which have so rapidly carried that manufacture especially in Britain to the highest perfection and produced fabrics, which both for quality and cheapness defy all competition. Flaxseed, however once so common but now never seen in this country in produced as before, of excellent quality and continues to form an important branch of domestic manufacture. Linen seems not to be made in China. Flax is not grown but a good substitute for it is found in the fibres of two or three plants, from which the beautiful grass-cloth similar in appearance to linen is extensively woven. The only woollen fabrics are felt for the soles of shoes and winter hats and a sort of rug or carpet. The consumption of leather in China is not great, and the manufacture of it is very limited. Owing to ignorance of the best methods of tanning the leather is tender and so porous as to be almost no protection against moisture. The porcelain of China has been famous from the earliest periods. The manufacture of the finest forms of it being long known to the Chinese alone gave them the monopoly of the world and though in elegance of shape and design they must yield the palm to Europe for quality of material and rich gorgeous colouring they still hold the foremost place. The chief ingredient of the ware, mixed in various proportions according to its desired fineness is kaolin obtained from disintegrating granite, and composed of nearly pure felspar and potash which is nearly pure quartz or silica. Biscuit or soap stone, with proper quantities of carbonate and sulphate of lime, are employed when the ware wanted is to be white, fine, and very light. The manufacture of glass is chiefly carried on at Canton and is one of the few arts which, at least in regard to its finer processes, the Chinese have confided to learn from Europeans. In every branch of it they have proved indifferent scholars, and if they are

ever to attain excellence, must still take many lessons from their masters. In beautiful lacquered ware the Chinese continue unsurpassed. Much of its excellence appears to be owing to the fine varnishes which they have learned to extract from native plants. In working in metals the Chinese have only attained to mediocrity. Bells and tripods are occasionally made of large size, but the most of their castings are comparatively small. Wrought iron is little used except for nails, screws, hinges, and other small articles. The metallic products most deserving of notice are guns, mirrors, statuettes in copper and bronze, and various kinds of carved, chased and filigree work, both in gold and silver. In a great number of minor articles the workmanship is exquisite. Fans, card cases, seals, snuff boxes, comb counters, chessmen of wood (very much of pearl tortoiseshell, &c.) exhibit a finish and delicacy which no other workmen in the world can equal.

Trade and Commerce.—The inland trade of China, aided by the unusual facilities which it derives from a system of water communication, ramifying like net-work over all its provinces is of incalculable magnitude. Its rivers and canals are so covered with junks and barges and swarms of smaller boats that there does not seem much exaggeration in the estimate which makes the tonnage belonging to the Chinese, little short of the combined tonnage of all other nations. The coasting trade is small in comparison and is much impeded not merely by the dangers of navigation along a coast frequently visited by storms of terrific violence, but by horrids of pirates who are permitted to roam about almost with impunity and make an easy prey of defenceless traders. Of the coasting trade there is no means of forming even an approximate estimate, but according to a return of it for the port of Foochowfoo alone for a year (two quarters of 1846 and two quarters of 1847) 1678 junks arrived with cargoes valued at £2,150,700 and 1381 junks departed with cargoes valued at £2,428,059. In this return the largest exports in value are timber and paper the largest imports sugar, salt, iron, &c. The late war the trade with foreign countries, exclusive of that carried on by the mainland chiefly with the Russians was seriously restricted to the month of Canton River. By the treaty of Nanjing four other ports have been thrown open, namely, Amoy, Foochowfoo, Ningpo and Shanghai. By this arrangement the trade has been placed on a more satisfactory footing, and has increased considerably though not at all to the extent which had been sanguinely anticipated. The articles which China can furnish for foreign export are few consisting chiefly of tea and silk goods, and unless the demand for these increase and enable the Chinese to sell it is not easy to see how they can purchase more largely. The following table gives the total value of the imports and exports at each of the five open ports of China, in British and foreign vessels, from 1844 to 1847.

PORTS.	1844				1845			
	In British Vessels.		In Foreign Vessels.		In British Vessels.		In Foreign Vessels.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
Canton	£2,849,885	£1,263,338	£266,881	£1,044,104	£2,311,509	£2,492,270	£274,140	£2,133,258
Amoy					147,494	11,471		
Foochowfoo					46,981	46,593		
Ningpo					10,236	7,485		
Shanghai	801,298	487,678			1,063,207	1,896,061	141,774	57,083
Total					£2,565,008	£2,634,727		

PORTS.	1846				1847			
	In British Vessels.		In Foreign Vessels.		In British Vessels.		In Foreign Vessels.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
Canton	£2,813,116	£1,353,821	£276,428	£1,040,707	£2,784,841	£2,406,380	£275,976	£2,130,409
Amoy	167,566	5,427			179,746	7,135		
Foochowfoo								
Ningpo	8,383	5,727	394		11,728	839		
Shanghai	810,800	3,785,590	365,373	174,469	826,526	1,401,104	111,001	110,106
Total	£2,106,688	£2,606,727			£2,178,923	£2,816,376		

The above table only gives the legal trade, and of course excludes one item which in amount far exceeds that of all other imports, and which, though as usual is not only worthless but noxious and demoralizing in the extreme, as paid for by the Chinese in hard cash. The opium which forms this

import is chiefly grown in British India, where the East India Company cultivate it as a monopoly and sell it to private traders with the full knowledge of its having been grown and sold to be smuggled into China. The export from Calcutta in 1845, was 13,792 chests, and from Bombay in

education of the kind which promises to be best rewarded is almost universal. For the lower classes also every village throughout the empire has its school but the subjects taught are of the most elementary description, and attendance is not so general as was at one time supposed. In cities perhaps half the male receive some instruction in the villages not more than one in twenty can read.

Judging by the multitude of temples and joss-houses seen in every quarter and the endless number of ritual tea performed, on high festivals and in the ordinary intercourse of life the Chinese are a most religious people. It would seem, however, that the feeling seldom goes deeper than the external act and that veneration, when actually paid instead of ascending to a supreme being stops short at inferior agencies of fabulous origin and not unfrequently fails to find a higher object than the Emperor. The religion of the winds, if it may be so called is that founded by Kien Fu Tse or Confucius, about 680 B.C. A kind of sacerdotal college at Peking regulates its observance, but among many of its members, and generally among the upper classes, scepticism is said to be in fashion. Buddhism is generally professed in several provinces and Tansen a kind of demon worship prevalent among the Mongolians, though now decayed, once counted vast numbers of votaries. Attempts to introduce Christianity were made by the Nestorians as early as the sixth century but the celebrity of the Jesuit missions has thrown all others into the shade. The number of their converts is still numerously great, and bears strong testimony to their subtle policy and unwearied zeal. The great regret is, that in their eagerness to imitate the subtilty of the serpent they forget the harmlessness of the dove, and give their sanction to a kind of mongrel religion in which it was difficult to say whether popery or heathenism prevailed. Various Protestant bodies carry on missionary operations in China but hitherto with indifferent success. But a new one would seem to be approaching for in the *Annuaire de la Propagation de la Foi* it is stated that the young Emperor of China, who succeeded his father at his death in February 1850 having at his accession repudiated the demands addressed to him by the mandarins for permission to persecute the Christians within his dominions published a decree, in the month of June in the same year permitting the free exercise of the Christian religion throughout his dominions. The Emperor is stated to have been educated by a Christian lady in whose the late Emperor placed unbounded confidence.

Customs, Manners, Dress, &c.—Early taught to suppress and conceal their real feelings there is much of what might be called hypocrisy in the conduct of the Chinese but it leads also to better results it induces great politeness in their intercourse with each other probably carried to an extreme, but still forming an agreeable characteristic of their social relations. Under the influence of this early training they scrupulously avoid all contradiction in conversation and are careful not to use any offensive or irritating expressions to each other. From the same source arises the tedious frivolous, and often absurd etiquette and extravagant compliment, for which the Chinese are remarkable. But even here, a wish to please and gratify is sufficiently evident. An invitation to dinner is written on a slip of red paper and is sent some days before it is usually in this style—On the — day a trifling entertainment will await the light of your countenance. Tsen Haawen's compliments. This is followed by another card naming the hour. The dinner itself is purgative, wine and spirits are drunk freely and the whole affair goes off with a great deal of boisterous merriment. Fresh pork, fish, and fowls form the staple articles of food, with vegetables of various kinds. Beef and mutton are rare.

In ordinary cases strict separation prevails between the male and female branches of a household. Betrothment is entirely in the hands of the parents and is conducted through the medium of a class of persons called *match-makers* or go-betweeners, whose office of matchmaking is considered honorable. The marriage itself is conducted with much ceremony, gay processions, and other convivialities.

The return of the new year is an occasion of unbounded festivity and hilarity in China. For some weeks previously the principal streets are lined with tables, upon which articles of dress, furniture, and fancy are disposed for sale in the most attractive manner. At this season too, all accounts are ex-

pected to be adjusted, and if delayed or neglected the creditor has sometimes recourse to the expedient of carrying off the house or shop door of his debtor leaving his remains exposed to interlopers. On new year's morning all shops are shut and the streets nearly deserted. As the day advances, however they begin to fill with well-dressed persons, in holiday attire, hastening to make calls of friendship and congratulation. Who that knows the practice in Scotland, on similar occasions, will fail to be struck with the resemblance between it and that of this remote empire. Gambling is universal in China. Hackneys at the roadside are provided with a sup and sander and the clucking of their dice is heard at every corner. Gaming houses are opened by night and women in the privacy of their apartments, while away their time at cards and dominoes. Porters play by the wayside while waiting for employment and hardly has the returns of a great official seen the latter enter the house than they pull out their cards or dice and squat down to a game. Dress like other things, undergoes its changes in China, and fashions alter there as well as elsewhere, but they are not so rapid or as striking as among European nations. The full costume of both sexes is both commendable and graceful in its principal

MANDARIN IN PRINCE OF CHINA, BY CHINESE LADY HER SON AND NEAUNT.—From *Abel's Chinese* in the Chinese.

components are inner and outer tunics of various lengths, made of cotton or silk, reaching below the loins or to the feet. A sash on the right side folds over the breast, and fits close about the neck, which is left uncovered. The sleeves are much wider and longer than the arms, have no cuffs or facings, and ordinary cases, serve for pockets. The shoes are made of silk or cotton with thick felt soles. The head dress of married females is becoming and even elegant. The copious black hair is bound upon the head in an oval formed knot. No caps, bonnet hoods, or veils are worn abroad, a light bamboo hat, or an umbrella, protects from the sun. The custom of wearing extravagantly long nails, for which the Chinese have been celebrated is in reality practised by very few. It is not regarded as singular but is considered by well-read persons as vulgar and in bad taste. The extraordinary and universal practice, peculiar to China of compressing the feet of females into unnatural form and dimensions, has been already alluded to. Dwellings-houses in China are generally of one story having neither pillars nor basements. The common building materials are bricks fired earth, matting or thatch, for the walls stuns for the foundation brick tiles for the roof, and wood for the interior work. The fronts present no opening but the door. The walls are often stained, but not painted and the bricks are occasionally rubbed smooth with stones, and the interspaces pointed with fine cement. The general internal arrangement of a Chinese dwelling of the better sort, is that of a series of rooms of different dimensions,

separated and lighted by intervening courts and accessible along a covered corridor communicating with each, or by side passages leading through the courts. The Chinese usually travel by water, where this is impossible, sedan chairs are used. Goods are carried by coolies with poles and slings.

Governor Li Lian, a my and Very etc.—This is an unqualified despotism. The Emperor writes in his person the attributes of supreme magistracy and sovereign power, and as Heaven's Son is to heaven almost accountable. In practice, however, the rigour of this despotism is considerably softened as the form of Government assuming the name, would doubtless possess many of the realities of the patriarchal were the Emperor who calls himself the father of his people able to keep a watchful eye over all his children. Instead of this, the greater part of his time is spent within the inclosures of his palace at Peking, and corruption, in every form which men can devise, is rampant throughout the empire. The Emperor's principal ministers, four in number form the interior council chamber and beneath them are a number of assessors who form the principal council of state. The Government business is distributed among six boards, having competence respectively of all in officers of revenue, of rice and expenditures, of all law affairs, of crime, of public works. There is besides an office of censors, 40 or 50 in number who go out into the empire as special inspectors and are privileged to make any remonstrances to the Emperor without endangering their lives. The provinces, either single or by twos are under a governor and sub-governor and each province has also a chief or mutual judge and a treasurer. Artisan magistrates, estimated at 14,000 preside over particular districts and cities, and instead of being permanent, are changed about once in three years. The great object aimed at is to maintain a strict surveillance and mutual responsibility among all classes in other words to imbue them with fear of the Government and instill a universal distrust. The chief protection of the people is in a body of law, called Ta-Tung Law, that is, statutes and decrees of the great pure dynasty which are held in high regard and agreeably to which, with occasional violations all public functions are discharged. The military force of China has been estimated at more than 1,800,000 but those serving pay do not exceed 700,000. The real number is of 10 in consequence, as the great body of them are of the most worthless description, scarcely fit for show and not at all fit for use. The accompanying woodcut represents two of these defenders of the colossal empire.

MILITARY MAN OF WAR AND CHINESE SOLDIER.
From Alexander's Gazetteer of the Chinese.

be rather favourable specimens on the whole, it may be presumed notwithstanding their absurd-looking paraphernalia. The navy consists of two fleets—one for rivers and another for the sea. The river junks are large and showy but miserably equipped, and as the river being able to cope with a regular army are not able to clear their own seas of pirates. The

river fleet has 1036 ships 9500 men and the war fleet 918 ships 98 431 men together 107 531 men. The largest guns do not exceed a 12-pounder and are so fixed on wooden carriages that they can neither be elevated nor depressed. The revenue of the empire derived from customs taxes, and more especially from a land and house or workshop tax, is payable partly in specie silver and partly in grain and amounts to about 20 millions sterling.

History.—The early history of the Chinese is shrouded in fable, but it is certain that civilization had advanced much among them when it was only beginning to dawn on the nations of Europe. Their earliest existing records consist of the compilations of Confucius, 550 A.C. from which period they descend in an unbroken series to the present day. Under their earliest, namely the Tsin dynasty they attained considerable prosperity and tempted the rapacity of the Tartars as a protection against whose incursions the great wall was built. About the end of the second century the empire was divided into three states, and continued so till A.D. 585 when it became united under one ruler. Three centuries later the right to the throne was disputed and civil war raged till an adjustment took place by the establishment of the T'ang dynasty under Taetsuo, A.D. 618. Under this dynasty great progress was made in literature and art. New records of the Tartars now pressed the Chinese so hard, that they called in aid of the Mongols, who freed them from their oppressors but gave them a new master in the celebrated Kublai Khan who founded the Mongol dynasty and removed the capital from Peking to P'kin. His ninth descendant was driven from the throne and a native dynasty called Ming again succeeded in 1368, in the person of Hwangwu. A long period of peace ensued, but was broken in 1518 when the Manchus, a mixed Tartar and Mongol race, seized the ascendancy and after a war of 27 years, established the existing Tartar dynasty in the person of Shunshy. According to the Chinese their dynasty, 26 in number embraces a period of about 4000 years during which 226 sovereigns have held the throne. The earliest authentic accounts of China, published in Europe, are those of Marco Polo who visited the country in the 13th century. The first British intercourse was attempted under Queen Elizabeth, in 1596, but the vessel did not reach its destination. A trade was subsequently established by the East India Company but no direct intercourse between the Government took place till the embassy of Lord Macartney in 1792. A second embassy in 1816 by Lord Amherst, was treated with insolence and returned with a letter from the Emperor to the Prince Regent, bearing among other things: "I have sent three ambassadors back to their own country without punishing them for the high crime they have committed. The arrogance thus manifested could not fail sooner or later to bring on a collision, and accordingly in 1841 the British, on being refused redress for injuries, partly real and partly alleged, proceeded to hostilities, and after a struggle almost without a struggle, every force which was opposed to them, were preparing to lay siege to Canton when the Chinese found it necessary to sue for peace. In consequence of it China is virtually opened, but the treaty is generally complained of as having very imperfectly provided for British interests, and still more imperfectly for British honour—(Guthrie's China Opened, Martin's China, The Atlantic Kipper, Fortune's Wanderings, Ford's Voyages, etc.) (see also the CHING KIANG FOO, a port in China, near the mouth of the river leading to and 9 m. N.E. Ningpo, at the foot of a hill. It is surrounded by a wall 30 ft. high, and 3 m. in circumference with extensive suburbs stretching along the water side. It has two batteries on the river side, and a strong citadel on a precipitous cliff 250 ft. high. In Oct. 1841 a severe engagement took place in the vicinity between the Chinese and the British, in which the former were signally defeated.

CHING KIANG-FOO, or TCHANG KIANG, a city China, prov. Kiangsoo, bank, Yang-tse-Kiang near the junction of the Imperial Canal lat. 32° 17' N. lon. 119° 25' E. It is advantageously situated for trade, and surrounded by a lofty and solid wall, 4 m. in circumference, with hills of considerable height beyond. Extensive suburbs stretch along the river and the canal and the bustle and activity exhibited on the waters afford a striking evidence of the industry of the natives and of the commercial importance of the city. It

forms, indeed the key of the empire as the blockade of the river and canal at this spot would in a great measure prevent all communication between the N and S. The city is strongly fortified but, in 1842 it was taken by the British, after a determined resistance on the part of the Manchou Garrison.

CHING-YIN, or **TECHU-YIN**, a tn. China. See **CHUO**.

CHING-YING or **TECHU-YING** a tn. China prov. Pe-shai, 16 mi. N. of Hsiao, 165 m. S.W. Peking. It is about 4 m. in circumference, and contains several monuments erected in honour of various ones of which is consecrated to the first Emperor of the Han dynasty. The neighbouring mountains abound with rare plants.

CHING YU or **TECHU YU** a tn. China, prov. Szechuan lat. 30° 42' N; lon 104° E. It is traversed by several canals and is a large, populous, and commercial town. It was formerly the residence of the Emperors, and one of the largest towns of China but, in 1846 during the civil wars, it was almost entirely destroyed by the Tartars.

CHINGYU par. Eng. **YEN**, 2766 m. Pop. 668.

CHINGLEPUT a coast dist. and a city, Hindoostan in the Carnatic, presid. Madras. The district which lies S. of Arcot and Madras, area, about 3743 sq. m. has generally a bad soil broken up frequently by granite rocks. Water being scarce, a large portion of the land does not repay the cost of cultivation the more fertile localities yield grain, fruits, oil &c. which are exported to Madras. The palmyra palm thrives with little care, and is abundant and cheap. There are manufactures of cloth on a small scale. The chief towns are Chingleput and Conjevaram. This tract of country was, in 1750 and 1764 obtained by the East India Company from the Nabob of Arcot. It was invaded by Hyder Ali in 1768, and again in 1780 when it was nearly depopulated by famine and emigration. — The town cap. of the dist. is 20 m. W. from the Bay of Bengal and 30 m. S.W. Madras lat. 12° 41' 00" N. lon 80° 18' E. It is in a small valley bounded on all sides by hills and nearly half an acre by an artificial lake. The fortress formerly of considerable extent and strength, has been allowed to go into decay and is now garrisoned by a few marines. In 1751 it was taken by the French but, in the following year was retaken by O. British under Clive. The town outside the walls is a mere village.

CHINI a large N. Hindoostan, dist. Konawar one of the most rugged and mountainous in India. It stands at the height of 10,200 ft. above the sea, yet grapes grow here in the greatest perfection 18 different varieties being cultivated to the district.

CHINIA a tn. France, dep. Ille-et-Vilaine, agreeably situated in a large and beautiful valley on the Bernarde 48 m. W. S.W. Montpellier. Its staple manufacture is broad cloth which is extensively made, and both sent into the interior of France and exported to the Levant. There are also tanneries, distilleries, dye-works and three annual fairs. Pop. 2941.

CHINI or **CHUNNEA** a tn. Punjab 120 m. N. by E. Lahore lat. 32° 45' N. lon. 75° 30' E. It is a place of considerable size is a walled town, and has a palace belonging to the rajah. Being in an elevated position it commands extensive and magnificent views.

CHINNACHIN a large tn. Nepal 2.5 m. N. W. Kathmandu lat. 28° 10' N. lon. 81° 16' E. The houses are of brick and stone, with flat roofs. It has two temples dedicated to Shiva and an export trade in horses, shornies, sheep, salt, musk, drugs, and woolen cloth the imports are metals, spices, and cloths.

CHINNOCK, three par. Eng. Somerset—1 (East) 1920 ac. Pop. 985—2 (West) 642 ac. Pop. 594—3 (Middle) 471 ac. Pop. 230.

CHINNOH, par. Eng. Oxford 3667 ac. Pop. 126.

CHINON [anc. **Cenno Turonens**] a tn. France dep. Indre-et-Loire, 36 m. W. S. W. Tours, r. bank, Vienne, between that river and a hill, on which are seen the extensive ruins of its old castle. It is rapidly improving its old ramparts being replaced by spacious quays. It contains a townhall and college, with manufactures of serge, drapery, earthenware, and sailbags and has a considerable trade in grain wine brandy nut-oil, wax honey quills, and prunes. Babelas was born in the vicinity. Pop. 4839.

CHINRAIPATAM, a tn. Hindoostan Mysore territory 40 m. N. W. Seringapatam lat. 12° 55' N. lon. 75° 30' E.

CHINSURAH a tn. Hindoostan, prov. Bengal, beautifully situated on the edge of the Hooghly 30 m. N. Calcutta; lat. 22° 52' N. lon. 88° 30' E. It contains many neat, though small houses, in the Dutch style, having been formerly a Dutch settlement. It is now a military station has a chapel and several schools those under the management of the Free Church of Scotland having an average attendance of 740. It is celebrated for the manufacture of charcoots. Pop. 14,000.

CHIO Gense, an isl. **Zegen Sea**. See **SEA**.

CHIOBBE a tn. China prov. Fokien, 15 m. S. W. Amoy lat. 24° 35' N. lon. 117° 55' E. on a considerable river which bears different names according to the district through which it flows. Here it is 800 yards wide, and navigable at high water for junks of about 400 tons. The town is large, has a custom house and arsenal, and along the river are numerous fortifications. It is a great emporium of common china ware, and a considerable number of its inhabitants are employed in the fisheries and in the cultivation of the soil. There are no fewer than 18 villages in the vicinity one of which contains a body of R. Catholics under the superintendence of a Spanish priest. The district of Leung-kei in which the town is situated is famed for the cultivation of the mulberry tree, and the rearing of silk worms. Pop. of Chiobbe estimated at 800,000. — (Naut. Map 1847).

CHIOGGIA or **CHIOZZA**, a seaport in Austrian Italy gov. Venice, on the Adriatic lat. 45° 13' 54" N. lon. 12° 17' 15" E. 15 m. S. by W. Venice, at the E. extremity of the lagoon situated on an island and built partly on piles. It is a handsome town and contains many good streets. The principal one is lined with porticoes. It has a cathedral several other churches an hospital orphan asylum, work house, custom house, theatre gymnasium philosophical and theological seminary a female school and an evening school in which upwards of 300 poor children are instructed. A stone bridge of 43 arches connects the S. extremity of the island with the mainland. The harbour in which it lies is 12 ft. water is protected by 2 forts and is considered one of the strongest places on the Venetian lagoon. It has an extensive manufacture of cordage, lace &c. and several ship-building establishments, with altogether 36 slips. It has also a considerable casting trade, an iron factory and an extensive traffic in German and Italian produce. Chiozza is the seat of a bishopric and of the government of the district. Pop. 25,800.

CHIRONA [anc. **Terra Capensis**] a tn. Spain prov. of and 12 m. N. N. W. Cadix, on the Atlantic. It contains a parish church in which is an image of the Virgin to which numerous pilgrimages are made an hospital and primary school. The inhabitants are chiefly employed in the culture of the vine from the produce of which both excellent wine and brandy are made, which are largely exported. Pop. 1781.

CHIPPENHAM a tn. and par. England so. Wilts. The town is 12 m. N. E. Bath, 4 m. S. W. Swindon. It is a very handsome old stone bridge, of 22 arches. It has a very handsome thriving-looking town of very attractive appearance with one principal street, from which all the others diverge lighted with gas well paved and drained, and always kept remarkably clean houses well built, generally of Bath stone, from the quarries of Bath, in the neighbourhood but many of the cottages and smaller houses are of brick supply of water abundant. It has a parish church, an ancient Gothic structure, with an elevated spire church for Baptists Wesleyan Independents, and Primitive Methodists a town hall numerous schools several charitable and benevolent institutions and a beautiful little cemetery. It has a very considerable retail trade. Woollen manufactures were formerly numerous, but there is now only one. There is also a small manufactory of licks, and a large flour-mill and tanning and malling are carried on extensively in the town and neighbourhood. Chippenhams is governed by a mayor four aldermen and 12 councillors, and returns a member to Parliament Area of par. 8100 ac. Pop. 4999 of in 1823. — (Local Correspondent).

(**CHIPPENHAM**) par. Eng. Cambridgeshire 4206 ac. P. 811.

CHIPPFWA — 1 A tn. Upper Canada, 1 bank Niagara, near the confluence of the Welland Canal and 2 m. above the great falls. Pop. 1000 — 2 A tn. or U. States Wisconsin.

a Norman fortress, besieged by Cromwell, is in the parish, and still in good preservation. Sir Thomas Middleton, the Parliamentary general, and the Countess of Warwick, afterwards the wife of Addison, were born in the parish. Pop 1850—1 (Local Correspondent).

CHIRNSIDE a vill and par Scotland, co of, and the former 8 m. N. W. Berwick. The village consists of two streets nearly half a mile in length and has a church, a Dissenting meeting-house, and an annual fair. Home the first was brought up in the parish from his infancy. Par 4 m by 8 m. Pop 1864.

CHIRON a vill and township England co Northern Ireland, about 1 m. S. by W. North Shields. It is a straggling place with a mining population. Lord Collingwood was born at Chiron H. use in the vicinity. Pop 1900.

CHITWALL W ISLANDS, a group of isls, near the S coast of Russian America, lat 39° 30' N. lon 145° 1' W. They appear to be barren rocks, entirely destitute of vegetation.

CHINWICK a vill and par Eng Lancashire, co Middlesex, 5 m. W. Hyde Park Corner London 1811 ac. It has an ancient church and several schools contains the gardens of the Horticultural Society of London at 1 Devonshire House, in which Fox and Channing died. It is a station on the Great N. rd. 1000 ft. above the sea level. Pop 1871 10,000.

CHITHUR par Eng Sussex 1047 ac. Pop 228 CHITLONG a tn. Nepal 20 m. S. W. Kathmandu 10 lat 25° N. lon 84° 50' E. It is well built and is chief town of a district its inhabitants are mostly Newars.

CHITRAL, a dist. and tn. Kafur tan S. slope of the Hindoo-kooch. The district consists of a valley about 100 m. in length extending S. W. to N. E. and from 15 to 30 m. broad, watered by the Kooner which flows along the centre of the valley. It is 8° 45' N. and 35° 25' N. lon 71° 0' and 71° 10' E. The town cap. of the district is bank Kama, 150 m. S. E. of the district. It is 56° 11' N. lon 71° 59' E. It contains a bazaar and between 2000 and 4000 inhabitants chiefly Shikhs, Mahomedans and a few Hindus.

CHITTAGONG a dist. Hindooistan, S. E. extremity of prov Bengal beyond the Brahmaputra, bounded N. by Tipperah E. by Burmah, W. by Aracan and W. by the Bay of Bengal between lat. 21 and 25° N. and lon 91 and 93° E. length N. to S. about 100 m. average breadth, supposed to be not 6 or 20 m. though in some parts it is 30 m. broad but its E. boundary is not accurately known area, estimated at 2987 sq. m. cap. Islamabad or Chittagong. Along the coast are several islands of considerable extent including those of Hatia, Sundoo, and Ramenay all of which are under the jurisdiction of Chittagong. The Mugh mountains traverse the district N. to S. seemingly about its centre and form to a considerable extent, a water shed the streams from their N. slope flow to the Bay of Bengal while those from their S. slope flow to the Kolduay an affluent of the Aracan River. In the N. E. the Blue Mountain attains an elevation of 5600 ft. and near the centre is Pyramid Hill, 3260 ft. Brang Hill 2460 ft. Tyn Hill 3100 ft. and Zaidong Hill 2230 ft. Several streams water the district, of which the most considerable is the Karaphuli or Chittagong River formed of the rivers Chingree and Kurnool, which rising in the hills about lat. 22° 45' N. lon 92° 45' E. after a circuitous course join about lat. 22° 35' N. lon 92° 45' E. the united stream flows in a winding channel W. S. W. past Islamabad, below which, about 10 m. it falls into the Bay of Bengal by a wide estuary. At Islamabad it is about 1 m. wide, but above that town it contracts to about 300 yards. The climate is similar to that of Bengal, excepting that the rainy season sets in earlier and continues later. The level and fertile lands are chiefly on the coast, and in numerous valleys between the hills. They yield large crops with little labour. Excellent coffee, ginger, betel pimientos, indigo, rice, cotton, sugar-cane, tobacco and opium are produced and hogs, goats, and poultry are reared. On the sea-coast the Government has a manufacturing station.

of salt. The exports are chiefly timber, planks, canvas, coarse cloths and elephants, which are large and well suited for the camp and the chase. The inhabitants consist of aborigines resembling the Burmes, Bengales, and Maghs the last integrated in large numbers from Aracan after the conquest of that country by the Burmese in 1783. Extensive of the last named race who are chiefly small traders and mechanics, the population is presumed to be about 1 000 000. The Mahomedans exceed the Hindus in the proportion of two to three and there are no Christians. During the wars between the Moguls and Afghans Chittagong was held by the Hindustani of Aracan. In 1760 it was ceded to the East India Company by Jaffer Ali Khan and, in 1826, when the Company acquired Aracan from the Burmese, the political superintendence of Chittagong was comprehended within the government of Aracan, and has continued.

CHITTAJ one of the Laccadive isls in the Indian Ocean 115 m. from the S. W. coast of Hindooistan lat 11° 40' N. lon 72° 43' E. (see).

CHITLIDROOG (native *Sita Purga*, spotted castle) a tn and fortress, Hindooistan, within one of Mysore, last occupied by a British garrison on a cluster of rocky hills about 800 ft. high forming the extremity of the Chitlidoog ridge 280 m. W. N. W. Madras lat 14° 4' N. lon 76° 0' E. The town within the fortress is neither large nor populous, but its principal street is spacious that outside the fortress stretches along the base of the hill or droog and is enclosed in the N. E. by solid well-worked ramparts of granite Chitlidoog is probably the most elaborate and imposing specimen of the fortified rocks in the R. of India. An English battery of four batteries all of solid masonry, runs irregularly up from rock to rock in the summit guarding every accessible point the ascent is partly by steps and partly by shallow notches up to the surface of the rock. The more exposed points are crowned with batteries. The country around Chitlidoog is noted for the great variety and excellence of its fruits.

CHITTLHAMPTON a tn and par Eng Kent co Devon. The village, about 7 m. S. E. Barnstaple, is finely situated on the slope of a hill surrounded by beautiful meadows and pasture lands. It consists of one main street with an elegant square in the centre, supply of water abundant. The Established church erected in the 13th century is a gothic structure, and has a tower. There are also two Baptist meeting-houses a chapel of ease, and two schools. Area of par 8720 ac. Pop 10,000 agricultural 1886.

CHITTOOR or CHITTOOR—1 A tn and fort Hindooistan prov Rajpootana, on bank Barua, 70 m. N. E. Udaipoor lat 24° 52' N. lon 74° 45' E. It is a town was formerly and is several centuries capital of the principality of Orissa and celebrated for its strength and riches. It has lost much of both but is still a considerable and fine town containing many temples and other well-constructed buildings including two handsome towers of white marble about 100 ft. high and finely carved dedicated to Siva. The rock formerly considered one of the strongest in India, stands upon a steep rock overlooking the town.—2 A tn in Hindoo tan Carnatic, situated in the Eastern Ghats, not far from the bank Polney an affluent of the Palner 81 m. W. Madras lat 15° 15' N. lon 79° 10' E. It was formerly one of several small pollars or hill districts, and came into possession of the English in 1691 through the hill chiefs were not finally subdued till 1694. Near Chittoor are a series of very remarkable antiquities, covering an area of 1 sq. m. of which neither history nor tradition exist they are said to have a close resemblance to the Druidical remains in Great Britain, and are attributed, by the natives of India, to dwarfs and fauns. Most of them are formed of enormous slabs of granitic rock, walls, and roofs the stuporific containing the dead bodies of men, placed on the floor slab and covered to the depth of 3 or 4 ft. with earth. Vessels of common red terra cotta, filled with earth were found in them, of so remarkable workmanship, but differing wholly from those now used in India.

CHITTRA a tn Hindooistan prov. Bengal, prov of and 87 m. S. W. Bahar. It is the seat of a court of justice but has an unhealthy climate.

CHUROO a tn and com Italy Lombardy prov of and about 10 m. E. Sondrio on a slope of the hills which confine the R. bank of the Adda. It has an important annual fair lasting four days in its vicinity rich copper pyrites has been discovered.

covered. The plague which ravaged Lombardy and particularly Milan 1629-30 is said to have first appeared here. Pop. 2514

CHILSA—A town in the prov. of Italy Piedmont prov. of 28 m S.E. Lugli, a town, Italy. It is well built and has silk m. ls. and manufactures of silk and glass, particularly mirrors. It contains the ruins of the old castle of Mirabola. Pop. 7000.—A. A. finely prov. of 20 m. S. by W Palermo. Agri. are found in the neighboring district. Pop. 6000.—3 *Chusa*, or *Chusa*, a town Austrian Tyrol prov. of 28 m S.W. Brunn on the bank of the Eisach here crossed by a bridge. It is one of the most miserable places in the monarchy and has a church which contains some paintings of a 17th c. Pop. 700

CHILSA—A town in the prov. of Naples, prov. Principato Ultra diot. of, and 6 m. S.W. E. Avellino, with a college and a seminary, and an annual fair. Pop. 2454.

CHITANI (anc. *Chosene*) a town and lake, Tuscan prov. Senese. The town is situated on a hill near the Chiana 43 m S. Arezzo and 3 m W the lake. It is the seat of a bishopric and contains some valuable private collections of Etruscan and Roman antiquities. It is one of the most ancient towns in Italy. The *Chosene* of the Romans, the *Chosene* of the Etruscans, and formerly one of the 12 capitals of Etruria, and chief town of the state of Chosene. In the Middle Ages it was ruined by the accumulation of the waters of the Chiana, which converted its territory into a pestilential marsh. Numerous remains of antiquity, walls, cisterns, etc. are still to be seen in the neighborhood. Pop. 2226.—**THE LAKE** 9 m E.S.E. lake Montepulciano and 4 m W lake Terguio or Trasimeno, is about 4 m S. and 1 1/2 m greatest breadth. Its N and E. basins form the boundary between Tuscany and the Papal States.

CHILSA a town in Spain prov. of 20 m W by S Valencia. Its streets are for the most part wide, regular and clean and its squares of which there are three, spacious and lined with substantial houses and public buildings. The parish church, large and highly ornamented, possesses many fine pictures. The other public buildings are a townhouse, prison, barracks, cemetery chapel two schools and a handsome palace of the Duke of Medinaceli. Manufactures:—cotton articles, soap, coarse earthenware bricks, tiles, and ropes. Trade:—grain, fruit, etc. to cattle. Pop. 2593.

CHILSA a town in the prov. of Senese.

CHILSA a town in the prov. of Senese. It was formerly one of the strongest places in Piedmont but the fortifications were demolished by the French in 1804 when their possession of Lombardy placed Chivasso in the midst of their own territory. It has a public square a church, and five convents. Grain and cattle form the principal articles of trade. Pop. 6000

CHILSTON a town in the prov. of Senese. Pop. 6000

CHILSTON a town in the prov. of Senese. Pop. 6000

CHILMETZ, or *Chilmetz*, several places, Austria, particularly two towns. Bohemia:—1 Circle Budweis on the S. 44 m E. Prague. It consists of the town proper and three suburbs, and contains a palace, several churches, one of these a deanery church with some good pictures a town house, and the ruins of an old castle. The chief employments are agriculture and weaving. In the neighborhood are a mineral spring in great repute and several large pools well supplied with fish. Pop. 2620.—2 Circle Budweis on the S. 44 m E. Prague. It contains a palace and manufactures of potash and paper. Pop. 2220.

CHILMETZ a town in the prov. of Senese. Pop. 6000

CHILMETZ a town in the prov. of Senese. Pop. 6000

by a crazy-looking wooden bridge. The houses are painted with red ochre, giving them an odd, but not disagreeable appearance. It has a Chinese military post, composed of 20 soldiers, under a Mandarin. There are two Buddhist convents here, one of which is a printing-press, which furnishes sacred books to the temples of the province of Kham.

CHOBHAM a village and par. England co. Surrey the former 7 m. N.E. Guildford, and within 3 m of the Woking station on the London and South-western Railway. The houses are well built of brick and there are also several respectable shops. The church is in the early style of English architecture and there are, besides, a Baptist chapel, and a chapel of ease at the W end, with a school and several small charities. Area of par., 11,536 ac. Pop. 3069.

CHOC, or *Chocque* Bay W India, N.W. coast of St. Lucia, one of the Windward Islands, situated between Beletie Point on the N and Point d'Estree on the S, and intersected nearly in the centre by N lat. 14. It is open to the W and N.W. Within the bay is a small island and on the mainland a vil and river all of the same name.

CHOC—1 A prov. New Granada, on the coast of the Pacific S. of prov. Duran and W of Antioquia. It is traversed by the most W branch of the Andes and watered by the San Juan and the Atrato. In 1768 a canal is said to have been dug in the ravine of Raspadura, which united these two rivers, and established in the rainy season a communication between the two seas. The climate is moist and warm, and the greater part of the province being covered with dense forests which prevent the free circulation of the air it is rendered unhealthy. The soil is very fertile, and wherever it is cultivated produces maize and cane of excellent quality. Gold and platinum are said to be abundant. Considerable commerce is carried on with Popayan and much cane and other productions are exported by the canal of Raspadura. As to the principal towns the population is composed of negroes, mulattoes and a few whites and some Indians.—2 A large bay W coast of New Granada extending from Point Chirimbira on the N to Point Guacana on the S between the parallels of 2° 30' and 4° 18' N.—3 A bay Central America, forming the most S part of the Gulf of Darien. The Atrato falls into it.

CHOCTAWHATCHIE a river of States, rising in Alabama, and after a S. course of 100 m falling into the bay of same name in Florida.

CHOCTAW a tribe of N American Indians, located on the W side of the Mississippi E. of the Choctawhatchie. They are civilized and industrious, are devoted to agriculture and have made considerable progress in useful manufactures. They seem to appreciate knowledge having appropriated a portion of their annuity from the U States Government to the support of schools. Numbers about 20,000

CHOCTAW or *Choctaw* (properly *Chokta*) a town Russia gov. Bessarabia, on bank Dniester about 10 m S. Kamenetz. It is on a name to an archiepiscopal Greek diocese in wall and being a frontier stronghold possession of it was often contested by Poles Turks and Russians. The old citadel of Chocczm, partly of Genoese partly of Turkish construction with its massive walls androwning towers, was once thought all but impregnable. As it is surrounded by hills, which completely command it in modern war it would scarcely be considered defensible. It has fallen greatly into decay and its only importance at present is as a military station. Pop. for nearly 20,000 (1849) 12,200.

CHOCTAW a town in the prov. of Senese. Pop. 6000

CHOCTAW a town in the prov. of Senese. Pop. 6000

CHOCTAW a town in the prov. of Senese. Pop. 6000

CHOCTAW a town in the prov. of Senese. Pop. 6000

N. E. coast lat. 18° 28' S. lon. 49° 40' E. It is an excellent harbour where ships may anchor in 6 or 7 fathoms, and may obtain rice, umbellae, &c.

CHOISY LA-BON, or **CHOISY-SUR-SARRE**, a tn. France, dep. Seine, 7 m. S. Paris, 1 bank Seine, here crossed by a wooden bridge with stone piers, and a station on the Paris and Orleans Railway. Its broad straight streets, elegant houses, and fine avenues, with the proximity of the Seine, and of the railway contribute to render it one of the most agreeable towns in the vicinity of Paris. It has manufactures of wax, cloth, cheap domestic stuffs, glass, Morocco leather, earthenware, porcelain and vinegar. There are also some distilleries. It has some trade in wine, vinegar, and oil. The castle, built here by Louis XV. has entirely disappeared. Pop. 2227.

CHOLDEBERTON (Warr.) par Eng. Wilts. 1661 as 1. 183. **CHOLECHEL**, or **INLA DE-HOANA**, an tn. La Plata confederation, formed by the Rio Negro, on the Patagonian frontier about 212 m. N. W. Curma, under the lat. of 89° S. It affords good pasturage, and a fort has been erected on it for the protection of the S. frontier of La Plata.

CHOLET, or **COMANAY** a tn. France, dep. Maine-et-Loire, 82 m. S. W. Angers, r. bank, Maine. It has a tribunal of commerce, consulting chamber of manufactures, and communal college. manufactures of handkerchiefs and cotton goods, called *choletes* flannels and woollen stuffs. There are also wool and cotton spinning-mills, bleachfields, dyeworks, and tanneries with a large trade in the above articles, and in cattle. Pop. 7589.

CHOLLERTON par Eng. Northumberland. 12 950 as. Pop. 1151.

CHOLLEY par Eng. Berks. 4447 as. 1 op. 1224.

CHOLULA a city Mexican confederation state of, and 12 m. from La Puebla, 60 m. S. E. by E. Mexico. The streets are regular and spacious, the houses mostly of one story and flat roofed. Though fallen from the importance it had attained in the early part of the 16th century it still exhibits traces of its former greatness. Under the name of Chualtoulit. It was once the capital of an independent district, and the seat of the religion of the ancient Mexicans. At that time it contained 12 to 14 000 houses, and more than 400 temples. One of these temples still remains, though in ruins, and to which the people resort in crowds at the festival of the Virgin. It is described by Humboldt as being built in the form of a pyramid, of four stories of equal height, in alternate layers of clay and sun-burnt bricks. Each side of its base measuring 1440 ft. and its height in all 164 ft. At the present day the form is so altered that it looks at a distance like a natural hill. On one of its highest platforms a chapel has been constructed. In the form of a cross, 80 ft. long with two towers, and a cupola. Pop. 10000.

CHONER, a river Ecuador. It rises in one of the hilly districts in prov. Pichincha, about lat. 0° 23' S. flows W. and falls into the Pacific at Esmeraldas Bay lat. 0° 25' S. after a course of about 60 m.—There is a *VILLAGE*, or small town, of the same name, on the r. bank lat. 0° 40' N. At the N. side of its entrance from the sea, which is 2½ m. wide stood the ancient city of Cacha, of which some vestiges still remain.

CHONOS (anc. *Chonos*) a large vil. Asiatic Turkey, about 60 S. E. Asia Minor or Thracian. lat. 37° 17' N. lon. 29° 28' E. situated on a ramp bank sloping gently to the N. It is straggling and consists of about 500 houses, 20 or 30 of which are Greek. It is said to have contained, formerly three times that number of houses, or rather families but it has declined much of late years. A great quantity of tobacco is raised in the neighbourhood and many fine walnut trees are to be seen in the grounds about the village. This place derives its interest from standing on the site of Chonos, chiefly known for being the birthplace of Nicetas, the Byzantine philosopher. The only remains of buildings are the ruins of a castle, on a rocky platform above the village.

CHONOS ABHIN ELAGO a group of small isls. off the W. coast of S. America, Patagonia. It is comprised between lat. 44 and 46° S. lon. 74 and 78° W.

CHORROO a tn. Hindostan prov. Ameer principality of, and 100 m. E. by N. Bhamra. lat. 28 12 N. lon. 74 25 E. circumference, about 1½ m. exclusive of suburbs. The walls and houses are built of limestone, found in great abundance in this district, it is very white but soft, and liable to crumble.

CHORILLOR, a vil. Peru, dep. of and 10 m. S. Lima. It is much resorted to for sea-bathing during summer by the inhabitants of the capital. The neighbourhood abounds with the remains of ancient edifices.

CHORLEY a market tn. and par. England, co. Lancaster. The town on the rivulet Chor from which it takes its name, is 20 m. N. W. Manchester a station on the railway from Bolton to Preston. It is, on the whole, well built, and the streets spacious, and well lighted with gas, and the supply of water abundant. It has a townhall, with small prison a handsome market house, two established churches, and chapels for Wesleyan and Primitive Methodist, Baptists, Independent and Unitarian and E. Catholic national schools, and a free grammar-school, with almshouses and some minor charities. Cotton-spinning and weaving is carried on here, and in the immediate vicinity to a great extent the principal fabrics produced are muslins, muscots, and fancy goods, exclusive of yarn. On the banks of the neighbouring streams are extensive bleach-grounds and print-works. In the vicinity are coal lead, and iron mines also quarries of slates and graptolite for mill. Area of par. 8711 a. Pop. 12 684.

CHORLOT, or **MANCOC**, a large and increasing tn. England, co. Lancaster about 1½ m. S. Manchester. It was formerly an agricultural township, called Chorlton Row but since the introduction of the cotton manufacture in which along with Manchester it largely partakes, it has risen rapidly in importance and extent, and now contains several respectable streets well paved, and lighted with gas. The principal public buildings, besides the churches are the townhall with which are connected a commodious dwelling house, and a dispensary an educational hall, and an institution for popular instruction. There are three churches, and seven places of worship for different dissenting bodies, including Presbyterians, Baptists, Methodists, Independents Unitarians, and the Society of Friends. The church of All Saints is a handsome structure, in the Doric order with an elegant steeple, surmounted by a dome and gilded cross. Attached to this church is a cemetery and there is also a cemetery for the interment of all denominations. The schools are numerous, including daily schools and infant schools. Pop. 25 628.

CHOROLQUE a snowy mountain S. America Bolivia, prov. Luta near Tupiza, it is provincial cap. lat. 21 26 S. elevation according to Dr. Keith 16,618 ft. above sea-level.

CHOROS ISLANDS, three small isls. S. Pacific Ocean off the coast of Chile. The largest is 4 or 5 m. from the mainland at about 40 m. N. N. W. Coquimbo lat. 29° 17' S. lon. 71 35 W. It is about 2 m. long the top a very much broken and the S. W. end resembles a castle. The other two are much smaller and nearer to the shore, one of them so close that a boat only can pass between it and the land.

CHOROSKOW a tn. Austria, Galizia, 20 m. S. S. E. Turnopol 1 bank Teyna. It has a Unitarian church. P. 2400.

CHORREBA a tn. New Granada, Colombia, of, and 15 m. S. W. Panama, near the head of a river of same name, which enters the Pacific 10 m. S. W. Panama. Pop. 4000.

CHORAKAP a tn. khazans of and 40 m. E. by S. Khiva, near I. bank, Amoo. It is surrounded by mud walls forming a quadrangle of 180 fathoms, and has two minarets, of which the one in the citadel is of brick 10 mosques and a brick college. Market on Monday and Friday.

CHORRESHUL a large dist. Hindostan prov. Gund wana, 260 m. long and surrounded by hills. It is somewhat remarkable that in this far land witchcraft presents precisely the same features, and is accompanied by precisely the same circumstances by which it was distinguished in Scotland two centuries ago. The belief in it is general. old women are supposed to be almost exclusively the possessors of the power and the ordeal of the pond is the usual mode of ascertaining the guilt or innocence of suspected persons.

CHOTIEBORZ a tn. Bohemia, circle, Cradan, on the Denbawka, 60 m. S. E. Prague. It contains a parish church a castle with a chapel, a townhouse, and hospital. Manufactures—both woollens and linens, and has six yearly markets. Pop. 3896.

CHOTZEN or **CHOCSEN** a tn. Bohemia, circle, Cradan, on the Seile Ader 24 m. S. E. Kinsgrätz. It contains a parish church, castle, townhouse, and hospital and has a paper and two flour mills. Chotzen is a station on the Prague

abundant and of good quality. The inhabitants are almost all Lutherans, and under the superintendence of the bishop of Christianland. For administrative purposes, the prov is divided into 3 bailiwicks—Upper Tollermarken or Bradsberg, Nederns and Raabrygslagens Lister and Mandal (containing Christianland and the capital) and Stanger. Pop (1845) 519 008.

CHRISTIANLAND a seaport in Norway cap. prov of same name, on the N coast of the Skagerrak, a little W from the mouth of the Torridal lat. 61° 58' N lon 7° 59' E (n) It is built on a sandy plain close to the sea but enclosed on the land side by lofty picturesque-looking rocks. The streets are broad and straight, but are rendered of extraordinary length by the large gardens that intervene between the houses. The latter are chiefly of wood but neatly constructed. The most remarkable edifices in the town is the cathedral, built of gray stone the only other noteworthy structures are the national bank, grammar school, provincial Government-house and offices, and the provincial appeal court and indweller. The manufactures of the place are trifling being confined almost wholly to a little sailcloth making and the distillation of corn spirit. There is also some shipbuilding. Christianity being situated in the only district of Norway where oak grows. The trade of the port is considerable though it possesses but few vessels of its own. The principal exports are logs and lobster, nearly all of which go to England, the lobster wholy to London, lobster sauce regularly running between that city and the Norwegian coast for its purpose. The harbour is deep and well sheltered, it is defended by several batteries, and by the fort of Christianholm on the small island of Odder, at the entrance to the harbour. Christianity is the residence of a bishop, and of the Biskopstend, or governor of the province. It was founded in 1641 by Christian IV whose name it bears, and was in possession of the British for a short time in 1807 during the war with Denmark. Pop. 13 000.

CHRISTIA N S P L a town in the prov of Skagerrak, 7 m. N. Helsingborg, founded in 1712 by the Moravian brethren. It is the seat of busy industry—turning, carrying, glove-making, hat-making and the manufacture of tobacco and snuff being carried on. It has fertile environs. Pop. 700.

CHRISTIANSTAD a fortified town in Sweden, then or of same name, on a peninsula in the Helge Lake, not far from the mouth of the Helge river lat. 56° 58' N lon 14° 10' E about 10 m from the shores of the Baltic. It is well built and is greatly situated has a museum in which there is a birdswall and an art and history museum. There are manufactures, to a small extent of gloves, linen and woollen fabrics. It has also some trade through the port of Alna, at the mouth of the Helge. Pop. 4500.—The city or co. near the S.W. extremity of the kingdom, in the fertile valley of the Helge country, its centre. 1 product—timber, corn, flax, hemp and hops. It has also quarries of marble and stone, and saltpetre pits. An active fishery is carried on at its coasts. Area, 2400 sq m. Pop. 105 600.

CHRISTIANSTAD a town, cap. lat. St. George, Danish W. latitudes on the N shore towards the E. part of the island, observatory in lat. 17° 44' S lon. 64° 41' W. It is defended by two forts, one on a small island in front of the town, the other on a rock of land to the E. The harbour is very difficult of access, being encumbered with many shoals, one of which stretches out nearly 2 m to seaward in a N.E. direction.

CHRISTIANSTAD a seaport in N.W. coast, Norway cap. lat. Romsdal, 82 m. S.W. Trondheim, on three islands, or rather rocks which enclose a beautiful landlocked harbour lat. 62° 10' N lon. 6° 15' E. The surface of the islands on which the town is situated is so irregular that hardly any two houses which are all of wood coloured with red ochre, stand exactly on the same level. The trade of the place is considerable, and the town itself is fast rising into importance. The principal export is stock-fish chiefly for the Spanish and Italian markets. From its singular position, there are scarcely any regular streets in Christianity and the communication between one part of the town and another is kept up chiefly by water. Pop. (1845) 2684.

CHRISTINA (BARTA) on lat. S. Pacific Ocean, one of the Marquesas lat. 8° 59' 13" S lon. 152° 10' W (R). It is traversed lengthways by a ridge of rocky mountains which attain an elevation of 5000 ft. See MARQUESAS.

CHRISTINEHAMN a town in Sweden, lat. of 54 m. E by S Carlstad, a bay on the N.E. shore of Lake Wesner. Two streams their banks planted with trees, flow through the town waste there, and fall into the lake and over the streams are two stone bridges. The town is regularly built the market-places lies on both sides of the rivers; and there are a townhall, theatre, and assembly rooms. A considerable quantity of iron is shipped here annually and the market price of the metal is fixed, and continues made for the whole year at the fair held in March which is one of the most important and most frequented in Sweden. Near the town are mineral wells. Pop. 1700.

CHRISTINEHAFN a seaport in Russia, gov. Finland, dist. of and 80 m. S.W. Vasa lat. 62° 16' 12" N lon. 21° 23' E (n) It stands on the peninsula of Coppe, contains a church, and a wall built. The harbour is safe, and has a considerable trade. The chief exports are timber, pitch, tallow and butter. There is a building dock. P. (1841) 3007.

CHRISTFLETON par Eng. Ch. near 1191 at P. 971.

CHRISTMAS—1. An Isl. Indian Ocean between lat. 10° 27' and 10° 55' S lon. 105° 29' and 105° 30' E. It is about 9 m. long, and as many broad and abounds with trees. It has a depth of 95 fathoms at a cable's length from the shores, and is inaccessible except on the N.W. at a small beach formed of white stones and coral.—2. An Isl. in the Pacific Ocean lat. S.E. point 1° 41' N lon. 157° 15' W. It is about 80 m. in circumference of coral formation and the W. point which projects a little, covers 1 m. of ocean not from Look, in his 1st voyage, in 1777 landed on this island to observe an eclipse of the sun.—3. A harbour on the N. side of Kerguelen Island in the S. Pacific Ocean lat. 48° 41' 5" N lon. 69° 8' E.—4. A harbour, British Guiana, on the Berbice.—5. A sound S. America about 120 m. N.W. Cape Horn, between the islands of Hoste and York Moutain.

CHRISTON par Eng. Somerset 771 at P. 86.

CHRISTOPHERS (n) lat. W. Indies. See LARSEN (for).

CHRISTOPHAL (n) lat. W. Indies. See LARSEN (for). A bank between the river and near its junction with the Orinoco, 10 m. S.W. Maraca lat. 7° 54' N lon. 71° 58' W. It has a good church and convent. The climate is very hot, but not unhealthy. Sugarcane and tobacco are grown; great abundance in the country.—3. A town in Mexico confederation, state of and 12 m. N. the city of Mexico N.W. bank of a lake of its own name.

CHRISTOVAO-SAN, or CHRISTOVAO-RIV—1. A town in Brazil cap. prov. Pernambuco, 6000 ft. above the sea, on the Serra de Pernambuco here crossed by a bridge about 18 m. W. the Atlantic at 31° 0 m. N. N. Bahia lat. 11° 10' 42' S lon. 36° 7' 49' W (n). The private houses are a mass and only a one-story in the public buildings of some. Of these the principal are the governor's palace where both the president and military and civil authorities reside and the provincial assembly holds its sittings, four churches, two convents, a Carmelite and Franciscan, each of which also has a church and an hospital. 1. The Carmelite convent is a lycium, in which Latin and French schools, philosophy and geometry are taught, and there are, besides, two primary schools. The harbour is very shallow, and the access to it difficult and dangerous, a great wall setting into the bay from the Atlantic, and there being moreover a bar with little depth of water. The chief exports are sugar, cotton and tobacco. Pop. of the 3000 of dist. containing two par. 9066.—2. A village par. Bahia prov. and at a short distance from Rio de Janeiro. It contains a church and in its neighbourhood are the palaces of Rua Vitor, and in its port nearly reaches the palace of Princes de Cayo and an ancient convent now converted into a lazaretto.

CHRISTOW par Eng. Devon 3218 at P. 104.

CHROMA or DROMOWICK, a small Dalmatian Isl. in the Adriatic, off Ragusa lat. 43° 38' N lon. 15° 8' 23' E. It is covered with trees and shrubs but, besides a fort by which it is crowned, has no other habitation.

CHRUDIM, a town in Bohemia cap. circle of same name. 62 m. S.E. Prague beautifully situated on the small river Chrudimka. It is surrounded with walls, and contains an old church, a Capuchin convent and a royal high school. It is the seat of the Government of the circle and has many features of common cloth. The horse markets held here are the most important in the monarchy. Pop. 6500.

CHIRZANOV a tn. Austrian Poland on the Chechilo. It is the second place of the district of Gracov and has a busy trade. Pop. 4000 mostly Jews.

CHITCHEI (ASKOE), a lake European Russia, gov. Riazan, dist. Zaraisk, near 1 bank, Oka, to which its waters flow S.E., by two small rivers.

CHU HANG, or **CHANG RIVER**, a river China the main branch of which, called the Si-hang river in the prov. of Yunnan, flows E. through Quingong, receiving numerous tributaries, is joined by the Foh-Kiang or N. river and by the E. river after a course of 200 m. respectively and, after a course of 500 m., falls into the sea below Canton, by numerous mouths the most celebrated of which is the Boon Tigris. The number of boats, of various kinds, employed on this river not only for the transport of goods and passengers, but as the dwellings of families, is almost incredible.

CHUAPA a river Chir. forming the S. boundary line of prov. Coahuila, and separating it from Aconagua. It rises on the W. slope of the Andes, near the volcano of same name, flows W. and falls into the Pacific after a course of about 175 m., in lat. 31° 58' N. It receives the Mapei on the right, and is one of the very few rivers of any importance of which Chir. can boast.

CHILCITO or **CHICOCERO**, a tn. Peru, dep. of, and 15 m. S.E. Puno, W. bank of Lake Titicaca. It has greatly declined from its former importance the population, which at the commencement of the 18th century amounted to 30,000, being now only about 5000.

CHIDLEIGH a tn. and par. Eng. co. Devon 6230 sq.

The town 8 m. S.W. Exeter sits on an eminence near 1 bank Teign consists principally of one street of substantial, well-built houses. In the year 1807 the greater part of the town was destroyed by fire, but has since been renovated. It has a church and chapel for Methodists, Independents, and R.Catholics; endowed grammar school, several national schools, and various charities. The manufacture of woollen fabrics was at one time carried on here to a considerable extent, but has now entirely ceased. It still however retains a high character for cloth. Area, 650 ac. P. 2401.

CHLENGEE or **SHANKE** an isl. China, at the mouth of the Canton river about lat. 22° 45' N. lon. 113° 38' E. It is composed entirely of small hills rising from a general level. Previously to the late war with China, it was strongly fortified, and was considered the outer defence to Canton river but on that occasion its forts or batteries were quickly demolished by the British ships of war.

CHUL a tn. or Independent Tataria. See **TCHEL**.

CHULNLEIGH a market tn. and par. England, co. Devon. The town which is situated 19½ m. N.W. Exeter has a spacious parish church, and chapels for Independents and Wesleyans. The church was damaged by lightning in 1797 and, in 1803, a considerable portion of the town was destroyed by fire. Area of par. 89½ ac. Pop. 111.

CHULUMANI a tn. Bolivia, cap. prov. Yungas, situated a little N. of Mount Illimani, 27 m. N.E. La Paz; lat. 17° 4' S. lon. 68° 30' W. It is ill built, and dirty; but placed in a fertile district, of great picturesque beauty. P. under 2000.

CHULUWA or **CHULUWANA** an isl. E. coast, Africa, Mozambique Channel lat. (N. point) 20° 55' S. lon. 34° 55' E. It is 5 or 6 m. long appears to be joined to the mainland, and is covered with trees but projecting shoals render the navigation of the passage impracticable, except for boats.

CHUMALANI a mountain, Himalaya. See **CHAMALANI**.

CHUMRA—1 A dist. and tn. of N.E. Punjab, the former lying between the Bantol and Mori mountains, watered by the Beas, Ravi and Sarang. The town cap. of the district, is beautifully and picturesquely situated, r. bank, Ravi lat. 32° 22' N. lon. 75° 50' E. The houses, about 1000 in number are of wood and ranged about a rectangular open space, 500 yds. long, and 80 broad.—2, A vil. Punjab, on the road from Attock to Peshawar. lat. 34° 4' N. lon. 72° 48' E.

CHUMBU, a large river Hindostan. It rises in

falls into the Jamna, about 90 m. S.E. Agra, after a course of about 500 m. [add. See **NOTES**]

CHUMIE—1 A mountain range, S. Africa Cape Colony between the parallels of 28° and 32° S. and near the meridian of 27° E. in which basaltic rock, wood and grassy slopes are curiously intermingled.—2 A river flowing from the above range, and from the Maiteng, and pursuing a S.E. E. course to the Kalkagwa.—3 A Freshwater manufactory settlement, on a tributary of the river of same name, 13 m. N.E. Port Beaufort.

CHUMPANEER a dist. and tn. Hindostan prov. Gujarat, the former lying between lat. 22 and 24° N. The town formerly cap. of the district, is 22 m. N.E. Dardas lat. 22° 31' N. lon. 73° 41' E. It stands on the summit of a mountain 2500 ft. high and on some sides is apparently perpendicular.

CHU KINO a city China, prov. of Szechuen, 180 m. E. Ching too, on a tributary of the Yang-tse-Kiang. The houses are built on a hill in the form of an amphitheatre. Numerous silk worms are bred here.

CHUNAR GARA, a tn. fortress and invalid station Hindostan prov. Allahabad r. bank Ganges 17 m. S.W. Benares; lat. 25° 9' N. lon. 82° 41' E. The town situated E. of the fort, contains many stone houses.—The fortress stands on a lofty rock, rising abruptly from the river and presents a bold and picturesque appearance when viewed from the water. In the last enclosure, on the very summit of the mountain, which is calculated to make a defence, even should all the lower works have fallen, are several very interesting

FIG. 1. 3118. RESIDENCE — From an Original Drawing by Chas. R. Smith, Esq. Sec.

buildings one of them is the old Hindoo palace, a circular dome surrounded by several vaulted apartments, with many remains of painting and carving but dark low and imperious to heat. On one side of this structure, is a lofty and more airy building now used as an armoury but formerly the residence of the Muzumdar governor with handsome rooms, and beautifully carved oval windows. The country in the neighbourhood runs into low barren hills from which a very good stone for building is obtained.

CHUNIOR, a savage race of Indians Ecuador S.W. extremity dist. Jaen. They have their chief residence in Chibasco 27 m. from Paeate. When on their expeditions, they are almost in a state of nudity. Sometimes they wear a short whitish-brown shirt, without sleeves. This garment, when worn by the chiefs, is red. Most of them dye their hair with ochre, a deep vermilion, and paint the face and breast the same colour. Their weapons are the bow and arrow. They are cruel and treacherous. Tachudi relates that while they were on their hunting expeditions, he left in their hands knives, fish-hooks, ear-rings, &c., with the view of establishing a friendly intercourse with them. In return for these presents they left him some of their edible roots poisoned.

CHUPAT a small and little-known river S. America, in Patagonia, pursuing as far as it has been traced, a winding E. course, and falling into the Atlantic in Estuero Bay lat. 43° 30' S.; lon. 65° W. It can be entered only by small craft.

CHUPPERA MOWH, or **CHUPPERA MOW** a tn. or large village Hindooistan, prov. Behar, 1 bank Ganges, along which it extends for nearly a mile 83 m WNW Patna lat. 25 46' N lon. 84 46' E It contains a mosque, and several brook houses the annexed view of one of the latter in the

NATIVE HOUSE AT CHUPPERA MOWH.
From an Original Drawing by Capt. R. Smith, 18th Regt.

centre of the town will give a pretty correct idea of the residences of the respectable classes

CHUPRAH a tn Hindooistan prov. Behar 1 bank Ganges, 93 m WNW Patna It is narrow but extends along the river for nearly a mile and has an active trade Pop. 43,500 add. See *Suppl.*

CHUQUIBAMBA a tn. Peru dep. of and 83 m NW Arequipa The temperature is cold and disagreeable and in the neighbourhood is a mountain of same name 21,000 ft. above the level of the sea.

CHUQUISACA a dep. Bolivia, on the S E of the great table land comprehending four provinces, namely Chuquisaca, Cinti, Yamparacani, and Tomina, which all four pour their waters into the Pilcomayo an affluent of the La Plata The pop. may be estimated at 95,000 of whom rather more than half are Indians.—Chuquisaca the province is the most N and most elevated part of the department

CHUQUISACA or **LA PLATA**, the cap. of Bolivia, agreeably situated 9843 ft. above sea level on a small plateau above the banks of the Rio de la Plata, a small stream flowing into the Cochumayo lat. 19° 30' S. lon. 66° 42' W The houses generally of two stories, are well built and have usually

well cleaned. The central pavement, of large round pebbles, is unpleasant to the feet but the principal streets have side pathways smoothly and regularly paved The principal square is adorned with an elegant fountain. The buildings most deserving of notice are the cathedral occupying one of the sides of the square now mentioned a magnificent edifice, in the morenaque style, with lofty towers and an immense dome, and richly decorated within the president's palace, occupying another side of the same square the churches of San Francisco and San Miguel two monasteries, one of them a handsome structure, seated on a height which overlooks the town; three nurseries, and a theatre recently constructed. The principal educational establishments are the seminary of St. Christopher where young ecclesiastics are trained; and the college of Jinin where a good education, comprehending Latin mathematics physics, logic, and moral philosophy is given There is also an endowment called Colegio de las educandas, where poor female orphans are brought up Chuquisaca is the seat of the Legislature, of the supreme court of justice and several other important courts and offices, and is also the seat of an archbishop. It cannot be said to have either manufactures or trade, and owes all its prosperity to its being the capital The savanna are generally arid but the valleys are well cultivated by the plough and yield large crops of corn clover and potatoes The great body of the population are Indians who are very singular in their dress, and speak a language called Quechua.

From the *termes Choque saca*, in this language, meaning *treasure* the town is supposed to have derived its name, in consequence of the immense treasures which were carried across the river at this point on the way to Cuzco, the town of the Incas. Pop. about 18,000.—(Castellanos *Exposition dans les parties centrales de l'Amérique du Sud*.)

CHUCUITO a tn. Peru. See *Cusco*.
CHLE a mountain Hindooistan one of the lofty peaks of Gurkwal near the sources of the Jumna its height is estimated at 12,149 ft. lat. 30° 52' N lon. 77° 28' E.

Previously to their possession the climate was regarded as one of the finest in the world. An extraordinary mortality among the British troops was thought to belie this view but it has since been satisfactorily proved, that the fault was not in the climate, but in the very improper locality selected for barracks, and that Chusan was still entitled to be regarded as the Montpellier of China. Pop. about 200,000.

CHISEL an important m. of India and of 80 m. N. Khiva, on the Amu-Darya. The inhabitants are engaged in agriculture and trade. Weekly markets, attended by Turco and Kirghises.

CHUTA AHMED OOR, a m. Hindoostan, principal city of 145 m. S.W. Bahawalpur on the frontiers of Bundel. It is of considerable size is surrounded by a mud wall and has several recently erected but detached fortresses. From its proximity to Schinde, it is protected by a garrison of 300 men, with six guns.

CHUTA NAGPOOR [Little Nagpore] a large dist. Hindoostan, prov. Bengal forming the S. extremity of prov. Bahar area, 9839 sq. m. named Chuta to distinguish it from a district of the same name in province Bahawalpur. **CHUTAN** a m. Eng. With 1818 ac Pop. 515.

CILICENIN par Wales, Carmarthen 3405 ac. 101 640

CILICIA an ancient div of Asia Minor now included in the Turkish pashalik of Iahut. It was bounded N by the Taurus range, which separated it from Cappadocia. E. by the Euphrates, which divided it from Syria, S. by the Gulf of Issus (Iskenderoon) and the Cilician Sea, and W. by Taurus hills, between lat. 36 and 38° N. lon. 32 and 37° E. The N. part, which was called by the ancients Cilicia Proper, produced various kinds of grain and fruits, in great abundance, and contained a number of towns including Larissa the birth place of the apostle Paul. The W. part of the country which was called Cilicia Trachea [the rough] furnished an inexhaustible supply of cedars and fir for shipbuilding and was famed for its breed of goats and horses. The sea coast was for a long time infested by pirates, but their depredations were at length suppressed by Pompey. Mar Jerns us we learn from the Acts of the Apostles, were settled in Cilicia.

CILJEK a tn Spain, Extremadura, prov of, and 30 m. N N W Castru. The houses are half built the streets narrow and ill-paved, the town possesses two squares, a parish church, (wall) two schools, a prison, storehouse, and cemetery. The people are chiefly engaged in expressing oil and wine tilage and cattle rearing. Pop. 2520

CILLI [see Cillena] a tn Austria, Duchy of Styria, curle of same name, 40 m. N W Graz and 85 m. N E Trieste pleasantly situated near the confluence of the Klidingbeck with the Sann, which is here navigable. It contains several churches, a remarkable old gothic chapel two convents, a gymnasium, a primary school, a custom house and a barracks. It is the seat of the government of the circle, and has a considerable trade in grain, wine &c. Being intermediate between Trieste and Vienna, it has also a considerable transit trade, which has greatly increased since the opening of the railway between it and the latter city and which will no doubt be further improved when the continuation of the line to Trieste now (1851) opened as far as Ljubach is completed. In the vicinity of the town are the mineral waters of Rohutich large quantities of which are bottled and sent to various places. Numerous Roman remains exist here. In the neighbourhood is the old castle of Gail formerly the residence of the Counts of that name. Pop. 1800

CIMBEBA a country on S W coast Africa, having N Beuguala, and S the country of the Hotentots, between lat. 17° and 26° S. length, 645 m. The coast consists of sand and rocks, and has no trace either of water or vegetation. The interior is also barren, but is said to be inhabited by the Cimbebas who have given their name to the country

Vol. I

CIMBRISHAMN [see Cimbrorum Portus] a seaport on Sweden lon of and 31 m. S R R Christianstad on the Baltic lat. 55° 28' 80" N lon. 14° 51' 16" E (A.) It has some trade in grain a dyework, tannery tile-work as a vinegar factory and fishing is carried on. Pop. 1032

CIMINNA a tn Sicily prov Palermo, 11 m. S W Termini Pop. 6150

CIMITI a cape, Naples, N K coast of Calabria between Cape Colonna on the N and Cape Rheano on the E. and between the gulfs of Otranto and Squillace; lat. 36° N lon. 17° 8' E

CIVITILE a tn and com. Naples, prov Terra di Lavoro dist. of, and about 1 m. N Nola. It is chiefly deservng of notice, as the reputed place where several thousand Christians suffered martyrdom, during the reign of the Emperor Marcus Aurelius. The church and different chapels of the town contain numerous pictures and ancient monuments relating to the fact. Pop. 2298

CIMONE a mountain Italy duchy and dist. Modena N Apennines 6 m. E. Liave Pelago lat. 44° 14' N lon. 10° 48' E. formerly one of the summits of the central Apennines. It is composed chiefly of graywacke and rises to an elevation of 6975 ft. above sea level

CINALOA or **SINALOA**—1 A dep Mex con Confederation formerly a prov now united with dep Sonora, and called the State of Occidente. Its coast stretch along the Gulf of California, from the River Bayona to the River Mayo, or from lat. 22° 35' to 28° 58' N. about 220 m with a general breadth of about 150 m. The country along the coast is generally low and flat with a sandy soil which however yields good crops of Indian corn and wheat, when it can be irrigated. The principal products are wheat, Indian corn and sugar. The mountains are usually without wood and only covered with low stunted trees and bushes, but towards the Sierra Madre, on the E. frontier there are extensive forests. The population consists chiefly of whites the number of Indians being uncommensurable—2 A is a united with 8 or 10 m. 1 bank of a river of same name about 50 m. from the Gulf of California lat. 22° 47' N lon. 108° 7' W. It is a thriving place at Leonaria 1000 inhabitants. ad. 44° 50' N

CINCA [anc Cingis] a river Spain which rises in a small lake in the Pyrenees, on the French frontier in the valley of Belay, prov Huesca and proceeding S. through Aragon. It has r bank, Segura, a little above its confluence with the Ebro. Its principal tributaries are the Esera, which joins its l bank and the Lera which joins its r bank. It is about 70 m. It is very rapid and subject to inundations which frequently occasion great damage. It is well stocked with fish

CINCINNATI a city and river port U States Ohio, on r bank Ohio r at 40 m. above its junction with the Mississippi lat. 39° 6' 80" N lon. 84° 28' W. It is finely situated in a valley 3 m. broad closed in with hills on the gentle slopes of which the houses, mostly of good form and material are built. The streets are generally wide and straight, several large footways lined with trees. The water for general use is raised from the river by steam pumping into a large filter & reservoir. Among the finest public edifices are the R Catholic cathedral the Protestant Episcopal church the First Presbyterian church &c. There are nearly 100 other places of worship a handsome city hall two museums a theatre and a large music hall a mechanics institute, and several good public libraries three colleges—one of public education (the Cincinnati) one private (the Woodward) and the St Francis Xavier a R Catholic foundation with numerous academies semi a &c. In the city and environs are several asylums for the diseased and destitute including one hospital or more. It is a great seat of industry being the centre and focus of the mid western commerce of the Union wheateas hubs of communication by river rail, and canal radiate from it— inland seaward, and backward. Up and down the Ohio to and from the city, trade or ply about 800 steamers many of them large vessels. The chief article of native produce is pork of which the exports in 1852 exceeded £1,000,000. All other kinds of produce are also largely exported. The principal manufacturers are machines, iron and other metal wares, flour, grain textile fabrics articles of clothing, furniture books machinery &c.—in 1851 estimated to the value of nearly £12,000,000. Cincinnati is now the

5th city in the U. States for population and is of still greater relative importance in some other respects. Pop. (1860) about 750 (1880) 1000 (1900) 24,000 (1840) 44,358 (1850) 115,458 (1855) 100,106 (1860) 100,106.

CINCO SERENES, a Mexican Confederation state of and 196 m. N. by W. Durango. It formed one of the ancient settlements of the Jowita, and was occupied by Indians.

CINCY or CINCY (see Cinzano) a town and com. Belgium prov. of and 17 m. S.E. Namur on an isolated plateau near the Hainaut. It is surrounded by old ramparts, with bastions attributed to the Romans has regularly built houses, and clean and quiet streets. The parish church is surrounded by a square tower and is said to date from the beginning of the fourth century. Cincy is celebrated for its stoneware, and varnished pottery has a considerable trade in horses and cattle, corn wool and wood, and eight annual fairs. In the vicinity several ancient tombs and other antiquities have been found. Pop. 14,722.

CINGOLI or CINGOLI a town Italy prov. of and 13 m. W.N.W. Macerata, 8 bank Musone. It contains a collegiate church and three convents and has several fairs. Pop. 2023.

CINISI a town Sicily prov. of and 13 m. W.N.W. Palermo, near the sea. The maize plant, and the Italian fig are cultivated in the neighbourhood. Pop. 5450.

CINQUE PORTS, seaports of England namely Dover, Sandwich, Hythe, and Romney on the coast of Kent and Swasey, Rye, Winchelsea, Hastings and Seaford on that of Sussex. Their number as the name imports was originally five. Winchelsea, Rye and Seaford, having been subsequently added. The original Cinque Ports were created by William the Conqueror the others were added before the reign of Henry III. They were endowed with various important privileges, in consideration of their furnishing a certain quota of ships of war properly equipped and manned, for the King's use, when demanded. In the time of Edward I. the number they were bound to provide was 57 the period of gratuitous service being limited to 15 days. Over these ports is appointed a warden, a most honourable, but quite a useless appointment made prior to 1831 each had a right to send two members, called barons, to Parliament.

CINQUEFONDI a town Naples prov. Calabria Ultra I. about 44 m. S.W. Catanzaro. The former town was nearly destroyed by the earthquake of 1783. Pop. 4502.

CINTEGABELLE a town France, dep. Haute-Garonne at the confluence of the Lers with the Arège, which here begins to be navigable. It carries on some trade and has four annual fairs. Pop. 371.

CINTI or CINTI a town Hol. a. esp. prov. of same name, dep. Chaguanica. It is situated in a vale of the same name, 7 bank, Chaco, a small affluent of the Pilcomayo, and within 10 m. of its junction with that river lat. 21 16 S. lon. 69° 25' W. It has a considerable trade in wine and brandy. Pop. 200. —The vale of Cinti in which the town stands is extremely fertile.

CINTIA (Musa Cynthia) a town Portugal prov. Estremadura, comarca, Torres Vedras, 15 m. W.N.W. Lisbon, on the slope of the serra de Cintia. The country around is extremely beautiful and the climate mild and agreeable. On these accounts it is much resorted to by the wealthier inhabitants of Lisbon who have here their country or country houses. Many English and other foreigners have villas here also. The Kings of Portugal have a palace at Cintia, with five gardens ornamented with fountains. W. of the town a little, is the beautiful valley of Colares, which opens to the sea, and which is also thickly studded with country mansions. There are four annual fairs, one of which lasts two days. The country abounds with fruits of all descriptions, including oranges and lemons, and in the neighbourhood are quarries of beautiful marble. Cintia is celebrated for the convention entered into there in 1806, by which the French after their defeat at Vimeiro, were not only permitted to leave Portugal but were conveyed to France with their arms, artillery and property. Pop. 2562.

CINTRIENGO a town Spain, Navarre 18 m. S.W. Tudela, 7 bank Albarracín. Its streets are regularly built, its square spacious, and lined with handsome houses, and public buildings. Here are a fine church, several chapels, a town hall, prison, treasury and two schools. The inhabitants

export oil in large quantities and trade in grain and fruits. Pop. 3200.

CIOBAT (La), a seaport in France, dep. Bouches-du-Rhône, 15 m. S.E. Marseille, on the Mediterranean. It is built at the head of a bight W. side of the bay of Laque, and is surrounded by an old rampart in tolerable preservation. The streets are straight, and well paved, and most of the houses are tastefully built. An agreeable promenade, called the Terrasse, overlooks the town. The port is safe, and commodious, and large enough to contain 160 vessels with water sufficient for ships of 800 tons. There is good anchorage for large vessels in the bay and two fixed lights on the mules. The port is defended by a castle, and several batteries. There are here a tribunal of commerce and a school of navigation cotton-mills shipbuilding yards and a manufactory of steam engines. The surrounding district produces excellent mace, wine, oil of superior quality figs, oranges, &c. in which articles a considerable trade is carried on. Sardines and anchovies are caught along the coast. Ciobat town is said to occupy the site of the ancient Chabertus, founded by the Romans b.c. 180. The Romans had a naval station here. Pop. 4098.

CIRKAR (NORWAY) a large maritime prov. E. coast Hindostan the limits of which are differently stated by different authorities, but which may be said generally to extend between lat. 16° and 19° 26' N. having W. Orissa E. the Bay of Bengal S. the Carnatic and N. Cattaek. The Circars are included in the Madras presidency and politically divided into five districts—Carnam Vengampet, Rajahmundry, Masulipatam, and Guntur. A range of mountains extends along the whole W. frontier from the Chilka Lake on the N. to the banks of the Godavary on the S. Their distance from the coast to which they run parallel is generally from 80 to 40 m. but in several places they approach much nearer. The climate S. of the Godavary is intensely hot to the N. it is more temperate. The periodical rains generally set in about the middle of June falling in moderate showers, with a W. wind till the end of August, when they begin to descend in greater abundance, and as continue till the beginning of November. From this period till the end of March when the hot season commences the weather is fine and pleasant. In the hilly regions of the Godavary a serious state of air prevails throughout the different seasons of vegetation giving rise to a disease called the hill fever. Grains are raised here in large quantities, but fruits, roots, and green vegetables are scarce. Sugar, ginger, turmeric, cotton and tobacco are also produced, the latter of excellent quality. The forests on the hills particularly those of Rajahmundry contain vast numbers of valuable tank trees. The principal quadrupeds are sheep, and the larger species of horned cattle. The neighbouring seas abound in fish of various kinds. The chief manufactures are cotton stuffs, carpets, chintzes, silks, panyam cloths, muslins, and silks, but of some of these the quantities manufactured are very trifling. The raw silk is all imported. Shipbuilding is carried on to a considerable extent in the Godavary and above 50,000 tons of small native craft are employed in the coasting trade, principally with Madras. The exports to Europe are chiefly fine cotton fabrics. The native inhabitants of these districts, represented as a superior class of men to those of Bengal are wholly Hindu with exception of a few Mohammedans dispersed through the different towns. The villages consist of mud huts, but in general, tolerably commodious. The roads are so bad that wheeled carriages are very little employed, while the want of bridges and proper ferry-boats, render travelling in the interior exceedingly tedious, and in some places almost impracticable. The Northern Circars were among the earliest of the territorial possessions of the East India Company the latter having acquired four of them in 1766 from Mogul Shah Alam, who bestowed them on the Company as a free gift. The fifth Guntur came into our possession in 1768. The local administration of the territory was continued under the management of the natives until 1789 when provincial chiefs and councils were appointed, and this mode of government continued until 1794 when a change in the internal Government took place. The system of a permanent assessment was introduced and established during the years 1802 and 1804 when the province was divided into the five jurisdictions or collectorates already named.

CIRCASSIA, or **TCHERKESSETA**, a country in the S.E. corner of Europe, the E. portion of which is called *Livnia Akhiska*, claimed by Russia, but in fact independent, between lat. 41° 50' and 46° 20' N. and lon. 37° and 47° 20' E. bounded, N. by the rivers Kouban and Terek and part of the Russian government of Caucasus, N.W. by the Black Sea, S.W. and S. by the mountains of Caucasus, and E. by Daghestan and the district of Kamkhi. Greatest length N.W. to S.E. 550 m. average breadth 76 m. area, about 40,000 sq. m. It comprises the whole of the N. and in the N.W. a part of the S. side of the Caucasus and is intersected throughout by branches of that mountain-chain, separated from each other by deep precipitous ravines, which in general are only wide enough to form the beds of foaming torrents but occasionally after commencing with narrow gorges, spread out into valleys of some extent and great fertility. The highest summits are for nine months in the year covered with snow some of them indeed never altogether parting with this covering at a lower level where the surface is not so precipitous as to leave no soil for vegetation, magnificent forests, chiefly of oak, beech, and lower still grassy slopes are succeeded occasionally by cultivated fields the whole uniting to form a scenery which, according to all accounts is of the most magnificent description. The climate of Circassia is represented as generally temperate and salubrious and good evidence of this is furnished by the fact that the inhabitants are healthy not subject to chronic diseases, and live, when life is allowed to run its natural course, to a good old age. The geology of Circassia, where not impeded in fact by the Caucasus (which see) is very imperfectly known. Rich beds of iron exist, but have not been turned to account. Traces of copper and lead have also been discovered and in some districts, coal not only is found but is said to be partially worked and used for fuel. Circassia abounds in mountain torrents but none of its streams deserve the name of river if we except the Kouban and Terek, which both rise within it, and are indebted to it for almost all their affluents but acquire no importance till they reach its borders. The natural vegetation of Circassia is vigorous and luxuriant. References has already been made to the magnificent mountain forests. Some of these extend into the lower grounds, and there have a rank undergrowth which becomes almost impenetrable and, while blocking up all ordinary means of traffic compensates for the evil by furnishing admirable means of defence against hostile attacks. The wild animals though perhaps not so various in kind as might be expected in such circumstances, are very numerous, and consist chiefly of bears, wolves, foxes, and lugs. Various kinds of deer abound and the red deer is common along the banks of the Kouban are said to be hunted by the elk. Eagles are often seen, and the part of it a country washed by the Black Sea is the resort of numerous flocks of swan and geese. Among smaller birds, the nightingale occasionally is heard but many others, as the blackbird and thrush though abundant, and externally the same as our own well-known songsters, appear to have lost their notes. A few fish are taken on the coast, and most of the mountain streams are well supplied with trout. Where the surface is sufficiently level to admit of cultivation, the soil is generally a deep rich loam, with a sub stratum of limestone or chalk. The implements and mode of cultivation are very defective; but corn and wine, and all the ordinary productions of temperate climates, are freely raised. The crop most extensively grown is millet the flour of which made into porridge, may be regarded as the national diet. The horses, though generally small, are active sure-footed, quick-eyed and remarkably supple. Almost every Circassian has his horse and tends it with a care scarcely surpassed by that which is paid by the Arab of the desert to his steed. Both cattle and sheep are extensively reared but the domestic animal existing in greatest numbers is the goat which grows up with almost no care, browsing on the twigs and undergrowth of the forests. Agriculture and the rearing of cattle, seem to be the only industrial occupations. There are no manufactures in the proper sense of the term. The only thing approaching to them are the scanty products of a few individuals employed as a kind of ornamental silver smiths, gun and sword makers, carpenters and coppersmiths. It is said, however that there is no lack of domestic industry and, that while the males are occupied with the labours of

the field, the females are busily engaged, not only in ordinary household work, but in carrying wool, hemp, and flax through all their various processes up to the finished garment, weaving and tailoring included. The trade is almost as modest as the manufactures. When it has any existence, it is only as barter money being almost unknown an ox or cow forming the ordinary standard of value. The country however is by no means destitute of materials for export. It has ample supplies of excellent oak timber and could furnish considerable quantities of honey wax, tallow hides, and furs. Of the last, indeed a beautiful skin fur is sent to Constantinople, and much valued for pelisses. To Constantinople, also, are sent Circassian slaves both male and female the former used to recruit the corps of Mamelukes in Egypt, and the latter chiefly natives of Georgia, Iberia and Mingrelia, to supply the harems of wealthy Turks. The E. part of Circassia is visited by Armenian traders.

But the chief interest connected with Circassia is not of a commercial nature. It seems to be universally admitted that its people exhibit more in the finest physical form and are the original stock from which the races now dominant throughout the civilized world were derived. In consequence of this, everything connected with them—their shape and features, their manners, institutions, and general history—have justly engaged a far greater degree of attention than the extent of their country and even the heroic achievements of which they have made it the theatre, could have otherwise deserved. Unfortunately in regard to many points the difficulty of inquiry is as great as its importance. Although the different tribes inhabiting Circassia bear a striking resemblance to each other both externally and in habits and customs they differ widely in language. Within a narrow space not less than 72 dialects have been counted and one particular spot, where this variety is more remarkably exhibited has been named by Abulfeda, *Jebel el Alason* (the Mount of Tongues). To add to the perplexity none of their languages have a written character while their pronunciation consists of strange mouth deep, guttural sounds which European letters can hardly express and if European organs vainly attempt to articulate. In external form the Circassians are of middle stature broad shouldered, but otherwise rather simply made.

CIRCASSIA, N.W. — From *Storck's Reise in den Kaukasus*.

with small hands and feet, and keen lively eyes. Their bearing is manly and dignified but they have a kind of lofty gait, which perhaps indicates, and at all events, may easily be mistaken for haughtiness. They may be divided into two great classes—the Circassians proper or the *Tcherkessians*, and the *Tchabetchians*. They take the common name of

Adighé but the former occupy the W. parts of the Caucasus, and including a great number of tribes of Kabardians, Abkhazians, Luchas, Tschetchev &c. amount to 400,000 or 500,000 souls, while the latter occupying the E. parts, have probably more, 1/2 the energy and power, from a comparatively few stock and now amount to about 150,000, thus making up the whole population of it to exceed 650,000—a number not to be apparently fairly estimated by Wagner though Mr. Hall tries to prove that it cannot fall short of a million. The Circassians are divided into four different classes, which are ranged under each other in a way which bears some resemblance to our feudal system. At the head stand the Princes or Pachas who are independent of each other and have no common head unless when on great emergencies they convene in appointing one. Their rank is hereditary and they are particularly careful to preserve it unimpaired by intermarrying only with families which possess it. Hence this class is considered to furnish the best specimens of the pure Circassian stock. Under each Pacha are, 1. *Ladies* or nobility 2. *Tschikokos* or tall freemen 3. *Pachiks*—mere freemen or rather serfs. Beneath all these though their own fortunes position scarcely allows them to be reckoned as a class, are slaves. Each prince though nominally independent, is by no means a despot. The extent of his powers is well understood, and he attempts to overstretch them would be at once opposed by the nobility at least in so far as their own privileges were affected. Of the privileges of the nobles which they might not be so careful as to the oppression of the serfs & Pachiks by both princes and nobles, is by no means unknown but the Tschikokos or tall freemen, the most numerous class of all will deserve the name and have both power and spirit sufficient to maintain their position. The Circassians are civilized enough to live in towns, but the nature of the country combined with other causes, induces them to prefer houses or simple huts, often well built & well-constructed. The houses are generally of a very humble description they are almost invariably of one story. The better description are built of wood, but the greater part are merely a framework of wood filled up with clay and in many cases are of clay throughout. The interior corresponds, there is no decoration and scarcely anything which deserves the name of furniture. A kind of tall raised seat is the surface on which the men sit, the women sit on the floor & a divan and there the inmates sit, eat, and sleep. The imperfect accommodation has provided is partly explained by the fact that the Circassians spend the greater part of his time, in the open air and there not in his house, finds his home. In domestic life the Circassian is very much of a Turk. His authority in his own house is absolute. His wife must hide herself from strangers, and not walk out without being veiled. His children must stand in his presence and, when they get up, go into a corner and turn their backs. The best feature in the domestic arrangement is that there is no barren and polygamy is almost unknown. Still so long as public law values the life of a woman at half that of a man and he sells his daughter not only to the countryman who honestly takes her for his wife, but sometimes even to the trader who means to make a speculation of her charms—without question the truth of all that is said of his inhuman generosity, cruelty, and love of freedom, it is impossible to deny that in many essential respects, he is more or less a savage.

The religion of the Circassians exhibits a strange jumble of Christianity, Mahomedanism, and Paganism. The first unfortunately has scarcely a nominal existence, and is chiefly discernible in a superstitious reverence paid to the crosses of which in many places are set up in many localities, which consequences often become famous trying-places and at which some kind of worship is paid. The paganism appears in the homage which is paid, chiefly by the vulgar to two spirits a good and a bad—Meyan, a benevolent deity and Teebibé, the spirit of thunder. Mahomedanism exists in a more definite form and in some districts considerable influence is possessed by its priests, who, in addition to their proper duties as teachers, and keep schools, in which—many of the most venerable—Turkish and occasionally a little Persian, are taught. The true Circassian education is that which the youths receive when they are trained to war from their earliest years and they come from all they are able to take the field.

The Circassians having no annals, and very few traditions, their early history is almost a blank. Much ingenuity and labour have been employed in endeavouring to trace their origin through the mists of language. The success as yet has been very partial, but there can be no doubt that they came from the East, and the probability is that they were originally Medes. From them Greeks received their first inhabitants, and in return appears to have sent back colonists, who settled on the Circassian coast, and ultimately fell under the Roman domination. In more modern times, between the 10th and 13th centuries they became subject to the kingdom of Georgia, whose queen, Tamar is said to have spread a knowledge of Christianity among them. In 1424 they threw off the Georgian yoke, asserted their independence, and not only maintained it, but extended their boundaries so far that they were at last brought into fierce conflict with the Tartars, who ultimately prevailed and made the Circassians their tributaries. They continued so till 1705 when they rose against their oppressors, and, by a decisive victory effected their freedom. In 1791 Russia acquired the Abkhaz as a frontier and in 1784 the Turks built the fort Anapa, and thence directed their efforts to stir up the Circassians against the Czar. Anapa, taken by the Russians in 1807 was restored to Turkey in 1817 at the peace of Bucharest. The garrison which followed this treaty was used by the Turks to convert the Circassians to Islamism and to instigate them into ever-during enmity to Russia. In 1839 Anapa again fell into the hands of the Russians and by the treaty of Adrianople, they also acquired all the other Turkish possessions on this coast. Upon this they ground their claims of sovereignty over Circassia, which in fact was never under Turkish rule. The claim is indignantly rejected by the Circassians, who for many years have not only kept the Russian armies at bay but inflicted a series of defeats, as has enabled them to the victims of hunting, and of customs to the extent of 1/2 million of dollars a year. See Asia, Key, Bell's *Circassia* &c.

CIRCLE O or (circum) (see *Circum* *Promoter* &c.) a cape and mount S Italy on the Mediterranean near the S. extremity of the Papal States lat 41 13 N lon 13 2 30' E. It rises 1713 ft above sea level and derives its name from (circum), the famous sorcerer.

CIRCLEVILLE Lib. a town in U. S. Ohio 20 m S. Columbus. It has regular streets at right angles to each other and contains a court-house, public market, three public offices, four churches, and an academy. A millinery a brewery three tanneries, and three printing offices. Pop. about 2000.

CIRENCESTER usually called Cirencester a town bordering on England on the E. and 18 m S.W. of Cirencester in the (Cirencester) branch of the Great Western Railway. It contains four principal streets, several smaller and several lanes, extending to an area about 2 m. in circumference. The houses are mostly of stone and well built the streets well paved and lighted with gas. It has altogether a respectable appearance having the air of a town inhabited by persons in opulent circumstances. The church, which is the style of the 13th century, is one of the most magnificent parochial of stone in England and contains a number of interesting monuments its tower is 132 ft high. There are several dissenting chapels a free grammar-school and numerous charities. Woollen cloths and carpets are manufactured here to a small extent also currier's knives, which are much esteemed. There is little trade of any other kind carried on. It returns two members to the House of Commons. Reg. Geo. (1860) 47. Cirencester was a city of the Britons and subsequently a Roman station called by Ptolemy *Cirendum*. A number of Roman remains have been discovered in the vicinity including an amphitheatre. Area of par. 6000 ac. Pop. 6096.

CIREY L'ÉVÊQUE, a town France, prov. Meurthe. 11 m. S.W. Barrebourg, at the foot of the Vosges, near the source of the Vesouze. It manufactures plate glass on a very extensive scale deals, wax, and paper and has also saw mills. Pop. 2547.

CIREY L'ÉVÊQUE, a town France, prov. Meurthe. 11 m. S.W. Barrebourg, at the foot of the Vosges, near the source of the Vesouze. It manufactures plate glass on a very extensive scale deals, wax, and paper and has also saw mills. Pop. 2547.

CIREY L'ÉVÊQUE, a town France, prov. Meurthe. 11 m. S.W. Barrebourg, at the foot of the Vosges, near the source of the Vesouze. It manufactures plate glass on a very extensive scale deals, wax, and paper and has also saw mills. Pop. 2547.

CIREY L'ÉVÊQUE, a town France, prov. Meurthe. 11 m. S.W. Barrebourg, at the foot of the Vosges, near the source of the Vesouze. It manufactures plate glass on a very extensive scale deals, wax, and paper and has also saw mills. Pop. 2547.

the bishops of Umbriaco, and a seminary. The astronomer Oligi who reformed the calendar under Gregory XIII., was a native of this town. The district produces a considerable quantity of mutton. Pop. 2934

CIBON small river France which rises on the frontiers of dep. Landes near Labon, and, after a N W course of about 25 m joins 1 bank, Gironde, below Langon.

CIEHAR a hamlet Denmark, cap. hall of same name, daily Holsten, 9 m S E Oldenburg, between the Balin and the Gruber See. An ancient abbey of Benedictines was founded here in the 12th century and suppressed in 1544. The bail area about 9 m contains three towns and three parishes. Pop. 5580

CISAFRON a tn Spain Leon prov of and 24 m N W Palencia, on a gentle eminence, of a circular form. It contains three parish churches, a handsome townhouse, a large storehouse, and well-endowed primary school. The inhabitants are chiefly employed in agriculture and the ordinary handicrafts but a fourth of them spin and prepare wool for the great woollen factories of Palencia. Pop. 2029

CISAFRONA — a tn Italy delegation of and 28 m W Frosinone near the Appian Way. The only object deserving of notice is the facade of the Palazzo palace, in the public square. The district is unhealthy being not far from the Pontine marshes. An extensive forest stretches from Cisafona to the Mediterranean. Pop. 2400 — 3 A vil ling dom of Italy prov Alessandria about 18 m N E Turin Pop. 2000

CISTERNINO a tn Naples, prov of and 41 m S F. Bari, on a mountain. It has a collegiate church and an 8 f. pop. 104 4637

CITTARA a tn Naples prov Principato Citra, on the gulf of and 4 m S W Salerno. Some cotton is spun and manufactured but the inhabitants are chiefly employed in fishing. Pop. 2280

CITARRA a hamlet in New Granada, prov and cap. of Choco, r bank, Atarao 85 m S W Antioquia, with a moat to its climate and having rich gold washings near it. Pop. 2600

CITRUX (formerly Cateaux) a small hamlet, France, dep. Côte-d'Or 14 m N F Beaune r bank Vouge, the seat of the celebrated monastery of Cîteaux the buildings of which still remain to attest its former magnificence. The monastic order of Cîteaux, which owes its name to it, was founded here in 1098, by Robert Abbot of Molesme and in the course of a few years, had become so numerous as to throw off its colonies of *World Poverty* Clairvaux and Morimond which four monasteries were called the daughters of Cîteaux and held the rank of chief houses of the order although always under the direction of Cîteaux. Through the exertions of St Bernard de Clairvaux it had increased so much 100 years after its origin as to embrace 800 rich abbies in different countries of Europe. The Benedictine rule had originally been given to the order but the Cîteauxs soon had rules peculiar to themselves. They succeeded in freeing themselves from the superintendence of the bishops, and formed a kind of spiritual republic under the immediate superintendence of the pope. The abbot of Cîteaux the abbots of the four houses already mentioned and 20 other abbots, governed the body. Among the fraternities emanating from them the most remarkable are the barefooted monks or Penitents, the nuns of Port-royal the Recollets and the monks of La Trappe. In the 18th century 1600 monasteries and 1400 nunneries depended on the abbey of Cîteaux

CITEAFRON or **ETAFRA** a mountain Greece forming an elevated ridge, which lies in a N W direction separating Boeotia from Megara and Attica. Its culminating point, or Cithæron proper overhanging the ancient Platea, which stood on its N slope, whose walls may still be traced on all their circuit, is 4620 ft above the sea. This slope gradually sinks down into the celebrated plains of Boeotia. The modern name Elates or Elatia (from the Greek *Elates* a fir) it owes to the pine forests by which its summit is crowned. Under its ancient name, it is celebrated by poets and other writers, as the scene of many events, fabulous or authentic.

CITADELLA PIETRA, a town Italy provinces of and 20 m S W Perugia. It stands on a height is surrounded with walls, and is as clean town with some good streets, and handsome but deserted palaces. Its chief interest is derived

from its being the birth place of the celebrated Pietro Furigno, one of whose finest frescoes, representing the Adoration of the Magi, adorns the Oratorio or oratory of Santa Maria de Bianchi. Others of his pieces adorn the cathedral and the churches of the Servites and of Antonio. There are six convents. Pop. 2400

CITTA' DI CARRETO (also *Tiferis* The name) a tn Italy prov and 23 m N W F. Perugia 1 hour. There is the seat of a bishopric and has a staid cathedral and churches, several convents and some silk mills. In 1798, the French captured the town from the Neapolitans who had recently taken possession of it. Pop. 7000.

CITTA NUOVA, a tn Austria duchy Styria on a spit of land on the Adriatic at the mouth of the Isdra 20 m S W Trieste. It is old much fallen off has a cathedral and three other churches is the seat of a bishop, and esteemed very unhealthily. Pop. 1184

CITTA VECCHIA or **CITTA VENEZIA** a tn Malta, near the centre and almost on the highest point of the island 2 m S W Valletta. The ruin of the latter town has almost raised it, and its magnificent houses and palaces are almost deserted. The cathedral dedicated to St. Paul a large and handsome edifice from which a view of the whole island is obtained is said to occupy the site of the house of a Julius who was Roman governor when the apostle suffered shipwreck. The cadastre, situated in the suburbs Rabat, are among the most interesting objects of the place. They are excavated in the tertiary limestone of the island and run a considerable way under ground. The rudely sculptured cross which is on the roof of many of the tombs and the inscription *In pace posita sunt*, leave no doubt that at they were the work of the early Christians. Many of them were probably used for refuge. Citia-Vecchia, while in possession of the Barons was called Medina and in that of the Aragonese, Notabil.

CITTA VECCHIA (see *Phoenia*) a tn Austria, N W coast, Lintz, Danube mouth of a deep bay of same name. It contains a parish church and has a spacious harbour and some trade. Shipbuilding and sailing are the chief employments. As the town occupies the site of the ancient Phoenia a great number both of Greek and Roman antiquities, are found with it. Pop. 4300

CITTADELLA a tn Austria Italy gov Venice in prov of and 16 m N E Vicenza, on the Brentella, as affluents of the Brenta. It is surrounded by walls flanked with towers and has manufactures of linen and paper. Pop. 6594

CITTADELLA a tn Austria Italy gov Venice, prov of and 2 m N W Mantua, separated from that city by the Minello. It is strongly fortified with walls, and overlooked by a fortress. Pop. 2900

CITY POINT a vil river and port U States, Virginia, 85 m S F Richmond r bank James, which is navigable to this place for large vessels.

CIUDAD-REAL a tn Mexican Confederation cap. of dep. Chiapa, in a fertile plain on the Rio de los Zelaes 240 m S E Vera Cruz. It has a cathedral three monasteries, a seminary an episcopal seminary and a R Catholic college. It was founded in 1598 on the site of an Indian town and raised to a bishop's see 10 years after. It has a college hospital some manufactures and trade in cacao cochineal cotton and wool and in its vicinity an intermittent spring and a sulphur cavern. It was originally called Villa-REAL then Villa Victoria, next San-Christoval de los-Llanos, after which it received its present name. It is likewise, sometimes called Ciudad de los-Casas Pop. 4300

CIUDAD-REAL a prov Spain occupying the S E extremity of New Castile bounded N by prov Toledo, E. Albacete S. Cordova and Jaen and W Caceres and Badajoz area. 11,768 sq m. The province, in general is bare looking immense plains stretching from the mountains of Toledo to the Sierra Morena the central parts are sandy and barren but N and S are lofty sierras and deep valleys in some places clothed with forests, in others rocky and precipitous, with no other vegetation than barren wild thyme, or thistles. The mountains of Ciudad-REAL abound in mines of iron silver copper lead antimony, cinnabar and coal also in quarries of marble Jasper quartzite granite, &c. From them likewise flow various streams, chiefly affluents of the Guadiana, which traverses and fertilizes the country. Medicinal and mineral springs, both hot and cold, are abundant. The cli-

lands is dry and in the heat of summer very oppressive; E. and S. winds frequently bring most destructive visitations of locusts. The plains and valleys are productive in the vicinity of the rivers, but are, for the most part, barren for want of moisture. In favourable seasons, however, good crops of wheat, rye, barley, maize, oats, beans, peas, hemp, flax, almonds, sugar, and berries, are obtained. Sheep, goats, pigs, burned cattle, horses, mules, and asses, are reared. Wool, linen, cotton, hemp, and silk fabrics, soap, saltpetre, hardware, earthenware, spar, copper utensils, &c., are manufactured; brandy distilled, and wine and oil of good quality and in considerable quantities, made. Iron, silver, copper and other metals manufactured goods, brandy, wine, and oil, horses, mules, and cattle, are exported. Sugar, coffee, rice, lace, and perfumery imported. Ciudad Real possesses, in comparison, more schools than the generality of the Spanish provinces, yet, strange to say the proportional attendance is under the average, and crime predominates in an equal ratio. Pop. 302,593.—(Madrid.)

CIUDAD REAL, a *tu. Spain*, New Castile, esp. above prov. on a low plain about 5 m. S. bank Guadana and 100 m. S. Madrid. When viewed at a distance, its walls, buildings, and planted and well cultivated environs, give it a very pleasing appearance but on entering it, its attractions vanish. The walls are found to be, in many parts, ruinous, and the whole town has a deserted look, the space which it occupies being evidently far larger than its actual population requires. It is, however, in general well built. The houses are of solid construction and many of them are handsome adorned with iron railings and balconies, and painted white. The streets are regular and wide, well paved and almost flat as a bowling green. This last circumstance has the disadvantage of not affording a proper descent for the water and, moreover, makes the town liable to inundations, from which it has often suffered severely. The only public squares deserving of notice is the Plaza Mayor or of the Constitucion. It is of considerable extent, and the handsome houses which form it are lined with arcades. The principal edifices are three parish churches, particularly that of Santa Maria, a magnificent structure, consisting only of a single nave, but so grand, spacious, and lofty that no other in Spain, except the cathedral of Corda, equals it, and surmounted by a very lofty tower of brown stone six monasteries, three nunneries, a large and richly endowed hospital, partly occupied as a penitentiary, many houses of refuge for female vagabonds, several other ordinary hospitals, a secondary college, and a superior school. Manufactures and trade are of little importance. The former consists chiefly of woollens of coarse quality but very durable, and plain linens and table-cloths. Some good watches also are made. The trade is almost confined to grain sent into the provinces of Murcia and Valencia, and wheat, wine and potatoes sent to Madrid. Besides a weekly market there is an important annual fair. Pop. 10,235.

CIUDAD RODRIGO, a *tu. Spain*, Leon, prov. of, and 52 m. S.W. Salamanca, on a gentle eminence above *r. bank*, Agueda, 15 m. from the frontier of Portugal. It ranks as a fortress of the second class, being surrounded by a wall and ditch, and defended by a strong castle and other works. It consists principally of two streets, which traverse the town centrally cutting each other at right angles, and are opened out by a number of minor streets or lanes. The houses are only of indifferent construction, and very little attention is paid to cleanliness. The principal edifices are the cathedral in the form of a cross, and a singular style of architecture the chapel of Castello, in a ruinous condition, but still an elegant structure and the church of the Augustine convent. There are several educational and charitable establishments, but none of them deserve particular notice. One of the most remarkable structures is the magnificent bridge over the Agueda, outside the Coloma gate. Ciudad-Rodrigo is a place of great antiquity and makes a considerable figure in the early history of Spain, but the interest which it then excited is small, compared with that which it now possesses, in consequence of the important events which took place within it, or in its neighbourhood, during the Peninsular war. In 1810 it was taken by the French, and in 1812, after a regular siege, retaken by the British. It afterwards continued for some time, to be the head quarters of the Duke of Wellington, and the centre of military operations. The famous

cardinal, Francisco de Pacheco, who distinguished himself as a diplomatist in the reign of Philip II., was a native of Ciudad-Rodrigo. Pop. 4823.

CIUDADELLA, a city and seaport, Spain, Isl. Minorca, lat. 39° 55' N. lon. 2° 55' E. on a plain at the W. side of the isl. It is surrounded by walls and a ditch, is entered by five gates, and possesses several spacious and paved squares, a cathedral, municipal buildings, a school, hospital, cemetery and several convents, with churches attached. The inhabitants are engaged in weaving woollen fabrics, exporting oil and wine, and in husbandry. They import hardware, all hemp, hales, wax, fruit, soap, paper, bricks, hardware, linen and cotton fabrics, &c. and export coal, barley, potatoes, lemons, stone, wool, vinegar, shoes, hemp, and timber. As a port, its commerce is inconsiderable. Pop. 7835.—(Madrid.)

CIVIEH a *vill. W. Africa*, *r. bank*, Senegal lat. 15° 40' N. lon. about 15° W. It has a low but beautifully verdant site amidst a natural forest. Its inhabitants are chiefly Moorish Marabouts, who teach the Koran, and impart Mohammedan civilisation to the people of the surrounding districts.

CIVIZZANO, a *tu. and com. Austria*, duchy Tyrol prov. of, and 5 m. E. by N. Trent, on the highroad thence to Venlo. It has a handsome church and several silk manufactory. Pop. 2507.

CIVIDALE (anc. *Forum Julii*) a *tu. and prov. Austria* Italy, gov. Verona, agreeably situated 8 m. E.N.E. Udine on the Naissone, here crossed by an ancient stone bridge. It is surrounded by walls and ditches, and hemmed in by the Julian Alps. Besides the town proper there are five suburbs, and within both as few as seven churches of which the most noteworthy is the cathedral Santa Maria, a structure with three gothic portals, a handsome altar screen, a curious lapidary font, and several fine paintings. Cividale has also a museum of antiquities, a record office, containing some very curious records, two hospitals, and an educational establishment for females. It also possesses several mills, and silk and cotton factories. Great numbers of interesting antiquities exist in the neighbourhood. Pop. 6000.

CIVITA several small *tes. Naples*—1 (*Ugento*) a *tu. and com.*, prov. Melfe 9 m. W. Larino with two churches, and two annual fairs. Pop. 3189.—2 (*Nuvole*) a *tu. and com.*, prov. Melfe, 10 m. E.N.E. Larino, on the *Trigno*. Pop. 2933.—3 (*Ducato*) a *tu. and com.*, prov. Avellino Ultra II, cap. dist. of same name, 5 m. E. Alai *r. bank*, Volturno. It contains a cathedral, seminary and four convents is the see of a bishop, and seat of a court of law. Pop. of *tu.* 1670 of *com.* 5331.—4 (*St. Angelo*) a *tu. prov. Avellino Ultra I* dist. of, and 5 m. N.E. Civita-di-Pesce. It stands on a hill about 4 m. W. the Adriatic. It contains a collegiate church, four convents, and an hospital; manufactures chiefly leather, trades in corn, wine, and oil and has five annual fairs. Pop. 5974.

CIVITA-CASTELLANA, a *tu. Papal States* 28 m. N. Rome, on a steep hill near the *Rio Maggiore*, here crossed by a handsome bridge, 150 ft. above the water, built by Clement XI. It has a citadel, a public square, ornamented by a fountain, a cathedral, three convents, a college, and a state prison. Here, on December 4, 1798 the French, commanded by General Madaon, defeated the Neapolitans commanded by Mack. Pop. 4000.

CIVITA DI-FRANCO (anc. *Penna-Fortina*) a *tu. Naples*, prov. Avellino Ultra I, built on two hills, 29 m. E. by N. Aquila. In conjunction with Atri it is the seat of a bishopric. Although in general ill built, it contains some fine edifices, among which are the cathedral and diocesan seminary. It has five churches, seven monasteries, two nunneries, an hospital, theatre, gymnasium, and a tannery. Civita-di-Franco was destroyed by Atila during the Roman civil war. The Northmen having expelled the Greeks and Saracens from it, founded the kingdom of the two Sicilies and Roger I. here took the title of King, and declared this place the royal city. It belonged to Charles de Bourbon, who, on his accession to the throne of Spain, ceded it to his son Ferdinand IV. Pop. 8560.

CIVITA LAVINA, or *LAVINIA*, a *tu. Papal States*, 17 m. S.W. Rome, occupying the site of the ancient *urbs*. It is built in massive rectangular blocks, evidently the remains of ancient buildings. Near it are the remains of a building supposed to have been part of the temple of Juno, and also of an amphitheatre. Pop. 900.

CIVITA VECCHIA a *deleg.* Papal States; bounded N N W and N E. by *deleg.* Viterbo S E. Cornara. Rome and S W the Mediterranean. length N W to S E about 30 m. breadth N E. to S W about 20 m. In the E. it is hilly being traversed by distant ramifications of the Apennines but the W is generally flat and contains numerous small lakes. Its principal rivers are the *Marte*, with its tributary the *Arone* and the *Mignone*. The hills in the N E contain alum, which is extensively worked. The climate is, in general, unhealthy. Pop. about 24 000

CIVITA VECCHIA [*anc. Civitas Vetus Centum-Collis*] a seaport in Papal States, cap. *deleg.* of same name, on the Mediterranean, 88 m. N W Rome, of which it is the port lat. 42° 42' N lon. 11° 44' E [*sc.*] The town is fortified and tolerably well built streets narrow but straight. It has several convents a church a theatre, a lazaretto, and a convict station. The air is considered unhealthy and the water is of bad quality. It is the seat of a bishop, a college, and a tribunal of commerce. It has some manufactures of cotton goods and in the environs extensive alum-works the produce of which is sold under the name of *Roman alum*. The port, which owes its origin to the Emperor Trajan, is one of the best in the Papal dominions. The basin is round and

CIVITA-VECCHIA.—From sketch by W. & L. L. L.

contained a *chef-d'oeuvre*. Two large moles form the harbour and a breakwater outside, constructed on a similar plan to the Plymouth breakwater protects the shipping from the heavy sea brought in by the W gales. A lighthouse is erected on its S. end, with a lantern 74 ft. above sea level. The harbour has depth of water for vessels of 400 or 500 tons, and ships of greater draft may anchor under the breakwater. Civita Vecchia is a free port, but the quarantine regulations are enforced with extreme strictness. Consuls from the principal European states reside at it. The principal foreign commerce of the state, chiefly with Greece, Marseilles, and England, is carried on here but the trade is not so extensive as formerly. The exports consist of wood, grain, wool cheese, potato pumice stone, and alum and the imports of colonial produce, salt, salt fish wine potteryware, glass and hardware. There is regular steam communication to Marseilles Genoa Leghorn, Naples, Greece, Egypt, and Turkey. Civita Vecchia also bears the name of *Portus Vetus*. It was captured by Totila, and retaken by Naxos in 608. Since that period it has been frequently taken and destroyed but has been, on each occasion rebuilt by the conquerors. It was made a free port by Clement XII.; its fortress was begun in 1512 by Julius II., from designs by Michael Angelo, and finished by Paul III. The walls of the town were built in 1590 by Urban VII. but the place is quite incapable of defence. Pop. 7000; exclusive of convicts, whose number may amount to 1000 or 1200.

CIVITELLA two places, Naples — 1 (*Comune*) a town prov. Abruzzo Ulter. dist. of and 8 m. S. of Civita di Poesse. Pop. 2771. — 2 (*old Civita*) a town and com. prov. Abruzzo Ulter. I., dist. of, and 9 m. N. Teramo, on an affluent of the Tronto. It is seated on a rock and is a place of considerable

strength, being defended by a castle. It contains a collegiate church three convents, and an hospital and has two annual fairs. Pop. 5703. — Several other small places in Italy have the same name

CIVO a town Italy Lombardy prov. and 14 m. E. Sondrio, near the Adda, with a chapel and several mills. Pop. 2800

CIVEAT a town France, dep. Vienne, 39 m. S. Poitiers on route, Charente. It was formerly fortified, and the ruins of its old castle are still seen. It has a court of first resort, agricultural society communal college, and a Romanesque church, with a curiously sculptured facade. It manufactures woollen goods, and has a trade in grain truffles, chestnuts, clover and lucerne seed, and cattle. Pop. 3109

CLACHNAHARRY (the watchman's stone) a vil Scotland so. of, and 14 m. W W R Inverness at the mouth of the Caledonian Canal, chiefly inhabited by fishermen and boat-builders. A desperate battle was fought here in 1833 between the Clach-Ghannan and the Marquess of Forth. P. 260

CLACKMANNAN the smallest co. of Scotland, being only about 10 m. in length 4 in breadth and containing little more than 62 sq. m., or about 80 730 ac. situated on the N. side of the Forth, by which it is bounded S. W. on nearly all the other sides, it is enclosed by the counties of Perth and Stirling. The N. part of the county is occupied by the Ochil Hills, but the other portions are comparatively level and exceedingly fertile, yielding large crops of wheat and beans. The minerals are valuable especially coal which abounds. There are also some extensive iron-works in the county and some large breweries and distilleries but few other manufactures. The principal towns are Alloa and Clackmannan the latter is the county town, but the former is the larger. It is divided into four parishes. Pop. 22 561

CLACKMANNAN a small town Scotland cap. above, on a beautiful estate on an eminence 1 m. S. of Forth from which it is distant about 2 m. The town itself however is mean and straggling consisting chiefly of one long broad, unpaved street. King Robert Bruce resided in the vicinity and many objects and localities bear reference to their names to that monarch such as the King's Stone, the King's Seat Hill &c. Pop. 1030

CLACKMANNAN par. 4000 Clackmannan Pop. 5602

CLACTON (SHEAR) par. Eng Essex 4280 ac. Pop. 1281

CLACTON (LITTLE) a vil and par. England co. Essex the former beautifully situated 11½ m. S E Colchester with a small green in the centre, on which a fair is held on July 25. The church is a small building with a wooden turret. Area of par. 2906 ac. Pop. 615

CLAGNAFURTH, a town Austria. See **KLAGENFURT**
CLAIN [*anc. Clannus or Cligna*] a small river France, which rises in arround Oroncelles, dep. Charente, and proceeding N through a hilly district enters dep. Vienne. It then turns first N W and afterwards almost due N passing Poitiers, when it gradually changes its direction to N N E and joins L. bank, Vienne, below Gerson. During its course, of about 80 m. it receives the Dive Yonne Azannes, Palle, &c. Operations have been undertaken to make it navigable as far as Poitiers

CLAIRER, par. Eng Worcester 4812 ac. Pop. 6819

CLAIR (ST) a lake and river N America, between the state of Michigan and Upper Canada, forming with the river Detroit, the communication between Lakes Huron and Erie. The LAKE is 86 m. S. Lake Huron and 24 N. Lake Erie length 80 m. mean breadth, 12 m. area, about 260 sq. m. It has a uniform depth of 20 ft. contains numerous islands, of which Walpole Island, inhabited by Indians, and St. Anne's Island, are the most important. On the E. it receives the Thames and Great Bear Creek. The strait, which forms the outlet of Lake Huron, is about 40 m. long, 4 m. broad, 50 ft. deep, and navigable for ships of any burden.

CLAIRAC, a town France dep. Lot-et-Garonne, 17 m. N W Agen, on bank, Lot. It is clean well built, and agreeably situated has four-mills, and a trade in white wine, tobacco, pumice, &c. grown in the district. It owes its origin to a Benedictine abbey founded about the eighth century. It

1537, the abbot, Gerard Ronnelle, embraced the Protestant faith. The town followed his example, and was the first in the B. of France that professed the doctrines of the Reformation. It was subsequently burnt and razed several times, by the Romanists and Huguenots. Pop. 1896.

CLAIRVAUX (anc. *Clare Vallis*) a hamlet, France, dep. Aube, 33 m. E.E. Troyes, 1 bank, Aube. Its celebrated abbey was founded in 1114 by St. Bernard. The monks were (intercourse with CORRAUT), and so rapid was the increase of the order that before St. Bernard's death, in 1153, there were 700 monks here, while St. Bernard had either founded or affiliated to this abbey no less than 76 monasteries, of which 25 were in France 11 in Syria, 10 in England and Ireland 6 in Flanders, 4 in Italy 2 in Germany 2 in Sweden, 1 in Hungary and 1 in Denmark. The history of Clairvaux bears favorable testimony to the Benedictine rule, which was distinguished from all others, by a spirit of labour and utility. The abbey presented the singular spectacle of an immense manufactory and agricultural institutions, carried on by monks. They cut and sawed timber 1 and water works for irrigation, and draining, and mills of all kinds they fused forged, made oil, tanned leather, wore fabrics, spun yarn, and engaged in all kinds of useful industry. The productions were far more than sufficient for the wants of the community and the furs of Chamois-see-Bas, and Har-see-Aube, received large supplies of the superfluities. When the monasteries were suppressed at the Revolution the walls of this abbey were about 13 m. in circumference, and besides the splendid monastic buildings, contained several churches, a spacious cellar in which was the famous tun containing 800 hogsheads of wine the material wine press, lathework quarries, lime-kilns, saw mills, tan and corn mills, a tannery infirmary prison ice-house &c. It is now transformed into an immense criminal cotton factory. Trades of all kinds are also carried on by the prisoners among whom are tailors shoemakers, ropemakers, carpenters, &c. Wool is also prepared and spun. Flax is spun and woven and all the requisites for the prisoners are made in the establishment.

CLANCY is in France dep. Nièvre, 38 m. N N.E. Nevers, 1 bank, Yonne, at the mouth of the Bourvois. It was formerly surrounded by enormous walls, and defended by a citadel which commanded the town and environs. One of its suburbs, situate on the opposite side of the Yonne was the seat of a bishopric in *partibus* known as the bishopric of Bethelun founded in 1180, for the bishop of that place who had been expelled by the Barons, and suppressed at the Revolution. Wood-stuffs for the supply of Paris with fire wood are made up here, and felled down the Yonne, and Seine. The parish church, founded in 1497 is remarkable for its tower and for some fine sculptures. Clancy has a tribunal of first resort and of commerce, an agricultural society and a communal college with manufactures of common cloth dyeworks, fulling-mills potteries, and numerous tanneries. Pop. 1667.

CLANABOROUGH II par 1st Devon 8° 4' ac Pop. 62 **CLANDON** two parts 23 g Surrey.—1 (land) 144 ac. Pop. 261.—2 (water) 1867 ac.

CLARE a town and par Ireland co. Kildare 4664 ac. The town pleasantly situate on the Liffey spanned here by a bridge of six arches, 17 m. W.S.W. Dublin was partly burned by the King's troops, during the disturbances of 1496. The woollen manufactures are carried on to a small extent. Four annual fairs chiefly for cattle, sheep, and pigs. Pop. 1842.

CLANFIELD—1 A vil. and par Eng co. Hants the former pleasantly situate 5 m. S.W. Petersfield Area of par 1895 ac. Pop. 265.—2 Par Oxford 1820 ac. Pop. 591.

CLANWILLIAM—1 A marshy dist. in the N.W. of the Cape colony bounded N. by the Koonen, in lat. 33° 45' S. and W. by Worcester district and the great Berg River lat. 32° 45' S. E. by Beaufort district, and the Great East River and W. by the Atlantic. The Karoo, Mordonw and Cedar bays or mountains traverse it N. to S., parallel to, and 2 to 40 m. from the coast and the Roggeveld mountains, in this narrow traverse it near meridian 20° E. and it is intersected S.E. to N.W. by the Olifant or Elephant's river and its tributaries, as far as lat. 31° 30' S. the Grouse, Bitter and Zersting rivers enter its more N. parts area, 24,100 ac. in. It has a healthy climate and a fertile soil. Pop. (1869) 9416.—2 A vil. cap. of the above district, agreeably situate at the

junction of the Jan Driest and Olifant Rivers, 140 m. N.N.E. Cape Town. It has a handsome church, with an English style school and contains a considerable coloured population. There are two hat manufactories in the village, and a dye-works near spring in the neighbourhood.

CLAPHAM, a vil. and par England, co. Surrey The village 3 m. S.S.W. London is one of the most beautiful in the suburbs of the metropolis. It is built round a square of 190 ac. which has been elegantly planted and laid out in carriage drives. This common, which has more the appearance of a park, is surrounded by villas and mansions and indeed the whole road from London is lined on both sides with elegant houses and gardens or lawns. There are several elegant churches, and chapels for Wesleyans, Baptists, and Independents Area of par 1238 ac. Pop. 16,200.

CLAPHAM a vil. and par England co. York, W. Rid. ing 24,840 ac. The village, 3 m. N.W. by W. Feltie, has an ancient church, and two annual fairs for cattle. The parish, considered the most magnificent cavern in the kingdom, extending for about 1000 yards in the limestone rock and consisting of numerous spacious chambers, beautifully adorned with stalactites and other splendid concretions Pop. 1044.

CLAPHAM, two parts. Eng.—1 Bedford 1882 ac. Pop. 445.—2 Sussex; 1794 ac. Pop. 252.

CLAPENTON ISLAND an isl. in the Arctic Ocean Darnley Bay lat. 69° 42' N. lon. 128° 16' W. The island like the neighbouring coast, is of limestone formation. It was discovered by Sir John Franklin, who named it in honour of the distinguished African traveller.

CLAPS ISLAND a small isl. Indian Archipelago on the equator lon. 98 E. (n.)

CLAPTON three parts Eng.—1 N. withampton 1946 ac. Pop. 136.—2, Somerset 1066 ac. Pop. 162.—3 (on the ZZZ) Gloucester 783 ac. Pop. 112.

CLAYTON a hamlet, England co. Middlesex par Hackney 3 m. N. by E., London. It is divided into Upper and Lower Claytons. Both divisions contain many elegant and spacious mansions, with tastefully laid out gardens and grounds. Here are a church and chapel, and places of worship for Wesleyans and Independents. At Lower Clayton is the London orphan asylum, a handsome building for the benevolent purpose of maintaining and educating destitute orphans.

CLARA a tn. Ireland, King's co. on a plain surrounded by beautiful hills and richly planted grounds 17 m. S.W. Mullingar. It consists of one principal street with three smaller ones branching off from it, and several by lanes houses uniformly built, and the greater part of them thatched with straw although some of the better sort are slated. But as the streets are kept remarkably clean, the dwellings however humble, have a respectable appearance. There is a handsome church a R. Catholic chapel and a commodious school-house. In the neighbourhood are extensive corn-mills and a tan yard. Pop. 996.—(Local Correspondent.)

CLARA par Irel. Kilkenny 3501 ac. Pop. 511.

CLARA RANT—1 A small isl. Canaries off the N. point of Lanzarote lat. (centre peak) 28° 15' N. lon. 18° 53' W. It is uninhabited and destitute of fresh water. 2 An isl. Mergal Archipelago Bay of Bengal lat. 11° 30' N. lon. 97° 30' E. It is about 3 or 2 m. long and 1 m. broad is high and has several small peaks, the S. one very sharp like a sugar loaf.—3 A tn. called also *Villa Clara* isl. Cuba in the central department, 45 m. N.W. Trinidad in a sugar district. Pop. 6182 of whom 8556 are whites, 1891 free people of colour and 886 slaves.—4 An isl. coast of Peru, gulf of Gueyguil lat. 3° 15' S. lon. 80° 15' W. It is about 6 m. long and uninhabited.

CLARAN BRIDGE, a vil. Ireland co. of and S. S.F. Galway. In the vicinity are the ruins of an ancient castle **CLARBESTON** par Water Fumbroka 1598 ac. Pop. 178.

CLARE, a maritime co. Ireland par Monaster (nsp. Emile) having N. Galway co. and bay S. the Skaroon E. part of Galway Lough Derg and part of Tipperary co. and W. the Atlantic. Extreme length S.W. to N.E. 63 m.; extreme breadth N. to S. about 40 m. area 786,745 ac. of which 455,009 are arable, and 299,088 uncultivated. The surface is irregular rising in many places into moderate conical elevations particularly in the E. W. and N.W. districts. But there are extensive tracts of level and fertile

land which yield abundant crops of potatoes, oats, wheat, barley, &c. There are also extensive grazing lands, called Corranes, which produce from six to eight tons of hay per Irish acre. Lakes are numerous, but generally of small size. The country is deficient in wood, but the process of planting is gaining ground, although the extremely violent gales from the Atlantic, to which it is exposed, are unfavourable to the growth of timber. The condition of the soil is fertile, but the climate is extremely bad, being, in no respect, better than in other parts of Ireland. Manufactures are hardly known. Linen is made by the inhabitants in their own dwellings, but almost entirely for home consumption. A small quantity of coarse flannel for towels and canvas for sacks and bags, are also made, and sold at fairs and markets. There are some fisheries, but they are pursued with no great spirit, although the rivers and coasts of the county present many facilities and inducements for the cultivation of this branch of industry. It is not, however, altogether neglected. The fishery district of Milltownshilly which comprises 198 m. of coast had, in 1845, 678 registered fishing vessels, employing 2393 men and boys. In September 1845, there were 67 national schools in operation. Clare returns three members to the House of Commons—two for the co. and one for the bor. of Ennis.

CLARE, a vil. Ireland, co. of, and 8½ m. E.S.E. Armagh, on the Cusher which propels extensive flour meal, and flax mills, and over which is an ancient stone bridge. There are places of worship for Presbyterians and Catholics, including several male and female schools. An annual fair is held for horses and cattle. In the vicinity are the ruins of Clare castle. Pop. 1563.

CLARE a market in and par. England co. Bedford 2228 m. The town is situate, r. Jack Stour 12½ m. S. by W. Burg St. Edmunds streets spacious, but houses, in general, old, though considerable improvements have of late years been effected. The old market cross was taken down in 1836, and a spacious corn exchange erected in its stead. It has a large square church and places of worship for Independents and Baptists. But the most interesting buildings are the remains of the ancient castle, and the priory of Austin friars the latter of which though long ago converted into a residence, still bears traces of its original destination. The manufacture of straw-plait is carried on here to a considerable extent. Pop. 1769.

CLARE-CASTLE, a tn. Ireland, co. Clare on the Fergus, about 2 m. E. Ennis. It was formerly called Clare, but a few years ago, was made a post town under the name of Clare-Castle. It consists chiefly of one long straggling, miserable looking street, with another of the same character at right angles to it, the houses being very badly built, and generally in a ruinous condition. It is remarkably well supplied with water but destitute of almost every other advantage. There is a Protestant church, with a R. Catholic chapel, type schools, and a dispensary. The military barracks of Clare-Castle, from which the town took the addition to its name are in the immediate neighbourhood, on an island in the Fergus, connected with the mainland by two bridges. The Fergus is navigable to the town for vessels of 800 tons, but the harbour is very bad, and the traffic inconsiderable. No manufactures of any kind are carried on, and the people, who are either fishermen or agricultural labourers, are in a most wretched condition. Pop. 693. —(Local Correspondent.)

CLARE MOUNT, a tn. Ireland, co. Mayo, in a plain, 15 m. S. R. Castlebar. In three principal streets are straight, wide and well kept, but many of the houses here, within the last few years, have been falling into decay. It is well supplied with water, having a small lake, besides numerous springs, in the neighbourhood and although it presents evident traces of dilapidation, it has a clean and even attractive appearance. It has a court-house, police constabulary barracks, workhouse, a handsome Protestant church, and a R. Catholic chapel. There are national, male and female, Church Education Society and infant schools, with posthouse and dispensary.

Vol. I.

Hat-making is carried on extensively, and in the Church Education school a great number of girls are employed in limiting crochets and other fine work—a branch of industry to which many families in the place owe their support. A considerable portion of the inhabitants are employed in agricultural labour. Pop. 1563. —(Local Correspondent.)

CLAREMONT ISLES, a group of low woody isles, off the N.E. coast, Australia, Cape York peninsula, about lat. 13 38' S.; lon. 141 46' E.

CLARENCE.—1 A cape, forming the N. extremity of Jones Sound, Beilin's Bay lat. 73 45' N. lon. 77 45' W. (u.) The peaks of the surrounding mountains, which are lost in the clouds, are covered with perpetual snow while their sides are black and inaccessible.—2 An isl. S. Pacific lat. 9° 5' S. lon. 171 88' W. (u.)—3 An isl. Antarctic Ocean forming part of the S. Shetland group. It is of an oval form, and presents several prominent points, the most N. of which bears the name of Lynd's Cape; the S. point is called Cape Bonin.—4, A harbour Russian America, on the E. side of Behring's Strait, 45 m. E.E. Cape Prince of Wales.—5 A strait, Persian Gulf, between the Isl. Kishan and the mainland varying from 5 to 15 m. in breadth and containing numerous islands.—6, A bay, tn. and settlement N. side of Isl. Fernando P. W. Africa, right of Buda. The bay which is situated in lat. 8 48' N. lon. 8 47' 30' E. affords excellent anchorage and abounds with fish of various kinds.—THE STRAITS were formed with a view to the suppression of the slave trade, and a British military force stationed there, which was withdrawn in 1854.—THE TOWN among other public buildings, contains a large hospital, indispensably rendered necessary by the unwholesomeness of the climate. A number of liberal negroes, who live in the neighbourhood of the Government-house appear to be in comfortable circumstances, having neat cottages, with a garden attached to each.—7 A peak, in the preceding isl. 10700 ft. above the level of the sea.—8 An isl. S. America, W. coast of Tierra del Fuego. It is intersected by the parallel of 54° S., and the meridian of 72° W. It is 52 m. long and 23 broad, and is much indented with bays.

CLARENCE LAKE, or GREAT LAKE a lake 1 m. Diamon's Land, Norfolk Plains of irregular form, about 6 m. in length, and about 4 in breadth at the broadest parts.

CLARENCE RIVER, a maritime dist. New S. Wales, between lat. 28 20' and 29° 50' S. It is intersected, N. W. to S.E.E. by the rivers Clarence and Richmond. The stock of the district comprises 1840 horses, 24,943 head of horned cattle, 640 pigs, and 179,561 sheep. It contains several lofty mountains the principal of which are, Mount Wadding, 3300 ft. high; Mount Lindsay or Lansdown 5700 ft. Oldmo on the Richmond river is the chief place. Pop. 1295.

—THE RIVER of this name rises in the mountainous region around Mount Lindsay. After pursuing a S.W. and then a N.E. course through the district of Clarence, it falls into the Pacific Ocean near Rhoad Bay. Its whole length is about 110 m. it is navigable for upwards of 80 m. from its mouth. [Add. See SURV.]

CLARENCE STRAIT.—1 The channel between Melville Isl. and the N.W. coast of Australia, communicating with Van Diemen's Gulf. It is about 12 m. in breadth at the narrowest part, and is studded with small isles, rocks, and reefs having rapid currents between them.—2 The passage between the isl. of Kishan, in the Persian Gulf and the mainland of Laristan. It is about 7 m. wide at the E. entrance, but is sometimes contracted by sandbanks. The tide, in some parts, runs with great rapidity. This channel is also sometimes called Kishan Strait.

CLARENSE, a vil. Switzerland, can. Vaud 18 m. E. by S. Lausanne, on the lake of Geneva. It lies at the head of a bay here forming a creek, and in which the water occasionally rises to an extent that floods the place. Clarence is an insignificant place, which has had an undue celebrity given to it by Rousseau and Byron.

CLARION or CLOWD'S ISLAND an isl., N. Pacific Ocean, off W. coast, Mexico lat. 18° N.; lon. 124° 50' W. Turtle are here plentiful, and birds numerous, including gannet.

59

Algae, pollens, several varieties of hooties, of fern, ducks, and doves. Vegetation is pretty luxuriant, but does not seem to support any edible production. Water scarce.

CLARK, or FORT CLARK, a river U. States, Oregon territory, rising in the Rocky Mountains, and after a winding N W course of about 500 m during which it expands into an extensive lake, falling into the Columbia, m lat. 48° 50' N lon. 11° 50' W. Before reaching Lake Kallapooia, through which it passes, its name is Colahidishokot or Bitterroot Fork.

CLARK'S FORK a river U. States, N W territory rising in an office of the Rocky Mountains, and, after a course of about 180 m. S. W. to N. E. falling into the Yellowstone, in lat. 48° 55' N; lon. 108° 30' W.

CLARK'S ISLAND.—1 The most S. of the Farnsworth group, Bank a Strait, off the N. E. and of Van Diemen's Land S. extremity in lat. 40° 34' S. It forms the N. boundary of the strait.—2, An isl. N. Pacific; lat. 27° 46' N lon. 176° W.

CLARK'S (San Giacomo) ISLE, an isl. Arctic Ocean 10 m off the coast of British N. America lat. 69° 30' N; lon. 118° 40' W.

CLARY a vil. France, dep. Nord, 9 m S. E. Cambrai. It was once a place of some importance, defended by a strong castle, and has manufactures of glass, lace, and other articles of St. Quentin, tulle, lace, has thread, and pottery. There are also breweries and tanneries. Pop. 1250.

CLASHACROW par. Irek. Kilkenny 909 ac. Pop. 708. CLASHMORE, a post tn. and par. Ireland co. Waterford, 7702 ac. The town is 9 m. S. W. Dungarvan and has a distillery producing nearly 20,000 gallons of whisky annually. Pop. 2384.

CLAYFORD two pars. Eng.—1 (Goodwood) Hants 3390 ac. Pop. 442.—2 (Liphur) Hants 2150 ac. Pop. 596.

CLAYTON par. Scot. Aberdeen, 4 m by 3 m. Pop. 543.

CLAYWORTHY par. Eng. Somerset 2843 ac. P. 233.

CLAUDE (St.) a tn. France, dep. Jura, 23 m S. E. Leval-le-Hautmar at the confluence of the Bièvre and Tacon. It is clean, well built, and has a cathedral a suspension bridge across the Tacon, and a fine promenade along the Bièvre. It owes its origin to a celebrated Benedictine abbey founded in the 6th century and erected into a bishopric in 1743. The privileges of this abbey were so extensive, that if a peasant remained for a year on the abbey lands he became a baron, and his goods were confiscated. This was the last place in France where such an excess existed and the bishop and chapter obstinately refused to abolish it before the revolution of 1793, although solicited to do so by Louis XVI. In 1799 the town was almost entirely destroyed by fire, and the Government devoted the sum of £30,000 to its re-erection. It has a court of first resort, and of commerce, consulting chamber of manufacturers, an agricultural society and communal college and is the seat of a bishopric. Large quantities of tannery-wares are made here, consisting of articles in horn, shell, bone, ivory, box and wood. Buttons, ruff-bones, musical boxes, hardware, pianos, &c. are also made, and there are cotton spinning-mills, tanneries, paper-works, tile-works, and potteries. A considerable trade is done in the above articles. Pop. 4460.

CLAUDY.—1 A vil. Ireland co. of and 9 m S. E. L. Londonderry. It has a R. Catholic chapel, a Presbyterian meeting-house, and a national school and in the vicinity are some handsome seats, and extensive woods and plantations.—2, (or Clady) a vil. Irek. co. Tyrone, 4 m S. S. W. Banbarn on the Finn, and consisting of one irregularly-built street. Adjacent to the village is a handsome bridge of seven arches over the Finn, connecting Claudy with the county of Donegal. Two fairs are held annually for the sale of cattle, sheep, and pigs.

CLAUSENBURG, in Transylvania. See KLAUSBURG.

CLAUFFHAL, a tn. Hanover. See KLAUFFHAL.

CLAVEING, a vil. and par. England, co. Essex, and on the confines of Hertford 8799 ac. The village, situated in a valley watered by a small stream, has a handsome Gothic church (two chapels belonging to Independents and Primitive Methodists) with a burial-ground attached to each, and two schools—a national one for girls, and a British one for boys. No manufactures, excepting flour; people chiefly employed in agriculture; their social condition seems to be far below that of several towns in the neighbourhood. Pop. 1220.—(Local Correspondent.)

CLAYBERRY a vil. and par. England, co. Salop; 8143 ac. The village stands on elevated ground, about 5 m. S. E. Bridgnorth, and is nearly built of brick and red sandstone. It has a handsome Gothic church, two schools for girls, supported by voluntary contributions, and one endowed boys' school; inhabitants wholly employed in agriculture. Pop. 1613.—(Local Correspondent.)

CLAYVERTON a vil. and par. England, co. Somerset; 1238 ac. The village, romantically situated 3½ m. S. E. Bath in a beautiful and picturesque district, has an elegant church with a square ivy-matted tower. Pop. 155.

RENAULT a to. France, dep. Hérault, 23 m. W by N

Montpellier on the Rhod. pleasantly situated on the slope of

a hill, on the summit of which are the remains of an old castle.

It has a tribunal of commerce, a savings-bank, a communal

college, and a handsome Gothic church, remarkable for the

height of its spire. The cloth manufactures here produce

about 24,000 pieces annually. Handkerchiefs, cotton and

cotton mills, tanneries, breezy distilleries, vinegar works, tile and brick-works, blacking, &c. Trade in wine, brandy olive-oil, vegetables, cattle, and fruit. Pop. 5700.

CLERMONT CLERMONT or **BRAYTON**, or **CLERMONT**

ONE, a to. France, dep. Oise, 17 m. E. by S. Beauvais, r

bank, Reims. It was formerly fortified but its ramparts

have disappeared. It has manufactures of cotton and silk-

ture, and has spinning-mills, blacking-works, hosiery,

and tanneries; with a trade in grain, fruit, flax, linen made

in the environs, horses, cattle, &c. It has a communal col-

lege and public library with 12,000 volumes. It is now

a prison, formerly the property of the Princes de Condé, is now

a prison for females. Pop. 8105.

CLERMONT FERRAND (anc. *Novesium, Urbs Avern*

Clarus Mase) a city France, dep. Puy-de-Dôme, 215 m.

S. by E. Paris lat. 46° 48' 46" N lon. 3° 5' 50" E between

the Arrier and the Rhodan. It is built on a hill composed

chiefly of volcanic tuff, at the foot of that extraordinary range

of extinct volcanoes surrounded by the mountain of the Puy-

de-Dôme, which though apparently overhanging the town, is

5 m. distant. To the E. is the fertile plain of the Lemaun,

over which the view extends 20 or 30 m. A line of boule-

vards planted with trees, encircles the town except to the

N W, and outside of these are the extensive suburbs. The

streets in many parts are narrow confined, and crooked; and

CLERMONT-FERRAND. From Vespereaux's *France Pittoresque*.

the houses have a dull appearance, being all built of lava.

Arthur Young described it as one of the worst built, dirtiest

and most stinking places he had ever met with and adds,

that many of its streets, for highness, dirt, and ill smells,

could only be represented by narrow channels cut in a dung-

hill. Some parts of the town, however have undergone

improvement, and the new streets are wide, and well paved

Some quarters have been almost entirely rebuilt, and foun-

tains, several of them elegant, have been multiplied; abund-

antly supplied with good water brought from Roze, about

3 m. distant. It has two squares, in one of which, the Place

du Tauxem, is a fine fountain, built in the form of an obelisk,

89 ft. high; erected as a monument to the memory of General

Dessaix. The principal building is the cathedral, an irregular

pile of dark hewn, built of volcanic lava. During the revolution

of 1793, it was stripped of its ornaments and monuments, and

only saved from total destruction by the exertions of a magis-

trate, M. Victor Lescure who represented to the mob that it

would be useful for holding popular meetings in. It was

began, in 1743, and carried on till 1866, by the architect

Jean Deschamps, but never completed. The interior is re-

markable for its lightness, and loftiness of the vaulted roof.

Of the four towers that originally existed, only one remains.

The most ancient and interesting church is Notre Dame du

Port, a Romanesque edifice, originally founded, A.D. 560,

burnt by the Normans, A.D. 854; and rebuilt, A.D. 931. It

is decorated externally with red Mosaic, of black and white

CLICHY LA-GARENNE (*Laticlona*) a town in France, dep. Seine in a beautiful plain, 7 bank Seine, and on the railway between Paris and St. Germain, about 4 m. N W Paris. It is a place of considerable antiquity and in the seventh century during the reign of Dagobert, who had a palace here to which he was particularly attached, was frequently the residence of the court. It contains a parish church the erection of which is due to the celebrated Vincent de Paul who was curate of Cligny in 1612 and has many features of white marble of very superior quality and extensively exported chemical products glass, varnishes, and so on. Cligny suffered much in 1814 from an attempt to defend it against the approach of the Allies upon Paris. Pop. 428.

CLIDDESDEN par Eng. Hants 2150 ac. Pop. 814.
CLIDFEN a seaport in Ireland, on the coast, and 48 m. N W Galway beautifully situated on an estuary which communicates with Ardara Bay. In 1815 it contained only one house and now it is a considerable and thriving seaport, and contains an elegant church, a R. Catholic chapel, two schools, a bride-well, a dispensary, and fever hospital. Weekly markets are held Wednesday and Saturday, and four fairs annually. It is the seat of quarter sessions, and petty sessions are held every alternate Thursday. It is also a constabulary police and coast-guard station. The harbour is excellent and there is a quay with ships of 200 tons can approach. Fish in which the neighbouring coast abounds and corn with a little kelp, are the principal exports and the imports consist of groceries, manufactured goods, &c. Pop. 1602.

CLOUGH or **CLOUGH**, a vil. Ireland, co. of and 17 m. N Antrim, near the Ravel water and at the junction of several roads. It contains the manorial court-house of Old Stone.

pumps in the various streets afford an ample supply of water. The whole town has thus a cheerful and prosperous appearance. At the E. end of the town is a handsome new room, called the county club-house. In the same quarter are extensive barracks for artillery cavalry and infantry with a small military hospital behind. The new court-house is a light and elegant structure, and the county jail a large stone building. The parish church, situated at the W. end of the town, is a handsome old building, with some beautifully painted glass windows and a pinnacled tower. There are also two R. Catholic chapels, a Franciscan and Presentation chapel, with meeting-houses for various dissenting congregations, a large and well-endowed grammar-school founded in 1886, with various other schools for the humbler classes, some of which are maintained by voluntary contribution. Besides these institutions there are a large district lunatic asylum, a large work-house, infirmary fever hospital dispensary and various charitable institutions, including two orphan schools, and a mendicant association. The Mayor's court is held every Wednesday and petty sessions every alternate Friday. The trade of Clonmel is considerable, chiefly in corn, wheat, bacon, and butter, large quantities of which are exported to Liverpool, London and Bristol. There are several extensive corn-mills in the neighbourhood, an extensive distillery and in the town are two large porter and ale breweries. The butter market is a commodious building with all conveniences for facilitating the traffic in that commodity. Market days Tuesdays and Saturdays. Fairs in May and November and on the first Wednesday of every month chiefly for cattle. Clonmel sends one member to the House of Commons. Registered electors (1850) 271 1 op. 104.

CLONMELLOON a market and port in Ireland co. Westmeath 18 m. N. E. Mullingar. It has a parish church, school and a dispensary. Petty sessions are held once a fortnight. Four fairs annually. Pop. 625.

CLOUD (St. Vermeille) m. France, dep. Seine-et-Oise, 5 m. N. E. Vermeille 5 m. S. W. Paris, 1 bank Seine and on one of the railway lines from Paris to Vermeille. It is agreeably situated on a hill slope overlooking the river. Its four September 7 is one of the most celebrated in the neighbourhood of Paris. It lasts three weeks, and is attended by multitudes from the capital. The town owes its origin and

name to Clodove a grandson of Clovis, who founded a monastery here in 561. In 1569 Henry III. was assassinated here by Jacques Clément. St. Cloud is, however, chiefly celebrated for its chateau built by the Duke of Orleans, brother to Louis XIV. and formerly the residence of the Duke of Orleans. It consists of a centre and two wings. It is richly furnished, and has numerous statues, vases, pictures, and articles of vertu. The park extends from the bank of the Seine about 10 m. in length, and has some fine cascades, waterfalls and water works. The chateau has been the scene of many important historical events. In 1830 General Bona parte laid the foundation of his power on the memorable 18th Brumaire (November 11 1799) by expelling with his armed grenadiers, the council of Five Hundred from the orangery in which they held their sittings and here Charles X. signed the ordinances of July 1830 which led to the second revolution. In 1814 St. Cloud was attacked by the vanguard of the Allies under Langens, March 31 and was the head quarters of the army from April 7 to June 8. It was the head quarters also of Blücher in the following year and here was concluded the military convention (July 6) by which Paris fell a second time into the hands of the Allies. Pop. 3051.

CLOUDY BAY a bay New Zealand Cook's Strait, N. E. coast middle island, lat. (S. point) 41 32 S. lon. 174 17 E. [S.] The anchorage in this bay is good, but the wind sweeps down the gullies in strong squalls the water here ever remaining as all times smooth. The prevailing winds in summer and the beginning of autumn, from November to March, are S. E. and N. W. There was, recently five whaling establishments in this bay each employing from 20 to 80 hands, chiefly New Zealanders. Many thousands barrels of oil are prepared here annually.

CLOUGH —1 A post in Ireland co. Down, 6½ m. S. W. Downpatrick, containing a Presbyterian meeting house and an old castle said to have been erected by the Danes. First annual fair. Pop. 371.—2 (or Clough) a vil Ireland co. of 12½ m. N. N. E. Killybegs. It has a R. Catholic chapel and a brewery on the Dinnane rivulet and abutments chiefly employed in the neighbouring colleries. Pop. 486.

CLOYALLY a maritime vil and par England co. Devon 3602 ac. The village is situated on the S. coast of Berrymore Bay in the Bristol Channel on the declivities of a remarkably picturesque rock, which rises several hundred feet above the harbour 6 m. W. by S. Bideford. It has a church with several elegant monuments, and a Wesleyan chapel. The harbour is secure. The herring fishery is carried on 1 op. 93.

CLOWN par Eng. Derby 1860 ac. 1 op. 660.

CLOYDAGH par Eng. Carlisle and Queens co. 4943 ac. Pop. 1044.

CLOYAF a market in and par Ireland co. Cork 9989 ac. The town 18 m. N. by S. Cork consists of two principal well built streets. It has an ancient parish church a R. Catholic chapel a free school founded by Bishop Crew in 1726 with two national schools for boys and girls, a benevolent loan fund and various other charities. There is a little trade, and the only manufacture is that of huggins and hats. Market day Thursday six fairs annually for horses, cattle, sheep, and pigs. A mayor court is held once in three weeks, and petty sessions every alternate Wednesday. Area of par 9970 ac. Pop. of tn 1713 of par 6145.

CLON a tn and par England co. Salop 19789 ac. The town stands on an acclivity on the Clun ½ m. S. W. Bishop's Castle and consists of two streets very much neglected, houses generally of stone plentiful supply of water. It has a parish church a Wesleyan and a Primitive Methodist chapel and almshouses for 14 aged decayed tradesmen. A small trade in malt is carried on. Pop. 2121.

CLONBURY a vil and par England co. Salop 5404 ac. The village which is pleasantly situated at the foot of a hill 6 m. S. S. E. Bishop's Castle, has a neat ancient church, chapels for Wesleyans and Unitarian & Methodists, and a national school. Pop. 367.

CLONBURNFORD par Eng. Salop 3620 ac. Pop. 801.

CLUNE (Loch) a lake, Scotland co. of and 18 m. N. Perth about 2½ m. in circumference and of considerable depth. In it is a small island on which is an old castle formerly the residence of the Earls of Argyll.

CLUNY two pars Scot.—1 Aberdeen, 10 m. by 2 m. Pop. 725.—2 Perth 5000 ac. Pop. 1149.

CLUNY is in France dep. Seine-et-Oise, and 11 m N.W. Macon 1 bank Gironne. It was formerly surrounded by fortifications, parts of which still remain, and was long celebrated for its Benedictine abbey founded in 910 by William, first Duke of Aquitaine. It had 600 religious houses under its direction. Only a small portion of it now remains, having been all but utterly destroyed in 1793. Manufactures of drapery, steel wire, glass, paper, tiles, earthenware, leather &c. are carried on. Trade in—wood grain, furs, and cattle. Pop. 8407.

CLUSÈS, a town, com. France dep. Haute Savoie dist. Fancœur 2 m S.W. Geneva, r bank Arve, which in the neighbourhood is crossed by a handsome stone bridge. It is a miserable looking place and has repeatedly been almost destroyed both by fire and plague but the people are industrious and ingenious. Their chief occupation is the making of clocks and watches, in which they particularly excel. Owing to their early business habits and general ability several of the richest bankers of Augsburg, Hamburg and Lyon, are natives of Cluses. Pop. 2900.

CLISSON, a town, Italy Lombardy in the valley of the Serio, near 1 bank, river of that name prov. and 17 m N.E. Bergamo. It is the capital of the district, has three churches, two hospitals and a gymnasium. It has some manufactures of linen, and a considerable trade in corn, for which there is a weekly market. 1 the vicinity are some copper foundries and sulphur and manufactures. Pop. 5500.

CLUTTON a vill and par. Eng. co. Somerset 1636 ac. The village stands high and consists of several scattered groups of houses, principally of stone and has a parish church and chapels for Independents and Methodists national schools for boys, a day school for Methodists, a Sunday school for Independents, and a girls school connected with the Established church. There are three coal mines, and the people generally are employed as miners. Pop. 1490.

CLYDE a river, Wales, co. Denbigh ramp on the N.E. of the Ribblesdale, extensive Abercrombie after a course chiefly N.W. of about 30 m. during which it is joined by several small tributaries. It is navigable at highwater for vessels of 60 tons berthing to the town of Rhuddlan, 2 m from its mouth. The valley of Clyde which is about 20 m. in length, and from 5 m to 8 m in breadth is extremely fertile, and in a high state of cultivation.

CLYDE, a well known river Scotland the third in size, but the first in commercial importance in that kingdom. It rises amidst some wastes, 1400 ft above sea level at the extremity of county of Lanark, being formed by a confluence of many streams having their sources in that district, and known by various names the most distant source appears to be the head of the Dear water 7 m E. by N. Thornhill. It flows N.W. and about 12 m. from the junction of the streams, it becomes a considerable stream, and is now called the Clyde. Holding on its way in a N. direction it gradually increases in size by the contributions of numerous tributaries, till it approaches Lanark, about 2 m above which it forms the beautiful fall of Benlath, about 80 ft perpendicular height, the upper verge of this fall is 400 ft above sea level. It now hurries through a rocky channel about half a mile long whose walls rise, on either side, to the height of from 70 to 100 ft. till it reaches the fall of Cora Linn, a still more magnificent cascade or series of cascades, for there are three distinct breaks, than the former being altogether 80 ft in height the upper verge of this fall is 265 ft above sea level. About a quarter of a mile below a third but smaller fall occurs, called Dundal Linn, and 3 m further down are the picturesque falls of Stonebyres, consisting, as in the case of Cora Linn, of three distinct breaks, and being, together about the same height, namely 80 ft, where the upper verge is 250 ft. above sea level. The river though with many turnings and windings, now takes a N.W. course through some fine sylvan scenery, passes Hamilton, and finally reaches Glasgow where its importance as a commercial stream commences thence to the ocean being capable of floating vessels of the largest size. The course of the river to Glasgow is wholly confined to the county of Lanark below that city it enters the county of Renfrew and subsequently separates the latter from the county of Dumfriesshire. The entire course of the river to Dumfriesshire, where the river may be said to end and the first to con-

fluence, is 96 m. Below Dumfriesshire and the confluence of the Leven, it suddenly expands into a firm and solemnly called Dumfriesshire Firth and at Greenock it attains a width of about 4 m. Beyond Greenock, the river bends suddenly S. and soon after expands into an open sea, including the islands of Hute, Combrass and Arran, and terminating at Ailsa Craig, where it is 20 m broad. The principal affluents of the Clyde above the falls of Cora Linn, are the Dugald, Buggie, Douglas, and Madwalen between these falls and Glasgow the Nith, Avon, and N. and S. Calder; and below Glasgow the Kelvin, Carr, and Leven. The whole basin of the river comprises an area of 1580 sq m. Few rivers, perhaps none, can boast of scenery of greater variety of character or of greater beauty than the Clyde. Above Glasgow its course is now through verdant lawns, now through rocky fells, and now through steep and gorgeously wooded banks. Below the city where it widens into an estuary lofty hills rise on every side, and bound the far distant lochs or arms of the sea, resembling Norwegian fjords, branch off at various points on the N and W sides, carrying the eye into the recesses of the mountainous districts, while the shores are studded with beautiful watering places, the summer resort of the Glasgow citizens all presenting a panorama of unequalled beauty grandeur and magnificence. Its history in reference to its commercial character and importance is interesting but for this the reader is referred to the article GLASGOW to which it more properly belongs. Suffice it to mention here, that on the Clyde in 1819 was launched the Comet, the first steam vessel built in the United Kingdom and the pre-eminence thus obtained over the other parts of the country it still retains Clyde built steamers being esteemed the finest in the empire.

CLYDE, a river British N. America falling into Beaufort Bay lat. 70° 10' N. lon. 69° W.

CLYDE a river Wales Fembreke 5120 ac. 1 top 1200 CLYDE par. Scot. Sutherland 24 m by 8 m 1 top 1933

CLYTHNE a headland Scotland co. Caithness, par. of Latheran lat. 58° 20' N. lon. 8° 18' W.

COA a small isl. Asiatic Archipelago, on the S coast of Flores lat. J. S. lon. 122° E.

COA (see Cude) a river Portugal ramp in prov. Beira near Fátima and after a course S. to N. of about 76 m entering the Douro on the bank 5 m S.W. Torre-de-Moncorvo. Its principal affluents are the Pinhal and the Lameira.

COAGH a vill Ireland co. Tyrone 4 m S. by E. Moury more, on the Lough or Ballinaderoy over which is an ancient stone bridge of six arches, 4 m. W. Lough Neagh. It contains a market-house a Presbyterian chapel and two schools. Steamers ply on Lough Neagh between this place and the railway at Fortadown. Linen is the principal manufacture, for the sale of which a market is held on the first Friday of every month. In 1698 James II. crossed the river at this place, on his march to the siege of Derry. Pop. 835.

COAL ISLAND a vill Ireland co. Tyrone 4 m N.Y. Dungannon. It consists of cut streets, straight and well kept plentifully supplied with water, steadily increasing and improving. It contains a church and R. Catholic chapel parochial and national schools and has a loan fund brick, tile and draining pipe works, flax and four mills and several potteries contiguous to the village, employing a considerable number of hands. In the vicinity are extensive coal pits. Pop. 697. —(Local Correspondent).

COALBROOKDALE, or **COLLMOOREDALE**, a hamlet and dist. England, co. Salop, par. Madley 5 m S. by E. Wellington. It is a remarkably beautiful and picturesque valley the steep hills on its sides being almost covered with trees towards their summits and thickly studded on their lower parts with neat cottages and gardens. Here the Severn is crossed by a cast iron bridge, erected in 1779 of one arch more than 100 ft. span, and 40 ft. high. The houses are plain brick buildings, and the main road is lighted with gas water abundant. There are a Quakers meeting-house, a Wesleyan chapel and a place of worship for members of the Established church several schools, and a benevolent society. Here are extensive iron-works, where steam engines and all kinds of machinery are manufactured, amounting to the average amount of 80 tons being produced daily. Railroads formed

of wood, were first used here in 1620 and 1630 and about 100 years afterwards iron plates were put upon the wooden rails. The inhabitants are employed principally in the foundries and collieries. *See* MANZLER.—(*Local Correspondent*.)

COALEY near New Gloucester 2403 ac. 1 sq. 788. **COALTOWN** (East and West) two adjacent villa. Scotland no. Fifc, 4 m. N.E. Kirrialdy inhabited by colliers. Pop. E. Coaltown, 165. W. Coaltown, 372.

COALVILLE a vil England, on Leicester 5 m. N.W. Ashby-de-la-Zouch and a station on the Leicester and Bristol line of railway. It derives its importance chiefly from its extensive collieries, and the excellent quality of its coal, known by the Whitwick and Salsbourn Main. Previous to 1824, when the collieries were opened, there were but two houses here there are now about 300 also a handsome church in the early English style, chapels for the General Dispensary and Primitive Methodists and a national, and other schools. Pop. 1300.

COANZA, a river W Africa, Lower Guinea, falling into the Atlantic, with a broad and turbid stream S of St. Paul de Loendo lat. 9° 10' S. Its course is but imperfectly known but it is supposed to have its source in a large lake on the E. boundary of Cassinga, and to flow W for upwards of 600 m. It is navigable for a considerable distance, but, on account of the formidable bar at its mouth can be entered only by small vessels.

COARRAYE a vil France dep. Basses-Pyrénées, agreeably situated in a valley r bank, Gave-du-Pas here spanned by a bold arch, 10 m. S.E. Pau. In its castle, which crowned a mound above the river Henri IV spent his early years, and by sharing in the coarse fare and adventurous sports of the peasant, earned himself the 400000 and hardships of his future career. The only part of the old castle now remaining is a tower with an enclasure, but part of the site is occupied by a modern château. Coarraze has manufactures of woolen cloths and brick and limekilns. Pop. 1368.

COATBRIDGE a vil Scotland co. Lanark, par Old Monkland 9½ m. E. Glasgow. The inhabitants are chiefly employed in the extensive iron works in the neighbourhood Pop. 8664.

COA TENG, six para haw.—J Gloucester 2330 ac. Pop. 490.—E. 1888. 803 par. Pop. 46.—S. 1888. 845 ac. Pop. 63.—4 (Green) Lincoln 4480 ac. Pop. 235.—5 (White) Lincoln 1024 ac. Pop. 42.—6 North Lincoln 4 01 ac. Pop. 239.

COAZACUALCO a river Mexico rising in the sierra Madre, state of Oaxaca, and, after a winding N course between the states of Vera Cruz and Tabasco falling into a bay of same name in the Caribbean Sea, 40 m. S.E. Vera Cruz. It has been proposed to open a communication between the Atlantic and the Pacific by means of this river and the Chiapas, and it is alleged that the distance has actually been accomplished by this route in 10 courses of eight days.

COAZZO a kingdom of Italy Piedmont prov Turin 18 m. E.N.E. Susa, near its confluence of the Sangone and Susa river. Common cloth is made here. Pop. 8000.

COBAN or YAGUA PAZ, a city Central America, state of, and 90 m. N.E. Guatemala, cap prov Vera Paz. lat. 15° 50' N. lon. 89° 45' W. L. high, and near the source of the Dulce or Dolos. The inhabitants, all of whom are aborigines, are more wealthy than in any other part of the country. The valley is exceedingly fertile, and covered with plantations of sugar-cane, bananas, and pimento trees, and various kinds of fruit trees. Pop. 14 000.

COBRE, a vil Danvor. *See* KOBEN.

COBDO or KOBDO, a city and territory in N.W. Mongolia, W of Lake the Aral. The city stands on the r bank, and near the source of the Ise a tributary of the Dyshkun lat. 48° N. lon. 91° E. It is said to contain 3000 houses is regularly built, and carries on some trade with Karum.—The territory is bounded N and W by the Russian Governments of Yenisei and Tomsk, and separated from Russia by the Altai mountains. It contains several lakes, many of which receive rivers, without having any outlet, but it is not known whether they are all salt. The largest is the Uzun or Chika. The tribes in Cobdo resemble the American Indians in their habits, dispositions, and modes of life. The Chinese rule over these tribes in accordance with the same principles as that over the other Mongols and they Vol. 7

all render fealty to the Emperor through the chief resident at Ulaanbat, but how much obedience is really paid to his orders is not known.

COBHAM a vil and par England, co. Surrey 5228 ac. The village on a slight eminence on the Mole, about 5 m. W.N.W. Leatherhead is divided into two parts—one on the London and Portsmouth road, called Street-Cobham the other a little farther S. called Church-Cobham. It consists of two principal streets, one straight, and one crooked, houses generally of brick supply of water abundant. It has an Episcopal church, with chapels for Independents, Calvinists, and other dissenters five schools two flour-mills, a stock mill, and a brewery people chiefly employed in agriculture. Pop. 1691.

COBHAM a vil and par England co. Kent 4096 ac. The village 4 m. S by E Gravesend, has a handsome church with a tower, and some interesting monuments and a charity for the maintenance of 20 poor persons. Cobham gives the inferior title of Baron to the Duke of Devonshire Pop. 718.

COBIA a desert, Central Asia. *See* COW. **COBILJA**, a division Bolivia, on the footings of a dip and property styled the Maritime Government of Cobija. It embraces the whole of the sea coast belonging to that state, having an extent of about 270 m. from the mouth of the river Loa, on the frontier of Peru in the N. lat. 21° 30' to the boundary of Chili in the S. lat. 25° 28'. It is a wide coast to be stated with precision the maritime claim of the Andes which bounds it on the E. being for the most part, an unexplored wilderness. Many summits of this chain rise above the snow-line, but their waters flow to the interior and the coast on which no rule has fallen within the memory of man has only the river Loa and a few inconsiderable torrents, which are dry the greater part of the year. The Government is divided into five districts—Atacama Calama, Chichivis Cobija, and Esmeralda but it is, in general a desert of the most inhospitable and impassable character and contains no towns save even village, of any importance, besides Cobija.

COBILJA or **PEREZ-DE-LA-NIAZ**, a port and bay Bolivia prov Atacama lat. 22° 34' S. lon. 81° W. It is the only recognized seaport in the republic and on a point jutting into the sea there is a small fort, mounting five or six guns. It is a very poor place composed of a few wooden houses. Water is scarce. Fresh meat is procured from the interior but flour fruit vegetables, and nearly all other necessities, are obtained from Valparaiso.

This port is the principal outlet for the exports of Bolivia consisting chiefly of silver. It is through it that all the southern provinces of the republic are supplied with foreign commodities. Of late years, attempts have been made to improve the port, a mole, barracks, and custom-house have been built, the numbers of vessels frequenting it are apparently on the increase. Cobija is a free port in official documents it is always called Puerto la-Mar but English works and maps still retain the name Cobija. [ad. See SURV.]

COBLENZ, or **KOBLENZ** a gov. Rhenish sh. Prussia bounded, N. by gov. (elogne h. duchies of Hesse Darmstadt, and Nassau S. Rhineland Prussia, and Rhine-Rossau west of the Duke of Oldenburg and Landgraves of Hesse Homberg and W. gov. Trier and Aix-la-Chapelle area, 1754 sq. m. It is mountainous, particularly in the S., where its surface is occupied by the Hunsrück and in the N. by the Eifel Mountains. Being traversed however both by the Moselle and the Rhine, it possesses fertile valleys watered by these rivers and the far larger part of its surface is either arable or covered with fine timber. Gardens and vineyards also abound the latter especially along the fine slopes of the two rivers mentioned. The government is divided into 12 circles. That of Coblenz, containing the capital of the government is among the most fertile, and has an area of 79 sq. m. Pop. of gov. 1846 499,567 of circle, 63,410.

COBLENZ, or **KOBLENZ** [anc. *Confluentes*] a in Rhenish Prussia, cap. circle of same name, beautifully situated at the confluence of the Moselle with the Rhine, whence its ancient name *Confluentes*, modernized into Coblenz. The streets are mostly well-built especially in the New Town or Gleichenstadt but there are many mean and filthy lanes and thoroughfares. The principal buildings are the four E. Catholic

churches, one of which called the church of St. Caster situated precisely at the confluence of the two rivers, is remarkable for its antiquity, as it has been founded in 836 and also as the place where the grandsons of Charlemagne met (848)

COBLENZ
and the opposite bank
of the Rhine

to divide his vast empire into Germany, France, and Italy. It contains some fine ancient monuments, and a beautiful altar-piece. The palace, the New Town, the summer residence of the King, is a fine structure with a long and broad some facade extending along the Rhine. It was built by the last Elector of Treves, in 1799 and was converted by the French for a time, into a barracks. The Protestant church contains some fine specimens of early painted glass. The theatre is a handsome building and well fitted up, but neglected. The Casino or town club is also a fine edifice and contains an elegant ball room, good reading room, and has gardens attached. There are residences of several noble families in the town, including that of Prince Metternich an hospital admirably conducted by the sisters of charity a town library with valuable collections of coins, paintings and antiquities. A free stone bridge of 14 arches crosses the Moselle and another bridge, constructed of boats connects the town with the village of Ehrenbreitstein on the opposite bank of the Rhine where there is a strong fortress, with 400 pieces of cannon and containing vast armed stores, capable of holding three years supply of water. Coblenz is also strongly fortified. The expense of constructing both works, the former being an out-work of the latter was upwards of £750,000. Together they are capable of accommodating 100,000 men while the magazines are large enough to contain provisions for 8000 men, for 10 years. These extensive fortifications which are constructed partly on the system of Vauban, and partly on that of Montebello, render Coblenz the strongest place in the Prussian dominions. Coblenz is the seat of a central or criminal court, of a general court of justice, of a tribunal of commerce, of a board of taxation, and is the place of residence of the lord lieutenant (Oberpräsident) of the province of the Rhine.

Coblenz is a free port, and carries on an active commerce by the Rhine, Moselle, and Lahn. It is the staple place of the Rhine and Moselle wines intended for exportation. Grain, oil, iron and Saline water are also exported to a considerable extent. The latter to the amount of 1½ million bottles annually. It has, moreover, manufactured from the lava of extinct volcanoes in the neighbourhood pumice stone, potter's clay

and dark, artificial articles of trade, Japaned wares, linen, and cochineal, are amongst the manufactures. Pop. (1846) 28,481

COBLENZ a vil Switzerland, cant. Aargau, at the confluence of the Aar in the Rhine, 980 ft. above sea level. Pop. 648.

COBOURG a. in Upper Canada, pleasantly situated on Lake Ontario, 64 m N E. Toronto. It is well laid out, and possesses many good streets. Victoria college was founded by the Methodists in 1835. There are six churches, a jail, court-house, and a mechanics institution. The harbour is excellent, and during the season regular communication is maintained by steamers with various places of importance. An extensive cloth factory has been recently erected. Pop. (1852) 5871.

COBRAS — 1 An isl group, E. coast, Africa lat. 6° S. including Remba, Monda, and Zambar all wooded and inhabited — 2 An isl and fort, Brazil bay of Rio de Janeiro and about 1 m from the city of which the fort is one of the principal defenses, being capable of holding 1000 men, and 100 pieces of cannon. It is also used as a state prison. Pop. 400, besides the garrison.

COBRF a. in Isl. Cuba, in the E. dep 12 m N Santiago-de-Cuba. Coffee is the principal product of the vicinity. Pop. 2661 of whom 614 are whites, 10.3 free people of colour and 895 slaves.

COBRIDGE or COBRIDGE, a large vil England co Stafford, 2½ m N E Newcastle-under-Lyme. It has a neat church a R Catholic chapel and a Methodist meeting-house and near it are several manufactories and collieries.

COBURG or SAXE-COBURG-GOTHA (German Sachsen Koburg-Gotha) a duchy central Germany and the most R. of the independent Saxon principalities between lat. 50° 7' and 51° 22' N and lon. 10° 15' and 12° 40' E. surrounded by the territories of Prussia, Bavaria, Saxe-Weimar-Meiningen, and Schwarzburg. The duchy contains, altogether about 8000 sq m and has 11 towns 10 market towns and 253 hamlets and villages. It is divided into two provinces Coburg Proper S. of the Thüringer Wald (Thuringian Forest) and Gotha, in the N side. The former is traversed by the Ilz and Rodach, the latter by the Gera, Keesa, Werra, Elster and Lausitz. The R. of Gotha and N. of Coburg are both mountainous. In the former are the great Bergrück 2860 ft. high the Schneekopf, 2829 ft. and the Inselberg 2855 ft. Both divisions are fertile the hills are covered with wood and in Gotha coal and other minerals are found. The climate is mild and healthy. The chief occupations of the inhabitants, particularly in Coburg are cattle-rearing and agriculture. The products of the latter are grain, peas, beans, hops, hemp, fax, potatoes—a principal article of food and suns wine. Hogs are fattened in the forests, which also yield timber, pitch, tar, charcoal and potash. The people of Gotha employ themselves in the manufacture of linen cloth, tick, tape, leather from steel and copper wares, paper, glass and toys. Breweries, distilleries, sawing mills, and iron-bleaching establishments, are also numerous in the duchy. The principal articles of export are fat cattle, grain, butter, leather, wool, wood, linen and other manufactured goods.

The government is a constitutional monarchy. Each province has its own elective assembly, which meets and forms one chamber of 17 members or representatives of whom six are deputies of the nobility five from the three principal towns, and six from the inferior towns and country districts. No person can be elected a member who is under 30 years of age and who is not possessed of an estate free of mortgage or other encumbrance, of the value of £416, or an annual income of £23. The revenue of Coburg amounts to £20,450 annually of Gotha, to £391,812. The public debt in 1846, was £255,950. Amongst the institutions for public instruction are the university of Jena, a gymnasium at Gotha, another at Coburg in both of which there are also commercial and normal schools, and near Gotha an observatory, a lyceum at Ohrdruff, and the Salzmann college at Schleierthal founded in 1785. There are altogether upwards of 85 town schools and 800 village schools in the duchy. The dental house and the greater part of the population, profess the Lutheran faith but there are about 3400 R. Catholics, and 1200 Jews. There is entire toleration in religious matters, all sects and religions enjoying equal civil rights. The duke of Saxe-Coburg-Gotha takes the 18th rank among the Saxon dukes and holds the

12th place in the German diet. The duchy is bound to furnish a contingent of 1116 men to the army of the confederation. The house of Coburg has been singularly fortunate in its matrimonial connections. Leopold uncle of the present duke, and now King of the Belgians, was married to the heiress of the British throne, and afterwards to a daughter of the King of the French. A son of another uncle is consort to the Queen of Portugal one aunt was married to the duke of Kent, and another to Constantine, prince hereditary of Russia. The present (Ernest II.) duke's son-in-law is married to the duke of Saxe-Coburg and his younger brother Albert is the husband of the Queen of Belgium. Pop. (1848) Coburg 44,010 Gotha, 108,185. Total 147,195.

COBURG or Koenigs a to. Germany cap. of above duchy finely situated, 1 bank Rh. 106 m. E. by N. Frankfurt-on-the-Main lat. 50° 15' 18" N. lon 10° 58' 8" E. (5). The streets are narrow and the town itself altogether unattractive, though possessing some pleasant public walks. It has three suburbs two public squares, and three bridges across the Rh. The principal buildings are the Ehrenburg palace one of the town residences of the dukes of Saxe-Coburg, built in 1648. It contains a picture gallery a library of 37,000 volumes and valuable collections of minerals, conchologies, antiquities, minerals, &c. It is lower than any other part of the town and is built in different styles. Some of the old ducal exhibit beautiful specimens of marqueterie or inlaid work, an art for which Coburg is still celebrated. The Government house is a handsome structure in the Italian style and there are a town hall arsenal containing a fine collection of ancient armour theatre, and riding-school. There are five Protestant churches. In one of which, the St. Maurice, is the ducal burial vault, and some good monuments one E. Coburg chapel an orphan asylum, three hospitals, a gymnasium a seminary four parochial schools, Sunday and free schools an institution for the deaf and dumb and a public library of 20,000 volumes. On an eminence overlooking the town is an ancient castle of the dukes of Coburg surrounded by a strong wall from which extensive views are obtained. It is now in part, converted into a prison and house of correction, but some of the chambers remain in their original condition amongst them those occupied by Luther during his confinement here, and in which he composed some of his best works with his biographer and pupil. This castle was unconquered besieged by Wallenstein during the Thirty Years War the chronicles of which make mention of a lime tree which at 11 flourishes on one of the bastions Coburg has some magnificent manufactures of potash, cotton fabrics tick, glass, tape, woollen goods, and toys It has also dye-works breweries &c. In the vicinity there is a marble-work some iron works and a powder-mill Coburg is the seat of the government, and of the board of taxation for the duchy of the superior judicial courts and church synodary for the principality. Pop. 12,000. —(Krausch *Handbuch der Deutschen Bundesstaaten* Murray's *Handbook*.)

COBURG PENINSULA a projecting point of land of irregular shape, N. coast, Australia forming the N. E. side of Van Diemen Gulf and the E. of Dundas Strait. Extreme W. point is lat. 11° 20' S. lon. 131° 42' E. The peninsula is about 70 m. in length and is joined to the main by a narrow neck of land. Port Essington now abandoned is in the promontory.

COCAES ARRATALL, a mining vil. Brazil prov. Minas-Gerous, about lat. 30° S. lon 44° W. It is beautifully situated on the gentle slope and summit of a low hill in the bosom of a semicircle here formed by the serras de Cocas. Near the village runs a small stream called the Cima, whose banks have everywhere been turned over and washed in search of gold. The Arratall-de-Cocas, does not show any of the decayed appearance exhibited by many places in the same district. The houses are neat, and mostly whitewashed and surrounded by gardens filled with orange and coffee trees, bananas, &c. The church, which stands out prominently from the rest of the buildings is surrounded by a few palms, giving the whole a truly tropical aspect. The village is inhabited chiefly by those engaged in the neighbouring gold mines. —(Gardner's *Travels in Brazil*, 1856-41.)

COCAES, a vil. Brazil, prov. Mato-Grosso, about 30 m. N. W. Calaba. It contains a church, and has two chapels in its neighbourhood. Pop. above 3000.

COCHABAMBA, or COMODORILLO a river Bolivia, rising near the parallel of 16° S. flowing S. E. and, after receiving numerous tributaries, assuming the name of Rio Grande, in la. 19° 45' S. lon 64° W.

COCHABAMBA a dep. Bolivia, embracing the head of the province of the same name, those also of Sacala, Tapacari, Arica, Ayopaya, Chaco, and Miquez. These provinces all lie to the head waters of the Rio Grande, one of the chief tributaries of the Amazon. The department extends at least 400 m. E. and W. and about 300 m. N. and S. and includes every climate—perpetual snows overhanging its northern boundary while the sugar-cane and cacao grow in the rich valleys beneath Pop. about 280,000.—The province of Cochabamba lies immediately at the foot of the snowy mountains on the N. side of the department. The passes affording access to it are nearly 10,000 ft. high. The character of the valley is indicated by the name, *coca* a coca, *pampa* a plain, which signifies the inundated plain. The level plain is cultivated throughout, and resembles in its productions the E. of France—the vegetation consisting wholly of imported species. The indigenous character remains only in the culture of the natives.

COCHABAMBA a city Bol. la, cap. prov. It is a dup. of same name stands at the E. end of a plain 18 m. long, and 2 m. wide, 8870 ft. above the sea lat. 17° 27' S. lon 65° 46' W. The Rio de Bolivia, from the the valley of Sacala, flows through the town, and is joined lower down by the Tamborade—both overflowing in the rainy season though almost dry in winter. The city of Cochabamba occupies a great space, owing to the looseness of the houses which rarely rise above a single story and to the number of gardens intermingled with it. In the middle of the city is the grand Plaza, round which are four churches, and the Cabildo or Government-house a large but plain building. Of 15 churches, the handsomest is that which formerly belonged to the college of the Jesuits. The streets are broad, and in good condition but the plazas or open squares being used as market-places, are ordinarily littered with waste and crowded with Indians. Towards the borders of the town the tile-roofed houses with large wooden balconies, disappear and distiched cabins of Indian form become numerous. The general language is the Quechua and none but men of rank can speak good Spanish. The people are passionately fond of *chicha*—an intoxicating drink made of maize and sometimes, during religious festivals, they devote whole days to drinking it they are otherwise sober and economical but have little patient industry. A poll-tax however or tax on traders they are often very successful. While Potosi Oruro and other towns in the mining districts have fallen to decay Cochabamba, situated in a valley devoted wholly to agriculture, and therefore, decayed by the Spanish settlers has continued to prosper and contained in 1835 25,000 in habitants. The name Oropeque given to Cochabamba, in 1679 by the viceroy of Lima, was never adopted by the people and though found in maps and public documents, is now wholly unknown in Bolivia.

COCHE on the Caribbean Sea between Isl. Margarita and the peninsula forming the S. boundary of the Gulf of Caracas lat. 10° 45' N. lon 64° W. It is about 7 m. long by 4 broad, was formerly celebrated for its pearl fishery and is now chiefly resorted to for turtle and fish—great quantities of which are sent to the neighbouring islands and the continent.

COCHIN a small principality or rajahat in Hindostan Malabar coast, intersected by lat. 10° N. A portion of the territory is subject to the British code of Indian laws, the remainder is under the jurisdiction of the rajah who is tributary to the British. The narrow valleys in the N. parts of the country are well watered and fertile, yielding two crops of rice annually. The higher grounds are covered with forests consisting, in part, of teak jackwood ironwood, and blackwood all of which are in great demand in Bengal. There are a number of Christian villages in the territory these are, in general well-built and cleanly. Jews are numerous in the vicinity of the town of Cochich—they are composed of two classes, the Jerusalem, or white Jews, and the ancient, or black Jews, who have a synagogue in the town.

COCHIN a maritime in Hindostan coast on a small island lat. 9° 58' N. lon 76° 18' E. (5) formerly cap. of above principality but in possession of the British since

1796. Its harbour next to Bombay is the best on the W coast of Hindoostan and the only one S. of the former where ships of large size can be built. It has been in a declining state for many years but still carries on some trade with the rest of the Malacca coast China, and the Arabian and Persian Gulfs. The chief exports are tank sandal-wood pepper cardamoms cocoon silk cordage, muslin, and fish maws. Provisions are extremely cheap. Ships, from 500 to 1000 tons have been built here by the East India Company and several frigates for the British navy. Cochin is the seat of a Catholic bishop, whose diocese includes Ceylon.

COCHIN CHINA. See ARAM.

COCKAINE HAYLEY per Eng Bedford 1161 sq. 100. 117.

COCKBURN R. — 1 (Cape) N Australia, forming the N. entrance to Mountmorris Bay lat. 11° 18' S lon 13° 51' E. (2.) — (Channel) an inlet of the sea on the W coast of S. America, Terra del Fuego, having Clarence Island on the N about lat. 54° 30' S lon. 2° W. — 3 (Islands) a reef stretching along the N.E. coast of Australia, for 14 m. E. to W near the entrance of Shelburne Bay lat. (E. point) 11° 50' S lon. 143° 30' E. (W. pt.) 11° 50' S lon. 143° 30' E. Port Cockburn was established as a British settlement in 1824 but has been relinquished, chiefly on account of the scarcity of fresh water and the sterility of the soil — 5 (Port) W end of Mal Point coast of Zanzibar E. Africa about lat. 5° 45' S — 6 (Sound) S.W. Australia between Garden Island and the mainland may be considered as the outer harbour of Swan River from the entrance of which it is distant about 6 m. further S. lat. (N. entrance) 32° 10' S lon. 115° 45' E. Cockburn Sound is the best anchorage on this coast the depth in it varies from 12 to 7 fathoms. It is perfectly secure and capable of sheltering any number of vessels of the largest size.

COCKBURN ISLAND a small Isl. S Pacific Ocean immediately S. of Cape Horn discovered by Sir James Ross, January 1 1843 and placed by him in lat. 64° 10' S lon. 59° 40' W. It is described as a deep brown colour of great elevation for its size with a high volcanic crater-like peak on its S. end. Its elevation above the sea is 300 ft. and its diameter about twice as much. The form of this remote and barren rock, on which the S. is a vestige of vegetation in those high latitudes are to be seen consists, according to Dr Hooker of 19 species, all belonging to the orders mosses, algae, and lichens, and of which seven are peculiar to the island. It is covered with penguins and cormorants, and here were found what says Cayla is Ross, were never before seen the eggs of the white petrel. The island is covered during nearly the entire year with snow. Captains Ross and Crozier took formal possession of it, and the contiguous lands, on January 1 1844. — Ross's Southern and Antarctic Expedition.

COCKERMOUTH a market tn. and parl. bor. England co. Cumberland, at the confluence of the small river Locker from which it derives its name, and the Derwent, 24 m. S.W. Carlisle connected by a railway 8 m. in length to Workington with the Maryport and Carlisle, and Whitehaven Junction lines. The streets are irregularly built, many of them narrow but the houses though few of them are of the better class are neat, and indicate the enjoyment of a superior degree of comfort on the part of the working classes. The rivers Cocker and Derwent are crossed each by a handsome stone bridge. The church originally erected in the reign of Edward III. re-built in 1111, re-built in 1826, but unfortunately burnt in 1840 is now 1851 about being re-erected. The other places of worship are for Methodists, Independents, E. Catholics, and the Society of Friends. There are here a free grammar-school with library national, British, and Sunday schools as well as numerous daily schools, an almshouse, and dispen-

sary savings-bank mechanics institution, library and news-room. The principal public buildings are a house of correction and a courthouse, where the quarter sessions and various public meetings are held a commodious market-house, savings-bank gas works, &c. The trade is considerable, including flax and tow spinning the manufacture of woollens, cotton checks, and ginghams, sewing-thread hats to a considerable extent &c. There are besides tanneries breweries, and dyeworks and on the Cocker near the town, several corn-mills, and a paper-mill. The castle, the principal object of attraction, is beautifully situated, on a rising ground, at the junction of the Cocker and Derwent, and, in the olden time, was a fortress of great strength. It was taken after a short siege by the Parliamentary forces in 1643 and dismantled Cockermouth is the birthplace of the poet Wordsworth and John Walker author of a *Geography and Universal Gazetteer* was likewise a native. Cockermouth sends two members to the House of Commons electors (1850) 383 Pop. 7275.

COCKET or COQUER a river and Isl. England co. Northumberland, the former rising near the Cheviot hills and after a winding S.E. course through a beautiful pastoral district, falling into the North Sea near Warkworth Castle. The latter about 1 m. E. by S. of the town of the latter is about 1 m. in circumference has the remains of an ancient Benedictine monastery and on its S.W. extremity in lat. 55° 01' N lon 1° 37' 15" W. a lighthouse, with a bright fixed light 83 ft. above high water.

COULE, a river New Granada, isthmus of Panama formed by the union of the Panconome and Rata, and falling into the Caribbean Sea, 50 m. S.E. (barges after a course of 5 m. for a considerable part of which it is navigable).

COCO ISLANDS. — 1 Two islands of Bengal called respectively Great and Little Coco. The first extends from lat. 14° 9' N to 14° 8' N lon 33° 20' E. It is nearly 6 m. in length N. and S. and 2 m. in breadth covered with trees, some of which are not seen from the sea. The trees are in dense height but may be seen from a distance of 20 m. It affords nothing but ground with exception of a little water which may be had in some parts by digging pits. Little Coco has about 9 m. S.W. of Great Coco the centre is lat. 13° 58' 30" N. It is about 2½ m. long N. and S. and ½ m. broad moderately elevated and covered with trees, a top of which are coco-nut and palm trees. Both islands abound with monkeys and squirrels — 2 An Isl. (Palo Coco) Strait of Malacca, N.E. Sanduwaylon — 3 An Isl. Sooleo Archipelago on the E. side of the S.W. extremity of Mindanao is low lat. 3° 45' N lon 123° 23' E. It is sometimes called Malapala and Malinpa. — 4 An Isl. Chusa Sea, off the S.W. end of the Great Natuna lat. 3° 40' N lon. 108° E.

COCOA NUT ISLANDS. — 1 An Isl. off the S.W. extremity of Java W side Wain Cooper's Bay W point, lat. 7° 18' S lon. 105° 30' E. (2.) about 2 m. in length from E. to W. It is known also by the name of Klappa or Klapp Island — 2 One of the smallest of the Sandwich group, N. Pacific Ocean on the E. coast of Hawaii at the entrance of Byron Bay lat. 19° 45' 0" N lon. 155° 2' W (3.) — 3 An Isl. S. Pacific, Torres Strait between S. coast New Guinea and Cape York in Australia lat. 10° 4' S lon. 145° 10' E. This island has now no cocoa trees, though at one time they were abundant but bastard sago, palm, pandanus &c. grow luxuriantly. The reefs, points and cliffs are entirely composed of limestones, frequently crystallized. — 4 A small Isl. S. Pacific Ocean off S.W. coast New Ireland, about lat. 4° 42' S lon. 153° 44' 0" E. (5.)

COCONATTO a tn. kingdom Italy Piedmont, at Isola Alexander, on a hill, 17 m. E.N.E. Turin. It is several principalities and an annual fair. Fine chestnuts grow in the neighbourhood. Pop. 2500.

COCOS ISLANDS. — 1 An Isl. group, Indian Ocean, called also Borneo Coral Islands; centre, and largest island about lat. 12° S lon 98° E; consists of a circular chain of

Islands located touching each other, lined on the exterior side by a steep coral reef, and forming inside an extensive lagoon or harbor named Port Albion or Refuge Port. It has only one entrance for ships, which is about 3 N. extremity and is about 2 m. wide. Most of the islands composing the group are covered with coconuts and two other species of trees, one of them white, soft and spongy and the other heavy hard, dark looking timber. The beaches abound with land crabs, aquatic birds, and turtle. — 2 Two small, low lies Indian Ocean, off W coast, Sumatra lat. 8° E N.; lon. 96° 30' E. separated from each other by a channel 1½ or 2 m. wide of doubtful safety. The islands are covered with trees. — 3 Andam in Pacific Ocean lat. 13° 13' N. lon. 144 40' W. — 4 Andam B Pacific lat. 15° 20' N. lon. 178 58' W. — 5, Andam in Pacific, N Pacific, N. E. Bougainville Island, and S. E. New Ireland lat. 4 40' S. lon. 156 50' E.

2. COD (Cai) — A peninsula, U States Massachusetts curved upwards in the form of a hook, 60 m. long and 1 to 20 broad. It contains the town of Barnstable, and near its N extremity has a lighthouse [167 ft. high, lat. 42° 2' 34" N in 70° 4' W (s) add Sec 8 Cr 2] — 2. A spacious bay formed inside the hooked peninsula terminated by Cape Cod. It is about 28 m square and contains the towns of Barnstable and Plymouth.

more recent style of Mogul architecture it is principally of cut stone, the other parts being of brick covered with stucco and ornamented with coloured tiles. The tower is of reddish sandstone excepting the upper part, which is of brick and apparently of more modern date. The entrance is several feet from the ground in this and old forts resembles very much the round towers of Ireland and like those ancient monuments also its age and use are involved in mystery.

COBLE SYRIA [Greek *α και Συρια* - the hollow Syria] an ancient country and great valley Syria, embraced between the Lebanon and Anti Lebanon mountains. The valley is dry and arid and its scanty inhabitants are extremely ignorant and superstitious. They are, however brave and enterprising. The country has been at different periods desolated by the Persians, the Greeks, the Romans, the Arabs, the Turks. The name also at one period included all the tract of country between Judea and Arabia, and the confines of Egypt except Judea and Phoenicia. Under the Romans, this country formed at first part of the kingdom of Decapolis but under Decapolis it was incorporated with Syria, as it was in the present day. It is now a province in the modern Turkish publication of Syria and Damascus.

COEPANG Ss COOPANG
COFTIVY on Indian Ocean, about 550 m N.E.

Madagascar lat. 7° 6' S. lon 56° 30' E. From the S.W. point of the island a coral reef extends for several miles on which the sea is constantly breaking. Another reef stretches from the N. end for about 2½ m. on which the sea breaks when there is any swell. Abundance of good water succa nts, vegetables, fowls and turtle in their season may be obtained here. Fish are also plentiful. — (Yant May)

COFFIN'S ISLAND one of the Magdalen Islands, Gulf of St. Lawrence lat. 44 3 N lon 64 86 W (n.) It is

the largest of the group and contains some settlements. It is 25 m. long and in some places 3 m. wide. The population,

which is about 1000 are of half French Canadian. They have no agriculture beyond the cultivation of some potato grounds, but they have pasture lands on which they maintain some live stock. The inhabitants derive their subsistence from the *fisheries*, which are chiefly for seals, herring, and cod. The fishery of the sea-seaw as it was called, was formerly productive but it has now ceased to be followed as the seaweeds have deserted their usual places of resort. The inhabitants are healthy, have light complexion and straight hair.

by an earthen rampart, not capable of much defence. It is poorly built. The houses are generally low and ill-arranged, and the streets narrow as if winding. It contains a castle and a parish church, and has some manufactures of woollen and linen cloth, a trade in wool and an annual fair. The district around is mountainous and sterile, excepting the valley of Coimbra which though not of great extent, is both fertile and beautiful. Pop. 1624.

COGUELLA or TOWN pa Irel Kildare 1,155 ac. P. 226. COGNAL, a tn France dep. Charente, 22 m. W. Angoulême, 1 bank, Charente, on which it has a port. It is pleasantly situated on a hill and is overlooked by the remains of an old castle. It has a court of first resort and of some minor a communal college and an agricultural society. It gives its name to the well known Cognac brandy made here, and in the surrounding district, and which is exported to all parts of the world. The quantity produced annually does not exceed 5000 bbls, but it is a number sold under the name of *Les Fines Champagnes*, by which the best quality is distinguished exceeds 15 000 bbls. Cognac has numerous distilleries, and also a large trade in brandy made in other parts of the department. It likewise manufactures earthenware and leather and has a trade in grain and hemp. It is said to have been born here under an elm tree, his mother Louise de Savoie Duchesse d'Angoulême, having been seized unexpectedly with the pains of labour while walking in the park. Pop. 4148.

COGNÉ VAL DE a beautiful and romantic valley far & alone Val de Fervoy opening out of the Val d'Acosta remark- able for containing a Roman tunnel or gallery cut in the rock during the reign of Augustus. This ancient excavation is 180 ft. long, 14 ft. high, and 3 ft. wide. At one end is a well-cut contemporary inscription attesting its age and that it was done at the expense of C. Almus of Padua.

COGOLETO a tn Italy Piedmont, on the gulf of and 14 m. W. S. W. Genoa. It derives great interest from being the birthplace of Columbus. His home there is still shown. Genoa disputes with Cogoleto the honour of having given him birth. Near the town is a celebrated foundry of shot and shells. The iron is brought from Elba.

COHABILLA a state, Mexican Confederation, bounded N. and N. E. by the Rio Bravo del Norte, which separates it from Texas. E. Nuevo Leon S. Zacatecas and W. Chihuahua and Durango, between lat. 24° 17' and 26° 5' N. lon. 100° and 104° W. Length, 880 m. greatest breadth, 20 m. The vegetation is in general scanty and the soil is nowhere extensively cultivated. The districts are chiefly pasture ground for sheep. The parts present a broken and hilly surface and the W. portion is occupied by a desert called the *Bosque de Mapital*. There are several silver mines in this province and horses, mules and wool, are exported. The principal towns are the capital Cohabilla or Monteloreo, Santa Rosa, and Pecos. Pop. 44,000.

COHOB.—1 A vil. U. States, New York, 8 m. N. Albany on the M. Hawk near the junction of the Champlain

and Erie canals. It contains six churches, a cotton factory a flour-mill several saw-mills, an iron and brass foundry and other manufactures. Pop. 3000.—2 Falls on the Mohawk, near the village, and 70 ft. high, by 300 to 400 ft. broad.

COIMBATOUR, a prov. S. Hindostan, bounded N. by Mysore S., Dindigul E. Salem, and Trichinopoly; and W. by the province Malabar. Length, N. to S. 50 m. breadth, E. to W. about 45 m. between lat. 10° 6' and 12° 48' N. and lon. 76° 50' and 78° 10' E. It comprises a portion of the Nellocherry Mountains, including a peak, which rises to a height of nearly 9000 ft. above sea level. The other parts consist of an elevated undulating table-land, the lowest portions of which are 900 ft. above sea level. The principal river is the Caverry next to it, the Bhoovaral and Annavaral with numerous smaller streams. The climate is upon the whole pleasant and healthy although dangerous in the high lands at certain seasons. In December and January the thermometer ranges from 62 to 80° in the shade, and in May from 79° to 91°. Its mineral productions comprise common salt, nitre, and iron. The soil for the most part is dry but in the vicinity of the hills, and also in some of the S. parts, there is much low marshy ground. It is, however generally fertile, and is well cultivated. The chief articles of produce are cotton, rice, and tobacco. The cotton cultivated is principally American, the indigenous plant, now receiving comparatively little attention. In the hilly grounds, barley and other dry grains, with very fine vegetables and fruits, are produced. The animals are black cattle and buffaloes, a species of sheep, wild cat, bears and tigers. The inhabitants of the low country are chiefly Hindoos, but the hilly regions are occupied by four different races, one of which called the Todars, are the aborigines who subsist by pasturing cattle. They are quite distinct in language and religion from the Hindoos and are represented as a fine-looking race, often fair and generally of good size and figure, but are somewhat rude and ignorant. Their numbers do not now exceed 600 or 800. Pop. of prov. estimated at 700,000.

COIMBATOUR, a tn Hindostan, cap. of above prov. 1 bank, and near the source of the Neil lat. 10° 55' N. lon. 77° 55' E. It occupies an elevated and dry situation in well built, and contains about 2000 houses. There is here a camp built by Tippecoo Sultan, who made this town one of his principal military stations. About 3 m. from the town at a place called Perur is a celebrated Hindoo temple known by the name of Mail Chattramb. It is a rude piece of work manifestly destitute of elegance, but covered with a profusion of Hindoo ornaments. Some time since, an ancient temple or mound, near the town was opened, and found to contain various weapons and other articles, such as were formerly used by the Romans. Some of the most elevated summits of the Nellocherry Mountains are in the immediate vicinity of Coimbatour. It was twice taken by the British first in 1783, and again in 1790.

COIMBRA a city Portugal prov Beira, cap. dist. r bank Mondego, over which there is handsome stone bridge and large aqueduct 110 m. N. E. Lisbon on the high road between that city and Oporto. It is built in the form of an amphitheatre, on the slope of a hill the streets are steep narrow ill paved and dirty. There are, however several fine buildings, amongst which are the university at one time a royal palace, and the various colleges connected with it the cathedral and other churches and convents. There are besides, several squares, adorned with fountains and a number of churches convents, and hospitals. The university, which is well-endowed the only one in Portugal and which was transferred from Lisbon for the second time in 1581, consists of 18 colleges, and is divided into six faculties—theology canon law civil law medicine natural philosophy and mathematics—the last two having been added in 1778, by the Marquis Pombal who effected besides, several useful reforms in the system of instruction, which, however is still far from being complete. There are, attached to the university a library of about 30,000 volumes, a botanical garden, a museum of natural history with a collection of minerals, a chemical laboratory and an observatory well furnished with instruments of the best kind. The immediate neighbourhood of Coimbra is beautiful being covered with gardens and country mansions. In the town, are manufactures of earthenware and woollen and linen cloths. Pop. 12,400.

COIN a tn. Spain, Andalucia, prov. of, and 21 m. W Malaga, on a gentle declivity facing the N. The houses are tolerably built, and the town possesses numerous spacious and clean streets and three squares—the principal having a promenade and handsome fountain in its centre. It has two large churches, two chapels, some convents, four schools, a town-hall, prison, storehouse, casemate, an Episcopal palace and, in the environs several public walks and gardens, adorned with fruit trees, flowers, and fountains. Manufactures of linen and woollen fabrics, separate mats, soap, paper, bonnets, shoes, wine, and oil. Trade—cattle, grain, fruits &c. In the neighbouring hills, quarries of marble are wrought; and Jasper of all colours, is obtained, and an annual fair is held in August. Pop. 8289.—(Madox.)

COIRE, (Germans, *Glar Latin Coira*) a small but ancient and interesting city Switzerland, cap. can. Orisons situate fully 1800 ft. above the sea level, in a ruin and fertile plain, surrounded by lofty hills, on the Plessier about 3 m. above its junction with the upper Rhine 97 m. E Bern 58 m. E.B.E. Luzern lat 46° 50' 54" N lon 9° 31' 36" E. (s.) It lies on the highway leading to the important alpine passes of the Epilogen and Bernards, &c. and is surrounded by walls flanked with towers, and is divided into the high and low town. The former is chiefly composed of the bishop's court, which contains several edifices and is enclosed by a wall within it are the old cathedral a round-arched or Byzantine edifice, founded in a 8th century and containing several remarkable tombs the bishop's palace, a provost's a canonry a Capuchin monastery the old convent of St. Leger, in the buildings of which is a Catholic theological seminary having 12 teachers, and nearly 200 pupils. The lower town which has been somewhat augmented and much improved of late years, comprises nearly 400 houses, and contains St. Martin's church a turreted edifice the government-house, with a fine garden St. Margaret's castle, the Sol war-house once the hotel for foreign envoys and a number of other still more modern edifices. Among the public institutions of Coire, are the cantonal high academy with 12 teachers, including a section for languages a polytechnic elementary school a normal primary school a missionary school &c. a mint—the canon cotes its own money two public libraries a museum, three scientific societies, poor-house, birdsell &c. The situation of Coire makes it the centre of an important transit trade between W Germany and Italy. It has several large trading firms, and an association of merchants for securing the safe transit of goods through the canton. There is one cloth manufactory in it also a lead and a zinc flattening mill. The city is of Roman foundation, and the *Cursus Rhodanus* of the lower empire. It was made a Christian bishopric in 452. The doctrines of the Reformation were early and eagerly received here and the present population, about 4000 is nearly all Calvinistic.

COJUTEPEKCH, a tn. and lake Central America, Guatimala. The town, 15 m. E San Salvador has a pop. estimated at 15 000 and the lake at some miles distance from it, presents a curious phenomenon in the dark greenish hue which its waters assume after a gale, when fish are caught with great facility and are cast ashore dead in considerable quantities.

COKALAHISKIT or **BITTER-SOOT FORD** a river U States, Oregon rising in some of the Rocky Mountains, about lat 43° 24' N lon 113° 56' W. It flows S.E. for about 50 m. then N.E. for other 50 m. whence it flows N.W. in a very winding course for 200 m. direct distance and falls into Lake Kallispah or Pendredale lat. 47° N lon. 115° 24' W. On leaving the lake the river assumes the name of Clark, or Flathead and ultimately after a very circuitous course, and forming several falls unites with Lewis river in forming the Columbia or Oregon river.

COKER, two pars Eng. Somerset.—1 (Euseb) 3121 ac. Pop 1540.—2 (Wass) 1299 ac. Pop 1052.

COL (a neck, i. e. French name, used as a prefix to numerous passes of the Alps, as Col de Tende. For the position and height of the more important ones, see Alps, p. 104.

COLABAT ISLAND see Bombay.

COLAGAL, a tn. Hindoostan, presid. Madras, prov. Coimbatore 31 m. E.B.E. Serangapatam lat. 12° 18' N lon. 77° 14' E. It consists of large white, tiled cottages, uniformly built, and inhabited by weavers.

COLAIR, a lake, Hindoostan N. Circar, Mamulipatan, 8 m. E. Ellore lat. 16° 38' N lon 81° 22' E. It lies in a natural hollow is of an oval shape, about 22 m. long by 7 to 12 broad, and formed chiefly by the overflowings of the Krishna and Godavary. It has several islands, which are annually covered when the lake swells during the wet season, and on which good rice crops are produced but when the periodical rains fall it dries up completely. By the river Deputure the lake communicates with the Bay of Bengal, distant about 80 m.

COLAN par Eng. Cornwall 1540 ac. 1 pop. 254.

COLAPOOR a tn. Hindoostan, prov. Deccan cap. regship of same name, 180 m. S. Poona lat. 16° 19' N lon. 74° 25' E. It is situate in a valley between a curved range of hills by which it is protected on three sides. It is also guarded by a fort, but of no great strength. The rajahship is situate partly below the Ghats in the Uncon and partly in the elevated land within the Ghats, but is so intermingled with the possessions of the other Maharatta chieftains, and with those of the British Government, that its precise limits cannot be easily indicated.

COLAR, a tn. Hindoostan, in N. acc. 99 m. E.N.E. Bangalore, 112 m. N.F. Serangapatam lat. 12° 10' N lon. 78° 13' E. It is surrounded by a mud wall, and defended by a stone fort and has 700 houses a mosque, and a Mahomedan college, to which is attached a musical conservatory the tomb of Fakh Mahomed, begun by himself in 1749 and finished by his son Hyder Ali. and some manufactures of cotton cloth. In the environs are many fine gardens highly cultivated. Colar was taken by the British in 1763, and retaken soon after by Hyder. Pop. 8850.

COLBERT or **KOLBERT** a fortified asperit in Prussia prov. Pomorania, on the Persante and about 1 m. from its mouth lat. 54° 9' N lon 15° 46' E. It is surrounded with ditches, which can be at any time filled with water from the Persante. It contains five churches a town-hall a grammar school house of correction, and an old castle formerly the residence of the dukes of Pomerania, now an asylum for destitute females of respectable character and family. The town is well supplied with water. It has some manufactures and considerable fisheries of salmon and lampreys. There are salt springs in the vicinety which yield from 1000 to 1600 tons of salt annually. In 1806-1807 it was bravely defended against the French. Pop. (1845) 976.

COLBY par Eng. Norfolk 1115 ac. Pop. 335.

COLCHAGUA, a prov. Chih. bounded, N by Santiago, E the Andes, S prov. Manila, and W the Pacific. Length about 160 m. breadth 30 to 34 m. It is fertile in corn and produces cattle, horses and mules in great numbers. There are some gold and copper mines and in a part of the province are some hot baths esteemed highly efficacious for cutaneous diseases and wounds.

COLCHESTER, a port. bor. and river-port, England co. Essex, about 50 m. N.E. by L. London a station on the E. Counties Railway. The greater portion of the town is situate on the summit, and N and E sides of an immense rising from the river Colne. It is well built, paved and lighted with gas and amply supplied with water. Many of the streets are spacious, and the principal one which runs nearly E. and W. contains a number of elegant shops and handsome residences. The town was formerly surrounded by walls, in which were four principal gates, but both the town and walls disappeared. On an elevated spot to the N. of the High street are the remains of an old castle said to have been founded by Edward the Elder from which an extensive and beautiful view is obtained. Besides the parish churches, there are places of worship for various descriptions of dissenters, a free grammar-school with exhibition founded by Henry VIII. two charity schools, and others upon the national and Lancasterian systems the Society of Friends have also a school for children with a library attached. The charities are numerous amongst them are a hospital founded by James I. another called the Essex and Colchester hospital several almshouses and a great many benevolent societies and institutions, on limited scales and for special purposes. There are literary philosophical medical, museum botanical, and horticultural societies, and a neat theatre. Woollen manufactures were formerly carried on here to a great extent, particularly the hals and serge trade, but are now

entirely extinct. The woolen was superseded by the silk trade, which is now also, in a turn on the decline. Many of the inhabitants find employment in the oyster fishery of the river which has been long celebrated.

Colchester was constituted a bounding port in 1806, but its foreign imports are insignificant, and are not increasing. The principal articles of foreign import are wines, oil, sugar, and timber. The coasting trade however is prolific extensive, especially with London and the N counties of England. The principal exports are corn, malt, and oysters. In the latter traffic a great number of small craft are employed nearly all the oysters being carried to the London market. The Colne is navigable for vessels of 150 tons, to Ilthwaite, a short distance down the river where is the custom-house a spacious quay commodious warehouses, and bounding yards.

Colchester is a place of high antiquity there being no place in the kingdom where so great a quantity and variety of Roman remains have been found as here. It suffered severely during the war between Charles I and his parliament, having been—1648—surrounded a siege of 11 weeks duration conducted by Fairfax. It has returned with some intermission, two members to the House of Commons since the time of Edward I. Pop of it and liberties 19 443

COLDESTRALE a border in Scotland, or Berwick 1 bank Towed to S. E. Edinburgh. It is irregularly built and notwithstanding its proximity to England entirely Scottish in its general character and appearance. There is a great cattle market held here on the first Thursday of each month, and a corn market every Thursday. The town contains a parish church two Presbyterian dissenting chapels three subscription libraries and various educational establishments. The ford of Coldestra through the Tweed was a favorite point of descent times with the invading armies of England and Scotland, being the passage by which they almost made their way into the countries of each other. By this ford Edward I entered Scotland in 1296 with his army and by this ford also, the Covenanters entered England in 1640. A handsome bridge of red freestone of five arches now spans the river at this point, and forms one of the greatest thoroughfares between the two kingdoms. General Monk resided here for some time in 1660 and during his stay raised a regiment which he called the Coldestrales (guards a name which the corps still retains). Pop. 3186

COLE-ORON a vil and par. *France* on Leicester 1292 ac. The village, situated at the extremity of Charwood forest, 2 m E. Ashby-de-la-Zouch has a handsome church, a national school and an hospital for six widows. Pop. 549

well-built town, consisting of five principal streets, a spacious square, called the Diamond formerly used as a market-place; and several smaller streets. On the opposite side of the river is the village of Killowee or Watercree, with which Coleraine is connected by a handsome bridge. It has two parish churches, two R Catholic chapels, three chapels for Presbyterians, and one each for Methodists, Baptists, and Independents. The new market place is situated on the E. side of the town, and is commodiously fitted up for the various descriptions of agricultural produce brought there for sale. This town has been long celebrated for its manufacture of a fine kind of linen known by the name of Coleraine. The other manufactures carried on here are those of cotton, hard and soft soap, bleaching salts leather and paper. There is also a large ale brewery in the town. The general trade of the port is considerable, chiefly in grain meal pork, salmon butter linen cloth (Coleraine) potatoes and whisky. The imports are timber iron, barrels, coals, coal and salt. There is here a custom-house, bonding store and a timber yard. An extensive salmon fishery is carried on at Croughan, on the Bawn which yields nearly 200 tons of fish annually the whole of which is packed in ice, and exported to Liverpool and other distant markets. Another fishery on the same river called the Cutts, yields about 80 tons of fish yearly. Market day Saturday and several fairs. Coleraine sends one member to the House of Commons. Registered electors (1850) 991. Pop. 5520

COLIGNIPI AAT commonly **COLIGNIPIAAT** a vil
Holland, prov Zealand id N Dordrecht, 12 m. N W Burgun-
op-Keum. It lies on the N shore, and is the most important
place on the island. It is well built, planted with trees, and
has a court house, Reformed church school and harbour
whence small vessels ply to Middelburg and Rotterdam,
and whence there is a regular ferry to Surinam. It has a fair in
July 1st 1698.

COLIMA a city, port, and dist. Mexican Confederation
state, Guadalupe. The town is situated in a fertile plain
12° N. lon 103° 7' W near the volcano of the same
name which rises to a height of 12 000 ft. above the level of
the sea. It is a pretty large town and has a considerable
demand for various articles of trade, such as linen cotton
goods, woolens and hardware. Pop. 80 000. The port
which is about 30 m. S. S. W. from the city lat 18° 33' N.
lon 103° 35' W. has a good anchorage, and is well protected
against the S winds prevalent during the rainy season, but
on account of a very considerable lake of stagnant water in
its immediate neighbourhood is very unhealthy during the
summer. Infected by myriads of mosquitoes and sand flies,
even in the dry season it is nearly impossible to reside there.
This port has been open to foreign commerce for several
years, but has not been able to make much progress. The
port itself has not a single house, and the first adjacent town
is Colima, formerly the capital of the territory bearing the
same name now combined with the department of Michoacan.
—The district is situated on the shores of the Pacific, where
it occupies a coast line of about 100 m. Its surface is gener-
ally speaking level though presenting several high hills
including the volcano of Colima, but with these exceptions a
part of the country rises more, probably than 1000 ft. above
the level of the sea. The climate is consequently hot, and as
the soil is fertile it yields many tropical products, particularly
cotton of excellent quality. Nearly all the inhabitants are
Indians who, at their own request have a Government in-
dependent of that of Mexico to which it was formerly belonged.

COLINSBURGH a village Scotland on Fife, 8½ m. S. by
8 Cuper. It has a Discharging meeting-house a tannery
weekly corn market and two annual fairs. Pop. 482.

COLINFORN par Scot Edinburgh area 6½ sq m. Pop.
(1801) 2678.

COLL a small bay on coast, Newland off Mull co.
Argyle, one of the Hebrides lat 56° 43' N. lon 6° 30' W.
about 12 m. long and from 2 to 2½ m. broad with about
60 m. of bad rocky coast. It has two bays, one on the N
side called Loch Breacach, which runs about a mile to the
land and affords tolerable anchorage in summer. The other
called Craspool a little further S. is useless being full of
smooth rocks, as I much exposed to the S and S. W. winds.
The only harbour worthy of notice is at Arranmore about
the middle of the island. There are several small fresh water
lakes but no rivers. On the N. W. side are three mineral
springs. The surface is rugged and uneven but its highest
summits do not exceed 800 ft. A vein of lead ore is known
to exist in the W. end of the island but it has never been
wrought. A great portion of Coll particularly on the S. E.
side, is composed of barren moor incapable of cultivation or
improvement. There are however many small spots of ex-
traordinary fertility and some tracts of light and sandy soil
along the N. W. coast, which are tolerably productive. The
whole arable or meadow land is estimated at 4500 ac. The
black cattle reared in Coll are reckoned of superior quality.
Rabbits abound. The inhabitants are said to be in general
intelligent and enterprising but such character seems hardly
consistent with their neglect of their fisheries, which they
leave to be prosecuted by fishermen from Aberdeenshire who
come to the island yearly and carry off immense quantities
of ling. Gaelic is the universal language of the island. The
remains of several British forts and religious houses are still
visible. Stone coffins also have been found together with
coins, and other relics of antiquity. Pop. (1851) 1109.

COLLACE par Scot Perth 5½ sq m. Pop. 561.

COLLAECOS—1 4 m. par Portugal, prov Estre-
madura, near the sea a little N. E. of Cape Rooca 10 m.

COLMAR, or **KOLMAR** [anc. Colmar] a town in France, dep. Haut Rhin 238 m. E. Paris 39 m. S. S. W. Strasbourg, on the railway thence to Basel at the confluence of the Saale, and a branch of the Rhenish river the Rhine 2 m. below the town. Lat. 45° 54' N. Lon. 7° 22' E. It is a pleasantly situated about 2 m. from the foot of the Vosges Mountains. The streets are irregular, but the houses are, in general, well built. The fortifications were destroyed in 1673 and it is now surrounded by boulevards, and entered by three gates. The only public square of importance is that in front of the cathedral where a weekly market is held attended by the country people from more than 50 surrounding villages. The public buildings are not remarkable, they consist of the cathedral, built in 1803, the palace of justice, hotel de ville, college containing the public library with 50,000 volumes, and some pictures by Schœn, Albrecht Dürer &c. the deaf and dumb institution, the civil and military hospital, theatre, college church, built by the Jesuits in 1750, the church of the Ursulines, with its much admired nave now used as a corn-market, the church of the Trinity now occupied by the Protestants and a museum where among other curiosities a remarkable skeleton is preserved of which fell near Combeaux in 1492 and originally weighed about 254 lbs. The portion here weighs about 142 lbs.

Colmar is the seat of a royal court for the departments Haut Rhin and Bas Rhin, co. of first resort and of commerce, and has a commercial college, synagogue, and departmental nursery ground. It has manufactures of printed wools, calicoes, silks, handkerchiefs, house paper, ribbons and hosiery besides cotton-spinning mills, tanneries, and chocolate leather-works. It has a considerable trade in the manufactured goods of Alsace and in iron grain wine, plants, madder &c. and is celebrated produce, with which it supplies Switzerland. In 1552 Colmar was surrounded by walls and towers, and made an imperial free town. In 1687 it was taken by the Swedes, who kept it two years. It was restored to France in 1697 by the peace of Rastatt. Pop. 18,000.

COLMAR a town in Spain, 14 m. A to Andalusia, prov. C. and 16 m. S. Malaga, 12 m. W. S. W. Alhama, on a small hill, it is a pleasantly situated town, situated well-paved, a square, and a fine and handsome prison. It also has a parish church, chapel, school, theatre, and cemetery. The manufacture of handkerchiefs of linen and leather and printing of maps &c. are carried on. Trade—dried fruits, grain, brandy and hosiery. Pop. 3,000.—2. *Château de Colmar* a town,

New Castle, prov. of and 56 m. S. S. by S. Madrid, in an extensive plain. The streets are different and there are two squares, one of which contains the prison. It also has a parish church, town-hall, two hospitals, several schools, a storehouse and cemetery. Manufactures—common cloth, expensive masts, wine, and oil. Barley is exported to a considerable extent. Pop. 4,684.—3. *Colmar* a town in New Castle, prov. of and 20 m. N. Madrid, in a hilly region. The streets are regular and the public square is spacious and handsome, containing the town hall, prison, and other well-built edifices. The town possesses besides, a parish church, numerous chapels, a college, Latin and several primary schools, various hospitals, a storehouse and cemetery. Manufactures—woollen fabrics, leather, pottery, wine, and oil. Trade—cattle, grain, honey, wax, and wool. A yearly cattle fair in August. Pop. 3,738.

COLN HOOK a town and chapelry in England, on Bucks. r. bank, Colne, 18 m. W. by S. London, and within 4 m. of the Slough station on the Great Western Railway. It consists principally of one long narrow street, generally straight, street, the greater portion of the houses are chiefly of brick and wood, roofed with tiles, presenting rather a mean appearance. Water is plentiful and excellent. The church is a most interesting structure, lately erected in the modern Gothic style. There are, besides, three chapels, belonging to Baptist, Independent and of Primitive Methodists and two schools. In the immediate neighbourhood are extensive paper-mills. Pop. (1851) 1,000.—*(Local Correspondent)*.

COLN three rivers, England.—1. one Hereford at Middlesex, rising about 3 m. N. W. St. Albans, flowing S. E. and then S. and joining the Thames at Staines after a course of about 30 m. past St. Albans, Watford, Rickmansworth, Letchworth, W. Drayton, and Colnbrook, on Essex, rising near the N. of the town, about 3 m. N. W. Halesden, and after a S. E. course of about 35 m. past Halesden and Letchworth, falling into the Leman Ocean by a broad estuary separated from the Humber, by the island of Humber.—2. one Gloucester rising near Cheltenham, and joining the Avon, near Lechlade, after a S. E. course of about 20 m.

COLN 800 pers. Eng. —1. Huntingdon 2,011 ac. Pop. 480.—2. *(Earl)* Essex 3,300 ac. Pop. 1,518.—3. *(Fagins)* Essex 4,444 ac. Pop. 670.—4. *(Vobes)* Essex 1,920 ac. Pop. 499.—5. *(Hagley)* Essex 146 ac. Pop. 469.

COLNEY a market in England, on the 81 m. S. E. of London. It consists of one principal street running E. and W. almost in a straight line, with several subordinate ones diverging from it, and the houses are stone, but only some of them good buildings well supplied with excellent water, lighted with gas, and presenting altogether a thriving appearance. Besides the parished church—a spacious old building there are six chapels belonging to Wesleyans, Independents, Baptists and other Dissenters. The most remarkable edifice is the 11th-century hall, in the Elizabethan style, originally erected for the weekly display of woollen goods, but now only used at the annual fair. There are four principal and several minor schools, as also a mechanics institution. The chief manufactures are those of muslin, of linen and cotton, the former carried on to a considerable extent and sent principally to Glasgow for printing. The poorer classes are chiefly employed in weaving. Colney was one of the earliest seats of the woollen manufacture in England having had a fulling mill in the time of Edward II. The celebrated Arab bishop Thelwall resided at the rudiments of his education at the free grammar school of Colney. Pop. of township 6,644.—*(Local Correspondent)*.

COLNEY par. Eng. Norfolk 948 ac. Pop. 88.

COLNCEA, or **KALONCA** a town in Hungary, 60 m. S. of Pesth in a marshy plain, 1 bank, Danube. It is the seat of an archbishop and contains a cathedral, a lycœum, a theological seminary, a gymnasium, a R. Catholic grammar school, a Protestant college (a species of Ignatianum) and an ancient castle, in which the archbishop resides and which contains a library of 30,000 volumes and some valuable MSS. The town was at one time fortified, and was a place of some

COLOMBES, a com. and vil France, dep Seine 8 m N of Paris, agreeably situated on a hill in the second bend made by the Seine below Paris and near the bifurcation of the Rhen and St. Germain railways. It is well built and has some good squares planted with trees. In the environs are numerous country houses in one of which Rollin wrote his famous *History*. Manufactures—cotton hosi, glass, gelatine, 1 date flour and oil refining. It formerly had a royal castle (1640). The ruins of Colombes at 1640. N. 1070.

COLUMBUS a name firmly applied to the N W portion of the area comprehended between lat. 5 S and 14 S W and lon 60° and 83° W bounded N by the Caribbean Sea F by the Atlantic and British Guiana S by Brazil and E and W by the Pacific Ocean. It was so called after the illustrious navigator Columbus, who visited the coast of Paria 1498, and thus became the discoverer of the New World. Under the blue yards it formed the vicarvally

here it in the Traversthal about 1 m. from the S. shore of Lake Neuchâtel and contains a considerable number of well-built houses. The most interesting object near it is an extensive old castle with fine planted walks, formed by the good Henry II Duke of Longueville. The celebrated Southemish Keith the friend of Frederick the Great possessed it for some time. Lon 910

COLAMBI a sloop, in Ceylon S.W. coast near the mouth of the Kalan River and about 70 m. W by S. Kand. lat $6^{\circ} 57' N$ lon $80^{\circ} 5 E$. the mast of de Brito's Governor's residence and principal on portion of the island. It is handsome and is heavily divided into four parts by two broad streets. A portion of it comprising the best houses in the town is within the walls of its very extensive fort occupying a projecting point of land and embracing a circumference of nearly 12 m. The principal street Queen's Street, is wide and well planted with surly trees. The streets are well watered during the day and the fallen leaves are regularly removed every morning but there are no fountains. Within the fort there are

at right angles. On the N side of it on the margin of the sea is the Pith or bank town regularly built, and divided into 16 districts, at which right run B and W crosses 1 by other at right angles. The houses are in general of lakobok, and neatly washed with chumoo some of them are of two stories to the east of the streets are joined with rows of trees. There are many Dutch houses in the town which may be distinguished from those of the English by their glass windows instead of ventians. The houses of the Europeans outside the town are very beautifully situated especially those near the sea. The houses are universally of lakob, very elegantly and disagreeably from the sea. The houses are of two stories and a great number of well stocked shops in the town and several bazars or market places amply supplied with provisions of all kinds and with tropical herbs and fruits the latter including pine apples and oranges of a superior quality. The public institutions and buildings are the 1st and 2nd Serries library containing a good selection of books a hall of commerce or exchange lately built the museum, medical library the Bank of Ceylon council room Government offices, Government house hall of the supreme court district court, Fiscal's office, and jail. Some of these are very handsome structures. The partitions of worship are two Presbyterian churches, two Portuguese Protestant, two Episcopal churches, one of which is with the fort, St. Andrew's, St. Francis, and Baptist churches. The Moslems have two handsome mosques decorated with minarets, the Hindoo also have their temples, rudely asplastered. There are a number of charitable, benevolent and religious associations and institutions including

dispository and hospital. There is also a horticultural society. The fort of Colombo mounts 120 guns and six mortars, and is garrisoned by a force of 1650 European troops and 80 officers. The ramparts are very strong, having eight principal bastions and a number of lesser ones with curtains, banquets, and parapets, communicating with one another all round. The whole of the fort, except the side next the sea, has a slope of 4 to 1 or more in front. Behind it, there is a lake, which almost insulates the town. In the centre of this lake, is a tongue of land called *Silva Island*, from the use to which it was applied by it. It is covered with most houses, bungalows, and other buildings, interspersed among stately areas and bread-fruit trees, and coco-nut palms. There are upwards of 30 commercial houses in Colombo which carry on a pretty large trade. The principal exports to Europe are cinnamon, cardamoms, coffee, coco-nut oil, four cordage, ebony, pepper, plantain, and satin wood. The harbour which is in the form of a semicircle is capable of receiving small vessels only and the roads where the large ships can anchor at upwards of a mile from the shore is exposed to the S.W. monsoon but severe gales seldom occur now so that ships may and do frequent it all the year through with perfect safety. The value of exports in 1845 amounted to £491,026 imports for the same year £1,198,418. There are now mail coaches running regularly to and from Colombo to Kandy, Galle, and Negombo. The land about Colombo is low near the sea with some hills to the S.E. a little way in the country. P. 1831) 31 64.

COLUMBIEN II Spain. See COLUMBIEN.

COLUMBIEN a town in Spanish Guiana prov. of and 13 N by E Granada on the river at its own name. The street is well paved and clean but steep and rather irregular. It has two squares one of which contains the town hall and prison and the other the church cemetery and storehouse. It has also a chapel, orphan asylum, almshouse, and several schools. In the vicinity are some pleasant public walks at the margin of the *Columbier* which is crossed by a stone bridge. Trade in grain, fruits, oil, &c. Pop. 9102.

COLUMBIA DO BARTIMEO SACRAMENTO a fortified sea port in Uruguay N bank of the estuary of the Plata opposite Buenos Ayres lat. 34° 28' S lon. 57° 41' 46' W. In 1845 it was taken by the English and French fleets. Pop. 3500.

COLUMBIAN CAFF [sic *Sum. Promontorium*] forming the most S point of *Atlix Green* lat. 97° 38' 45' N lon. 24° 14' 5' E. It is of a remarkable appearance and forms a most conspicuous object at sea. Its summit is crowned by the ruins of a temple 200 ft above the sea and to have been dedicated to Minerva and of which 10 columns of white marble are still standing. From these pillars it is said to take its modern name. Beneath the cape are extensive the frequent resort of pirates.

COLUMBIA LA a town and Naples prov. Abruzzo Ultra I list of and N.N.E. Teramo near bank Tronto. It contains five churches a convent and school and has two annual fairs. Pop. 3467.

COLUMBIAN and **UNION** two islands W coast South land on Argyle lat. (Colony) 56° 8' N lon. 158° 18' W. They are not more than 100 yards apart, and are separated from each other at high water only. Together they are about 12 m. long and from 1 to 8 m. broad. A considerable portion of the soil is arable, and is cultivated according to the newest and most improved system. The principal crops are potatoes and barley and black cattle and sheep in large numbers, and of superior breed, are raised on the pastures. Oratory is rendered interesting by containing the remains of an extensive grocery brought by the Lord of the Isles and occupied by canons founded by the Abbey of Holyrood at Edinburgh. The ruins are of the finest and most imposing description and equalled only by those of Iona. On a small island in the middle of a lake in Colony are the ruins of an ancient castle, the stronghold of the early lords of the island. Colony contains an excellent harbour called *Porta Sancti* in which there is a substantial quay. There are also two good roads. Col. fishes is carried on to a considerable extent by the inhabitants. 1 op. about 840. — **LARRY** a Colony in a small island in the above archipelago between Baffin and Gooenra. It contains very few inhabitants, and affords pasture to a number of sheep.

COLORADO several rivers America — 1 *Rio Colorado del Occidente*, a river U. States, Upper California the sources of which are in the Rocky Mountains, appeared (for its local waters are not well known) in the Oregon territory about lat. 42° N and about 160 m. N.E. the Great Salt Lake of California. It flows S.E. and S. under the name of the Green River, then as it the left bank, the San Rafael from Lang's Peak about lat. 39° thence it flows S.W. receives several affluents, chiefly on the left bank and falls into the head of the Gulf of California, after a course of nearly 1000 m. Its most important affluent is the Gila which separates California from the Mexican States of Sonora, and which enters the Colorado about 50 m. above its mouth. Excepting on the immediate banks of the river the country as far as known through which it Colorado runs, more especially S. lat. 40° appears to be a sterile and arid waste. — 2 *Iba (Jared)* de Tense a river U. States Texas rising in the Sierra de Guadalupe about lat. 23° 40' N lon. 100° 40' W. It flows N.E. and in lat. 31° 40' N lon. 100° 40' W. is joined by the Pecos, which then doubles its volume, on the left bank after which the united waters take a S.E. and winding course and fall into the Bay of Matagorda, Gulf of Mexico by several mouths after a course to the sources of the Colorado proper of upwards of 400 m. and to the sources of the Pecos of upwards of 600 m. It is navigable for 160 m. — 3 *Colorado*, or *Cubra* for a river S. America La Plata, rising in the Andes, near lat. 35° S and after a S.W. course through a country almost naked, falls into the Atlantic at lat. 40° S lon. 51° O. — 4 *O* of the name of the San Juan del Norte, or Neacumen River Central America.

COLORADO (flow) a cluster of rocks and islets near the entrance of the Gulf of Mexico off the N.W. side of the island of Cuba lat. 23° 15' N lon. 84° 40' W.

COLORADO (anc. *Columbus*) a town in Italy duchy of and 9 m. N. Parma, on river of that name, crossed here by two bridges. It is well built, and possesses two churches one collegiate, it is formerly belonging to the Benedictine monastery, but both large and elaborately ornamented a town hall, Hebrew medical veterinary and several primary schools a public library philosophical society and a ducal palace. Castles salt, iron, woollen fabrics and wine are manufactured and trade is carried on in cattle, grain and fruits. An annual fair is held in July. 1 op. 7043.

of various kinds are carried on to some extent, and the commerce is very considerable, especially in the exportation of flour from the Potomac. The district is not represented in Congress, but is under the immediate government of that body and subject to any laws which they may please to enact. It is divided into two counties by the Potomac, one of which is governed by the laws of Maryland and the other by those of Virginia. Besides Washington, the seat of the National Legislature, and the capital city of this Union, it contains Alexandria and Georgia. Pop. in 1840 42, of which number 20,687 were white, 2861 were free-coloured persons, and 4694 were slaves.—2 A. to east of N. Carolina, 104 m N by W Charleston, 1 bank (cangaroo) it ascends on an elevated plain, and is regularly laid out with streets 100 ft. wide crossing each other at right angles. It has a spacious state-house a court-house, jail, market-house, two banks, six churches, and three academies. It is also the seat of St. Charles college, the built-up maps connected with which have an imposing appearance. It is connected with Charleston by a railway, and the river is navigable for boats at high flood tide. Pop. 1850—3 A. to Pennsylvania, 30 m S.E. Harrisburg 1 bank (cangaroo) here crossed by a bridge 5640 ft. long. It has a town-hall market-house eight churches, a bank an academy and a library and carries on a considerable trade with Baltimore and Philadelphia in lumber coal iron and agricultural produce. It is connected by a canal with Havre de Grace at the mouth of the Susquehanna, and is intersected by the Columbia and Philadelphia Railway. Pop. (1840) 2711.

(COLUMBIA, or Okeanogon) river largest river N. America, partly in the British territory and partly in that of the U. States. It issues from a small lake in the former state between two ridges of the Rocky Mountains, about lat. 50° 6' N. lon. 116° W. From this point it flows N.W. passing through another small lake, and confined by the double range to a parallel course with the Rocky Mountains, till it reaches lat. 5 N. at a distance of 140 m. when it proceeds due W. to lon. 110° from which it flows S. E. at 48° parallel but in an opposite direction to its earlier course. Between this point and lat. 45° its course is extremely difficult and winding, arising from W. to S.E. &c. but finally takes a direct W. direction which it retains till it reaches Fort Vancouver lat. 42° 32' N. when it once more proceeds N. but again turns to the W. at lat. 45° N. and finally falls into the N. Pacific Ocean at lat. 42° 15' N. lon. 123° 20' W. after a course altogether of upwards of 1000 m. more than the half of which is in British N. America, it is remainder in the territory of the U. States, which it enters about lat. 48 E. N. Its principal affluents from the E. are the Kootenai or Flat River which joins it about lat. 45° 30' N. Flat Head or Charles River 10 m. lower down the Salween or Lewis River which falls into it above Fort Wallawalla, about lat. 48 12° N. and the Wallawette, which unites with it near Fort Vancouver or its tributaries from the N. and W. are comparatively small runs of their approaching in some of those just enumerated. The largest are the Okanagan the Okanana, and the Cad lakes. The entrance to the Columbia river is replete it would seem, with difficulty and danger.

More description says Commander Wilkes, can give little idea of the terrors of its bar all who have seen it he speaks of the wildness of the scene, and the immense roar of the waters, representing it as one of the most fearful sights that can possibly meet the eye of the sailor. The flood of the Columbia, when at its greatest height, presents a magnificent spectacle, gliding past swiftly but with majestic solemnity, bearing along the gigantic forest trees, whose immense trunks appear as men's ships. They frequently lodge for a time, in which case others are speedily caught by them which obstructing the flow of the water form rapids, until, by a sudden rush the whole is borne off to the ocean. An entire forest of 1 m. has been seen standing erect under the waters of the river and individual trees in the same position with their roots spreading in the sand growing in their native forests. Trees are supposed to have been deposited in the river by land slips, which would account for their erect position. The trees in the banks of the Columbia attain extraordinary dimensions. Capt. Belcher measured one, a drift tree, and found it to be 174 ft. in length, by 20 ft. in circumference trees of 3.00 ft. in length and 18 ft. in circumference

being common, while many much larger than the largest just spoken of are found in the thickest parts of the woods, where they attain the greatest size. The waters of the Columbia are said to have no fertilizing qualities, but, on the contrary are said to deteriorate and exhaust the soil. Numerous water-snakes are met with in the river, but they are harmless. They are called the fishing-snakes, from their subsisting chiefly on fish which they are very dexterous in taking. By the Oregon treaty with the U. States the free navigation of the Columbia river was secured to British subjects.—(Belcher's *Young Men's Voyage Round the World* U. States Exploring Expedition Lyall's *Geology*.)

COLUMBKILL E. two par. Ireland.—1 Kilmore 44° 3' ac. 1 op. 920.—2 Loughford 18.07 ac. 1 op. 6597 (COLUMBKETTES, or COLUMBKETTES, four groups of small islands Modification of E. coast Spain about lat. 39° 54' N. lon. 0° 44' 12 m. N.E. Cape Oropesa, and having deep water between them. They are of volcanic origin, and have a picturesque appearance, their broken masses resembling the wrecks of a more considerable island. In the largest island, Santa Marta de Colubretes, there is a harbour called Tofino, in the form of a capacious basin which could accommodate several vessels in 5 to 12 fathoms water. It is about a quarter of a mile across in the middle and is tolerably secure from all winds, excepting the N.E. E. and S.E. On this island there is a hill of considerable elevation, called Monte Colbre and several of lesser heights. They are covered with an exuberance of dwarf oak, geraniums, prickly pears myrtles and brushwood but every other part exhibits lava, obsidian and scorra. The climate is sunniness and healthy, so 1 through it is surface is much broken in by are rams of eye mounds, piles, potatoes, hemp, &c. The whole island is almost literally swarming with snakes generally between 2 and 3 ft. long and beautifully marked they seem to be harmless. The shores abound with crabs and small fish. A few maltese are also to be met with. At time of war it is of considerable importance as a military station.

COLUMBUS several towns U. States.—1 A city cap Ohio, 100 m N.E. Cincinnati lat. 34° 58' N. lon. 84° W. on the Scioto river crossed by a bridge connecting with Franklinton. It rises gradually from the river, and its streets cross each other at right angles, the principal ones being broad and spacious. The capital is a large edifice of whitish limestone 314 ft. long. The other public buildings include 20 churches, several of which are elegant structures the state penitentiary a spacious office the asylum for the deaf and dumb a large brick building with handsome Doric porticoes a lunatic asylum a blind asylum and a German Lutheran theological academy. There are 1000 on coal taxenese distilleries, and breweries a pottery at 4 four printing offices. A commodious wharf 1500 ft. long extends along the margin of the river and the national road passes through the town and a canal 11 m. long connects it with the Ohio canal. Pop. (1850) 18 188.—2 A in blue a supa cap on Iowa lat. 172 m N.E. Jackson 1 bank Tom bigbee. It is a comfortable jail two banks a theatre, seven churches and educational establishments and a market house. 1 (1850) 2611.—3 A in Georgia cap. on Mingoos Lake (Chattahoochee) or immediately below the falls 240 m. N. by N Savannah. It is regularly built, with broad spacious streets crossing at right angles and has a court house, several churches schools, and academies a paper four cotton a d several flour mills, a d two iron foundries. 1 (1840) 6944.

(COLYTON a par in England on Devon 7196 ac The town is in a beautiful valley on the Coly (from which it takes its name) near its junction with the Axe, and 30 m S.E. Exeter has very irregular streets, kept, however very close. Many of the houses are respectable but the cottages of the poor are built of a mixture of trodden clay and chopped straw. Water abundant. It has a parish church,

with a tower and two small chapels belonging to Independents and Unitarians; a free school, and several local charities. Manufactures:—Hornston lace, which gives employment to a number of women and children; paper and leather. The inhabitants are chiefly engaged in agriculture. Pop. 2504.—*(Local Correspondent)*

COMACCHIO (anc. *Comaculum*) a tu. Italy 37 m. PSE Ferrara amidst unhealthy marshes, about 2 m. from the Adriatic. Salt is manufactured here, to the extent of above 2 000 000 lbs. annually and productive fisheries are carried on in the neighbouring lagoons. It is the seat of a bishopric. Pop. 5500.

COMANCHES an American Indian tribe, Muskie and Texas, who roam along the prairie ground beyond the Pecos and Rio Grande del Norte. They are extremely warlike, and make regular organized incursions, for the sake of plunder, into the Mexican territories, especially into Durango and Chihuahua. In some respects the Comanches differ from other Indian tribes, but it is only ground of difference calling for particular notice is their aversion to violent sports it being otherwise difficult to induce any of them to taste a drop of alcoholic liquor. Their numbers are estimated at 10,000.

COMAYAGUA or VALLADOLID LA-NUYA is in, and dist. Central America, Honduras. The town is about 186 m. E. Guatemala 1 bank, Surino, and lies a few abreast a college several convents and a richly endowed hospital. Up 14,000. — The district which is near the centre of the province, extending N. to the boundary of San Salvador in common with the district of Choluteca and Xoro is famed for its superior brood of cattle, which however are exported only to a very limited extent.

and 20 m E Tanyar, lat 10° 58' N lon 73° 26' E. This
city was the seat of one of the Chokla dynasty from which
the whole coast of Comoromini a corruption of *Cholamandini*
has received its name. It is now inhabited chiefly by Brah
mins, whose dwellings are neat and comfortable. The
country is a place of peculiar sanctity by the Hindoos it des
tines numerous pagodas, gateways and tanks, of a superior descrip
tion. It is believed that one of its tow tanks is filled every
15th year by the waters of the Ganges which find their way
into it by a subterranean passage and as its water is deemed
capable of purifying from all sin and innumerable thousands
resort thither in the favour of some with unobscured faith
to its efficacy. The country is fertile and the res
tant number has been some times 100,000 and is making
satisfactory progress. There are also considerable numbers
of N. G. Catholics. Pro estimated by W. Adams at 40,000.

COMMLRAGH MOUNTAINS, a mountain range in Ireland, on Waterford rising on the S. side of the Suir some what abruptly from the water's edge to an average

height of 1700 ft. above sea level. This range consists principally of gray slate and the schistosity along its front are either cultivated or plowed as far up as there is any soil to be found.

COMMECY is in France dep Meuse, emp. and 21 m. E Bar-le-Duc 1 bank Meuse. It is tolerably well built and has some good public buildings, a communal college, barracks, riding school, Hotel de Ville, hospital, markets, etc. Manufactures—cotton and hardware, breweries, and tanneries.

with trade in grain wine oil hemp, leather wood cattle, &c. In the sixteenth century the country was a province. Commerce at first a simple sequence obtained the title of commune in 1324. In 1361 it was raised by Charles V. It formed at that time two castles the upper and lower castle the former of which belonged to Philippe Emmanuel de Gondi who transmitted it to his son, the famous Cardinal Retz, who here was his residence. The castle, rebuilt in 1708 by the Prince de Salm and made a magnificent residence by Stanislas, is now transformed into a cavalry barracks. Pop. 2434.

COMMEWINE Y.N.E., or **COMMEWINE** a river Dutch Guiana rising in the hills of the colony in the E. part of the colony. It flows first N.W. and then W., is joined by the Cotteau, after which it forms a fine navigable stream, and falls into the estuary of the Surinam between the forts Amsterdam and Leyden. Its banks are adorned with the finest plantations in the colony. Before its junction with the Cotteau it is called the Upper and after the junction the Lower Commewine. Total course exclusive of windings, about 70 m.

COMMINES, or **COMINES** — 1. In France, dep. Nord 8 m. N. Lille, r. bank, Lys and on the frontier of Belgium opposite the Belgian town of same name. Before the conquest of French Flanders by France the old town of Commines was a fortified place and comprised both the present towns. The French dismantled it in 1672. It has ribbon manufactures, breweries, a distillery and linen mills, and tanneries. Pop. 466. — 2. (Flemish) Commines a town in Belgium 17 m. W. Flanders, 8 m. N. T. Ypres, 1 m. N. Y., opposite Commines, the two places being connected by a drawbridge. The manufactures consist chiefly of ribbons, tape, book-binding, handkerchiefs, muscans, other cotton stuffs and tobacco. It possesses likewise bookbinders, dyeworks, tanneries, and oil mills. In the 16th century this was a fortified place, and had a castle in which the famous Philip de Commines was born. Pop. 3504.

COMO (Lazio) a town in the kingdom of Italy 10 m. Milan cap. dep. L. name. 3 m. N. W. Milan S.W. extremity of Lake Como is a delightful valley encircled by hills the slopes of which are covered with gardens, and wild olive and elms groves. Although the first view of Como is exceedingly beautiful and the scenery around of surpassing beauty it is surrounded by irregularly built the streets are narrow dark and filthy and the buildings heavy and dull. It is surrounded by double walls, with towers, in the former of which are four lofty gateways. fine specimens of the military architecture of the Middle Ages. It was further protected or commanded by the once strong castle of Burdello, the ruins of which still occupy the summit of a steep and lofty hill. Although the city proper has few attractions to boast of the suburbs, particularly that called Borgo Vico which stretches along the lake have many including numerous magnificent palaces of the nobility and various handsome public buildings. The suburbs in which the various manufactures are carried on are the Borgo di St. Agostino. Como has 11 churches amongst which are the cathedral a structure of the middle ages the exterior of which is covered with white marble and the church of St. Fedele still older and likewise a rather remarkable edifice. It has also a library, erected by the French with a library of 50,000 volumes and an extensive collection of philosophical apparatus an astronomical college, three gymnasia two female seminaries, a hospital workshop, orphan asylum and several other charitable institutions a cabinet of natural history and botanical garden a theatre and an amphitheatre the former a fine building with a good facade. A handsome casino or literary club house has been lately built. It has manufactures of silk, velvets, taffetas, stockings, gloves &c., also of woollen cloths, cotton yarn, hats and soap. A considerable trade is carried on in rice and manufactured silks, with Switzerland and Italy by the lake. There are metal foundries and marble quarries in the vicinity from the latter of which an excellent statuary marble is obtained. Como is a bishopric, the seat of the provincial council, of civil criminal, and commercial tribunals and was at one time a principal seat of the inquisition. The climate is exceedingly agreeable, though it is in many to the Alps sometimes dull. The environs of the city have always been remarkable for their propensity to a wandering life, and are to be met with all over Europe having telescopes, mirrors, spectacles, har-

monies, &c. The inhabitants also have been from a remote period, famous as muses, travelling the country as such, and doing so to this day. Como was a place of importance under the Romans, having been rendered so by a colony of Greeks sent there by Julius Caesar when it obtained the name of *Vomus Comens*. It is the birthplace of Pliny the younger a statue of whom stands in the centre of the gothic facade of the cathedral with bas-relief alluding to his writings. Pop. (1807) 24,083. — The **LAGO DI COMO**, 824 sq. m. bounds N. with the Swiss canton Ticino and W. with **LAKE**. It is spontaneous in the N. part, being covered with effects of the Lepontine Alps. It has fine pastures, and yields abundance of grain, fruits, cutaneous wood, and silk also a small quantity of wool and a considerable quantity of butter cheese and ricemats. Alabaster gypsum, slates, flint, and building stone, are wrought and cloth linen, silk, firearms, paper strings for musical instruments soap and wax candles, are manufactured. It is divided into 26 districts, and 680 comuni. Under the French it formed the department of **Lario**. Pop. 170,033.

COMO (LAKE) Pop. (Italian, *Lago di Como* and *Lar* is *Lacno*, a celebrated lake, Italy, 40 m. N. of Milan at the foot of the Lepontine and Albic Alps, 10 m. N. of Lecco. It is formed chiefly by the river Adda, which enters at its N. end and leaves at its S. extremity forming its only outlet. Its greatest length which is from the city of Como to **LAKE** the former at its S. the latter at its N. extremity — is about 95 m., following its windings. At **LAKE**, about 15 m. N. E. Como, the lake throws off a branch in a S. E. direction which passes **LAKE** and terminates in the outlet of the **LAKE**, and is altogether about 15 m. in length. The lake being thus divided into three arms is sometimes distinguished by three different names — that portion of it extending from Como to **LAKE** being called the **LAKE** of **LAKE** that from **LAKE** to **LAKE** the **LAKE** of **LAKE** and that from **LAKE** to the outlet of the **LAKE**, the **LAKE** of **LAKE**, so named for a similar reason. The broadest part of the lake which is at **LAKE**, is about 3 m. Its general breadth however decreases to 2 m. and the greater part of it is much less. Its depth varies from 40 to 600 ft. Besides the **LAKE** it receives the waters of the **LAKE** and other less considerable streams. The scenery around the lake is singularly beautiful and picturesque, the banks throughout its whole extent being formed of steep and lofty mountains, 3000 to 4000 ft. high in many places clothed with wood, and studded with villas and cottages. The spot from which this fine sheet of water is seen to most advantage is **LAKE** where, as already mentioned it is broadest and from which a view of the three branches is commanded. Each of these seems to have distinct attractions. Those of the **LAKE** of **LAKE** are its villas villages and its cultivation. Those of the **LAKE** of **LAKE** its native picturesque beauty and those of **LAKE** its size and rugged grandeur. Trout, eels, pike, perch, salmon, and other aquatic birds abound in or upon the lake and sea-gulls are frequently so numerous, that from their Latin name *Larus* it is ancient name of the lake is said to be derived. The younger Pliny had several seats on the border of the lake but their sites can not now be identified. Amongst the modern mansions is that of the **LAKE** of **LAKE**, once the property and residence of Queen Caroline of England who gave it the name it bears. The lake is traversed in all directions by steamers, by which all the principal places on its shores may be visited. The climate around the lake is mild and salubrious.

COMO an Indian Archipelago, Florida Sea, between the islands of Flores and Kombo, and forming, with the latter, the Strait of **LAKE** (N.E. peak) 8° 22' S. lon 119° 35' E. (N.) It is high about 45 m. long N. to S. and 22 m. broad.

COMO, a in W. Africa, Bonny, r. bank Niger. It is of considerable size and situated about half a mile from the ferry across the river 50 m. F. by N. Kama. lat 9° 45' N. lon 8° 7' E.

COMORIN (Carn) [cape of the Vireni] the S. extremity of Hindostan lat 8° 5' N. lon 77° 30' E. (N.) formed of a circular low sandy point not discernible at above 13 or 16 m. distance from the deck of a large ship. To the W. the shore is sandy and barren but to the E. abounds with trees. Immediately adjacent to the cape the beach is covered

with the rough grains of disintegrated granite, which a native tradition asserts is a kind of lapidified rice, and accounts for its transformation by stating that a king gave once a marriage feast to his daughter at this place, that the bridegroom, having failed to appear at the appointed hour the disappointed bride cursed the feast, of which an enormous quantity of rice formed the principal part, and that thereupon the said rice became grains of granite, as it now lies on the beach fifteen miles N from the cape is a lofty isolated mountain

CAPE COMORON. Seen near Colinet. From Decker's View in 1881

leading to a rounded point at the summit it, called Comorin Peak forming a very striking and picturesque object. Its peak is in lat. 8° 28' 12" N. lon. 77° 30' 30" E. n.

COMORIN (German *Komoren* Hungarian *Komorom*) a royal free town Hungary cap. cards of same name, at the confluence of the Waag with the Danube about 48 m. W N W Pesth. Its streets are narrow and irregular. It contains four Roman Catholic churches one Greek church, two Protestant places of worship, and a synagogue. The other public buildings are, a townhall, a consular house, some large warehouses, two theatres, a Roman Catholic and Protestant gymnasium, a Roman Catholic head school, and an hospital. Its fortress the ramparts of which extend along the margin of the Danube to the end of the promontory at which the Waag joins it, is considered one of the strongest in Europe. It was a principal point in the military operations during the recent rising in Hungary. The Danube is crossed below the town by a flying bridge, and a bridge of boats. There are large manufactures of woollen cloth, tanneries, &c. also an extensive trade in wine, timber, fish, grain, honey, &c. The wine produced from vineyards in the neighbourhood is of good quality. In the vicinity excellent coal is obtained. Pop. (1846) 17,900 exclusive of the garrison.

COMORO ISLANDS, a group, Indian Ocean, lying midway between the N. point of Madagascar and the E. coast of Africa. They are four in number and called respectively Comoro, Mohila, Mayotta, and Johanna (which are, they are all very high, and may be seen at the distance of from 50 to 90 m. The inhabitants are Mahometan descendants of Arabs, incorporated with Africans, and are now generally found to be courteous and hospitable although they were by no means so formerly. A British consul has recently been appointed for these islands. — **COMORO** (Great) or **ANGWITA** the principal and most N. of the group, is in the form of a parallelogram, about 36 m. in length N. to S. and 15 to 20 m. in breadth lat. (N. E. point) 11° 19' 30" S. lon. 43° 33' E. (E.) It is composed of ranges of mountains which near the centre of the island, unite in one common summit, from 6000 to 5000 ft. high. Its entire appearance thus resembling an immense mountain rising in the middle of the sea. It is said to retain no water in its earth being volcanic, though abounding in cocoa-nuts, with the milk of which the natives are frequently obliged to satisfy the thirst of their cattle and they never drink any other beverage themselves. The anchorage at this island is inconvenient. Excepting at the N W end, the coast is generally steep, though having no soundings at a small distance from the shore. Bellocks, sheep, goats,

Vol. I

and tropical fruits are plentiful but no water to be procured. The inhabitants speak Arabic, and profess Islamism. 1 pop. 30,000.

COMPETA a tn. Spain Andalucia, prov. of and 36 m N E Malaga. It is well built, and possesses a church town hall prison two schools, and several fountains. The inhabitants are engaged in distilling brandy expressing wine and oil, tillage and cattle-rearing. 1 pop. 2763

COMPIANO (anc. *Compiognus*) a tn. and com. Italy south of and 35 m S W Parma, 1 bank, Taro. It is tolerably well built, surrounded by walls, entered by three gates and commanded by a castle on an adjacent hill. It also possesses a church, primary and medical schools and extensive iron-works. Trade cattle, grain and fruits. Pop. 5385.

COMPIEGNE (anc. *Mediolanum Compendium*) a tn. France, dep. Oise, 34 m E by 8 Reims, 1 bank, Oise, 1 m below the junction of the Aune. It is agreeably situated between a forest and the Oise, which is crossed by a handsome bridge of three arches. The streets are irregular and the houses badly built with exception of those near the castle, and those on the Place d'armes. It has two good chur. es. a Gothic Hotel de Ville, modern theatre, and some small colleges but the principal edifice is the royal chateau, built under Louis XV. from the designs of Gabriel. It has all the magnificence of a palace and is one of the finest structures of the 17th in France. The gardens are extensive, and well laid out. Napoleon embellished this chateau and spent much of his time in it and here on March 27 1810, he received Marie Louise, arch-duchess of Austria, his affianced bride. The forest of Compiègne occupies an area of more than 3000 ac. and contains some fine oak timber. Compiègne has a national art and manufactures of commensal c. Here and public library with 28,000 volumes manufactures of a steel cordage, harness, sabots and turneryware. Boats are built here and a trade is carried on in coal, wood, hemp and grain. Before its walls, once strong but now raised the Mard of Orleans was made prisoner. It was in possession of the Eng. from the early part of the 15th century till they were expelled by Charles VII. Pop. 8106.

COMPTSTALL a vil. England on Chester 5 m E Stockport. The inhabitants are largely employed in the cotton manufacture, and in extensive coal mines in the neighbourhood.

COMPTÉ D'ANTOIN an anc. dist. France which belonged to prov. Provence and extended beyond the Durance as far as Tarascon. It now forms part of dep. Vaucluse. For a long time the portion of it occupied by the town of Avignon the burgh Marseilles, and the parish of Montfaucon, was under the sway of the Popes.

COMBIE a par. and vil. Scotland on Perth. The parish about 12 m long by 10 broad abounds in beautiful scenery. — The village, 64 m W W. Grief, is a burgh of barony and contains the parish church a handsome structure, with a spire free and 1. Presbyterian churches a parochial school and library and has a distillery a woollen-mill and some cotton weaving. Earthquakes have frequently been felt here. The

remains of several deserted temples may still be seen in the parish. Pop. of vil. 803 per 1865.

COMBÁN, a tn in France dep. Aude, 4 m N N E. Narbonne in the middle of a flat ridge, r. bank, Aude. Pop. 1010.

COMBAT ENAHAM (anc. *Comitatus F. d'Aloua*), a small prov. France formerly dependent on that of Provence, and now included in it. Along with the portion of Comté de Vaison noticed above it formed an independent state of which till the revolution of 1793 the Pope had the sovereignty. Its capital was Vaino.

COMBÁN or **COMOR** a river Scotland co. Ross, rising in Loch Clouck, and after an E. course of 35 m. falling into the upper end of Cromarty frith, near Dingwall. Its tributaries are the Garra, Mear and Orrin. It is an excellent trout stream and its salmon fisheries are very valuable. — **COMAN** (Hindoo), a vil on the banks of the Lotus $\frac{1}{2}$ m S. Dingwall. Lij 34.

COMBÁN a maritime subdivision Hindoostan, pres. Bombay prov. S. Varanagad, Poona, and Belapur. It is supposed of a strip of coast bounded E. by the W. Ghats mountains length, N to S, 900 m. breadth 20 m. and lying between lat. 16 and 20° N. and lon. 73 40' and 74 E. It is divided into N and S Comas, and contains many spots well adapted for cultivation, which yield 1 cemp of superior quality the principal crop rice cocoa nuts, oil seeds, sugar cane, turmeric, and ginger but, in general the surface is very uneven and much intersected by steep, rocky hills.

Towards the W. the country is possessed of great military strength being crossed by hills in numerous valleys and no road will descend from the range of hills in from 100 to 400 ft high and in the W. abrupt and difficult. The place is numerous, but impracticable for wheeled carriages. The table land on the E. is nearly as high as many parts of the mountain range, and is intersected by deep rugged valleys covered with jungle. There are many rivers in streams in the district, but no river of any importance. Along the coast are numerous small bays and harbours, extremely shallow and commercially of little value, excepting that of Bombay. A great part of N. Comas was formerly held by the Portuguese who divided the land into large estates, and gave them in European words which wealth is attested by the remains of many superb buildings both public and private which they then erected and which are now standing in the midst of what at present are a mere waste. In 1817 and 1818 both N. and S. Comas came into possession of the British the former by cession, and the latter partly by conquest. N. Comas comprehended 48 pergunahs, containing 111 vils. S. Comas 4 pergunahs and 231 vils. Pop. 12,200.

COMBARNVAL [*Little Cornwal*] a seaport tn. France dep. Finistere, 12 m S.E. Guimper on a small island, bay of La Forêt. The hill is only 400 paces long and 120 broad. It can be approached at low water on the W. side on the E. channel there is a ferry. — The town is surrounded by thick stone walls with a projecting parapet, and is walled at regular distances. It contains some very old houses, and the ruins of a Gothic church. The suburbs are more extensive than the town, and in general better built. The port can receive vessels of 500 tons and has good anchorage but is dangerous from the promontory of the Ploer rocks about 200 boats, belonging to this place, are engaged in the herring fishery. The quantity taken is from 12,000 to 30,000 barrels, according to the season and the tingers from the coast of Yenne carry off as many more to the ports of Nantes, La Rochelle, and Bordeaux. Besides pilchard, and other fish the town exports cedar wood, and grain and imports salt, wine, spirits, and Norway deals. Pop. 3024.

COMBÉLLO several places Brazil, particularly — 1. A tn prov. Ceará, r. bank, Palma, 60 m S.W. Natalista dep. 1. $\frac{1}{2}$ m 45° 5' W. It commenced at one time to become an important place, in consequence of the discovery of gold mines on the banks of the river. Some adventures took possession, and erected a church. But the mines proving unproductive were soon abandoned, and the inhabitants are now chiefly employed in cultivation. Pop. 3000. — 2. A vil. prov. Alagoas, 1 leuc, Curupiti, about 4 m. from the sea, and at a short distance from Poum. It contains a church, which attracts numerous visitors at its annual festival and has a

convenient, though shallow harbour at which there is some trade. The district near the sea is sterile but inland is fertile. — 3. (de Serro) a tn prov. Espírito-Santo, on Mount Mestre Alvarez about 16 m N.W. Vitória. It contains a parish church. Pop. almost entirely agricultural, 1500. — 4. (de Serro) a tn prov. Minas-Geraes about 48 m S.W. Bello or Villa do Principe. It consists of two parallel streets with rather more than 300 houses, all of them in a ruinous state. Mines of iron were long worked in the neighbourhood and extensive iron works were established. But the mines have almost ceased to be worked and the population which chiefly depended on them has rapidly diminished. Pop. 8000.

CONCEIÇÃO D'ITAMARÁ See ITAMARÁ.

CONCEIÇÃO (ANNUAL DE) or **CONCEIÇÃO** a small vil. Brazil prov. Goiás, 110 m S.W. Natalista, in a hollow between two small hills. It consists of two long streets, and contains two churches, one of which is in ruins. The soil for about 3 m. round the village has been all turned over in search of gold, which was formerly found in considerable quantities, either in minute particles, or in grains of all sizes, some of several ounces weight. The search for gold does not now repay the trouble though there are said to be rich veins in the solid rocks in the vicinity and a mine so productive that a bucket of soil yields nearly an ounce of gold but owing to the ignorance of the natives of the most ordinary mechanical contrivances neither of them are wrought. — (Vander's Brazil).

CONCEIÇÃO, a tn Spain, Valencia prov. of and 28 m N. Alicante on a slope of the Sierra Manola. It is surrounded by ancient walls flanked by 14 towers entered by a great gate and crossed by a strong castle. Roman constructs at which, though of later date than the walls, is of high antiquity. The streets are numerous clean and paved and the town possesses 10 squares, two parish churches, town and session houses, two schools an hospital, prison, storehouse, cemetery theatre, several convents, with churches attached and an extensive palace of the Duke of Medinaceli. Manufactures — linen woollen and beaver fabrics, soap, paper tiles and bricks all white and brandy. Trade — cattle, grain, fruits and wool. An annual cattle fair one of the best in Spain is held in the market. Pop. 7000. — **CONCEIÇÃO** a prov. Chile lying between the Itata and Biobío between the parallels of 36° and 37° 30' S. and the meridians 70° and 71° W. area, 5210 sq. m. It has a delightful climate, and a fertile soil producing in great abundance grain and various kinds of fruits. The vines of this province were formerly much esteemed but have greatly deteriorated. At inferior kind of soil is also found in great abundance. Pop. 102,000.

CONCEIÇÃO or **CONCEPCION** LA VERVA **CONCEPCION** or **CONCEPCION** a port, Chile cap. also a prov. 270 m S.W. Santiago, r. bank Biobío 7½ m from its mouth. lat. 36 40' 30" N. lon. 73 5' 30" W. (a) It is the seat of a bishop and of a military command of the district and of the forts along the Biobío, and contains a college a seminary and some other literary institutions. Its port at Falchano, a small fortified town on the bay of Concepção about 8 m. distant is one of the best in Chile. The bay forms an extensive and excellent roadstead and is shut in by the island of Quiriquina, on either side of which is a channel. Trade in grain hides, tallow and woolen stuff and in the vicinity of Pisco is an important coal mine. In 1848 the vessels entered were 243, tonnage 32,941 — cleared 340 tonnage 1706. In 1847 the numbers were entered 258 tonnage 30,942 — cleared 206 tonnage 64,994. In 1846 the imports in British vessels amounted to £156,800 exports, £1,800. In 1847 the amount was, imports £39,440 exports, £31,040. The number of British vessels arriving and departing in those two years was four and five, respectively. Concepción was founded 1550 by Pedro Valdivia, on the S. side of Concepción bay. In 1554, 1555 and 1593 it was taken and burnt by the Araucanians, and on often rebuilt and in 1730 it was destroyed by an earthquake, and a great part of it swallowed up by the sea. It was again destroyed by an earthquake in 1851 after which the town was rebuilt on its present site. The Araucanians again devastated a portion of it in 1823 and in 1825 when its population was about 20,000 a terrible earthquake laid it in ruins. It has since partially recovered, and has now a pop. of about 10,000.

CONCEPCION four tis La Plata. —1 A tn. Cordova. Pop. 2000.—2 (or *Ville-Réal de la*) a tn Paraguay cap. dep. of same name and on 1 bank Paraguay 185 m N N E. Assumption. Pop. 1800.—3, (*del Arroyo de la China*), a tn. Entre-Ríos, r bank Uruguay 197 m N W Monte Video. Pop. 8500.—4, a tn. Encarnación near bank, Uruguay 180 m W by R. Corrientes.

CONCEPCION two towns Bolivia.—1 A tn. prov. Tarija, or Tarija, 240 m. S E Chiquitos, is a fertile country producing extensive wine. Pop. 2000.—2 A tn. prov. Chiquitos, 145 m N E Santa Cruz de la sierra, in an elevated district, containing mines. Pop. 2200.

CONCEPCION.—1 A tn. New Granada, on the frontier of Costa Rica, 70 m W S W Chaguaná, on the Caribbean S. near the mouth of a small stream of its own name.—2 A tn. Venezuela, 151 m S E Caracas, on the Maracaibo about 87 m above its embouchure in the Orinoco.

CONCEPCION DE LA VEGA REAL or *LA VEGA* a tn Haiti dep. of the N. E. 70 m. N E San Domingo near an extensive, fertile and well watered plain called Vega Real it is very regularly built, and lies 3 m W the ruins of the old town of Vega Real founded by Columbus, and completely destroyed by an earthquake in 1664, before which event it was the most flourishing town in the island and possessed a mint. Pop. 5000.

CONCEPCION BAY a large inlet, coast of Newfoundland land, between Trinity Bay and St. John's. Its entrance between Cape St. Francis on the E. and Flamboin Head on the W. is intersected by the parallel of 47° 0' N and the meridian of 53° 30' W. It extends inland 58 m from Cape St. Francis, and has an average breadth of about 20 m.

CONCHAGUA an Indian tn. civil and port, Central America, San Salvador on gulf of same name. The town is situated 3 m up the Amapala Mountain an extinct volcano. The Indians by whom it is inhabited are rather a well-formed race and of a light cast of countenance and slender persons than their neighbours. The site of the port which is so completely land-locked as to resemble an inland sea, is in the N W hook of the gulf in lat 10° 14' N lon 87° 35' W. It is badly chosen there being at all times great difficulty in landing while at low water it is nearly impossible. During strong N winds the communication is frequently cut off for days, independent of mud-bolting ground for shipping. The town also called Ponce, has an entrance about 20 m wide having N W point Candaville and S E point Cosguina, inside it extends to 50 m N W to S E with an average breadth of about 25 m. It is enclosed by the land on all sides but at its entrance. It has a considerable number of islands, and is the recipient of several rivers.

CONCHERA, a tn. France, dep. Eure 10 m S W Evreux r bank, iron manufactured by the ruins of an old castle. Agricultural implements and such as manufactured here. There are also tanneries, potteries iron foundries, forges, and furnaces, with some trade in iron and potteryware. In the neighbourhood there are four mineral springs. Pop. 162.

CONCHOSO a river Mex. co rising in dep. Durango, and after a N course of about 300 m through that department and Chihuahua, joining the Rio Bravo del Norte in lat 30° 30' N lon nearly 104 W.

CONCOBE a vil. Switzerland can and 14 m S E Neuchâtel on the banks of Lake Neuchâtel. Its famous good wine is produced and yellow marble is found. Pop. 570.

CONCORD several places, N America, particularly a tn. U. States, cap. New Hampshire on both sides the Merrimack, 70 m N W Boston lat 41° 11' N lon 71° 31' W. It consists chiefly of two streets on the r bank of the river which is here crossed by two bridges, nearly 3 m apart. It contains five commodious and handsome churches, a state house and state prison of brown granite an academy and twenty-eight schools. In 1823 the courts were removed from Portsmouth, and are now held here. By means of Concord river the Middlesex canal and a railway it communicates with Boston the centre of its extensive trade. Manufactures—hardware, cutlery woolen fabrics and paper filling, and several grist and saw mills tanneries potteries, &c. Pop. 4897.

CONCORDIA.—1 (*Concordia di qua*) a tn. Austrian Italy gov. of, and about 84 m N E. Venice r bank, Livenza. It contains a cathedral a parish church and a sanctuary was

a place of some note under the Romans, but is very much decayed. Its name of di qua is given to distinguish it from a village depending upon it in the neighbourhood, and called Concordia di là. Pop. 1830.—2 A tn. duchy Modena, called of, and 18 m N N E. city of Modena, r bank, Secchia. It is a well built town and has several important fairs. Pop. 2000.

CONDAMINE a large river Australia, New S. Wales having its sources in the mountain-ranges of Murrumbidgee about lat 28° 55' S from which point it flows N N W subsequently bends round to the S W is joined by the Lugoon afterwards by the Marano, and lastly disappears without presenting any definite termination.

CONDAMILLY a tn. and extinct citadel Hindostan the latter being now comprehended in the Meerut district col. lectionship. The town is the seat of the citadel is situated on the l bank of the Kutumb lat 16° 37' N lon. 80° 38' E. 40 m N W Meerut. It is now in a state of decay.

CONDATCHY a vil. and bay at Ceylon on the N coast, 20 m S Manar the most central rendezvous of the boats employed in the pearl fishery.

CONDE, several places, Brazil particularly—1 A tn. and seaport, prov. of and 80 m N E Bahia, at the mouth of the Inhambupe. It contains a parish church and a primary school and has some trade in sugar tobacco and mandarin. It is produce of the surrounding district. Pop. 2000.—2 A tn. prov. of and about 20 m S Paraíba in a plain between the small rivers Japoguama and Japcon. It contains a parish church. The inhabitants of city of Indian extraction, are engaged in cultivating the fields and in making mats and other articles from a kind of straw obtained from a lake in the province called Içorup. Pop. 800.—3 A tn. prov. of and 22 m S W Içorup, r bank Tocantins. It stands upon a kind of island formed by the river the Rio and the Aguapé Vira, a canal forming a communication between them and contains a parish church. Its inhabitants, chiefly Indians are very indolent.

CONDE a tn. France, dep. Nord 7 m N N F Valenciennes at the confluence of the Mayne and Scheldt, whence a canal leads direct to Mons. It is well built well laid out, and has a handsome Hotel de Ville, a superb arsenal and a school for the defence of the town. Its fortifications were constructed by Vauban. It has manufactures for starch and sherry establishments for refining oil and salt, bleach, a grounds mill and rope-works tanneries dyeworks, and a trade in coal cattle &c. In 1794 it was besieged and taken by the Austrians after a long and vigorous defence retaken by the French after the battle of Fleurus, and again taken by the allies in 1815. Pop. 5504.

CONDÉ SUR NOTRE-DAME a tn. France dep. Calvados, 25 m S. W. Caen at the confluence of the Norman and Drouven. It owes its origin to an old fortress and has been constructed by the Romans. The houses are generally old heavy and tasteless. The only public buildings of note are two old churches, containing some fine stained glass. There are here manufactures of cotton goods nails and cutlery spinning mills, tanneries, and dyeworks, with some trade in flax thread, horses cattle, iron &c. It was one of the first towns in France that embraced the Reformed religion, and in 1574 a Protestant provincial synod was held here. Pop. 5485.

CONDÉS YOG a dist. Peru dep. Arequipa extending from the N E boundary of Bolivia to Cananea on the W and intersected N E. to S W by the Val de Mena. The high grounds, although exposed to great cold are well adapted for pasturage and in the valleys wine, grain and cochineal are produced in abundance. The gold mines here are not so productive as formerly. Pop. 20 146.

CONDICOT par. Eng. Gloucester 890 ac. Pop. 174.

CONDINO a vil. Austria, duchy Tyrol circle of, and 21 m W Rorernsdorf cap. dist. of an o. county on the Berca. It contains a church a Capuchin monastery and has an iron work. Pop. of dist. 9466.

CONDOM a tn. France, dep. Gers 25 m N N W Auch agreeably situated on a height, at the foot of which flows the Baïse, here crossed by two stone bridges. It is for the most part old and ill built, but is improving. In its centre is a large square containing the parish church formerly the cathedral a noble gothic edifice but dilapidated. It is the

ness of a tribunal of first resort, commercial college, and of an agricultural society and has manufactures of quills, cork, porcelain, woolen yarn, leather and brandy. A considerable trade is carried on in grain, flour, wine, and brandy. Condom was formerly the capital of an extensive district called the Pays de Condoms. Pop. 353.

CONDOMORIE a former dist. in France in the old prov. Gasconne but now comprised in the depts. (Here, Landes and Lot-et-Garonne).

CONDOUR, an isl. Malak. See KONKOR CONDOUR.

CONDOUR, par. Eng. Salep. 1422 ac. Pop. 1753.

CONDOUR, par. Eng. Salep. 1422 ac. Pop. 1753. CONDOUR, a town in France, dep. Rhone, 21 m. S. Lyons, r. bank, Rhone in a fertile district, producing excellent white wine. The vines are said to have been brought from Dalmatia by the Romans who had a station here. Many of the inhabitants are engaged in the difficult navigation of the Rhone, at which they are said to be particularly expert. Great numbers of the vessels used on that river are constructed here. There are manufactures of black silk, leather, cask, dyeworks, and a salt-refinery. Trade—grain, staves, hoops, &c. A large cattle market weekly.

CONDOUR, a town in Austrian Italy gov. of and on a hill slope, 28 m. N. Venice. It is the seat of the district government, has several churches, and an hospital and some manufactures of silk and of woollen cloth. Marshal Moxey derived his dual title from this town. Pop. 6400.

CONDOUR, a small uninhabited isl. Mediterranean, forming the highest of the Cabrera group, about 6 m. from Cape Palma, on the E. coast of Ivica. Its length, N. N. E. to S. S. W. is about 1 m. It takes its name, *Concepcion* (Comer) from the number of rabbits which swarm upon it.

CONDOUR, a small uninhabited isl. Ireland, co. Wick, and 5 m. W. W. Sligo in Sligo Bay 1½ m. long by half a mile average breadth.

CONDOUR, par. Ireland. 1129 ac. Pop. 163.

CONDOUR, a kingdom of Italy Piedmont div. of and 9 m. S. W. Novara. Pop. 139.

CONDOUR, a town in France, dep. Haute Savoie, at the confluence of the Arvi with the Isere opposite L. Hospital and 22 m. N. E. Chambery. It has a church, a college, and two convents. River ore is obtained in considerable quantities from the lead mines in the immediate vicinity. It was formerly a fortified place, but was taken and dismantled by France in 1816. Pop. 1500.

CONDOUR, a town in Naples, prov. Calabria Litt. 8 m. W. Nicastro. Lint and silk are here cultivated to some extent. Pop. 2000.

CONDOUR, a town in France, dep. Charente 36 m. N. E. Angoulême, r. bank, Vienne, here crossed by an iron bridge. It lies in a sterile district, and is ill built. It has manufactures of leather and a good trade in staves, hoops, timber, cattle and grain. It has a tribunal of first resort, commercial college, and an agricultural society. Pop. 2389.

CONDOUR, a par. and post tn. Ireland, co. Galway 22 787 ac. The town 21 m. N. W. by N. Galway is situated on an island formed by the several open arms of a subterranean river flowing from Lough Mask into Lough Corrib. It consists of two principal streets, and has an established church, a R. Catholic chapel, a school, two large mills, and an ancient abbey and to have been the residence of Eudoric O'Connor the last native king of Ireland, for the last 16 years of his life. He died in 1192 aged 87. Near to the town is one of the finest limestone quarries in the kingdom. Pop. 6425 of in 519.

CONDOUR, a river U. States, S. Carolina, formed by the junction of the Broad and Saluda rivers at Columbia, and after a S. E. course of 30 m. uniting with the Wateree to form the Santee.

CONDOUR, par. Eng. Leicester 1080 ac. P. 298.

CONDOUR, a market tn. and bor. England, co. Chester and a station on the N. Staffordshire Railway on the Dane, in a deep valley 23 m. E. Manchester. The town though presenting an antique appearance many of the houses being of timber framing and plaster is clean and respectable well lighted with gas, with its projected vicarage purely paved and purely macadamized while in the immediate vicinity are a number of most detached houses and gardens. It has three Established churches, several dissenting meeting-houses, and a R. Catholic chapel a grammar school, other public and

private seminaries, an infant school several Sunday schools, a mechanics institute, a museum news-room and library and a number of benevolent and charitable institutions. Congleton was early distinguished for the manufacture of gloves and leather lace called *Congleton points* but these have been long superseded by cotton and silk manufactures, the latter now forming the principal trade of the town, and the only remaining cotton-mill being about to be converted into a silk mill. The inhabitants are chiefly employed in silk throwing and spinning besides which wauwats and ribbons, of a very superior description, handkerchiefs, and various other articles, are manufactured. Parrell, the poet, was a native of Congleton. Pop. 10,520. (Local Correspondent).

CONGO a territory in S. W. Africa, discovered by the Portuguese navigator Diogo Cam, in 1482. By the Portuguese the name was applied to the whole tract of coast country extending from Cape Lopez, lat. 0° 38' N., to Cape Negro lat. 1° 40' 42' S., now known under the names of Loango, Congo, Angola, and Benguela. Congo, as now understood is a comparatively limited and little-known tract lying S. of the river Congo or Zaire, and bounded S. by the Dande, its closing in all about 110 m. of coast. Its cap. is St. Salvador or Boma-Congo the residence of the dominant chief.

CONGO or Zaire, a large river in S. W. Africa having its embouchure in the B. Atlantic, lat. 6° N. long. 12° 40' E. Of its origin and affluents hardly anything is known but according to the accounts of the natives, it issues from an extensive marsh about lat. 2° 10' N. long 17° 30' E. although M^{rs} Queen is disposed to think that its source is considerably further N. At its mouth it is 10 m. wide, a little higher up it diminishes to 7 and at 140 m. from the sea, narrow commences and continues for 40 m. through which space the river is not generally more than from 400 to 600 yards wide, and mostly confined between lofty rugged rocks, where tremendous falls and cataracts occur, and below where it begins to expand are fearful whirlpools. Above the narrows, for about 100 m. the river again expands to a breadth of 2 1/2 m. and even more than 4 m. flowing with a current of 2 or 3 m. an hour. Immediately off its mouth, Captain Tuckey found no bottom with 150 fathoms of line, the velocity of the stream varying from 2½ to 5 knots an hour. Thirteen m. less from the entrance the water is perfectly fresh of a dingy red colour, it ferments in a few days, and remains for some time in a highly putrid and most disgusting silver grey but it afterwards becomes perfectly clear and colourless, and deposits no sediment. The race of the Congo at its highest flood, as towards its mouth, about 12 feet, and every third and fourth year it is said to rise to a greater height than it does in the intermediate years. The banks on either side are low and swampy principally covered with two different kinds of mangroves—one a low bush the other a stately tree, there are also vast kinds of palms two of which bear fruit, one of them poisonous. The natives here are perfectly black, but their noses are not quite so flat, or their lips so large, as among the generality of negroes, the clothing consists of a single wrapper of dun grass or cloth round the loins and umbrellas appear to be the emblems of rank. They wear numerous charms or fetiches in which they place great faith.

CONGONHAS-DE-SABARA (ARRAIAL DE) an irregularly built mining vil. Brazil prov. Minas-Gerões, about lat. 16° 50' S. long. 43° W. It lies near the mine of Morro Velho, wrought by a British company and is chiefly inhabited by those connected with the mining operations. It has 3 churches, one of which has never been finished, and is now falling into decay. Pop. 3000. (Gardner's Travels in Brazil 1834-41).

CONGONHAS-DO-CAMPO a tn. and par. Brazil prov. Minas-Gerões, on a river of same name, about 16 m. W. Queluz. The greater part of the houses stand in the form of an amphitheatre on the r. bank of the river and the church occupies the most elevated portion of a public square. A college established here enjoys a high reputation, and in the neighbourhood are mines of iron employing 5 furnace. Pop. 8000.

CONGREGHOT a river Central America Guatemala, prov. Hernandez, flowing N. and falling into the Caribbean sea, about 55 m. W. by S. Truxilla. A few miles above its embouchure is a singular peak, of same name, 7500 ft. high.

CONGRESSURY a par and vil Englon to Bomer set 4445 ac. The village, 11 m. S.W. Bristol is intersected by the Yeo, and from the delightful scenery around has a most attractive appearance; the houses generally small and old-fashioned, but comfortable and remarkably clean. It has a parish church a Wesleyan chapel 3 schools, and an old cross in the centre of the village. The inhabitants are chiefly employed in agricultural labour. Pop. 1258.

CONGOON a seaport, Florida, U.S.A., on the Panama Gulf, and 130 m. S.E. of St. Marks. Its roadstead is said to be good and to have deep water but the whole coast in its vicinity is in possession of piratical Arabs. Pop. 6000.

CONVI or **CUNEO** a to kingdom of Italy esp. d v and prov Coni on a high hill at the confluence of the Stura and the Cezzo, 46 m. S. Turin. It is surrounded by a single wall, and has two gates. The principal street has arcades throughout its whole length and displays a series of handsome shops. The other streets are mere lanes. The town contains 5 churches 4 monasteries, 3 convents an hospital an orphan hospital public baths, and a royal college. There are also some silk spinning-mills, and manufactures of various kinds of silk and woollen goods. The position of this town is highly favourable to trade as all the merchandise passing from the support of Nice to Lombardy Switzerland and Germany goes by this route. Grain, hemp, and silk produced in the neighbourhood also form articles of commerce. Two fairs are held annually. Coni is the seat of a bishop and of a court of first resort. Pop. 18 777.

CONIHA a to Turkey in Asia. See **KONIK**.
CONIL, a to and small port Spain, Andalusia, prov of and 22 m. S.E. Cadix, 4 m. W. Cape Trafalgar on the Atlantic. It possesses 3 squares a parish church, chapel of ease, town hall prison publichouse 3 schools, a cemetery and several fountains of mineral and other waters. The people are chiefly occupied in tillage, cattle-rearing, fishing and fish-curing. Grapes, fish, fruits, &c. are exported in barrels. It exports sheep hardware, earthenware wine, &c. important Pop. 2549.

CONINGSBY par Eng Lincoln 5660 ac. Pop. 2225.
CONINGTON two para Eng 1 Cambridge 1477 ac. Pop. 285—2 Huntingdon 3069 ac. Pop. 319.

CONIBROUGH a par and vil Eng W. Riding York 4107 ac. The village, of high antiquity is picturesquely situated on a lofty elevation about 6 m. S.W. Doncaster overlooking a rich and wooded country and has an ancient church. In its vicinity are the ruins of a Saxon castle, one of the principal scenes in Sir W. Scott's novel of *Ivanhoe*. Pop. 1651.

CONISCLIFFE a par and vil Eng Durham 8006 ac. Pop. 461.

CONISHOT par Eng Lincoln 1195 ac. Pop. 138.
CONISTON LARK a small lake, England co. of and 20 m. N.W. Lancaster 6 m. long by $\frac{1}{2}$ m. broad and about 27 fathoms deep. It abounds with char and the scenery on its banks is picturesque. The romantic Coniston Falls at its N. extremity contain little quarries and copper mines.

CONJEVERAM (CAVEMURRA the Goido City) a to Hindoostan, Carnatic, 48 m. S.W. Madras lat. 12 49' N. long. 79° 41' E. It stands in a valley is irregularly built, and from 5 to 6 m. long resembling rather a series of villages, intermingled with gardens and cocoa-nut plantations, than a town. There are here two splendid pagodas one dedicated to Vidya Ganga, richly sculptured, and highly venerated by the Hindoos the other a larger and more imposing structure, dedicated to Shiva, from the summit of which a magnificent view is obtained. There are many smaller pagodas and shrines, or houses of accommodation for travellers abound. Red handkerchiefs, turbans, and cloths adapted for native dresses, are manufactured here. The town is surrounded by a hedge of the American aloe, a plant formerly much used in India as a defence against sudden incursions of mounted bandits. A school here connected with the Free Church of Scotland Madras Mission is (1851) attended by 309 pupils.

CONKAIR or **KONKAIR** a to Hindoostan, prov Gundwana, at the foot of a rocky hill bank Mahamuddy 157 m. S.E. Nagpur. It is surrounded by hills inhabited by wild Gond mountaineers, and the country in the neighbourhood is for the most part covered with lofty woods.

CONKE a riv Hindoostan rising in the S. slope of the Margon mountains, and forming the boundary between Nepal and the territory of Sikkim. It flows S. enters Bangal, and joins the Malanand 20 m. E. Purneah after a course of about 150 m.

CONN (Lough) a lake Ireland co. Mayo, between Castlebar and Ballina about 10 m. in length and 3 to 3 m. in breadth. Its lower extremity called Lough Calan is separated from the main body by a narrow channel spanned by a bridge called the Pontoon.

CONNA a vil Ireland, co. Cork, 5 m. W.W. Tallow on the Bide. It has a R. Catholic chapel and the ruins of a castle, burned in 1653. Excellent salmon and trout are caught in the Bide. Pop. 220.

CONNAUGHT one of the four provinces of Ireland comprising the most W. and barren portion of the island bounded E. and N.E. by Leitrim and Ulster S. E. Munster and N. and W. by the Atlantic. Length N. to S. 112 m. breadth P. to W. 39 m. area, 4 329 043 ac. The W. coast is much broken up by numerous bays and inlets and is thinly studded with islands. It is also extremely rugged and mountainous, and abounds in magnificent and picturesque scenery. The central parts are comparatively low and of limestone formation, while the surrounding mountains are formed of sandstone clay-slate granite, and quartz. A large proportion of the province is bog and generally it is the least fertile of all the provinces. In 1843 the number of acres under crop was 583 431 of which 398,41 were corn and beans, 74 352 potatoes and other roots 109 018 hay and clover and 1818 flax. The Irish language is still prevalent in this province and so also are poverty and ignorance. The poverty is of the most deplorable kind and that its ignorance is not less is shown by the fact that, a few years since, the most respectable bookseller in the province had also watches, hosiery and potteries, being unable to make a living by book-selling alone. Connaught was formerly a kingdom of the Irish Princes. It is divided into 6 counties, of O'Connor. It is divided into five counties—Galway Mayo, Roscommon, Leitrim and Sligo.

CONNECTICUT one of the smaller of the N.E. U. States N. America between lat. 41° 14' N. and lon. 72° 35' W. leaving E. Rhode Island W. the state of New York. N. Massachusetts and S. Long Island Sound length E. to W. about 30 m. greatest breadth N. to S. about 72 m. area 46 144 sq. m. It contains several distinct ranges of hills but none of them have any great elevation. Its principal river is the Connecticut, which divides it into two nearly equal parts and is navigable for 60 m. for pretty large vessels the other rivers are all noted as the Housatonic and the Thames both of which are also navigable for 12 to 17 m. up their respective streams. The coast is indented with numerous bays and creeks, which furnish many harbours—some of them excellent. Its minerals comprise iron copper lead coal, platinum, marble, freestone porcelain-clay and coal. Some of the mountains, particularly Green Mountain range, are supposed to be rich in minerals. The climate is healthy though subject to extremes of heat and cold on the sea coast it is particularly variable. In winter the winds are cold and piercing. The soil is generally good, particularly in some of the valleys, where it is extremely fertile and very easily tilled. It is, however, on the whole, better suited for grazing than tillage, abounding as it does in fine meadows. But its agriculture is practical, the soil is well cultivated, and produces ample crops of Indian corn rye wheat, oats, barley buckwheat and potatoes, some pumpkins, turnips, peas beans, &c. Fruits also are cultivated with great success particularly apples. A large proportion of the farms are fenced with stone walls. Cattle, horses sheep, butter and cheese, are produced in large quantities.

The estimated amount of crops of the several kinds of agricultural produce in Connecticut in the year 1850 was—

Produce	Barrels	Produce	Barrels
Wheat	41 793	Maize	1 991 043
Oats	30 448	Rye	800 888
Green Soots	1 185 733	Potatoes	2 666 731
Barley	289 197	Indian Corn	1 167 384

There were produced besides the above—butter 6 498 119 lbs. cheese, 5 363 377 lbs. and wool, 497 454 lbs.

The manufacturers of Connecticut are considerable they consist chiefly of woolen and cotton goods, metals, paper, wooden clocks, hats and caps, saddlery and other leather manufactures, pottery, glass houses, machinery hardware, cutlery soap, tail w and wax candles bricks, gunpowder, carriage, with tanneries, and numerous flour, grain, and saw mills. The exports of Connecticut consist principally of beef, pork, horses, cattle, mules, butter, cheese, Indian corn, rye, flax seed, fish, wooden clocks, candles, and soap. In 1852 the total foreign exports amounted to \$101,335 and the imports to \$119,254. Tonnage entered 80,880 cleared 37,444 total tonnage belonging to the state 125,068, of which 25,999 was engaged in the whale fishery 6764 in the cod, and 1554 in the mackerel fishery.

The principal religious denominations are Congregationalists, Baptists, Episcopalian, and Methodists. There are three colleges in the State, 127 academies and grammar schools, with 4663 students, 1619 common and primary schools, with 65,753 scholars. Connecticut is divided into eight counties and it possesses two capitals, Hartford and New Haven, in which the legislature meets alternately. Besides these it has four other cities—New London, Middletown, Bridgeport and Norwich. The government is vested in a governor, lieutenant-governor who is president of the senate, and in a senate and house of representatives. The senate consists of not less than 16 and not more than 24 members. Most of the towns elect two representatives, some of less population only one. The supreme court consists of five judges, appointed by the legislature during good behaviour or until 10 years of age. The judges hold separately a court twice a year in each county and all the judges together hold one court annually in each county.

The state at first consisted of two colonies—Connecticut with its seat of government at Hartford and New Haven and New Haven. The colony of Connecticut was settled in 1633 by emigrants from Massachusetts. Hartford was settled by English in 1636, the Dutch having previously built a fort there. The colony of New Haven was settled by English in 1637 and the two colonies were united in 1636 by a charter granted by Charles II. The present constitution was formed in 1818. Pop. 1860 330,911. See U.S.

CONNECTICUT a river U States the W branch of which runs by Trent the boundary between the U States and Canada so lat. 45° N. It rises in the high lands, on the N border of New Hampshire and after a S. by W course of 410 m. through a fine country and past numerous flourishing towns discharges which it forms the boundary between Vermont and New Hampshire, passes through the W part of Massachusetts, and the central part of Connecticut and falls into Long Island Sound. It is navigable to Middletown for vessels drawing 10 ft. water and for vessels drawing 8 ft. it is navigable to Hartford about 40 m. from its mouth. Above this the navigation is impeded by rapids and falls which however may be passed by canals formed alongside the river. By means of small steam tow boats, the river may be navigated by boats of 10 or 12 tons (160 above Hartford). The town situated is famous for its shad fishery, but salmon which were formerly abundant, are no longer to be found in it.

CONNECTICUT [the Bays of the Ocean] a dist. Ireland co. Galway occupying its W portion. It is about 50 m. in length and 10 to 20 m. in breadth. It consists chiefly of mountains and bays, interspersed with numerous small lakes, presenting some wild and interesting scenery. Its coasts are indented by arms of the sea and bays innumerable. It is subdivided into Connemara Proper in the W, Jarlov in the N, and Joyce country in the E.

CONNOR, a par. and vil. Ireland co. Antrim, 1,136 ac. The village, 18 m. N. W. Belfast, forms almost a suburb of Belfast though once a walled town. It gives its name to the barony of Connor united now with that of Down. Pop. par. 243 vil. 242.

CONQUON or **CONQUON** (MIEBA) a mountain range British Columbia, extending for 30 m. in a N. E. direction from parallel 5° N. through which the Rappahannock has forced a passage of about 200 ft. wide. Its peaks, in many cases, rise to an average height of 7000 to 8000 ft. It is of granite formation, well wooded, and inhabited by a numerous tribe of Indians.

CONON a river Scotland. See CONAN.

CONONICUT an isl. U States, Rhode Island, in Narragansett bay 8 m. long by 1 broad. On its S. end is a high house with a fixed light.

CONQUET (Lis) a vil. and port, France, dep. Finistère 12 m. E. Brest. Its harbour is capable of receiving small vessels, and its roads are secure. Pop. 1290.

CONRY par. Ireland, Westmeath, 3607 ac. Pop. 403.

CONSECA or **CONSECA** a vil. in Upper Guinea, 150 m. E. S. F. Free Town, Sierra Leone. Pop. 20,000.

CONSEGUINA (anc. Quignau) —1 A volcano, Central America, Nicaragua, on a promontory S. side of Conagua, or Fonseca Gulf and about 10 m. from the Pacific. The verge of the crater which is half a mile in diameter is elevated about 3800 feet above the mean level, thence the interior walls fall perpendicularly to a depth of about 800 ft. The last eruption of this volcano occurred in January 1835 when a large tract of country in the immediate vicinity which had been previously covered with the richest pasture, and abounded in fine oaks, was converted into a dreary and desolate waste. Not a vestige of its former verdure remained in its noble trees stood blackened, bleached, or scorched others of the largest forest kind were uprooted and strewed in wild disorder —2 A point W. from above volcano forming the S. entrance p. m. of Conagua or Fonseca Gulf lat. 16° 53' N. lon. 87° 17' W. (N.)

CONSPICUO, a, in language of Italy, design of and J. m. S. R. P. 300.

CONSOLE, a, an Austrian Italy, Gov. Venice prov. of and 13 m. E. Padua. It contains 6 churches is the seat of several public offices and has a refinery of saltpetre 1888.

CONSOALIM (CONSOALIM) or **ST. ANTONIO**, the most E. point of Brazil it is in prov. Pernambuco lat. 8° 21' S. lon. 34° 30' W. (N.) It was discovered by Pinzon January 21, 1500 and was the first point of Brazil seen.

CONSTANCE, (CONSTANCE) or **CONSTANCE** (anc. Constance) a city Baden, cap. circle of same name or Circle of the Lake, beautifully situated, S. bank Lake Constance, on the narrow passage which connects that sheet of water with the Rhine. It is 73 m. E. by N. Basel and 95 m. N. N. E. Bern. It is well built and surrounded with high walls, flanked by towers, with a ditch in front. Its fortifications being in the old style give it a town at once an antique and interesting appearance. Nor is this effect lessened by a nearer inspection, many of the streets and houses being of the 14th century and remaining unaltered since that epoch. The town is connected with the opposite shore of the lake by a long wooden cable bridge, resting upon stone piers, which leads to the suburb of a steeplehouse the ancient ramparts of which it is when converted into public walks. There are other two suburbs called respectively the Kramling and the Paradies the latter consisting chiefly of gardens and orchards. The principal buildings of the town are the number 1, a 16th century structure, begun in 1652, the nave is supported by 16 pillars each composed of a single block. In this cathedral the spot is pointed out, on which Huss stood, when sentenced to be burned to death in 1415, he was marked by a plate of brass let into the floor and there are many other interesting relics in this venerable structure. A fine view of the lake, mountains of Tyrol and valley of the Rhine, is obtained from the tower. The palace of the bishop is another fine specimen of Gothic architecture. There are also, the church of St. Michael built in 131 and the old townhall. The Franciscan convent Huss first prison is in ruins and has second place of confinement the 16th century monastery is now a cotton factory. The house in which the martyr suffered previous to his imprisonment, is also pointed out, as is likewise the place where the stake at which he suffered was planted in a field outside the town. The Kaufhaus or merchants hall built in 1838, contains the hall in which the famous council of Constance was held from 1414 to 1418 by which Huss and his brother reformer Jerome of Prague, were condemned to death. There are here several excellent educational institutions, including an establishment for the instruction of poor girls also a lyceum a gymnasium, hospital, a theatre, and several collections of objects of art and science. The commerce and manufactures of Constance, which declined first from the period of the Reformation till lately are now reviving. The manufacture of cotton cloth yarn, and silk

fabrics, cloaks, and musical instruments is considerable. There are also several saw mills. The chief occupation of the inhabitants however is in the cultivation of vineyards and gardens, in the navigation of the lake, and in its fisheries. Constance is one of the oldest towns in Germany. It was formerly a free Imperial town but fell under the ban of the empire in 1548 and in 1549 was annexed to Austria, which ceded it to Baden in 1810. In the 15th and 18th centuries the population was between 25 000 and 30 000. It has now decreased to 6600 mostly R. Catholics.

CONSTANCE (LAKE OF) [*anc. Lacus Brigantinus*; German, *Bodensee*; a lake Central Europe, forming a common centre in which Switzerland, and the territories of Baden Württemberg Bavaria and Austria meet. It lies between lat 47° 28' and 48° 00' N and lon 9° and 9° 48' E. length N.W. to S.E. 40 m. greatest breadth about 9 m. area 200 sq. m. greatest depth which is between Friedrichshafen and Konstanz, 954 ft. = 293 m. above sea level. As its N.W. extremity the lake divides into two branches or arms, each about 14 m. in length, the N. arm is called the Überlinger Lake, after the town of Überlingen, on its N. bank the S. branch the Zellersee or Untersee in which lie situated the fertile island of Reichenau belonging to Baden about 9 m. long and 1½ broad. The Rhine enters the lake at Reichenau at its N.E. extremity and leaves it at St. Gallen, at its S.W. terminus. Various small rivers empty themselves into the lake, the waters of which are of a dark green hue, and very clear are subject to sudden rising, the cause of which are unknown. In 1770 it rose in one day from 20 to 74 feet above the ordinary level. It freezes in severe winters only. It is frequented by numerous aquatic birds, and contains a great variety and abundance of fish including salmon salmon trout, pike and carp. The traffic on it is considerable, although its navigation by sailing vessels is rendered dangerous by shallows and violent squalls. Steamers ply on the lake between Constance and various points on its shores. The banks are either flat, or gently undulating and are not remarkable for picturesque beauty, but they are a fertile, and are covered with corn fields orchards and gardens, interspersed with ruined castles and other remains of the Middle Ages and with numerous towns and villages producing altogether a very pleasing and striking effect.

CONSTANTIA a in Cape Colony S Africa 9 m. S. Cape Town E. and at the foot of a mountain of its own name. It is celebrated for its wine, which, after Tokay is esteemed one of the best liquor wines. The plants from which the grapes are obtained were brought from Sicily, 11 years.

CONSTANTINA a in Spain Andalusia, prov. of and 82 m. N.W. L. Seville in a mountainous district traversed by a branch of the Sierra Morena. It is large, industrious, and improving contains five public squares five hospitals, a parish church church-house an ordinar and a founding hospital, two primary schools a nursery and almshouse and has manufactures of leather and soap, several distilleries and flour-mills and a trade in corn flour wood and wine (p. 608).

CONSTANTINE, a prov. and city Algeria, N. Africa. The province occupies the E. portion of Algeria, extending over considerably more than a third of the entire territory and therefore much the largest of the three provinces into which it is divided and is at the same time also the most populous. It is watered by several streams the largest of which fall into the Mediterranean Sea. Country to an extent which very generally prevailed till lately that Algeria had little mineral wealth to boast of the province of Constantine has been found unusually rich in that department comprising stationary marble, asphalt, gypsum salt, iron, lead, copper and antimony. —The city of Constantine cap. of above prov. stands on a lofty rocky peninsula, 1968 ft. above the level of the sea, and is accessible on one side only being on

all others built by a ravine of 80 ft. in breadth, and of great depth, at the bottom of which flows the Rummel. It is about 207 m. E. by S. Algiers; lat. 36° 30' N. lon. 6° 28' E. It is nearly 2700 yards in circumference and is surrounded by

CONSTANTINE.—Bab el Bhar, Constantinople

walls in which there are five elegant gateways constructed by the Arabs but chiefly of Roman sculptured stones. The streets are paved but narrow tortuous and dirty the houses are of brick generally of three stories and all built most of them resting on large square blocks of stone the remains of ancient foundations and are covered with sloping tiled roofs. They are without towers and having low doorways, like like prisons. None of the mosques or public buildings are calculated to attract much attention with exception, as regards the latter of a handsome recent stone bridge, as yet unfinished, across the city and the palace of the Sultan. The city was the French Govt. house, which is yet to be remarkable for its tower or decorations than for its external appearance. The city and its environs abound in Roman remains though many of these in the former have been cleared away by the French. The manufactures of Constantine are coarse kerchiefs consisting of cloth and other woollen stuffs, ironware, and articles in leather particularly saddlery boots, shoes &c. The trade chiefly exports is in corn linen and wax. The city is the chief port of import and export in Algeria.

Constantine occupies the site of Cirta, which was in ancient times a great city and capital of the kings of Numidia. It was ravaged in the year 811 but afterwards re-built by Constantine whose name it took. It took of the fortunes of Algeria in succeeding times till the occupation of the province by the French in 1830. Constantine stood a siege in 1836 as it held out till October 14 1857 when it was taken by assault. Pop. (1861) 78 500. (See Kurr.)

CONSTANTINE, a par. and vil. England on Cornwall 8179 etc. The village is situated on a gentle declivity 6 m. by N. Heston consists of an irregular and ill kept stone houses indifferently built, all of stone, some slated and others thatched. It has a church a Wesleyan chapel and a parish school. No manufactures and little trade. Occupations — agriculture and mining. Pop. 201.

CONSTANTINOPLE [*Turk. Stambul*; Greek, *Isambul*] a celebrated city Turkey in Europe cap. of the Turkish Empire lat 41° 0' 15" N. lon 28° 55' 15" E. (N.) pleasantly situated on an undulating declivity on a series of gentle hills at the E. extremity of a triangular promontory of the province of Bithynia, having the sea of Marmara and the Bosphorus on the S. and E. and the Golden Horn a inlet of the latter of about 6 m. in length on the N. It is thus surrounded by water on all sides, excepting the W. and has a sea front altogether of about 8 m. in extent. Taking the form of the ground on which it stands, the city is also triangular in shape its apex projecting into the Bosphorus and its base, a lofty double wall of 4 m. in length stretching across the promontory from the Sea of Marmara to the Golden Horn. Each of

the akies may be about 33 in length, and within these limits the whole of the city proper is included. On the opposite side of the Golden Horn, and also occupying the extremity of a promontory sometimes called the Peninsula of Pera, are situated the extensive suburbs, *Yakla*, *Pera*, and *Tophana*, walled on all sides, but those along the Golden Horn and Sea of Marmara the N. and S. sides of the city respectively are in a ruinous state, and in many places are altogether disappeared. The inland or W. wall is a magnificent specimen of mural architecture containing six gates, though also dilapidated in parts, could be easily restored. The streets are extremely narrow, dark, dirty and ill paved and so crooked and tortuous that hardly any two of them run for any length parallel to each other, the whole seeming one vast and inconceivable labyrinth of filthy lanes. The houses are generally low and ill built consisting of wood, earth and in some cases of rough unhewn stone, the latter forming the foundation and rising to the height of 8 or 10 ft. on which is reared a superstructure of wood, supported on curved beams which rest upon the masonry. A flat projecting roof surmounted by a cupola which commands a view of the distant country covers the whole. The windows are strictly closed with lattice work of cane in the centre of which the wife of the Turk excluded from public view endeavours to see what is passing in the street. The city is supplied with water by public fountains, which are very numerous and some of them extremely beautiful having pure white marble facades, elaborate arabesque ornaments and Chinese roofs. The principal squares or squares are in the centre of an open space or square, the most remarkable amongst its most remarkable

Constantinople, all of them less or more distinguished by grandeur and beauty but the most remarkable are the royal mosques of which there are about 16 esteemed the finest in the world of these, the largest and most splendid is that of *Soliman*, situated on the E. side of the city and standing in the midst of a large square surrounded on all sides by an arcade upon pillars of granite and marble. Next to it in extent, but of much

MOSQUE OF SULTAN AHMED, CONSTANTINOPLE.
The interior of the mosque.

older date, is the mosque of *St. Sophia*, near the E. extremity of the city the pattern of almost every mosque in the land; its walls and domes of which last it has 20 of equal dimensions, springing from the same level and sustained by 12 huge columns, are encrusted with mosaics, forming various figures and devices. The court or open square in which it stands is paved with marble and shaded by fine plane-trees. This is the most ancient existing Christian church having been only converted into a mosque in 1453. It has been recently thoroughly restored by an English architect, by order of the Sultan, and the interior of plaster removed by which the superb mosaics and frescoes that decorate its walls were covered. The mosque of *Yeni Djanli* known also as that of *Sultana Valide* was built by the mother of *Mahomet IV.* and is considered one of the most magnificent in the capital. It stands almost on the edge of the port, and this point being the ferry between *Galeta* and *Stamboul* is constantly thronged with boats. Here almost every French first lands in the City of the Faithful. The mosque is constructed of white marble, and has two peculiarly elegant minarets enclosed by no less than three galleries of richly perforated workmanship. The principal dome rests upon four lesser ones, which appear to lift it to the clouds. Another celebrated mosque is that of *Sulzan Achmet*, a little S.E. from the former. From the elevated position this building occupies, it is the most conspicuous object in the city when viewed from the *Sea of Marmara*. The minarets are of great beauty and ascend to an immense height. All the other mosques are much less in size than those described, but very much resemble them in plan, and other features. All of them are enriched by a splendid colonnade of marble, or Egyptian granite,

structures. They are huge covered excavations, the roofs of which are supported on numerous marble columns and in a regular and unvaried style it is said to be, to descend to the brink of the water and look through the maze of columns till the eye is lost in the dark and seemingly interminable labyrinth.

Mosques.—There are about 200 mosques altogether in Con-

or serpentine, and have massive and highly ornamented gateways and porches, and handsome courts and cloisters for ablution.

Seraglio.—On the extreme N. E. point of the promontory on which the city stands, called Point Serai, is situated the Seraglio or palace of the Sultan, having the Bosphorus in front, and the Golden Horn on the left, commanding a magnificent view of the opposite shore, including the beautiful town of Bosphorus, and its cypress-covered hills. The Seraglio, with its garden and grove, includes a large space and is washed by the sea for two thirds of its extent. Having been enlarged and altered at various periods, according to the taste or caprice of the Princes and Sultanas, it now consists of a conglomeration of buildings, clustering together without order or design. Its apartments however are spacious and richly furnished. At the principal entrance is a large and lofty gate, called Babi Humayun, the high door or sublime porte, from which has been derived the well known diplomatic phrase, all political business being transacted, as supposed, under this portal. Within the precincts of the palace is the celebrated *Dewan* and the *Harem*, with the Garden of Delight, in which are numerous gorgeous parterres and pavilions the latter as bright with painting and gilding as the flowers which blossom on every side, while clusters of roses bloom in baskets of gilded silver-work, and fountains mirror under the deep shadow of overhanging boughs. Near the Seraglio there is a battery of heavy cannon, the fire of which is happily confined to rejoicing days.

Bazars Synagogs, Institutions, &c.—The bazars of Constantinople are numerous but in no way very remarkable. Some of them are covered, others open. The covered bazars have a somewhat mean appearance, resembling a row of booths at a fair, but the arrangement and manner of exposing the gay and glittering wares is sufficiently attractive. The

usually so crowded, shabby by India, that it is difficult to pass through them. Constantinople has but one remarkable square, called the *At-Medani*. It occupies the site of the ancient Hippodrome ("horse-course") a place at one time of great splendour having been ornamented with marble colonnades, and surrounded by seats like an amphitheatre. The present area is an irregular quadrangle about 200 yards long by 150 wide containing some obelisks which belonged to the ancient structure, one of which, of granite is composed of a single piece 50 ft. high. There are about 180 public baths in the city mostly of marble, of plain exterior but handsome and commodious within with every accommodation and appliance requisite. They are divided into a number of circular rooms lighted from above, and sufficiently spacious to admit a number of bather at the same time. There are a vast number of coffee-houses and lodging-houses, called *Khanes* dispersed throughout the city. The latter amounting to nearly 900 in number resemble immense stone barracks or closed squares. They are intended for the use of strangers during their temporary sojourn in the city who may have here an apartment, with commodious of the key in which they may deposit their property and live themselves in perfect security without any further charge than a small present to the servant at departing.

Constantinople has several charitable institutions, though some of them presently resemble those of Europe in principle or management. The most remarkable are the *asneras* (or kitchen) of the poor. At these places, bread &c. and meats are distributed every day to such poor persons as have been furnished with a ticket by the trustees of the mosque, or the imam of the quarter. Each *asnera* supports from 2000 to 3000 persons. There are, besides, large buildings having spacious and airy rooms appropriated to the reception of the poor and infirm with gardens attached for their recreation. There are also a military hospital and a public hospital for lunatics each with its own, besides having one for its own use. There are 85 public libraries in the city either in connection with the mosques and colleges or apart, as distinct institutions none of them containing less than 1000 manuscripts and some more than 5000.

The numerous cemeteries scattered all through Constantinople, but mostly in its vicinity outside the western wall is among its greatest ornaments. From their antiquity they have become vast forests, extending for miles round the city and its suburbs. The people of every creed have distinct quarters allotted to them. The tombstones of the Turks are of white marble. Coffins are not used when the body is deposited in the grave but thin boards are placed over it to prevent the earth from pressing on it. A marked feature of the improving civilization of the Turks is shown in the large and commodious barracks with well ventilated apartments for the accommodation of the soldiers and an internal economy conducted with order and regularity. Schools, likewise, are attached to each where young men are prepared for the military service. There is also a military college, where 300 students are lodged, fed, and instructed gratuitously for the army. The total number of elementary schools in the city is said to be above 1000. 18 summaries, attached to mosques for the study of law and theology with 1800 pupils, maintained by the Sultan numerous *madrasas* a kind of free schools a school of mathematics and navigation.

Trade and Commerce.—The few manufactures of Constantinople are chiefly confined to articles in steel arms, morocco leather saddlery tobacco pipes, fan caps, &c. but its foreign commerce is considerable. The harbour or golden horn which more resembles a large river than a harbour is deep commodious, well sheltered, and capable of containing 1200 large ships, which may load and unload alongside the quays. It is about 6 m. long and little more than half a mile broad at the widest part its general breadth, however does not much exceed a quarter of a mile; at its entrance it has a width, from Seraglio Point, or Point Serai, to the opposite shore of about 1000 yards. The horn is usually crowded with vessels and light boats, and presents a lively bustling scene. Among the annual imports are about 2000 tons coffee, 1,200,000 lbs. sugar, 500,000 lbs. pepper and spices, 3000 muscovado rum, and large quantities of low-priced cotton manufactures. The other articles of import are corn, tree timber tallow and fur from the Black Sea and Russia, cotton stuffs, and yarn,

THE GREAT BAZAAR, CONSTANTINOPL
After M. de la Harpe.

principal or *Grand Bazaar* consists of long avenues covered over with lofty arches of brick lighted by apertures in the roof, and branching off in different directions. The ceilings of the vaults, and various parts of the walls are ornamented with painted flowers and devices. On each side of the passage are counters and stalls, with a wide passage between them, and on each counter sits the merchant generally smoking his pipe or chibouck, with his crossed legs drawn under him. The bazars both the open and covered, are severely allotted to particular trades and merchandise they are generally

wooden, silk, metallic goods, watches, jewellery, furniture, dyes and drugs from W. Europe, and wax, copper, gums, drugs, and porcelain overland from China. The exports consist of silk, carpets, hides, wool, goats hair, potash, galls, yellow berries, linseed, madder, valonia burs. The imports from Britain, in 1842 were estimated to amount in value to £1 35 6½.

Social Condition.—The social condition and every-day life of Constantinople presents some curious phases. The streets are generally dark and deserted, all bustle and animation being confined to the bazaars. Many of the houses have no windows at all towards the street, but only a long narrow dingy door and where there are any they are latticed and closed. Till 1844-45 there were no lamps or lights of any kind in the streets, neither were the latter named, nor the houses numbered. All this, however, is now remedied. Towards evening the coffee-houses are much thronged, but at sunset the Turks retire to their homes, and do not go abroad till next day. Constantinople is but indifferently supplied with public means of conveyance, the chief one being the calques or wharries, the number of which plying on the waters has been estimated at 80 000. They may be hired like cabs or hackney coaches in a European city are extremely light, elegantly constructed, and move with great rapidity, but are crank and dangerous unless due caution is used in entering them and in maintaining a steady position after being seated. There are besides the calques a class of large and heavy boats that ply regularly between the city and the opposite shores. Omnibuses have been recently introduced besides plying on the thoroughfares, they run also to Adrianople.

The dogs of Constantinople form an important feature in all descriptions of the Turkish capital. They are extremely numerous, setting as the city scavengers, feeding on the garbage thrown into the streets and prowling along the edge of the water in search of the carcases of men or beasts that may be thrown ashore. They are the property of no individual, being supported by the whole community and their litter are never destroyed. Each dog belongs to a district of his own, and should any one trespass on the territory of another he is immediately driven off by the dogs that occupy it. No Christian is allowed to reside permanently in the city proper all foreigners, therefore including the ambassadors from the European courts, reside in the opposite promontory on which Galata stands. The climate of Constantinople is variable and the temperature especially in winter and spring subject to great fluctuations snow and hard frost alternates with mild weather. Mean temperature of the year 56° 8' of winter 46° 8' of summer 71° 2' F.

GALATA (Galata) is the largest of the suburbs of Constantinople, is the principal seat of commerce and the usual landing place from the sea of Marmora. It is here that the merchants of all nations go to their stores and counting houses. Here too are situated the arsenals, the dockyard, the artillery barracks, the Government docks, warehouses, rope-walks and workshops extending along the shore of the Bosphorus for nearly 1½ m. It is an ancient city and was strongly fortified.

PAZAR (Pazar) occupies the more elevated portion of the promontory of which Galata forms the maritime part. It is separated from the latter by a wall with gates, which are closed at night.

TOPKAPAZ (Topkapaz) is situated a little further up the Bosphorus than Galata of which it forms a continuation. Here is a Government foundry and arsenal for cannon the two words top-kapaz signifying a cannon repository and a spacious quay the usual place of embarkation for Scutari and the villages on the Bosphorus.

Constantinople occupies the site of the ancient Byzantium. It was originally founded by Byzas, A.C. 666 and rebuilt by Constantine A.D. 325 who gave it his name. No city in the world has been so long so much frequented and celebrated except and no other has undergone so many vicissitudes of fortune. Yet it has only been taken twice, namely in 1504 by the Crusaders, who retained it till 1511; and by the Turks, under Mahomet II. May 29 1453—an event which completed the extinction of the Roman empire in the East. The population of Constantinople is uncertain, but would appear to be somewhere between 400,000 and 700,000 including the suburbs, composed of Turks, Armenians, Greeks, Armenians, Jews, and Europeans.

CONSTITUTION (La) a small maritime in Chili prov. of and at the mouth of the river Maule, 162 m. S.W. Valparaiso. (Add. See Note.)

CONSTITUCION or **PIRACARABA** a town and par. Brazil prov. of and 120 m. N.W. São Paulo, on a beautiful plain near a bank Piracaras, the navigation of which is here interrupted by a cataract. It contains a parish church. The district around is covered partly with magnificent forests, and partly with rich pastures. On the latter vast herds of cattle are fed. Pop. 2500.

CONSUEGRA a town, Spain New Castle prov. of and 35 m. S.E. by S. Toledo overlooked by an ancient castle built by Trajan. It has three squares, two parish churches, two townhouses, a prison three schools, some convents, the ruins of a Roman amphitheatre, an aqueduct, and a palace of the grand prior of the knights of St. John. Weaving dyeing, expressing oil and wine and husbandry occupy the inhabitants. Pop. 4643.

COINTAT a town, Hindostan presid. Bengal lat. 21° 49' N. lon. 87° 44' E. on a hill about 5 m. from the sea. It is considered extremely unhealthy during the rainy season.

CONTAMINER, a vil. France, dep. Haute Savoie, prov. Faucigny a bank Arve 10 m. S.W. Chamouat at the W. foot of Mont Blanc. Pop. 690.

CONTANAGUR, a town, Hindostan, presid. Bengal lat. 21° 44' N. by E. Moorshadabad, lat. 25° 44' N. lon. 88° 45' E. It was formerly a place of some note and still contains one of the finest Hindoo temples in Bengal, but is now in other respects, in a state of utter decay.

CONTARINA a town, Austrian Italy prov. of and 23 m. S. Venice, a bank I. C., which here forms the boundary between the Austrian dominions and the Papal States. It has a suburb, a parish church and several oratories and a weekly market. Pop. 2860.

CONTAS, or **JUMBALIA**, a riv. Brazil prov. Bahia, which rises in the Serra da Tromba, about 24 m. N.W. the town of Rio-de-Contas flows E.S.E. on a fall after a direct course of 2½ m. falls into the Atlantic a little below the town of Barra do-Rio-de-Contas.

CONTESSA or **ONTESSA** (Gulf of) [anc. Syngomonas] an inlet of the Adriatic, on the E. coast of European Turkey in Roonella sandjak of Salouci. It is 2½ m. wide at its entrance, between the peninsulas of Mount Athos, on the S.W. and the island of Thasos on the N.E. and extends inland for about 50 m. It contains the Gulf of Isauria and oil or smaller bays, receives several rivers and on its N. shore has the ruins of the ancient town of Contessa, not far from which is situated the modern town of Orphanos.

CONTESSA a town, Italy 25 m. S.W. Palermo, near an affluent of the Belice. Pop. 3000.

CONTHEY a par. and in Switzerland can. Valais, 3 m. W. Sion, on the Morges, near its junction with the Rhone. A fine sort of wine is produced in the vicinity. Pop. 2253.

CONTICH a town and com. Belgium, 7 m. S. Antwerp. It has manufactures of linen and hats, several corn and oil mills, and a considerable retail trade. Pop. 369.

CONVIN par. Scot. Ross, 35 m. by 30 m. S.W. Pop. 1562.

CONTOCOCK, a river U. States, New Hampshire, its principal branch runs in Chocoma co. and flows N. and N.E. until it joins the Merrimack, to the N. of Concord.

CONTOY or **LOUGHNEED**, an isl. Caribbean Sea, off the coast of Yucatan 16 m. W. by N. Cape Catochu, lat. (N. point) 21° 37' N. lon. 86° 45' W.

CONTRARIETIPS ISLAND in Pacific Ocean one of the Solomon Islands lat. 9° 49' S. lon. 163° 3' E. (N.)

CONTREAN ISLANDS, a group of small islands N. Pacific, S.W. coast Guatemala prov. Yeregu, close in shore, lat. 7° 50' N. lon. 83° W.

CONTRES, a town, France, dep. Loire-et Cher 13 m. S. by E. Blois a bank Loire. It has numerous fairs. Pop. 1817.

CONTROGUERRA, a town Naples prov. Abruzzo Ultra, 15 m. N. E. Teramo, with a custom-house. Pop. 2500.

CONTRONE a town, Naples, prov. Principato Citra, 10 m. S.E. Campagna, 3 m. E. a bank, Calore. In the vicinity are fine gardens, a royal castle, and an abbey. Pop. 2000.

CONTURSI a town, Naples, prov. Principato Citra, on the Sele, 21 m. E. Salerno. It has several springs, and an annual fair. Pop. 3000.

CONTWOY TO or *Evu*, a lake, British N. America, in the country of the Copper Indians, intersected by the parallel of 65° 30' N., and the meridian of 111° 50' W.

CONVERNA a *tu*, Naples prov. of and 18 m. S.E. Bari agreeably situated on a hill. It is the seat of a bishop, and has a splendid a handsome cathedral, several convents, a diocesan seminary, and an hospital. The district produces wine, oil, almonds, flax, and cotton and a good trade is carried on in these articles. The foin district of the town is attributed to the Etruscans. Pop. 8780.

CONVOY a par and vil, Ireland co. Donegal 20,082 ac. The vil. on the Doole, 22 m. N.E. Ballyshannon, consists of one long street, and has three annual fairs. Pop. 4341.

CONWAY par Irel. Donegal 45,453 ac. P. 10,826. **CONWAY CAPE** Australia, N.E. coast, lat. 30° 57' S. long. 148° 54' E. It is the W limit of the S. entrance of Whitunday Passage, and is a steep point, sloping off the eastward.

CONWAY CORNW or *ABERCONWAY* a *tu* and par. horn and par. N. Wales co. Carmarthen, about 18 m. E. N. E. Bangor. The town nearly of a triangular form is picturesquely situated in a back Conway and surrounded with an old wall still in good preservation, 12 feet thick, and furnished with towers and bastlements. The old castle of Conway erected in the 13th century by Edward I. is one of the most magnificent structures of the kind in England. Many parts of it are still entire, including the state hall which is 130 ft. long 32 broad and 20 high. There is little trade here, and no manufactures. A few small vessels belong to the port, from which some timber, slate, and lead, are exported. The harbour is dry at ebb tide. A stupendous iron suspension bridge over the river finished in 1826, superseded a dangerous ferry at the same spot. In 1845, another bridge was thrown across the river by Mr. L. Stephenson, for the accommodation of the Chester and Holyhead Railway. It is a wrought-iron tubular bridge, on the same principle as the Britannia bridge over the Menai Strait. The length of the tube is 400 ft. and it is 18 ft. above high water mark. Pop. 1528.

The river Conway rises from two head streams, one in the S.E. of co. Carmarthen, and the other in the S.W. of co. Denbigh which meet about 15 m. S. Conway. The united stream flows N., separates Carmarthen from Denbighshire, and falls into Beaumaris bay after a course of from 20 to 30 m. It is navigable to Llanuw, or about 10 m. from its mouth.

CONWILLAYO par Wales, Carmarthen Pop. 2198. **CONZA**, a *tu* Naples, prov. Principato Ultra, 20 m. S.E. Benevento. It contains a cathedral an archbishop's palace and a diocesan seminary. It was nearly destroyed by an earthquake in 1694. Pop. 2000.

COOCH-BABAR, or *YIMAR*, a principality Hindoostan N.E. extremity of present Bengal, between lat. 26 and 28° 30' N., and lon. 89° 20' and 90° 20' E. greatest length about 60 m., mean breadth about 22 m. area 1802 sq. m. The parts of this principality are fertile, and well cultivated; but those in the N. are low marshy and covered with jungle. The chief objects of culture are opium, cotton, indigo, wheat, and a little barley. The distinctive name of Cooch-Babar given to discriminate between this rajahship and the province of Behar is said to displace the native chiefs who disclaim all connection with the Cooch, and style themselves *Rajahs* or descendants of princes. Many of the Cooch tribes have become Brahmins, while others not only eat pork, mutton, &c., but also dogs, cats, &c. In the Ayzen Akbar of Abul Fazel, the chief is described as a powerful sovereign, at the head of an army of 10,000 cavalry and 100,000 infantry and leaving Assam and the whole kingdom of Camroop under his sway. In 1661 the territory was taken by the Moguls, who destroyed a great number of the temples &c. Along with the rest of Bengal the Mogul rights to this tract of country devolved on the East India Company in 1765, but it was little attended to till 1772, when the rajah applied for protection against the Britons in the collection of Benggore, which he obtained on payment of tribute. In 1818 the tribute being withheld and the country in a state of anarchy and anarchy, a resident British commissioner was appointed by the Governor-General, and a system of active and efficient criminal jurisprudence introduced.

COODONIA, a river N.W. Africa, Soudan, territory Jacobs, rises in a mountainous district, in lat. 9° 7' N. lon.

18° 0' E.; flows first in a N.W. direction, afterwards S.W., and lastly S.E. till it falls into the Niger a little N.W. Egge, lat. 8° 27' N. lon. 8° W.

COOGEE a small seaport in N. New S. Wales, co. Cumberland about 4 m. S. Sydney on a fine sandy bay of the same name, about half a mile in length.

COOK, an island co. N. S. Wales, of an irregular form, 68 m. in length N.W. to S.E. breadth 43 m. area 1,055,600 ac. The soil is hard and rocky, but there are several fertile valleys, and a large extent of table land, from 2000 to 8000 ft. high abounding with picturesque and romantic views. It sends in conjunction with the co. of Hunter one member to the Legislative Council. Pop. 3698.

COOK'S ISLANDS—1 A group of islands, S. Pacific Ocean, between the Friendly and Society archipelagos. The parallel 20° S. passes nearly through the centre of the group.

—2 An inlet, Russian America, a large indentation which penetrates nearly 200 m. into the land, and is about 80 m. wide at the entrance. —3 A strait, New Zealand, the channel which separates the two large islands New Munster or Middle Island, and New Ulster or North Island.

COOK'S LAND or *MOXROW BAY DISTRICT* a maritime territory in E. Australia, New S. Wales, extending from about lat. 28 to 20° S. It seems to be well adapted both for sheep and agricultural farming a copious supply of rain insuring not merely an abundance, but the greatest variety in the indigenous vegetation. Next to the native grass the indigenous timber of Cook's Land is the most valuable of its natural productions. The principal trees of which there is a great variety are the *Ardisia cuneata*, or the Moreton Bay pine, an elegant tree which grows to the height of 150 ft. and the *Amorpha dumetosa*, which attains about the same height, the red cedar &c. and a number of others, that produce either the most durable or the most beautifully variegated woods. Many of these trees yield gums, which might be found valuable in arts and manufactures. The climate and soil appear well suited to the cultivation of the sugarcane, cotton, arrow root, tobacco indigo and other tropical products but it seems doubtful whether the vine would succeed, as the periodical rains of January and February come on precisely at a season when the fruit needs maturing by a hot sun. Rice, wheat, and maize thrive well particularly the last which is always a large and never-failing crop. The English potato and the Indian or sweet potato, are both cultivated successfully. Honey also is obtained here in great quantities from the native bees. The chief town of the district is Brisbane.

COOKBURY par Eng. Devon 2710 ac. Pop. 380.

COOKHAM par Eng. Berks 6509 ac. P. 8914.

COOKLEY a vil England co. Worcester 5 m. N. by E. Kidderminster the seat of long established and extensive iron-works.

COOKLEY par Eng. Suffolk 1704 ac. Pop. 275.

COOKSTOWN a *tu*, Ireland co. Tyrone, on the Ballinlerry 10 m. N. Dungannon. It consists of one long and wide street upwards of 1½ m. long and of another shorter street intersecting the former at right angles. The houses are mostly good many of them handsome and the principal street is lined with trees on either side which gives it a pleasant rural character. and renders it one of the most interesting and prettiest little towns in Ireland. It has a handsome parish church a large and elegant Presbyterian meeting house in the centre of the town and two others in different parts of it several other dissenting places of worship and a large N. Catholic chapel at a short distance from the town a news room a dispensary and several schools. Lunas are named fostered to a small extent. Pop. 2993.

COOKSTOWN par Irel. Meath 1238 ac. Pop. 127.

COOLAGHMORE, par Irel. Wick 3505 ac. P. 1065.

COOLANEY a market in Ireland, co. of and 8½ m. S.W. Sligo containing a Baptist meeting house & dispensary and a court-house in the centre of the village where petty sessions are held on alternate Wednesdays. Pop. 236.

COOLOO, or COOLOO-1 A dist. in N India, between
lat 31° 30' and 33° 0' N and lon 76° 40' and 78° 25' E
having the Himalayas N and N.E. and N.W. the Satlej
S. and S.E. and the Beas W. and N.W. It is extremely
mountainous and the aspect of its hills is peculiarly dreary
and barren presenting nothing but craggy precipices and
sharp peaks, projecting through the scanty soil. The only
cultivation to be seen is adjacent to the petty forts and
villages but hemp pasture is said to be abundant in the proper
season. *Prinsep* observes, *Bahangpur*, near the source of the
Beas lat. 31° 55' N lon 75° 5' E. — 2 A in Hindoostan,
prov Orissa lat. 20° 31' N lon 84° 39' E. 80 m. S.E.
Bambalpur It is a considerable inland mart, the Benar
merchants bringing their cotton to Cooloo, whence they return
to the interior with salt.

COOLCAMP a vil and com Belgium prov W Flen-
ders 11 m. S. Bruges It has two brick works, and four
mills; but the inhabitants are chiefly employed in agriculture
and weaving. Pop. 7001

COOLSTEE par Irel Wexford 3547 ac. Pop 673

COOMASSIE, a large vil. W Africa, cap. of Ashantee,
residence of the Sovereign 130 m. S Cape Coast Castle
situated, according to Dupuis, nearly in lat 6° 51' N lon
2° 16' W. It is built on the side of a large rocky hill of iron-
stone, so of an oblong form, and nearly 4 m. in circuit. Four of
the principal streets are about half a mile long each and from
10 to 100 yards wide. The walls of the houses are formed
of stakes and wattle-work, filled up with clay. All have
gable ends, and ridged roofs, consisting of a framework of
bamboo, thatched with palm leaves. Some have arcades, and
many are highly ornamented with paint and carved work.
The doors are of cotton wood, entire pieces, and occasionally
the flooring is of the same material. The windows are of open
wood work, fancifully carved, painted red, and frequently
cased in gold as thick as cartridge paper. Pop. estimated by
the Ashantees themselves at upwards of 100,000.

COOPANG COOPANG COOPANG, or KOPANG, a tu-
faceous archipelago S.W. coast, at Timor in a bay of same
name. lat. (Fort Concordia) 10° 9' 54" S lon. 123° 30' 45"
E. (s.) It is the principal Dutch station on the island, is
intersected by a shallow stream, and consists of two streets
running parallel to the beach and of about a quarter of a mile
long, crossed by two small irregular streets. The houses
near the sea are mostly small and inhabited chiefly by Chinese,
and consist chiefly of shops and stores, two or three of the
latter belonging to Europeans. There are a pretty spacious
Reformed church, built of brick, a school, and a disappointed
Dutch fort named Concordia and the ordinary force consists of
fifty soldiers, only a fifth part of whom are Europeans. The
ground behind the town runs to a height of 500 ft., and is
partially covered with wood; and on the low lands, behind the
beach, are extensive groves of cocnut trees. Cooping carries
on a good deal of trade, exporting gold mines, sandal-wood,
wax, wax candles, cordage, horses, pigs, and buffaloes and
importing iron, cutlery, beads, cloth, the products of Java and
Celebes Chinese earthenware, tools, iron vessels, mirrors, and
coral. Ships passing frequently call at Cooping for sup-
plies of vegetables and provisions, which are plentiful and

cheap, provided the purchasers can bargain in the Malay lan-
guage. Pop. 5000. — The strait about 15 m. long E to
W by probably half that width, has good anchorage, and is
safe during the S. monsoon and during the W. monsoon
safe anchorage is found a few miles S. from Cooping Bay in
the narrow but deep channel between the S.W. point of the
island of Timor and the small island of Simao, Sanao, or
Samao.

COOPER POIN a headland on the E. coast of Aus-
tralia lat. 17° 20' S. lon. 145° 50' E.

COOPER (PORT) or TOKO-LANO HARBOR, New Zea-
land, E. coast, Middle Island N side Banks peninsula lat.
42° 36' S. lon. 173° 54' E. (s.) A considerable village of
wooden houses has recently arisen here, and an excellent road
formed conducting to the interior. Much pains have been
bestowed on the construction of this road and where walls
were found necessary there was a degree of rivalry in build-
ing them, between the Maori and European laborers, the
former in a short time, equalling the latter in the execution
of their work.

COOPER'S I-1 E, an isl N Pacific lat. 20° 30' N
lon. 150° 50' W

COOPERSTOWN a vil., U States, New York agree-
able situate at the outlet of Otsego Lake, 6½ m. W Albany
It has a court house, jail, five churches and an academy
Pop. 1400

COORIG or KOORIG (Cooig) an ancient principality
Hindoostan among the W Ghats, formerly independent, but
now under the management of a British resident cum com-
missioner between lat 11° 25' and 1° 43' N and about lon.
76° E greatest length about 60 m mean breadth about
35 m. area 2165 sq m The country in general is extremely
rugged and covered with forests, in some parts abounding
in sandal and other valuable woods but in others overrun
with jungle, the resort of elephants at all seasons of prey.
From the moderate elevation of Coorig the climate is temper-
ate and healthy the soil also is fertile, and in many parts well
cultivated yielding in abundance rice, of superior quality.
Great numbers of cattle are reared. The culture of pepper,
cardamoms, and other species is much attended to. The manu-
factures are confined to the apparel of the natives as all their
cotton cloths are imported. Porhapatan was formerly the
capital of the principality but Morara is the residence of
the rajah and the seat of his government.

In 1773 Hyder Ali made the rajah prisoner and took pos-
session of his dominions. This rajah dying in 1773 Hyder
confided his son Hoor Majindra, in 1818 captured, and paraded
out the country into Jaipur, among some petty Mogul
chiefs. After an imprisonment of eight years he was re-
leased, and being joined by all ranks of his subjects, suc-
ceeded in expelling the invaders. Before his death in 1809
he wished to be succeeded by an infant daughter to the ex-
clusion of his brother but she soon died in favour of her
uncle who was at last confirmed in the government by the
British. Pop. 60,000

COOSA a ri or U States, rising in Georgia, and after
a S.W. course of about 240 m through the N.W. part of that
state, and the N.E. part of Alabama, uniting with the Tallapo-
osa, 8 m. below W attempts to form the Alabama. It is
navigable for 8 m. above the point of junction.

COOIMA or KOOIMA, a small volcanic isl. Japanese
Archipelago at the entrance of the strait of Bungar between
the islands of Jesso and Nippon lat. 41° 21' N lon. 139° 46'
E. It is completely barren and uninhabited.

COOBEO or KOBOO a tu. N.W. Africa, Guinea, Yar-
ribia territory N side of the Kong Mountains, lat. 8° 53'
N lon. 4° 45' E.

COOBYA or COOMAL a mountainous country Hindeo-
stan, E. of the Brahmaputra, lying between Bengal and Bur-
mah, formerly part of the latter empire, now an independent
state, under British protection. The inhabitants are good
artificers, and formerly supplied all the gunsmiths of Bur-
mah. The climate is healthy and the country is on this ac-
count, much resorted to by invalids from Calcutta

COOTPHILL, a tu. Ireland, co. of, and 11 m. N.E.
Cavan, on the Cootphill. It consists of four wide streets, is
well built, and respectfully inhabited. It contains a handsome
church, a R. Catholic chapel two Presbyterian meeting
houses, and places of worship for Methodists, Moravians, and

Quakers with a market house, a court-house and a bridge. It has an extensive market for linen. General market, Friday corn market, Saturday skins on the second Friday in each month for cattle, fax and yarn. Pop 2106.

COPAIS, or **TOROLIA**, a lake, Greece, Boeotia, 42 m N W Athens, 47 m. in circuit area 80 000 ac. Its breadth at the S.W. end is about 10 m. but diminishes abruptly towards the N.E. to about 5 m. It is by far the most considerable lake in Greece, and in ancient times was celebrated as still is, for the large size and excellence of its fish much esteemed by the epicures of antiquity and one of the delusions of the Athenian market. Some of these extraordinary sizes were offered up as sacrifices and decried like victims. In Strabo's time the lake had various names, derived from the towns along its shores that of Copais however finally prevailed, as Copai was almost near the deepest part of it. In ancient times, the waters of the lake were drawn off by natural subterranean canals or channels, called by the modern Greeks *Katadromoi* but these having become choked up the vast plain on which the lake in antiquity was inundated and twelve flourishing cities were annihilated by the rising waters.

COI AN a ruined city Central America, Guatemala, 80 m E. Chiquimula, extending for 3 m. along the river of same name a tributary of the Motagua. Its remains described in *Stephen Central America*, contains numerous specimens of the architecture and art of the ancient Americans including the walls of what appears to have been a temple 624 ft. long and many singular structures, with sculptured figures, bearing a strong resemblance to the idols of the Hindus or ancient Egyptians.

COPANO a seaport in U. States Texas N.W. side of a commandaria bay of same name, dist. of, and 7 m. S.W. Refugio.

COPAY a small uninhabited island one of the Hebrides on Inverness Sound of Harris.

COPDOCK par. Emp. Suffolk 954 ac. Pop 349.

COPPELAND ISLANDS a group of Isles Ireland, no. Down, 2 m. N. Donaghadee near the entrance to the Belfast Lough. The largest of the group comprises about 220 ac. of land mostly arable and contains about 100 inhabitants. The other two, about 1 m. N. of the above, called respectively *Mow* and *Lighthouse Island*, contain each about 30 ac. On the latter a lighthouse has been erected.

COPENHAGEN [Latin *Hafnia* Danish *Kjøbenhavn* — Merchant's Haven] the capital of Denmark, and one of the finest cities of N. Europe partly on the E. coast of the

low as to require to be protected by embankments even from the tidal sea and hence, in whatever direction it may be approached, it neither becomes visible at any great distance, nor presents a very imposing appearance. Its form is that of an irregular circle the circumference of which is greatest towards the S. and least towards the N. diameter about 2 m. circumference rather more than 6 m. It is strongly fortified, being surrounded on the land side by a lofty wall flanked with bastions, and by a broad deep ditch filled with water from the Balto, and defended toward the sea by most for modern batteries, especially one on the water level called *Træbatteriet* and the polygonal citadel of *Frederikshavn*, a sudden fortress, denoted almost impracticable. In consequence of repeated emigrations, the greater part of the older houses of Copenhagen, which were chiefly of wood have disappeared and been replaced by edifices of modern construction, lofty and well built, either formed into handsome squares, or lining the sides of long spacious streets usually of brick but occasionally of Norwegian granite. In general the pavement, particularly for foot passengers is very indifferent and Copenhagen suffers much by one of the worst evils to which a town can be subjected — the want of good fresh water. The natural channel of the town is into two parts, separated by the dike between the two islands, and not needed by draw-bridges but another dike once recognized and still useful for purposes of description, though it has almost ceased to be correct as into the old town and the new town (both on the Island of Seeland and together composing Copenhagen Proper) and Christianshavn, on the Island of Amager.

The boundary between the old and the new town is a principal street, called *Gøteborgsgade* (Josh's Street) which, with its continuation along the canal of Nyhavn (New Haven) stretches through Copenhagen Proper from N. to S., and cutting it centrally divides it into two nearly equal parts. The W. part or old town where it has not been replaced by modern buildings, exhibits the Copenhagen of the old time and consists generally of narrow crooked streets, lined by mean and in many cases wooden houses. Many of the finest public buildings, however belong to this division, particularly that part of it called *Slottet* (the Palace), a kind of island which is formed by the channel already mentioned and canals branching from it, and which though the original nucleus of the city is now become one of its newest sections. The E. part or new town and also Christianshavn are almost entirely of modern construction the former being built according to a plan which if completed would give Copenhagen a first place among European cities. The city is entered by four gates and contains 256 streets and lanes, and 16 public squares and market-places. The largest and most handsome of these squares is *Kongens Nytorv* (New King's Market). It covers an extensive space almost in the very middle of the town and is fewer than 12 streets open into it. Its houses are chiefly occupied as public buildings or hotels and in its centre is a colossal equestrian statue of Christian V., with curious allegorical figures, the meaning of which is not easily unravelled. Its E. side forms part of the *Gøteborgsgade* already mentioned, which is the principal thoroughfare and contains the finest shops, some of which, however are of a very superior description. The only other squares deserving of notice are the *Gammel-gade Nytorv* (Old and New Market) adorned with a fountain and used as a market for hay and straw and *Frederik's Place* a cross divided by four streets into four equal parts each of which is a palace. The public buildings and establishments of Copenhagen may be noticed under the following heads —

Churches.—The first of these, and the metropolitan church of the kingdom is the *Frue Kirke* (Church of our Lady) in *Norregade* (North Street) in the N. part of the old town. It consists of a parallelogram of Greek-Roman architecture, and has a square tower which formerly terminated in a spire nearly 400 ft. high but the whole building suffered greatly during the bombardment by the British and the spire was completely demolished leaving only the tower from the top of which still—about 200 ft.—a commanding view is obtained. The choir forms a rotunda, surrounded by a *Graecian* dome. The interior is of great simplicity and owes its chief attractions to *Thorvaldsen*, who has executed in white some of his masterpieces. In the same street a little to the N. stands the Church of St. Peter built in the form of a Greek cross,

Island of Seeland and partly on the N. W. coast of the adjacent Island of Amager lat. (observatory) 55° 40' 9" N. lon. 12° 34' 7" E. (E.) It occupies an extensive flat, so very

and surmounted with a handsome tower about 250 ft. high. In the same quarter but eastward is Trinity Church an edifice of singular construction, founded by Christian IV., remarkable for its round tower and containing some fine colourings. Over the east end of the church is the hall of the university library, while the top of the tower is used as an observatory the ascent to which is by an internal inclined plane, up which Peter the Great used to ride, and once drove his Empress in a carriage. The only other churches deserving of notice are the Church of the Holy Ghost, containing several interesting paintings and a silver bas-relief of the Holy Supper the Holmen a Luke or Marlene's Church in the form of a cross founded in 1617 recently restored and possessing a fine altar and chancel enriched with curious oak carvings and the Church of our Redeemer situated in Christianshavn, an edifice with an exterior remarkable alike for simplicity and beauty and so interior adorned with an altar of Carrara marble, and several statues the sum of life.

Palaces.—With those Copenhagen is amply supplied. In the Slotsholmen already mentioned, stands the palace of Christiansburg a large massive building of imposing appearance, on the spot where, in the 12th century was erected the fortress which formed the first nucleus of the present city. Since then numerous royal buildings have occupied the same site. The chief of these was a palace, founded in 1381 and afterwards in 1740 greatly altered and improved by Christian VI., who furnished it at immense expense and enriched it with innumerable articles of vertu. In 1794, everything but its walls perished by fire. The present building commenced in 1828, and of immense extent has little architectural merit, but many of its decorations are by Thorwaldsen. In one of its wings the supreme court holds its sittings, in a hall which contains numerous sculptures and pictures by native artists, not in which is a superb throne, supported by lions of silver

high, pointed roof. The regalia are kept here; and at one end of the Riddersaal—a spacious room, hung with ancient tapestry—is a magnificent throne of solid silver.

Museums and other Public Buildings.—The townhouse, situated in the Gammelstrø and containing within its precincts the courts of justice, police office, &c. is a building of recent construction, but of no architectural merit. The most remarkable circumstance connected with it is, that it is the sixth townhouse which Copenhagen has had, the five which preceded it having perished by the flames. Adjoining the townhouse is the jail. The exchange, situated on the Slotsholmen, near the palace is a large irregular clumsy edifice which has nothing worthy of notice connected with it, except its tower which is about 178 ft. high, and surmounted with lead, terminating in a point, about which the tails of four dragons are twisted together while their heads are turned so as to point out the four cardinal points. Tradition bears that this tower was transported from Kalmar in Sweden by Christian IV. as a trophy of his victory. Copenhagen is rich in museums and curious collections. The most recently formed but at the same time, perhaps, the most interesting of these, is Thorwaldsen's Museum, situated on the Slotsholmen. It is built in the form of a parallelogram in a style of architecture partly Egyptian, partly Grecian and contains the rich bequest which that great sculptor made to his country of his compositions and collections, during the course of half a century. The Museum of Northern Antiquities occupies a wing of the palace of Christiansburg but a considerable part of the collections properly belonging to it is deposited in the Royal Museum in the Drøningens Tværgade. These combined collections form a museum which is almost unique. The antiquities are arranged in four sections, according to the ages to which they belong and proceed in regular gradation, from the rudest of all arts of leather up to the age of alchemy. The royal museum of Natural History in the Strandgade is rich both in zoological and mineralogical specimens. Among the former the most deserving of notice are the birds (particularly a complete collection of those of Iceland) and the insects among the latter a mass of native silver from Nørreby—the largest in the world about 6 ft. long 2 ft. broad and 3 inches thick—and a magnificent piece of amber found in Jutland and weighing about 27 lbs. The other important collections are the royal cabinet of coins and medals, in the Castle of Rosenborg, alike remarkable for the number and the rarity of its specimens the ethnographical museum, and the royal gallery of paintings, in the Christiansburg containing about 1000 pictures many of them by the first masters.

Educational Establishments, &c.—Among these the university naturally takes the first place. It was founded by Christian I. in 1478. The number of professors and lecturers at the commencement of 1860 was 48, of whom only 16 have a seat and vote in the Senate or Consistorium. The average attendance of students is from 1000 to 1200. The present building, opposite the Frue Kirke was erected in 1836. They are in the Gothic style, and have a facade 220 ft. long with a portal 72 ft. high over which is a flying eagle in high relief with the inscription *Colorem aspectu tuum*. The university is well endowed, and possesses numerous libraries—the Regenz (*domus regis*) an establishment connected with it, lodges, and partially matriculate, 120 students. To the university, too, belong the surgical academy two observatories (the one in the round tower already mentioned, and another recently erected near the W gate the botanical garden in Nyhavn, and the polytechnic school in which a complete preparatory course is given. The other principal schools are the metropolitan school the veterinary school the military high school, the naval and military cadet academies and the town schools. The principal scientific and literary associations of Copenhagen are—the academy of arts, which holds its sittings in the old palace of Charlottenburg and possesses a considerable endowment the royal Danish literary and scientific society the royal society of natural antiquaries, the agricultural society, the art-union, artists' union medical union, &c. Copenhagen possesses several extensive and valuable libraries. That of the university kept

THE EXCHANGE, COPENHAGEN
From *Voyageur de la Compagnie Nord-Ouest de la Mer*.

and surrounded by a crimson canopy. The principal government offices are in the immediate vicinity, and behind the palace are royal stables for 200 horses, and a large riding school. The palace of Amalienborg, or rather four symmetrical palaces forming the arms of Frederik's Place already mentioned is the ordinary residence of the King and the royal family. There are several other palaces but the only one deserving particular notice is the Palace or Castle of Rosenborg in the N. part of the new town, and surrounded by extensive gardens, which are open to the public and lending up to the finely planted ramparts, forming, along with them, the principal promenade. The castle is an irregular gothic building, planned by one of our own celebrated architects Inigo Jones. It is flanked by four towers, and has a

demny two observatories (the one in the round tower already mentioned, and another recently erected near the W gate the botanical garden in Nyhavn, and the polytechnic school in which a complete preparatory course is given. The other principal schools are the metropolitan school the veterinary school the military high school, the naval and military cadet academies and the town schools. The principal scientific and literary associations of Copenhagen are—the academy of arts, which holds its sittings in the old palace of Charlottenburg and possesses a considerable endowment the royal Danish literary and scientific society the royal society of natural antiquaries, the agricultural society, the art-union, artists' union medical union, &c. COQUET as *Isl England* in the German Ocean, off the coast of Northumberland, with a lighthouse, having a fixed light 80 ft. above sea level. *lat.* 53° 20' N. *lon.* 1° 52' 18' W. (a).

COQUET a river England. See **COCKLEY**.
COQUILLAGE (GRAND and PETIT) two *isls* Chagos archipelago Indian Ocean about *lat.* 5° 30' S.; *lon.* 73° 20' E. covered with coco trees. Close to the N. island *Petit* (Coquille), there is a good channel with 14 to 15 fathoms depth of water in it between the two islands, there are also 4 and 5 fathoms.

COQUIMBO a prov. Chili, cap. same name; bounded N. by prov. Atacama, E. the Andes, S. the river Chacao, and W. the Pacific. It occupies the entire breadth of Chili from the Andes to the Pacific, and is generally about 100 m. broad. It is very mountainous but there is only one volcano that of Linares within its limits. It has numerous mines of copper and contains also gold silver quicksilver and lead. The copper mines are abundant and extensively wrought, forming now the staple mineral of the province, and of which very large quantities are exported. The flow of water throughout the province, except during the winter months (May to August), is extremely small none of the streams are navigable the swiftness of their waters the rapidity of their descent, and the ruggedness of their rocky and stony bottoms rendering all attempts at navigation impracticable. The sides of the rivers are nearly perpendicular and are sometimes creased by a hanging jaco-bridge. The principal streams are the Coquimbo, the Barranco the Tongoy and the Chacao the last r. as already stated, forming the S. boundary of the province.

The climate is remarkably salubrious and delightful it being always equable and mild. The province is not fertile in grain, not producing enough for its consumption, particularly in the N. valleys. But fruit is abundant, especially figs and grapes. About 25 to 30 m. from La Serena, there occurs a valley of 6 m. to 7 m. wide, remarkable for what are called parallel roads—narrow plains or terraces resembling roads—running along opposite sides of valleys at equal heights, supposed to be produced by the action of water although there are instances where such supposition by a means fully or satisfactorily accounts for the phenomenon. These horizontal planes are in some places 1 m. broad, but their greatest width is from 20 to 50 yards. There are three distinctly characterised arcs, the uppermost being 300 ft. or 400 ft. above the level of the sea, and 250 ft. from the bottom of the valley the other two are respectively about 10 and 20 yards lower down. The rocks in this valley are principally granite and gneiss, with masses of felsic spar, and quartz mixed indistinctly. Pop. (1841) 78,574.

COQUIMBO or *La Serena* a seaport in Chili cap. above prov. beautifully situated on the river of same name, and not far from its mouth on the bay of Coquimbo. *lat.* 33° 54' S. *lon.* 1° 19' W. The town is well and regularly built, the houses one story in height, are mostly constructed of sun-dried bricks, and standing apart from each other with large gardens between. It is a bishop's see, and contains several churches and convents a public school and hospital and at the S. extremity at the plaza or public square. The port of Coquimbo is several miles from La Serena. It is well sheltered on the N., and is both spacious and safe in all seasons, and on this account is much frequented, although both wood and water are scarce, the latter being besides of indifferent quality. These inconveniences however are in some measure compensated by an abundance of fish and fresh provisions, both of which are to be had cheap. The export trade of the port consists chiefly of copper and more precious metals the imports are provisions, clothing, and other necessaries, for the supply of the inhabitants and of the mines. The number and tonnage of vessels that entered the port in 1847 was 143, ton 39,967 value of cargoes, £250,850. The value of exports £203,244. But from the accounts lately received, the export trade has greatly increased during the last few years.

The inhabitants of La Serena are of mild and unassuming manners well bred and hospitable, and appear to be, generally in every circumstance.

The name La Serena was given to it by its founder Don Francisco de Aguirre, in 1540 in honour of his native

place of the same name, in the province of Astensadras old Spain. Pop. (1847) 16,000. (a).

CORA a co. Turkey cap. *lat.* 37° 46' N. *lon.* 37° E. At a little distance are the ruins of the temple of Junc. Pop. 1000.

CORA, *Coraz* or *Coraz* a kingdom of Italy delag. From Rome, 30 m. S.E. Rome, situate on a hill, on which are the ruins of two temples—one of Hercules, and the other of Castor and Pollux the former now occupied as the baptistry of an adjoining church. The town originally belonged to the Volsci, and in its neighbourhood the remains of Cyclopean walls are traced. Pop. 5000.

CORAL, a small rocky *isl* Brazil S.E. coast, prov. Pernambuco 30 m S.E. Pernambuco. *lat.* 35° 45' S. *lon.* 48° 35' W. About 2 m. E. of the island the water deepens to 12 fathoms.

CORAL SEA a name first given by Flinders to that part of the S. Pacific Ocean lying between the Great Barrier Reef (see BARRIERS) on the N.E. coast of Australia, and the Solomon, Queen Charlotte's, and New Hebrides Islands. From the extensive development of coral in this region the name is exceedingly characteristic.

CORANAN a tribe of Africa inhabiting the country lying between Orange-land on the E. and Namaqualand on the W. They much resemble the Namaquas in customs, appearance and language. They are chiefly to be found along the banks of the Great Orange River are good looking but excessively filthy. Their huts are constructed of matting and are often removed from place to place. They cultivate nothing but tobacco, subsisting chiefly on the milk of their cattle, of which they have great numbers their flocks also are immense.

CORANAN a dist. Upper Guinea, near the centre of the Ashantee country. Principal towns—Coranah, Benin, and Benin. The first lies 70 m. N.E. Coranah.

CORATO a n. Naples, junc. of 27 m. W. Bari cap. circumscribed of same name. It contains a handsome collegiate church five convents, and an asylum for female orphans. Pop. in 2500 of circumscribed 18,163.

CORAZON a mountain Ecuador in the Andes, 20 m. S.W. Quito. Its summit is occasionally covered with snow and bears the form of a heart, from which it derives its name. **CORALLARY** three parts of Ireland—1. King's co. and Tipperary. 17,747 ac. Pop. 5693. 2. Cork 869 ac. 1 op. 103—3. Waterford 735 ac. Pop. 256.

CORRELLA, a n. France, dep. Seine-et-Oise. 17 m. S.E. Paris, agreeably situate 1 bank, Seine at the confluence of the Esneuse. It has large flour mills, a grain market, an immense granary of six stories capable of containing grain sufficient to supply Paris for a fortnight and an ancient church. It has manufactures of shawls casimires, printed goods, girthe woollen yarn, earthenware, and plaster and has an extensive trade in grain for the supply of the capital. Pop. 43,58.

CORNETTA (anc. *Carnae Picta* *Chelsum*) a n. and e. in kingdom of Italy gov. Milan prov. of 22 m. N.W. Milan, 10 m. W. Milan. It is well built, and has a large parish church and a castle. The inhabitants are chiefly agricultural good wine is produced. Pop. 4921.

CORNBURGH, a par and vil. England co. Northumberland 13,150 ac. The village agreeably situate, 1 bank Tyne here crossed by an old bridge of seven arches, and 8½ m. from the town. The parish contains Wesleyan and Primitive Methodist chapels, a national and three other schools. The inhabitants are chiefly employed in agriculture the only manufactures being earthenware, bricks, and tiles. Corbridge was formerly a borough and market town and a place of considerable importance. Fairs for live stock, among the largest in the kingdom are still held at Staghaw Bank within the parish. There is a station here on the York Newcastle, and Berwick Railway. Pop. of par 2168 of vil 1863. (Local Correspondent.)

CORRY par Eng. Northampton 2778 ac. Pop. 956. **CORRY** a par and vil. England co. Lincoln 2800 ac. The village, 28 m. S.W. by W. Lincoln was once a market town. It has an ancient church a Wesleyan chapel and a free grammar school. Pop. 860.

CORCOMOHIDE, par. Ire. Cork-10,018 ac. P. 4024

CORCOVADO a remarkable mountain, Brazil 9 m. from Rio-de-Janeiro. The highest portion of the mountain, which appears separated from the general mass rises in a sharp isolated peak to an elevation of 3000 ft above the level of the sea. The view from the summit is magnificent comprising the harbour city and suburbs of Rio Janeiro.

CORCUBION a town and port, Spain (Galicia), prov. of 50 m. S.W. Coruña near Cape Finisterre. It has two squares, a parish church school prison and some fountains. Fishing salting fish drying, and cattle-rearing occupy the inhabitants. Imports—sugar brandy soap, paper wine, oil glass, iron hardware fish-hooks earthenware, wearing apparel &c. Exports—grain timber potatoes, salt fish &c. Vessels that entered in 1845, 200 tons 5220, 1 op. 1140.

CORDANCAN par Tel. Tippony 3906 ac. 1 op 4793.

CORDES HAY S coast, Patagonia, Strait of Magellan, 45 m. N.W. Cape Hornward. Its entrance is obstructed by sandbanks and, in some places by rocks. It was discovered in 1499 by Simon de Cordes, a Dutch navigator.

CORDUWAN *See* *CORDUWAN* *See* *ASTRON.*

CORDOVA a prov. Spain Andalusia bounded E by prov. Badajoz and Ciudad Real E by Jerez S by Granada and Malaga, and W by Seville between lat 37° 52' 58' 44' N and lon 5° 56' 58' 52' W area, 6177 sq m. It is naturally divided into two parts by the Guadalquivir. The N portion is mountainous and rugged being covered by flocks of the alba morra. The S side is comparatively level and remarkable for fertility and productive scenery. The mountain slopes are studded with oak, oak holly leaf chestnut, birch leather broom and other trees and shrubs and they likewise yield iron copper silver lead, antimony and coal marble granite, &c. The plains and valleys are very fertile, producing large crops of grain, hemp and flax and a great abundance of grapes, figs melons, oranges, lemons, mulberries, olives and other fruits sheep, goats, pigs, horned cattle, mules, and an esteemed breed of horses are reared game and fowl are also plentiful. The Guadalquivir one of the finest rivers in Spain, traverses the province from E.N.E. to W.S.W. receiving in its course the Guadalabra Guadaira, Rembeza Guadajoz Guadalella, and numerous smaller tributaries. The climate among the highlands is bracing and healthy though cold and damp in winter in the plains it is soft and genial suited to the perfecting the rich fruits and odoriferous and tropical flowers which abound. Woolen, linen, hemp, i, and silken fabrics, hosiery, hats, paper soap hardware, earthenware, leather and carpets are manufactured, brandy distilled and wine and oil of fine quality produced. The people are however chiefly devoted to tillage. Numerous universities, colleges schools and other benevolent institutions are established in the towns. Pop. 248,956.

CORDOVA, or *Comorra* and *Cordebe*, and *Coloma* (Patagonia) is in Spain Andalusia, esp. above prov. lat 37° 52' 18' N lon 4° 49' 27' W (i.) in a beautiful and extensive plain a bank, Guadalquivir were crossed by a Moorish bridge of 16 arches 65 m. N.E. Seville. It is surrounded by a wall flanked with towers, several of which are in a ruinous state, and is entered by 18 gates, all of considerable antiquity but of little architectural merit, excepting that called Puerta, leading to Seville, consisting of a magnificent arch, resting on four Ionic columns. The town is of a rectangular form, with its greatest length E. to W. and consists of two distinct portions—an upper and a lower—separated from each other by a wall. The former is the original nucleus of the town, forming that part to which the name of Villa properly belongs, and was occupied originally by the Romans, who founded it; the latter was intended for the native population. The extent of space occupied is far larger than the present inhabitants require, and hence signs of ruin and decay meet the eye in every quarter. In consequence, Cordova has

Vol. I.

sometimes been described as partaking less of the character of an existing town than of a magnificent museum of antiquities. The houses are generally large and commodious, consist of two stories, and have spacious courts, often entered by a

CORDOVA.—From E. above Spanish Hotel

rich of marble columns and uppl d with fountains of pure water. They have usually good gardens attached to them. The streets on the contrary are generally narrow dirty and ill paved. There are several exceptions here however but by a strange reversal of the usual order the one called Fura, which is the most spacious of all, one of the worst built. The squares are numerous and form the main part of large dinner towns. They are 18 in number but the only one deserving of particular notice is that called Plaza de la Justicia still better known by its original name Corredora, as it is so it as the place where tournaments and other feats of chivalry were performed and bull fight is exhibited. The houses around it are built on an uniform plan with the greatest regularity are supported on arcades and adorned with three rows of balconies. The edifices most deserving of notice are the cathedral a vast structure, occupying the site of a Roman temple of Janus—originally built by the Moors in the 8th century for their principal mosque—of a square cruciformed form and no representational appearance externally but remarkable within in its labyrinth of low pillars, ceiling of rare marble, jasper and other costly materials collected and in a manner huddled together from all quarters, and for the variety and richness of its decorations. The collegiate church of San Ildefonso founded in 1344 by Alphonsus XI who, as well as his father Ferdinand IV are buried in the church of Santa Maria. A very ancient Gothic and adorned with some fine paintings the church of San Salvador a beautiful Doric structure, originally belonging to the Jesuit College the church of Santa Maria Magdalena one of the oldest in Cordova, and believed to have been used as a Christian church during the domination of the Moors the monastery of San Pablo one of the most remarkable of the place. The place, lost now in consequence of the suppression of the monastery in a very dilapidated state the monastery of San Pedro al Real also suppressed and hence, though a beautiful and noble structure, converted into a cloth factory the principal and city offices forming an extensive series of buildings, many of them interesting from the remains of Roman and Moorish structures incorporated with them the Episcopal Palace, finely situated, surrounded by beautiful gardens and possessing a library of 10 000 volumes, but though of much pretension of no architectural merit the general hospital foundling, and several others the diocesan seminary colleges of Ascension and Santa Victoria, and a large number of primary schools. The manufactures, which were at one time extensive, have greatly fallen off and now consist chiefly of common woollen and linen cloth a few silk stuffs as taffety serge and ribbons, soft soap, hats, plate, leather and starch. There are also a paper and numerous flour mills. The trade

In the above article is of very limited extent and the only other article deserving notice is that of which good many barrels are sent to Madrid and other places. Besides a weekly market, there are two annual fairs, both of which last three days, and are numerously attended. The business done is chiefly in cattle and horses.

Cordova was founded by the Romans, but at what period is uncertain. It was afterwards taken by the Goths, and again by the Moors when it was rendered subject to the Caliphs of Damascus. In 1236 it was taken, and almost wholly destroyed by Ferdinand III of Castile—a blow from which it never recovered. It continued, in the 16th century, nearly a million of inhabitants, 800 mosques, 900 baths, and 6000 Jews—a statement which sufficiently marks the importance and splendour from which it has fallen. Cordova is the birthplace of the two Senecas and of Lucan the poet. Pop. 41,976.

CORDOVA a prov. and city La Plata. The province, which, after that of Buenos Ayres, is the most important of the Union is bounded, N. by Santiago del Estero E. by Santa Fe, S. by the Pampas, and W. by the Rio Negro, San Juan and San Luis. Near the N. frontier running N.W. to S.W. and also running throughout the central parts of the province, are the mountain ranges of the sierra de Cordova, from which descend numerous rivers and streams, fertilizing the adjacent plains. Of three streams, the Tercero is the only one which reach to the Paraná, all the rest being lost in the level intervening plains. The plains, being perpetually irrigated by so many streams, produce abundance of excellent pasture for cattle and sheep, which are reared in great numbers as the people prefer pastoral to agricultural pursuits. That portion of the province nearest the sierra is covered with woods and forests. The trees are for the most part, varieties of the myrtus family and the palm also, and cactus in every variety are also found in the northern part. The governor though elected possesses nearly arbitrary power, he not only commands the troops and the militia, but on appeal, may reverse the decisions of the legal tribunals. Besides Cordova, its capital there are other towns—Concepcion, Ranchos, and Carileas—while there are also some miserable villages. Pop. (1822-23) 85,000.—The city, cap. of above prov. is situated in a beautiful valley on the Fructero, and is well sheltered from the N. and S. winds, 867 m. N.W. Buenos Ayres, lat. 31.3 S. lon. 63.30° W. It is well built, and contains many churches, and a university once held in great repute, but now dwindled down to a mere provincial school. It was for a long period the residence of a bishop. Here also was the celebrated library belonging to the Jesuits, which on their expulsion from the city was transferred to Buenos Ayres. Treasures are remarkably cheap, and the inhabitants are noted for their unbounded hospitality to strangers. Cordova is the centre of communication between Buenos Ayres and the upper provinces. Its produce which consists principally of hides and wool, is sent to the capital of the republic from which it receives goods of European manufacture in return. It was founded by the conquerors of Tucuman, in 1573. Pop. 1692-93 12,000. (Add. See Barr.)

CORDOVA or COMODUS a Mexican Confederation, state of and 57 m. W.S.W. Vera Cruz at the foot of the volcano of Orizaba. The streets are broad and well paved, the houses generally of stone. It has numerous domes, towers and steeples and a large square in the centre with Gothic staircases on three sides—the Cathedral (a very handsome edifice and richly decorated in the interior) occupying the fourth—and a fountain in the middle. Cotton, woollen stuffs, and leather are manufactured and sugar coffee, and tobacco, cultivated. According to Humboldt, the quantity of tobacco produced in the districts of Cordova and Orizaba was sufficient before the revolution, for the supply of all Mexico. The climate is hot and moist, and the country around very fertile. P. 1841) 6000.

CORDOVA, a in American Italy gov. Yacon, 17 m. N.W. Udine, between the Tagliamento and the Limesse. It contains a castle, parish church and six oratories. P. 2396.

CORBA or KOREA (called by the natives Topy-ma, by the Chinese to whom it is tributary Koo-k, and by the Japanese Ko-ri, whence the European name of Corea, or Korea) is an extensive country in N.E. Asia, whose limits are not

exactly known bounded N. by Manchowia, from which it is separated by the Amha Chyren Altai mountain N.W. by the Chinese prov. Loao-tung from which it is separated by a wooden stockade now in ruins, and connected with the great wall of China; E. by the Sea of Japan, S. by the strait of Corea, and W. by the Whanghai, or Yellow Sea, and the Gulf of Loao-tung. The cap. King-tsi-tao is situated on the Kiang river in the centre of the kingdom lat. 37° 40' N. and long. 121° 20' E. Corea comprises a peninsula with a small portion of the continent to which it is attached—the continental portion extending in breadth from lon. 124 to 126° E., the peninsula from lon. 125° 15' to 131° 30' E., its average width being about 155 m. while the total length of the country from N. to S. is somewhat less than 800 m. between lat. 33° 30' and 43° N. Corea also includes numerous groups of islands in the Yellow Sea and strait of Corea, and the island of Quilpaert, 60 m. S. the peninsula. Area of continental portion, about 80,000 sq. m.

The peninsula is traversed through its length by a cordillera abrupt and precipitous on the E. but forming a gentle slope on the W. side, which is everywhere watered by the principal streams of the country in ascending fertile. The largest of these rivers are the Yalu-kang and the Tumen-kang navigable for considerable distances into the interior for boats of ordinary size. The former is capable of bearing vessels of large burthen for 20 m. above its mouth. The coasts are, for the most part, rocky and almost inaccessible, yet there are some excellent harbours. The climate is very cold and in the summer rain is frequent. In the N. the only grain that can be grown is barley, but in the S. the soil is fertile, and wheat, cotton, rice, millet, different legumes, and hemp are grown extensively. The rice is inferior to that of Japan, but cultivated with much assiduity and under considerable disadvantages, from the hilly nature of the country. A description of planting a kind of walnut is substituted for tea. The ginseng root is a production of Corea greatly valued in China and Japan where high prices are given for it. Its virtue is said to depend much upon the locality whence it is brought, the best being from the mountains of the N. It is transparent and of an amber colour and is kept in beautiful boxes of gold and silver among groups of rice stalks were introduced by Gutzlaff and Lindsay in 1832. The uncultivated northern parts of the kingdom are covered with extensive forests. Fruits are abundant including pears, plums, straw berries, blackberries, apricots and grapes but on account of the continual summer rains, all are watery and insipid. Gold silver copper rock-salt, iron and coal are found but are little attended to. The domestic animals are oxen pigs, goats, dogs, and cats and a small race of horses, very strong and spirited called mon-kwa. Oxen only are used for agricultural labour the horse being reserved expressly for the saddle. Sheep are almost unknown there being it is said, a prohibition against rearing them. Stegs, hares, foxes, wolves and rabbits, are abundant and the skins of the mink form a prominent article of tribute. The royal tiger and panther are so numerous that their skins form an article of commerce with foreigners. These animals are distinguished from those of the same kind found in the tropics by the greater length of the hair—the leopard tiger being far inferior in beauty of coat to that of Corea. Green snail is much used as a medicine and perfume. The birds are domestic fowls, pheasants, geese, ducks, cormorants, pheasants, plovers, herons, cranes, and storks. Caymans, of 30 or 40 ft. long are said to be in the rivers and venomous serpents are common. Whales, seals &c. frequent the coast in winter. Fish are very plentiful.

The manufactures of Corea are, generally speaking, coarse. They comprise tissues of hemp, cotton, and grass, strong but very fine; silk in considerable quantity but not very fine; pottery and porcelain, sometimes of specimens seen excellent arms—Corsean sabres and pargards being much sought for by the Chinese, and well made matchlocks. Paper is an important article of manufacture, entering as it does in Corea, into the construction of numerous articles. Of paper are made hats, umbrellas, socks, and cloaks which appear to wear well. A few slips of wood covered with paper forms a door through which the occupant, by making a hole with his finger is enabled to see what is going on in the street. Slips in Corea are simple and light, from 80 to 60 ft. long the wood work clumsy, and fastened with wooden pins, no metal being

employed in joining any part of them. They have two mats, each supporting a well made of straw matting attached to a heavy yard, and capable of being furled or unrolled by means of a pulley at the upper extremity of the mat. The anchor is of wood, as it is never necessary to sink it, and the cordage made of straw or the stalks of palm leaves.

The foreign commerce is trifling and confined to China and Japan. Hides, silk, raw and manufactured, cotton clothes, paper and gunnys, are exported and ornamental woods, pepper, various kinds of herbs, and Japan ware, are imported. A strong feeling of jealousy existing on the part of the government of intercourse with foreign countries, there is little or no commercial communication with Europeans, and scarcely even with the Chinese. A similar disinclination existing to traffic with the Manchou Tartars, the northern frontier is deserted for several miles. Internal commerce there can be almost none, from the want of good roads; those that are best not being capable of admitting more than four men abreast and frequently by rucks or large stones reduced to half that breadth. Many are more paths scarcely trodden, and often unmade. The bridges composed of stakes fixed in the stream, and covered with earth, are swept away by every flood, but numerous streams have not even this apology for a bridge but are supplied only with stepping-stones.

Corea is governed by a king whose way is in a manner absolute, and though tributary to China, his freedom of action seems quite uncontrollable. The governmental constitution of the crown is organized like that of China. The ministry is divided into five departments which form the centre of all civil and military appointments, so that from them issues the administration of every religious, political and social ordinance. The power of the king is held inviolable and sacred from the crown in his own person of the hereditary and secular sovereignty. The country is divided into eight circles or provinces each of which is placed under the authority of special governors who as in Japan are personally responsible to the government. The king's revenues, which are very considerable, are derived chiefly from the letting out of land and a tithe of all produce, he has at his disposal nearly all the landed property in the kingdom. The prevailing religion is Buddhism, which was introduced from China, in the year 372 although there appears to be another religion in existence in the country like the Tao in Japan, and the Tao in China. Confucius also is much esteemed in Corea, and has many followers. Christianity which had been introduced through Japan is now extinct. By some, the population is divided into four classes—peasants, artisans, soldiers, and priests by others, into slaves, people, and nobles. If whatever manner divided, it would appear that the privileged classes whether rich or poor exact great submission from those under them demanding and obtaining the infliction of most summary and unmercenary punishment on those who have offended them and often, with impunity taking the law in their own hands.

The Coreans in stature, rarely exceed 5 ft. They are strong well-made, and active. The majority have the few forehead the depressed nose, wide nostrils oblique eyes, thick lips and scanty beard characteristic of the Mongolians, while others have the nose straight, and elevated at the root the conformation of the eyes resembling the European the forehead higher and the beard thicker than those of the other race—altogether indicating a Caucasian origin. In manners, the Corean is habitually serious, but he readily becomes frank and cheerful. His deportment is easy and assured and seems to show more pride and independence than that of the Chinese and Japanese, but he is inferior to the latter in civilization and intelligence. He is said to be faithful and honest, but gluttonous, and fond of an intoxicating liquor made of rice, and altogether more inclined to oriental effeminacy than the Japanese. Yet, though living upon rice, he does not fear fatigue, and in summer labours all day and sleeps little. The Corean is fond of music and dancing is a great talker and a habitual liar knowing and having seen everything. He is filthy in his person and in his house, which in towns, though sometimes built of brick more frequently consists of a few branches covered with earth and straw raised a few inches above the ground to admit below the fire of the cooking fire and without any aperture for light or air except the door. The beams of the roof form the wardrobe

the southern floor is covered with mats which also serve as beds and, altogether, the interior is sombre, dirty and miserable-looking, and is rich in nothing but insects of every size and kind. The dog is considered a delicacy and takes the place of mutton there being as already stated no sheep in Corea. Vinegar oil onions and garlic are used as relishes also wine of many kinds and colours but none made of grapes. In warm weather the nobles drink brandy and honey-water the common people rice-water.

Polygamy is allowed in Corea, but the women enjoy more freedom than in China. For dress both sexes wear wide pantaloons the men have a vest which reaches below the knees the women a linen jacket, and a short robe as found in plants at the loins. Ladies wear very simple robes and sleeves which conceal the hands. The rich wear silk stuffs the common people cotton, generally white which being easily soiled, gives them a very abject appearance. Handkerchiefs made of straw are used by the women and children worn elegantly interlaced with bands of coloured cotton, persons of consequence have shoes like the Chinese. Young and unmarried persons in general wear long hair parted in the centre of the forehead and falling on the neck; ladies have their hair curled in a tuft on the forehead and confined at the back of the neck with a needle magnificently ornamented. The men fasten their hair in a knot on the top of the head and have a band of horse hair called man-goon curiously twisted round the forehead. In summer pointed lists of straw or bamboo are worn, but in winter are covered with cotton padded white or black and in winter caps which entirely cover the head, and are lined with the fur of the gray squirrel. Parasols and fans are generally used the latter often beautifully adorned with precious stones.

Of all the languages of N. E. Asia the Corean is the least known. Pure and original in principle, it has become corrupted by the introduction of a multitude of Chinese words and by the general use of Chinese characters, which are employed by the higher classes for all official accounts, and religious purposes while for the mass of the people another kind of characters is used remarkable for simplicity.

Corea was first subjugated by the Tartars but in about A.D. 1120 the Chinese appear to have gained possession of the country. The Japanese conquered and held it between the years 1692 and 1698 when it again fell under the sway of China, and still pays a small annual tribute of 800 oz of silver to the Emperor to whom also an embassy is sent every year with presents and to communicate information of any political event of importance that may have occurred.

COREA or KOREA (ARCHIPELAGO) or COREAN ARCHIPELAGO an extensive group of a series of groups, of islands chiefly in the Whanghai or Yellow Sea, W. coast, Corea and extending from the island of Quelpart lat. (N. part) 33° 29' 45" N. lon. 126° 56' 30" E. to lat. 36° 50' N. They are very imperfectly known, but form several groups, of which reckoning from N. may named Port Hamilton, Lyra, Amherst, Hatten, a small, Chiffon's islands. They are chiefly of granite rock, rising at times to sharp peaks of 2000 ft. high, and having frequently most fantastic shapes and rugged and bare basalt like rocks, and sometimes is columnar. Many of the islands, however are fertile and covered with a luxuriant vegetation, and the hamlets and houses of the more wealthy inhabitants are often delightfully situated, embosomed in shady groves with verdant meadows beside, browsed over by numerous cattle. The houses consist of a sitting-room a sleeping apartment, and a shed for culinary purposes. A main occupation in many of the islands, more especially those having little vegetation is fishing which, in fact, must form the principal source of subsistence to the inhabitants. See *QUERELANT*.

COREA (STRAIT OF) a narrow sea connecting the sea of Japan with the Yellow Sea and having the peninsula of Corea on the N. W. and the Japanese island of Kiu-Siu on the S. E. It contains several islands.

CORELLA par Eng Saley 3175 30 Pop 554.

CORELLA a m. Spain, Kanto 72 m. W. Madrid, 15 m. N. W. Tordesillas, in a plain, l. bank Alhama. The streets are clean, paved, and lighted with lamps. The town

comprise five squares of churches, four chapels, a town-house, prison, hospital two schools and a cemetery. Main features—wheat, wine, arable waste, cordage, shoes, brandy wine and oil, rice. Trade—cattle, grain and fruits. A yearly fair is held September. Pop 4000.

CORINTH a large river in America, forming the boundary between British and French Guiana. It rises in lat. 1° N and after a course chiefly N falls into the Atlantic by a broad estuary in lat 6° 15' N. Ion 57° 14' W. It is a suitable for boats to the junction of the Lalabala, a distance of 150 m from the sea.

CORRE CASTLE a par and in England. Dorset 9434 ac. The castle is situated on an eminence nearly in the centre of the peninsula of Purbeck. It is 1 1/2 m. S. of the coast. The castle consists of two principal parts, diverging from the market place, in the centre of which is an ancient stone cross. It has a spacious old church, a chapel for independent, with national and British school for boys and girls. An extensive trade was formerly carried on in grain at Purbeck, but the inhabitants are now chiefly engaged in the dairy. The castle is a ruin of 80000 tons of which a large one is an unshipped for the Staffordshire pottery.

CORRE CASTLE formerly contained two members of the House of Commons but was disfranchised by the Reform Bill. The castle is a ruin, stands on a hill of the town with which it is connected by a bridge of four arches. It was built by King Edgar and at its base is not Edward the martyr was executed. It was in ruins and in 1705 of King John and was for some time the prison of Edward III. During the great civil war it was here held by the royalists against the Parliamentarians. Lady Baillie. It was subsequently taken by the French in 1797 and the officers of the garrison when it was demolished. P. 130.

CORRE CASTLE par Eng. Dorset 2086 ac. P. 130.

CORFU (anc. Corcyra) an island in the Ionian Sea, the Government of the island of which it is the most N. of the coast. Altitude 900 ft. and 30° 50' N. and 13° 33' and 20° 18' E. Length N. W. to S. E. 40 m. breadth at the N. end about 18 m. from which it suddenly descends to 6 m. and afterwards gradually to 3 or 4, terminating finally in a narrow point. Area 221 sq. m. At its N. extremity it is separated from the mainland by a channel not exceeding 14 m. in width. The island is for the most part rocky and its mountains are its greatest heights are attained in the N. W. where the peak of St. Salvador reaches an elevation of 2575 ft. The higher regions are extremely rugged and barren, but the valleys and level tracts between are fertile though in general very narrow in consequence of the close area of the hills. The climate is mild but variable, being subject to sudden and extreme changes from heat to cold, the wind from the N. and E. bringing the latter by passing over the snowy mountains of the continent those from the S. bringing the form or with frequently rain and thick fog. Earthquakes are also felt here once only but are attended with less serious consequences than in Cephalonia, from which it is distant about 60 m. only. Corfu consists chiefly of nummularite limestone with siliceous and argillaceous beds and near the city some tertiary formation of blue clay and fine sand. The island is on the whole well watered, though many of its straits are dried up during the summer. Its principal products are—olive oil, wine, vegetables, fruit, figs, etc. The most important crop of the island is the olive. There are few timber trees in Corfu. The chief article of export is the olive-oil which employs about 10000 persons. Vine in importance is next, obtained from the water of the salt marshes that communicate with the sea. Pop. 11000.

CORFU the cap. of above and is situated on the E. side at a distance of 10 m. from the other extremity. Lat. (city) 39° 30' 43" N. lon. 10° 15' 30" E. It is strongly fortified both towards the sea and the land, with three gates fronting the former and one on the land side. The houses are generally two stories high with terraces at the top. The streets are narrow and irregular and the principal ones only are paved. Close to the town is the citadel, on a rocky promontory separated from the former by wet ditches, and its appearance is very fine. Here are a barracks, arsenal, military hospital, the residence of the Lord High Commissioner and a number of private houses. Corfu is defended by two forts besides the citadel one of these, Fort Vido, is on a small island about 1 m. N. from it. The city contains a cathedral with a number of Greek and R. Catholic churches and chapels.

University having four faculties—Theology, Law, Medicine and Philosophy with 14 professors and 1000 students, an ecclesiastical seminary and several primary schools, all supported by the Government. The harbor is formed by the island of Vido, to the east and communicates with a depth of 12 to 17 fathoms. At its N. entrance is a light house and at its S. extremity a floating light. Around the city are many agreeable walks, including the esplanade, which is adorned with trees. Corfu was formerly supplied with water but is now abundantly supplied with it at necessary element, which is conveyed to it by iron pipes from a distance of 7 m. It is the residence of the archbishop of the Greek Latin church the seat of the senate the high court of appeal for all the Ionian islands as well as of the civil, criminal, and commercial courts for the island of Corfu itself. Pop. 17000 exclusive of the military.

CORHAMPTON par Eng. Hants 2410 ac. Pop. 22.

CORNA (anc. Cornum) a town in Spain, Extremadura, prov. of and 24 m. N. by W. of Merida, on a hill which slopes towards the N. It consists of two towns proper and the suburbs. The town is surrounded by a good wall flanked with towers and is entered by 4 gates. The suburbs join it on the N. E. and W. It is defended by a strong castle, and is, on the whole well built, having good houses and spacious, clean, and tolerably well paved streets. It contains a cathedral which is a handsome and spacious Gothic structure, three other churches an episcopal palace, palace of the Duke of Alba, an hospital, diocesan seminary and several other schools and has manufactures of linen and chocolate and some trade in agricultural produce. A weekly market, and three annual fairs, which lasts three days each. P. 2793.

CORNIA (anc. Cornum) a town in Spain, Extremadura, prov. of, and 8 m. S. W. of Merida, in the Guadalupe. It is tolerably well built, and possesses a parish church, town hall, four schools, a prison, hospital, storehouse, and cemetery. The people manufacture soap, tiles, bricks, oil, wine, and liquors. Pop. 3163.

CORIGLIANO two towns in Naples—1 (anc. Coriglianum) prov. Calabria Cattr. 24 m. N. E. of Cassano, on a hill, near a bank Corigliano. It is badly built, and the streets are narrow.

row dirty and crooked. It contains a staid customhouse, five churches, six convents, an hospital, and an aqueduct. The neighbourhood produces wine, oranges, olives, and lemons. The ancient Sybaris of which no vestige now remains, was situated not far from this town. Pop. 13,704.—2 prov. Terra di Otranto 14 m S.E. Lecce. Pop. 2460.

CORINALDO is in kingdom of Italy deleg. of and 24 m W. Ancona, between the Misa and Cusano. It has six annual fairs. Pop. 5567.

CORINGA [Ceranga] a considerable seaport. Hindostan prov. N. Coringa, dist. of and 38 m S.E. Rajamahendry lat. 16° 49' N. lon. 82° 19' E. (N.) near the mouth of the Godavary. With the exception of Blackwood's harbour Cochin Bay is the only smooth water during the N.W. monsoon, on W. side of the Bay of Bengal and it possesses the only good dock on the continent between Calcutta and Bombay. A great number of small vessels are annually built here. Cotton stuffs and silk are exported, and silk, paper, copper &c. imported. In 1784, an inundation of the sea destroyed many lives and much property.

CORINTH, an ancient and celebrated city. Greece, in the Morea, near the S.W. extremity of the isthmus of same name, between the gulfs of Corinth and Egina. 48 m W. by S. Athens lat. 37° 59' 22" N. lon. 23° 26' 20" E. It is remote times, Corinth was one of the most flourishing cities of Greece, being an entrepôt for all mariner's goods passing from sea to sea and commanding at the same time, all the traffic from N. to S. Goods conveyed by sea from the W. were landed at

Corinthian war in 1832. A few houses, however, have since been built, and new streets marked out, and although no great progress has been made, it has begun to assume a neat and orderly appearance. The traces of the ancient walls of the city are still discernible but the principal and most interesting monuments of antiquity now remaining are the citadel or Acro-Corinth, and seven Doric columns the remains of a Doric temple, at the S.W. extremity of the town. The citadel stands on an elevation 1800 ft. high on the S. side of the city and is considered the second strongest fortification in Greece. The view from the summit is singularly magnificent. The columns above mentioned are of the most remote antiquity but are not remarkable for their beauty or proportions. To the N. of the market-place, there is also a large mass of brick work supposed to be the remains of a bath or gymnasium. Ancient Corinth was sacked and nearly destroyed by the Romans in c. 146 nearly all the treasures of art there accumulated were carried to Rome. The later city was possessed successively by the Ptolemies, the Romans, and the Venetians from the latter Mahomet II. was taken in 1498. It was recovered afterwards by the Venetians in 1684, and retaken by the Turks in 1776 who held it till 1833. The air of Corinth is unusually particularly autumn when the principal inhabitants retire to their country houses. It was on account of this insalubrity and of the impracticability of forming ports in either the gulf that on the establishment of the kingdom of Greece after the revolution of 1832 Athens was chosen as the future capital and place of royal residence instead of Corinth.

CORINTH [Isthmus of] a narrow tract of land. Greece, between the Morea with N. Greece, and separating the Gulf of Lepanto or Corinth from the Gulf of Egina. It is about 10 m. in length and from 6 to 4½ in breadth. Many projects were early set on foot to cut through this isthmus and to form a canal or a navigation between the gulfs above named by which a long and as it was then considered dangerous navigation round the Peloponnese to Cape St. Angelo and Cape Matapan might be avoided and such an attempt was actually made by the Emperor Nero, by whose order an excavation was begun about 200 ft. wide but very shallow. The traces of which may still be seen for about 1200 yards. The rocky nature of the isthmus, consisting of a limestone ridge forming the connecting link between two lofty mountain chains presented obstacles which the engineering skill of those times was unable to overcome. The plan of fortifying it so as to guard the Morea against invasions by sea, early suggested itself and was actually accomplished. A great wall flanked with towers was built and may still be traced across it though its whole course. On this tract the celebrated Isthmian games were held.

CORINTH (GULF OF) or GULF OF LEPANTO, [anc. Corinthian Sea] a large arm of the sea, or rather salt water lake, Greece communicating with the sea by the strait of Lepanto. It forms the principal N. boundary of the Morea, separating it from Lavada. greatest length W. to E. 75 m. greatest breadth N. to S. nearly across its centre, 24 m. It is well adapted for commerce, and its shores were anciently studded over with thriving towns. Few of these now remain but the traffic is still sufficient to give animation to one of the most interesting and magnificent scenes of which Europe can boast. The outline of the coast is infinitely varied by bold promontory gentle slope, and cultivated level. The back ground both on the N. and S. sides, is formed by lofty mountain ridges, which are richly clothed with wood, and send down numerous sparkling torrents into the gulf. Each step which the traveller takes along the shore presents some new beauty to the eye or suggests some glorious recollection to the mind.

CORIO is in kingdom of Italy prov. of and 7 m N.W. Turin on a hill. Pop. 5398.

CORISCO a bay and island W. Africa. Right of Sierra Leone. The bay 28 m. broad extends from Cape Esteras on the N. to Cape St. John on the N. and 14 m. inland. It is 8 m. N. the Gaboon, and receives the Moonse. Agra or Danger or

the harbour of Lodiham in the bay of Corinth, about 12 m. N. from the city and thence crossed across the isthmus to the harbour of Kekhira [anc. Cenchreae] in the bay of the same name gulf of Egina, about 7 m. E. by S. Corinth, where all merchandise from the E. was landed, and consequently conveyed to Lodiham for re-shipment, each taking the city on their way. Thus advantageously situated, Corinth became very early renowned for riches, and its appearance thus corresponded with its wealth and resources. It was profusely adorned with fountains, statues, theatres, and various public buildings, of such peculiar excellence in design, as to give rise to a new order of architecture now known by its name. But no portion of this splendour has remained for centuries and for ages, the visitor to Corinth has had to climb over masses of masonry and by ruined walls, to reach the streets of the modern town, now itself no longer an existence, having been destroyed during the late ravages

the N., and the Mouth of the R.—The ISLAND, at the mouth of the bay is 12 m. long by 6 broad lat. $54^{\circ} 30' N$ lon $9^{\circ} 16' E$. The natives are generally considered to be very treacherous but every ebony and other articles may be obtained from them at a moderate rate in exchange for tobacco, rum, or beads.

CORK, maritime co. Ireland, prov. Munster, having St. George's Channel S. co. Limerick h. Kerry W., Waterford and Tipperary E. Extreme length, E. to W. 110 m.; extreme breadth, 70 m.—being the largest co. in Ireland both in extent of surface and arable land; area, 2870 sq. m. 1,886,654 ac. of which 1,906,893 are arable, and 659,899 uncultivated. The W. part of the county is mountainous, the S. and E. extremely fertile in the latter part, lying N. of the Blackwater is a rich, level tract of country upwards of 20 m. in length, E. to W. and from 5 to 9 m. in breadth. The coast is indented with numerous bays and inlets of which the more important are Bantry, Donaghadee, Glenties, Kinsale, Cork harbour and Youghal and surrounded with headlands and promontories. Off the coast lie the islands of Cape Clear Whiddy and several smaller ones. The climate is remarkably mild though moist and is without the extremes of heat and cold experienced in the same latitude in England. The country is watered by the Brandon, Lee, and Black water and numerous smaller streams.

considerably but excepting on the estates of resident gentlemen, agriculture is not generally in a very advanced state. The principal crop is potatoes, but oats are also grown extensively and wheat in considerable quantities. The cattle in the S. and S.W. are extremely small but yield abundantly of milk. In the N. parts of the county they are of superior size and form. There are extensive dairies in various parts of the county especially in the vicinity of Cork city. The mineral productions are chiefly iron (not wrought since the timber of the county was exhausted) copper manganese, coal, limestone, fullers earth, and brick clay. In the copper mines at Allihies—the most important in Ireland and situated at the S. extremity of the mountainous peninsula between Kinsale river and Bantry Bay—1000 hands are employed and the produce, in 1849 was 5000 tons. The fishery districts are Youghal Cove, Kinsale, Skibbereen, and Charlestown comprising 589 m. of coast, and having, in 1849, 5261 registered fishing vessels, employing 23,906 men and boys. In 1849 there were 325 national schools in operation, attended by 52,613 children being an increase of 25 over the number at school in 1841. The county returns eight members to Parliament two for the county two for Cork city and one for each of the boroughs of Youghal, Bandon, Mallow and Kinsale. Pop. (1841) 773,398 (1851) 563,156.

CORK, a city and river-port, Ireland, cap. co. Cork at the head of the estuary of the Lee, lat. (mean-tide) $51^{\circ} 53' 48'' E$ lon. $9^{\circ} 27' 45'' W$, 158 m. S.W. Dublin. It is the second city of Ireland as regards population, wealth and commerce, and is a county in itself, having a jurisdiction separate from that of the county of which it is the capital. It lies in the centre of a valley surrounded by hills, of various but moderate elevation, and is divided into three unequal parts—the principal portion occupying the flat lands on the S. side of the Lee. It is about 2 m. in extent, and its breadth, E. to W., about 1 m. The general appearance of the city is singular and picturesque, although its suburbs, and many of its houses, present appearance of the most wretched poverty. The principal streets, all of which are on the S. side of the river are spacious, well paved, and lighted with gas, while most of the houses are large and well built. The Lee is crossed by many bridges, several of which are modern and elegant structures. The principal public buildings are the county and city courthouses, county jail, city jail, house of correction, female penitentiary old county courthouses, man-

sion-house, bank of Ireland (provincial and national) commercial buildings, county clubhouse, chamber of commerce, countyhouse convict depot, savings bank, N. and S. infirmaries, lunatic asylum, which admits 446 patients; Episcopal

palace of the bishop, diocesan library and the new Queen's college, opened in November 1849. The principal churches are St. Finbar's cathedral in the S.W. part of the town Christ's church St. Peter's church, St. Paul's church, St. Nicholas church, and other two. Besides these, there are two chapels of ease, three R. Catholic parochial chapels, four monasteries, and two nunneries with a chapel attached to each; two Presbyterian and seven other dissenting meeting-houses. Near the city is a cemetery after the plan of Paris la Chaise and on the W. of it is a beautiful promenade, of a mile in length, shaded by a double row of elms on either side, called the Merdyke. A park also has been lately enclosed, containing about 240 ac. Among the charitable institutions are the house of industry which maintains upwards of 1200 paupers the fever hospital capable of accommodating 300 patients the magdalene asylum the founding hospital two lying-in-hospitals, and a number of schools. There are also several establishments for the promotion of science and literature, including a mechanics institute, and an extensive library and museum of natural history attached. The schools for general education are numerous. The number attending them, in 1841 was—in rudimentary schools males, 5702 females, 4817—in superior schools, males 680 females, 468—total 11,567. There are two theatres and a circus in the city and three clubhouses. On a height, above the town, are cavalry and military barracks for 2000 men.

The principal manufactures of the city are tanning, distilling, hawking, iron foundries, glass, and gloves wrolden and cotton formerly carried on to some extent, are now nearly extinct. Besides the works above enumerated, there are also seven distilleries, and several large breweries. The trade of Cork is extensive chiefly in grain, provisions, butter and live stock. Bacon and hams also are cured in large quantities for exportation. The number of vessels with cargoes or in ballast entered at the port from various countries in 1863 was 195 British, of 55,642 tons, and 321 foreign of 69,908 tons; total 416, of 122,550 tons. The vessels cleared were 73 British, of 20,524 tons and 31 foreign of 9177 tons, total 108 vessels of 39,561 tons. The registered shipping of the port at the beginning of 1863 was 369 sailing vessels of 34,975 tons, and 86 steamers of 7191 tons. The declared value of the exports of produce of the United Kingdom from Cork in 1855 was £180,366; in 1859 £166,791 1860 £186,696, 1861 £181,840; and in 1862, £183,120. The amount of customs duty received in 1863 was £298,054.

The foreign and colonial trade is principally with Portugal, the Mediterranean, the Baltic, and Canada; the trade with the W. Indies has declined.

The harbour of Cork is unsurpassed for capacity and safety. It is distinguished by upper and lower; the latter is circular, 11 m. below the city, is 3 m. long and 2 m. broad, and completely landlocked. Its entrance is by a channel 3 m. long and 1 m. broad, defended on each side by forts Camden and Larnah. The upper portion extends for about 5 m. below the city to Passage, and has been deepened so that vessels of 800 tons can unload at the quays, where there is a depth of 7 ft. at low water and dredging machines are kept constantly at work, deepening and clearing the channel. The tide flows 14 m. above the city. Within the harbour are several islands; the principal of which are Great Island—on which is situated the town of Cove, now called Queenstown—Little Island, Foxy Island, Spika Island—on which is a bomb-proof aerial battery, and a convict depot, for the reception of criminals under sentence of transportation—Haulbowline Island on which is an ordnance depot, and Rocky Island, on which are two powder magazines, excavated in the rock. The principal markets days are Wednesdays and Saturdays. The city sends two members to the House of Commons. Cork is connected by railway with Dublin and Limerick, &c., to the N. and with Brandon Bridge, to the S. Pop. (1841) 80,720 (1851) 85,745.

CORKBEG par Ireland Cork 2661 ac. Pop. 1591
CORKLEONE, a tn. Bletly par of 22 m. S. Palermo, near the source of the Belid. It is well built, has several churches and convents, a prison, royal college and some other public edifices. The inhabitants are principally engaged in agriculture. There is a mineral spring in the neighbourhood. Pop. 12,557.

CORLETO a tn and com. Naples, prov. Basilicata, dist. of and 22 m. S.E. Potenza, on a soil very near the Sarno. The district is famous for its fruit and produces good wine. 1 op. 4087.

CORLEY par Eng. Warwick; 1878 ac. 1 op. 32.

CORMACILLI [anc. *Cormacilla* or *Proconnesium*] a lofty promontory sometimes called Mount Carmichael, on the N. of the island of Cyprus, a head N.E. of a small town of same name, and visible at sea, in clear day from 12 or 15 m. lat. 35° 23' 45" N. lon. 32° 55' 10" E. From this point E. the island descends in height.

CORMANTYN or **CORMANTYN**—1 vil Upper Guinea, Ashantee. It is large and populous, lies on a steep hill, and is said by the Negroes to be the oldest in the kingdom of Fanta. From the name of this village, many of the blacks in the W. Indies are called *Cormantyns*—3 (1844) negr. Annamaboe. Previous to the abolition of the slave trade it was a great resort of Dutch slavers and has been thoroughly demolished in consequence. The inhabitants are fishermen, and do some trade, in ivory and other articles, with vessels in Annamaboe trade.

CORMAYEUR, or **CORMAYEUR**, a vil and com. kingdom of Italy Piedmont, prov. of and 18 m. W. N. W. Aosta, in the Val d'Aoste, 1 bank, Dora Baltea at the foot of Mont Carmet, not far from Mont Blanc. It is 4211 ft. above the sea, and its position is considered one of the finest in the Alps. It is the common centre from which are less than six routes diverge and is much resorted to in summer-time, particularly by the Piedmontese, for the sake of its mineral waters, the exquisite freshness of its climate, and other attractions. The village of Cormayeur is large and contains many good houses. The principal springs in the neighbourhood are those of La Violette, La Marguerite, and La Bexa. The first two rise from alluvium and are saline; the last rises at the junction of limestone with granite, is sulphureous, and used both for baths and internally. Pop. 1685.—(Forbes.)

CORME, or **CORME**, a small par. W. coast, Spala Galida, prov. of and 80 m. W. by S. Larnah, on a bay of same name, which receives several streams of excellent water.

CORMON, a tn. Austrian Illyria, gov. of and 36 m. N. W. Trieste, in a mountainous district. It is surrounded by an old wall, and defended by a castle; contains a parish church. Silk worms are reared, and some silk is spun. Pop. 8800.

CORNARD two par. England Suffolk.—1 (4-Grass); 1867 ac. Pop. 657 —3 (1844); 1857 ac. Pop. 380

CORNATE or **CORNATE** a vil kingdom of Italy prov. of and 21 m. N. E. Milan. It is well built and clean and contains a Jesuit college, two churches and some handsome private residences. Pop. 2000.

CORNIGLIA two tn. kingdom of Italy.—1 A small seaport in, div. of, and 3 m. W. Genoa. It has manufactures of whitelead and soap, but many of the inhabitants are sailors. Pop. 2085.—2 (4-Atte) div. Cont. 27 m. S.E. E. Turin. Much silk is collected here. Pop. 1816.

CORNELLY, par Eng. Cornwall 1848 ac. Pop. 102
CORNER INLET Australia, New S. Wales, lat. 35° 47' S.; lon. 148° 20' E. behind Wilson's Promontory. At the entrance there is a bar on which at low water there is from 10 to 15 ft. A group of islands, called Devotion Isles, lie a few miles outside the bar. Over the S. shore of Corner Inlet is a woody range the summit of which is 2110 ft. high.

CORNETO [anc. *Cornetum*] a tn. Papal States, deling of and 10 m. N. Civita Vecchia, near 1 bank Maria, and about 8 m. from the Mediterranean. It stands on a steep and lofty ridge, evidently of volcanic formation and is surrounded by ancient walls, flanked with towers, forming a picturesque and imposing object from all parts of the coast. It is irregularly built, and has several castles, but many improvements have recently taken place—old houses have been removed and several parts of the town begin to assume a modern and elegant appearance. The principal building is the old Gothic cathedral a venerable structure of the 9th century so much injured by lightning in 1810 as to be no longer used but still remarkable for its fine dome and portal and a lofty tower the only one of four which the lighting spared. The other buildings of note are the palace Vitellianus a fine specimen of the domestic Gothic of the 15th century but now converted into an inn for the townsmen, adorned with frescoes illustrative of the history of the town, and several private palaces and convents. The trade is in corn and oil. Corneto is the see of a bishop, and to have been founded in the 6th century. About 1 m. from it stood the ancient Tarquinii, on a flat tableland still called Turcom. Nothing of it now remains, except some of the foundations of the walls, built in the massive style of Etruscan masonry; but on the hill Monte Rosai, opposite to it, is the ancient necropolis in which hundreds of ancient sepulchres have been found, and by means of excavations carried on an extensive and systematic scale, many interesting Etruscan antiquities have been obtained which now enrich the British Museum and other collections. Pop. 4000.

CORNEY par and vil Eng. Cumberland 8800 ac. Pop. 278.

CORNHILL a chapelry and vil England co. Northampton 4746 ac. The vil. is beautifully and romantically situated 15 m. E. by E. Goldstead and 18 m. S.W. Brevly bank, Tweed. Its castle was twice destroyed by the Scots. It has a church and a fair is held in December. Pop. 973.

CORNIGLIO a tn and com. Italy duchy of and 25 m. S. S. W. Parma, 15 m. E. by S. Borgaro on a rising ground at the confluence of the Beccia and Parma rivers. It contains a church, a school-house, cavalry barracks medical and other schools, and manufactures of silk, wax, and cutlery. Three cattle fairs are held during the year in June, July and September. The vicinity is fertile and well cultivated; the pastures rich and abundant and there are fine forests of chestnut and other timber. Pop. 5335.

CORNO (MONTI) also called **GRAN-BAIRO D'ITALIA** a mountain, Naples the culminating peak of the Apennines; lat. 42° 27' N.; lon. 18° 38' E. height, 9519 ft.

CORNUDELLA, a tn. Spain, Catalonia, prov. of and 24 m. N. W. Tarragona, in a mountainous district. It contains a parish church, courthouse, and two primary schools and has several distilleries of brandy and numerous flour mills, and some trade in grain. Pop. 1637.

CORNWALL, a maritime co. England, forming the S. W. extremity of the island of Great Britain, and surrounded by the sea on all sides except the E., where it is bounded by co. Devon. Its figure, though very irregular bears some resemblance to that of a right-angled triangle, the base, 48 m., resting on Devon, the perpendicular, 70 m., washed by the W. portion of the English Channel and the hypotenuse, 78 m., washed by the Atlantic Ocean; area, exclusive of the Scilly Isles, 1365 sq. m. or 878 600 ac. The coast-line on

the side stretching from N.E. to S.W., is not very much broken, but has been scooped out by the sea into a number of shallow bays, of which that of St. Ives appears to be the principal, while the most prominent headland is that of Trevoose Head. The S. coast is much more broken, and is marked, both by bolder promontories and deeper bays. Of the former, proceeding E. the most prominent are St. Michael's Mount, Lizard Head, Pendennis Head, Douchman's Point, Chapel Point, and Black Head. Of the latter the most extensive and important are, Mount Bay, Falmouth Harbour, Garmen Bay, St. Nassy Bay and Plymouth Sound. Intermediate between these two coasts is the remarkable promontory bearing the appropriate name of Land's End, and presenting to the sea steep granite cliffs, about 60 ft. high. Nearly contiguous to it is Mount Fentury 529 ft. forming the termination of a chain of hills, to which the name of Devonian Range has been given, from receiving its largest development in co. Devon. The part of it belonging to Cornwall stretches through it in a direction from N.E. to S.W. forming its principal watershed the land on either side of it sloping down more or less gradually towards the coast, though sometimes sending off lateral branches, which as we have seen, terminate in bold headlands. The nucleus of this range is granite, with occasionally bursts through the surface and forms huge, unmitigated masses, but is more generally covered with extensive slate strata, provisionally called *indica*. The granite is generally of a white or whitish grey colour and, having the property of decomposing rapidly when exposed to the air has formed valuable beds of kaolin or porcelain earth, which is largely employed in the potteries in making the finer kinds of ware. The slate, which overlies the granite, is seldom of a quality which enables it to be used for roofing. The most elevated points of the Devonian Range in Cornwall are Brown Willy 1668 ft. Gosses Hill, 1208 ft. Kit Hill 1067 ft. and Hensbury Beacon 1034 ft. The rivers of Cornwall are numerous, but short. The largest, the Tamar, forms the boundary between Cornwall and Devon during the greater part of its course, and more properly belongs to the latter county from which its principal affluents are derived. Its whole course is 56 m. The other rivers peculiar to the county are the Fowey, Fal, Alan or Camel, Seston, Looe, Hel or Helford, and the Hayl. As they all flow to the coast, they become accessible to the sea, and this is of much more mercantile importance than their size might seem to indicate, both furnishing a considerable extent of inland navigation, which has been much increased by canals, and forming valuable harbours by their mouths. The climate, owing to the great extent of surface exposed to the sea, and the general elevation of the ground, is both variable and of a lower temperature than that of the inland counties, which are 2° or 3° farther N. The soil too, is generally of very indistinct fertility consisting of decomposed slate, which, though sufficiently porous to admit of easy drainage, must be heavily manured, in order to raise abundant crops. In many of the more elevated districts, much of the land is almost barren. Little wheat is grown, but barley, particularly a naked kind, called *galles*, is extensively cultivated for the fattening of pigs and poultry. The favourite and most abundant crop is potatoes, to the growth of which the soil seems so peculiarly adapted, that two good crops have often been obtained in one season—an early crop in June, and a late crop in October. It is not, however, in its agriculture that Cornwall finds the principal source of its wealth. Its mines of copper and the soil constitute its richest treasure, though the ruins of the latter has undergone considerable diminution, from the large importations from Spain and the former will probably be similarly affected by the recent discoveries in Australia. The chief mining district is in the S.W. part of the county stretching from St. Agnes, on the N.W. coast, by Redruth to the neighbourhood of Haleson and Marazion. The veins of copper and its usually run E. and W., penetrating both the clay slate and granite, and sometimes alternating with each other. The depth to which they extend is unknown, as the bottom of a vein has never yet been reached, and hence the only apparent limit to the extent of the mineral field, is the superposition of the machinery by which it is laid dry and vented, so as to be rendered workable. The knowledge of this fact has had a wonderful effect in stimulating industry and hence the art of mining, in all its branches, has

been carried, perhaps, to greater perfection here than in any other part of the world. The Cornish engines are famous for their magnitude, and the wonderful labours which they perform; and the miners are unequalled for the boldness, skill and perseverance which they manifest in treading the ore to almost bottom depths. Instead of a general description, which could only furnish a very vague and imperfect idea of the working the following sketch of the Bodinnah Copper Mine places it vividly before the eye. This mine is situated close to Cape Cornwall a few miles N. of Land's End, on a shore exposed to the full fury of the Atlantic.

BODINNAN COPPER-MINE, CORNWALL.

The workings are on the very verge of the cliff end, descending beneath it to sea, are carried 480 ft. beyond low water mark. The dashing of the waves is distinctly heard by the miner at his work, and, in stormy weather the large stones driven towards the beach grate upon each other with a noise resembling thunder. The average annual produce of tin is about 4000 tons, and that of copper 12,000 tons. The actual produce of fine copper in 1847 and 1848, was 12 870 tons, obtained from 105 616 tons of ore. Besides these metals, silver, lead, zinc, iron, manganese, antimony, cobalt, and bismuth, are found in comparatively small quantities. There are no manufactures, properly so called, excepting carpets, at Truro, and a few coarse woollens here and elsewhere. The exports are confined to mineral produce and fish.

At the time of the Roman conquest, Cornwall was occupied chiefly by tribes of Cimbric and Dumnonic and became included in the province of Britania Prima. After the Romans withdrew the natives regained their independence, and retained it till the time of the Albigenses, when they were subdued by the Saxons. Their Celtic origin is fully established, by the abundance of rude monuments spread over the country and constituting chiefly of wrought stones placed erect, singly, or in obelisk, with others laid across. Their language also, was a Celtic dialect, and under the name of Cornish, continued to be partially spoken till the commencement of the present century. The inhabitants were formerly much addicted to gymnastic sports, especially wrestling, the love of which still prevails. Cornwall forms a royal duchy settled on the eldest son of the sovereign, who accordingly to his other titles, is also that of Duke of Cornwall. Pop. (1841) 145,159. (1851) 255,629.

CORNWALL, New a name given to a portion of the W. coast of N. America, on the Pacific Ocean between New Norfolk and New Hanover, extending from lat. 24 to 57° N., and from about lon. 120° to 135° W., and offing, partly

to the British, and partly to the Russians. It is traversed in its whole length by a branch of the Rocky Mountains. On the coast are numerous islands, among which are those of the Prison of Wales, and Duke of York. The climate near the sea is mild. Estates are found, and there are several hot springs.

CORNWALL, a new Van Diemen's Land, dist. Launceston. It contains seven hundred, and is divided into 25 parishes. It is watered by several streams the largest of which are the N and E. R. R. Its principal mountains is Beilmoor, 4200 ft. in height.

CORNWALLIS.—1. An isl. Nova Scotia, N. E. side of Chedabucto Bay lat 45° N lon. 62° W.—2 Two isls. N Pacific, lat 16° 58' N lon. 169° 51' E. surrounded by a reef discovered by H. M. S. Cornwallis, December 14, 1807.—3 A port, E. side of the N. American island, lat 18° 18' N about 16 m. S Cape Plover. It makes an excellent harbour stretching about 6 m. into the land in a N. W. direction, and in breadth about 3 m. being land locked on every side and surrounded by lofty mountains covered with impenetrable forests, and is secure from all winds. Its scenery is magnificent.

COIRO a seaport in Venezuela, cap. prov. of same name 144 m. E. N. E. Maracaybo on El Golfo, a bay of the Gulf of Maracaybo, 2½ m. S. W. from the Caribbean Sea lat 11° 24' N lon. 69° 48' W (a.) The streets are regular but the houses are mean. It has two churches, several chapels, a convent, and an hospital. The climate is hot, dry and healthy but water has to be brought from a distance on mules. The trade was once considerable with the W. India islands in maize, goats, hides sheep-skins, cheese, &c. but as how much fallen off as is also the town, since 1826 when the seat of government was transferred from it to Caracas Pop. 4000.—The province extends from the Gulf of Maracaybo, on the W. to the Gulf of Trinité, on the E. and is bounded, E. by prov. Carabobo and Trinité. The soil is in general, dry and sandy and much of the prov. still remains in an uncultivated state but, in some places, maize, coffee, and plantains are produced in abundance. Pop. consisting of Uneas Indians Negroes, and mixed races (1846) 72 331

COIROFIN or **CHERAPIN** a to. Ireland, co. Clare, 8 m. N. N. W. Ennis, on an acclivity on the Fergus crossed here by a stone bridge. It has one strait and one crooked street, both badly kept the houses are mere cabins it has a parish church, a R. Catholic chapel and two schools with a dispensary and poorhouse. Many of the females support themselves by knitting stockings while the male part of the population are chiefly employed in agriculture. Pop. 994

COROMANDEL, COAST of [Cholomandel, a name applied to the E. coast of the Indian peninsula. The whole coast, from point Calymere, lat. 10° 18' N lon. 79° 51' E (a.) to Balasore, lat. 21° 28' N lon. 87° E (a.) is usually comprehended under this designation but the name is properly applied only to that part of it S. of the mouth of the Kistna, about lat. 16° the more N. parts being the coasts of Golconda and Orissa. The Coromandel coast is open, sandy and has no secure harbours the surf continually beating on it, renders landing difficult, often dangerous, and is only to be accomplished in native boats, of a peculiar construction. The N. E. monsoon, which sets in about the middle of October is frequently accompanied with violent hurricanes; nor is severe weather expected till the middle of December. The S. wind sets in about the middle of April. During the continuance of the hot winds, the coast of Coromandel resembles a barren wilderness.

COROMANDELI, a harbour E. coast New Ulster or N. Island, New Zealand, W. side of the peninsula, terminating in Cape Colville, which forms the estuary of the Thames, and the upper or S. part of the Bay of Shouaki, lat. 36° 46' S lon. 175° 37' E (a.) [add. See SURF]

CORON, or **Koskor** a seaport to. Greece, Morea, at the extremity of a point of land at the foot of a gentle sloping mountain, S. W. side of the gulf of same name, 7 m. N. Cape Galio; lat. 36° 46' 4" N lon. 22° E. It has now only a few considerable trade in oil and silk, but was formerly a place of considerable importance having a strong fortress which, with the town, is little more than heaps of ruins. Upon the summit of the castle hill which is very steep on all sides, stands

COROMANDELI, a harbour E. coast New Ulster or N. Island, New Zealand, W. side of the peninsula, terminating in Cape Colville, which forms the estuary of the Thames, and the upper or S. part of the Bay of Shouaki, lat. 36° 46' S lon. 175° 37' E (a.) [add. See SURF]

CORON, or **Koskor** a seaport to. Greece, Morea, at the extremity of a point of land at the foot of a gentle sloping mountain, S. W. side of the gulf of same name, 7 m. N. Cape Galio; lat. 36° 46' 4" N lon. 22° E. It has now only a few considerable trade in oil and silk, but was formerly a place of considerable importance having a strong fortress which, with the town, is little more than heaps of ruins. Upon the summit of the castle hill which is very steep on all sides, stands

Vol. I

to have stood the acropolis of the ancient city that formerly occupied this site, and of which nothing remains but a few altars and walls. The population consists of about 200 Turkish, and 180 Greek families.—(Lank's *Morea*.)

CORONADA, a to. Spain, Extramadura, prov. Badajoz, on a rocky plain, near L. bank, Beja. It is very indifferently built, and the streets are narrow winding and ill paved. It contains a parish church, townhouse, prison, and an endowed school, and has some manufactures of linen, and brick and tile works. Pop. 1407

CORONATA, id. Adriatic. See **ISORNWATA**.
CORONATION GULF an extensive gulf Arctic Ocean, W. coast peninsula, and S. W. Victoria Land, between lat. 68 and 66° N lon. 108 and 116° W. It receives the Copermeice, and several smaller rivers, and its surface is dotted with innumerable islands.

CORONATION ISLANDS.—1 A small isl. B. Atlantic Ocean, one of the New Orkney group lat. 60° 48' S lon. 42° 53' W (a.)—2 A group of islands, N. W. coast Australia, between York Sound and Branswick Bay about lat. 14 55' S lon. 124 52' E.—3, An isl. Russian America its N. point is in lat. 55° 52' N lon. 124 10' W (a.)

CORONIL, a to. Spain, Andalusia, prov. of, and 28 m. S. S. E. Seville and 12 m. W. S. W. Maron, on three small hills. The houses are in general very well built forming numerous, clean spacious, and paved streets, and two squares, the principal containing the townhall and promenade. The other public edifices are a parish church, three chapels, three schools, a prison hospital, storehouse, cemetery and ancient castle. *Manufactures*.—Earthenware, linen, woollen, cotton silk, and hampers fabrics hardware, wine, oil vinegar &c. *Trade*.—Grain cattle and manufactured goods. Two annual fairs Pop. 3775.

COROURA or **CORURA** an isl. N. Pacific Ocean one of the Falew group, about lat. 7° 30' N lon. 185° E.

CORPACH, a vil. Scotland, co. Argyll, E. bank Loch Eil 2½ m. N. Fort William. It lies at the entrance of the Caledonian Canal, formed by a series of 11 locks including the sea-lock, rising to the level of Loch Lomoy. Eight of these are close together within 1½ m. of the sea, and are called Neptune's Staircase Corpach has a Free church and a school, and near it is the parish church of Kilmalio. On a hill hard by is a monument to Colonel Cameron, who fell at Quatre Bras, June 15 1815. The inhabitants are chiefly engaged in agriculture and fishing. Pop. (1851) 1050

CORPUS per Eng. Norfolk 1018 ac Pop. 492

CORRAL, several tns. and vils. Spain, of which the principal are.—1 (*de Almaguer*) a to. N. New Castile prov. of, and 45 m. S. S. E. Toledo, r. bank Guadarrama. It is tolerably built, and has a parish church four schools a townhall prison, and convent. The people are engaged in agriculture and weaving Pop. 2308.—2 (*de Calatraz*) a to. New Castile, prov. of and 8 m. S. W. Ciudad Real on a large plain. It contains two squares a parish church three schools, a cemetery and old tower Pop. 3515.

CORRALES several small tns. Spain, particularly a to. Andalusia, prov. of, and 52 m. E. S. E. Seville in a plain at the S. base of a hill. It has a square a church, two schools, townhall, prison, and storehouse. The inhabitants are chiefly employed in tillage and cattle-rearing. In the neighbourhood are several quarries of gypsum. Pop. 1671

CORREGAUM a vil. Hindoostan, prov. Belaspor on the l. bank, Beemah 17 m. S. N. E. Poonah, lat. 15° 57' N lon. 74 18' E. remarkable only as having been the scene of a desperate and successful resistance on the part of a handful of British troops to an Indian army of 20 000 horse, and several thousand infantry on the 31st December 1817—the former having been commanded by Captain Staunton, and the latter by Bajerow

CORREGGIO a to. duchy of, and 14 m. N. W. Modena, on a canal that communicates with the Po by the Verro canal and the Secchia. It is meanly built, and inhabited by a singular. The painter Antonio Allegri, commonly called Correggio, was born here. Pop. 5000

CORREZE, a river France, which rises in the mountains, of Montedarius, in the N. of the dep. to which it gives its name, flows S. W. passing Tulle and Brives, and, without leaving the dep. joins L. bank, Yverre at St. Faronville after a course of about 50 m. No part of which is navigable.

CORREZE, an inland dept. France between lat. 44 54' and 45 44' N and lon. 1° 18' and 2° 29' E, having N. dep. Creuse, N. E. dep. Dordogne, E. dep. Lot, W. dep. Dordogne and N. W. dep. Haute-Vienne. It was formed from part of the former province of Limousin, and derives its name from the river Corrèze, by which it is traversed, area, 2216 sq. m. cap. Tulle. It belongs almost entirely to the basin of the Garonne, and is watered by the Dordogne and its affluents. Surface mountainous, especially to the N and E. The N part is traversed by an offshoot from the mountains of Auvergne which separates the basins of the Garonne and Loire. The culminating point is Mount Ouzou, 4475 ft. high. Soil for the most part, except in a few of the valleys. Maize occupies a great extent of surface, and agriculture is in a very backward state. The produce of grain is insufficient for the consumption, but the deficiency is supplied by the potato and chestnut crops. Vines occupy 59 178 ac. but the wine is of poor quality. Hay is particularly abundant, and large crops of hestroot are grown, besides maize, barley, hemp, flax, &c. in moderate quantities. Minerals—iron coal slates, mill and grindstones, granite, and pottery clay, but they are little attended to, so that, with the exception of the iron-works, which employ about 100 workmen the only manufacture of note is that of fire-arms at Tulle, employing about 1000 hands. Water power is abundant, but it is not taken advantage of. The trade is principally in wine, wood, nut-oil, bees-wax, horses, cattle, leather, paper, iron, &c. The houses of the peasantry are of the worst and meanest description, dirty and healthily and generally filled with smoke. A peculiar custom prevails here, contrary to the general law of France of enfeoffing the eldest son with a fourth of the paternal property over and above his fractional share, giving rise, as might be anticipated, to innumerable family broils. The people have a great aversion to enter the army, but are said to make good soldiers. The department is divided into 3 arrondissements, 29 cantons, and 286 communes. It forms the diocese of Tulle. Pop. (1846) 517,569.

CORRIE LAKE, a large lake, the second in size in Ireland, co. Galway about 25 m. in length and arising from 2 to 6 m. in breadth, and composed of two expansions united by a narrow channel about 1 m. wide at its narrowest part across which is a ferry. It is about 3 m. distant from the sea at Galway where it is only 14 ft. above sea level. It is separated from Loch Mask by a narrow isthmus, through which there is a subterranean channel. It has about 40 m. of navigation, and its numerous islands contain nearly 1000 ac. of land.

CORRIENTES, —1 A cape, S. side, Isl. Cuba, 80 m. E. by R. Cape St. Antonio, which it much resembles lat. 21 45' 30" N. lon. 84 51' 30" W. —2 A Cape, La Plata, Buenos Ayres, lat. (E. summit) 38 5' S. lon. 57 29' W. —3 A cape, New Granada lat. 0° 53' N. lon. 77 59' 30" W. —4 A cape, W. coast Mexico 160 m. N W Acapulco lat. 20° 25' N. lon. 105° 29' W. —5 A cape S. coast Africa lat. 24 7 30' S. lon. 35° 30' E.

CORRIENTES, a dept. and in La Plata. The DEPARTMENT between lat. 27° and 31° S. lon. 51° and 60° W., is bounded E. and S. by Rio Grande and Entre Rios W. and N. by the Paraná, which separates it from Paraguay. In the N. it is well-watered and fertile, while in the S. it is marshy and contains the remarkable lagoon of Yberá (which see). The natural productions of the soil are similar to those of Brazil, and consist of cotton, tobacco, rice, sugar, indigo, &c. Pop. (1854) between 25,000 and 40,000.—The town, cap. of the dept., is apparently situated on elevated ground, 1 h. back, Paraná, near its confluence with the Paraguay lat. 27 28' S. lon. 58 44' W.; 590 m. N. Buenos Ayres. Its houses, chiefly of one story and all supplied with galleries to protect from sun and rain, form irregular ungrazed streets, many of which have a slope to the river. The line of houses facing the river forms an exception to the general irregularity. There are two squares in the middle of the town, in which are the public buildings and the other edifices, used as a market-place. There are four churches the middle, in which the representative meet and a college, founded by the Jesuits. Bed-chambers in Corrientes have no furniture, but one or two beds surrounded with coloured curtains; a chair would be a luxury. In the houses of the common people, heated by means of a brazier which blackens everything with

smoke, sofas are used for coverlets and the domestics, without distinction of age or sex, sleep in a common room, a circumstance not a little contributing to foster that liberalism with which this class is charged. Both in town and country, morality is low and depravity both in language and manners, great licence is said to be common. Corrientes is well placed to serve as an entrepôt of goods, between the upper parts of the Paraguay and the Paraná, and the superiority at the mouth of the La Plata. Pop. 8000.—(D'Orbigny's *Voyage dans l'Amérique Méridionale*.)

CORRIENTHAM, two parts. Eng. —1 Essex; 3558 ac. Pop. 261 —2 Lincoln; 6189 ac. Pop. 684.

CORREDO CAFE, a headland, W. coast, Spain, Galicia, lat. 42 35' N. lon. 8° 7' W. (s.).

CORROGE, par. Irel. Tipperary; 868 ac. Pop. 416.

CORROFOLI, a town and com. Naples, prov. Abruzzo Ultra L., dist. of, and 14 m. N N E Teramo. It stands on a gentle slope, contains four churches, and two convents; and has an annual fair. Pop. 3771.

CORRYRECKAK, a noted gulf and wharf, W. coast, Ireland, between the mouth of Jura and Slieve, about lat. 56 10' N.; and lon. 6° 40' W. The breadth of the gulf is about 1 m. and at certain times of the tide, and in high tides, the water rushes through it with great velocity and noise, and at such times there would be danger in attempting the passage with small vessels; but in general it is not at all so perilous as the appalling sights and sounds it presents would indicate, the latter having invested it with terrors which it really does not possess.

CORSECOMBE, par. Eng. Dorset; 8005 ac. Pop. 772.

CORSE, par. Eng. Gloucester; 2190 ac. Pop. 566.

CORSELAND, par. Eng. Northumberland; 11 132 ac. Pop. 579.

CORSEWALL POINT, a headland Scotland N. W. coast of co. Wigton at the entrance to Loch Ryan lat. 56 0' 30" N.; lon. 5° 9' 30" W. (s.). A lighthouse here, 92 ft. in height, the lantern 112 ft. above high water exhibits a revolving light visible nearly 15 m. off.

CORSHAM HUGHES, a par. and in England co. Wilt; 4198 ac. The town of great antiquity is 1 m. S. W. of Chippenham, and at a short distance from the Great Western Railway. It is mostly built, and healthy. It has an ancient church two independent, and two Baptist chapels, a free school a British school for boys and girls and numerous districts. Before the introduction of machinery the manufacture of woollen cloth was carried on here to a considerable extent but it is now extinct. Little fairs are held in March and September.

CORSHAM, a par. and in England co. Wilt; 4198 ac. The town of great antiquity is 1 m. S. W. of Chippenham, and at a short distance from the Great Western Railway. It is mostly built, and healthy. It has an ancient church two independent, and two Baptist chapels, a free school a British school for boys and girls and numerous districts. Before the introduction of machinery the manufacture of woollen cloth was carried on here to a considerable extent but it is now extinct. Little fairs are held in March and September.

CORSEICA (French Corsica) an isl. Mediterranean forming the French dept. of same name. Bonifacio, its extreme S. is in lat. 41 28 48" N. and lon. 9° 15' E. (s.) and Cape Corso, its extreme N. is in lat. 43° 0' 35" N. and lon. 9° 23' 5" E. (s.). It is separated from the island of Sardinia on the S. by the strait of Bonifacio, about 10 m. wide, and its shortest distance from the mainland, nearly from Cape Corso due E. to the coast of Tuscany is 50 m. Its nearest distance from France is, N. W. about 100 m. It is somewhat irregular in shape, but tolerably compact, except towards the S. where it terminates in a long and narrow tongue of land about 22 m. long, by about 6 m. broad. Greatest length, N. to S., 110 m. greatest breadth near its centre, 53 m.; area, 8877 sq. m. The E. coast is remarkable for its uniformity presenting a line which is broken in only one or two places by comparatively small indentations. To thus the W. coast presents a striking contrast, a number of deep bays following each other in rapid and almost uninterrupted succession. Of these, the most important, proceeding N. to S. are the gulfs of St. Florentino Calvi, Porto Vecchio, Ajaccio, and Valinco. The interior is traversed by a mountain chain, which has its principal direction N. to S., but throws out several lateral branches, particularly to the N. W. The culminating point, Monte Rotondo, near the centre of the island, has a height of 9054 ft. while several of the other summits considerably exceed 7000 ft., and the greater part of the year are covered with snow. The mountain masses are chiefly composed of granite and porphyry and appear to be generally overlaid by extensive beds of limestone. From the E. and W. sides of the chain numerous streams descend to the opposite sides of the coast. They are mostly torrential, short and rapid, and altogether unfit

for navigation. The largest, both proceeding from the E. slope are the Gioio and Tarigiano. Along with the other torrents which take the same direction, they have accumulated large quantities of debris and alluvium which preventing the progress of the waters, have gradually formed on the E. coast, a long series of lagoons and morasses, and made that part of the island very unhealthy but, with this exception the climate is one of the finest in Europe. The heat is sometimes excessive but the sky is generally clear and the air bracing. Owing to the mountainous nature of the surface, the greater part of it necessarily remains in a state of nature, covered with perennial forests or when not absolutely naked and barren, clothed with herbage well fitted for the rearing of young cattle. Numerous valleys, however in between the lofty ridges, and sometimes plains of considerable extent occur the soil of which is generally fertile, and well adapted for the growth of all the ordinary cereals. Not less than one-seventh of the whole surface is devoted to the culture of grain, and a return of twentyfold is not uncommon. The lower sunny slopes are generally covered with vineyards but owing probably more to mismanagement than to any defect in the soil some of the wines produced here, as yet, attained a high name. The olive appears to be indigenous to the island, and is found growing luxuriantly in all parts of it. It also forms an important branch of regular culture, and is understood to yield very profitable returns. The mulberry orange and citron, succeed well particularly in the lower valleys near the coast and it is thought that indigo cotton, and sugar might be cultivated with success. One of the most valuable productions of the more elevated districts is the chestnut, on which, at least during the winter months, the poorer inhabitants principally subsist. Among domestic animals the first place seems due to mules and goats. The former are finely formed, sure-footed and hardy and are almost the only animals employed for transport the latter are of a large and handsome breed and are kept in vast numbers. Both horses and cattle are indifferent and the sheep though remarkable for the delicacy of their flesh are small in size and yield inferior wool. The principal wild animals are the bear and the wolf. The wolf is numerous. Deer are numerous in the forests, and all the smaller game and wild-fowl are common. Eagles, vultures and numerous other birds of prey frequent the loftier mountain districts. Both in the rivers in the lagoons, and along the coast, fish abound and active fisheries are carried on. Corvara is not rich in minerals. Numerous metals exist in small quantities, and iron is worked to some extent but the economical value of the whole is very limited. At present the principal source of mineral revenue is derived from quarries of fine granite porphyry and marble. Neither manufactures nor trade have made much progress. The chief exports are wine, brandy olive oil, chestnuts, fruit, and fish. The Corsicans are of middle size and of a dark and somewhat bilious complexion. They are generally sober and hospitable and have repeatedly given proofs of their boldness and love of independence. One of the darkest features in their character is a love of revenge.

From the Phœnician, the first colonists the island took the name of Cyros and from the Romans that of Corsica. On the decline of the Roman empire it was seized by the Goths, and passed from them to the Saracens. In 1481 it fell under the dominion of the Genoese, who retained it, with some interruption, till 1755, when a great part of it was wrested from them, and made independent, by the celebrated General Piali. France, founding on a pretended cession by the Genoese, obtained formal possession of it in 1768 after the inhabitants had distinguished themselves by a long and valiant resistance, and it is now so incorporated with France as to have become one of its departments. For administrative purposes, the department is divided into five arrondissements—Ajaccio (the capital), Bastia, Calvi, Corte, and Bastia subdivided into 61 cantons, and 355 communes. The most distinguished individuals to whom Corsica has given birth are Paoli and Napoleon. Pop. (1846), 280,271 (add the Stru.)

CORRICO a vil kingdom of Italy prov of and 8 in S.W. Milan, on the Grand Canal. It possesses a church and a seminary-house. Pop. 1819

CORSEY a par and vil England, co. Wilts; 2500 ac. The village, situated in a valley, 8 m. N.W. Warminster has a parish church recently erected, two chapels belonging

to Anabaptists and Wesleyans and a national school. Pop. (agricultural) 1478

CORRO an vil W coast, Patagonia, and about 8 m. long lat. (S.W. angle) 49° 48' S. lon. 76° 54' W. (N.)

CORRO or Coros (anc. *Promenterum Sacrum*) a cape, forming the N. extremity of Corroca lat. 48° 0' 30" S. lon. 8° 23' 30" E. (N.). It is a headland about 5 m. broad a moderate height above the shore, but ascending rapidly towards the interior. Separated from it by a narrow channel, in which the depth of water generally about 8 fathoms, diminishes at one point near the centre to 4 fathoms, is the little island Giraglia, with a watch tower upon it. In the neighbourhood of the cape, variegated marble and Jasper are found

CORSEPE a par, or Ronowden, a small seaport in Denmark, W coast of Zealand, on the Great Belt 63 m. S.W. Copenhagen lat. 55° 20' 10" N. lon. 11° 14' 45" E. (N.). It lies on a narrow spit of land has a church, a good small harbour a dockyard and regular communication across the Belt, both by steam and packet-boat, with Nyborg. Pop. 1900

CORSTON par Eng Somerset 1190 ac. Pop. 531

CORSTONVILLE par Scotland Edinburgh 4 m by 2 m Pop. 1459

CORTACHTY and CLOYA par Scot. Forfar 23 680 ac. Pop. 733

CORTAILLOD a vil and par Switzerland cant. of, on the lake and 5 m. S.W. Neuchâtel. It is a well-built place, and has one of the most important cotton-factories of Switzer land. The wine of the district bears a strong resemblance to Burgundy. Pop. 1070

CORTE a tn France, dep and near the middle of the Corse, in the N. half. It lies just 25 m. N.E. Ajaccio, 1 bank Tarigiano on the E. slope of a hill overlooking a dell, corn valley covered with gardens, vineyards, olives and country seats. The town is defended by a fort, and it is so irregularly built, that it may be said to have no streets. The principal buildings are the old palace, in which the court sits the house of the heroic *Offizieri* the citadel an old castle built in the 15th century and the barracks capable of holding 1200 men. It has a polytechnic elementary school and an excellent supply of wood is obtained by an aqueduct, 4374 yds. long. There is some trade in the grain and wines of the vicinity. It was the seat of the government of Paolo I. Pop. 4164

CORTE DEL LAMARCO a vil and com kingdom of Italy prov of and 4 m. N.E. Lodi. It contains a parish church oratory and chapel and stands in a district which is fruitful in corn and flax and contains rich pastures. Pop. 1880

CORTEGIANA, a tn Spain Andalusia, prov of and 40 m. N. Huelva, on an elevated plain. It is commanded by a castle, has tolerably well made streets and two squares a parish church four schools, town and session houses, a prison hospital, storehouse, cemetery and several convents. Linen and woollen fabrics, earthenware, locks, corks and implements of husbandry are manufactured wine and oil expressed and some trade carried on in cattle, grain and manufactured goods. Pop. 8296

CORTEMAGGIORE (anc. *Castrom Levis*, or *Cortis Major*) a tn, and com. Italy Duchy Parma, 15 m. E. by S. Piacenza, r. bank, Arde. It is well built of a quadrangular form, and has two parish churches, a townhall, Hebrew medical and elementary schools a hospital, theatre market-house, and cavalry barracks. The surrounding country is flat, and affords good herbage for cattle but, from want of irrigation, no great quantity of grain is produced. Four fairs are held annually. Pop. 3000

CORTEMAHOG a tn and com. Belgium, prov E. Fland. 11 m. S.W. Bruges. It has some woollen manufactures, two brickworks a tannery a dyework, several brew areas, and numerous mills. Pop. 4518

CORTEMICLIA a tn. kingdom of Italy Piedmont, div of and 33 m. E. Com. 81 m. S.W. Alessandria, traversed by the Bernina, which is crossed by a bridge and divides it into two parts one of which is defended by a wall flanked with towers. It contains a ruined castle, the ancient residence of the marquises of Cortemiglia. Pop. 1990

CORTE-OLONA a tn. kingdom of Italy gov Milan prov of, and 11 m. S.E. Parma, ep. dioc. of same name, L. bank Olona. It is well built, contains a parish church and has a weekly market. Pop. 1330.

CORTES, several towns and villages particularly—1 (*de la Frontera*) a town, Andalusia, prov. of, and 48 m. W by 8 Malaga, at the foot of the sierra de Martin Gállego. It is tolerably well built, and contains a parish church, two chapels, three schools, a townhall, prison, hospital, and numerous fountains, some of them chalybeate. The inhabitants are engaged in boiling soap, tanning, weaving, exporting oil and wine, and in husbandry. Pop. 5295.—2 (*de Arcoana*) a town, Valencia, prov. of, and 28 m. N W Castellón-de-la-plana, 15 m. N Viver between the rivers Villahermosa and Mijares. It possesses a church, townhall, prison, school, and four convents. The inhabitants are occupied in weaving, dyeing, and husbandry. Pop. 1795.—3, A town, prov. Navarra, 12 m. E.E. Tudela, near r. bank, Ebro, on the confines of Aragón. It contains four squares, a church, townhall, prison, two schools, a handsome and spacious square, and a magnificent palace of the Duke of Granada. Pop. 900.

CORTETZ, or **CORTINA**, an lat. Russia, gov. of, and 59 m. S. Ekaterinburg formed by the Dniester. It stands 165 ft. above the level of the river and is surrounded on all sides by masses of granite, which make it naturally without the aid of art, almost impregnable. It was early selected by the Zaporog Cossacks as the site of their colonized Russia, and on their removal, in 1794, to the banks of the Dniester, by Catherine II. It was settled with a colony of Germans, composed entirely of Prussian Mennonites. Cortez is the most important of 16 villages, which were similarly settled at the same time. The inhabitants are industrious, but too strongly attached to antiquated customs to give ready admission to modern improvements. They have some manufactures of cotton and woollen goods, but live chiefly by agriculture and the rearing of cattle.

CORTINA a tn Austria, duchy Tyrol l. bank, Boita, above crossed by a fine bridge, 64 m. S.E. Imberlich and 24 m. E. by S. Brunn. It has a church and some trade in wool. Pop. 2700.

CORTON two parts Eng.—1 Suffolk 1495 ac. Pop. 559.—2 (Dorset) Somerset; 1371 ac. Pop. 498.

CORTONA (anc. *Corydalla*, *Cortona*) a tn grand duchy Tuscany prov. of and 52 m. E.S.E. Florence. It rises amidst vineyards, on the acclivity of a steep hill and commands a magnificent prospect of the Tiber and the Tuscan lakes, the mountains of Apennines, and the wide and verdant vale of Chiana. It is very ancient, having been founded by the Pelagi who made it their capital. It was subsequently colonized by the Romans. The original walls of Cortona are still to be seen, serving as foundations to the modern walls, which were built in the 12th century. Cortona being considered the capital of the ancient Etruria, was chosen as the seat of the Etruscan Academy in 1738. Many interesting antiquities are still preserved in the town. It has six churches and a cathedral, containing some fine pictures and a tomb said to be that of the Consul Flaminius. It has also a theatre, library, cabinet of natural history museum of antiquities, &c. Quarries of very fine marble are worked in the neighbourhood. A small sepulchral chamber a little below the town, has reserved the name of the Grotto of Pythagoras. This is a building, however, no an excavation, being formed of large blocks of sandstone and containing a room about 7 ft. sq. with square recesses, probably for altars or urns. It is interesting, chiefly as indicating that the builders were, without doubt, acquainted with the principle of the arch, though, should perhaps, be confined much to it. P. 11535 4577.

CORUGHE, a tn. and par Portugal, prov. Estremadura, 24 m. S.E. Santarém, near the Sorraia. It is well built, contains a church, hospital, and almshouse, and has an annual fair. Pop. 3250.

CORUIÑHE (Locat) a small lake, Scotland, Isle of Skye, 12 m. S. Portree, 1 to 2 m. in length, by 4 m. in breadth. It contains a few rocky islets, and many historical incidents are connected with it. The scenery around the lake is exceedingly wild and mountainous.

CORUNA (La) a prov. Spain, one of the five into which Galicia is divided, comprising the N.W. extremity of the Spanish peninsula, between lat. 43° 21' and 43° 47' N. and lon. 7° 40' and 9° 14' W.; bounded N. and W. by the Atlantic Ocean, E. by prov. Lago and S. by Pontevedra; area, 4699 sq. m. pop. name name. It is mountainous, interspersed with plains and fertile valleys; the coast, bold, and rugged, forms some

deep bays and lofty coasts. Some of the mountains are capped with snow during the greater portion of the year; their lower slopes are covered with forests of pine, oak, beech, chestnut, and other timber for ship and domestic building, the intermingling with wild hours and wolves, which, in winter descend into the plains, and commit great depredations amongst the flocks and herds. Some iron, copper silver and coal mines are wrought, but to no great extent. The province is watered by several rivers, the chief of which are the Ulla, Tambre, Lema or Jallas, Mandeo, and Mura. The plains and valleys are in some places, exceedingly rich, yielding good crops of maize, rye, millet, oats, hemp, flax, beans, peas, grapes, olives, oranges, large quantities of potatoes, and other fruits and vegetables; but little wheat or barley is grown. There are immense tracts of meadow land, on which numerous flocks of sheep, goats, and considerable numbers of horned cattle, depasture and play find excellent food in the autumn, beach-woods, chestnuts, &c. in the forests. Mineral and medicinal springs—feruginous, chalybeate, calcareous, and sulphureous—are plentiful. In the high lands, the climate is cold, damp, and much exposed; while the valleys are warm in summer and have scarcely any severe frosts in winter. Heavy rains are frequent at some seasons of the year. Warehousing, tanning, making hats, shoes, hardware, earthenware, ropes, and sailcloth shipbuilding, fishing, preparing beams, tillage, and cattle-rearing occupy the inhabitants. Brandy wine, oil, fish, bacon, fruits, vegetables, iron, copper lead, soap, and paper are exported. Glass sugar codice, vinegar cutlery, perfumery and other articles imported. The state of education is most deplorable, and the condition of the peasantry wretched in the extreme. Pop. 511,492.

CORUNA (La) (Latin, *Corvianum* English *Corvian* French *Corvigne*) a city and seaport, Spain N.W. coast Galicia, esp. above prov., on the extremity of a small peninsula at the entrance to the estuary of the Coruña river 518 m. N.W. Madrid lat. (Circle St. Antonio) 43° 25' 59" N. lon 8° 22' 42" W. (n.) (For plan of position, &c. see FERRAZ.) It stands partly at the base and partly on the acclivity of a hill, these portions being called, respectively the upper and lower towns, the former is walled round, and defended by a citadel. The streets of the upper division of the city are steep and narrow those in the lower are more spacious. Both are extremely filthy, though among the lower part of the city in Spain it contains plain-looking townhouses, a convent-house, several churches and convents, two hospitals, two barracks, an arsenal, prison house of correction, and schools of design, mathematics, and navigation and two theatres, the old and new the latter of which is a very elegant edifice. It likewise possesses several literary societies, two small libraries, and several benevolent institutions. Coruña is the residence of a captain-general, and a provincial intendant, and of British French, Danish, and Sardinian consuls and the seat of the supreme court of justice for Galicia. The harbour is spacious and secure, and protected by two forts, one on an insulated rock at its mouth called Fort St. Antonio, which has been used as a state prison the other Fort St. Diego situated on the mainland. The chief objects of interest are the royal arsenal, and the lighthouse, situated on the N. shore of the peninsula, called the Tower of Hercules, 93 ft. in height, and which is seen, in clear weather from a distance of 60 m. It is said to be of Roman construction. The linen manufactures of Coruña were famous in the peninsula, have declined in consequence of foreign competition, and are now nearly extinct. The only manufactures of importance now carried on are glass soap, starch some common cottons, iron-founding, oil-cloth, hair and the selling of provisions. It has also some considerable fisheries, particularly of sardines. It carries on an active trade with England, the Spanish West Indies and South America, but with France Portugal and the United States its trade is less important. Sugar hides, tobacco, salted fish, some dried tallow, &c. to the annual value of about 2500 000 form its chief imports and corn, legumes, salted fish, and cotton bawson, to the value of about 2150 000 its chief exports.

In the bay before Coruña, the famous Spanish Armada was refitted during four weeks, May 1598, prior to sailing for England; and under the walls of the town Sir John Moore fell, in the engagement which took place there with the French, under Marshal Soult, on January 15, 1809. He was buried at

the extremity of the upper town, in the Campo de San Carlos; a tomb has been erected over his grave at the expense of the British Government, and the ground around it has been planted as a public alameda. Pop. 19,415.

CORVO on Isl. N Atlantic forming the most N W of the Azores; lat. (N point) $39^{\circ} 48' 30''$ N; lon. $31^{\circ} 7' 15''$ W. Area, 16 sq m. Its coasts are high and rocky, but the interior is fertile and well-wooded. It has two small parts which are seldom visited by strangers. Hops, wood, and corn are exported to the other islands and its wheat is esteemed the best of all the Azores. The inhabitants, who are very poor, amount to about 700.

CORV OBEIRO, a cape, N W coast, Africa 40 m. N Cape Blanco; lat. $21^{\circ} 10' 15''$ N lon. $17^{\circ} 17'$ W.

CORWEN, a market town and par N Wales, co. Merioneth. The town is beautifully situated on the Den, in a romantic valley; at the foot of the Berwyn mountains, 84 m. W Llan gollen and consists of one street, composed of plain stone houses, built on each side of the great Holyhead road. Water abundant. It has an Established church, three dissenting chapels, a school reading-room and a union workhouse. Area of par 12 846 ac. Pop. (agricultural) 2069.

CORTON par Eng Devon, 1884 ac. Pop. 311.

CORZOLA, a tn Dalmatia. See CROATIA.

COE, or Koa [now called *Shoolie*] on Isl. Aislaithe Turkey in the Greek archipelago east of Anatolia, at the mouth of the gulf of same name; lat (W point) $36^{\circ} 43'$ N lon $26^{\circ} 40'$ E (s. e.) It is 21 m. long and about 6 broad; on the S is a lofty range of mountains and the remainder of the island is a delightful plain, of extraordinary fertility producing in abundance, corn, cotton, milk, and wine, all of excellent quality. Orange lemon, pomegranate fig and other fruit trees abound especially in the neighborhood of Coe, the only town of importance in the island. It occupies the site of the ancient city, and the public square there is an enormous plain, probably the largest in the world, supposed to be 1000 years old. It is a miserable place and the harbour formerly much resorted to has now become so silted up, that vessels of the smallest size cannot enter it. The principal commerce of the town and island consists in the exportation of fruits to most of the islands of the archipelago. The Turks inhabit the town, while the Greeks are scattered in villages through the island. Coe gave birth to Hippocrates the physician, Apollon the painter and Meton the philosopher. It became subject to the Romans, Byzantines, and Ottoman empires in succession. The population of the island, formerly 20,000 has, notwithstanding the fertility of the soil, and the delightful climate, been for many years gradually declining, and does not now exceed 4000.

The Gulf of Coe, called also, *Boonoonoo* [anc *Ceramuff*] on the coast of Anatolia, is 17 m. wide at its entrance, and extends inland 52 m. It is very deep, being seldom less than 300 fathoms, even near the shore. On the S. shore are numerous excellent harbours but as there are no inhabitants near the coast, it is with great difficulty that supplies can be obtained. In the summer months the upper part of the gulf being unhealthy is abandoned by the inhabitants.

CORALA a tn, Mexican confederation state of Sonora and Chihuahua, 80 m. N E Mazatlan. Near it is a gold mine, exceedingly rich, which, however is not worked. Pop. 6000.

CORBY, par Eng. Leicester; 2560 ac. Pop. 1036.

CORCEL, a tn. Prussia. See KOENIG.

CORSENZA [anc *Cosentia*] a tn, Naples, cap. prov. Calabria Citta, 150 m. S. E. Naples, at the foot of the Great and Etna, in a valley surrounded by hills, 11 m. E from the Mediterranean. The Busento, which is here crossed by two bridges, divides the town into two parts, and the marshes formed by the river above and below the town are said to render the situation unhealthy. It is fortified and has a vast citadel. The streets, with one exception, are narrow and crooked. The town contains a handsome cathedral several churches and convents, a sanctuary an hospital, a founding hospital a magnificent courthouse or tribunal, one of the finest buildings in the kingdom a royal college, two seminaries, and a theatre. It is the seat of an archbishopric, and of the civil and military courts of the province, as well as the residence of the civil and military authorities. Guntery and carriages are manufactured here and a considerable trade is carried on in silk, wine, madder, fruits, wax, &c. The

extensive garrisons of 6000 is at a short distance from the town. In the 16th century a celebrated academy was founded here by Bernardino Telesio a native of the town.

Cosmas, anciently the capital of the Bretili, subtribe to the Boemans, was taken by Huns from whom the Boemans reoccupied it soon afterwards. Alaric, the Goth, laid siege to it in 410 and before his walls were entered by his soldiers in the bed of the Boemara. It was afterwards captured by the Saracens, who were expelled in turn by the Northmen who, having founded the kingdom of the two Sicilies in 1130, made Cosmas the capital of Calabria Citta. Pop. 8000.

COSEBROVE, par Eng. Northampton; 1780 ac. Pop. 641.

COSEBROTON par Wales, Pembrokeshire; 2440 ac. Pop. 551.

COSEI Koon, or Koon, a river Hindostan, rising in two branches in the mountains of Nepal not far from Khatmandu, flowing S. E. to near Chitaur, then turning almost due S. and, after a total course of 300 m. falling into the Ganges, lat. $26^{\circ} 21'$ N lon. $87^{\circ} 15'$ E on the 1st bank, by a channel 2 m wide which, however except in the height of the rainy season, is almost completely occupied by islands and sandbanks. Its principal affluent is the Arun, supposed to rise on the N side of the Himalaya.

COSIHUICLACHI a tn Mexican confederation state Chihuahua, under the parallel of $28^{\circ} 13'$ N Its population which formerly amounted to 10,700 has, in consequence of the falling off in the productivity of the mines in the neighbourhood, been reduced to 8000.

COSELIN, a tn and gov Prussia. See KOSCH.

COSMOLEMO ISLANDS, a group in the Indian Ocean, at the N. E. entrance to the Mozambique Channel about lat. $9^{\circ} 40'$ S lon. $47^{\circ} 45'$ E. This group consists of a ring of coral about 80 m. in circumference, including a magnificent lagoon, into which there is no apparent entrance. These lakes are sometimes resorted to for fish, and a few blacks are left on them, who wait the vessels round. On the S. side there is a patch of sand, where small vessels may anchor during the N monsoon.

COSME (St) a vil France dep. Seine-et-Lore, so close on Calson-sur-Saône as to be only its suburb. Pop. 1741.

COSME [anc. Cosmas] a tn. France, dep. Nièvre, 31 m. N W Nevers, r bank Loire, at its confluence with the Noyau. It is well built, and the streets are clean and straight. The Loire is crossed here by a suspension bridge, and the Noyau or Noyau furnishes water power to numerous works, amongst which are several cottons, and an anchor manufactory. There is a considerable trade in iron, grain, wine, wood, hemp, and cattle. Under the Romans Cosme was called Condole. Pop. 5876.

COSIPOR, or KHAMUR, a fortified tn India, beyond the Brahmaputra prov Cachar of which it is the capital. It is situated on the Madhur, a small stream, celebrated for the clearness of its waters, 61 m. E Sibet, in Bengal. It was formerly a flourishing place, and enjoyed almost all the trade between Bengal and the kingdom of Assam.

COSMAKKE, the general term employed to designate a military people of Russia, and also part of the territory which is occupied by them. The following article first describes the territory and then gives a short account of the people.

Cosmaka, Don, a gov S. Russia bounded N by gov's Saratov and Voronezh, W. Voronezh and Ekaterinodar, S. by Gov of Anz and Caucasus, and E. Saratov and Astrakhan. Greatest length, from N to S, 350 m. breadth from W to E, varying from 130 m. to 275 m. The government consists, for the most part of one of those extensive flat called steppes but there is some hilly land, particularly towards the S which may be regarded as forming one of the last ramifications of the Caucasian chain. The soil is in general so very sandy as to be scarcely fit for cultivation. Towards the N there is some tolerably arable land and along the banks of the rivers even a rich alluvium is found; but the S, where not absolutely waste, affords, at the best, an inferior pasture. The whole surface belongs to the basin of the Don, which forms a kind of semicircle around its centre, and, towards the S of the government, approaches the Volga so near as to be, at one point, not more than 55 m. distant from it. Unfortunately the land between the rivers is so hilly, as to prevent the formation of a canal, which might unite them. The Don, besides watering the government centrally, renders several

important tributaries while it, and, after the confluence of the Marouich, has a breadth of about 1000 yards. The alluvial soil, on the whole, mild and agreeable; but in winter both intense cold and violent storms occasionally prevail. The chief employment is the rearing of cattle; but, where the soil is suitable, all the ordinary cereals and legumes are cultivated, and yield good crops. Hemp and flax are also grown and good wine is produced, but it is scarcely inferior to the light French wine, and part resembling Burgundy. From several lakes on the R. large quantities of salt are obtained. Fish, including sturgeon, salmon, and carp, abound, and form a principal article of food. The service of the government is in great request, and forms a considerable export.

Cosacks, people.—The people from whom the above government derives its name are not confined to it, but form the principal part of the population of several extensive districts in Russia, where, according to the localities which they occupy they receive different designations, and are called Don Cosacks, Cosacks of the Black Sea, Kalan, Volga, Ural, Siberian Cosacks, &c. Their origin is involved in considerable obscurity. Their very name has been the subject of keen disputes, but the prevailing belief now is that it is of Tartar derivation. In general, it may designate any light-armed trooper; but it is often used in a more vituperative sense, and applied to any member of a vagrant horde which roams or makes incursions into a district, and lives on the plunder of its inhabitants. Though the Cosacks possess several characteristics by which they are easily distinguished, they do not seem to have sprung from one original stock. There is evidently a mixture of blood among them. They bear a close resemblance to the Russians, but are of a more slender make and have features which are decidedly more handsome and expressive. They have a quick, keen eye and an ear which is ever on the alert, and are active, spirited, and brave. Their intellect is good, and they often exhibit a remarkable degree of acuteness. Education accordingly has made some progress among them, and their old capital, Simbirsk, contains a gymnasium in which the proficiency of the Cosack pupils would not suffer by comparison with that of any other town of the Russian empire. Their language is a mixture of Russian, Polish, and Turkish; their religion that of the Greek Church, to which they are strongly attached, and the superstitious practices of which they are particularly careful in observing. In many of their domestic habits they contrast favourably with the Russians. They are much more cleanly and pay a greater regard to personal appearance. Like them, they often drink to excess, but seem more alive to the degradation which results from it and, accordingly when they do indulge in bacchanalian orgies, have generally the sense to keep them private. The martial tendencies of the Cosacks are very decided, and have from time immemorial formed their distinguishing feature. The whole structure of society among them is military. Originally their government formed a kind of democracy at the head of which was a chief or hetman, of their own choice while, under him was a long series of officers, with jurisdiction of greater or less extent, partly civil and partly military, all so arranged as to be able, on any emergency to furnish the largest military array on the shortest notice. The democratic part of the constitution has gradually disappeared under Russian domination. The title of chief hetman is now vested in the hereditary or the chosen, and all the authority rests between and other officers are appointed by the Crown. Care, however, has been taken not to interfere with any arrangements which fostered the military spirit of the Cosacks and hence all the subdivisions of the population into petty and minor sections, with military heads, and of the villages are retained, still remain. Throughout the empire, whenever particular energy, vigilance, and rapidity of movement are required, the qualities by which the Cosack is distinguished mark him out for employment. His proper sphere, undoubtedly is to act as a light-armed trooper and to be, as the celebrated *Barrower* emphatically expressed it, the eye of the army protecting its rear in retreat, or pushing forward in advance, and making it almost impossible for a flying enemy to escape. How admirably the Cosacks are adapted to these purposes, was made known to all Europe during the disastrous retreat of the French from Moscow. The Russian government, however, has found other fields for their exer-

tion. When a frontier is to be guarded, the qualities required very much resemble those which make the Cosack so valuable as an army in the field; and, accordingly colonies of Cosacks have been planted on all the borders of Russia, along the Kaban and the Turke, and form a most effective barrier against sudden incursions by half-civilized tribes. In the Caucasus, however, the Russians have met with a foe of a different stamp; and, instead of having merely to repel sudden incursions, are obliged to fight for every inch of ground on which they plant their feet. In this way they have been constrained to fix upon a series of strong positions, on which they have constructed a kind of forts, called *kreposts*. The nature of these, the sudden attacks to which they are exposed and the mode of giving the alarm so as to call in the

KREPOST OR COSACK POST ON THE CIRCASSIAN FRONTIER
From *Memories of the East*, Supposed to be near Constantinople.
